

DAILY MARKETS

Official Receipts, 2 Cars, 94 Cattle; 29 Cars, 1959 Hogs; No Sheep Reported.

HEAVY STEERS 10c LOWER

Lighter Weights Steady for the Week—Demand is of Broad Volume.

COW STUFF ACTIVE SALE

And Prices Closing Stronger—Bulls Steady for a Good Outlet—Veals Steady for the Week—Stockers and Feeders Steady to 10c Lower—Hogs Weak to 10c Lower—Top \$7.70—Sheep Lower This Week.

Receipts from January 1, 1911. The following table shows the receipts from January 1, 1911, and receipts for the corresponding time in 1910:

	1911	1910
Cattle...	48,946	53,960
Hogs...	111,254	144,487
Sheep...	4,887	38,118
Horses...	4,669	2,465

Live Stock in Sight. The following shows the estimated receipts of cattle, hogs and sheep at the five principal western markets:

	1911	1910
Chicago...	300	9,000
Kansas City...	300	3,500
St. Louis...	150	4,400
St. Joseph...	150	2,000
East St. Louis...	300	3,600

Receipts by Cars. The following shows the number of cars of stock handled today by railroads centering at the stock yards:

	1911	1910
Cattle...	5	9
Hogs...	3	3
Sheep...	2	2
Horses...	1	1

CATTLE

Heavy Steers Closing 10c Lower, Lighter Are Steady. Only a few head of cattle arrived today and there was not enough trading in any branch of the market to effect prices to any quotable extent, one way or the other. Taken as a whole the fat cattle trade has been in fairly good condition during the week. The weather has been an unfavorable factor in the trade, high temperatures having curtailed consumption of fresh meat, and while packers have shown signs of bearishness they have not succeeded in forcing much of a break in prices. In fact the recent light and heavy weight steers are closing steady with a week ago. Some discrimination against the heavy, costlier beefs has been in evidence and these are now selling around a dime lower than at the end of last week. Bad weather in the east has had a tendency to curtail orders for cattle from that quarter to some extent but local receipts have not proved strong to any extent at this time, ready outlet being found for all the steers coming.

The week local receipts foot up approximately 9500 as compared with 9670 last week and 12,578 for the corresponding period a year ago. At the five markets supplied total 147,100 as compared with 179,200 last week and 148,600 a year ago. The proportion of steers in local marketings has been fairly large. Strictly choice heavy beefs have not been very plentiful, but there has been a tolerably generous showing of serviceable good steers on the weightier order which have sold largely at \$6.00 to \$6.20, with the best of the week's offerings selling at \$6.40 to \$6.60. Medium to pretty good steers sold largely in a range of \$5.90 to \$6.00. Many steers sold at quotations below a \$5.75 level as feeder buyers were willing to get that high on short fed styles. The competition from feeders is doubtless still holding these plain and medium steers to their present level.

COWS, BULLS AND MIXED

The market for cow stuff has been in good shape all week. Receipts have been moderate and demand fully up to normal. All of the local packers have been active buyers of all classes of cows and heifers and there has been more or less demand for fat cow stuff for eastern shipment. Trading has been of a snappy active character on most days of the week and closing prices are quotable strong to a dime higher than a week ago. Quality has been quite good. Loads of choice cows have sold as high as \$5.40 and a few old head of prime heifers sold up to the \$6.00 line. Most of the good to choice heifers, however, sold at \$5.25 to \$5.50, with medium to fair grades dropping in at \$4.75 to \$5.15. Most of the good fat cows have sold at \$4.75 to \$5.25, with the medium to fair kinds around \$4.25 to \$4.75 and plain heifers around the \$4.00 mark. What few cowmen and cutters are coming sell mostly from \$3.25 to \$3.75. Bulls are meeting a broad demand and prices are quoted strong for the week. Veals are being sold in full week, although prices have not shown much change.

STOCKERS AND FEEDERS

It has been a case of moderate supplies and strong country demand all week and everything, regardless of weight and quality has found ready

outlet at prices which for the bulk of the stuff are well in line with, although closing quotations on the heavy and half fat feeders are around a dime lower for the week. Under the influence of a strong country demand prevailing at all times this week trade has been an active affair and sellers have experienced little trouble in finding ready outlet for any kind of order at prices prevailing. Quality of stuff offered was pretty decent ordinarily and on the heavy weight cattle the greater depreciation of values was noticeable. Stock heifers are still in keen request, although at the close today they had lost most of the advantage gained earlier in the week and these kinds are no better than steady with last week. Supplies of these kinds have not been large enough to cause any widespread loss.

Good to choice feeding steers are quotable at \$3.25 to \$5.85; medium to good grades \$4.50 to \$5.25; good to fancy stock steers \$4.75 to \$5.25; and common to fair \$3.75 to \$4.50; stock heifers \$4.00 to \$4.50 for 100 lbs. live weight. Choice stock cows \$3.25 to \$3.75, and stock calves \$4.25 to \$5.50.

HOGS

Closing Session of Week Brings Decline in Hog Prices. Light week-end receipts of hogs at all of the leading markets failed to stimulate the trade. On the contrary there was a general decline in prices at the general market with prices showing a lower drift. Opening reports from other centers were not unfavorable and at the outset prospects were for a stronger range. However, local packers were slow to begin operations and with later weeks indicating a weaker turn in the trade buyers have been enforcing a decline. The market showed a lack of vim throughout with bulk of the light and medium weight hogs selling on a weak to 5 cent lower basis as compared with Friday's general trade, 7 1/2 cent discrimination against heavy and heavy mixed hogs was marked and these closed on a 5 to 10c lower level. Quality was not quite up to the standard of former days of the week. The big increase in receipts noted earlier in the week has dwindled down and closing days and the total supply at the five markets for the week, 217,300, is slightly less than for the previous week but is 12,100 greater than the corresponding period a year ago. Local receipts for the week amount to 26,300 as compared with 23,135 last week and 36,835 corresponding week a year ago. Prices ranged from \$7.45 to \$7.70, with the bulk selling at \$7.55 to \$7.65. A week ago at \$7.25 to \$7.50, a month ago at \$7.50 to \$7.80, a year ago at \$6.40, three years ago at \$5.75 to \$5.80, four years ago at \$6.85 to \$6.95.

Market in Unsettled Condition, Closing Around 10 to 25c Lower.

Nothing in the way of fresh supplies arrived at the stock yards this morning aside from a small quantity of calves from outside feeding stations tributary to the St. Joseph market say that there is quite a number of cars here this morning and from that it looks like a fairly liberal supply at the start next week. On the opening day of the week packers were still complaining about the weak and slumpy condition of the principle live mutton markets in the east and claimed the local prices was out of line with other markets. Under these conditions the feeling on the opening day was decidedly bearish and with liberal supplies on hand conditions were rather unfavorable to the stocker and through their made desperate efforts to hold the market steady, packers demanded lower cost before they would operate. As a result sellers were forced to lower their conceptions of 10 to 15 cents on the opening day on all except the strictly good handy weight lambs of high dressing appearance which they were holding in the market in the following days of the week sellers have had little chance to regain any of the loss sustained on Thursday. On the contrary the trend of prices on all grades has been toward a lower level and at the close today prices on all but the heavy weight high dressing lambs are 10 to 25 cents lower as compared with last week's close. The market is closing in apparently weakened condition with cautious buyers and the week the market would work back to normal conditions. Considering the size of receipts and the poor conditions of other markets, sellers have farmed fairly well. There has not been any especially good lambs offered this week outside of one large string of Nebraska feed lot lambs which were sold Thursday and put a top on the market for the week on this class of mutton. They were good, which was shown when they crossed the scales at high average weight of 90 lbs and sold at \$6.15. Bulk of the supply has been lambs

IS A MISSOURIAN

Talent From Show Me State Tells Kansas How to Kill Flour Pests.

HAS PRACTICAL METHODS

That Can Be Used in Mills Without Danger to Person or Property.

KILL THE PESTS WITH HEAT

Movement in Interest of Millers Who Manufacture Farmers' Wheat—President Waters, Former Missourian, Lauded for Efforts—Hydrocyanic Acid is Dangerous—But Heat Process is Safe, Same and Economical.

Manhattan, Kan., Jan. 28.—Kansas believe that the best investment they ever made was when they went over to Missouri and hired President Henry J. Waters to come here and take charge of the state agricultural college. Under President Waters' direction many practical ideas have been put into operation that will be of incalculable benefit to the farmers of the state and to the people generally. Every interest allied with agriculture is touched by the broad and comprehensive policies which Doctor Waters has put in motion here.

The most recent movement is in the interest of the miller of the state who manufactures the flour that feeds the people. It is proposed now to heat the insects that infest the flour out of house and home. The trouble has been that the insects have been getting up housekeeping right in the best flour mills of the country—in the flour and ruining everything they touched. Not long ago the millers of the state agricultural college were advising the use of hydrocyanic acid gas, and it killed the mill insects every time.

Cattle—Receipts, 300. Market steady. Hogs—Receipts, 8000. Market 5c higher. Top \$7.95, bulk \$7.70 to \$7.85. Sheep—Receipts, 1500. Market steady.

WILL BUILD RAILROAD.

Texas Capitalists Will Go Behind a Southern Project.

San Antonio, Tex., Jan. 28.—The movement to build a railroad south from this city to the Rio Grande valley is rapidly taking form. Twenty of the strongest men financially in the state have organized for the purpose of a construction company and the aggressive move made by these is indicative of the earnestness and determination to make the effort a success. San Antonio is being the natural gateway for a wide section of country where rapid development is now on makes the construction of such a line almost imperative and insures the financial success of the venture. Already it is understood when this line is completed, little more than the expense of building it to an advantage to a road that already enters this city from the north. A survey of the territory through the French knew, long ago, the value of the road can be built at a nominal cost. Just where it will enter the lower Rio Grande valley, one of the most productive areas in the world, is not definitely known. But that it will tap this section at an advantageous point is already settled. While such a plan is not definitely arranged it is finally determined by the road will ultimately be built to Tampico, Mexico.

PIMBLEY PAINT AND GLASS CO.

213 South Sixth street, St. Joseph, Mo.

BIG POTATO RESERVE.

Almost Two-Fifths of Immense Crop Still Held by Growers.

Washington, D. C., Jan. 28.—Potatoes grown during the year 1910 have been moving marketward at a more rapid rate than those produced in 1909, but the supply still held in farmers' hands is by no means meager and there is little prospect of better touching a very high level before the new crop is ready for consumption.

COUNTEE IN WASHINGTON.

On Business as Agent of Department of Agriculture.

Washington, D. C., Jan. 28.—John Cowie of Des Moines, Iowa, agent for the department of agriculture, has been on business before the department.

NINE MONTHS PIGS.

Tip Beam at 340 Pounds and Sell at Good Figure.

One of the well pleased patrons of the local hog market today was E. T. Denton, of Denton, Kansas, Mr. Denton arrived with a fine string of porkers that averaged 340 pounds and sold at \$7.52 1/2 per owl. These were crosses between Poland Chinas and Chester Whites and were nine months old. This is making pork pretty fast and Mr. Denton is not having any trouble with the markets.

CATTLE AND HOGS LIKE CHAMPION FEED.

Champion Feed fattens cattle fast. Champion Feed Co., Tarkio, Mo.

HERDS COWS WITH AIRSHIP.

French Aviator Rounds Up Herd of Texas Cattle.

Houston, Texas, Jan. 28.—It is no longer Rene Simons the aviator, but Rene Simon, the cowboy. Known on two continents on the account of his daring, the little French aviator this afternoon added new laurels to his record when, for the first time in the history of aviation, he demonstrated that herding cattle with aeroplanes is possible.

SHOT WHILE OUT DRIVING.

Arcadian Seriously Wounded Refuses to Tell How It Happened.

Pittsburg, Kan., Jan. 28.—While out riding with Miss Ethel Brown Thursday night, north of Mulberry, Andrew Mitchell, a resident of Arcadia, was accidentally shot. The wound, which may be fatal, was inflicted by Mitchell's revolver.

CHANGE OF MANAGEMENT AT TRANSIT HOUSE.

Change of management at Transit House. Try our meals.

DECLINES AT OTHER MARKETS HAS DEPRESSING EFFECT IN LOCAL TRADE.

Around 350 head of horses were disposed of at the Blair auction held at the stock yards sale pavilion yesterday afternoon. Offerings included a moderate number of medium to good drafters but the bulk consisted of the cheaper grades of farm and work horses and southerners. Some of the trade was only fair, or about the same as during recent weeks. There was a pretty good attendance of buyers but prices showed an easier trend, following the lower drift prevalent at all the leading markets. Demand was fairly active up to a certain point but all of the buyers were after the stuff at prices in line with eastern and southern markets. No topy prices were realized in the sale. Auctions will be held every Friday here until further notice.

FREED, ARE REARRESTED.

Federal Prisoners Having Served One Term Are Wanted Again.

TOTAL LIVE STOCK MOVEMENT.

The following table indicates the round total of receipts of cattle, hogs and sheep at five leading markets for the week ended today, together with aggregate totals and comparisons:

	Cattle	Hogs	Sheep
Chicago	64,500	151,000	84,000
Kansas City	36,300	59,500	34,200

THE SPIRIT OF PROGRESS.
In a recent magazine story the red-headed hero is quoted as saying, "Niagara Falls always appealed to me with more force than Gibraltar. The former moves; Gibraltar doesn't." An apt illustration of the spirit of progress, that. Would that the spirit was more prevalent in the lives of individuals, cities, states and nations. Nearly all of us would be the better for a few more grains of the same spirit.

FEDDER TRADE A FACTOR.
Really good fat steers and the half fat kinds are selling in a comparatively narrow spread. In searching for a reason you don't have to go back of the stocker and feeder trade. The country is showing a disposition to take the warmed up short fed steers at good stiff prices, for feeding purposes, quite a little business being done in this class of stock this week on a basis of \$5.50 @ \$5.85. Packers, if the feeder competition was eliminated, would be buying these short fed steers at a big discount from current prices.

LOOKS LIKE A SLIGHT.
Several years ago the St. Joseph Live Stock exchange and the stock yards had occasion to hold a housewarming upon the formal opening of the exchange building. At that time the local exchange sent out invitations to all of the leading exchanges to come and be the guests of the St. Joseph live stock market. Interest yesterday the live stock men down at Kansas City opened their new live stock exchange building. A few of the local men received invitations as individuals but there was no recognition of the local exchange as a body and the incident was the cause of some comment on the spirit shown by the Kansas City exchange.

SCIENTIFIC FARMING.
Scientific farming is just 117 years old. It may be said to have been born in the fall of 1793, with the foundation of England's first board of agriculture, says an exchange.
Prior to 1793 agriculture, the art of arts and the science of sciences, was in its most deplorable state. It had flourished in old Roman days, but with the fall of the empire, it dropped into desuetude, along with other good things, and for more than a thousand years languished. Even so late as 1793 one of the brightest minds in England, the celebrated Malthus, wrote a book in the attempt to prove that population was outgrowing the means of subsistence. And from the wretched condition of agriculture at the time there was much to warrant Malthus' conclusion.

BROADEN CORN SHOWS.
Plan on Foot at Columbus to Make Future Expositions International.
Columbus, Ohio, Jan. 27.—An attempt will be made by those interested in the raising of grain in the United States to interest the promoters of the National Corn Exposition, to be held here during the two weeks of Jan. 30 to Feb. 11, in a scheme to make the exposition of the future international affairs. This project is championed by some of the foremost grain experts of the country, and has gathered such prestige that it seems assured of a favorable hearing.

COLUMBUS SHOW BIGGEST EVER.
The present exhibition will be the largest ever held, and its exhibits will not alone include corn, but such innovations as lectures and demonstrations in domestic science, dairy exhibits, government tests to exclude moisture from corn, and many other novel and interesting features.

SCABIES IN KENTUCKY.
Federal Department of Agriculture Quarantines Entire State.
Frankfort, Ky., Jan. 27.—The prevalence of scabies in sheep in the state of Kentucky has caused the United States department of agriculture to put the entire state under quarantine, and the disease is today increasing, according to Commissioner of Agriculture Rankin. The disease appeared in fifteen new counties during the last year and is doing great damage to the flocks of the state.

HARVARD WINS FIRST PLACE.
Leads in the Number of Its Scientists, With Columbia Second and Chicago Third.
Boston.—Harvard has more leading men of science than any other American university, according to the Harvard alumni bulletin. Of the 1,600 foremost scientists of the country, 79 are members of the Harvard faculty; 48 are at Columbia, 47 at Chicago and 38 at Yale. This ranking was made by Prof. J. McKee Cattell of Columbia, and was based on the expressed opinion of 120 leading American scientists. Professor Cattell's technical scheme of rating gives Harvard 374 points, Columbia 293, Chicago 188 and Yale 141.

CAMERA TO TRAP MASHERS.
Denver, Col.—The government has decided to use a camera man as chief aid in its war on the post office "masher" in Denver.
Announcement is made that a clever snapshot man will be employed to get photographs of habitual hangers-on, both men and women, who make the postoffice their rendezvous. After two warnings offenders will be placed in jail.

Daddy's Bedtime Story

Rich Man and Poor Man

ONE evening daddy noticed that Evelyn looked sad. "What's the trouble, daughter?" he asked, and Evelyn told him that some little girls who lived near the home of Jack and Evelyn had refused to play with her because their daddies were wealthier than hers. "Don't worry, child," said daddy. "No doubt you can find other playmates." And that same evening this story of the rich man and the poor man was told by daddy.
" 'It happened in a country far away,' began daddy, 'that there were two men living. One was a very rich man, and one was a poor man who made his living by making baskets from reeds. The reeds grew in a marsh belonging to the poor man, but the marsh was in the way of his wealthy neighbor when he wanted to go hunting. So he called the poor man to move away, and when the basket maker refused he asked his men and had him put off his own land.
" 'The poor basket maker went to the king and complained. The king was wise and just, so he ordered the rich man taken away and left on a lonely island. And because he had forbidden his subjects to quarrel without coming to him with their disputes he ordered the poor man taken to the same island.
" 'Now, on that island there was a marsh in which grew reeds just like those from which baskets are made.' The rich man tried to hide among the reeds, for he was afraid of the savages who lived on the island. But the savages soon saw him and the poor man and came to attack them.
" 'Then the two were afraid indeed. The rich man was the more scared, for he did not know at all what to do, but the poor man had a plan. When the savages came near to them he made signs meaning that he had something to give to them. The wild men stopped to look, so the basket maker quickly cut some of the reeds and made a coronet or crown. He took it and placed it on the head of the king or leader of the savages. The savage was greatly delighted and would not let his men harm the basket maker. Then the other savages crowded round and made signs that they, too, wanted crowns, and it kept the basket maker busy for some time making them.
" 'In the meantime the rich man, who was now poor, was trembling for his life. The savages wanted to kill him, but the basket maker told them by signs that even if the other man could not make baskets he could cut and gather the reeds for the crown. So they spared his life also.
" 'The two lived among the savages some months until the king of their own country sent for them. By that time the man who had been regretted his meanness and promised to give half his fortune to the basket maker when they should be back in their own country.' "

BARLEY AS A FEED.

Offers an Advantage in High Altitudes of West.
Fort Collins, Colo.—The specialized crop districts of the state which have been growing sugar beets, potatoes, and other crops have found their annual returns gradually decreasing, and many farmers have swung back to the old grain and alfalfa rotation. If this is the case, the growing of barley, the fertility of the land may be kept up and even increased. But if the grain and alfalfa rotation means growing wheat to sell, and wheat straw to burn, fertility will rapidly decrease.
The growing of barley for stock feeding purposes offers a method of cropping that can be used to advantage. The only difficulty is that many farmers are growing it to sell rather than to feed. Barley in the Fort Collins district is this year selling at the same notch with corn and wheat, where it should sell for lamb feeding. After several years' work I have satisfied myself that a good, plump full headed barley, or who has saw the sheep feed as corn, when fed with alfalfa hay, I know some feeders will not agree with this, partly because the feed is given the place of the lamb a better appearance. But actual weighing of feed and of lambs admits of no questioning. And no one who has seen our lambs at the beginning and end of a feeding period, who has saw the steers that last year sold for the highest price ever paid in the open Denver market, will deny that our feeding is up to the average of that done by the ordinary feeder. Now, admitting this, why should one retain an old prejudice against barley as a feed? It is true that for hogs it is somewhat less valuable than corn, because of the coarse hull enclosing it. And I am not prepared to contend that a light weight, thin headed barley like California Feed Barley is equal to corn, although even this may be true. The California Feed Barley is a heavy yielder and on that basis may make up something that it lacks for feeding.
For breeding stock the use of barley cannot be too strongly advised. Corn seems to burn out an animal and destroy its breeding powers, and oats and barley should take its place in this state.—G. E. Morton, Colorado Agricultural College.

Decorations for Home.
The Hill home, on Hersey avenue, is surrounded by statuary, the handiwork of Hill. The entrance is guarded by a life-sized lion carved from native limestone that is almost the exact color of the Numidian lion. The door is guarded by a stone dog. Other pieces of statuary are scattered about the lawn.

THE AUTO ON THE FARM.
Makes Agricultural Life More Attractive, Destroys Isolation.
San Francisco Bulletin: When the automobile first came into use in the cities of the United States, which was not very many years ago, the farmers shook their heads and remarked, "None of those new fangled things for me. I'll stick to the old horse and wagon." He meant it at the time, but, like all men of sense, he changed his mind when he saw it was to his advantage to do so. Some idea of the extent of that change is given by Isaac T. Marquison, who in a recent number of the Saturday Evening Post records the surprising fact that \$5,000 automobiles, practically one-fourth of the total output, are owned and used on farms. From the same authority we learn that between January and June of this year the farmers of six middle western states spent more than \$29,000,000 for automobiles.
The effect of the innovation is thus forth: "It has made agricultural life more attractive; it has destroyed the isolation of the rural worker; it has annexed the ranch to the town; it has brought the market to the farm's door and in various ways it is working out a social and educational revolution."
And now not only the farmer, but the civilized world in general will agree with the conclusion of this author that the automobile "has become an implement of practical utility instead of a luxury."

Cutting the Reeds For the Baskets

SOLVE BIG MYSTERY

Women's Souls Are Elated by Gorgeous Clothes.

London Times Thinks It Has Found Out Why Dress is Made Such a Serious Matter—Takes No Interest in Any Sport.

London.—It has remained for the London Times to solve one of the great social mysteries. Amazement is a mild term to apply to the feelings of Englishmen when they found in the editorial columns of the Thunderer a leading article entitled "The Problem of the Big Hat."

A joke in the columns of England's most dignified journal would scarcely have made a greater sensation. Frivolity, lightness, the human touch, are things taboo in Printinghouse square. And yet suddenly, without warning, comes this startling sign of juvenation—not rejuvenation, for the Times never was young.

There is only one thing to account for it. That awful burden, the preparation of a new edition of the British Encyclopaedia, has recently been transferred from the Times to the Cambridge University Press. The relief from responsibility has brought too great a reaction. It has gone to the editor's head. It has led him to tackle recklessly and lightheartedly a problem which has baffled the masculine half of humanity since beyond the memory of man. Without further delay, here is his solution:

It is commonly said that women are more unselfish than men. And so they certainly are in the home. They will sacrifice themselves utterly for particular men and particular children. Yet they will not sacrifice an inch of hat brim or feather for the common convenience, and they will not tell us the reason of this seeming inconsistency.

Men remonstrate, and they smile and continue to wear the hats and the feathers. Therefore it remains for us to guess at the reason of this behavior so strange to us, and we can only guess that it is the result of a sense of the relative importance of things different from our own.

When a man goes to a lawn tennis tournament he goes to see the play and he assumes that women go for the same reason. Some do, of course, but they are not representative of their sex. They are women who have adopted the man's point of view, who are overpowered by the influence of their fathers or husbands or brothers. The woman whose natural instincts have free play does not consider that any game is important.

She is not, as man is, a game playing animal. Her sense man always will be playing games she has arrived at a kind of compromise with him. She will go to watch his games and profess an interest in them on condition that she may attend to her own business all the while, and her business is to wear a large hat or whatever else it pleases her to wear.

It may seem a frivolous business to the earnest lawn tennis player, but then his lawn tennis seems frivolous to her. It is just a peculiarity of his sex to make a fuss about it; she accepts his peculiarities without fretting about them, and expects him to accept hers.

And after all dress to women is something more than a game. It is one of their means of expressing themselves. Fine clothes make them feel happy and as if they were in a glorified state of existence, freed from the wear and tear of its life; in fact as if they were true birds of Paradise, with all the splendor of Paradise in their plumage.

There you have it. There is more of it, wherein the editor admits that only Tolstoid and himself have a sufficiently true insight into woman's nature to be able to solve the riddle.

But the women have yet to be heard from in their opinion of the Times' resolution. We may be sure they will speak up promptly. It is safe to say the times mail bag is already swelling with feminine remarks on its judgment of feminine character—possibly not all of them in contradiction of its view.

HARVARD WINS FIRST PLACE

Leads in the Number of Its Scientists, With Columbia Second and Chicago Third.
Boston.—Harvard has more leading men of science than any other American university, according to the Harvard alumni bulletin. Of the 1,600 foremost scientists of the country, 79 are members of the Harvard faculty; 48 are at Columbia, 47 at Chicago and 38 at Yale. This ranking was made by Prof. J. McKee Cattell of Columbia, and was based on the expressed opinion of 120 leading American scientists. Professor Cattell's technical scheme of rating gives Harvard 374 points, Columbia 293, Chicago 188 and Yale 141.

Camera to Trap Masher.
Denver, Col.—The government has decided to use a camera man as chief aid in its war on the post office "masher" in Denver.
Announcement is made that a clever snapshot man will be employed to get photographs of habitual hangers-on, both men and women, who make the postoffice their rendezvous. After two warnings offenders will be placed in jail.

PAGAT-PAT A NEW HARDWOOD

It Will Be Used for Mausoleum of Dead Chinese Emperor—As Heavy as Iron.

San Antonio, Tex.—A new hardwood, very heavy and heretofore unknown in this country and the Orient, was placed on exhibition at the Trans-Mississippi Commercial Congress, which recently met in annual convention here.

This wood had its first demonstration at Pekin, China. The Chinese government wanted a durable hardwood of great weight, a wood that would take a high polish, for the building of the mausoleum for the dead emperor, Kwang Su.

Wood experts received samples of mahogany, ebony and various other woods from different countries, and among the samples was some heavy pagat-pat, the name of the new wood. The latter was selected, and in September of this year 50,000 tons were shipped from the great forests in the Philippine Islands to China to be used in building the emperor's tomb.

The trees for the mausoleum pillars are 45 inches in diameter and 60 feet high. The pillars weigh seven tons each. The structure, completed, will cost about \$2,000,000.

The wood is nearly as heavy as iron and will sustain a fine polish. The fact that it will be used almost entirely in the construction of Kwang Su's mausoleum and the cost of the tomb indicates the precious quality of the wood. The dowager empress is so interested in the discovery that she has made known her desire that her own mausoleum be constructed of the same wood. John S. Hord, president of the Spanish-Philippine bank at Manila, will bring samples of the wood to San Antonio. Advice from Manila state that the pagat-pat has already proved so valuable as a building material that it is probably destined to be a great American export commodity.

X-RAYS CURE FOR DEAFNESS

Discovery Made by Chance by London Specialist—Break Down the False Tissues.
New York.—Mere chance has led to the discovery that certain forms of deafness can be cured by the marvelous power of the X-rays. A fashionable specialist of Harley street, the mecca of English physicians, who treats poor people for small fees on certain days, was visited not long ago by a patient who was suffering from facial neuritis and a bad ulcer on the tongue.

These the doctor treated with the X-rays and the man rapidly improved. Recently he began to complain that he could not sleep. He lived in a very noisy neighborhood, but as he had been deaf for the last 36 years as the result of a fall the street noises never bothered him. Now, after a month or so of the X-ray treatment he found that the noise of the street traffic woke him up.

The specialist investigated the case and found that there could be no doubt that the X-rays had cured this man's deafness. He followed it up by an equally successful cure of a working girl who had become deaf after scarlet fever and of another young woman made deaf by the explosion of a gas stove.

In non-scientific language the X-rays seem to act on the artificial tissues that in growing fibrously in the ear cause the deafness. The X-rays break these down and at the end of time stimulate the minute ends of the tiny nerves, make them grow out again, and so they return to the parts of the ear which convey the sound vibrations to the brain.

GET A PHOTO OF YOUR VOICE

French Physicist Says His Invention Will Make the Seemingly Miracle Possible.
Paris.—Voice photography is the invention of a French physicist, Dr. Marge. He says it will be of great value to orators, actors, and singers, and indirectly to musical critics.

The sounds strike a small disk of India rubber, the vibrations of which are minutely and exactly reproduced in a small mirror.
A ray of light is thrown on the mirror, which reflects the vibrations at various angles on a sensitive film which is unwound by clock work and receives the impression. These reflections make the picture.

According to the inventor the device will indicate if a singer's voice is true, if his tempo is correct, and if his method of breathing is right.
A true note is shown by a series of parallel equal bands, while a wrong note produces a rough, irregular impression. It is suggested that pocket voice cameras would be great for the use of persons of a critical turn of mind who are fond of going to the opera.

Solomon's Wisdom Failed.
Lancaster, Pa.—Alderman Stauffer had a knotty problem to decide in a goose case before him. Stephen Markert gave Phillip Mohr three geese and there was to be a division of the young geese hatched.

Markert did not get what he believed to be his share and he sued Mohr. The latter put in a counter claim for feed for the geese for three days.
The alderman decided Mohr was to have the young geese for the feed and Markert was to be given back the old fowls. The decision is not satisfactory to either party and both will appeal to court.

All of the above for \$5.00. Our 50 page catalogue is chock full of bargains and is free for the asking. Mail Order Nurseries, Wood River, Nebraska.

PERMITS PASSES TO PAPERS.
Stringent Phelps Bill Amended by the House Committee.
Jefferson City, Jan. 26.—The Missouri anti-pass law went out of the chamber yesterday. It allows free tickets only to employees of the railroads, their families and newspapers. The last provision goes as the only committee amendment to the bill, drawn up by Colonel "Bill" Phelps. The stringent anti-pass law was introduced by Boyd, but is known as Phelps' bill, and not only does not allow the exchange of pass courtesies with other roads, but does not even allow stockmen to accompany their shipment to market, nor wreck victims transportation home.

But the newspapers had a defender in "Bob" Walton of Howard county, editor of the Armstrong Herald, who, in an anti-pass bill, copied the interstate commerce act and that of many states. This, after a grilling by Phelps, was dropped.

A bill requiring that the railroad commissioners visit every county annually was reported favorably. A bill requiring two passenger trains each way daily on all railroads more than forty miles in length went to a subcommittee. The senate railroad committee reported out two minor bills.

RICKAPOOS RETAIN LAND.
Guthrie, Okla.—On the ground that the nonresident Kickapoo Indians, for whom the government holds trust on allotments of lands in Pottawatomie county, Oklahoma, were not entitled to make conveyances, Judge J. H. Cotter in the federal circuit court decided that the United States is entitled to have the deeds questioned in eighty-nine suits, each for \$100,000. Appeal is to be taken to the United States court. The decision immediately affects eighty-nine or more people who took over Kickapoo lands. Their losses, it is said, will aggregate at least \$100,000. Property involved is among the most valuable in Oklahoma.

CORN NOT RESPONSIBLE.
Springfield, Ill.—The commonly accepted theory that corn is responsible for the disease pellagra has been exploded by the report of the commission, composed of distinguished Illinois medical men, named by Governor Denison to make a thorough inquiry into the matter. The investigations and experiments of the commission have extended over a period of one year and climatic conditions have fully all the suggested causes of the disease. The legislature is to be asked for an appropriation of \$15,000 to aid in further research along these lines.

OIL WELL AT NACOGDOCHES.
Nacogdoches, Tex.—P. M. Grandberry has come in from the oil fields and reports he has just finished and brought in a paying oil well. Mr. Grandberry is not after a gusher, but is going to put down a number of shallow wells and pump them by electricity. He has already a lot of machinery on the ground and the balance to be put in in a short time he will commence to ship oil, as he has the entire production sold at a good price as soon as it is loaded on the cars.

APPLE GROWERS MEET.
Portland, Ore., Jan. 27.—Representing an aggregate capital of \$5,000,000 invested in apple orchards, apple growers from Oregon, Washington and Idaho gathered here for the purpose of forming a national selling agency of sufficient scope to control and dispose of the apples produced in the three states.
A committee of fifteen was appointed at the close of the day's work to prepare a working plan for the consideration of the convention.

\$3.50 RECIPE FREE, FOR WEAK MEN

Send Name and Address Today— You Can Have It Free and Be Strong and Vigorous.

I have in my possession a prescription for nervous debility, lack of vigor, weak kneed manhood, failing memory and lameness, brought on by excesses, untimely drains, or the follies of youth, that has cured so many worn and nervous men in their own homes without any additional help or medicine—that I think every man who wishes to regain his manly power and vitality, quickly and quietly, should have a copy. So I have determined to send a copy of the prescription free of charge, in a plain, ordinary sealed envelope to any man who will write me for it.

This prescription comes from a physician who has made a special study of me, and I am convinced it is the surest-acting combination for the cure of debility, manhood and vigor failure ever put together. I think I owe it to my fellow man to send them a copy in confidence so that any man anywhere who is weak and discouraged with repeated failures may stop dragging himself with harmful patent medicines, secure what I believe is the quickest-acting, restorative, upbuilding and most refreshing remedy ever devised. So cure yourself at home quietly and quickly. Just drop me a line like this: Dr. A. E. Robinson, 496 Lusk Building, Detroit, Mich., and I will send you a copy of this special recipe in a plain, ordinary envelope free of charge. A great many doctors would charge \$5.00 to \$10.00 for merely writing out a prescription like this—but I send it entirely free.

SWANROCK WHISKY DISTILLED FOR MEDICAL USE 10 YEARS OLD ABSOLUTELY PURE M. J. SHERIDAN, PROPRIETOR, ST. JOSEPH, MO. IMPORTER AND DEALER IN WINES AND LIQUORS. Established 1878. Per Gallon: Shannock Whisky, Jugs or bottles, \$4.00; Tennessee Rye, \$4.00; McBrayer, Jugs or bottles, \$3.00; Maryland Rye, Jugs or bottles, \$3.00; Tennessee White Corn Whiskey, \$3.00; Old Anderson Whiskey, \$2.00; Kentucky Bourbon Whiskey, \$4.00; Holland Gin, \$2.00; Brandy, grape, apple, peach, \$2.00 to \$3.00; Pure Honey, \$1.00; Pure Vanilla, \$1.00; Pure Cherry Wine, \$1.25, \$1.50, \$2.00 and \$2.50; THIS IS AN OLD, REPUTABLE HOUSE. Mail orders shipped promptly. Remit with order. We carry everything in the Wine and Liquor order. Price list mailed on application. Address: M. J. SHERIDAN, 223 South Sixth Street, St. Joseph, Mo.

THE IOWA SILO Built of One-Piece Clear Fir Staves with New Patent Springing Door and Clincher Frame. The only silo on the market where quality, workmanship and price are combined in making the best silo. Write for descriptive literature. Iowa Tank & Silo Company, 212 E. Third St., Des Moines, Iowa.

The Exchange Cotton and Linseed Meal Company Live Stock Exchange, Kansas City, Mo.

WOES OF AVIATION JUDGES

Like Umpires at Baseball and Football Matches, They Have Their Troubles. Judges at aviation meets, like umpires at baseball and football matches and others in positions of great responsibility, have their own woes.

RAMESES, A GREAT EGYPTIAN

Was Inordinately Valn and Ostentatious, but a Courageous and Determined Fighter. Ramesses' superb statue in Turin is proven by his surviving body to be a faithful portrait, showing us at least the outward man as he was.

FARM, RANCH AND FRUIT LAND, FARM, RANCH AND FRUIT LAND.

THE GREAT WESTERN LAND CO.

Sharon Springs, Wallace County, Kansas. Wheat, Corn and Alfalfa Lands in Wallace County, Kansas, on Main Line of Union Pacific Railroad, with Shops in Sharon Springs, and The Gulf & Northwestern Railroad to be built within the next 18 months.

For Information and Further Particulars Address W. J. SCOTT, Sharon Springs, Kan.

HORSES AND MULES HORSES AND MULES.

The North-Robinson-Dean Co.

Now is the time to buy draft stallions, while there are plenty to select from. Our best imported stallions sell at \$2,000 to \$2,500. Others as low as \$1,000. The difference in these prices does not represent profit to us as there is less margin made on some of our high priced horses than on the cheaper ones.

KITTY'S RETURN

By CELIA M. ROBINSON

She trailed slowly down the stairway in her velvet gown. It was peachy hued, with old lace at throat and wrists. She moved with an indolent grace, and held her head, with its heavy masses of dark hair, a trifle haughtily.

It's putting me in a towering rage, as it used to do. I-I rather liked it, Billy! It seemed so like old times before—before things changed so.

would you rather I called you William? Or Mr. Sherrrod? "Who told you I was in Kinston, Kitty?" was his reply.

"When are you coming home? And are you really going to throw yourself away on an impecunious nobleman? I saw your picture in a New York paper this morning and it looked as much like you as it did like me.
