

Mulching in Stubble Helps to Retain Moisture and Adds to Soil Richness

"Stubble mulching is the practice of plowing small grain land in such a way as to leave the stubble and hay on the soil," states J. D. Rowland of Inadale, a cooper in the Upper Colorado Soil Conservation District.

Rowland says there are many benefits to the soil growing out of such a practice. Besides keeping the plant material for plant food manufacture in the soil, this practice binds the top soil together.

Continuing, Rowland declares that such a practice keeps down the soil movement caused from either wind or water. Absorption of water is also more rapid—since each stem or blade offers a passage way for water into the soil. The plant material will also act as a sponge to hold extra water.

Rowland says that when his land was new, cotton would come up after a rain, but now a sowing and haking effect takes place which prevents a stand more often than not. He thinks the difference is due to the amount of decaying matter that was in the top soil when it was new and the amount there now. The stubble-mulching practice will help to restore that condition which the new land had.

Most any farmer would have some tools with which to do stubble-

mulching, says Rowland. The one-way plow when set right will do the job.

Extra feet set on a tractor tool bar will allow the use of sweeps enough to cut solid strips. Or, when extra feet are not used feet can be set at intervals on the bar, cutting furrows or strips in such a way that a second plowing will make the mulching solid. Farmers who have land enough to justify it will use the newer types of plow built especially for this practice.

Rowland says if this practice can be applied to all farms of the district from which grain is now being cut, more absorption of summer rainfall and greater yields next year should result.

The Inadale farmer says he saw a very definite benefit from terraces this year in his wheat land. A test on an acre immediately above a terrace showed production to be 25 bushels per acre where water stood. He believes that without the terraces all areas would have produced less grain—even to that part of the terrace interval where water did not stand. Contour sowing and cultivation caused water to stay where it fell long enough to penetrate—rather than move away.

"My, my, don't you Treasury Department people think of the cleverest ways of collecting the tax!"

John Malouf Dies at Dallas Last Saturday

John Malouf, 64, former long-time Rotan business man and uncle of Mrs. R. E. Patterson of Snyder, succumbed Saturday following a brief illness.

Mr. Malouf, who will be remembered by a number of Scurry County people, was in business at Rotan for 20 years. Funeral services were held Monday morning, with interment in Hill Crest Mausoleum.

Mr. Malouf is survived by four sons, Philip Malouf of Rotan, Joseph, Eblin and Johnny, all of Dallas; and a daughter, Helen Marie.

Mrs. Patterson remained in Dallas this week to visit the Malouf family. Patterson, a local druggist, returned Wednesday.

Copeland Dining Hall Open After Repairs

Following complete remodeling and painting, the Copeland Dining Room in the Manhattan Hotel is now ready for service again.

Bob Copeland, operator, says he is serving the best in family style meals for either individuals, groups or any organization.

The Copeland Dining Room was damaged in a fire that occurred several weeks ago.

Mrs. C. T. Hunsicutt and son, Sam, were transacting business in San Angelo Monday.

Mrs. Cordelia Darnell of Abilene visited with her daughter, Fay Darnell and her sister, Dora Smith, in Snyder this week.

Just the Thing for Her.

A customer walked into the pet shop. "I like parrots," he informed the shop-keeper, "but I want one that can keep its mouth shut when told."

"Here's one that speaks French," the proprietor said. "Tell him to keep quiet and he shuts up like a clam."

The customer hesitated.

"Is that the most intelligent parrot you have?" he asked.

The proprietor looked around. Finally, he pointed to another bird.

"If you're looking for a really intelligent parrot," he confided, "that's the one you want. Would you believe it, that bird can keep its mouth shut in six different languages!"

Guilty in the End!

The prisoner was on trial for stealing ducks. His counsel addressed the jury at length, pointing out that it had not been proved conclusively that the prosecutor had lost any ducks; that the ducks found in the prisoner's cottage were not those of the prosecutor; that the prisoner had established an absolute alibi.

Just as the judge began to sum up, the prisoner interposed and asked if he might say something. As an indulgence, this was permitted. "All I want to say, gentlemen," he remarked, "is that I wish I'd never seen those birds."

Bob Sibert and Bill Roper of Los Angeles, California, were dinner guests of Mr. and Mrs. Bryan Jordan Wednesday evening.

S. D. Hays Family in First Meet in Years

S. D. Hays family of the Union community has been this week enjoying a family reunion—marking the first time the entire family has been at home together in six years.

Those enjoying the reunion and renewing ties of friendship with the parents are: Mr. and Mrs. Paul X. Williams and four children, Paul X. Jr., Charles David, Betsy and Sally, of Booneville, Arkansas; Mr. and Mrs. Billie Mitchell of Lamesa;

Mr. and Mrs. S. D. Hays Jr., and Randy of Tahoka, Mr. and Mrs. Pat Falls and children, Wally, Virginia and Dana, of Ira; Mr. and Mrs. Ralph Tuck and son, Michael, of Boston, Massachusetts, Mr. and Mrs. E. J. Richardson Jr. and daughter, Susan Jo, of Dunn, and Mrs. Robert Melcher of Lubbock.

District SCS Man Pleased at Work Of County Unit

"Soil conservation practices in the Upper Colorado Soil Conservation District of Scurry and Borden Counties is improving considerably," Morrison Lister, district SCS conservationist with headquarters at Sweetwater, reported while here Wednesday.

"Increased knowledge through the use of soil building crops such as hairy vetch, Austrian winter peas, clover and improved grasses make soil conservation a fascinating study here," Lister declared.

Lister visited not only with SCS officials but with others here Wednesday.

In addition to the Upper Colorado Soil Conservation District, Lister has the Upper Clear Fork, with a work unit at Rotan and one at Sweetwater, and the Mitchell County Soil Conservation District to take care of.

Lister was high in commendation of the work being done by this SCS district and SCS personnel.

Mrs. Louise McClinton of Big Spring is visiting her mother, Mrs. Pearl Martin, Mr. and Mrs. Oliver McClinton and other relatives.

REG'LAR FELLERS

Two-in-One Apron Handy for Odd Jobs

One of the latest clothing developments of the designing board, Mrs. Scurry County, is what might be called a two-in-one apron, which is made to give your knees protection when doing kneeling jobs.

Such an apron, reports Mrs. Weldon Strayhorn, county home demonstration agent, will also give the housewife a spacious pocket in which one can carry anything from a mess of turnip greens.

U. S. Department of Agriculture clothing specialists have put their okay on this apron as one that will be a real convenience to you in doing kneeling jobs, indoors or out.

The apron has a big pocket, which is buttoned instead of sewed on. When you're ready to do a kneeling job, you simply unbutton the big pocket and turn it inside out and over the knees.

When the job is finished... fold up the pocket, button it, and you have a handy place to tuck away gloves, seed packets, markers or any other small things that may get lost.

If you try making this apron, the clothing specialists suggest you use a sturdy cotton material, and line the pocket with a plastic material that is both washable and waterproof.

Then when you turn the pocket outward to kneel on, the plastic material will protect your knees from wet ground.

Petty Cash Vouchers at The Times.

Snyder General Hospital

Among patients at Snyder General Hospital... report in last week's Times include: Medical Patients—J. L. Webb of Snyder; Mrs. Bob Browning of Fluvanna; Mrs. H. M. Blackard of Route 1, Hermleigh; Doris Pierce of Snyder; George Ramage of Route 2, Snyder; Wanda Koonsman of Route 2, Snyder; Mrs. M. O. Nail of Ira; Giles Bowers of Snyder; and Marsall Miles (colored) of Snyder.

Surgery Patients—Mrs. J. W. Hughes of Fluvanna; Mrs. D. E. Eades of Snyder.

Accident—Mrs. C. M. Wellborn of Snyder.

Remaining Patients—Mrs. Betty Adams of Snyder; Mrs. Fred Bowers of Snyder; and Rosa Galindo, Mexican, of Snyder.

Visitors in the W. H. Stokes home the past two weeks were Mr. and Mrs. Henry Stokes of Richmond, California; Mrs. Lula Ferguson and children of San Diego, California; Mr. and Mrs. Buster Ward and children of Tucuman, New Mexico; Mr. and Mrs. Alvin Strickland and children of Rochester and Seaman First Class Carl Stokes, stationed at San Diego, California.

The average speed of propellers in use on today's commercial airplanes is between 1,600 and 1,850 revolutions per minute.

N. J. Guillet, Who Leads Growth of Hobbs School, to Take Up Dentistry

When N. J. Guillet announced recently his resignation as superintendent of the Hobbs Independent School in western Fisher County after 10 years in that capacity, the Hobbs community and Fisher County lost an educational, religious and civic leader.

Guillet did his pre-med work in Baylor University before graduating from McMurry College at Abilene, where he received a BS degree in administrative education.

Guillet, a Times reporter understands, is enrolling in Baylor School of Dentistry at Dallas this fall. During the summer months he will complete his work for master's degree at McMurry College, Abilene.

Mrs. Guillet, also a graduate of McMurry College, will spend the summer at Stamford. She was English and speech teacher at Hobbs School and a community leader.

The Guillet, who have been living in the Hobbs School teacherage at Camp Springs the past decade, have four daughters. Mary Alice, honor graduate of Hobbs School this May, is enrolled in NTSC at Denton. Martha is a high school junior, Carolyn is a freshman in high school. Gwendolyn is five years of age.

Hobbs Independent School District, one of the largest and best approved rural schools in the state, boasts a number of "first." The first rural school in Fisher County to be formed by consolidation, the school was the first to build a gymnasium and the first to establish a modern school lunch room.

When Guillet assumed administrative duties with the Hobbs School 10 years ago, after serving in that capacity at Old Glory for the five preceding years, the Hobbs district comprised 100 square miles of school territory—taking in the four original districts and a portion of the Guinn district.

Under the guidance of Guillet the district has grown into the largest in Fisher County, now comprising a total school territory of more than 300 square miles—with an enrollment of 365. The school has a faculty of 16 teachers, and has facilitated units.

With the exception of a few students who live on the campus, the entire school is conveyed to and from school daily in six school buses.

When Guillet came to Hobbs, community leaders recall, only the original two-story school building was in use. Since that time construction includes a four-room primary building of native stone, a home economics cottage of matching construction, a stucco lunch room, four homes for teachers and the janitor, a large sheet iron garage where the school buses are serviced, and a large gymnasium, which was destroyed by a storm two years ago.

The destroyed school gym will be replaced by a new structure, reports the Hobbs Athletic Council. The original 11-room building, with the auditorium, houses the high school and elementary grades.

According to Guillet, bonds payable in one to 10 years for \$10 each are being sold in the territory to finance the construction of a lighted football and softball field.

Coach and principal for the past three years has been W. C. Hodges, who has been elevated to the position of Hobbs School superintendent.

Minimum Swimming Pool Standards Set Forth in Pamphlet

A pamphlet entitled "Minimum Swimming Pool Standards" is being distributed by the State Health Department here and over the state to operators of swimming pools or other interested parties, according to Dr. George W. Cox, state health officer.

Standards set up were prepared for the protection of public health and include recommendations of the Joint Committee on Bathing Places of the Conference of State Sanitary Engineers and the American Public Health Association. These standards provide for proper sanitation practices at all types of pools from the "fill and drain type" to the modern "recirculating type." The standards will apply to the swimming pool of Snyder Country Club.

Some of the specifications for standard sanitation are that the bacterial quality of the water should be equal to that of safe drinking water; frequency of changing or recirculating water should be such that maximum safety will be provided as well as proper economy; the water should be sufficiently disinfected to kill all disease bacteria; and standards for cleanliness and algae control should be enforced.

Dr. Cox advises that the State Department of Health offers many services to the pool manager or operator. These services include free bacteriological analysis of the water, free kits for making chlorine residual tests on the water, and information and advisory service on any problem that may be encountered in sanitation, engineering or operation. All operators or managers are invited to write the State Health Department if they wish to obtain the bulletin on pool operation or a free chlorine residual testing kit.

SELECTION as a delegate to the National 4-H Club Encampment at Washington, D. C., is Bobbie Joe Griffin, 18, of Ovalo, Taylor County. J. W. Potts, state boys' club leader of the Texas A. & M. College Extension Service, announces selection of young Griffin.

Can't Do It Honestly. Father—"My boy, I never kissed a girl until I met your mother. Will you be able to say the same thing to your son?"

Son—"Yes, father—but not with such a straight face."

No Substitute for Cotton. Some of the qualities of cotton can be reproduced in other fibers; yet there is no other fiber, either natural or synthetic, which conceivably can substitute for cotton in all its uses.—National Cotton Council.

Gloria Woody returned Saturday by plane to her home at Long Beach, California, after visiting her mother, Mrs. R. B. Woody and sister, Mrs. Fannie Lee Logan in Plainview.

SAY, DOCTOR, WHAT'S THIS NEW AUTOMATIC WAY OF SAVING MONEY?

BUY U.S. SAVINGS BONDS ON THE BOND-A-MONTH PLAN!

What is the Bond-a-Month Plan?

Millions of Americans are building financial security through regular purchases of U. S. Savings Bonds on the Payroll Savings Plan.

Now—for the first time—the millions of Americans who are NOT on payrolls can enjoy the same convenient, automatic saving through the BOND-A-MONTH Plan.

All you need for this plan is a checking account. Here's how it works:

You authorize the bank in which you have a checking account to buy Savings Bonds for you.

Every month, the bank buys a Bond in the amount you have selected, registers the Bond, sends it to you, and deducts the purchase price from your balance.

All you have to do is watch the Bonds pile up!

Don't forget, these U. S. Savings Bonds are the *safest* investment you can make.

They pay a mighty generous interest—for every \$75 you save today, you get back \$100 in just 10 years. And they help keep America financially strong.

See your banker today for full details. He'll be glad to help you start saving the sure, steady, automatic way—on the BOND-A-MONTH Plan.

Save the *easy, automatic way*—with U.S. Savings Bonds

An excellent weight Sanforized blue chambray of tightly woven texture. Strong double sewed seams, full cut in all dimensions, long tails. Two button pockets. Sizes 14 to 17. A real buy for this event. While supply lasts

Grasshoppers in State Still Show Slight Damages

Because Scurry and Borden County farmers are worried about grasshopper infestations and slight outbreaks of "rag worms," the following report from the Texas A. & M. College on the cotton insect situation over the state will prove of timely interest:

Boll weevils remain in low numbers in the lower Rio Grande Valley and Coastal Bend area, but are causing damage in Victoria, Jackson and Wharton Counties of the Upper Coastal area and in some fields of Madison County in the Trinity River bottom of East Texas. Several groups of Scurry and Borden County have recently visited the Rio Grande Valley.

Flea hoppers have increased in most of the coastal counties during the week. These insects are transferring from horse-mint to cotton. A still further increase may be expected as the horse-mint matures and ceases to be attractive to the flea hopper.

No leafworms have been reported to date.

Lower Rio Grande Valley—Early planted cotton is fruiting heavily and cotton insect infestations are generally light. Of 41 fields inspected only seven had weevil infestations above 10 per cent. Five

were in Cameron and two in Collier Counties.

Coastal Bend Area—Weevil infestations averaged four per cent in Kleberg, Duval, Nueces, San Patricio and Jim Wells Counties. The numbers of flea hoppers found per 100 terminals in these counties were: Kleberg five, Duval 21, Nueces nine, San Patricio five, and Jim Wells 20.

Upper Coastal Area—Weevil infestations averaged 19 per cent in 15 fields of Victoria, Jackson and Wharton Counties. Two fields in Victoria were between 25 and 50 per cent, and one field in Wharton was above 50 per cent. Flea hoppers increased during the week from an average of 13 per 100 terminals to 20 with a high increase noted in O'Neal County. It is recommended that growers in this area inspect their fields often and that heavily infested fields be dusted as soon as possible with five per cent DDT-sulphur.

Central Texas—Grasshoppers continue abundant in some of the river bottom fields. Weevils remain low. Flea hoppers at present are in small numbers but are slowly increasing in Burdon and McLennan Counties.

South Plains Area—Lubber grasshoppers are numerous and moving into cultivated crops in Cochran, Hockley, Howard, Lubbock and Terry Counties.

Misses Clarice McGlain and Frances Leath left Saturday for Bakersfield, California, where they are visiting Mrs. R. T. Anglin, daughter of Mrs. G. B. Clark Sr.

A WONDERFUL dress-up cotton for a summer Sunday lunch or cocktail party that comes in Lonsdale's villon stripe—stark white with clear bright stripes in red, green, aqua or black.

Home Agent Says Vegetable Pests Can Be Killed

In response to inquiries received from many county homemakers, Mrs. Estella Strayhorn, county home demonstration agent, gives the following information on controlling vegetable insects:

"Two classes of insects go to 'romping' on gardens of Scurry and the neighboring counties. They are insects which chew holes in the leaves of fruit, and those which suck juices from the foliage—stem or fruit."

In general, Mrs. Strayhorn reports, DDT will effectively control both types of insects—with exception of plant lice and red spiders.

Caution: DDT should not be used on vine crops such as squash, cucumbers, melons and the like because it may burn the foliage. DDT should not be used on leafy vegetables that are harvested daily—or even weekly for food.

County homemakers will find it extremely difficult to remove DDT residue from the vegetables. DDT can be used on beans, peas, tomatoes and cabbage early in the season—but none should be applied any later than three weeks before these vegetables are ready for harvest. DDT can be safely used throughout the season on such vegetables as potatoes, carrots, beets and onions.

DDT, the county home demonstration agent reports, can be used as a spray or dust. Three to five per cent dusts are effective for garden insects. Two ounces of 50 per cent wettable DDT per gallon of water makes an effective spray.

Rotenone is effective for controlling plant lice and most of the other insects that feed on leafy vegetables. It is not toxic or poisonous to man and therefore can be used safely on any vegetable at any time. Rotenone can be used either as a dust or spray.

Dusts which contain from .75 per cent to one per cent rotenone are most satisfactory for garden insect control. A spray containing one and one-half ounces of five per cent rotenone are very satisfactory. Mrs. Strayhorn states, for insect control.

These insecticides are effective for chewing insects: Cryolite, lead arsenate, calcium arsenate. For sucking insects, nicotine sulfate, sabadilla, lethane and pyrethrum are effective when used properly.

VFW Auxiliary Will Play Girl Scouts in Softball Tilt Friday

Discussion of important matters and appointment of a new secretary—publicity woman marked the meeting Tuesday evening of the Ladies' Auxiliary of the Veterans of Foreign Wars. The meeting was a called gathering.

Mrs. R. N. Hedges, auxiliary president for the VFW, comments that a keen interest is being shown in the local activities. The Ladies' VFW Auxiliary has done much in helping the local VFW post with regular duties and in helping to stimulate the membership interest.

Attention of all Times readers is called to the fact the ladies' auxiliary will have a softball game Friday evening at Tiger Stadium. Oppon-

MODERN LIVING CLAIMS VICTIMS

Soft, refined foods and lack of exercise are responsible for increasing thousands of constipation victims. Intestinal muscles become sluggish, waste matter accumulates and gas is formed. Often there is a tired, restless, listless feeling. It's cases like this that the new improved ADLERKA is designed to help. This scientifically compounded Tone-Up laxative is quickly absorbed by the gastro-intestinal system... gas pressure is relieved and waste matter is moved gently through the digestive canal. When you eat well and digest your food well, you'll find a new joy in living. Order a bottle of ADLERKA today.

Caution: use only as directed.

Production Costs Must Be Cut.

For Georgia farmers to continue to grow cotton, it is mandatory that they reduce the cost of production. The mechanization trend seems to be the most definite solution.—C. C. Miller, Georgia Extension Service.

A Japanese battle flag, a trophy of the battle of Guam, was presented to Governor Coke Stevenson by a major of the Marines.

enters for this game are the Girl Scouts and observers predict a close game.

When sufficient information is available, The Times will carry the names of Ladies' VFW Auxiliary officers and names of auxiliary members.

Veterans News

Here are questions and answers in connection with public relations matters of the Veterans Administration which The Times believes will be of interest to Scurry County veterans:

Q—What is the largest amount I can borrow under the G. I. Bill and still have the loan guaranteed?

A—There is no limit on the amount which can be borrowed under the G. I. Bill. The limitation by law is on the size of the government guaranty and not upon the size of the loan.

YOUR GRAIN + PURINA CONCENTRATES

Announcing PURINA CUSTOM GRINDING and MIXING SERVICE

FARMERS in this community who are interested in turning their grain into better rations for their livestock and poultry will be pleased to learn that we have become a Purina Approved Custom Grinding and Mixing Station. This brings you several advantages:

1. We now carry Purina's famous concentrates built especially for balancing home-grain.
2. You have full use of Purina's farm-proved Custom Mixing formulas.
3. Our rations are tested by Purina Laboratories to assure mixing accuracy and uniformity.

Come in. Look over our equipment and Approved Formulas. Better yet, bring in a load of grain and see what a fine job of grinding and mixing we do.

199 Oil Wells Listed in Sharon Ridge Field

Wasson Concern Leads Field with 27 Oil Producers

Reflecting a major drilling program that has been underway for the past 24 months, the Sharon Ridge 1,700-foot pay field of Scurry and Mitchell Counties now has 199 producing wells.

So reveals the Texas Railroad Commission at Austin, which lists wells producing from the 1,700-foot pay horizon as follows:

American Trading & Production Corporation—One well listed as McWilliams A and one well listed as McWilliams B on the McWilliams lease.

James H. Beall—Five wells on the W. E. Sorrells lease.

Beall-Doscher-Dorhandt — Four wells on the Sorrells lease.

Beard-Tullous—One producer on the H. P. Wellborn lease.

O. R. Bolinger—One producer on the J. E. Badgett lease, one on the Mills lease, one listed on L. A. Strain No. 1, one as L. A. Strain B, and one producer carried as L. A. Strain No. 2.

J. Gordon Bristow—One well on the Tomlinson lease.

Coffield & Guthrie—Total of 22 producing wells, as follows: Nine wells on the J. J. Moore lease, two wells on the J. E. (Cub) Murphy lease, two on the S. H. Newman lease (with one carried as Newman B well), one on the J. L. Strain lease, three on the W. A. Wade lease.

C. L. Nichols—Two wells listed on the C. G. Crawford A lease and one well carried as C. G. Crawford B well, one well on the Mills-Catton lease.

A. A. and Clyde Dennis—One well on the J. E. (Cub) Murphy lease.

K. A. Ehnman—One well carried on the Strain lease and one well carried as the Strain B well.

First National Bank of Wichita Falls—One well on the Crawford lease.

A. B. Foster—One well on the J. E. (Cub) Murphy lease.

Four W. O. Oil Company—Four producers on the J. E. (Cub) Murphy lease; one carried as the J. E. Murphy B well; one on the Emmitt Rasco lease. This gives the Four W. O. Oil Company six wells in the pool.

E. L. Goss et al.—One well on the J. E. Murphy lease.

E. J. Gray—Four wells on the T. J. Ellis lease.

Holden & Roberts—Four wells on the Clark lease.

Lemay Oil Company—Four wells on the Chapman lease; three wells listed as the Chapman B, one as Chapman C and four on the Sorrells lease. This gives Lemay 12 producing wells.

C. T. McLaughlin—Five wells on the J. C. Stinson lease, five carried on the Stinson B lease and three on the H. P. Wellborn lease. This gives McLaughlin 13 producing wells.

Magnolia Petroleum Company—Eleven producers listed on the L. Strain lease.

Minosa Oil Company—Two wells on the P. G. Fuller lease and three wells on the E. T. Strain lease.

John Odstril—One producer on the E. E. House lease.

W. N. Pearson—One well on the Rasco lease.

W. C. Russell—One well listed as C. G. Crawford A, one as C. G. Crawford B, four on the Glinis lease and four wells on the E. T. Strain lease; three wells carried under T. T. Strain A lease, one well carried on the E. T. Strain B lease, one well carried as E. T. Strain C lease, four wells on the J. L. Strain A lease, and four wells on the J. L. Strain B. This gives Mr. Russell 23 producing wells.

French M. Robertson—Four wells on the Sorrells lease.

Robertson, Knode & Prior—Six wells on the Stinson A lease and one well on the Goldsmith lease.

Robertson-McKisick—Total of 16 producers on the E. E. House lease, two on the Adams lease, one on the Stinson lease and two wells on the Stinson B. This gives Robertson-McKisick 21 producing wells.

Snowden Oil & Gas Company Ltd.—Three wells on the Murphy C lease, one on the Wayne Eubanks lease, two on the W. R. Ashmore lease; one well on the Tomlinson lease, for a total of eight producers.

Staley Oil Company—Darby Oil Company and Crawford estate, one well, and one well on the Mills Estate lease.

R. F. Tower, Trustee—One well on the Moran lease.

R. F. Townsend and D. O. Thomas—Four wells on the Continental-Strain lease.

W. A. Wagoner—Two wells on the J. D. Fuller lease.

Wasson Oil Company—One well on the Jackson lease, one on the E. T. Strain lease, two on the Phillips Chapman lease, eight carried as Magnolia-Chapman, two as Chapman (Polson), one as Chapman (Wasson); eight producers as Chapman (Wasson); giving a grand total of 27 producing wells for Wasson Oil Company.

I. Weiner and John Odstril—One producer on the F. W. Hardee lease.

Jim Miller Says Rodeo Unit Helps Performer Pay

Representing the Amateur Rodeo Association, Jimmy Miller, former Scurry County boy now at Dupree, South Dakota, makes the following statements about the ARA, which he believes will greatly clarify the picture relative to contestants.

Scurry County Rodeo Association recently turned down the proposal of the ARA in the sharing of the entrance fees, declaring that the proposal came too late to change the prize lists and other arrangements.

The Miller letter follows:

"The Amateur Rodeo Association is trying to help all amateur rodeo contestants all over the country. The organization is not trying to make anyone join the organization."

"Really, our organization helps all cowboys, and instead of hurting rodeo associations we have saved rodeo money where our contestants performed."

"Officials at the Mineral Wells and Spur rodeos were pleased," Jimmy states, with the ARA, and say we saved each association money.

"The Texas Cowboy Reunion at Stamford asked us to come over there. This rodeo is an ARA approved organization."

"Most of the bronc riders are ARA members," young Miller states. "Instead of paying \$25, \$15 and \$10 for first, first place contestants now receive from \$75 to \$100 first money," Miller concludes.

(Prize list for the Scurry County Rodeo lists \$75 as first money in bronc riding and other events for this year's show.)

DIRECTOR of the newly created office of public relations for the Baptist General Convention of Texas is Andrew Q. Allen, assistant to the administrator of Baylor University Hospital. So announce officials of the Baptist General Convention of Texas. Allen is widely known among Baptists of Texas and the South.

Control of Heel Flies Help to Put Pounds on Cattle

A considerable percentage of beef cattle in Scurry, Borden and Garza Counties that usually run off many pounds of flesh, trying to get away from heel flies, are grazing peacefully this summer.

Oscar Fowler, county agent, gives the reason as DDT fly spray.

Although considerable rain was received in May, cattle in this vicinity that were sprayed before the rains still seem to be protected from the flies, Fowler states.

"Several stockmen and dairy cattle owners seem to think spraying cattle with DDT fly spray is something of a humanitarian move, but when stockmen consider the fact that so treated gain from 40 to 70 pounds during the summer months, such a practice is indeed profitable," Fowler declares.

In one neighboring county to Scurry, the Commissioners Court purchased a spray gun outright. This equipment is rented to livestock owners at the nominal cost of 15 cents a head for cattle treated

in Monterrey, Mexico. The Mexican shore (Retnosa) is in the background. This is the first major gas pipeline out of the United States.

Social Security Area Offices, Serving Big Territory, Changed

Approximately 125 Snyder firms and 50 other establishments over the county doing business with the Abilene office of the Social Security Administration are advised the agency is in new location—Rooms 308 and 309 of the Abilene Post Office Building.

For almost eight years the Abilene field office has served the public in Scurry and 15 other counties of the area from the Alexander Building location. It was opened December 18, 1939.

The social security field office administers the federal program of old age and survivors' insurance and has three principal functions. It handles all types of benefit claims; it issues new and duplicate social security account number cards; and it gives assistance to wage earners in commerce and industry, and to their employers in making sure that accurate social security wage records are kept for each employee.

Vets Administration Office Has Birthday

The Veterans Administration office at Lubbock, serving Scurry and 78 other West Texas counties, reached its first anniversary June 1, county GIs learn.

West Texas VA office at Lubbock has witnessed a 12-month period of phenomenal growth. On occasion of its first anniversary, the Lubbock office has claim folders that have increased from 44,000 to 66,000. As of June 1, 16,800 vets in this region were in receipt of compensation.

D. M. Pogue, Outstanding Family in Plainview Community, Do Many Jobs

Mrs. D. M. Pogue of the Plainview community, six miles east of Snyder, has been named outstanding woman in her Home Demonstration Club.

So reports Mrs. Estella Strayhorn, county home demonstration agent, who says Mr. and Mrs. Pogue moved to the Plainview community in 1929 to engage in farming 400 acres.

In every undertaking Mrs. Pogue was untiring in her efforts for success, the county home demonstration agent says.

A charter member of the Plainview Home Demonstration Club, Mrs. Pogue has served through the years as secretary-treasurer, reporter and council delegate. She has attended most of the county encampments and one district encampment.

This year the Plainview woman is home demonstrator for the Plainview club.

In 1942 the Pogue built a modern six-room house. Mrs. Pogue endeavored to beautify her own home grounds, and her ability at landscaping has been proved by a thick Bermuda grass lawn, evergreen shrubs, well placed seasonal flowers and trees placed for shade.

Draperies and curtains and re-

covered chairs for the new home were made by Mrs. Pogue. She also has sandwiched in time to sew for herself and two daughters.

Canning season is a busy time for Mrs. Pogue. Beans, tomatoes, peas, beets and cucumbers are canned for winter supply, thus aiding Mrs. Pogue in better budget making.

Mrs. Pogue averages caring for 200 chickens a year. These are for family use. Egg production is for family use. Mrs. Pogue also cares for milk from a fine herd of Jersey cows. She churns so the family can have butter and utilizes sweet cream in cooking.

A modern double garage was built in 1935 and to this has been added a large wash room with concrete floors. The room has heating facilities, electricity and stationary washing equipment.

Mrs. Pogue makes all her soap for laundering purposes. At this time the Pogues are doing some remodeling to their home. The kitchen is being made larger and they are adding a sun porch. Also new paper and paint are being applied.

Besides being a good homemaker, Mrs. Pogue is active in all commun-

IT'S EASY to brighten up your home for summer by using cotton bags for drapes and covers, as this attractive corner in the home of Mrs. Ray Bollinger of near Memphis, Tennessee, proves. Using 175 bags to provide fabric which otherwise would have cost almost \$225, Mrs. Bollinger decorated her home from front to back. The bags were feed sacks.

County Officials Interested in New Farm Road Plan

County Judge F. C. Hairston and members of the Scurry County Commissioners Court express keen interest this week in a new state-wide policy which would allow Scurry and the 253 other counties of Texas an additional \$100,000 annually in farm-to-market road construction.

New policy for the state was announced in Austin by Dewitt C. Greer, State Highway Department engineer.

"Whatever may be worked out," spokesman for the Commissioners Court says, "we want Scurry County to have its full share."

It is understood that under the new policy "if a county or road district desires additional farm-to-market roads and is willing to furnish the right-of-way and 75 per cent of the actual construction cost, the State Highway Department will provide the engineering and 25 per cent of the construction cost from its funds," Greer explains.

A Times reporter understands that future maintenance of the roads so built would be provided for by the State Highway Department. This cost, Greer says, "generally equals the construction cost over a period of 15 years."

Announcement of the new farm-to-market policy followed adjournment of the 50th Legislature's regular session. During the final hours of the Legislature, the House of Representatives made a supreme effort to push through a \$30,000,000 rural road proposal that had previously been approved by the Senate. The bill called for expenditure of \$15,000,000 a year.

Significant thing about new developments in Austin, Snyder civic leaders state, is that when one views the situation from that of a maximum expenditure by the state's 254 counties, the highway construction policy could allow expenditure of \$25,400,000 a year for farm-to-market road construction—in addition to what is currently being spent in the federal-state road building program.

Mrs. L. G. Watson, 69, Dies at Colorado City

Mrs. L. G. Watson, 69-year-old former Scurry County resident, succumbed Sunday evening, 7:30 o'clock, in Colorado City, following a brief illness.

Born September 12, 1877, in Milam County, Mrs. Watson is remembered by a number of pioneer Scurry County people. She had made her home at Colorado City for the past four years.

Mrs. Watson is survived by four daughters, Mmes. H. D. Carr and G. E. Fleming of Post, Mrs. H. V. Williams of Seminole and Mrs. A. M. Fox of Sour Lake; three brothers, H. A. Cullifur of Brownfield, John Cullifur of Gilbert and Ed Cullifur of Longview; two sisters, Mrs. Emma Van Zandt of Nimrod, Mrs. C. E. Scott of Tubelo, Oklahoma; 11 grandchildren and one great grandchild.

O-tom Funeral Home directed the arrangements, and interment was

Wet Problem to Be Settled Only On County Basis

Scurry and a number of other counties in this area cannot have wet cities or precinct unless they approve legal alcoholic beverage sales on a county-wide basis, The Times is informed by an Austin dispatch.

Persons who are urging Governor Beauford H. Jester of Texas to veto the newly-enacted liquor control bill are stressing the wet and dry issues—rather than the law enforcement merits, states Representative Augustine Celaya of Brownsville, chairman of the Texas House of Representatives committee on liquor regulation.

Celaya cites for Times readers nine provisions of the present bill for enforcement—among them a prohibition against employment of minors by local or general distributors, and a ban on consumption on the premises by any minor.

At the present time there are 96 counties in Texas which cannot have a wet precinct or a wet town within their borders unless they vote on a county-wide basis, Celaya states.

The measure prohibits wet areas, it is stated, in those counties which stayed dry after national repeal went into effect in the early 1930's. Included in the 96 counties not affected by the bill are Scurry, Borden, Brown, Childress, Coke, Coleman, Comanche, Dawson, Dickens, Fisher, Foard, Garza, Glasscock, Haskell, Jones, Knox, Lamb, Lubbock, Lynn, Martin, Mitchell, Runnels and Throckmorton Counties of this area.

Columnar pads at The Times.

Lawlessness in State Ranks Fifth in U. S.

Local peace officers, who have been encouraged considerably the past 30 days by the low rate of law violations in Scurry County, are informed Texas now ranks fifth in the present crime wave—largest in the nation's history.

So announces Maurice W. Acers, special officer in charge of the San Antonio FBI field office.

Acers expresses concern over the public attitude toward the present wave of crime.

"In some respects the national behavior pattern indicates a general breakdown of the American home, and when that happens there is real cause for alarm," Acers declares.

Daily Allowable Now 2,448,630 Barrels Oil

Sharon and Ira field operators were advised over the week-end by the Texas Railroad Commission that Texas now has a total average calendar daily oil allowable of 2,448,630 barrels.

The June 14 allowable, it will be recalled, was an increase of 9,693 barrels over the allowable for June 7.

Your Electric Refrigerator GIVES YOU...

- 1. Constant Food Protection**
Your electric refrigerator is waging a continuous war against food waste in your home by providing constant temperatures of forty degrees and below—the food safety zone.
- 2. Economical Operation**
Electric refrigerators have long enjoyed an enviable record of economical operation. Operating costs of new electric refrigerators now making their appearance in ever-increasing numbers average well under one dollar a month.
- 3. Dependable Service**
More than half the electric refrigerators now in use are eight or more years old. Many electric refrigerator owners have refrigerators that have never faltered during their years of dependable day-and-night service.

HELPFUL HINTS FOR BETTER REFRIGERATION

- Don't place hot foods in your refrigerator. Let them cool first.
- Don't open the refrigerator door more often than necessary.
- Defrost frequently, at least once a week. Thick frost lowers efficiency.
- Leave space between refrigerator and wall to allow air to circulate.

Wheat Prices Sag, Cotton Advances Market Review for Southwest Shows

Wheat prices sagged a little bit and closed Friday at \$2.25 per bushel; eggs remained firm with fryers bringing 35 to 36 cents per pound in Fort Worth; and hogs scored net advances of 25 cents to \$1; and good choice lambs turned at \$19 to \$23 at Fort Worth, latest Weekly Swing of Southwest Farm Markets reveals.

Prepared for The Times by the Production and Marketing Administration, the latest trends in farm markets follow:

Southwest farm markets remained generally firm to strong last week, but easiness cropped up on some types or classes of nearly all commodities.

Movement of new crop wheat, oats and barley had gotten well underway and trade sources expected sorghums to join the parade in two or three weeks. Wheat prices sagged steadily, and lost about 20 cents per bushel, closing at \$2.25 Friday. Corn and sorghums advanced sev-

eral cents, while oats and barley changed very little.

Cotton scored some net advances again last week despite late easiness. Good spot demand for the better grades brought only scant offerings. Most crop areas needed rain.

Slow demand for East Texas tomatoes resulted in slightly lower prices. U. S. No. 1 six by six and larger sizes sold late in the week at \$3.25 to \$3.50 per lug box.

Eggs remained firm last week, while poultry held about steady with declines of the week before. At Dallas and Fort Worth heavy hens brought 22 to 25 cents per pound, lights 18 to 21 cents, and fryers 35 to 36 cents. At Denver, New Orleans, Houston and Bryan heavy hens ranged from 22 to 26 cents, light hens 16 to 21, and fryers and broilers 30 to 35 cents.

Cattle sold generally strong to \$1 or more higher last week, but easiness developed on lower grade cows at San Antonio, and on lower grades

Grasshoppers in Section Reported Doing Damage

Even though the hatching season for grasshoppers is virtually over with, a number of Scurry County farmers are still reporting "hopper" infestations in scattered sections of the county, Oscar Fowler, county agent, reports.

Farmers who have "hopper" infestations along fence rows and in edges of fields are asked to call by the county agent's office for an approved formula on grasshopper bait—a bait meeting U. S. Department of Agriculture requirements.

Reports just above the Cap Rock, and over the South Plains, reveal grasshopper infestations have become serious. Several hundred acres of young cotton in Terry, Dawson, Lynn and other counties have been hit by the jumbo type of grasshopper.

Powder urges farmers to report promptly any new grasshopper outbreaks in any section of the county.

DARK HORSE in the fourteenth annual National Soaring Meet, to be held in Wichita Falls July 4-20, is D. H. Pollard, 23, of Roanoke, Virginia, who is taking no chances. Pollard, shown with his "suped-up" Army glider, arrived in Wichita Falls

Snyder Girl at Girl Scout Camp In New Mexico

Jo Ann McGlaun, daughter of Mr. and Mrs. Alfred McGlaun of Snyder, who is a Senior Girl Scout of Snyder Troop No. 10, is among those attending the second annual inter-cultural camp at Toadlena, New Mexico.

Girl Scout camp which Jo Ann is attending is located in the heart of the Navajo Indian country. A total of 24 Indian Girl Scouts and 16 White Girl Scouts have been camping together since June 2 in one of the most unique camping experiences in the country.

Hostesses for the summer camp at Toadlena are Navajo and Hopi Indian Girl Scouts from place names which are in reality only Indian landmarks such as Wide Ruins, Shiprock, Fort Defiance and Lukachukla. Some are Indian girls, Jo Ann reports, who knew no English just a few years ago and who come from the most isolated spots of the vast Navajo reservation.

Of interest is the fact the Navajo reservation covers 25,000 square miles in an area two-thirds as large as Pennsylvania, spread over portions of Arizona, Utah and New Mexico.

Representatives of the Snyder Senior Girl Scout Troop No. 10 says the Girl Scout camp opened with a trip to a Navajo ceremonial dance. Although quite surprised to have so many belagans (white girls) way out in the desert, the Indians did their best to treat them with dignified hospitality.

Directing the Girl Scout camp at Toadlena is Dr. George A. Boyce, director of the Navajo and Hopi Schools, in collaboration with officials of the Girls Scouts. Helen Grimes, Southeast New Mexico Girl Scout area executive, is camp director, Jo Ann states.

Texas has more old age pensions on the rolls than any other state.

KING & BROWN

APPLIANCES AND HOME FURNISHINGS

of all classes at Fort Worth. Common to medium steers and yearlings brought \$14 to \$20 at Houston, while medium to good kinds realized \$19 to \$23.50 at Fort Worth.

Low market stocks of rice consisted mostly of packaged lots in the hands of retailers. Feed markets showed a stronger tone last week, with higher prices for oilseed meals and corn feeds.

Hogs scored net advances of 25 cents to \$1 or more at most Southwest terminals last week, but butcher hogs lost mostly 25 cents at Oklahoma City, and sows dropped \$1 at San Antonio. Bulk of good and choice butchers brought \$24.75 to \$25 at Fort Worth.

Some sheep and lamb markets made small to sharp gains, but lambs dropped \$1 to \$3 at Fort Worth, old crop lambs fell at San Antonio, and ewes weakened at some places. Good spring lambs moved at \$20 at San Antonio; while good and choice kinds turned at \$19 to \$22 at Fort Worth; \$24.75 to \$25.25 at Wichita; and \$24.50 to \$26 at Denver.

Redistricting to Come in 1950 for State in New Law

"Scurry, Borden and other counties of West Texas will fare a lot better once the state is redistricted to give a more equal representation in the Legislature," Pat Bullock, 24th District senator of Colorado City, informs Scurry Countians.

In taking Scurry County alone for example, the 1940 federal census shows the county to have a population of 11,545. Today the county has slightly over 12,000 persons within its borders. Addition of 355 people in the county, plus like population changes in other counties, would put Scurry in a new district—if and when Texas is redistricted.

West Texas representatives, Bullock informs a Times reporter, have a hard time passing any legislation because other sections of the state can out-vote them.

The amendment was recently approved at the 50th Legislature and must now stand a vote of the people. If it passes, present amendment will authorize the Legislature to redistrict in 1950.

In case the Legislature does not act, a commission set up by the governor will be required by law to redistrict.

Bullock was a member of 13 committees during sessions of the 50th Legislature and colleagues say he is "hewing to the line" when he states other sections of the state can out-vote West Texas representatives and senators.

The 24th District senator declares he opposed the college building fund amendment (one of nine approved by the Legislature) because he felt it would give too much money to Texas A. & M. College.

Referring to the proposal to raise the pay of state legislators, Bullock said that during work of the Legislature actual work could be completed in 120 days and there is no reason for paying lawmakers after that time.

"But while they are trying to do a job," Bullock came back with a verbal "haymaker," "the people should pay the legislators enough to enable them to live decently and pay their bills."

Humble Drilling Past 6,465 in Harrell Test

Humble Oil & Refining Company No. 1 C. J. Harrell Ellenburger wildcat project, 10 miles east and slightly north of Snyder, was drilling at last report past 6,465 feet in blue shale and sand after passing through considerable shale.

The Ellenburger test, headed for the 8,500-foot level, is located in Section 78, Block 2, Houston & Texas Central Railway Company Survey.

The average monthly old-age pension payment in Texas is about \$21 compared to \$27 for other states; but 46 per cent of all old folks in Texas are on the pension rolls compared to 24 per cent for other states.

Suddenly it's young again

PROBABLY that faithful Buick of yours still can show a clean pair of heels to other cars on the road—probably still rides and runs like a charm. It makes you realize how wise you were to have picked a Buick in the first place.

Even though time always takes a toll, Buicks do carry their years well. They can keep their eagerness to go, their light-hearted gait and gentle comfort—particularly when they are rewarded with the considerate care that Buick dealers know how to provide. It's care that brings out your car's youthful spirit—care that lets you feel that suddenly it's young again.

Buick car care is something far different from what's regularly called service. It's something that only a Buick man can give. Because he is trained in all the needs and preferences of Buicks. The tools he uses are the right Buick tools. And any replacement part your car may need is a Buick-engineered part.

So it's easy to see why your car is so ready to give you its best when it receives regular Buick car care—care by men who know Buicks through and through and love them heart and soul.

BUICK CARE KEEPS BUICKS BEST

THIS WORM TURNS A BIG CAR

A Buick steers with a finger touch. Part of the secret is a stream of 66 steel balls that circle the worm on the steering column. With these balls there is so little friction that steering is feather-light—so little wear that the gear stays fast and firm without frequent take-ups.

Your Buick dealer lubricates this gear with just the lubricant Buick intended. Anything heavier would make steering stiff in winter—anything lighter fails to give full protection against wear.

It's another instance of how Buick care keeps Buicks best. And the car needs—lube job, tune-up, major or minor repair.

Charles—No, just bald.
Like Most of Us
Joe—Does your wife like to do housework?
Moe—She likes to do nothing comma better.
Silent Part
Salesman—What's wrong with that car I sold you?
Customer—Every part of it makes a noise except the horn.
Common Degree
What is your daughter working for at college, an M.A.?
"No, an M-R-S."
The Star
"What did you think of the ventriloquist?" asked the husband after the vaudeville act.
"I didn't think much of him," replied the wife, "but the little fellow on his knee was awfully clever."
And on a Cushion
"How far down do want to sit?" asked the ticket man of a woman at the box office window.
"Why, all the way, of course," she snapped.

IN THE WAY
Wife (in back seat)—Don't drive so fast, dear.
Husband—Why not?
Wife—That policeman on the motorcycle behind us can't get by.
His Friend, Anyway
"So your wife eloped with your best friend. Who was he?"
"I don't know; never met the fellow."
Keep to Themselves
Teacher—What did you find out about the salivary glands?
Student—I couldn't find out a thing, they're too darn secretive.
Nearly Always
Professor—What happens when a body is immersed in water?
Student—The telephone rings.
His Own Mistakes
One night Joe came home with lipstick on his collar. "Where did you get that?" demanded the little woman; "from my maid?"
"No," Joe replied.
"From my governess?"
"No," repeated Joe, adding indignantly: "Don't you think I have my own friends?"
Slow Motion
He—I've half a mind to kiss you.
She—If you had a whole mind you would have done so an hour ago.

HOW IT STARTED
CANDIDATE—In Roman times, a man campaigning for office wore a white toga, so was called *candidate*, from the word *candidate* meaning "glittering," "white." Today, office seekers are still candidates, but the dress is optional.
TARS—In the days of sailing vessels, sailors' hats were made of tarred sail cloth, and were called *tar-paulins*, a name which also came to apply to the wearer. Later this was shortened to "tars."
PEDICURE—The word began with the old French *pie de terre*, meaning "crane's foot." It is derived from the resemblance of the three lines showing descent in genealogical charts to the footprints of a crane.

SEWING CIRCLE PATTERNS
Tailored Frock Is Versatile Cool, Flattering Afternoon Dress

8019 36-52

HOUSEHOLD HINTS
On stormy days confusion is greatly diminished when looking for rubbers if mates are attached with snap clothespins which are labeled with the names of the owners.
Use an electric fan to dry your liquid stockings. While smoothing the film on your legs, let the direct breezes from a fan speed drying.

CHANGE OF MIND
It is time to change your mind if you're one of those who think all furniture in your best room should match piece for piece. The smartest and most comfortable rooms we've seen were rooms with mixed furniture—mixed with taste. You need not have all "period pieces" or all modern to get a good effect. Blond and dark pieces go together very well and you may, for example, have a practical, functional table next to your old wing chair.

Grind small pieces of toilet soap in a food grinder for use in your dish pan. It makes lots of suds and is easy on your hands too.
If you sew the buttonholes of coat sweaters together before washing, they will not stretch.

An effective method for clearing copper, brass or pewter is making a paste of equal parts of salt, flour and vinegar. Apply the paste, let stand for an hour, rub off, wash with water, and polish.
A box of stationery with a three-cent stamp on each envelope makes a nice gift for a friend in the hospital.
After you have washed your sweater, press it when it is almost dry. Lay it smoothly on the ironing board, placing a cloth over it. Use a warm iron and press lightly, then allow sweater to lie flat on a towel to finish drying.

Benefits to Our Readers
THE PUBLIC nature of advertising benefits everyone it touches. It benefits the public by describing exactly the products that are offered. It benefits employees, because the advertiser must be more fair and just than the employer who has no obligation to the public. These benefits of advertising are quite apart from the obvious benefits which advertising confers—the lower prices, the higher quality, the better service that go with advertised goods and firms.

Dogs I've Known... by Post Day
Lazybones Nothing seems to stir him to life. What can his master expect if the dog isn't fed right? Gro-Pup Ribbon would give him every vitamin and mineral dogs are known to need. It's a money-saver, too! Each box supplies as much food by dry weight as five 1-lb. cans of dog food! Gro-Pup also comes in Meal and in Pel-Lets. For variety, feed all three.
