CATTLE.

Opening Trade in Steers Slow-

The local supply of cattle today included more of a showing of fat steers! than have been here for some time and among them were some of the best beeves seen here since the Interstate Live Stock show in September and probably the best lot that has been on the open market since last winter.

Aside from these there were no cattle the country can be met on this marhere good enough to bring above ket.

Total receipts at five points for two expired days of the week 70,000 against 95,800 for the same time last week and 80,600 a year ago. Local receipts fall off 1,700 compared with last week, but are slightly ahead of

PA'S WALLET WILL SUFFER.

Medicine Hat is now delivering a brand of weather well calculated to tone things up for the merry Christmas chimes. The crisp temperature is good for about everything earthly except pa's wallet. for two hours; then put them in a stove with vinegar The next three weeks will see this said wallet called upon for presents for ma and all the cherubs of the household. And, of course, ma and for ma and all the cherubs of the household. And, of course, ma and the said cherubs will all want a little change out of the wallet with which to get pa a supply of socks, handkerchiefs and neckties. We are glad for everybody and everything except pa's wallet, but we cer. spoonful of flour, one tablespoonful and deodorize. tainly do feel sorry for that thing.

TIME TO CREATE SENTIMENT IS NOW

When you want anything from your state legislature in the way | of development of resources, the first thing to do is to develop a of development of resources, the first thing to do is to develop a public sentiment demanding that development. It is not for a legislature to tell the people what they want. The legislature, including its executive branch, is a creation of the public and the public should not ask, but demand what it wants. The public is derelict in its duty to itself if it waits until the legislature meets before creating a sentiment in favor of any public need. The time to create a sentiment and demand for the development of Missouri resources is now.

GUARD AGAINST CARELESS HUNTERS.

Small game is plentiful in Missouri this season. Rabbits, squir rels and quail are more numerous this fall than for several years while the flight of waterfowl is said to be the largest of recent seasons. A plentiful supply of game always causes a rush of amateur city sportsmen (†) to the country and danger to live stock and human athletic carnival turned out for a life follows the invasion. In certain sections of Missouri vigilant crowd of about 200 spectators associeties have been organized by the farmers to enforce the trespass sembled in Espey's hall, South St laws against hunters, in an effort to minimize the annual loss to live Joseph, last night. Hostilities did not stock and human life caused by careless hunters. Several arrests and begin until late and the crowd began convictions have been secured through these societies this season. to get restless, but when it did start Their efforts are commendable. The man with a gun who invades things went fast and furlous enough another's premises without permission has not much consideration to put the crowd in yelling humor in

HADLEY'S OPPORTUNITY.

The following timely editorial appeared in the St. Joseph Gazette They were well matched, however, in of this morning and points to an awakening in Missouri that means their ability with the mits and pu

In his recent public utterances Governor-elect Hadley has evi- appetite of the crowd for things to denced a commendable desire to do something of real value to the follow people of Missouri during his administration as governor. He has followed. Five husky descendants of called attention to the need for better farming and to other things of Ham entered the ring and what they equal importance, and promises to do all in his power to accomplish something worth while along this line. The Gazette desires to endorse the winner in the third round. He the position of Governor Hadley and to call attention to the fact that put the fourth man to the ropes just he is confronted with the best opportunity to do something for Mis- as time was sounded. souri that has presented itself to any man. There has been a criminal negligence of opportunity in Missouri, an inexcusable ignorance of our possibilities. We have gone on from year to year boasting of our four minutes each. Each man got a wonderful resources but doing nothing toward their development or fall toward advertising them to the world. The state needs, as it needs The biggest fun of the evening nothing else, a wideawake publicity bureau, with a man at the head of it whose services are so valuable that they can not be secured for a six round go. Miner weighs close less than five or ten thousand dollars a year. Kansas has a man at to 300 pounds, while his opponen the head of her agricultural department who is considered of so much would not weigh above 175 pounds. "Miner is certainly there with the yalue in that position that he can not afford to resign to accept a goods," was the remark all over the position in the United States senate.

The first thing the governor must do if he would accomplish it at the end of six fast rounds. anything along the lines suggested is to induce the legislature to furnish funds to do something with. Our annual appropriation for agri- well matched lads of about 130 cultural purposes is but little more than a third of the sum appro- ably the nearest scientific two round priated by the Kansas legislature. Is it any wonder, in view of this contest of the evening and quit with fact, that Kansas is better advertised than Missouri? In this state honors about even. we have better soil for the principle farm products, better grass for other fast two rounds and the evening pasture, better fruit possibilities, better mineral resources and better finished with Prof. Dan Daly and Dan climate than Kansas can boast of and yet, away from home, Kansas Darcy, in which Daly proved that he is better thought of in all these respects than is Missouri. And it is wears the prefix to his name well. not difficult to find the reason why this is so. Kansas is exploited, talked about, written about, while Missouri is not. The state ought to employ experts to investigate the different resources of the state and to write about them. Our farm lands need exploitation, our live stock interests should be heralded abroad, but these things can not be done without funds and these funds must be provided by the legis-

To get at the meat of the cocanut, therefore, Governor Hadley should insist upon proper publicity for Missouri. The legislature tion of the laws of good breeding, even should provide the means and then an adequate publicity bureau if they leave us little time for the Burbank Sure He Has Found Food should be established, either in connection with the agricultural de- carrying out of them, and the rules of partment or independently. The chief of this bureau should be an conduct upon which we have all been expert and be authorized to engage the services of other experts. These experts should study Missouri until they know it, until they know what to write about. Then they should write, and what they of years ago .- Ladies' Field. write should be put in proper shape for general circulation. Copies of it should go to every editor in the land with an invitation to request any other information desired. The bureau should be able to tell what can be done on an acre of Missouri soil planted to any one without peroxide of hydrogen. This is of a dozen crops. This sort of a campaign will bring immigrants by the thousand and every citizen of Missouri will be benefited thereby. Following them will come better farming, better mining, better roads, better public buildings and innumerable other things of which the state stands in need. This is the grandest state in the Union but our own people, even, do not know it. Let Governor Hadley take the lead and every citizen of the state catch step in an effort to make fact, a pin wound is often more dan in the field of scientific horticulture is confident of obtaining.

Manufacturer's Sacrifice Sale of Messaline Princess Dresses

One of the most important purchases of the season just consummated by our New York buyer.

\$12.50

For EMPIRE PRINCESS DRESSES Worth from \$22.50 to \$25.00.

PROMINENT New York Manufacture desirous of "cleaning up" at the end of his Fall season finding that he had materials enough left for about fifty dresses, offered to make them up for us according to models of our own choosing at a price which represents little more than the bare cost of the material alone, and enables you to secure a handsome Messaline Empire Princess Dress for \$12.50 that would ordinarily sell for \$22.50 to \$25.00.

ONSIDERING too, that the Princess dress is the most favored style of the season, you are doubly fortunate in the opportunity to secure one of these lovely new dresses at such a great sacrifice in price. These elegant dresses are suitable for afternoon, evening or street wear, being dressy enough for the former and not too dressy for the latter.

THEY ARE made of fine quality Messaline silk in a large range of colors for street and evening wear, made tucked waist with lace yoke and collar, full flare skirt with overskirt effect, workmanship equal to that of any \$25.00

-O MAKE the sale more interesting, we have selected from our regular stock, about 40 Princess dresses in henriettas, serges, fancy voiles and silks, that sell regularly at \$17.50, which we will include in the sale at the one price, \$12.50. The sale begins Tuesday and continues until all are sold. We hardly expect them to last the week out. Suit department, second floor. See window display.

study of the individual heads. Grain phates from poor individuals will, undoubtimprovement. There are two or three perphosphate, potash, nitrate of soda features which should be observed in or some form of fertilizer material. picking good heads in the field. The first item has reference to productive The enterprising grower is not satisfied with an average yield; but tween China and Burma recently her. She could not understand anyit is his desire to make a better record this season than he was able to make last season. If an increase can be obtained by making a careful study of the plants in the field, he can willof the plants in the field, he can willingly sacrifice a small amount of time in order to accomplish this purpose. Kaffir heads which will shell out a high percentage of grain should be set aside for seed. In the second place plants should be selected which are (ellows with their grotesque orna) plants should be selected which are uniform in size and type. Where no attention is given to this feature, the field crop will contain plants which are short and leafy; others may be classified as medium sized plants, and there are still others which have a tendency to run up possibly several feet above the average crop. Some uniformity in length of the stalks will surely aid in harvesting with a head-er, provided the grain is handled in this manner. Where the grower wishes to secure a maximum amoun of forage along with the grain, the selected type should bear the proper characteristic. Smut has damaged the corn in some sections at times, and the grower is frequently disposed to reject the entire crop; bu such a course should not be followed indiscriminately, because many perfect, smut-free heads can be taken

from such fields.
The selected heads which are taken from the field before the regular crop is harvested can be placed on a 8 or 10 inches apart at intervals of be bored in those scantlings about 6 idea of the prices that prevail. Inches apart and common fence wire passed through these holes and fastened on either end will serve as "And he held to thelves in which the kaffir corn heads a pair of plaid trousers. an also be stored by placing them in with wire or strong cord, they may be suspended from rafters in the seed into the barrow." and examined carefully. The poorest workin in."

pes should be discarded and very best heads can be set aside to lant the special seed plot. The heads which are selected finally, should be uniform in size, shape and type. special standard must needs be adopt-Select Type of Corn That ed for the respective groups which Engineers Run on Tribe of Aborare included under the general term "sorghum" inasmuch as there is marked difference in the shape and size of the respective types. Compact, full heads which conform to the variety type should be singled out in preference to poorly filled, open heads; and care should be exercised in making this division so that impure or mixed heads may be thrown with the lot which is to be used for feeding purposes.
