The 'New Disorder' In Europe

The dull, sickening crash of the guillotine sounds in Paris, and the old Sante prison runs red with blood as the pages of history flip back 150 years.

What is the crime of Frenchmen who are dying today in Paris at the hands of Frenchmen? They are against the Germans. Yes, it has come to that! Frenchmen are dying in Paris in 1941 because they are against the Germans and against a kind of German system that the German conquerors of 1870 dared not even to inflict on beaten Frenchmen.

The script for the next act is already written—written by Hitler himself years ago in "Mein Kampf." He personally admired the stern measures which the French took when they occupied the Ruhr, especially as the ineffective measures taken by his political opponents within Germany to defeat them were grist for his mill. But as he watched the feeble attempts of the Cuno government to combat the French occupation, Hitler himself set down what he would do if he were the French. What should an occupying army do if sabotage, passive resistance, and such tactics finally get in its hair? Hitler's answer for putting "a ghastly finish" to this "childish mischief" in a week was "the most violent, bloodiest persecution."

This, one may be sure, his vice fuehrers in France American Stores Railroads Cut will now carry on. And we may be sure, on the formula long since established as early as Instalment Plan the Reichstag fire of 1933, that everyone who is arrested, killed, or otherwise punished will be set down as a Communist plotter.

But not by the Germans themselves. This also Hitler noted: that in the case of conquered countries there are always people who "contrive to feel not so badly, since stalment credit regulations went inthey not infrequently are entrusted by the crafty victors with the job of slave overseer, which these characterless effect of the order. natures then exercise over their own people, at that generally more heartlessly than any alien beast placed over them by the enemy himself."

Two Years Of War---528 Days Of Battle

The war of three continents has raged for two full years, but of the 731 days of conflict, only 528 have been spent in actual battle on land. While the war in the air and at sea has gone on continuously since Sept. 1 1939, the conflict in Europe, Africa, and Asia has divided itself into the several campaigns shown on map. Although the 198-day Yugoslavia-Greece campaign, including Crete, seems the longest, it includes only 55 days of Nazi action, leaving Russia the record for longest resistance to German blitz.
