

Wednesday Will Climax School

HERE ARE THE MERCHANTS IN FINAL SESSION

This is a final reminder to cooking school attendants that holding of the school is made possible through the cooperation of local merchants and distributors at other points.

Foods the second day of the school were furnished by Edd Dodds, south side of the square, that live-wire Red & White store with "Mack" Casey as manager. Edgar Taylor's and Buddy Martin's Nu-Way Grocery was responsible for Monday foods. Meats for the entire school are furnished by Piggly-Wiggly.

Featuring the Tuesday session was an Electrolux refrigerator, sold locally by Roche & Gilmore. Cold-spot, distributed here by the Sweet-water retail store of Sears, Roebuck & Company, is to be displayed and used Wednesday. Frigidaire, for which King & Brown are the dealers, was demonstrated Monday.

Other Products Used.

A Garland range, demonstrated by Community Natural Gas Company, is being used throughout the school. Decorations were by Bell's Flower Shop.

Products used exclusively by Miss Hogue during the three-day session are as follows:

- Snyder Bakery bread.
- Robinson's Dairy milk and cream.
- Automatic cookers and sealers.
- Velva syrup.
- Miracle Whip salad dressing.
- Pen-Jel.
- K C baking powder.
- Gold Chain flour (handled exclusively here by Edd Dodds).
- Admiration coffee.
- Mrs. Tucker's shortening.
- Coca-Cola.
- Manhattan Hotel is Miss Hogue's abiding place while she is here, and The Tavern is her eating place.
- She has used a Studebaker, sold locally by Pollard & Jones.

Other Hogue Choices.

The Cave Beauty Shop, operated by Lil Jo Wilson, has been doing her beauty work.

She wears Nellie Don house dresses daily, sold here by Bryant-Link Company.

Other advertisers taking part in the school during one or more of the three days are:

- Palace Theatre.
- Wade's Service Station.
- Pete Benbenek's Shoe Shop.
- Railway Express Agency.
- Louder Motor Company.
- Graham & Martin.
- Stinson Drug Company.
- Snyder National Bank.
- Snyder Transfer Company.
- Blue Jacket Shine Parlor.
- Snyder Steam Laundry.
- The Fair Store.
- J. C. Penney Company.

The Times again requests that these stores and products be patronized, when possible, by housewives who enjoy having the free cooking school.

O'Dowd Coming for Revival Preaching

E. H. O'Dowd of Waco will come to Snyder today to do the preaching for the Church of Christ revival. The local minister, Roy J. Clark, has been in the pulpit since the meeting began Sunday. Morning services are at 10:00 o'clock, evening services at 8:30 o'clock.

The local minister will lead song services for the remainder of the meeting, the scheduled Lubbock singer finding it impossible to come.

Youngest Wife Will Get Feature Prize

The feature prize Wednesday afternoon will go to the youngest wife present at the school that day, just as the feature prize Tuesday, a pot plant from Bell's Flower Shop, went to the oldest woman present.

Remember, dozens of other prizes will be given the final day of the school—more prizes than during either of the other two days. This merchandise is contributed by advertisers who are taking an active part in the school.

Will Rogers Film Brought Back by Popular Demand

In days of old, when knights were bold—and told dreadful fibs—is when the action of "A Connecticut Yankee," starring Will Rogers, and coming to the cool Palace Thursday and Friday, is set.

Brought back in response to the requests of millions of Will Rogers fans who considered it his greatest picture, "A Connecticut Yankee," based on one of Mark Twain's most popular stories, is a droll, fanciful story, full of riotous comedy and adventure.

The plot of the story begins when Rogers goes back to the days of King Arthur in a dream. Just as much surprised by the knights as they are by him, Rogers gets the upper hand when he starts showing a little modern magic.

There are some hilarious episodes as Rogers conquers villainous opponents, installs bathtubs in merry England. But the punch of the picture is reserved for the close when Rogers rides off to save a damsel fair from the clutches of Queen Morgan Le Fay, played by Myrna Loy.

David Butler directed the picture, which features Maureen O'Sullivan, William Farnum and Frank Albertson in the principal supporting roles.

Napkin Substitute Handy for Parties

For little children too young to manage the elusive paper napkin at the birthday party, try this plan.

Use a well fitting bib pattern and cut bibs of crepe paper in a color to harmonize with the other decorations, or paper napkins may be used. Reinforce with adhesive tape at top corners and punch small holes for ribbon ties. If the heavier grade of crepe paper is used, stretch and press with a warm iron before cutting bibs. They delight the children and protect the party clothes.

Olive Oil Handy for Many Home Uses

Olive oil may be used in more ways that salad dressing. As a toilet accessory it is extremely useful. The oil should be of pure Italian sort.

Heated, it makes an excellent bath for the hands and elbows, smoothing away any roughness. A weekly 15 minutes soak in hot olive oil has a beneficial effect on fingernails. Afterward, the cuticle should be pushed back with an orangewood stick and the nails manicured as usual.

Hot olive oil is beneficial to the scalp and is good for either oiliness or dryness. It should be rubbed in at night prior to the shampoo.

Taken in spoonful doses, olive oil is a splendid rebuilder of wasted tissues as well as an internal lubricant.

Side Glances at the Cooking School

AS SEEN BY A MERE MALE REPORTER

MISS HOGUE has such
*
AN AIR OF genuine
*
FRIENDLINESS that you
*
COULD NOT possibly dislike
*
HER. AS THE decrepit

*
WANT TO mention the boys
*
WHO HELPED keep the
*
COOL PALACE Theatre in
*
SUCH CLEAN, attractive
*
CONDITION. THANK YOU.

Woman From New Mexico.

Among visitors at the school Monday was one woman from New Mexico. Several attendants were from Hermleigh and other nearby towns, while rural communities were represented by at least 15 or 20 women. The Times invites these out-of-town folks to come again the final day of the school.

Papers Delivered.

As about 1,000 housewives can testify, copies of each of the cooking school issues have been placed at the doors of local homes. The papers were delivered Sunday morning and Monday afternoon, and this final daily comes Tuesday afternoon. In addition, every regular subscriber in the trade territory, outside of Snyder, received each of the cooking school specials.

Joint Baptist Service.

Rev. J. W. Bailey, colored evangelist, will preach at the colored Baptist Church here tonight at 8:15 o'clock. Concluding service of the ten-day revival he has been conducting here will be a joint service at the First Baptist Church Wednesday evening at 8:30 o'clock. Hundreds heard the well-known evangelist at a joint tabernacle service Sunday afternoon.

It is not necessary to condemn others in order to brag on yourself.

Auto Salesman (explaining to a green customer): "This is the radiator and this is the fan."
Lady: "Oh, then it's an all-season car."

QUESTIONS TO BE ANSWERED LAST LECTURE

Attendance took a sharp upward jump Tuesday, as more rural and Snyder women took advantage of the second annual Times Free Cooking School.

Miss Jessie Hogue, nationally known lecturer and home economics expert, said she is highly pleased with success of the school, and her sentiment was echoed by the hundreds of women and a few men who attended.

The final session Wednesday will feature not only some of Miss Hogue's most wanted recipes, but answers to many questions asked by attendants, and a number of useable household hints.

Recipes Given Tuesday.

Following are the recipes that were given in the Tuesday lecture and demonstration:

- Shrimp Creole.
- Coffee ice cream.
- Peaput bread.
- Refrigerator cake.
- Streamline cake.
- Baked cabbage with tomatoes and cheese.
- Carrot timballs.
- Tray of molded salads (cheese ring for salad, individual fruit salad, banana salad, frozen salad).
- Roast Pork.

Shrimp Creole.

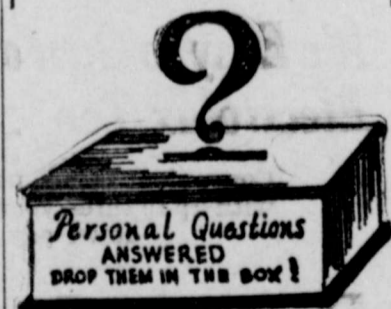

Probably the featured dish of the day was shrimp Creole. Its ingredients are: 3 cups hot boiled rice, 2 tbsp. Mrs. Tucker's shortening, 2 onions sliced, 4 stalks chopped celery, 1 tbsp. Gold Chain flour, 1 tbsp. salt, 2 cups tomatoes, 2 cups peas, 1 tbsp. vinegar, 1 tspn. sugar, 1½ cups cooked shrimp, 2 tbsp. chili powder.

Cook onions and celery until brown in shortening, add flour, seasonings and slowly the water. Cook 15 minutes. Add tomatoes, peas, vinegar, sugar and shrimp, continue cooking 10 minutes or until shrimp are thoroughly heated. Mold ice either in cones or ring and surround with shrimp Creole.

The experienced cooking school leader came to Snyder from San Saba. She recently conducted a school at Colorado, and earlier in the year was at Abilene, San Angelo and other West Texas cities.

Joseph Stalin runs Russia on a salary of a bit more than \$3 a day. We haven't heard, but perhaps some member of his family helps out by writing a column.—Troy (N. Y.) Record.

DON'T FORGET The Question Box

IN THE LOBBY Of the Cool Palace

Don't Forget That Box for Questions

As you come to the school Wednesday, you will have the opportunity of leaving questions (written on the special slips printed for the purpose) in the box near the entrance.

Miss Hogue will answer them from the platform. Tuesday was the principal day for question-answering, but of course if you have questions for Wednesday, they too, will be answered.

Ask anything about kitchen or household. Miss Hogue can answer you—or tell you a good reason why she can't.

"The Question Box" is yours. We invite you to use it.

LET'S TALK ABOUT CLOTHES

BY A YOUNG MODERN

Everyone's rushing into prints for dinner these days. Be-flowered printed silk dresses and two-piece get-to-gathers are the last word in dinner suits, and they're as gay and cheerful as only prints can be.

Printed silks begin with a sleeveless dress that has a high tailored neckline—usually made with a tiny pointed collar. Then comes the quaint little fitted jacket, showing a narrow waistline accented with a flashing bright-colored patent leather belt or a trick belt of the silk laced with spaghetti-thin string. The collar of the dress finishes the jacket, and tiny matching cuffed sleeves give the frock a tailored look.

These suits are trim little teasers after weeks of rather mysterious dark things that clung revealingly around the figure. The ankle length variety is by far the most popular. It shows short, fine plaiting around the lower edge of the slightly flared skirt and around the peplum of the jacket.

While you're emphasizing prints, girls at Texas State College for Women (CIA) suggest that you try your luck with an emerald green, vivid red, or lemon yellow crackling silk taffeta underskirt that will show a good inch below the colorful skirt of the dress itself. You'll be pleased with the effect.

When buying a dinner dress, it's versatility is often a purchasing point. Let's take these prints, for instance. You can wear a variety of jackets with the dress of the suit. Silver and gold lame would certainly add something to the appearance, and you can't deny the beauty of chiffon over printed silk. Try these suggestions to make that "one" dress serve for two or three.

With the approach of summer, women everywhere begin their annual search for something cool, yet something that can be worn for any number of occasions. To meet this need, manufacturers present

clever short sleeved dresses that can be used for sports, for spectator wear, and still go to town in the afternoon with a big hat, white gloves and other white accessories.

The shops are already assembling the prize assortments. Gay, one-piece, unusually designed summer dresses show different details in their make-up. They feature stitched bands, necklines with front fullness contrived by experts, buttons used for decoration as well as a purpose, and pockets cut in curves, in points, with and without flaps.

The colors are new and exciting. We found aqua, a knockout blue for blondes or redheads, shades of pink from blush to dusty coral, pale lemon yellow, and strawberry reds. White dresses are used with blazing color effects, and they are tops for summer wear, according to girls at Texas State College for Women (CIA).

Linen textures are the most interesting fabrics, and dull weaves fashion the smartest dresses. Plaits are flat, tailored with precision, and placed where they do the most good. Short sleeves are either cut with the bodice top or cleverly inset to assure freedom even for strenuous games. Cotton mesh yokes are used for contrast as well as coolness, and gently rolled collars hug the neckline and are silt down the front so that the muffled ascot scarf shows. Belts are generally of the dress material when they are not of two or three colors for the only color contrast.

White is tops for summer wear. You see it taking first place in all ranks of the fashion world, and particularly among women of the South. We especially point out the new white silk crepe ensembles that are being unpacked daily by fashion shops.

Dresses are mostly of the one-piece style with very short sleeves or a tiny shoulder cape effect. Skirts are pleated and the pleats stitched down to the kneeline. Color contrast is achieved with belts, pocket flaps, or trick lacings down the center of the chest. The jackets are either hip length or belted swagger type, with fairly wide loose sleeves.

Huge wild blazing checks in as many as four colors make stunning

jackets, and you can also wear them with cotton or linen dresses as well as the more dressy frocks. Solid bright colors in grass green, scarlet, old gold, and even violet contrast other dresses that use the same colors for bows and neck bands.

All white ensembles use chiffon ascots, scallops or pointed edgings of the white silk as trim. Some three piece white crepe outfits feature printed silk blouse tops with short sleeves, and use the printed silk for cuff facing and color bands on the jacket.

White palm beach is a smart material for the new summer suits, and silk linen ranks high with its non-wrinkle qualities. For those casual "round about the neighborhood" frocks, girls at Texas State College for Women (CIA) suggest French seersucker—a new material with all the daintiness of handkerchief linen, yet as wearable and cool as old batiste.

Some want to begin at the bottom and work down, others at the top and work up.

Go to college, but don't stop when you get there.

How to Fix Material For Basket Weaving

Those interested in basketry may like to know that crepe paper wound very tightly on light, fine wire, makes wonderful weaving material for fancy baskets, lamp shades and other articles usually made of raffia or reeds.

Any color may be used or any combination of colors. A basket of green, woven loosely and lined with white silk, would be a prize worth owning.

Also a hint for those who crochet. Such work may often be made more beautiful by embroidering the design with colored embroidery floss.

Bacon fat may be clarified by slicing a raw potato into it while fat is hot and adding a pinch of baking soda. Strain through a piece of cheese cloth.

You are a nuisance when you dump your troubles in front of another.

Some people aim high and shoot low.

It was 2:00 a. m., when the club telephone rang, and a bachelor member answered it.

Angry Feminine Voice: "Is my husband there?"

Bachelor: "No, he's gone home."

Voilce (snapping): "How do you know? I didn't even tell you his name!"

Bachelor: "You didn't need to. When the phone rang every married man in the place grabbed his hat and ducked out."

Worrying about the worries of others makes one a spiritual bankrupt.

AT THE COOKING SCHOOL

Gold Chain FLOUR
FIRST CHOICE OF ALL GOOD COOKS

To achieve the finest results in cooking, to have the most tempting dishes, as all good cooks realize, you must have the finest of materials. For baking breads, cakes and pastries—with ease—with delicious flavor, light quality, and the finest texture, experienced cooks know there is no better flour than GOLD CHAIN

Miss Jessie Hogue, competent director of The Times Cooking School, will demonstrate to you what luscious pies, biscuits, cookies, et cetera, you can bake with superior ingredients—with GOLD CHAIN FLOUR.

GOLD CHAIN FLOUR is manufactured strictly from the prime wheat of the country. It is milled and refined in Universal Mills' new and ultra-modern plant. Each sack of GOLD CHAIN you buy is exactly like the one you bought before. You can depend upon its excellent quality to be absolutely uniform.

Good Ice Cream Contains Needed Health Minerals

With the mercury shooting around in the 90s again, thoughts turn to cooling drinks and foods. Ice cream is turning in the score of a favorite dish again this season, and that is just as it should be, believes J. I. Keith of the dairy out. staff at the Oklahoma A. & M. College.

"Ice cream has long been recognized as a valuable food for its high fat, protein and carbohydrate content, but few persons have realized the value of the food for its mineral content," the dairy specialist points out. "Minerals such as calcium, phosphorous and chlorine are essential in the building of bones and teeth, and necessary for keeping tissue in repair.

"Minerals are absolutely essential to the maintenance of good health and ice cream contains all the minerals necessary for existence. About the best assortment of minerals found in any one natural food is found in milk, and ice cream contains them in greater quantities than milk because ice cream is a concentration form of milk," Keith says.

A score of different elements have

LEADER TALKS

Reichsminister Kerl addressing assembly at Ordensburg at district leader meeting.

been definitely identified among the minerals contained in milk. Potassium, sodium, chlorine, calcium, magnesium, copper, zinc, manganese, aluminum, silicon, titanium, lithium, strontium, phosphorus, sulphur, iodine and iron are all found in milk. Regardless of the fact that the body uses only small amounts of some of these minerals, their importance, even in most minute quantities, is beyond measurement in dollar value, Keith says.

A growing child requires comparatively large amounts of mineral of different kinds to build bones and teeth, for body fluids, and to aid proper functioning of the vital or-

Easy Way to Hang Pan Covers Is Given

A convenient and easy arrangement for pan covers is this: Place on the cupboard doors where kitchen utensils are kept, two tacks spanning the width of the largest kettle cover.

From one tack to the other stretch a heavy string. About six inches below, screw securely two clothes hooks about five inches apart with the prongs upward. In this way the covers are supported while the string holds them against the door at the top.

To a lesser extent adults need these minerals in order to keep teeth and bones in good repair.

"It would be difficult to find another food so valuable and so universally liked furnishing the adequate assortment of minerals such as are found in ice cream," the dairy specialist comments.

Never Chip Ice in Your Refrigerator

Never chip ice into small pieces in the refrigerator. Instead, knock off a piece of the proper size, close the refrigerator at once, and put into a bag.

This bag is best made of a double strip of canvas duck. After being folded a second time, so as to have two thicknesses, it is stitched at three sides. About three inches from the top a tape is attached, which can be wound around the mouth and tied. When the ice is thus wrapped it may be pounded with a hammer or mallet. When the ice is sufficiently fine for the use to which it is to be put, it may be taken from the bag and placed in the freezer, pitcher or pail. Thus there is no waste or litter.

Typewriter ribbons at Times office.

Some people try to drown little troubles with bigger ones.

Lime Removed From Kettle Saves Time

Hard water is responsible for the lime deposit which forms on the inside of teakettles. It is not harmful, but the more lime on the inside of the kettle the slower will water in the kettle heat.

If the kettle is aluminum or iron it may be heated cautiously when it is empty. As the metal of the kettle expands, the lime deposit will crack and can then be removed.

Treating with acid is another method. If the deposit is light, a dilute acid, such as vinegar, allowed to stand in the kettle will dissolve it. The addition of a little common salt will hasten the process. Little bubbles indicate that the deposit is dissolving in the acid.

He is a poor sport who won't take a chance on a sure shot.

Don't tear your shirt in condemning what others wear.

I WANT TO KEEP MY VITALITY

I eat
BREAD
FOR FOOD ENERGY

MISS HOGUE

has selected Bread from Snyder Bakery to be used in her demonstrations at the Cooking School

YOU can look no better than you feel. No undernourished woman has vitality. When tired and hungry eat bread or other wheat flour products for quick energy. Bread is one of the most nourishing foods and it provides helpful carbohydrates for building up vitality and energy.

The desire for buoyant carriage, vibrant good health and sustained vitality is natural to every woman. To achieve this you must be properly nourished.

The eating of more bread at meals—and between meals—is the result of modern woman's new attitude toward diet. She eats bread with everything,—it is the good companion of other foods.

SNYDER BAKERY

Ralph Mathison, Proprietor

Dreamland - - A Magic City Has Arisen

DALLAS SHOW ALREADY SEEN BY THOUSANDS

Several dozen Scurry County folks are among those who have already seen the central Texas Centennial Exposition at Dallas—called by Boyd Gatewood, writing in "Texas Parade" for June, "the Magic City of the Twentieth Century."

They return to their homes with a feeling almost akin to awe. It is hardly conceivable that such an enterprise should have arisen in a paltry eight months. But it has risen. The Times believes that its readers, many of whom are saying these cooking school issues, will be glad to have the following description of the Exposition by Mr. Gatewood:

"DREAMLAND."

Maxfield Parrish, in his bright fancy, might have painted it as one of his dream cities suspended in the azure sky. Frank Lloyd Wright, the architect, might have designed it as the masterpiece of his strange genius. Neither did. Yet it surpasses in reality the dreams of either of these artists—this city of magic, yet of stone and steel, fashioned for the Texas Centennial Exposition, which opened June 6, and closes November 29.

Eight months ago it was no more than a set of blue prints. Not a spade had touched dirt toward its realization, and the chronic scoffers were wagging their tongues: "It can never be built on time. It's humanly impossible." Yet when the president of the United States enters its grand portal for the official opening on June 13, the magic city will stand before him—complete.

It seems, and is, so short a time since Texans, proudly mindful of a hundred years of rich history and

high achievement, began to plan for a series of events over the state to commemorate the winning of Texas' independence. The central celebration was to focus on Dallas in a major exposition.

The problems of finance, site, design and what not were taken in their stride by these Texans, and today the towers and facades of more than 50 great buildings, of this \$25,000,000 World's Fair, rise on the enlarged site of what was once the old State Fair of Texas. In truth, the city of the World's Fair speaks for itself, a rebuke to the sharpest skeptic.

Not long ago a conservative newspaper grew almost lyrical in an editorial on the wonders performed in the construction of the Exposition, summoning the mythical magician Aladdin to convey the thought.

"In the Arabian Knights," observed this paper, "is the famous story of Aladdin and his magic lamp, through which he was able to have constructed gardens and palaces of entrancing beauty. In these modern days the modern intellect and science are the magic lamp. In Dallas, Director of Technical Department George Dahl takes the role of Aladdin. . . . Marvelous is the rapidity with which this magic city has unfolded.

The New Magic City.

"Chicago in 1893 offered the world its White City, the dream city of the Nineteenth Century. Dallas (and Texas) in 1936 is presenting the Magic City of the Twentieth Century. Its beauty and elegance will make it memorable among Expositions of the world."

Pass, in your fancy, through the grand portal of the Exposition grounds. What will the eye see and the ear hear in this \$25,000,000 "greatest show on earth?"

The grand entrance, over which flutter in the June breeze the six flags under which Texas has served, symbolizes the Arc de Triomphe of the Exposition itself. It is the

bright gateway to the wonders within, opening on the Esplanade of State.

This is a sweeping avenue, alive with bright pennants, which leads to the gorgeous Court of Honor. Three hundred feet wide and 1,000 feet long, it parallels on each side a reflecting pool 70 feet wide and 700 feet long. At night beams of vari-colored lights play from it on adjacent buildings temple-like in their beauty.

The Court of Honor.

The Court of Honor is where you and your friends will meet, likely as not. A splendid structure in the Grecian manner, it is one of the major units of the Exposition. It leads to the Hall of State adorned with heroic statues and murals, one of the truly magnificent buildings of all the splendid group.

Bordering the Esplanade of State are the Varied Industries, the Electrical and the Communications buildings, with green terraced courts inviting cool rest.

You will see for the first time in the history of American World Fairs two buildings contributed by the United States government, the Hall of the United States, the largest government building at any World's Fair, and the Hall of Negro Life, first official recognition of the negro race.

In time, with the air alive with band music as you promenade, you

will come to the Agrarian Way—five imposing buildings which house within their majestic walls the story of agriculture and stock and allied products.

To your right as you stroll past the Esplanade of State your eye may see the bright outline of the huge Ford building, an epic in architectural art moderne.

The Halls of Transportation and Travel, Petroleum, Varied Industries, Aquarium, Natural History Museum, Horticulture, Home of Planning and Building, Band Pavilion, Open Air Theatre in the Greek tradition, Texas Ranger Ranch House in native logs, and many others too numerous and varied for mention in so limited space, are yours to view—a breath-taking ensemble begging description.

Expressive of Southwest.

Architectural design was created with an eye to the harmonious native Southwest. The entire motif is expressive of the Southwest, merging the primitive culture with the modern American. Yet you are on a grand tour of the world.

Here is a structure out of Athens, a Roman edifice rises yonder and tall, graceful towers reach skyward of design new to the eye—they are as arresting as the Taj Mahal because they are unique.

Then, too, continuing your "Cook's

Dreamland-

(Concluded From Opposite Page)

tour," you might say, of Old World scenes to be found within easy stroll, you come upon a German town, an English village, a street, perhaps, in Mexico and Judge Roy Bean's shack where he administered his famous "law west of the Pecos."

It is a veritable kaleidoscope of changing color and scene—a thrill to the senses, a stimulant to culture, a lifetime of education packed into 200 acres, a modern Bagdad-on-the Trinity.

Go Again at Night.

When you have glimpsed it by day—and a glimpse is all that can be had in a day's tour—go again at night. If you have marvelled at the magic before your eyes under the mere light of the sun, a fairyland lies spread before you after darkness falls.

Impartial experts declare that the Texas Centennial Exposition is the most brilliant and modern in electrical display and lighting of any World's Fair. The rays of the sun, the glitter of the stars and the colors of the rainbow play through a 14,000,000 ampere lighting system, with all outlets concealed, thus eliminating glare.

Before you rise 65-foot pylons illuminated by white light with color shafts, studding the grand portal. Inside the entrance is an 85-foot shaft topped by the Texas Lone Star in proud silhouette. Four more shafts encircle the master shaft.

Color of Trees Change.

The grove of trees directly within the grounds changes miraculously from soft green to blue, as if seen through a deep mountain haze. Concealed lights flooding the trees achieve this phenomenon.

The grand canal sweeping ahead of you along the esplanade is framed in light. Two bright pylons stand at its upper point and two stately fountains spray light and water like all the jewels in a coronet. Murals on the walls of buildings are alight from beams sifting in from above.

At the lagoon end of the Hall of State, two waterfalls cascade over lighted glass facets gleaming like fire opals. Six 65-foot dazzling pylons rise before you in the center of the main plaza.

The lights are tricky. They shift upon the buildings in fascinating variation. Sometimes the graceful buildings appear to be distorted and their size radically changes before your eyes. Again, they diminish as if seen through the wrong end of a telescope.

Great Searchlights Shine.

Forever piercing the sky like rapiers are the great searchlights. Before you is the Hall of the United States, illuminated in static red, amber and blue, and the great American eagle atop the 200-foot tower appears, under the magic of electric lighting, to be in full flight.

Paris was never like this! The Midway, where joy is unconfined, is aglitter, as all midways should be. But this Midway dazzles, not only with lights, but with a spirit of mardi gras unattainable elsewhere.

You wander through the Black Forest or idle at heavy tables sipping seidels of lager; you are transported in a trice to a Yorkshire village for a bit of ale or a spot of tea, or now, South of the Rio

Grande, you may try tacos or an enchillada.

Then flash back 400 years through the history of Texas. On the world's largest stage in an outdoor theatre seating 5,000 persons one of the finest spectacles of the Exposition is under way. It is "Cavalcade of Texas," a colossal dramatic presentation of four epic centuries that gave Texas to the world, enacted by living actors.

Huge Problems Met.

Perhaps after you have seen all this—and this isn't the half of it—it may strike you what a stupendous task it was to conceive and execute. Aside from what you have seen on the surface, there were huge problems to be met and completed in the earth.

In truth, the job was to build a city comparable to one of 100,000 population. An entire sewage system to that scale was planned and laid; an electrical plant and distributing system was another item demanded, along with a water system and paving, permanent paving.

And in another feature does this World's Fair outstrip all others: Eighteen of the largest and most beautiful buildings, the boulevard system, the underground work, are built for permanent maintenance, thus forming the nucleus for a cultural center comparable to ancient Greece.

Big Stakes in This Game.

"Speaking of poker parties, I sat in on an eight-handed game one night. My luck was passing fair, and about two in the morning our host and I were the only survivors."

"Yes, yes"
"We played for small stakes for about an hour, and finally bet all we had on a heavy draw."

"Well!"
"My straight flush beat his fours, and—"

"Then—"
"I took the thirty-five cents . . ."

Small boy (excitedly): "Teacher, tell us about the end of the world."

While the teacher paused a moment for the wise answer, another boy said: "I can tell him. The world is round; and a thing that is round ain't got no end."—Bangalore Life.

COOKERY FOR MODERNS

Are you becoming bored with preparing and serving and eating the same old things? Do you feel that you would give anything for a few new ideas? Are you in search of hostess helps?

The School of Cookery conducted here by this newspaper will help you solve these and a dozen other problems in the modern manner. You will learn how to buy and how to prepare the foods most pleasing to your family and your guests

Above all, you will learn how to prepare a perfect cup of coffee—ADMIRATION, of course. The lecturer will tell you how to bring out every bit of the entrancing flavor and fragrance there is to be found in this favorite coffee of Texans everywhere.

After this demonstration you will want to go immediately to your grocer for a package of this oven-fresh, delicious coffee.

EXPERT GIVES LEFTOVER USE

Instead of considering leftovers as a liability, clever cooks regard them as the asset they really are, and contrive new dishes which are in few respects like the original. When so transformed, nine times out of ten even the family does not recognize them as leftovers.

The task of making leftovers different may look like an impossibility to the uninitiated, but according to Inez S. Wilson, home economist, it really is not hard at all, for with a spark of ingenuity and the desire to do so, wonders may be done with leftovers.

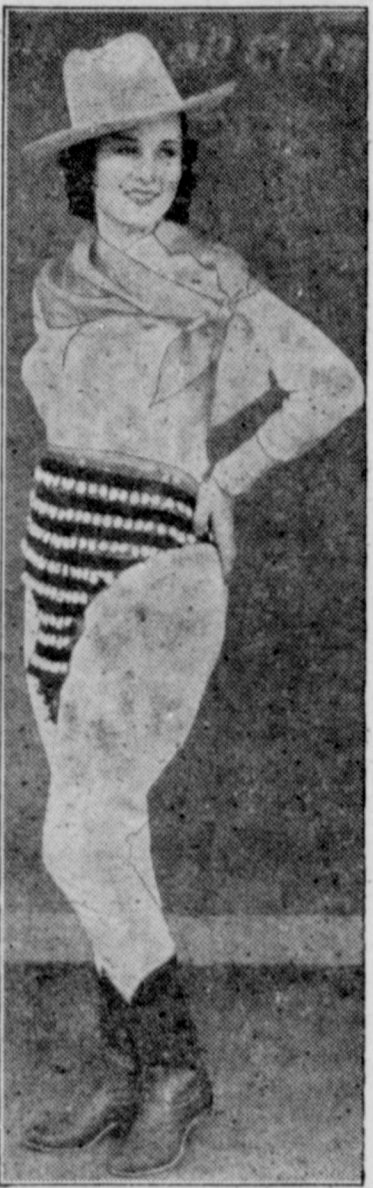

A skillful use of leftovers means economy of both time and money. Then it is possible to take advantage of special prices on the larger cuts of meat, and at the same time have easily and quickly prepared second and third meals.

Meat Loaf With Mushroom Sauce

Ground leftover meat
1 egg, slightly beaten
1 cup cracker crumbs
Salt and pepper
Milk to moisten
1 can cream of mushroom soup
Grind the leftover meat, add the cracker crumbs, the slightly beaten egg, season with salt and pepper and moisten with milk. Pack firmly into a greased loaf pan. Pour mushroom soup over the top and bake in a slow oven (300 degrees F.) for about 30 minutes.

Mrs. de Fashion (at children's party)—"Marguerite!"
Nursemaid—"Yes, madam?"
Mrs. de Fashion—"It's time for us to go home. Which of these children is mine?"—Whitewright Sun.

RANGER TROPHY

This Apache war dance loin cloth, displayed by Rangerette Mabel Rooks, will be part of the historical collection in the Texas Rangers' headquarters at the Texas Centennial Exposition, \$25,000,000 World's Fair which opened in Dallas June 6. The cloth was taken from an Apache war party by Rangers in 1860.

If the sink board is cracked, lay long lengths of wrapping twine in the crack, then fill with hot paraffin. This will stop leaking through the cracks.

Fast living is quick dying.

Longer Life for Old Purses Easily Solved

An inexpensive and pretty purse may seem useless because the snap that closes it is broken before the purse is worn out. If the purse has a flap, envelope style, that fastens with a snap fastener, a precaution can be taken that will insure long wear for the snap.

A piece of leather cut from a grove can be glued around the snap that protrudes, forming a little collar that will prevent the silk or leather that holds it in place from becoming worn and thus allows the snap to pull out and loosen. The leather or kid should be chosen to match the purse as nearly as possible in color and should be cut in one piece with a hole big enough to slip over the neck of the snap. Cement that is used for mending china is good for this kind of work, and the thinner the leather used the nicer the job will be when finished.

"Are you familiar with mules?" asked the farmer of his negro employe.

"No, sah; ah knows too much about dem to be familiar wid 'em."

The peasant women of Russia have been ordered to work six days a year on the roads. If they do well at it, Stalin lets them have a few days every summer to rest up in a coal mine.—New York Sun.

Two astronomers were discussing the limitations of space. Said one: "There is no limit to space!"

"No limit at all?"

"Well, practically none."

"Ah," said the second, quickly, "that's the way I like to hear you talk—conservatively."

Sears, Roebuck Coldspot Will Be In School Today

To improve the construction of the 1936 Coldspot refrigerator it was necessary for Sears, Roebuck & Company's merchandise development division to show the aluminum industry a manufacturing process that they deemed impossible, said V. R. Neblett, manager of the Sears store at Sweetwater.

The Coldspot will be featured in the third and final day of the cooking school—Wednesday.

"In planning the Golden Jubilee Coldspot," Neblett declared, "our merchandise development men decided that the old type of wire shelf was obsolete and should be replaced with a shelf that was of light weight, strong, rustless, tarnishless, corrosionless and with flat bars.

"This meant that each shelf had to be constructed from one single sheet of aluminum and no welding could be used. Despite their splendid facilities for evolving new manufacturing processes the aluminum people could not fill our needs, and so our men tackled the problem. Finally, after months of work they were able to tell representatives of the aluminum industry, 'Here, gentlemen, is the way to construct the type of shelf that we require.'"

Aside from this exclusive aluminum shelf feature the new Coldspot has other striking innovations such as the touch-a-bar door opener, which opens quickly at the slight touch of the finger-tip or elbow and a "handibar" in which to store surplus foods of the less perishable nature.

Operating quietly and efficiently the concealed "Rotorite" freezing unit has only five moving parts sealed in a bath of oil. This unit is super-powered and it has shown in laboratory tests lasting for months on end that it will give plenty of fast refrigeration at temperatures of 110 to 120 degrees. To facilitate the work of this unit dry zero installation, three inches thick, has been built in on all sides of the storage department.

The Sweetwater Sears' store is featuring Coldspot sizes in four, six and eight foot size.

Tray Saves Steps if Icebox Is on Porch

For a household where the icebox has to be kept on the back porch, some steps from the kitchen work table, much time and effort may be saved by the use of a tray.

When beginning to prepare a meal the articles such as eggs, milk, salad ingredients, etc., are put on the tray and brought into the kitchen. Or just before a meal is to be served, the butter, cream, salad, cracked ice, etc., are brought in on a tray. When the meal is finished the tray is again used to perform the duty of returning the leftovers to the icebox. It is then wiped off and left near the icebox, ready for the next meal.

Make a new year's resolution to avoid the old year's headaches.

Picking up a horse shoe is bad luck if it is nailed to a horse.

It is a wise man who refuses to worry over another's wisdom.

Southern Hospitality.

A New England spinster has a vivid memory of Texas courtesy. She was struggling with a hot cup of coffee in a small town railroad station, trying to gulp it before the train pulled out. A cowboy, seated

a couple of stools away, noted her plight, and seeing the conductor waving at the woman, came to the fore.

"Here, ma'am, you can take my cup o' coffee. It's already sauced and blowed."

A fool easily convinces himself that he knows more than all other people.

A pessimist tries to remember what every every other one knows he should forget.

Meals Planned For Seasons Are More Practical

Although canned foods constitute an important part of the diet and the highest quality is available, perhaps we would have a better appreciation of them later if at this time of the year we look to the fresh foods more in planning our meals.

Menus.

Breakfast—Blackberries, cream, plain muffins, bacon, milk.

Lunch—Chipped beef on toast, fresh spinach, Waldorf salad, cherries and cream, cookies.

Dinner—Stuffed pork chops, scalloped potatoes, cucumber lettuce salad, orange charlotte.

Breakfast—Fresh pineapple, bran waffle, coffee.

Lunch—Sandwich (cream cheese, olives, bacon, toast), potato chips, ginger ale salad, cookies, tea.

Dinner—Broiled steak, baked potatoes, creamed onions, fresh pea-celery salad, peach shortcake.

Recipes.

Stuffed Pork Chops—Slit thick pork chop and fill with bread dressing. Put edges together with toothpick. Place in baking dish, and bake in oven. Baste with water or seasoned meat juice.

Orange Charlotte—1 1-3 T gelatin, 1-3 c cold water, 1-3 c boiling water, 1 c sugar, 2 T lemon juice, 1 c orange juice, whites 3 eggs, 1-2 pt. cream. Soak gelatin in cold water, dissolve in boiling water, strain, and add sugar, lemon juice, orange juice, chill in pan of ice water, when quite thick, beat with wire spoon until frothy. Then add whites of eggs beaten stiff and fold in whipped cream. Line a mold with sections of oranges, turn moisture, smooth evenly and chill.

Cream Cheese Sandwich—Spread evenly on toasted or plain bread cream cheese that has been worked to a smooth consistency (milk may be added), add chopped olives and crisp bacon.

Short Cake—1-4 c butter, 1-2 c sugar, 1 egg, 1-4 c milk, 1 c flour, 1-4 t salt, 2 t baking powder. Cream butter, add sugar gradually, and egg well beaten. Mix and sift flour, baking powder, and salt, adding alternately with milk to first mixture. Beat thoroughly, and bake in buttered round tin. Cool, spreading thickly with sweetened peaches. Cover with whipped cream if desired.

Tomatoes stuffed with crab meat or shrimp make a delicious salad. Peel tomatoes, place on lettuce and serve with your favorite salad dressing.

Don't look down on one who looks up to you.

The Hindenburg Visits in U. S. A.

Giant new Zeppelin leaving her hangar at Friedrichshafen, Germany. Although in regular service to South American ports for many months, her arrival at Lakehurst, New Jersey, with 51 passen-

gers, marked her first North Atlantic crossing. It is one of the largest Zeppelins in the world.

There are more than 4,000,000 lepers in the world today.

Outdoor Neighbors.

A new poem by Edwin Markham, world-famous author of "The Man With the Hoe," appears in this month's Progressive Farmer, of especial interest to all nature lovers:

I will go down the roads today,
Humming a vagrant hymn:
I will enjoy a thousand treasures,
Nor ever break a limb.
And I will listen to the birds
And watch them revel and run—
Will listen to their lyric words,
And never murder one.
Then I will watch the glad ants carry
Food to their quiet homes;
But I'll not let my careless steps
Ruin their buried Romes.
I also welcome other friends,
The squirrels on their round,
With happy frisky tails awhirl—
A music with no sound.

And here the grasshopper at noon
Hides from the sun's hot scorn—
Hides here, remembering Egypt;
yes,
And Ruth among the corn.

I watch the worm, too, scribble the dust
With many a patient squirm.
Not I—not even a god—would dare
Offend this creeping worm.

For there are Powers that hide behind

Deep in the Secret Night,
Waiting the Inevitable Hour to rise
And set all wrong things right.

Where grass stands tall around the springs
I'll push my forehead down
And watch the bugs and other things
Run in their happy town.

And they will never need to fear
That I will let my feet
Tread on them, but will leave them there
Traveling their shady street.

Perhaps some Sentinel from above
Watches each hill and hollow—
Some One who feeds the hungry snail
And caters to the swallow.

Run from your creditors and your credit will fly from you.

AT THE COOKING SCHOOL

Preserve Summer's Surplus for Your Winter's Needs!

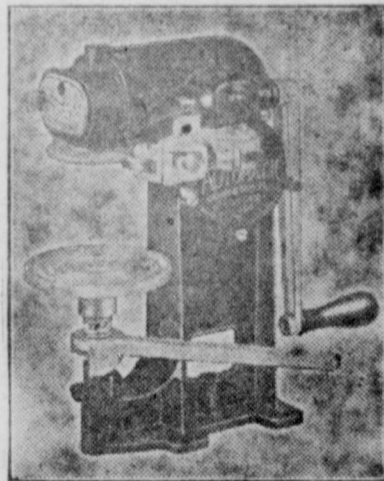

Says Miss Jessie Hogue, Demonstrator
At The Times Free Cooking School

For Canning In Either Tin Cans or Glass Jars—

There is no substitute for the Pressure Cooker. It is the only satisfactory method recommended by our government and canning authorities for the proper canning and preserving of all fruits, vegetables and meats.

For your convenience, particularly while canning, you will find permanently imprinted on the inside of the cooker cover the number of glass jars or tin cans your pressure cooker will hold.

The Master Sealer Guarantees Perfect Results

With this machine, the housewife can seal cans as successfully as the large commercial cannery. Simply put the product into the can, put on the lid, set the can in place and turn the crank. Even a school child can operate it easily. A can-saving device is included, which permits the use of a can three times.

All who see and use the Automatic Can Sealer are most enthusiastic in their praise. With it an inexperienced operator can make just as good a seam as the veteran who has canned in tin for years.
