RUBBER TREES IN HAWAII

Over 400,000 rubber trees have been planted on the Hawaiian out islands, the experiment proving so successful as to make a thriving and long drawn out industry.

ALFALFA IN TEXAS.

Alfalfa raising is rapidly expanding in the southwest. A few and anxious to eat up the weeds in years ago Texas was thought unfitted for growing this valuable stubble fields. That animal is the legume. During the past year 25,000 acres has been added to the area devoted to alfalfa in the Lone Star state, which now amounts to 100,-

HOGS ON THE DIVIDE.

For the enlightenment of the fellows who still think Colorado upon the soil to enrich it and make tern to the goods, and the tacks hold Will A. Young, formerly Miss Clay of pork is a chimera and belongs in the category of phantasmic agronomy. The Journal pilgrim recently saw a drove of hogs good safe to turn the sheep in-for a few being cut. enough for anybody rooting around in an alfalfa field away up on sheep on a large area will not do any the divide in the Rockies. They will have a hog boom in Colorado harm to these crops. It has been some of these times.

OBSERVE APPLE DAY.

Next Tuesday, October 20, is "apple day" in observance of which to turn them in just as early as possievery good citizen of the United States eats two or more apples.

Apple day is the outcome of a movement inaugurated several years ago by the apple growers of the country to popularize the apple Red River valley overgrown with as a food, and the third Tuesday of October was set apart for this weeds, and lying idle, when they purpose. Good apples are plentiful and reasonably cheap in this sec- might just as well be utilized by sheep. tion of the country and this year "apple day" should be generally observed.

WOULD BE HUNTING DAIRY COWS.

If the farmers will remember that butter from a cow which produces from 250 to 400 pounds of butter yearly can be made at a cost farmer to allow the stubble field to for feed not above \$30 per year, and that it is about the only branch go unused. of farming that does not have its way up and way downs, as the beef and pork business have, there would be more of them hunting for the | Henry Clews in American Industries special dairy cow, says the Texas Stockman and Farmer. Relatively for October: An industrial corporation house this winter and you are fond of to population there are less cows in the United States today than ten is usually the combination of several flowers and plants, you can make a very

WILL CONQUER COUNTRY.

Omaha Journal-Stockman: Disastrous prairie fires in the vicinity of Dallas, S. D., furnish an object lesson to intending settlers on the fisted on the open market. It is evident the chickens and the plants with the Tripp county lands. So long as the country was open there was al- that an enterprise must have national stove and underground stovepipe, only ways the danger of fire, but as the lands become cultivated this danger naturaly disappears. The rush of homeseekers to these reservation lands shows conclusively that the people will conquer the country if given the opportunity and the day is not so very far off when every acre will be needed to support the population.

SLIM DEMAND FOR BREEDING EWES.

Chicago Live Stock World: Selling breeding ewes to the country is a task the stock yard handler does not relish this season. It requires industrious peddling. Last year the holder of a bunch of ewes already been stated, only large indusheld the other end of the stick. He considered pricing such stock an tries are considered in the financial and along the other side under the act of condescension. Prices were \$2 higher than at present, the centers, and these must be "open" for bench where the plants are to grow. By country was clamorous for everything in the ewe line and, in the their very size demands that the organ- raising the bench and covering it in buying furore even short-mouthed ewes were classified as breeders. All this is changed now. Good ewes have been peddled at \$4 and since Kentucky and Tennessee secured their season's quota, orders are rare. Michigan, Illinois, Indiana and Wisconsin have not only suspended the stocking-up process, but threaten to fatten and market its management is entirely capable, it the advantage of the added warmth acquisitions of last year.

TURNING OUT LITTLE LARD.

Chicago Record-Herald: More complaints of light weight hogs increased compensation that will come the money to buy glass you can use are coming from all of the western packing centers. Local lard shippers who had stipulated prompt shipments on sales made early last week were given the excuse for non-fulfillment by the packers that the hogs were turning out very little lard. The new demand of lard is very poor, the consumer having been given a bad scare by last week's decline in prices. Shippers say, however, that the lard and meat demand will soon be up again as stocks are very low and the big consuming month for lard is at hand. Local bulls say that the aid the banker who has in charge the tomato and cabbage plants, so that one chief recent handicap on the market was the selling of about 70,000 sale of securities, in many ways. It is can indulge one's taste for seeing tierces of lard by the Cudahys. The latter sold a little lard, about 2,000 tierces, Monday and marketed about 3,000 tierces on Saturday. Previous sales covered the greater part of last month.

YANKEE INVENTIVE GENIUS.

Nine hundred thousand patents have been issued from the U.S. patent office, a monument to the inventive genius of the American people. Patent Commissioner Moore recently affixed his signature to the nine hundred thousandth patent document, issued on an improve- and the industry-have your end of it some experience it is quite liable to go ment in traveling stairs. First patent ever issued by the United open and fair. Make no attempt to keep far beyond the pin-money stage. States government was signed by President Washington, being a device for making pearl ashes.

As going to show the inventive tendency of the American mind, as compared with other countries, Mr. Moore calls attention to the fact that, notwithstanding this is among the newest of nations, and is only one among many, the total of patents issued by the United States is not very far below the total for all other countries for all time. The issuance of foreign patents up to the date of last reports

was 1,135,000, or only 135,000 in excess of the total for this country. The policy practical by this country in protecting inventors has had much to do with furthering the genius of the country in this line. Some of the biggest fortunes of the country are founded on inven-
