

AN AID TO THE SOUTH

GREAT DEVELOPMENT OF WATER POWER IN SOUTHERN APPALACHIAN MOUNTAINS.

A GOVERNMENT REPORT ON THE MATTER

Official Estimate That 2,800,000 Indicated Horsepower is Developed by Streams in the Watershed, Only a Small Part of Which Has Been Used—Development Plans.

Washington, May 1.—The greatest development of water power that has ever taken place in the United States has been accomplished during the last few years on the rivers which drain the Southern Appalachian mountains, according to an official report on the water resources of this region. It is estimated that there is at least 2,800,000 indicated horsepower developed by the streams which have their headwaters on this watershed and half of this indicated horsepower is available for economic development.

Only a comparatively small part of this has been made use of, but the portion that has been utilized has been one of the most important factors in the recent industrial development of the south.

One great difficulty encountered by the users of water power is the fact that it cannot be depended upon the year round but must be supplemented for a time each summer by costly fuel power, the streams running too low to be of service.

As the years go on the low water periods are growing longer. This is because the forests at the headwaters of the streams are being cut off, it is claimed, with the result that the melting winter snows and the spring rains pour off the denuded and hardened land in devastating floods, sending down for a few weeks far more water than they can use and moreover, reducing the capacity and usefulness of their mill ponds by filling them with hundreds of tons of sand and soil which the floods scour off the unprotected upper slopes.

If indiscriminate cutting of the forests on the crests of the water shed can be stopped there is a possibility, according to a recent report of experts, of increasing the development of power up to anywhere from three to 30 times the 1,400,000 horsepower at present available.

The method proposed to develop the Appalachian river resources to the total of 42,000,000 horsepower is by storage reservoirs, which would catch the surplus waters of the spring and retain them until the summer months when the mills now have to fall back on fuel or close down.

The United States geological survey has kept the records of stream flow in the Appalachian for a number of years and recently made a careful study of the possibilities of storage reservoirs in that region. The forest service has just published their report under the title, "The Relation of the Southern Appalachian Mountains to the Development of Water Power."

The experts of the geological survey who made the investigation, after picking out reservoir sites and estimating their capacity and the area from which they would receive the run off, consider the figures given above extremely conservative. Even with only 1,400,000 horsepower, the annual return at \$20 per horsepower per year would amount to \$28,000,000, equal to a gross income of 3 per cent on a capital of about \$933,000,000.

Reward for a Nebraskan. Minden, Neb., Apr. 30.—Bert Taylor, alleged assailant of Miss Pearl Taylor, his sister-in-law, is believed to have made good his escape. He was traced by bloodhounds into Kansas and is believed to have reached the railroad and taken a train. A good description and photograph of the fugitive has been sent to every city and town in the country, offering a reward, for his capture.

Founder's Day in Pittsburg. Pittsburg, May 1.—The 12th annual celebration of Founder's day of the magnificent Carnegie Institute was held in this city Thursday. Notwithstanding very inclement weather conditions much interest was taken in the exercises. At the exercises proper in the afternoon Ambassador Bryce of Great Britain delivered the principal address.

Snow Interferes with Kentucky Races. Lexington, Ky., May 1.—Because of a heavy snow which fell early Thursday and made the track unfit for use, Thursday's races here were declared off. It has not yet been decided whether a double program will be run on Friday or Saturday or whether an extra day of racing be given on Monday.

High School Students on a "Hike." Milwaukee, Wis., May 1.—Five students, aged 17 to 19 years, from Hyde Park High school, Chicago, and footsore, arrived in this city Wednesday night, after having walked the entire distance from Chicago in about 58 hours. They had stopped over night at Lake Bluff and Racine.

Heavy Frost at Lawrence. Lawrence, Kan., May 1.—A heavy frost did much damage to the small fruit crop in this part of the state Wednesday night. The vegetable men are great sufferers.

AGRICULTURE IN SENATE

THE APPROPRIATION BILL WILL MEET WITH OPPOSITION.

Allowance for Bureau of Soils Cut from \$335,460 to \$200,000—Grain Grading Amendment Killed.

Washington, May 1.—The agricultural appropriation bill was taken up in the senate Thursday immediately after routine business was concluded. The clerk proceeded to the reading of committee amendments as is usual in the case of considering supply bills but Senator Teller objected and upon his demand the bill was read in full. He announced that there were some things in the bill which he desired to attack before it comes to its final reading. He did not specify to what amendments he alluded. All of the amendments in relation to forest service, which were understood as likely to provoke debate were passed over until Friday. The appropriation for the bureau of soils was reduced by the committee from \$335,460 to \$200,000 which is all that was asked for by the secretary of agriculture.

Senator McCumber argued that a larger amount was needed. "I have great admiration for the secretary," said Mr. Teller, "but I venture to say that his Scotch blood never restrained him from asking for something he needed."

The committee's action in reducing the appropriation was sustained. The reading of the bill and the approval of the committee amendments consumed practically all of the afternoon. The bill was then laid aside and will be taken up Friday for discussion of amendments in regard to the forest service. At 4:40 p. m. the senate adjourned.

The committee amendment to the bill providing that grades of grain as established by the secretary of agriculture shall "become the official standards for the grading of grain" was made the subject of a point of order by Mr. Nelson. Mr. Burdick advocated the adoption of the amendment on the ground that there is no now any fixed standard and a different basis is used at the various exchanges. The amendment was opposed by Senators McCumber and Teller as standing in the way of states fixing their own standard and the former argued that there was now before the agricultural committee a bill to fix standards of grain. The point of order was sustained.

ROADS DISCRIMINATE.

Chanute Refining Company Brings Charges Against Five Railroads.

Chanute, Kan., May 1.—The Chanute Refining company of this city has filed a complaint with the interstate commerce commission against five railroad companies charging that the rate on crude oil between Watova, Ok., and Chanute, is unreasonable. The complaint is against the following railroads: The Atchison, Topeka & Santa Fe, St. Louis & Iron Mountain Southern, Missouri Pacific and the Missouri, Kansas & Texas.

The specific charge against the defendant companies is that they have put in force and maintain a rate of 17 cents per hundred pounds for the transportation of crude oil in tank cars from Watova to Chanute, a distance of "about 75 miles via the short line," and that the rate from Watova to New Orleans, a distance of about 732 miles, on the same commodity, is 15 cents per hundred pounds. Continuing the complaint charges that the following rates are in force on crude oil per hundred pounds: From Jennings, La., to Danison, Tex., 514 miles, 10 1/2 cents; Sour Lake, Tex., to Denison, 408 miles, 10 1/2 cents; Watova to Kansas City, Kan., 227 miles, 10 cents. The refining company charges that the rates discriminate against Chanute in violation of the act to regulate commerce, approved February 4, 1887, and acts amendatory thereof or supplementary thereto.

Must Reform Dispatching System.

Ann Arbor, Mich., May 1.—State Railway Commissioner Dickinson, while discussing the collision of Tuesday on the Detroit, Jackson & Chicago railway in which ten men were killed and 30 persons injured, declared Thursday that the car dispatching system on all the interurban trolley roads in Michigan is defective. "There will have to be a reform," continued Mr. Dickinson, "and we shall have all the superintendents and chief dispatchers of the various roads in Lansing for a conference and insist upon something like a standard system of dispatching."

Gov. Sparks Improving.

Reno, Nev., May 1.—Gov. John Sparks' condition shows some improvement Thursday night and the patient says he feels better and hopeful. It was at first believed that the governor had suffered a paralytic stroke, but his physician said Thursday night that the malady is multiple peripheral neuritis, which though very serious, is not necessarily fatal.

Whitney Wrote the Letters.

Washington, May 1.—Fred B. Whitney, formerly an attorney for the Lake Torpedo Boat company, Thursday confessed that he had written the anonymous letters which have figured in the Lilley submarine boat investigation. It was announced at the close of Thursday's session that there would be no more open meetings by the committee.

MUST SEE BOOKS

MORE MONEY NEEDED TO MAKE PUBLICITY CLAUSE OF HEPBURN BILL EFFECTIVE.

PRESIDENT URGES ACTION

Failure to Make Sufficient Appropriation for Examination of Railroad Accounts Would Annul the Act.

Washington, May 1.—The usual point of no quorum was raised when the house reconvened Thursday on the motion pending from Wednesday that the house go into committee of the whole for further consideration of the sundry civil appropriation bill under the five-minute rule. The doors were locked and the roll was called on the motion, which prevailed. In accordance with Wednesday's agreement the committee took up the amendment proposed by Mr. Townsend of Michigan to increase from \$50,000 to \$350,000 the appropriation to enable the interstate commerce commission to enforce that clause of the interstate commerce act directing the commission to examine into and make public the accounts of interstate railroads and authorizing the employment of special examiners for that purpose.

Speaking to that amendment Mr. Townsend quoted from a message from the president in which the executive said that failure to make appropriation for carrying out the publicity clause of the Hepburn act would be to attack the law in its most vital point and to give relief to those corrupt corporations which the law was intended to reach. Mr. Townsend said that the publicity provision had not been a part of the law long enough to enable any one to say that it should be abandoned; that the purpose of the provision was to find out whether the railroads were obeying the Hepburn act and that refusal by congress to provide for the expense of these examinations would be tantamount to an informal repudiation and repeal of the law itself.

President Roosevelt Thursday sent for Representatives Hepburn of Iowa, Townsend of Michigan, Campbell of Kansas and Sulzer of New York and urged them to make vigorous efforts to secure a larger appropriation in the sundry civil bill for an investigation of the books of the railroads of the country to determine whether they are complying with section 20 of the Hepburn railroad rate law, providing that a system of uniform accounts must be kept as prescribed by the interstate commerce commission. For the present fiscal year the committee has an appropriation of \$80,000, but has not been able to make much headway in the work. For the next fiscal year the administration desired an appropriation of from \$250,000 to \$500,000, but the house committee on appropriations cut the amount to \$50,000. It is claimed by the president and the interstate commerce commission that this amount will be entirely insufficient. Section 20, it is stated, is considered the most effective portion of the Hepburn law, really being its publicity clause. By careful investigation of the books of the roads the granting of secret rates or rebates would be revealed. It is understood that the fight for a larger appropriation will begin in the house at once.

While the civil appropriation bill was under consideration in the house Thursday, Mr. Townsend (Mich.) offered an amendment increasing from \$50,000 to \$350,000 the appropriation for the enforcement by the interstate commerce commission of that clause of the Hepburn act directing the commission to cause to be made examinations of the accounts of the interstate railroads of the country to determine whether that law is being violated, and to make public the results of such examinations. After a debate lasting four hours, the amendment was agreed to.

Secretary Straus Re-Appointed.

Washington, D. C., May 1.—President Roosevelt in a formal letter Thursday notified Secretary Straus of the department of commerce and labor that he had re-appointed him for another term of six years as one of the American members of the Permanent Court of Arbitration at The Hague. The other American members of the court are Chief Justice Fuller, former Attorney General John W. Griggs and Judge George Gray of Delaware. Secretary Straus was appointed to the court after the death of the late President Harrison, who was one of the court's first members.

Kansas Prohibitionists Nominated.

Peabody, Kan., May 1.—At the last of a two days' session here delegates of the Prohibition party elected 34 delegates to the national convention at Columbus, O., July 15, and selected candidates for both houses of congress and a full state ticket. Rev. E. C. Shouse of Parsons was named for United States senator and Rev. Albert L. Hope of Abilene for governor. Seven hundred dollars was raised for a campaign fund.

Became Demented On Train.

Lincoln, Neb., May 1.—Mrs. C. Berry of Louisville, Ky., was taken from a Burlington train Thursday and placed in the county jail. The woman had apparently become demented. She was on her way to Denver.

### HUGHES MEN MEET

THEY ADMIT THAT POLITICAL CONDITIONS IN NEW YORK ARE PECULIAR.

### GOVERNOR WON'T WITHDRAW

Gen. Woodford Told the Conference Republicans Were Never So Divided in Empire State As They Are Now.

New York, May 1.—The name of Gov. Charles E. Hughes will not be withdrawn from the presidential canvass until the national convention at Chicago has made its choice of candidates. This statement was made Thursday by Gen. Stewart L. Woodford, president of the Hughes league of the United States, who presided at a conference of delegates elected to the national convention from New York state at the Hotel Astor Thursday, called in the interest of Gov. Hughes' candidacy.

It had been reported that the announcement of the withdrawal of the governor's name as a candidate for the presidency might be announced at Thursday's conference, but this was positively denied by Gen. Woodford.

When the conference was called to order by Gen. Woodford, addressing the delegates said: "Political conditions in New York at this time are peculiar. In all my life I have never seen the Republican party so seriously torn, or perhaps I should say, so divided on serious questions as we are to-day. We are in power in the state with a governor elected by a majority of about 57,000. Every state officer is Democratic. We hold the majority of the state senate and of the assembly. Nevertheless, the senate by an even vote failed to pass legislation recommended by the governor, a failure which the governor feels very keenly."

Continuing, Gen. Woodford said that the hard times following the panic would make it doubly hard to achieve success at the November election. "If we wrest the victory from our opponents," he said, "following a panic, it will be the first time that a political party has ever accomplished it. We need to act with a great deal of patience and good temper and we ought not to conduct our preliminaries of the campaign as to anger and drive into antagonism any member of our party."

Gen. Woodford said that the conference had been called in order that the conditions might be freely discussed and that out of the discussion might come suggestions that would be useful at Chicago.

After an executive session the conference adjourned to meet at the call of the chairman.

### PAPER HEARING RESUMED.

Gen. Agnus of Baltimore American and Mr. Norris Testified.

Washington, May 1.—A mass of data bearing on what he charged to be a combination of paper makers to raise prices and restrict production was furnished Thursday by John Norris, representing the American Newspaper Publishers' association, to the select committee of the house which is conducting an investigation into the subject of the price of news print paper in the United States. Mr. Norris, with the exception of a short while was on the stand all day. During the time that Mr. Norris was excused Gen. Felix Agnus, of the Baltimore American, testified regarding his various contracts with paper manufacturers and said that on January 1 last he was forced by the International Paper company to pay \$12 a ton more for paper than he did last year. He related a conversation he had had Thursday with a representative of the International company in which he was told that if the tariff on print paper was removed he would be given a reduced rate.

At the close of the day's session Chairman Mann stated that apparently some of the publishers were not as anxious to attend the hearing as they originally appeared to be, but said that he would force their presence and secure their testimony.

### Secretary Taft Goes to Colon.

Washington, May 1.—Secretary Taft left Washington Thursday afternoon for Charleston, S. C., where he will Friday embark on the United States cruiser Prarie and proceed to Colon, whither he goes to investigate several important questions connected with the construction of the Panama canal and the relations between the United States and the Republic of Panama and also the boundary dispute between Panama and Colombia.

### San Francisco Clear of Plague.

San Francisco, May 1.—The quarantine which some foreign ports have maintained against vessels sailing from San Francisco is to be raised. The foreign consuls have been notified by the health authorities that there has not been a case of the bubonic plague reported for more than seventy-five days.

### Woman Will Handle Liquor There.

Gutrie, Ok., May 1.—Mrs. O. A. McNair, a widow of Tahlequah, Ok., was appointed Thursday as local dispensary agent for that city, having been recommended by the prohibitionists.

### TO CARE FOR 1,000 PERSONS

GOVERNMENT HELP REQUIRED FOR STORM SUFFERERS.

Army Rations, Tents, Red Cross Nurses and Medical Supplies Needed—The Death List Grows.

Hattiesburg, Miss., May 1.—Maj. C. A. Devoil, of the general staff of the United States army, arrived here Thursday from Washington and held a two hours' conference with the relief committee and the naval surgeons who have been on the ground during the past 24 hours. As a result it was determined to concentrate all the relief work in this territory at Hattiesburg. Major Devoil has communicated with the war department asking for rations and tents for 1,000 persons and for red cross nurses and medical supplies.

At the conference Thursday, many reports on the cyclone were presented to Major Devoil. The report of Dr. H. N. Rheimsch, who made a trip through the country from Purvis to Baxterville, showed conditions in the Baxterville section to be in a worse shape than originally reported.

The local relief committee through Gov. Noel and the representatives of the government probably will ask a special appropriation from congress of \$50,000. There are hundreds of people who will have to be taken care of for fully 60 days and perhaps longer.

Related reports swell the death list a conservative estimate compiled here showing the dead in southern Mississippi number over 150.

### REVOLT IN THE HOUSE.

A Movement Is On Foot to Break the Rule of Speaker Cannon.

Washington, May 1.—Representative Townsend of Michigan has received the assurance of Speaker Cannon, conveyed through Representative Watson of Indiana, the Republican "whip" in the house, that the speaker is not adverse to action at this session of congress on an anti-injunction law and a law to amend the Sherman anti-trust act and that bills for the purpose will be reported within a few days to the house from the judiciary committee.

This action grew out of a step taken by Mr. Townsend to obtain the signatures of enough Republican members to call a caucus to commit the majority favorably on such measures.

The statement was made Thursday by a prominent Republican in the house that a movement is on foot backed by between thirty and forty members of the majority, to refuse consent to the passage of any financial bill at this session until assurance has been given that something will be done towards placing wood pulp on the free list.

### To Purchase Buildings Abroad.

Washington, May 1.—The house committee on foreign relations Thursday decided to report favorably a bill providing for the purchase abroad of American embassy, legation and consular buildings and providing that not more than \$1,000,000 shall be appropriated each year for this purpose. For this year the bill appropriates \$500,000 for the purchase of embassies at Berlin and Mexico City and \$500,000 for the purchase of consulates at Shanghai and Yokohama.

### A Federal Judge Resigns.

Muskogee, Ok., May 1.—United States Judge Ralph E. Campbell, of the eastern district of Oklahoma, has forwarded his resignation to the attorney general, giving as his reason that he prefers to resume the practice of law.

### Maine Delegates Uninstructed.

Portland, Me., May 1.—Four delegates at large to the Republican National convention at Chicago were selected at the Republican state convention held in this city Thursday and will go to Chicago without instructions for any one.

### SQUARE DEAL FOR EVERYBODY

THAT'S BUSINESS, AND IT SHOULD HOLD IN MEDICAL PRACTICE.

Peerless Medical Experts at 924 1/2 Frederick Avenue Win Golden Opinions Through Their Frankness.

Everybody is out for the money and everybody knows it. There are ways of making it by subtle cheating—for that's what it is when "the square deal" is overlooked. Does it pay to get money in any way, or does it pay in the end to be perfectly frank and get only what you can honestly earn? For instance: Yesterday, at the Peerless Medical Institute, at 924 1/2 Frederick avenue, a woman in the last stages of consumption, just able to be out when assisted by others, was brought in. A thorough examination showed that one lung was practically gone—had sloughed away. "Anything for a cure," cried her relatives. "Easy to take the money; build up false hopes and give in return only lies. The famous specialists can cure sick, sitting, partially broken down lungs, but they can't make, manufacture entire new ones. They told the relatives so. It was pitiful, yet these people gave heartfelt thanks. They had been told the truth. Now, when you can trust me like that on a cash proposition, couldn't you trust their word as to your bodily condition? That's just what these famous specialists want—your confidence in their ability to cure if they tell you they can't. It doesn't cost a cent to find out and you certainly are willing to pay if you are cured.

These famous specialists are endeavoring scores of people to themselves by their frank, kindly method of handling those who seek relief. The sufferers from chronic troubles of the stomach, liver, kidneys and heart are almost without exception at some time victims of misrepresentation. At the Peerless Medical Institute they secure a frank statement and a cure, if a cure is promised. Many men and women suffer from heart and stomach trouble—the two are often associated—have already been cured, although these famous physicians have been here but a short time.

The demonstrations at the free show continued last night. On the stage, Peerless Beauregard gave John Burns, one application of the Pain Ease, and though he had been more or less deaf he could hear a watch tick within five minutes. Sylvester Wizer, Twenty-first street, could move a lame and immovable wrist after one treatment. Ott McColly, Twenty-ninth street, obtained decided relief from catarrh after one application. Mr. Phillips, of the firm of Phillips & Krauser, told how the medicines he bought had made a big improvement in his heart.

The institute is permanent; it will be here always. The free shows will start as soon as their purpose is fulfilled, but the institute will keep on bringing the joys of life to men, women and children. Consultation and examination free. Hours from 9 a. m. until 12 noon; from 2 p. m. until 5 p. m., and from 7 p. m. until 9 p. m. The Peerless Medical Experts are here to stay.

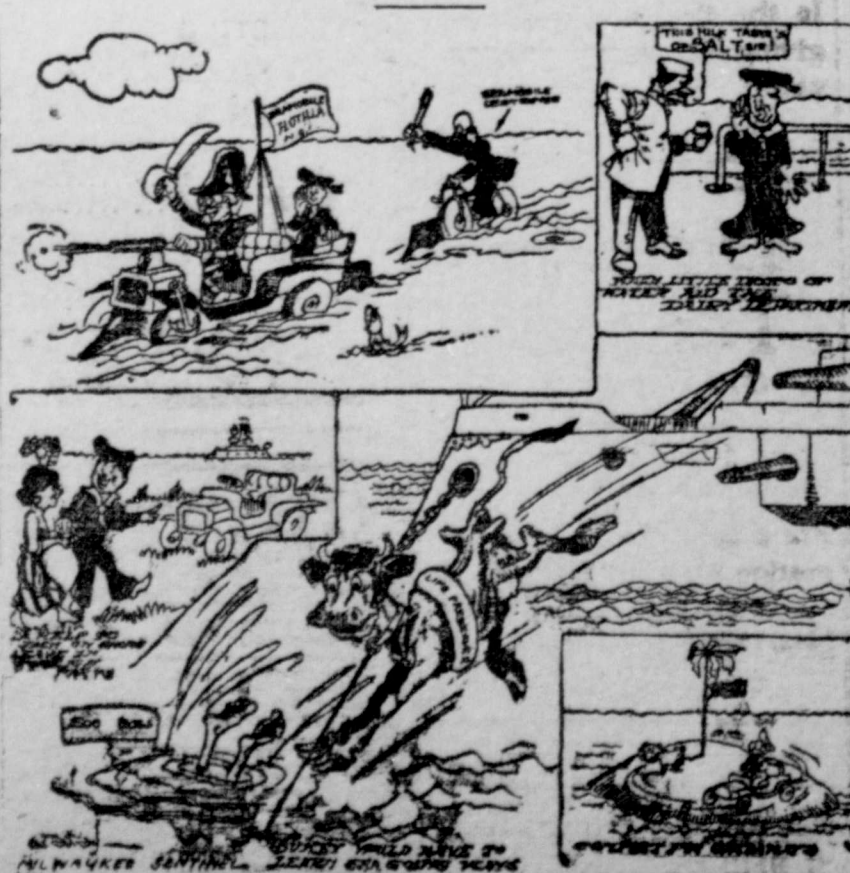

### Wedding Pin Method.

A Nebraska woman sewed her husband between two blankets and belabored him with a rolling pin until he agreed to sign a temperance pledge. We rather suspect that is one variety of prohibition likely to actually prohibit—Redlands Review.

### in Glacier Crevasse 21 Years.

Berne, May 1.—While exploring the Montrosa Glacier Thursday afternoon a party of guides discovered in an ice crevasse a body, which they cut out of the ice and brought to town. Later the body was identified as that of a guide named Naghi who fell into a crevasse in the summer of 1887 while conducting a party over the glacier. The body was well preserved.

### AN UP-TO-DATE NAVY.
