BEST STEERS ARE FIRM

PRICES SHOW NO CHANGE OF CONSEQUENCE COMPARED WITH A WEEK AGO.

PLAIN KINDS WEAK TO 10 OFF

Attractive She Stuff Closing Higher-Half-Fat Heifers Weak-Medium Bulls Decline—Calves Steady -Stock Cattle Uneven.

Not enough cattle were offered here today to develop any material change in the condition of the market. The few deals consummated were reckoned steady with Thursday's level of

Local receipts of cattle for the current week total approximately 10,400 head, showing a slight increase over the run last week and a small increase as compared with a year ago. Supplies in the aggregate at the five leadplies in the aggregate at the five leading western markets show a gain of nearly 24,000 head over last, but a decrease of 13,000 head as compared with the same period of 1911. A good share of the arrivals at this point during the week consisted of beef steers, with the bulk comprising cattle of only medium to fair quality, although only medium to fair quality, although there were a few loads of good to choice grade included in the aggregate marketings. The market has been more or less irregular but without any great shifting of values. On the two first days of the week trade displayed a slow and weaker tendency, medium and plain classes declining 10@15c from last week's final levels while the good to choice kinds held about steady, exceptions ruling weak to 10c off. Wednesday, under the influence of a light general run, a better feeling to the market was apparent, with prices firm to 10c higher on practically all grades of steers. Since Wednesday theer has been very little, if any, change in conditions. As compared with a week ago the good to choice beeves are closing firm with the beeves are closing firm with the medium and plain classes weak to 10c lower generally, exceptions being 10@

cattle making that figure averaged 1,349 lbs., and while the best seen on this market for several weeks, were not strictly prime, having only been on full feed for a period of four months. Bulk of the steers offered were of a kind to sell largely in a spread of \$6.00@7.00, with a few loads selling at \$7.10@7.35. Some loads selling at \$7.10@7.35. Some FT. WORTH.

Special to The Journal: The Da common light steers sold at \$5.50@

The following prices on steers are The following prices on steers are quotable on the St. Joseph market:
Choice to prime, \$7.75@8.25; good to choice, \$7.25@7.65; fair to good short-fed, \$6.50@7.25; medium to fair short-fed, \$6.25@6.50; common to medium, \$5.50@6.25.

COWS, BULLS AND MIXED. The market for all classes of butch-s' stock today was nominally steady. There has been some unevenness to the market for butchers' stock this week. In sympathy with fat steers trade on Monday and Tuesday exhibited signs of weakness, especially on medium and plain heifers but Wodnes.

Cattle—Receipts, 500. Market steady.

Hogs—Receipts, 11,000. Market weak and shade lower with yesterday's average. Top \$6.00, bulk \$5.80 (#5.95.)

Sheep—Receipts, 500. Market steady. medium and plain heifers but Wednes-day the market showed improved tone steady. with prices ruling stronger all around. As compared with a week ago current heifers are also closing on a strong Hogs 68
basis but medium and common grades selling below a \$5.00 level are around 10c lower. There has been relatively little change in canners and cutters all week and prices for these are about in the same position as a week ago. Strictly choice to prime cows have sold during the week at \$5.50 @ 6.00 but there have not been many of that kind offered, only a few odd lots selling at these prices, Good to choice Horses. 8,455 9,244 but there have not been many of that kind offered, only a few odd lots selling at these prices, Good to choice sold at \$5.00@5.35 largely, fair to good at \$4.50@5.00 and medium grades at \$4.25@4.50. Choice heifers and mixed lots have sold at \$6.00@6.25 or hetter, but a very very sold of \$6.00@ 6.25 or better, but a very useful class of heifers went at \$5.50@5.85, while fair kinds brought \$5.25@5.50 and plain and medium styles \$4.60@5.15.

The choicer grades of bulls are closing steady with a week ago but medium and plain kinds, selling under \$7.00, show a break of 10@15c generally, with spots as much as a quarter lower. No change of consequence ter lower. No change of consequence has been noted in values prevailing in the veal market, the best kinds sell-ing at \$7.50, a price that has repre-sented the top for this end of the

market for several weeks.

The following quotations are current on the local market: Choice to prime cows, \$5.25@6.00, good to choice cows, \$4.75@5.25; medium to fair cows, \$4.25@4.75; canhers and cutters, \$3.00@4.00; choice to prime heifers, \$6.00@7.00; good to choice heifers, \$6.00@7.00; good to choice heifers, \$4.50@5.00; good to choice bulls, \$4.75@6.00; fair to good bulls, \$4.75@6.00; fair to good bulls, \$4.75@6.00; fair to good bulls, \$4.25@4.75; veal calves, \$7.00@7.50; medium calves, \$6.00@7.00; common and heavy calves, \$4.00@7.00; common and heavy calves, \$4.00@

STOCKERS AND FEEDERS.

What little business that was trans-acted in this division was confined to yard speculators and country buyers. yard speculators and country buyers.

No radical change in prices was noted in the selling of one or two loads.

A characteristic week-end trade in this department today. Fresh supplies were limited to a small assortment of odds and ends, not enough to awaken buyers' interest. The few sales booked through the session showed no radical change in prices as compared with vesterday.

showed no radical change in prices as compared with yesterday.

This has been a week of bitter disappointment to the speculative interest in this department. Dealers stocked up pretty well on the opening day, with values down 10@15c, with the expectations of a good country trade on subsequent days. However, nothing in the way of an outside demand developed, and to make matters worse the heavy fall of snow and sleet covered stalk fields, and about dissipated all desire of countrymen to increase desire of countrymen to increaseir labors around home with the re sult that the mid-week session found buyers with the bulk of their buying Still occupying the west side pens.

Another factor that is contributing to the laxity of outside demand is the high prices prevailing for feed at present in the corn belt territory, seph, Ma.

Feeders who have not got an abund-Feeders who have not got an abundance of cheap roughage to run their cattle on until grass shows up cannot afford to buy light stocker steers at present prices in view of the current fat cattle values. There has been practically nothing sold in the way of light cattle this week to go back to light cattle this week to go back to the country, and the week-end finds such offerings about 15@25c lower, as such offerings about 15 @ 25c lower, as compared with last Friday. The relatively small quota of heavy feeders included in the daily supplies have met with a good demand, and anything good in this line is ready sale at steady rates, while at the same time absence of quality usually resulted in a dime cut.

ed in a dime cut.

Good to choice feeding steers are quotable at \$5.75@6.25; fair to good kinds at \$5.50@5.75; good to choice stock steers at \$4.75@5.50; common to fair grades at \$4.25@4.75; stock to fair grades at \$4.25@4.75; stock heifers \$4.25@4.75; stock cows \$3.50 @4.50; stock calves \$4.25@5.00.

OLD STEEL FOR REINFORCING

Kansas Countles May Use Present Structures for Concrete Bridges.

Topeka, Kan., Feb. 17.—A good many counties are hesitating about discarding their tin bridges and putting in concrete bridges for the reason that they do not want to stand the loss of the structural steel. But W. S. Gearhart, state highway engineer, says the counties need not discard the old steel and need not sell it. The old steel makes good reinforcing material for the concrete bridges and the counties and townships may make a material saying by using it.

TOTAL LIVE STOCK MOVEMENT.

The following table indicates the round total of receipts of cattle, hogs and sheep at five leading markets for the week ended today, together with aggregate totals and comparisons:

Cattle. Hogs. Sheep. Chicago ... 54,800 199,000 92,000 kansas City. 29,700 62,500 41,300 So. Omaha. 22,200 99,000 49,300 East St. Louis. 12,600 68,000 17,900 CE East St. Louis. 12,600 68,000 East St. Louis. 12,600 Eas

and townships may, make a material saving by using it.

"In Ohio," said Mr. Gearhart, "they have been replacing many of the old steel bridges that are not yet worn out, with concrete structures, and using the old steel for reinforcing material. The Ohio people have found that the old bridge material in the overhead type of concrete bridges and that much of it can be used in the ordinary concrete bridge. In the overhead bridge they simply put new piers in the ordinary concrete bridge. In the overhead bridge they simply put new piers in the ordinary concrete bridge. In the overhead the ordinary concrete bridge in the ordinary concrete b

flooring and build forms around the steel framework, fill in the forms with concrete and have a complete rete bridge. A bridge of that kind will

stand for centuries.
"Of course some additional steel has
to be used but the ordinary light steel wagon bridge material fits very nicely into a concrete bridge. The steel girders are made of two heavy pieces of steel, held by steel straps and all rivited together. The concrete flows in and around the girders in good shape and not much additional reinforce-ment is needed except for the floor and the result is an excellent bridge. I understand that in one Ohio county they have used the old steel of a bridge in making a three-arch con-crete bridge and found it very satis-

The hog market for the final ession of the week was an uneven proposition, prices varying from steady to a nickel above yesterday, with the principal strength apparent on the weightier classes on the opening weightier classes on the opening and found it very same factory. There are many light Kansas bridges that would be available for this and the Kansas county boards and township trustees ought not to sell the old material for junk, but use it in building concrete bridges. It would save more or less money in the building of the concrete structures."

Mr. Gearhart declared that much of the discarded farm machinery could

be utilized in the reinforcement of concrete fence posts and other con-crete work about the farm. TEST YOUR SEED COR N.

Good Seed First Requirement Necessary for a Good Crop.

sary for a Good Crop.

| Prices governing most transactions in this class of goods. After about three fourths of the hogs were sold trade developed a weaker trend and the strength that featured the general way to ustide sale.

Daddy's Bedtime

Wooden Dresses For Little Girls Now Stylish

VELYN had a new silk dress of which she was very proud. It really was a nice dress. The silk had been sent to Evelyn's mother by a friend who was traveling in Europe. "The dear little butterflies make silk dresses, don't they, daddy?"

"I'm afraid you are a bit mixed up. Silk is made by silkworms. They spin it to make a cradle in which they can sleep comfortably until it is time for them to break out of their shells as moths. While they look somewhat alike, moths and butterflies are different. Butterflies fly about by day and moths fly

"The most interesting moth in the world is the one that lays the eggs from

which are hatched the worms that spin our silk thread. "When people want to make silk they rob the silkworm of his coat. The worm is first killed by roasting it in a hot oven. The cocoon is dipped in water,

and the strands are wound off, dried and put away for use "There are several kinds of moths that spin silk, but the chief one is that whose caterpillar feeds on the leaves of the white mulberry tree. The raising of silkworms and the making of silk has for hundreds of years been one of John Chinaman's ways of getting a living. It looks as though his nose would be a little out of joint soon, for a clever man has found out a way of getting silk directly from trees instead of from the silk which the worm spins after eating of the leaves of the mulberry tree.

This silk is made from spruce wood. The wood is made soft and pulpy, and chemicals are used to make it sticky and stringy so it can be drawn out into long threads. When this is dry it is wound up into skeins and looks just like the silk which is made by the little worm. This wood silk is very much cheaper, and no doubt we shall be having silk dresses for all the little girls in America some of these days if silk gets to be as cheap as cotton.

"Mills have been started for the making of fabrics from this wood silk. Ribbons, braids for trimming dresses, necktie silks and silks for clothes have

"At first the wood silk was not a success. It would catch fire if brought too near the heat, but after spending a great deal of time and money a better way was found for making it, and now it is quite as safe and as pretty as the

"This silk spun from the wood fibers can be made very cheaply. Perhaps rose county, Colorado, shipped out five some day it may be cheaper than calico and every one can afford to wear silk. "And now that we have learned how to dress little girls up in wood who shall say what we will not do next."

May Become a Big Factor in Future Beef Making.

Southwest Trail: Very little work has been done to determine the value of peanuts for producing beef, bu what little has been done indicates that the peanut may make beef production profitable in two widely sep-arated sections of the Rock Island Lines' territory.

bre last night at the request of the billio Welfare league. Mr. Halbert id in part:

"The care of the poor, the sick and the care of the care of the poor, the sick and the care of the poor, the care of the poor, the sick and the care of the poor, the c rado. For fattening beef cattle ten oounds of mile has the same feeding alue as nine pounds of corn. The dry ers of beef cattle, because they have not had a good fattening forage to feed with the milo grain. The peanut is one of the best drouth resisting crops, and peanut hay, made from the whole plant, vines and nuts cured together, is exactly the feed needed to

Milo and peanuts should make the dry farming sections of the Southwest one of the best beef fattening sections of the country. Oklahoma City, Fort Worth, Denver and Kansas City are short all the time of the quality of beef cattle that these two drough-re-

sisting feeds will produce.

Peanut hay, made from the vines, fed with the by-products of the rice mills-rice meal, rice bran and rice polish—makes a combination having the same qualities as alfalfa and corn the great beef making feeds of Kan-sas, Nebraska and Oklahoma. The peanut hay supplies the nitrogen-matter and keeps the animals prime vigor with keen appetites, and the rice products furnish the starchy material, the same as corn. These two feeds should make northern Louisians and Arkansas large producers of well finished baby beef that will top the market anywhere in the United States The animals should be fed the last few weeks with rice products and the peanut hay made from the whole plant the oil in the nuts being of special

Calves are particularly fond of the hay made from the whole peanut plants, and it is probable that this hay will have a wide use in fattening grade calves, using it in connection with the ordinary feeds and in forcing pure bred calves to a rapid growth and to give them finish with glossy

DOWN IN

Unexplored Country of the San Blas Indians.

Mysterious Land Forbidden to White Men Peopled by Savage and Warlike Natives, Where No One Dares Go.

New York .- "Looking for the smoking room, hombre?" asked the comfort ble looking old gentleman in the white linen tuxedo, according to Panama correspondent. The uncomfortable looking young man in white flannels shook his head.

"I'm looking for the way out," he replied. "This isn't Panama; it's Dupont Circle, Washington, D. C."

Within the 10th infantry band pounded out "Our Director," while bronze engineers, soldiers of fortune and once proud naval lieutenants begged pupils of the zone high school for half an extra. Estimate the distance between the awkwardest fourteen-year old and the local Mrs. Hawksbee and you can figure out how far the young North American in white flannels found himself from the center of the stage he holds so firmly in musical comedy.

"Next time I come down here I'll bring a dress suit," he said.

"They always do, the second time." said the old gentleman soothingly. Sit down and cool off. Ten years ago we danced in pajamas and watched the government revolve every twenty-four hours, but now we're nice and civilized."

"My son," added the gray haired isthmian, "I've heard that farewell romance and last frontier wish since before you were weaned. But there are plenty of last frontiers in this world that will last a good while and you're sitting on one of them right

"The country I mean lies partly in the republic of Panama, partly in the republic of Colombia, and doesn't give a d- for either of them. It begins within thirty miles of where we are sitting and runs for 400 miles or so down into South America. Just how far I can't tell you, for no white man has ever made the trip."

"Region too unhealthful?" "For our kind, yes. Full of little hot drafts from behind trees. And then word is passed out to your friends that the senor died of Chagres fever, with no witnesses to the con-

"But who does all this murdering?" dians. And I shouldn't call them murderers if I were you until I'd heard the whole story.

"When the Spaniards hit these parts in the old days it was h-l for the na- Decrease in Wheat, Increase in Corn tives. You needn't look any further than the wood cuts in any edition of Las Casas to learn that.

"The first governor of Panama, Pedrarias too, stepping past that window with that pretty trained nurse from Ancon hospital-has a million from Ancon hospital—has a million Wheat—United States, east of To make pimento sandwiches, mince murders to his discredit, and he and Rockies, decreased 833,000 bushels: half a can of pimentos, rub them well the other conquistadores wiped out every native tribe but one. This outfit living in a country that is Satan's pet States and Canada, decreased 1,179, hothouse and soon getting hold of 000 bushels. Afloat for and in Eur-smuggled firearms, managed to keep opo, decreased 6,700,000 bushels. Totheir independence. They are as free today as before Columbus came over and as exclusive as Tibet before

Younghusband's expedition. "Nobody knows how numerous they are, for the census taker has never called. In appearance they are stocky little chaps not much above five feet high, with big round heads and coarse black hair.

INDIAN YOUTH HAS TALENT Priest Predicts Lad Some Day Will Be Famous Artist-Has Boy's

Name Changed.

Spokane, Wash .- The Rev. Father E. de Rouge, who has charge of a Catholic mission at Omak creek, on the Colville reservation, in eastern Washington, predicts that Frank Wapato, fifteen years old, grandson of Chief John improvements of \$3,513,500 for load improvements were voted on and successfully carried in Texas counties in the French academy. He says in a during the year 1911, being almost twice as great as the sum voted for letter to Capt. John McA. Webster, Indian agent, that he has changed the youth's name to Pascal Sherman, for the amount of \$1,600,000. Other North

He is teaching the boy with a view to sending him abroad in a few years to finish his art studies under the foremost painters of the day. The boy is a native of Washington. His is a native of Washington. His grandfather, now more than one hun- the past year. dred years of age, was one of the first friendly Indians to greet the early SHEEP AND GOAT RAISING white settlers when they anchored their prairie schooners in the Colville

country. He was the potato king in those days and gathered many blankets, pouches of tobacco and other articles in trades with the white people. He was named Wapato John, or "Potato" John, which afterwards was twisted into John Wapato by federal officials.

Wolves Attack Horse. Pierre, S. D.-Wolves, hungered by the scarcity of food, are becoming dangerous in the West River country. Johnson brothers, who live near Davison, in Butte county, had a full-grown horse pulled down by a pack in broad daylight in sight of their home. The wolves would only leave the carcass

after several shots were fired. The wolf pelts are valuable and there is a moderate state bounty, so that it is a frequent occurrence for a nual income through this source.

CAN GROW CORK OAK HERE

Spain and Algiers.

Washington, D. C., Feb. 17.—Secretary Wilson has received a report from Walter T. Swingle through Dr. Galloway, chief of the bureau of plant inway, chief of the bureau of plant in-dustry with regards to a trip of in-spection on agricultural conditions in Spain and Algiers. The trip was made with the idea of comparing agricul-tural conditions there with those of the United States. Among other things the report states that the cork oak intensively grown in Spain could be profitably grown in the United States. "I am confident," the report states, "we could grow cork in many parts of the United States by selecting extra good trees for a propagating purpose In particular I am confident that in many parts of California cork oak of selected varieties could be grafted on the native oaks found there. I have chico, California, and cork oak is the half-shell way cumber much more closely related to the California oak than is any black oak."
At Sevilla the report adds an inection of one of the largest greenlive pickling establishments was made. The olives are soaked in lye, then washed thoroughly, according to the statement. On sampling some of the olives an acid taste was discovered which resulted from natural fermen-tation through the curing processes. "I am convinced," the report states, "that a scientific study of olive fer-

highest value." At Alcazar a remarkable large seed ling date was discovered an offshoot of which would be worth a thousand dollars in California.

mentation would yield results of the

WILL SELL TIMBER LAND.

United States to Hold Sale in Oklahoma, May 1.

Muskogee, Okla., Feb. 17.—For the nefit of the Choctaw and Chicasaw Indian tribes, the government on May 1 will offer for sale 1,370,000 acres of land. 1,043,000,000 feet of pine. and 141,000,000 feet of hardwood timber, having a total approximate market value of \$5,000,000. This land and timper fie in the mountainous region of theastern Oklahoma and constitute the forest reserve of these tribes. The sale of the land and timber will be one of the largest single business tran-

ctions in the southwest in years. The pine is of the hard variety lies in scattered growths. The hard-wood includes oak, ash, and hickory. The acreage will be divided into twenty-four tracts. Any person may bid for one or all the tracts, and for the land and the timber, or for the timber without the land. A minimum value of \$2 a thousand feet has been put on the pine and a minimum of \$1 on the

The land, exclusive of the timber has been appraised at from 25 cents to \$6.50 an acre. It is thought the land may have an average market value of \$1 an acre, the pine \$3 a thousand feet and the hardwood \$1.50 a thousand feet. The value of the timber will de-"They call them the San Blas In- pend largely upon its accessibility to railroad transportation.

Cook smooth, stirring hard. Use cold.

ARIZ. FULL-FLEDGED STATE

George Hunt Inaugurated Yesterday as First Governor.

Phoenix, Ariz., Feb. 16.—Standing on the portico of the capitol building, facing an audience of thousands sil-houtted against a background of perennial verdure, George W. P. Hunt, a native of Missouri, took the oath of office as the first governor of the state of Arizona. A few hours earlier word had come by telegraph from Washington that President Taft had signed the proclamation admitting Arizona to the union, the last of the territories on ontiguous soil, and forty-eighth state George Hunt rode a burro into Arizona twenty-five years ago and his ner. Direction for cooking more than half their component parts have already been printed.

If you feel that you must begin your party feast with raw oysters, take them straight—from the half-shell. It The inauguration ceremonies were brief. The oath of office was administered by Chief Justice Edward Kent of the territorial supreme court, his

Then followed the inauguration address, in which Governor Hunt prom-Seal the bag, which must be thickly ised the new state a "golden rule" adbuttered, and cook for six minutes in ministration and pledged anew his fealty to the constitution which he helped to frame. The new governor was born in Missouri in 1859 and was reared near Huntsville, a town named after his family. His great great grandfather was a soldier in the Revolutionary war. He was employed in the mines and in the cattle business for a time and in 1890 he became identified with

> Since the early '90's Mr. Hunt has been a member of the legislature almost continuously and has twice served as president of the upper house. He was elected to the constitutional convention and made its president.

Several Changes Are Made by Rules Committee.

New York, Feb. 16,-With the elec-ion of officers and the authorization of a new southern racing district, the biennial congress of the National Trotting association ended. Changes in the rules effected include a resolution of the rules committee providing that horses with records on mile tracks shall be allowed three seconds when racing on half-mile courses. Starters hereafter must report to the association any suppression or mis-representation of the time taken in races. Failure to do this will resul in a starter being expelled.

Before adjournment the horse approved a recent suggestion of Maj. Gen. Leonard Wood, chief of staff of the United States army, that a super-ior standard of horses should be bred the end of a heavy dinner. It gives for the cavalry and artillery branches the saving tang of salt that is so re- of the army. A resolution was adopted that the trotting horsemen would cooperate in any way they could to carry out the government's desires in

HORSEMEN'S CONGRESS ENDS

Ames Plans Summer Course to Instruct Teaching of These Branches.

Ames, Ia., Feb. 17 -- Iowa's public

Ames, Ia., Feb. 17.—lowa's public schools are waking up to the importance of adding axiculture and home economics to their courses of study and they are clamoring for teachers trained to teach these subjects.

That is the cause behind the announcement that Iowa State college will conduct a six weeks' school next summer in these and related subjects. The ession will begin June 17 and continue until July 26. The entire equipment of the college will be at the service of the students and the regular faculty will furnish the instructors with Prof. A. V. Storm at their head as director of the school.

Since last year's two weeks' sum-

Since last year's two weeks' sum-mer school for teachers the department of agricultural education has been flooded with requests for a longer session the coming summer. "That session was a popular success," said Professor Storm. "Every man and farm property, and will last indefiwoman who attended approved it and urged that the session be lengthened. There have been additional letters from every section of the state from teachers, from school superintendents and from school directors asking that the training of teachers for work in agricultural and home economics be enlarged. In \$0 high schools there are extensive courses in agriculture and home economics be enlarged. In \$0 high schools there are extensive courses in agriculture and home economics with state aid, their teachers want special training. In scores of other high schools and town schools more or less work is done in these branches and their teachers want help. In hundreds of rural schools these subjects are taught and their teachers want help. The college had to meet the situation and extend its usefulness."

Prof. A. V. Storm has made a preliminary draft of plans for the summer session, which will be submitted to the board of education at its session this week. The courses will aim to meet the needs of rural teachers of high school teachers and of country and city superintendents who want to introduce work along agricultural and home economics lines. But the courses will not be for them alone; they will woman who attended approved it and

and city superintendents who wall and introduce work along agricultural and home economics lines. But the courses will not be for them alone; they will also are on the regular wire market. At least six wire reinforcements, with ends bent back, should be used to a post.

"The west and southwest are unally being divided into smaller tracts of land and the business of the production of feeder cattle in that territory is diminishing each year," said post.

versity of Texas has got into the game of making life look rosy for boys who raise hogs in Texas. The purpose of this institution is explained in the fol-

"S. E. MEZES."
These scholarships are valued at \$100 per year, or \$400 each. As there were 23 winners in the boys' and girls' contest last year, the total value is \$13,200. If any of the boys entitled to a scholarship are too young to enter the university now, it will be held for them. them until they arrive at the necessary age.

The Texas University is for Texas.

and it never did a better thing for the state than when it decided to give this encouragement to young men who nstrate their ability as success-

ITS MEAT IN GERMANY.

Australia Successful in Exporting a Cargo Despite Inspection Law.

Washington, Feb. 17 .-- Australia has According to a Reuter dispatch from Berlin much interest has been aroused by the importation and sale of a cargo of Australian frozen mutton in Germany. At present no dead fresh meat is imported from America and other distant meat-exporting countries because of the difficulty of complying with the meat inspection law, which provides that carcasses must be shipped whole, or in the case of cattle and swine, in two pieces, with certain internal organs in natural attachment. ped whole, or in the case of cattle and swine, in two pieces, with certain internal organs in natural attachment. The Australian shippers have complied with these conditions, and the cargo has been passed by the inspectors and sold to butchers in various towns. At a recent luncheon at Chemnitz, attended by 50 members of cattle and swine, in two pieces, with certain internal organs in natural attachment. The man managed to climb into a tree where he was found some time later with the built pawing the ground and bellowing with towns. At a recent luncheon at Chemnitz, attended by 50 members of cattle and swine, in two pieces, with certain internal organs in natural attachment. The man managed to climb into a tree where he was found the butchers in various towns. At a recent luncheon at Chemnitz, attended by 50 members of cattle and 540,000 pounds in San Franceively.

The lowest bid was more than 7 cents above the average weekly market wholesale price at the time of delivery. The government pays this extra charge for packing and handling. Internal country is being bored full of holes," he remarked. "There will be now, at the proposals specify that 540,000 cameron, Mo., Feb. 17.—Four pairs of Hungarian partridges have been received by John Downing from the state warden. VISITS LOCAL PACKING PLANT

John O'Loughlin Writes of Trip Through Modern Abattoir,

Cameron, Mo., Sun: John O'Loughlin transacted business and visited relatives at St. Joseph last Thursday and Friday. On Friday afternoon his friend, Leo Hectrone, formerly of east Cameron but now sales summary clerk in general office of Hammond packing plant in South St. Joseph, Mo., had the pleasure of taking the Mo., had the pleasure of taking the writer through that big packing plant. The Hammond packing plant is equipped with the most modern machinery. This packing plant kills from 500 to 600 hogs every hour. Every hog is inspected by the U.S. inspector. When they run onto a diseased hog it is sent into the fertilizing department and it's the same way with the cattle and sheep; they all undergo inspecand sheep; they all undergo inspec-tion. Therefore, when buying packing house meats you're getting the best that can be killed. Often times people but this is not true, as each and ever piece of meat that passes through an packing plant, large or small, is al-ways inspected by a U. S. inspector. The beef coolers, where hundreds of pounds of fancy beef is kept, and salt cellars where carloads of salt pork is stored, and in the sweet pickle cellars where hundreds of barrels of ba con are cured and the killing beds are among the many things to be seen in the Hammond packing plant. This plant employs over 850 men. A number of women are also employed in its St. Joseph plant.

Quality of Pure Breds to Help De-

Columbia, Mo., Feb. 17.—In the opinion of Prof. E. A. Trowbridge, the time is rapidly approaching when the farmers of the corn belt must find a

also be for housekeepers, business men. farmers, professional men, who may want to extend their knowledge in agriculture or in home making. It will be for rural preachers and religious workers also. Last year some of the best satisfied students were ministers who took back to their rural communities new inspiration for the labors. The studies will include the work chief branches of agriculture and home economics and the related studies. For instance, chemistry will be taught as a related subject as it touches agriculture and home economics. The work will be of college grade.

A notable feature of the school will be its state conferences and conventions on rural life, rural schools, home life and boys' and girls' work.

REWARDS FOR HOG RAISERS

At least six wire reinforcements, with and should be used to a post.

A clean grade of sand and pebbles on four parts of the post and ratio of two parts and to four parts of four parts of four processor Trowbridge to the Telegram correspondent. "But with the ever and rapidly increasing population the best supply must be increased. The apparent source of supply of at least an increasing part of our feeder cattle in future years may be easily washed, Dirt in sand the peach of the supply must be increased.
