ITEMS IN BRIEF

J. F. Kerl, of Du Bois, Neb., was on the market Wednesday with cattle and was well pleased with prices received.

John Hurch, the regular shipper from Clearmont, Mo., was on Wednesday looking after the sale of a carload of stock. He pronounced the market O. K.

Ben Pearce, one of the veteran shippers of Northwest Missouri, had a shipment of stock on the market yesterday which included one choice steer that brought \$9.00.

Sheep receipts were swelled today by the following Colorado shipments received here this time for the market: Stauder & Sargent, of Rocky Ford...

The Great Western Sugar Company was well represented here today by shipments of stock received from the Fort Morgan and Brush, Colorado.

Key & Gray, prominent cattle men of Burlington, Colo., sent in a car of cattle for today's market.

Champion Molasses Feed shortens feeding period, increases gain, reduces cost per pound of gain, equally good with ordinary molasses.

J. H. Landis & Co. and John Volker were among those having stock on sale here today from Doniphan county, Kansas.

Champion Molasses Feed, cattle like it, cattle feeds like it, because it makes them money. Try a few cars.

Champion Feed Co., Tarkio, Mo.—Adv. Hays county, Nebraska, was represented in today's trading by J. B. Heidrick and Byron Farmers Elevator Co. of that locality.

Try Hilger's 25c merchants lunch and be convinced it's the best in the city. 207 So. 6th St.—Adv.

S. H. and H. R. Prather of Atchison county, Missouri, who contribute regularly to the Journal, are again on hand today with three cars of cattle that sold at \$8.80.

For the best values in whiskeys, try Hilger's, 207 So. 6th St.—Adv. Martin & Madden, regular patrons of the St. Joseph market of Pawnee county, Nebraska, cashed one load of hogs and a car of cattle on today's market.

Champion Feed saves corn.—Adv. Two cars of sheep were disposed of during trade in that division today by Wilkinson & Son, of Hall county, Nebraska.

Excelsior Cattle Fattener has proven a great success. The cheapest and best feed that can be fed with corn. Increases the gain, shortens time of feeding.—Adv.

A car of cattle was put on sale here today by Phil Schur, of Harlan county, Nebraska. Depot cars, uptown, theatre district, Hotel Ryan (European), Steam heated rooms.

FARM CONGRESS OPEN

GOOD ATTENDANCE AT FORENOON SESSION OF BIG AGRICULTURAL INSTITUTE.

HORTICULTURE A. M. SUBJECT

A. J. Weaver, Jas. M. Irvine and F. W. Faurot speak on Orchard—Good Evening Program for Tonight.

Friday's Program at Farm Congress. Morning Session, 9 O'clock. Chairman of session—Hon. W. J. Bailey, Atchison, Kan., former governor of Kansas.

Address—W. J. Bailey, "The Tobacco Industry"—Charles H. Hillix, Weston, Mo.; C. L. Head, Weston, Mo.; J. M. Barker, Brunswick, Mo.

Afternoon Session 2 O'clock. "The Tobacco Industry"—Farm adviser, Weston, Mo.; A. Koonitz, general freight agent, Topeka, Kan.

Address: "Relation of the Railroad to the Producer"—J. H. Koonitz. "Farmers Co-operative Credit System"—Sam M. Jordan, county commissioner, Pettis county, Sedalia, Mo.

"Hog Cholera"—Dr. W. B. Niles, hog cholera expert of University of Missouri, Columbia, Mo.; "States department of agriculture, Washington, D. C."—Evening Session 7:30 O'clock.

Chairman of session—R. T. Forbes, president First National bank, former president of the Commerce club of St. Joseph. "Good Roads"—J. H. Dodge, superintendent of road construction, United States department of agriculture, Washington, D. C.

"Feeding and Handling the Dairy Cow (Illustrated)"—E. K. Slater, former dairy and food commissioner, Minnesota.

Tonight's Program—7:30 O'clock. Chairman of session—A. F. Gallaway, vice president of the congress, Clarinda, Iowa.

"Rural Schools (Illustrated)"—Mrs. Marie Turner Harvey. "Nature Makes the Whole World Kin"—Rev. H. B. Tierney, Trenton, Missouri.

"Her Side of the Question"—Mrs. Cora Wellhouse Bullard, manager Wellhouse orchard, Tonganoxie, Kan. "Seed and Testing (Stereoscopic view)—Hert Ball, secretary group improvement committee of allied grain exchanges, Chicago.

The Interstate Agricultural and Industrial Congress was formally opened in the Auditorium this morning under auspicious circumstances. Charles D. Morris, president of the Commerce club of St. Joseph, which organization was largely instrumental in securing the big farmers' institute, called the meeting to order and gave the address of welcome.

Dr. A. Ross Hill, president of the congress and the University of Missouri, responded to Mr. Morris' remarks.

Dr. A. Ross Hill. President of Congress.

Horticultural topics formed the topic of discussion at the forenoon session of the congress. A. J. Weaver of Falls City, Neb., an agriculturist.

WHEAT LOOKING FINE.

Harrison County Man Says Fields Are Green and Nice.

A. O. Lair, who makes his home in Harrison county, Missouri, paid a visit to the St. Joseph yards yesterday and while here marketed a consignment of butcher stock for which he received good prices, according to his statement.

When asked in regard to the prospects for wheat in Harrison county he replied that a bumper out-look could not be expected. The snow is going off gradually and the moisture is penetrating the ground and the fields are looking green and nice.

Mr. Lair, who is in a position to know, says that there are more cattle on feed in his locality than usual. "But," said Mr. Lair, "this hog situation is not so promising. The high prices paid on the markets and choicera, which has done much damage throughout the country, are factors responsible for the present shortage."

The outlook for spring pigs is bad, as there is a limited number of broad sows left in the country.

At the Tooth—Starting Monday receive little corn in the south, Tuesday, fairly good, themselves when they reach central Illinois.

In some instances the corn is soaked for a day or two before feeding. Each goose will eat about a pint of shelled corn daily. It requires sixty-six bushels to feed a flock of geese now on the Pike farm each twenty-four hours.

The feeding process ranges from twenty-five to thirty days. The average gain in one month is four pounds. Geese drink a large amount of water each day, and clean water in unlimited quantity is highly essential to their health and fattening process.

The geese are fed in the same lot with cattle and sheep, but after the latter animals are out of the way and into their pasture, Mr. Firke expects to handle 50,000 geese during the present year.

STOCK YARDS DAILY JOURNAL

The St. Joseph Journal Publishing Co., Publishers.

W. F. WARRICK, Editor and Manager.

Largest Outside Circulation of Any Paper Published in Buchanan County, Mo.

Entered at the Postoffice in St. Joseph, Mo., as Second Class Matter, September 3, 1897.

SUBSCRIPTION RATES: Daily, per year \$4.00; Daily, six months \$2.50; Daily, three months \$1.50; Daily, one month \$0.50; Tri-Weekly, per year \$2.00; Semi-Weekly, per year \$1.50; Weekly, per year \$1.00.

In asking change of address, please state your former postoffice. State whether your paper is Daily, Tri-Weekly, Semi-Weekly or Weekly. State whether you pay for it, or some one else's commission firm, and if the latter, the name of the firm.

Country subscriptions are payable in advance. Do not send checks on country banks. Remit with postal order or draft, payable to St. Joseph Journal Publishing Company.

If you do not receive your paper regularly, notify this office or your commission firm, at once, so the matter may be regulated without delay.

Advertising Rates Furnished on Application. Special 25 per cent commission allowed postmasters, who are authorized to take subscriptions.

It is not always the ground you cover so much as how completely you cover it that counts most.

Corn is grown in every state in the Union, and is grown upon 80 per cent of all farm in the United States.

The parcel post is opening up many new fields. The fellow who first discovered how to make money out of it will be the one to profit most. Get to work.

BUYING IN DRIBS.

If the parcel post should raise the cost of living to the rural population by educating them to "buy in dribs," it would show us what is at least one of the causes of the high cost in cities, for the city housekeeper buys in dribs so small they might better be called dribbles.

ADVERTISING VIA PARCEL POST.

The postmaster at Mount Carmel, Mo., reports the parcel post business at his point to be a huge success. With each day the number of packages passing through his hands shows increase. Among the parcels being sent out now are hundreds of small bags of flour which a local concern is utilizing to advertise its wares among immediate consumers. The oddity of it is business—the firm many new customers.

STOCKER AND FEEDER PRICES.

It may take nerve to go up against the feeding game with stocker and feeder values at their present level, but it's the man with nerve, combined with judgment, that makes his mark in this world. There are plenty of reasons why the owner of a bunch of good thrifty cattle can congratulate himself. The chief one is that the future outlook for the cattle market is assuming a world shortage in cattle necessarily means high priced beef and there is little indication that the scarcity is going to be made up in the immediate future. The initial cost of stocker and feeder cattle at present may be at record mark, but it is generally the man who breaks precedent that distinguishes himself, financially or otherwise.

The demand at present prices is strong enough to take all the young cattle coming to market, despite the price figures. Stockmen who have their pastures and are fixed to take care of cattle do not want to go out of the business and even though the prices seem high, they figure that they are going to stay high for some time to come and that they have a good chance to come out to the good. Of course it takes nerve to go against the stuff at present prices, but the chances look good and there are many cattlemen who have the nerve, as the volume of business being done at this and other market centers indicates.

DRY FARMING SCIENCE.

The great scientists are frequently as far off in their predictions as the fellow who thinks the successful planting of his potatoes depend upon the changes in the moon, says the Omaha World-Herald. Twenty years ago Sir William Crookes announced that the wheat area of the world had reached its limit and that a universal bread famine was imminent. Since that time the wheat area has more than doubled and the end is not yet in sight.

The average annual precipitation on more than half of the world does not exceed fifteen inches and Sir William thought that, since this was too small a rainfall for the production of wheat, the limit had been reached. Since that time dry farming has been introduced and many thousands of acres of such lands are now producing enormous crops of wheat and besides that, varieties of wheat have been developed that require even less

Daddy's Bedtime Story

The Little Princess Who Ran Away

ONE morning daddy read in his newspaper about a little princess who was the only child of her father and mother, a king and queen, and how much they loved her. That made him think of the story of the little princess who ran away one day, so that evening he told it to Evelyn and Jack.

"This little princess," he began, "had no little sisters or brothers to play with, so she found it very lonesome in the big palace in which she lived, although she was surrounded by all sorts of beautiful things and had lots and lots of servants to look after her. Her daddy and her mother, being king and queen, had many things to do, so they could not spend much of their time with the little princess."

"Didn't he tell her any bedtime stories, daddy?" asked Jack. "I'm afraid not," answered daddy, with a smile. "Well, it happened one day that the little princess found herself on the edge of the palace garden with no one near her. Her nurse and the other servants had gone off to talk to some soldiers who were on guard. So little Princess Anne just gave one peep around and, quick as a wink, she ran through the palace garden gate and out on the highway. The guards were too busy talking with the maids to notice her, and she was quite a long way off before any one missed her. Then there was a fine search and much running up and down.

"But little Princess Anne didn't know or care. She had found a little sidepath that led away from the highway, and down it she went, humming a tune. Soon she found herself in front of a little farmhouse, where she saw a number of children, all about her own age, playing in the farmyard. The princess, being used to ordering her servants about, was not at all shy, so she entered the gate and asked the children to let her play with them. At first they were ashamed, because the stranger had such fine clothes, but the princess was a friendly little girl, and they soon became friends.

"What good times she had that day Princess Anne remembered all her life, and she often told about them when she grew up and became a queen. They made mud pies and chased the chickens and pecked down the well trying to see how deep it was. The children's mother called them after a time for luncheon and was surprised to see the little stranger. She knew, of course, that Princess Anne belonged to wealthy folks and asked her where she lived, but the princess was a wise little one and would not tell, because she did not want to be taken back to the lonesome palace. It was evening before the searchers found her. When she told the king and queen what a fine time she had they said she might ask her new friends sometimes to the palace."

than fifteen inches of water to make bouncing crops. Among them is the durum and others that have been tried out at the experiment stations.

While the dry farming movement is only in its infancy, it has been a power in advancing not only the agricultural interest in the semi-arid regions of the whole world, but in the handling of lands in the humid regions so that much greater production has followed there. The same system is not a detriment to land where there is usually an abundant rainfall, and when a dry season comes in those regions it saves the crop there.

In this field, as in every department of agriculture, man could only learn by experiment, and it has taken years to make these experiments. They are not half completed yet, but enough has been learned to enable men to raise crops in the dry land country where every previous attempt had ended in disaster.

Dry farming is an entirely different profession from farming in the humid regions. A man might as well undertake to practice medicine after studying law, as for a farmer in the humid regions to undertake to raise crops in the semi-arid plains of the West. Dry farming is the science of moisture conservation—the storing of rain in the soil instead of allowing it to run off into the creeks and rivers. The experimenters have learned how to do it, and those who would learn how to farm arid land must go to school to them.

IN WOMAN'S REALM

ATTENTION.

Lady readers of the Stock Yards Daily Journal should appreciate the efforts of the Townsend & Wyatt Dry Goods Company and the Hirsch Dry Goods Company in their efforts to promptly fill all mail or parcel post orders. The ladies in the country can shop as well by mail or telephone as though they were here shopping in person, as both firms are well known, thoroughly reliable and merit your confidence. Carefully watch their announcements in the Stock Yards Daily Journal and demonstrate to yourself that it will be convenient and profitable to use the parcel post by giving them an order.

HATS THAT WOMEN WEAR.

Ladies probably did not begin to wear hats until about the tenth century, if so early, and then it was the lofty headdress draped with some material, which it must have been most trying to keep on indoors, and quite impossible to wear in a wind. According to the "Anatomy of Abuses," written in Queen Elizabeth's time, ladies' hats were very nearly as perplexing then as they are today. "The fashions be rare and strange, so is the stuff whereof the hats are made divers also; for some are of silk, some of velvet, some of taffeta and some of wool, and which is more curious, some of a certain kind of fine hair, these they call beaver hats."

In the reign of Henry VIII hats assumed a "great richness and beauty," but in the time of the first James they became even more ornate, jewels of price and occasionally small mirrors being used in their adornment. At times of revelry the gallants wore feathers in their hats, which were said to be one of the "fairest ensignes of their braveries."

But for adornment men's hats were in their zenith in the days of Charles. The big felt hats with the long feather saucily curled around them, fastened with a buckle often of great value, gave a dashing air to the cavaliers, which absolutely cast the tall solemn hats of the Puritans and "Psalm singers" into the shade. The monster hats of the time of the empire were almost as big as "the Merry Widow" of modern fame, and in shape today they were positively

unlike. Men's hats have suffered great changes since the time of Charles, and it is more than doubtful if they will ever again become ornate.

Indeed, save in very remote parts of Wales where the old women still—some of them—wear the high crowned steeple hat, there is nothing especially peculiar about the headgear of the English peasantry.

TWO PIE RECIPES.

Fresh Pineapple Pie.—Put short pastry over the outside of a pie tin, instead of the inside, and prick with a fork to prevent laboring; then set the pan, pastry side up, in a moderate oven to cook until done. Let cool; then fill with this mixture: Heat one cupful of milk to the boiling point in a double boiler, add two teaspoonfuls of cornstarch wet with a tablespoonful of cold milk, a pinch of salt, and one rounding tablespoonful of sugar; stir until the mixture has cooked five minutes, which will burst the starch cells. Whip one egg yolk with a little of the hot mixture, then turn it into the custard, stirring until the egg is blended. Let it become cool; then strain through a sieve and mix with a cupful of fresh pineapple, shredded or chopped, very fine. Spread in the pastry shell. Whip the white of the egg with one tablespoonful of sugar and a small bit of salt until it will keep its shape; then add a little lemon juice to take away the egg taste. Spread over the pie and place in a very moderate oven to delicately brown. Watch the pie during this process very carefully, as the meringue bakes very quickly. Serve this pie in two inch blocks one gallon of pumpkin—the red preferred. Scrape the inside of peeling, add one cup of water and cook for four to five hours. While hot add half a measure of sugar to one pumpkin, half a teacup of butter, one teacup of fresh sweet milk, every kind of spice and of flavoring, and the yolks of five eggs, saving the whites for a meringue. This makes four good sized custards—the kind one eats in preference to fruitcake.

Head Cheese Recipe.—Cut a hog's head into four pieces. Remove the brains, ears, and eyes, and cut off the fattest parts for lard. Put the lean and bony parts to soak overnight in cold water in order to extract the blood and dirt. When the head is cleansed put it over the fire to boil using water enough to cover it. Boil until the meat separates readily from the bone. Then remove it from the fire and pick out all of the bones. Drain off the liquor, saving a part of it for future use. Chop the meat up finely with a chopping knife. Return it to the kettle and pour on enough of the liquor to cover the meat. Let it boil slowly for 15 minutes to a half hour. Season to taste with salt and pepper just before removing it from the fire. Turn it into a shallow pan or dish. Cover with a piece of cheese cloth and put on a board with a weight to make it solid. When cold it should be sliced thinly and served without further cooking.

New Use for Glove Fingers.—Glove fingers make splendid protection for the stems of flowers, especially if the flowers are fresh and worn pinned to a white dress. Save the fingers, insert the flower stems in them and pin to dress, and no dampness or stain will injure the most delicate dress.

SCOUTS AT WILSON'S HOME

Two Living in Staunton, Va., Are Considered of "The Best."

Staunton, Va., March 5.—This town, birthplace of President Woodrow Wilson, has two of the best scouts in the country. Those boys, who are registered with the Boy Scouts of America as Eagle Scouts, are Levering Early and Fred Woodson.

There are only twenty-four Eagle Scouts in America, and the fact that the insignia is only obtainable through great devotion to the work, makes it a great honor.

To become an Eagle Scout twenty-one merit badges must be won for efficiency in scout work and various branches of school and other work. There are fifty-six merit badges in all.

TWO ROADS URGED ON STATE

Both to Connect St. Joseph and Kansas City.

Kansas City, March 5.—Curtis Hill, state highway engineer, has recommended to the state board of agriculture that both the "Platte purchase route" and the "interstate trail," two roads connecting Kansas City and St. Joseph, be designated state highways.

The Platte purchase road connects two cities by way of Parkville, Platte City, Weston, Ipe and Do-Kab. The other route runs by way of Nashua, Smithville, Trimble, Edgerston and Dearborn. Both routes have been under consideration by Hill and the board of agriculture for more than a year. In his report to the board Hill says: "There exists a great necessity for a continuous highway, suitable for service the year around, between the two cities of Kansas City and St. Joseph. Two such roads are now under consideration, one known as the 'Platte purchase route,' and the other known as the 'interstate trail.' An investigation has been made, showing that the conditions of the roads, cost of improvement, places of interest on the way, and general availability of the

Farmers, Welcome!

We unite with all other good citizens in welcoming to our city the representative farmers of four great states, who will be our guests during the Interstate Agricultural and Industrial Congress which convenes here today. We are, and always have been, interested in whatever promotes the comfort, welfare and prosperity of the farming community. Our prosperity is likened with your prosperity, and we stand shoulder to shoulder with you in every movement looking to the betterment of farms and increase and development of farm products. We want you to enjoy your visit to St. Joseph and profit to the fullest extent by the splendid program that has been provided for your entertainment. We want to meet you personally while here and get better acquainted with you. We want you to visit our store and make yourselves at home. We want you to view our immense stocks of new spring and summer merchandise, make free use of our rest rooms, lavatories and other store comforts and conveniences. Arrange to meet your friends here, leave grips and bundles in our care and let us check them to the station for you when leaving. Our store is convenient to the Auditorium, to hotels, theaters, street cars and railroad stations. Make it your headquarters and rest assured of a genuine and cordial welcome.

The Spring Suit Season Is at Hand

The average woman, whatever her station in life, considers the tailored suit as the indispensable foundation of her wardrobe. No matter how many dresses or coats she may have or desire, the tailored suit fills a need that any or all of them together does not supply.

Right lavishly have we prepared for the supply of your spring suit needs in models that correctly portray fashion's latest and most authoritative trend. Every model emphasizes a distinctive style note and embodies the highest class of workmanship throughout and the greatest value possible at each respective price.

The New Bulgarian Modes

Prominent in this big fashion display are the new Bulgarian and Balkan Blouse Suits in a number of the most favored models, brought out in the shepherd checks, serges, stripes and novelty materials. They all have those pretty touches of Bulgarian trimming so characteristic of the new modes, the new cut collar, cuffs and revers. The skirts have the new drape effect at side and back. Great value \$25.00 at only

Stylish Suits at \$26.50 to \$32.50

A broadly generous selection of new and exclusive models at this modest price range, every one of which will be recognized as entirely out-classing suits usually shown at those prices. Some of the distinctive features of this line are the new cutaway coat with draped revers of satin; long or three-quarter sleeve, with deep cuff of silk to match revers; the new two-piece skirt with side drape held in place by tailored strap; back of skirt has tiny tucks and high tailored belt. Also the mannish tailored coat with plain tailored skirt. Don't miss seeing this popular line at

continuous highway, suitable for service the year around, between the two cities of Kansas City and St. Joseph. Two such roads are now under consideration, one known as the 'Platte purchase route,' and the other known as the 'interstate trail.' An investigation has been made, showing that the conditions of the roads, cost of improvement, places of interest on the way, and general availability of the

Portable Fireproof Cottages

Warehouses, Offices, Engine Houses, Garages

Made under the "Pruden System" patents. Open, screened or insulated against heat and cold. Come complete, in units of heavy galvanized steel. These interlock without framing, into buildings that for strength and durability rank with masonry for a fraction of the cost. Quick delivery and erection. Unlike any other construction. Made by Metal Shelter Co., St. Paul, Minn. These buildings are sold exclusively by

G. W. GROTE, General Building Contractor 620 South 8th St., St. Joseph, Mo.

Call and see the building and get prices. We have all kinds of buildings from garages to warehouses set up for inspection.

OLD KING COLE MODERNIZED. Old King Cole was a merry old soul. And a merry old soul was he. He called for his stein, and he called for his wine. And he called for his goblets three; And every goblet held a drink. A drink big enough for three; Oh, gurgie, gurgie, gurgie, gurgie, gurgie, gurgie; the drinks went into he.

JUST LOOKING FOR IT. "Wouldn't you like to go to Lapland, Mabel?" "Oh, Henry, I'm afraid I'd be too heavy."

These Two Propositions Should Be Investigated While You Are Attending the Agricultural and Industrial Congress

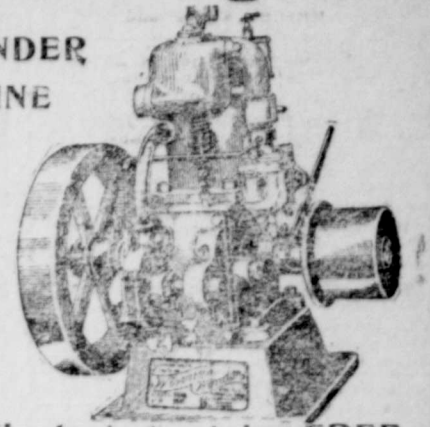

The World's Best You Must Spray

If you have an orchard on your place you should make it pay. Spraying will destroy all the fungi and insects, giving the trees a chance to bear marketable fruit, but you must spray right. Begin right, with the right kind of a sprayer, a "Cushman," the power sprayer, that won the gold medals at National Horticultural Congresses.

The World's Best Gasoline Engine

Saves horseflesh, cuts down your harvesting expenses; can be used any place on the farm where power is required. Pumps water, grinds feed, etc. Extremely light weight (191 lbs.) Develops full four-horse power. Get one mounted on trucks. It's a regular "Handy-Andy" round the farm.

We invite you to make our factory your headquarters while attending the congress. If you are unable to attend drop us a postal requesting our large illustrated catalog FREE

THE THREE MILESTONES.

Octogenarian's Definition of Triple Stages in Human Life.

An octogenarian sighed and said: "There are three milestones in a man's life. The first, a very joyous milestone, is when he ceases to be called a boy, and for the first time hears himself called a young man. Ah, how happy that makes him! A young man. "The second milestone is a milestone of gentle melancholy. It is when he ceases to be called a young man and for the first time hears himself called a man. A man—not a young man any longer. That causes him to take thought. What has he achieved thus far? Is his life going to be a success or a failure? A man, not a young man now, eh? How fast the years have flown! So he muses ruefully. "The third milestone is a tragedy. It is when he is first called an old man. He will never forget the innocent person—the child, the youth, or perhaps the girl—who first applied that phrase to him. He will never forget the scene of its application, a happy scene, perhaps, which suddenly turns funeral, dreadful. An old man—why the first hears those words applied to himself quivers, for all his wrinkles and gray beard, for all his fat stomach and bald head, with an anguish more poignant than youth has ever felt. An old man—how it cuts and tears. How it saps the strength! What a heavy, limp, hopeless feeling of desolation it leaves behind it. "I am 80. I have heard myself called an old man for a good many years now. But it always tortures me. It is the literal truth that, even at this late day, I'd rather get a blow in the face than be called old. It would hurt less."

DOING THE CHORES.

Children Need More Than Play For Their Spare Moments.

Collier's Weekly: A boy helped to plant fifty apple trees. "Beginning next month the borers must be hunted," said the father. "How often? How long?" asked the boy. "Once a month during the open season—for years. I'm going to leave it to you." Kneeling or half lying for hours in the rotting mulch, the boy dug and cut and wired out the small enemies—for years. He found that once a week was necessary in some periods. Boys went by to baseball and swimming. They called cheerily across the creek lot, but neither side spoke of his quitting to go. It was one of his chores. The new orchard was out of sight of the house. But letting a row go till next month, on bad days when he was relaxing in, did not occur to him. Many times he left a tree and a big root channeling borer, his staying power all drained out through the sore fingers, but came back the next day and the next. It was his chore. When the orchard was well into bearing and pride, a windstorm destroyed two-thirds of it.

The boy who dug the grubs has since bent patiently at the roots of some other things and seen them tend upward. Recently he brought these fifteen bounteous apple trees back into the family, and has started his boy on more trees and borers behind a wind-break.

Chore laws are ancient, simple and inexorable. Do the thing half feared or dreaded, at the time appointed, without being told again, as well as if the master stood alongside. Bring in the wood the same when the pile is heaped and go back after the dropped stick. Get the young cattle through the barway, though they break and go around you twelve times and again, and dark comes and you are crying. Warm your fingers afterward. Don't tell.

The majority of American children have been rather abruptly bereft of chores. In the morning hours when the soul of childhood lies almost bare in the clear, expectant eyes, from school out till supper, from supper to bedtime—something more than play is needed. Children feel this and wait, and prout about for material of a stouter weave, something fibred with the full life roundabout and impending; and, adventuring unguided, they get knowledge and scars. Organized play will not fill this gap in education. Manual training has limitations. But in every home lie neglected means of giving to its youth a strengthening and character making apportionment of the day's work. Partly because of chores the rural youth, despite increasing proportionate disadvantages, will go on regularly to the hard, high places. Land about a home means chores.

TO SETTLE OLD QUESTION.

Pure Bred Colts vs. Grades in Cost of Rearing Cost.

Manhattan, Kan.—It is supposed, generally, among horsemen and farmers, that it costs more to rear a pure-bred colt than to rear a grade. The animal husbandry department at the Kansas Agricultural college has begun an experiment to try out this question this winter. Prof. W. A. Cochel has selected 20 colts, 10 of them pure-bred Clydesdales, Percherons, Belgians and ten grades of various breeds. All the colts are fed in an open shed and during the days are kept outside in the pasture. Their coats are heavy and they are in the best of condition. The question to be answered is: Has a pure-bred the same opportunity to develop as has the grade, or is it as much a matter of feeding as of breeding? Some of the colts are imported and some are home-bred. The experiment will be conducted under conditions that can be duplicated on any farm. Careful records will be kept and results published.

Corn fodder that is dry and dusty will be improved a little by sprinkling in the manure.

C. G. Ferguson, Mgr., 1300 Alhambra street.

FARM CONGRESS OPEN
Continued from Page One.

and orchardist of note, delivered an address with fruit growing as the subject.

A. J. Weaver,
Who Spoke on Orcharding.

"The Apple Industry of the Missouri Valley" was the topic for an address by James M. Irvine, editor of the Fruit Grower and Farmer. "Proper Handling of orchards" was discussed by F. W. Faurot, farm advisor of Buchanan county.

F. W. Faurot,
Farm Adviser, Buchanan County.

The attendance at the forenoon session was encouraging to the promoters of the three day gathering. This afternoon W. D. Maxwell of Andrew county, Missouri, delivered an address on horticultural topics. He was followed by C. A. Carpenter of Little Rock, Ark., assistant agricultural commissioner St. L., I. M. & S. Ry., who spoke on "Teaching Modern Agriculture by Field Demonstrations."

Dr. F. W. Caldwell of St. Joseph, and J. B. Lamson, agricultural commissioner C. B. & Q. Ry., also spoke during the afternoon, the former basing for his subject "Live Stock Sanitation" and the latter "The County Farm Adviser."

Everything in connection with the big congress was ready for the opening. The platform, from which the lecturers speak, is tastefully arranged, and electrical connections for the stereopticon lectures were made yesterday. Special sections for the press and for students have been reserved and tables provided in each section.

On entering the Auditorium, visitors and delegates to the convention will turn to the right and register and receive badges. Those who are not provided with lodgings at the hotels can call at the information bureau, after registering, and can there secure good accommodations. Boy Scouts will conduct them to their stopping places without any charge.

Special entertainment is being provided for a number of the distinguished men who are to take part in the congress. A. D. Aiken, commercial agent of the Rock Island, will give a complimentary luncheon to the delegation from Trenton, Mo.

The St. Joseph-Buchanan-Andrew County Medical society will give a complimentary luncheon tomorrow for surgeon L. L. Lundsen, the noted typhoid fever expert and eradicator. Judge O. M. Spencer announced at the Commerce club luncheon yesterday that he would be host at the Hotel Robidoux Friday noon to all members who wish to meet W. C. Brown, president of the New York Central railway, at luncheon at which President Brown will speak informally.

There will be no charge whatever for admission to the Auditorium. At the evening session today there are two speakers who should draw big crowds of St. Joseph people. These are Mrs. H. Clay Harvey of Kirksville, the expert community life worker, and Mrs. Cora Wellhouse Bullard of Tonganoxie, Kan., the women horticulturist, who conducts the largest commercial orchard in the world. Mrs. Harvey will speak on "Rural Schools" and will illustrate her lectures with stereopticon pictures. Mrs. Bullard will speak on "Her Side of the Question."

KILL THE LICE AND MITES ABOUT THE HEN HOUSE.
Most of our readers have not had an opportunity to clean out the hen house during the cold weather. This matter should be attended to as soon as the weather becomes warm enough to permit of all the hens being turned out for a little time. When cleaning out the hen house be sure to go after the lice and mites. The easiest and least expensive way to do this is to get a supply of Kreso Dip No. 1, make a solution according to directions, and dip all the hens. It is not well to dip the very little chicks, but the lice and mites may be exterminated on these by making a salve of one part of

Kreso Dip No. 1 and twenty parts of unsalted lard and rubbing on the top of the head and around the vent. When dipping the hens be sure to ruffle the feathers so that the solution can reach these kin. It will not hurt the head or eyes to dip the hen completely under the solution.

After the hens have been taken care of, the remainder of the dip solution is to be sprayed over the floors, walls, roosts and nests. If you do this thoroughly, you will not be bothered with lice and mites as a solution of Kreso Dip No. 1 is quite inexpensive and may be procured from any drug-gist. You may have a booklet free on how to use Kreso Dip No. 1 for killing lice, mites, cleansing, disinfecting, and curing the common diseases of poultry, by writing to Parke, Davis & Co., Department of Animal Industry, Detroit, Mich.—Adv.

FRUIT FOR HOME USE.
When fruit is cheap and plentiful in the market its value for home use is not by any means lessened.

Corn Hogs
Swift's Digester Tankage

A combination that will make you more money out of your present stock of corn in crib than you could possibly get in any other way. Swift's Digester Tankage is in daily use on the best farms of the Middle West. If you are not feeding it you are neglecting an opportunity to increase the feeding value of your corn ONE THIRD. Good and profitable for Brood Sows, pigs and feeding hogs. Richer in Protein (60 per cent) and Phosphates—Bone Builders (6 per cent) than any other hog feed. Endorsed by all State Experiment Stations and the best Breeders and Feeders.

NORTH & ROBINSON CO., Grand Island, Neb.

Imported Stallions—Percheron, Shire, Belgian
Each year we show our new importation the same month they land. Each year they win more than all other exhibitors combined. At the American Boy at this year we won 2nd on 4-year-old Percheron; 1st, 3rd and 4th on 3-year-old; 1st and 3rd on 2-year-old, and 1st and Champ on group of five stallions. All are for sale. Our guarantee and insurance are the best. Our horses are the best.
