TEXANS IN WASHINGTON

(AP Special Washington Service)
Washington, June (AP)—While strikes plagued Congress, Texas House members still managed to keep a close eye on Agricultural problems.
Before the House Agriculture Committee, on which Reps. Bob Poage of Waco and Gene Worley of Shamrock serve, government officials testified regarding the world food relief program. At the congressional delegation's weekly luncheon high national and state farm officials were principal guests. Around the capitol corridors Harold W. Gaulrapp of Dallas, Master of the Texas Grange, checked up on farm legislation.
The people of this country, much less elsewhere in the world, don't realize how fully the United States has cooperated in bringing relief to starving millions in war-torn countries, says Poage.
Discussing testimony of witnesses before the House farm committee, he points out that of 950,000,000 bushels of wheat to be supplied by producing members of the United Nations from the 1945 crop, the United States pledged 400,000,000 and will have delivered all but about 10,000,000 bushels by the end of June. With the beginning of the new federal fiscal year, July 1, relief shipments will be made out of the new wheat crop.
Observing that the United States has promised shipment of at least 250,000,000 bushels of the 1946 crop, Poage added:
"we are starting the new year with the smallest reserves of any of the major wheat-growing countries. Our reserves will be less than one bushel, or eight-tenths to be exact, per capita, while the reserves of Canada will be 3 to 4 bushels and those in Australia and Argentina 7 to 8 bushels."

WHERE A LITTLE IS A LOT

Hard work is no stranger to the farmer. He knows that what you get out of a job is based generally upon what you put into it. Most farmers, knowing the amount of effort it takes to have a successful farm, buy insurance against rain, hail or tornado damage to their buildings and their crops.
But the farmer like the city resident, cannot protect himself or his family by any known means against a disease, infantile paralysis, which again is on the march in the United States.
However, while no means of prevention or cure of polio have been discovered, much can be done in the way of treatment, the National Foundation for Infantile Paralysis points out.
Treatment of infantile paralysis is expensive. Should someone in your family be stricken, the cost of prolonged treatment might sweep away your life savings were it not for the fact millions of farmers and city dwellers voluntarily support the annual March of Dimes—sole source of National Foundation funds.
Through such contributions multiple services await whenever polio may strike in any county of the nation, for National Foundation chapters stand ready to aid infantile paralysis victims regardless of age, race, creed or color.
There is no insurance against polio, but there is assurance that no infantile paralysis victim need go without aid because of lack of funds.
That indeed proves a little can mean a lot!

THE PROGRAM OF CIVIC IMPROVEMENT

A city that is growing in these times of abnormal economic conditions is not necessarily an exceptional city. On the contrary, a city that is not growing must be regarded as somewhat backward. The influx of rural people into urban areas and mounting numbers of servicemen who have come home has contributed to a general prosperity everywhere. The condition is likely to be continued for some time because of the demand for production that has never really developed steam yet.
But the time will come when all the favorable tendencies toward prosperity will not exist. It will be the cities and communities that are looking ahead now that will cash in on a permanent basis. Other areas will be hard hit. For that reason it might be wise for Haskell to examine the local conditions and see what can be done about preparing for the future. Editorially from time to time, we have mentioned steps which we believe might wisely be taken to safeguard our future.
However, no amount of mentioning such things can accomplish any purpose unless some effort is made to see that the suggestions are accorded proper support. That support cannot be attended to by any one person. Naturally, most of the support must come from the businessmen of Haskell, and the officials of the city must take the initiative. If we are content to let Haskell get the breaks that come its way, chances are that we will get a few. But why not make a few breaks of our own?
Not every person can see the value of spending money for improvements. And some investments that are made in behalf of a city are not wise. But it is certain that no city can continue to be prosperous and prosperous unless it does spend some money. Individual merchants must make improvements from time to time in their places of business, and the city must be ready to assume responsibility for advancing a program of civic betterment.
We mention here some of the things we believe to be to the best interest of the city, not necessarily in the order of their importance:
1. Extension of sewer and water mains to all parts of the city.
2. Paving of some of the worst streets in the city, with the view of ultimate improvement of all the main ones.
3. Installation of city mail delivery service, a move that calls for general cooperation of all toward meeting specifications for sidewalks, lighting and house numbering.
4. Encouragement and all possible support toward getting new businesses for the city.
5. Building of the the proposed American Legion building, a project that will be for the benefit of the entire county in providing a central building for public meetings.
6. Improvements of roads in the county to aid farmers in getting to trade centers and to aid school buses in getting children to and from school in bad weather.
7. Completion of the Haskell air port to accommodate expanding interest in flying.
8. Necessary steps to control the city's bad parking conditions.
9. General participation and help to promote the youth recreation activities program.
10. Maintenance of an orderly and clean appearance over the entire city.—Haskell Free-Press.

Richard L. Brice Makes Statement To County Voters

At the time I made announcement as a candidate for the office of County Commissioner for Precinct No. 1, it was my intention to enlarge my statement to some extent in order that the voters of the precinct may be better acquainted with my history and qualifications, that you may give me fair consideration in the coming primary election.
I am a native of Snyder, having been born and reared here. I graduated from Snyder High School and attended Texas Tech at Lubbock until the time I volunteered for service in the Signal Corps, in September 1940. I served in the Army until November 1945, when I was discharged upon my return from overseas service in the Southwest Pacific Theatre.
I am twenty-six years of age, married and have two children. I reside seven miles north of Snyder on the Clearmont road. Since my return from the Army, I have put in most of my time building a home and taking care of the details necessary in starting and maintaining a stock farm.
If you favor me with your vote, and elect me to the office I seek; I will do my best to make you a good and efficient officer. I will devote my time and effort to the responsibility which the people and law place upon this office.
I want to serve my county in this capacity and I believe that I am competent and qualified from age and experience to fulfill the duties of this office.
I am going to do my best to get around to see all the voters. I hope that I do not overlook anyone; however, if I am unable to solicit your support personally, I want to assure you here, that your vote will be appreciated.

THANK YOU,
Richard L. Brice

1. Don't place hot foods in your refrigerator. Let them cool first.
2. Place a cover over warm foods.
3. Don't open the refrigerator door more often than absolutely necessary.
4. Don't leave the door open while carrying food to other places.
5. Defrost frequently, at least once a week. When the frost on the freezer unit becomes more than a quarter of an inch thick, it lowers the efficiency of your refrigerator.
6. Speed up defrosting by placing hot water in the ice cube trays. After defrosting is completed, change the hot water to cold water for making ice cubes.
7. Keep the refrigerator at the normal temperature recommended by the manufacturer. Too low a temperature isn't necessary and may be wasteful.

John Lee Smith Here In Interest Of Candidacy

John Lee Smith, candidate for governor, here in conference with friends issued the following statement:

"The most pressing unsolved problem before the American people is the labor issue. It is both a state and national problem. The present state of industrial anarchy is the result of the self-serving tactics of pussy-footing politicians. Because of the fear of the political power of the great labor bosses they have refused to come to grips with this all important issue.

"Wide spread strikes must be curbed or we will face a depression worse than the last one.

"For two years I have advocated the creation of a Labor Claims Court with jurisdiction over all labor disputes. There is no reason why differences over a labor contract should not be settled in the court house in the same way that other disputes are settled. This is a fairer and better way than by strikes—fairer to labor, management, and the general public. Strikes are costly to everybody concerned."

Smith rapped the C.I.O.-P.A.C. He said: The most dangerous group in America today is the C.I.O. Its Communist tendencies are a threat to democracy. Its doctrine of the closed shop is identical with that which Hitler imposed upon Germany. No body got a job in Germany unless he belonged to the Nazis. If the C.I.O. has its way no body will have a job in this country unless they belong to the C.I.O. If elected Governor I will seek the passage of a law that will abolish the closed shop."

The candidate stressed his proposal to give the veterans preference on all jobs both public and private. "We gave the veteran a 1-A card
