INTEREST HIGH IN ROTAN WELL

Local interest is running high this week in the Joe Robinson No. 1, three miles northeast of Rotan, which came in Saturday afternoon as a gusher estimated at 1,500 barrels daily of high gravity oil.

Production was reached 250 feet above the depth anticipated, which accounted for lack of preparations when the well blew in, topping the derrick with a stream of oil. Tank equipment is being installed. Southern Oil Corporation drilled the Robinson well.

Leasing activity in acreage adjoining that of the drilling concern is reported to be heavy.

GRAIN LOOKING BETTER AFTER MAY SHOWERS

Soaring Wheat Prices and Poor Crops in Other Areas May Mean \$500,000 Dividend.

The county's grain crop, recovering rapidly from its threatened droughty outlook early this month, promises to yield at least \$400,000, possibly more than \$500,000, for its growers.

This estimate is based not alone on the promise of a fair to good crop on upwards of 50,000 acres, but on soaring wheat prices and on reports of poor crops in vital parts of the wheat belt, including the north Panhandle.

Unless the market breaks considerably before the bulk of the county crop is harvested next month, wheat will bring farmers in the neighborhood of \$1.25 per bushel.

Saturday showers and other showers in scattered parts of this trade territory within the past few days, coming on the heels of a rain averaging more than an inch 13 days ago, helped establish 1937 grain prospects more firmly.

Near completion of the small grain elevator here, to be operated by the Scurry County Grain Company, is announced by the owners, D. P. Yoder and Ely, Arnold & Ely Gin.

Agents for combine concerns say their machines are moving rapidly since wheat promises such a healthy yield.

Colored Quartet Sings For Lions Tuesday At Noon

The Royal Ace quartet from Houston, four colored singers who know their harmony, featured the Lions Club program Tuesday at noon. The singers gave such favorite spirituals as "Swing Low, Sweet Chariot." They were accompanied to the club meeting by the local colored pastor, Rev. James Hammond of Abilene, and by Roy Jennings, leader of the colored Baptist congregation here.

Wayne Boren, club member, gave an interesting talk on insurance, one of a series of talks being given by members on their business or profession. He described insurance as "the substitution of certainty for uncertainty." He gave statistics to show that insurance is more than 200 years old, and more than 150 years old in the United States.

A nomination committee composed of H. L. Vann, Wayne Boren, A. C. Alexander, Marcel Josephson and B. G. Johnson was named by Club President Frank Farmer to submit names on which the club will ballot later in the month. Officers for the new fiscal year will be installed in June, and will take office in July.

Demonstration for Pyron Four-H Girls On Finishing Seams

"I am going to give a demonstration on seams," said Mrs. Jordan Miller home economics teacher of Pyron, to the 4-H Club girls May 5. Mrs. Miller showed the members how to make seams for their slips. She made a sample of each seam she sewed, and left the samples for members to observe.

At the business meeting, Katherine McGlothlin, clothing demonstrator, resigned, and Opal Jo Williams was elected. Her poultry demonstrator, Gladys Reed, resigned, and Sarah Julia Taylor was elected. The secretary, Flossie Wells, resigned, and Katherine McGlothlin was elected.

Twenty-two members were present; two visitors, Mrs. Marvin Farmer and Mrs. Floyd Light; Mrs. Miller and the sponsor, Mrs. Greenwood, attended. We are very glad to have visitors and hope they will come back.

Miss Jewel Hipp, assistant home demonstration agent of Fisher County, will be with us next meeting, and we shall have a discussion on poultry.—Reporter.

Best Sellers Event While Boss Is Away

"The boss is away!" Thus declared Assistant Manager Horace Mullins and other J. C. Penney Company employees yesterday, just after Manager H. L. Vann left for a Penney convention at Abilene.

But instead of letting up while the boss is away, the Penney bunch is staging a "Best Sellers" event from Friday of this week through Thursday of next week. "We want our friends to help us show the boss during this event that we can really put the selling job across," said Mullins yesterday.

Vann is attending a gathering of more than 50 Penney managers from most of West Texas and from small portions of Oklahoma and New Mexico.

Only a few days before the Battle of San Jacinto, the Texas army received two brass cannons, christened "The Twin Sisters," as a gift from the citizens of Cincinnati, Ohio, to aid the cause of independence.

ART ARNOLD'S COUSIN FROM UTAH Sees a "torture test"

"Believe me," he writes, "I KNOW Hudson and Terraplane are the No. 1 CARS. I saw what they did on the Salt Flats"

"I saw a LOW PRICED car beat the best any closed car had ever done before! That 1937 Terraplane . . . a stock car, mind you, picked at random by the American Automobile Association Contest Board officials . . . went 1,000 miles out there on those great Salt Flats, averaging 36.54 miles an hour! What a 'torture test' of endurance.

"Then a Hudson . . . 2104 miles in 24 hours! Out here, we've seen a lot of stock cars come to the Salt Flats and try for that 24-hour record . . . the prize of them all. But none ever touched what we saw that 1937 Hudson do! 37.67 miles an hour . . . for a full day and night! 32 official records for Hudson . . . on top of 8 for Terraplane!

"Then those California records! Terraplane beat every other leading low priced car . . . and Hudson beat every other Eight . . . in the Los Angeles-Yosemite Economy Run. And then . . . the Wrightwood Canyon climb! Up 9 wicked, twisting miles in 8 minutes, 20 seconds for Terraplane; 8 minutes, 9.4 seconds for an official Hudson record.

"You can bet it's Hudson for me! Those people know how to build automobiles, Art. More power. More size and room. More economy and safety and endurance than any other cars anywhere near them in price, proved in official tests. I've got mine . . . and once you drive one, you'll say it's your No. 1 CAR, too! See if you don't!"

- No. 1 Cars of the Low and Moderate Price Fields**
- No. 1 Wheelbases . . .** 117 inches in Terraplane; 122 and 129 inches in Hudson.
 - No. 1 Horsepower . . .** 96 and 101 in Terraplane; 101, 107 and 122 in Hudson. Double carburetion in Super Terraplane and all Hudson Sixes and Eights.
 - No. 1 Roominess . . .** 55 full inches of front seat comfort for three.
 - No. 1 Driving Ease . . .** with exclusive Selective Automatic Shift (an optional extra).
 - No. 1 Safety . . .** with exclusive Duo-Automatic Hydraulic Brakes and bodies all of steel, including roofs. New Double-Drop "2-X" Frame.
 - No. 1 Economy . . .** 22 . . . 25 per gallon for Terraplane; 22.71 for Hudson in Los Angeles-Yosemite Economy Run.
 - Hydraulic Hill-Hold, optional extra on all models—46 models—choice of 12 beautiful colors . . . also a complete line of Terraplane Commercial Cars.**

Snyder General Hospital

Mr. and Mrs. Ernest Sorrells of Iran are announcing the birth of a son, Jimmy Don, who weighed eight pounds nine ounces at birth Friday morning at 1:30 o'clock. Mrs. Sorrells and her young son will probably go home late this week.

Twelve patients entering the hospital since last Wednesday were all still in the hospital late yesterday with the exception of two medical and one surgical. Mrs. Hattie McKell of Colorado and Mrs. Hattie Woodard of Justiceburg were the medical patients, and Mrs. L. C. Scarborough of Colorado, who was operated Friday, was taken home Tuesday.

Other patients have been: Mrs. Ruby Stansell, Snyder, medical; Mrs. Ruby Breneman, Snyder, surgery Friday; Carolyn Niedecken, Snyder, surgery Saturday; L. E. McCollum, Hermleigh, surgery Sunday; Mrs. Ola McClammy, Snyder, medical; Mrs. Charles Rodgers, Post, surgery Monday; David Charles Rodgers, Post, medical; Mrs. J. S. Where Zenith Radios Are Built

New quarters will be occupied soon by Zenith Radio Corporation, according to advice just received by Ben Weathers of Knapp, enith agent in Borden and Scurry Counties. The new plant in Chicago is described by

Commander E. F. McDonald Jr., president of the concern, as the largest radio manufacturing on one floor in the world, capable of producing 10,500 radios in eight hours. Weathers has sold a number of the sets in this area.

Piano Pupils Will Take Examinations In District Contest

Nine piano pupils of Mrs. E. E. Spears will take examinations in Abilene today in the national piano playing tournament at Hardin-Simmons University on the work they have covered. Before pupils are eligible to take the examinations, the teacher must be a member of the National Piano Teachers' Guild.

Graded on technique and the number of pieces in their repertoire by Charles Haubel of New York, a noted piano teacher, the piano players will be placed on honor rolls. They will receive certificates with seals to indicate their rank. A grade of 90 gives the student a rating of "with honors," and a grade of 95 is "with highest honors."

A district rating has a requirement of five selections by the student; state rating requires seven numbers; and national rating is received with 10 pieces.

Students to be examined in Abilene today include June Jones, Earl Wallace Reeves, Leonard V. Gill, Billie Lue Thompson, Virginia Pruitt, Adlie Miller, Dorothy Pinkerton, Louise and Nell Verna LeMond. Accompanying the pupils, besides Mrs. Spears, will be Mr. and Mrs. J. E. LeMond, Mr. and Mrs. Whit Thompson, Mr. and Mrs. A. C. Preutitt, Mrs. Leonard Gill and Mrs. Willard Jones.

Wool Pooling to Be Continued in County

Pooling of wool from Scurry County and nearby communities continues, with a number of sheepmen just now getting into their shearing season in earnest.

Temporary stagnation of the wool market has slowed buying, but woolmen have promised to be on hand when a minimum of a carload of wool is concentrated in Snyder.

Planists to Abilene.

Louise and Ned Verna LeMond and Dorothy Pinkerton, piano pupils of Mrs. E. E. Spears, will be in Abilene Thursday to take examinations, which, if they pass, will give them high school credits in music. In charge of the music examinations will be Edwin E. Young of Hardin-Simmons University, who is one of the approved examiners of the Texas Music Teachers' Association.

While a republic, Texas had claims of land in Oklahoma, New Mexico, Kansas, Colorado and Wyoming. In 1850 the state compromised with the United States, receiving \$10,000,000 for this land.

"I've an invention at last that will mean a fortune!"

"What is it this time?"

"Why, it's an extra key for a typewriter. When you don't know how to spell a word you hit that key, and it makes a blur that might be an 'e,' an 'a' or almost anything else you like."

Be not the first by whom the new is tried, nor yet the last to lay the old aside.

Typhoid Termed 'Disgraceful' by Dr. Geo. W. Cox

Dr. George W. Cox, state health officer, characterized typhoid fever as a national disgrace and an unnecessary evil, while discussing this preventable disease. He said, "Each year about 400 Texans die of this disease and approximately 4,000 are sick with it. The average duration of illness is about six weeks; this means that the disease is responsible for the loss of 168,000 days in Texas each year.

"Typhoid vaccine is a harmless solution. This is injected under the skin in the upper part of the arm, in three doses, usually at weekly intervals. It ordinarily protects against the disease from two to three years or longer, although one who is definitely exposed to infection should be revaccinated more frequently.

"Typhoid fever can be controlled by the use of pure water, sterilized milk or clean milk, clean foods, proper disposal of sewage, screening against the fly and destroying its breeding places, by search for and care of human carriers, and by the general practice of vaccination.

"Certain people, apparently healthy, carry the germs of typhoid in their intestines or urinary tract and cause many cases of typhoid each year through handling foods with unwashed hands. They are called typhoid carriers and many cases result from personal contact with these carriers.

"In selecting a place for a vacation choose one where you know that the water and milk supply is pure. Be sure that the kitchen and dining room are screened to protect food from flies. When camping it is best to boil water used for drinking, unless you know that it is pure. Spring water may be polluted."

Borden County Farm - Ranch News

By E. B. McLeroy, County Agent

Plane table mapping of farms in the 1937 agricultural conservation program is progressing rapidly in Borden County. Two complete crews are in the field at the present time, and an average of four to six farms is being measured daily. This type of measuring is being used in small counties as a means of getting more accurate data on farms entering into government programs.

The 1937 sign-up of worksheets has been completed and 215 operators have indicated their intention of complying with the soil program. This is considerably fewer than the number signing worksheets in Borden County last year.

Elmer Long, range inspector for Borden County, has already appraised 232,000 acres of range land in the county. Due to an unusually large acreage remaining, it will be several weeks before the preliminary appraisal is completed on the 510,000 acres signed up under the range program in Borden.

Twenty-two tanks have been constructed to date under the range building practices allowed for Borden, and approximately 12 other earthen tanks are being constructed. This is the largest number of surface tanks ever built in any one year in the history of this county.

The county agent, together with Joe Rogers, road machinery operator, attended the terracing school at College Station May 10, 11 and 12. County agents, county judges, commissioners and equipment operators from various counties over the entire state were in attendance at this three-day meeting. Machinery and road equipment companies demonstrated various types of terracing work, and actual construction was

Lindbergh's Success.

Ten years ago, at 7:52 o'clock on a Thursday morning, May 20, Charles A. Lindbergh began a flight from Roosevelt Field, Long Island, that made eternal history when it ended 33½ hours later, at Le Bourget Field in Paris.

The brilliance of the Lone Eagle's... been dimmed by the years. A check of the records and of subsequent events that have catapulted Lindbergh into the world's news reveals that the young St. Louis citizen had... and has... the stuff of which heroes are made.

But Lindbergh's successful flight was far more than a personal triumph. It was a world triumph. It was the beginning of a triumphal march for the whole world of aviation.

After the World War, in which aviation had played such a tremendous hand, few doubted but that air transportation would become as common within a few years as land transportation. But aviation had moved at a snail's pace until Lindbergh's flight. When he landed at Bourget Field, it was a signal for air-minded folk to begin a furious era of building that has not yet reached its climax... and probably will not reach its climax during our generation.

Aviation enthusiasts believe every hamlet will have its landing field in a few years. They believe air travel will be placed soon within the financial reach of every man who can own a good automobile. Indeed, that time has almost come to pass. Successful planes costing no more to own and operate than a medium-priced automobile are crashing the American and foreign markets.

When local aviation enthusiasts attempted to establish a field here shortly after Lindbergh's flight, the venture seemed assured of success. But it was not successful because the public as a whole had not become sufficiently air-minded.

That condition has now about faced. A dozen or more young men are anxious to learn how to fly. Unless the signs are wrong, one of the new planes—far safer than the old ones—would be a highly pleasurable and possibly profitable investment for someone in Snyder who could fly his own ship and teach others to fly. Don't be surprised if such a plane makes its appearance here within a short time.

If it does... and if Snyder should happen to become the home of a small but successful flying field... Lindbergh's world-stirring flight of exactly 30 years ago may be given credit for igniting the spark of aviation enthusiasm that made the venture acceptable to the public.

Editorial of the Week.

A MORNING THOUGHT.

A morning thought for you—I wish every one, especially young people, would ponder this: I had breakfast Sunday morning with a mature man who stands out, above all others of my acquaintances, head and shoulders above every other one, in being able to make keenly admiring friends out of everybody he meets. Mutual friends, many of them, will know him by this description. Here is the way he spends the five minutes every morning between waking and getting up:

- 1—Stretches, relaxes, breathes deeply—each several times.
- 2—"I possess myself." He realizes he was put on this earth for a purpose; that he has infinite possibilities, and opportunities without number in a world and among people who need the best that's in him.
- 3—Prays: He realizes that life, and every good gift are from the Father of Love; he wants to be in constant tune, for guidance and for support; he must treat others as he wants to be treated.
- 4—Attends to health and bodily upkeep by physical, mental and spiritual cleansing and exercise; by right thinking and eating;
- 5—Learns something;
- 6—Accomplish something;
- 7—Make somebody happy.

"If I do these, this day will have been worth while."

Then he gets up, a bigger and a better man than he ever was before. He worked out this formula for himself, and he does it every morning.

Let me tell you boys something else: This man is some of your "softies," none of your "goody-goody" kind of a beanpole, with a white liver, pink eyebrows, peaked nose and high voice—exactly the opposite. He is a high executive, successful and two-fisted, is one of the biggest industries in the nation, and he looks upon this five minutes between his waking-up time and his climbing-out time as the most important in his day.

Take your scissors—cut these seven things out—paste them in your hat, or in the kitchen, or in the bedroom—try them out—they work.—D. D. Jamieson in Salisbury (Mo.) Press-Spectator.

Sit-Down Religion.

Pessimism Pete wonders what kind of religion a man has when he stands around on the streets jawing with his cronies during the week, then remains seated at church while others are standing for song or prayer.

Style la Tillie.

Talkative Tillie, reading the day's fashion news, relays this advice to the gals: Never wear more than two accessories alike, and wear colors that are cheerful. Tillie is anxious to get this style slant across to some of the "solid reds" and "solid mule-dunns" that parade the Snyder square on Saturdays.

Fair—Or Afraid?

The Times from time to time during the past six years has attempted to arouse enthusiasm for the kind of county fair that was staged here before the large building at Wolk Park was burned.

Every time interest was keyed up enough to make the project appear feasible, drought or low prices stepped in to discourage and to postpone.

Now that crop prospects are brightening and general prosperity is returning, why not begin making community-wide and county-wide plans to stage a fair this fall that will make this section of West Texas sit up and take notice?

The fair could probably not be staged on such an elaborate scale as the annual fall festivals that were held here B. D.—before depression. But a fair we can have if a fair we want.

Let's have a fair this fall! And let's hogie the first man, woman or child that says "It can't be done!"

Current Comment.

By LEON GUINN.

A king was crowned last week, with 2,000 British people milling around Buckingham Palace, Westminster Abbey and Bond Street to catch a glimpse of George VI, amid one of the most historic pageants Britain has ever witnessed. . . . George VI received the coronation adulation in much the same manner William of Normandy received the crown of England 1,000 years ago. . . . Troops in blue, scarlet, khaki, white, and green marched together that all the king's horses and all the king's men might present one of the most elaborate processions monarchy has seen in any century.

Lord Hallsham was present for the law, Cosmo Gordon Lang (archbishop of Canterbury) for the church, Neville Chamberlain for the budget, Queen Mary for royalty, and assorted dukes and peeresses of about a gillion degrees were present for the ceremonies concerning the only stable kinglyship the changing world of today recognizes. . . . Following in the steps of "Good George V," the reign of George VI promises for Britain one of the most morally pure, economically sure rules in our dictator burred world. . . . British business men openly embraced coronation addicts, for they raked in \$175,000,000 from travelers alone; being able to count 20,000 American scalps at the swank hotels.

At 11.00 a. m. the bells of Westminster Abbey began ringing. . . . David, Duke of Windsor, heard those bells ringing softly in his exiled retreat. . . . They were crowning George today, "heir to Great Britain, and the dominions beyond the sea." . . . David wasn't thinking of the crown he'd thrown away for the woman of his heart. . . . He didn't even notice the scarlet phlox in the window boxes. . . . He looked across gray space and saw another procession winding down past Westminster Abbey. . . . The bells were pealing sad symphonies of sorrow for Britain's boys coming back from the trenches. . . . London was draped in silent shrouds of fog, David. . . . They were the boys whom you'd seen face blood, and mud, and the open jaws of hell unflinchingly for peace. . . . Arms and legs were gone, David, and stilled lips spoke no epithet of glory. . . . The white crosses looked chaste as winter snow, when stuck in nature's breast, and crimsoned officers' boots left blotchy pockmarks on front line trenches. . . . That was yesterday. . . . Today, David, the bells are ringing "long live the King!"

Are Americans drinking their way back to prohibition? . . . "We fear so," remark a few candid wets who have a streak of intestinal strength. . . . "Positively," declare diligent drys for these reasons: 1.—Minors gulp down more hard liquor in drinking places than many veteran "toppers;" 2.—Automobiles and liquor don't mix, 7 out of 100 car wrecks in 1935 being caused by drunken drivers, with 9 out of 100 pedestrians injured being "three hades in the wind (or tipsy)"; and 3.—Women drink in public places. . . . Americans stowed away 100,000,000 gallons of distilled spirits in their craws in 1936 alone, and the federal government has 4,000 field agents at the moment who are trying to stem the rising tide of bootleg liquor, arch enemy of the internal revenue department.

Nation's Business, usually reliable business barometer, broadcast a full page ad in last week's issue concerning tractor farming. . . . The firm sponsoring the ad showed a tractor farmer, breaking the soil hot and fragrant with spring, with a 2-gang moldboard plow turning three clean cut furrows. . . . Marvelous! . . . A 2-gang plow turning three furrows is every farmer's pipe dream, and not stark reality (operator, Ripley quick!). Editors and admen should at least have a working knowledge of what they're talking about; so to Nation's Business editors, the effete artists and admen, an invitation to come on out here to West Texas, and absorb a little soil in their pencil pushing fingers. . . . A day's work on a 2-gang sulky, plus a good sandstorm ought to clear their polished minds of unwieldy, modernistic pipe dream ads!

No Returning.

My friend built a bridge of stone and steel, secured with rivets heated at the forge of eternity and braded with the hammer of his dreams, yet he walked across it one evening and has not returned.—Matador Tribune.

An exchange editor leaves a thought to null over: "A feeling of enviable well-being is to be found among millions of plain people."

Wool Marketing Plans Made for W. T. Counties

Harry Holt writes in the Abilene Reporter-News:

"With the moving in of sheep in all ranching sections of West Texas, a move is on foot to establish more marketing warehouses. Sheepmen of Scurry County in a recent meeting signified their intention and willingness to pool the clip and try to get a buyer at Snyder. Ed Darby is leading the movement.

"A similar working agreement has been installed at Sweetwater by Bob Boyd and Ollie Cox. They have a warehouse for storage and hope to get several buyers in the market. "Several of the boys in Callahan County have sold wool to independent buyers at Coleman and some kind of a house probably will be established there. Sears, Roebuck and Company has been buying a little wool this spring. This wool business may step up on a level with that of cotton when it comes to marketing."

Virgil Jones Goes To Higher Position With Oil Company

He has been transferred from Borger to Bartlesville, Oklahoma, main office of the company. Honoring Mr. and Mrs. Jones, a farewell bridge party was given by a group of friends at the Phillips community hall several days ago. At the conclusion of the games of contract the couple was presented with a beautiful I. E. S. lamp."

Rapid Progress on Buildings, Grounds At Cowboy Reunion

Rapid progress is being made on the construction of the new buildings and other betterments in the \$10,000 improvement program at the Texas Cowboy Reunion grounds, Stamford. The work will be completed well in advance of the eighth annual reunion which will be held on July 1, 2 and 3.

Work is well advanced on the \$5,000 pavilion and exhibit building, a two story structure 60x100 feet. First floor of this building will be used for ticket offices and commercial exhibits, while the second floor will be used for sponsors' dances and other gatherings. Two modern rest rooms are included in the building.

Another important improvement still to be completed is a new lighting system for the rodeo arena, designed to make it the best lighted outdoor arena in Texas and remove the handicap under which night radio contestants have labored in the past.
