Bloodhounds bring to end Ray's liberty

By RICHARD PYLE

By ED BLANCHE

BRUSHY MOUNTAIN, Tenn. (AP) James Earl Ray was tracked down early today by a brace of bloodhounds named Sandy and Little Red, ending a desperate 541/2-hour flight for freedom from life in prison.

At the end of a three-hour, threemile run through a wooded creek valley and up thickly covered mountain slopes, the assassin of civil rights leader Martin Luther King Jr. was found hiding in a pile of leaves.

A few hours after Ray was seized. police arrested another of the six inmates who had fled with him leaving only one fugitive at large.

The 49-year-old Ray, driven and exhausted, covered with mud and

Dutch machine guns

riddled terrorists

sand, offered no resistance to his captors. His first words, according to prison guard Sammy Joe Chapman, Sandy's handler and the first officer on the scene, were: "I feel good.

Chapman, 33, petted Sandy after returning with Ray and said: "She's the prettiest dog in the world." Sandy and Little Red are 14-month-old sisters.

The location of Ray's recapture was only five miles from the Brushy Mountain State Prison where he and the six others escaped over a wall with a makeshift pipe ladder on Friday evening.

The sixth fugitive, Donald Ray Caylor, 24, was spotted this morning by a patrolman walking along a street in Oak Ridge, 20 miles east of the

prison. Officers said Caylor had no identification on him and the patrolman brought him to police headquarters where FBI agents and prison guards identified him.

Joel Plummer, state public safety commissioner, said authorities were delighted with the success of the manhunt

Caylor's return to the **prison left** only Douglas Shelton, 32, still free.

Two others were captured Sunday: Larry Hacker, 32, Hamilton, Ohio, serving 28 years for armed robbery and safe cracking, was the repute ringleader of the escape; Earl Hill Jr., 34, Erwin, Tenn., convicted of murder and rape, was a former cellmate of Ray's.

Another fugitive, David Lee Powell, 27. Chicago, was recaptured Saturday. He was serving 100 years for murder.

Plummer said Gov. Ray Blanton was "extremely pleased with Ray"s capture.

Blanton said earlier he had kept U.S. Atty. Gen. Griffin Bell briefed 🛲 the search and that Bell had kept President Carter informed.

Plummer said Ray's capture "concludes one of the largest manhunts in the history of Tennessee.

The capture, at 2 a.m., was reported at 2:35 a.m. and Ray was returned to the prison soon afterward in a squad car driven swiftly through

Escape remains puzzle

By RICHARD PYLE

BRUSHY MOUNTAIN, Tenn. (AP) - The questions linger in the James Earl Ray escape story

-How did seven convicts get under a live electric wire that dangled less than a foot above the top of the prison wall?

-Why didn't guards in the wall towers notice the breakout in progress?

-And perhaps the most puzzling of all, how was the escape ladder, a contraption of more than 20 pieces of pipe screwed together, made in secret?

Tennessee Gov. Ray Blanton's theory on the 2,300-volt cable is that the fugitives used a notch in the wall to bypass it.

Blanton said Sunday that investigators have found marks on the prison wall where it meets a rock cliff that helps form one side of the compound. There is a gap between the wall and the cliff, creating a notch that makes the wall lower at this point and provides more space beneath the cable. Investigators think the marks on the wall came from a makeshift ladder used for the escape, Blanton said.

C. Murray Henderson, corrections commissioner, said the gap apparently worsened because severe winter weather eroded the aging stone wall.

Another theory concerns a power outage at the prison. Henderson acknowledged that there was an outage the night of the escape, but he said it happened after the breakout and lasted only minutes.

The official explanation for guards

sies performed Sunday. The report, including results of ballistics studies to determine what type of bullets kill-ASSEN, The Netherlands (AP) ed the hostages, was expected Tues-Dutch marines shattered the South day or Wednesday, a Justice Ministry Moluccan terrorists' command post spokesman said at the head of a hijacked train with more than 7,000 rounds of .50 caliber

Justice Ministry spokesman Wim van Leeuwen said today the bodies of the six terrorists have been released to their families. He said it would be up to the families to release their names.

He said the bodies would be brought to Assen, where a service was scheduled for tonight at the South

Moluccan Evangelical Church.

pieces,'

One hostage, Saskia Sein, 48, said another captive told her a terrorist killed the male hostage, 40-year-old M. Van Baarsel. The other dead was a 19-year-old girl, J.M.O. Monsjou. Mrs. Sein's report was told to the Associated Press by her husband.

Roelie Brihkman, 18, gave another account. She said the man was killed because he obeyed a terrorist's order to stand up.

Miss Brihkman, quoted by her fiance in a telephone interview, said, "One man, who apparently panicked" obeyed the order to stand when the marines attacked "and was gunned down. I do not know whether he was hit by a shot from the gunmen or by fire coming from outside.

The question of how the hostages died probably won't be resolved until authorities release results of autop-

Crash kills Odessa man

ODESSA - An Odessa man died this morning from injuries sustained in a one-vehicle accident.

Kenneth Orland Hamric, 43, of Odessa died in Medical Center Hospital about one hour after his pickup truck struck a traffic light pole at the intersection of the Kermit and Andrews highways, police said. Police said no skid marks were left.

Justice of the Peace Manuel Valles ordered an autopsy to determine cause of death.

Services are pending at Hubbard-Kelly Funeral Home.

LATE NEWS

MADRID (AP) - Five bombs exploded in Spain today, two days before the nation's first democratic election in 41 years. One person was killed.

WEATHER

Mostly sunny today and Tuesday with a slight chance of thunderstorms tonight. Continued hot in the afternoons. High today and Tuesday near 100 and low tonight in the mid-60s

tack, remained in critical condition at a hospital in Groningen. One of the dead terrorists identified

by the government was Hansina Autosia, a 22-year-old dental assistant, from the farming village of Bovensmilde, reportedly the home to several of the terrorists.

The terrorists' leader, 24-year-old Max Papilaya, also died in the hail of gunfire that ripped the train, authorities said.

The four teachers held hostage in the school could have escaped several times, one of them told a news conference Sunday. But she said they feared the other group of terrorists aboard the train would harm some of their captives in retaliation.

"On one occasion, the Moluccans all fell asleep, and we had a key with which we could have gotten out of the building," said 35-year-old Sjaan Ab-bink. "But at that time, they still had a direct telephone line to the Moluccans on the train and we feared for the lives of the hostages.

The six uninjured terrorists were split up and put in separate jails in northern Holland. The law required their appearance before the public prosecutor today, but official sources said the prosecutor would probably visit them in prison instead of having them brought to court.

Young South Moluccans among the community of 40,000 exiles in The Netherlands angrily mourned the dead terrorists as martyrs to their struggle for the independence of their native islands from Indonesia

they mustn't compromise

By JOE SALMAN Staff Writer

SAN ANTONIO - More than 300 members of the Texas Independent Producers and Royalty Owners Association this morning heard U.S. Sen. John Tower of Texas warn the independents against making any compromise on their stand concerning President Carter's energy program.

Speaking at the 31st annual meeting of the association in San Antonio, Tower said, "You must continue your fight for what you know you can achieve - what you know is best for this nation.

Tower used several actions of past Congresses to stress his point.

"As you all know, when the matter of decreasing the depletion allowance from 27 per cent to 22 per cent arrived, you were told that if you would agree to this, you would be left alone. And you all know you were not left alone

"Then when they wanted to decrease the allowable percentage even lower or get rid of it, they said if you agreed you would be left alone. "Then the intangibles thing hit you.

"From this history you know you must continue to fight for what you

must have," Tower said. The senator said that he believes

that compromise might be okay if there were not alternatives, but that there are alternatives.

He offered a bill that he will present to Congress next week as one of those alternatives. The main part of that bill is a section that would abolish the present composite price mechanism.

old and new oil, as they are currently defined by legislation, on an upward escalation to bring their price on a par with unregulated new oil as currently defined, by June 1, 1979.

Tower said his bill would immediately deregulate new crude oil, currently defined as that oil discovered on a property after May 31, 1977.

exempt

His bill proposes a formula for stripper well oil that would take into consideration the depth of production. He proposes that production from 2,000 to 4,000 feet would qualify as stripper production if it made 15 barrels of oil per day or less, and up to 60 barrels for wells to 20,000 feet.

Exemptions for high-water-ratio production would start when a well produces three times more water

A pair of bloodhounds used in the search for James Earl Ray are the center of attention as they

are driven into the Brushy Mountain State Prison. (AP Laserphoto)

Tower went on to say that these are very critical times for the United States, particularly in the field of energy. "The problems we now face and those we have faced over the 'The problems we now face years were brought on by the failure of congressmen and presidents to understand the complex economy of the oil industry." he said.

"One thing we should all thank President Carter for is his bringing to attention of the American public that we do have a real energy crisis, and not a crisis contrived by the oil industry.

"I am very optimistic about our chances of getting deregulation of new natural gas, because I see a growing independence of the Congress from the President in this energy battle. However, there still remain in Congress many who have a greater fear of the oilman making a profit than that of the unreliability of Middle East energy sources."

Tower said congressman Robert Krueger's victory in subcommittee last week was a major step in getting deregulation of new natural gas.

Krueger, a Democrat from New Braunfels, followed Tower on the program and explained to the TIPRO members the victory referred to by Tower, which was a 12-10 vote in favor of his amendment which came out of the House energy and power subcommittee.

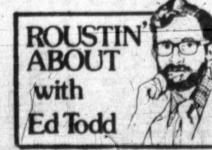

Krueger credited the success of the subcommittee vote to the intervention of 22 agricultural groups in the form of lobbying for the amendment, and intervention by the iron and steel workers, segments of the auto industry, and the lumbering industry.

"And of course much of the credit toes to the hard work of those inependents in the petroleum industry," he said.

Krueger told a receptive audience that "this was the first time in the history of the U.S. Congress that a deregulation bill has gotten out of a subcommittee.

"We now have a hard fight in get-ting it out of the full Interstate and Foreign Commerce Committee. It will be decided there by only one or two votes. And then there is the floor of the Congress.

The three-day meeting in the Hilton (Continued on Page 2A)

Ed Todd is on vacation. His column will resume upon his return.

failing to spot the breakout is that other prisoners collaborated with the escapees by staging a fight and other minor disturbances in the prison yard to distract the guards.

The only gunfire came from Tower 3, a wall observation post more than 150 /ards across the compound. It slightly wounded Jerry Ward, the last man to make it over the wall. Ward was recaptured almost immediately.

Another guard post less than 50 yards away was empty because it is manned "only in emergencies," according to Davis and Henderson. Neither defined an "emergency."

The ladder was custom-designed for the job, with a keyshaped foot at the bottom to keep it away from the wall and an angled piece at the top that fit almost perfectly across the wall. It also could be concealed in pieces and quickly assembled. Officials said they didn't know

(Continued on Page 2A)

First Lady back home By SUSANNA McBEE The Washington Post

WASHINGTON - President Carter welcomed his wife Rosalynn home Sunday and said her two-week trip to seven Latin American countries was one "of great significance to our country and to the peoples she has visited."

Carter said the First Lady's goals in dealing with the leaders of the contries, "as laid out by the State Department and the White House, have all been carried out almost to perfection.

Mrs. Carter's Air Force 707 jet landed at 4:20 p.m. (EDT) at Andrews Air Force Base after a 12,000-mile journey that took her to Jamaica, Costa Rica, Ecuador, Peru, Brazil, Colombia, and Venezuela,

A large sign saying "Bienvenidas (Welcome to) Washington" was on the airfield as Carter, their daughter Amy, and Secretary of State Cyrus R. Vance met the plane to greet Mrs. Carter and Vance's wife Grace, who had accompanied her. Vice President and Mrs. Mondale and National Security Adviser Zbigniew Brzezinski also met the plane.

Mrs. Carter, alluding to the speeches she has been giving the last two weeks, said, "Es un gran placer para mi (it's a great pleasure for me)."...She also used the language of a diplomat in referring to her husband: "I look forward to consulting closely with him on a regular basis."

Declaring that "we are ready to develop balanced, natural, normal

relations" with Southern Hemisphere nations, Mrs. Carter told the President, "They love you in the Caribbean and Latin America."

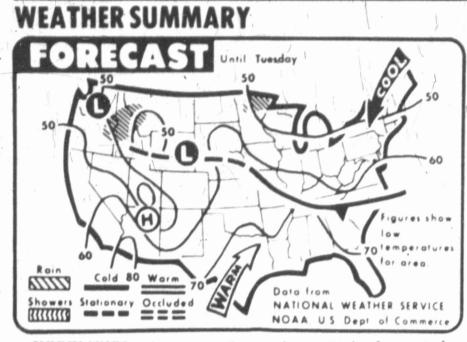

Another feature of the bill would put

In other salient decontrol areas of the bill, stripper well oil, deep stripper well oil, high-water-ratio production and tertiary oil would be

than oil.

Tower sounds warning

THE MIDLAND REPORTER-TELEGRAM, MON., JUNE 13, 1977

(Continued from Page 1A)

Palacio del Rio will continue Tuesday when new officers of the association will be elected. The 1976-77 president is John Christmann of Lubbock.

Christmann was honored at a reception Sunday night at which more than 450 persons attended, including many from Midland and other West Texas cities.

Gov. Dolph Briscoe will be the speaker at Tuesday's general business session. He will be given TIPRO's highest award for achievement, "The Hat's Off Award.

Restaurant files reply to lawsuit

The owner of La Bodega Restaurant has denied charges of negligence listed in a \$1.3 million personal injury lawsuit filed May 25.

In the answer filed Thursday, Alois Munder said a fall down a staircase by M. J. Kirwan was not the result of negligence by the restaurant.

Kirwan, in his suit, said he fell March 15, 1976, as a result of negligence by omission by the restaurant. Injuries from the fall left him a quadriplegic, he said. Among the acts of negligence. Kirwan said. was insufficient lighting on the stairway

He requested \$1,340,000 in damages. including \$340,000 for past and future medical expenses and \$1 million for alleged physical pain, mental suffering and lost income. Munder said Kirwan "failed to keep

a proper lookout for his safety.

Oldsters plan to use thumbs

GARDNER, Mass. (AP) - Fed up with trying to get around, 71-year-old Mary Martin and some friends plan to start thumbing for rides.

Mrs. Martin and other senior citizens said they will hitchhike around Gardner June 28 to publicize the transportation problems suffered by older Americans.

ACCEPTING A SCHOLARSHIP from Cecil Lohn, president of the Midland A&M Club, right, is Barbara Thompson. Attending the presentation are, left, Kent Smith, vice president of community relations, and, second from left, Bill Brogdon,

scholarship vice president. Miss Thompson is the daughter of Mr. and Mrs. Winfree L. Brown of 1400 Murray. She plans to major in marine biology at Texas A&M University.

Evangelist Moon's top aide says Korea scandal being overplayed

By ROBERT L. JACKSON The Los Angeles Times

WASHINGTON - Pak Bo Hi, the long-silent chief lieutenant to Rev. Sun Myung Moon, the controversial Korean evangelist, says public attention being devoted to the Korean influence-buying scandal is "all out of proportion.

Pak, whose own role is under scrutiny as head of the Korean Cultural and Freedom Foundation, said charges that he and Moon are Korean government agents are

'outrageous and slanderous lies.' In his first interview since the Capitol Hill scandal erupted months ago, Pak also told The Los Angeles Times that Tongsun Park, the central figure in the case, was "an ambitious and over-zealous businessman" who lobbied Congressmen on his own not at the direction of the South Korean government

"I believe Tong Sun Park saw a chance to promote his own business interests and to win favor with the Korean government, knowing that Koreans desperately wanted closer

Hyung Wook Kim, a former director of the Korean Central Intelligence Agency, has said Tong Sun Park had "a very close working relationship" with the Korean government. But Kim said he knew of no official government role.

Pak also attacked Kim for having told reporters that Pak and Moon were "lesser operatives" of the Park Chung Hee regime.

"I demand that Mr. Kim come forth with some documented proof before he speaks such damaging things,' Pak said.

Pak, a well-groomed, articulate man of 46, said his much-investigated foundation has had no ties to the Korean government. He denied charges being probed by federal investigators that the foundation had "laundered" money used as payoffs to congressmen.

Ostensibly the foundation is a children's relief fund.

Pak, who has traveled frequently to Seoul from his Washington-based office, acknowledged that he had carried large sums of cash into the United States on at least one, and possibly two, occasions. Pak is suspected by some federal agents of having been a courier for the Korean government, a role he strongly denied.

Informed sources said U.S. Customs Bureau records show Pak declared he was carrying sums in excess of \$5,000 on seven occasions since 1972 when he passed through customs. Pak said some of these reports may

have been filed by his brother - Park No Hi - who has carried expense money while traveling with the foundation-sponsored "Little Angels," a well known Korean children's singing group. Pak blamed the U.S. State Depart-

ment for causing investigations that he said have left his multi-milliondollar foundation virtually bankrupt. He said State Department officials became irritated in the early 1970s because Radio for Free Asia, another activity of the foundation, "was not under their control.

RFA, patterned after Radio Free Europe, beamed anti-Communist views and entertainment programs to mailand China and North Vietnam from a powerful Seoul transmitter leased from the Korean government.

Pak said the State Department inspired separate investigations of his foundation by the Internal Revenue Service and the Justice Department in 1971 and 1972 The IRS eventually ruled that the foundation could retain its taxexempt status, and the Justice Department at that time found no evidence that the organization should be registered as a foreign agent. "Americans must understand our mentality. We are a people who really want to say to the United States. 'Thank you very much for your support.' When we want to show some gratitude, we do it overwhelmingly.

EXTENDED TOPECOSTS Weinsaday through Priday North Texas Partly cloudy and hot Wednesday through Priday with a chance of thunderstorms Thur sday. Highs in the 90s and lows in the 70s South Texas. Texas area forecasts

North Texas Clear to partly cloudy in the west and partly cloudy with scattered mostly afternoon and nighttime thunderstorms over central and east sections through Tuesday Little change in temperatures Highs #8 to #8 Lowstonight 68 to 76

Upper Coast out 50 miles Winds increasing to 15 to 20 knots tonight and Tuesday. Seas three to five feet in creasing to five to seven feet tonight. Winds and seas will be higher in showers and thunderstorms.

Lower Coast out 50 miles: East to southeasterly winds 10 to 15 knots through Tuesday. Winds and seas will be higher in showers and thunderstorms.

West Texas Mostly sunny Tuesday except partly cloudy with widely scattered afternoon and evening thundershowers in the west and north portions. Highs Tuesday 94 to 102, except near 90 in the mountains. Lows tonight 58 to 72 except near 50 in the m

Thunderstorms roam state; more possible

A sudden early-morning thunderstorm brought a small amount of rain to the Midland area Sunday and the National Weather Service at Midland Air Terminal forecasts a slight chance of more thunderstorms tonight

All area towns reported clear skies. warm temperatures and calm to slight winds early today.

The NWS also predicts more of the warm afternoons experienced over the weekend at least through Tuesday.

Forecast for the Permian Basin calls for mostly sunny skies today and Tuesday with a slight chance of thunderstorms tonight. Hot afternoons will continue. High today and Tuesday will be near 100 and the low tonight in the mid-60s. Winds will be southeasterly at 10 to 15 mph today, and decreasing to 5 to 10 mph tonight. The probability of precipitation is 20 per cent tonight.

Thunderstorms packing winds in excess of 50 miles per hour and two inches of rain have brought an abrupt halt to scorching hot weather in much of North Texas, but 100-plus readings were still forecast in Southwest Texas today

Dallas Love Field got a 2.01-inch downpour late Sunday along with near-hurricane force winds. Tree limbs and power lines were downed in both Dallas and Fort Worth, which got only .36 inches of rain officially. The Associated Press reported.

Both cities recorded late afternoon temperatures of 100 degrees before the storm hit, but despite its punch. the severe weather at least had a welcome cooling effect.

A possible tornado was sighted at Sulphur Springs in the early evening.

The area from the Big Bend to Lubbock, far South Texas and Central Texas also had severe thunderstorms Sunday, with Palacios and Brownsville both reporting more than 11/2 inches of rainfall.

Early today, Central and Dast Texas were buffeted with thunderstorms again, with the heaviest activity along a line from near Paris southward into the Waco-Austin area. Other thundershowers were reported in the vicinity of both Corpus Christi and Galveston on the coast.

Meanwhile the thunderstorms that brought locally heavy rains to portions of West Texas Sunday night had generally dissipated.

Early morning temperatures rang-

ed from 60 degrees at El Paso in far West Texas while much of the southeastern twothirds of the state reported readings in the 70s, with Beaumont-Port Arthur and McAllen recording 77s.

Forecasters said temperatures would stay warm today, with readings in the upper 90s to near 102 expected in portions of Southwest Texas.

In addition to Dallas and Fort Worth, El Paso and Presidio reached the 100 mark Sunday.

Storms lash six states

By The Associated Press

Thunderstorms carrying gusty winds, hail and heavy rain over the South and central Great Plains states diminished overnight, with a few scattered storms roaming over parts of Texas, Colorado, Nebraska, the Dakotas and Kansas.

Southeastern Nebraska endured the severe storms that occurred after sunset, with hail the size of golf balls reported in Bladen. Flash floods were reported in Rapid City, S.D., with three cars in the parking lot of the Reptile Gardens tourist attraction reported washed some distance. No other damage was reported but peasized hail that accumulated to 11/2 feet fell

Cloudy or partly cloudy skies dominated the nation at sunrise, with mostly clear skies over Virginia and Alabama in the east and western Texas, eastern Colorado and the southwest desert regions.

Predawn temperatures across the nation ranged from 40 degrees at Sawyer Air Force Base in Marguette. Mich., to 83 in Blythe and Needles, Calif., and in Phoenix.

Professor elected

ODESSA-Dr. Thomas L. Dynneson, assistant professor of pedagogical studies at The University of Texas of the Permian Basin, has been elected a Fellow of the American Anthropological Association. Earlier this year Dynneson received funding for a research proposal, "A Three-Year Education for Rural Americans.

Prison escape still a puzzle

(Continued from Page 1A)

where the pipe came from, but one theory was that it was left over from a renovation of the 41-year-old prison several years ago.

Larry Hacker, a 32-year-old robber and safecracker, worked in the prison's plumbing plant - and so was dentified by officials as the most likely creator of the ladder. But Hacker, termed a "hard core, aggressive" prisoner, did not confirm this after his recapture early Sunday. He told interrogators he was "just walking by and saw the ladder. according to Henderson, who adds that he doesn't believe Hacker.

Prison officials concede the possibility of negligence, or worse, on the part of guards.

Bloodhounds sniff out Ray

(Continued from Page 1A)

the gate to the administration building.

Ray appeared tired but alert and wide-eyed. His hair was wet and matted and his clothes, a black sweatshirt and black pants, were covered with sand and mud. His face also was smeared with mud.

It was not known whether Ray had eaten during the weekend chase, said Warden Stoney Lane

He was examined by a medic and placed in a prison hospital. Lane said this was "routine procedure.

Lane said Ray would be placed in "administrative segregation" for three days while a hearing on the escape is conducted. "It is not solitary confinement, but his movements inside the prison are sharply restricted," the warden said.

Two assessed probated terms

Sentenced to five years probation Friday was Larry Mitchell who pleaded guilty to aggravated assault in 238th State District Court.

Diana Perez Friday pleaded guilty in 142nd State District Court to theft over \$200. She was sentenced to five years probation, a \$250 fine and restitution.

Mr. and Mrs. Darryl Masoner, 2601 A Roosevelt, a girl.

ties to the United States." Pak said, adding that he had known Park several years

Park, now living in London, has ignored a subpoena to give testimony to a federal grand jury here.

Pak's description of Park as an independent agent conflicts with evidence being gathered by Justice Department and congressional investigators. According to this evidence. Park was spreading money and favors for the regime of President Park Chung Hee.

Accused city editor resigns

ODESSA - Odessa American city editor John Sliney has resigned his position and will leave the paper in one more week, editor Olin Ashley said Sunday

Ashley did not comment on Sliney's future plans or on his replacement.

Sliney was indicted May 3 by an Ector County grand jury on a bribery charge

The newspaper and District Attorney John Green have been involved in a controversy which began several months ago when the newspaper printed a story linking Green with an ex-convict.

Juneteenth fete slated

Music, food, a bathing beauty contest, garage sales, bingo and a parade will be featured as part of the Juneteenth celebration at Washington Park June 17, 18 and 19. The celebration marks the day word of the Emancipation

Proclamation reached blacks in Texas. That day was June 19, 1863. For many blacks, the Juneteenth observation symbolizes their independence from institutionalized slavery

There will be a talent show and battle of the bands at 8 p.m. Saturday, and a bathing beauty contest at 8 p.m. Sunday

Enrollment figures

up 17.9 per cent

ALPINE-Sul Ross State University showed a 17.9 per cent increase in enrollment for the first summer session, registering 990 students on-campus through late registration.

During the first summer session in 1975, the university registered 840 students.

He said he once passed through U.S. customs a few years ago with \$10,000 in U.S. currency. These funds, he said, were from Japanese donors for Moon's Unification Church or for his own foundation, which has supported children's hospitals in Indonesia, the Philippines and South Vietnam.

On another occasion, Pak said, he may have returned from abroad with

House panel resumes energy plan studies

By JIM LUTHER

WASHINGTON (AP) — The House Ways and Means Committee, whose rejection of three White House energy proposals brought sharp criticism from President Carter, is about to decide whether businesses should get a new tax break for conserving fuel.

The panel will vote later this week on still another Carter energy proposal, one which would sharply increase U.S. oil prices and raise the cost of a gallon of gasoline by nearly. eight cents.

But heading the committee's agenda today was the President's. plan to give businesses a tax credit of 10 per cent of the cost of their investments in such energy-saving equipment as insulation and solar heating and cooling systems. Similar credits for homeowners and renters were approved last week.

While the Ways and Means Committee considers various energy taxes all week, the full House plans to vote on several appropriations bills for the 12 months that begin on Oct. 1.

Included are two bills that could produce the first veto of the Carter administration. The \$10.2 billion public works appropriation has raised the President's ire because of congressional insistence that funding continue for 17 water projects that he opposes.

The other bill would appropriate \$61.3 billion for the Departments of Labor and of Health, Education and Welfare. This bill, which carries money for numerous social programs, is about \$1.4 billion above what the President requested for HEW alone.

The Senate, meanwhile, will focus its attention on foreign affairs. Votes are expected this week on bills authorizing foreign-aid spending and increasing U.S. participation in international lending organizations.

The Ways and Means Committee, which handles all tax legislation in the House, ripped apart Carter's energytax proposals last week. The panel rejected outright a standby gasoline tax of up to 50 cents a gallon, which would go into effect only if conservation goals are not met, and turned down a plan for federal bonuses of up to \$500 for persons who buy fuel-efficient cars.

Carter's proposed tax on cars that get poor gasoline mileage was defeated in favor of a much milder version. And another panel, the House commerce subcommittee on energy and power, voted to remove price regulations from new natural gas, which Carter opposes.

The White House reacted quickly Presidential press secretary Jody Powell said Carter accused Congress of knuckling under to pressure from the oil and automobile lobbies.

He quoted Carter as saying, "The people of this country will be the ones to suffer if our hopes for an energy plan are thwarted. They will be the ones to pay for ... (Friday's) special interest victories."

In an interview Friday with magazine publishers, Carter said the public should apply pressure on Congress to counterbalance pressure from the oil and auto lobbies. "Unless the American people speak up," he said, "the special interests are going to prevail.

Government probers say Lockheed bill excessive

By MORTON MINTZ The Washington Post

WASHINGTON - Government investigators are contending that Lockheed Shipbuilding and Construction Co. built 12 war vessels for the Navy but billed the government for enough steel to build 20, The Washington Post learned Sunday.

The excess steel at issue - nearly 80 million pounds valued at about \$8 million — figures in disputed claims for \$62 million that the Lockheed Aircraft Corp. subsidiary has filed

against the Navy.

Investigations of the claims were begun in April, 1975, by the FBI, and in June, 1976, by the Renegotiation Board, the executive-branch unit responsible for recovering excess profits from defense contractors. In addition, one source told a reporter that federal prosecutors have been presenting evidence in the case to a grand jury for several months.

In Seattle a spokesman for Lockheed Shipbuilding said that LSCC "has been cooperating fully with the Justice Department's ongo-

ing investigation ... We are aware of no wrongdoing in connection with the claims and believe the department's investigation, when concluded, will bear this out. We will not comment further on this matter until the investigation is concluded.

A piece of the story is to surface today at a Senate Banking, Housing and Urban Affairs Committee hearing on a bill to strengthen the Renegotiation Board.

One part of the bill would require the board to look for excess profits on each product line in each division of conglomerate contractors such as Lockheed, instead of letting the contractors consolidate all their various costs and profit figures, as they can do now.

Renegotiation Board Chairman Goodwin Chase, in testimony prepared for today's hearing, says the board relied on a consolidated rather than product-by-product financial statement to conclude in 1974 that one major contractor had not earned excessive profits on government business during fiscal 1971.

time.'

The testimony does not name the

contractor, but a reporter learned independently that it was Lockheed.

Chase says a new analysis of data given only "cursory, inadequate review" three years ago shows that the company claimed a \$68 million loss that "was in fact a \$4 million pro-

Chase claims in his prepared testimony, on which he refused to elaborate Sunday, that under the proposed legislation board, in examining all the company's divisions separately, "would have unquestionably concluded that excessive profits existed

His statement cites - but does not name - one division of the company with sales of \$727 million that has been found to have had "a return on net worth of 246 per cent." This was a reference to Lockheed Shipbuilding, a reporter determined.

This division showed a loss of \$7 million for the period in question. But according to Chase's testimony, a board investigation found that the division, over a three-year period, had claimed to have purchased 73 million more pounds of steel than it needed to build 7 ships.

The ships he referred to are amphibious transport docks known as LPDs, which the Navy commissioned between October, 1968, and July, 1971. Each contains about 12 million to 14 million pounds of steel. Thus the excess was enough for at least five more

Other ships involved in the case are five destroyer escorts in the so-called

ed between May, 1970, and September, 1972. Each contains, according to Renegotiation Board staff investigators, 2.46 million pounds of steel, or a total for the five DEs of 12.3 million pounds.

PAGE SA

But in a report last July, which a reporter has obtained the investigators said LSCC bought 18.7 million pounds - about 6.4 million pounds more than it claimed to have used in the DEs.

Normally shipyards allow 10 per cent for scrap. LSCC allowed, for bidding purposes, 20 per cent, on the grounds that the DEs were a new class of vessel. Changes in plans added another 2 per cent, bringing the total accounted for to 15 million pounds - 3.7 million less than the 18.7 million purchased.

"As the steel did not end up on the ships and if LSCC's books are valid. the contractor purchased enough steel for almost three more ships instead of one ship, as indicated by the scrap and growth estimates," the report said.

The reference to the validity of LSCC's books is illuminated elsewhere in the report, where the in-vestigators said, "Both the Navy and the FBI reported that many records were destroyed and that it was impossible to trace entries on the books to source documents.'

The report said it was "theoretically possible" that some of the excess steel had ended up in a commercial ship and in a ferry for the State of

WASHINGTON - The Carter administration is on the verge of allowing construction of the controversial Seabrook, N.H., nuclear power plant, which has become a nationwide symbol in the battle over atomic energy.

Environmental Protection Agency Administrator Douglas M. Costle acknowledged that he has "made a final decision" to allow the plant to discharge 1.2 billion gallons of heated water into the Atlantic Ocean daily an issue that has held up construction since November.

However, he added in an interview that announcement of the decision has been delayed several days because "I want to go through the record one more time to make absolutely sure."

The \$2 billion Seabrook plant --while it was actually halted on grounds of water pollution rather than nuclear danger - has been considered a test of President Carter's nuclear policy.

Anti-nuclear activists who have fought the plant in the courts, in regulatory hearings and in demonstrations for five years have pointed

working capital. Call Pete Cody,

to Carter's campaign promise to make nuclear energy "a last resort." Pro-nuclear forces, including New Hampshire Gov. Meldrim Thompson Jr. and Public Service Co. of New Hampshire, which is building the plant, say it will provide crucial electricity to New England and relieve dependence on Arab oil another Carter goal.

The decision to go ahead with the plant conforms with the administration's emerging nuclear policy, as outlined in the energy program: to discourage the use of plutonium, from which bombs can be made, but to promote the building of conventional reactors such as Seabrook's.

Another situation where a nuclear plant conflicted with environmental goals was also recently decided in favor of the plant: Interior Secretary Cecil D. Andrus decided not to fight a proposed Indiana reactor on the edge of Indiana Dunes National Lakeshore. The 2.300-megawatt Seabrook plant had been granted a license by the Nuclear Regulatory Commission and was under construction last November when EPA's regional administrator in Boston, John

Locke

official

McGlennon ruled there had to be modifications in its cooling-water system to protect the delicate ecology of Seabrook's estuary

The plant would discharge a daily volume of water equal to the flow of a large river, 39 degrees hotter than ocean temperature. Large numbers of fish and aquatic organisms would be drawn into the 19-foot-wide water tunnels and "fried," McGlennon contended after reading 5,000 pages of administrative hearing testimony by the utility and environmental witnesses.

The utility appealed McGlennon's decision to EPA Administrator Russell Train, who left it to the Carter administration to decide.

"It's a very complicated case that has to be decided on very narrow legal grounds," Costle said, adding that he has "painstakingly" read the administrative hearing record.

"It has to do with the sufficiency of the record," he said. "The central issue is, can I find from that record the effect one way or another" of the plant on the environment? Costle's decision was scheduled to

be announced last Friday afternoon.

Reagan still travels major political trade routes

By WALTER R. MEARS

PAGE 4A

WASHINGTON (AP) - When Republicans start campaigning for president again, the new crop of can-didates will find footprints on the major political trade routes. Ronald Reagan is traveling them now.

All he lacks is an election, and Reagan hasn't let that discourage him. He is touring, speaking, writing and broadcasting his brand of

Republican conservatism as though the voters would be judging him next week

It's good for the cause - and the wallet. The standard Reagan speech fee is \$5,000, although he does some without charge to raise money for his political organization and, periodicaly, for the Republican party.

He is making 13 speeches this month. He is doing daily radio broadcasts, weekly newspaper columns.

Yellow Onions

Twice a month his views are featured, under his picture and over his signature, in the newsletter of his own political action committee, Citizens, for the Republic.

None of this proves that Reagan will try again for the Republican presidential nomination in 1980. But don't bet against it, despite his age (now 66) and his past defeats in that quest (two) And, if Reagan doesn't try again himself, the apparatus he and his allies are creating now will be there to serve the conservative of their choos-

ing. The old Reagan campaign organization is being tended carefully. It is knit together in two ways: through Citizens for the Republic, and through unpublicized, relatively informal meetings of 1976 campaign teams in various parts of the country. Citizens for the Republic is out

front, as the successor to Reagan's presidential campaign committee, and heir to the money he raised but didn't spend in losing the nomination to Gerald R. Ford.

The leftover campaign money comes to about \$1.5 million, a healthy political endowment. Something over one-third of the money is supposed to be repaid to the federal Treasury, but nobody has asked for it yet.

Reagan received federal matching

SAFEWAY

funds for his primary election campaign, and the unused portion of the government subsidy has to be repaid But the Federal Election Commission hasn't sent any bill yet.

BY

in Madison

By TIMOTHY HARPER

MADISON, Wis. (AP) — You see them everywhere, sigging and zagging through downtown traffic, parked in long shiny rows on campus and even whipping along the edges of 40-mile-per-hour thoroughfares. Madison, where two-wheelers

outnumber automobiles, may be the bicycle capital of the United States. And the city may be showing the way for other communities trying to cope with the energy crisis. In Madison there are kids on short

bikes with tall handlebars, bearded students on rusty one-speeds with balloon tires and businessmen who

THE MIDLAND REPORTER-TELEGRAM, MON., JUNE 13, 1977

strap briefcases to sleek European can afford," he said. There are even senior citizens

pedaling sedately down shaded residential streets on big tricycles. "We figure there are somewhere between 120,000 and 150,000 bicycles in Madison," said Jerry Tomczak, bicycle control monitor for the police department in this city of 170,000. "That's three bicycles for every two

He said the University of Wisconsin campus, with nearly 40,000 students, is responsible for much of the boom which has seen the number of bikes in town double since 1969.

"For a lot of students it's all they

racers.

cars.

However, he emphasized that other portions of the community are also beginning to rely on bicycles. "Besides the cheaper cost, it has

become a lot more popular for energy reasons. And some of it has to do with the traffic. You can make it a lot faster around town on a bicycle than about parking," he said. "There is a growing number of adult bicycle users," agreed Tom Walsh, a city traffic engineer who will

disburse up to \$300,000 on biking improvements this year.

He said surveys show that 68 per cent of all city residents are regular

bicycle riders, and three out of every four bike trips taken during the week are for work, school shopping or some other nonrecreational trip.

Tim McDowell, 22, a salesman at a large family bicycle shop across town from campus, said riders who bought 10-speeds in the past are getting bet2. ter bicycles as they come to depend on them more.

"We've had more interest this spring in the \$200 to \$300 bikes than ever before," he said. "People are concerned about energy, and the companies are putting out better bikes with better components."

"Adults are tending to see the icycle as a viable mode of alternate biavala ac

transportation," said Walsh, who said many people also begin biking for environmental and health reasons.

Officials said perhaps 4,000 bikes a year are stolen in the city, and there has been an average of two bicycle fatalities a year in Madison in the 1970s.

"The number of bicycle accidents is only 2 per cent of the total number of accidents in the city," Walsh said, "but about 90 per cent of the bicyclists involved suffer injuries."

He said that it's still safer to bike than drive a car because the odds of getting in an accident are so much less.

A Grand Old Flag

A great deal of information concerning Old Glory was presented during the '76 Bicentennial Year but very little concerning the flag has been seen or heard this year.

So, it undoubtedly is time to once again bring the Stars and Stripes into the spotlight.

And what better time to do this than on Flag Day 1977, which happens to be Tuesday.

And the very first thing that we can do on the morrow is to fly the flag which we honor on this special occasion.

And thanks to the Midland County Bicentennial Commission, which was most active prior to and during the Bicentennial Year, there are more flags to be flown in Midland than ever before. And it is encouraging to note that on recent holidays, more flags have been seen waving from housetops than at any one time prior to the Bicentennial observance.

So, let's each and every one of us unfurl Old Glory from our housetops on Flag Day.

This also is an excellent time to brush up on our flag etiquette, remembering that the U.S. flag should not be displayed on days when the weather is inclement.

The U.S. flag should never be displayed with the union down except as a signal of dire distress.

The U.S. flag should never touch anything beneath it -ground, floor, water or merchandise

The U.S. flag should never be carried horizontally but always

from a float except from a staff, or so suspended that its folds fall free as though staffed.

The U.S. flag may be displayed at night when it is desired to produce a patriotic effect.

And remember, please, that the U.S. flag always leads in a procession.

The United States flag should be on display in every classroom and in every public meeting place.

Someone has said that the American flag has given heart and hope and strength to Americans ever since this nation was born and that it flies today as a sign that Americans, proud of their country's stirring heritage. are determined to carry the American dream forward.

Flag Day is a great and meaningful annual observance. It is celebrated in memory of the day in 1777 when the Continental Congress adopted the Stars and Stripes as the official flag of the United States of America. It is not an officiai holiday, but the President each year proclaims a public observance.

Many persons have described the flag in various ways. Gen. George Washington, when the Star Spangled Banner first was flown by the Continental Army, is said to have described its symbolism as follows:

"We take the stars from heaven, the red from our mother country, separating it by white stripes, thus showing that we have separated from her, and the white stripes shall go down to posterity representing liberty

It means for us today a banner

of freedom, challenging

Americans always to live so as to

"I pledge allegiance to the flag

of the United States of America

and to the republic for which it

THE WASHINGTON JOURNAL: Carter vs. Congress budget battle builds

By JAMES CARY Copley News Service

WASHINGTON - The impending and very important battle between President Carter and Congress over government spending has been in the making for some time but is still only in its preliminary stages.

The present skirmishing is focused largely on four bills:

The farm bill, water projects the President doesn't want, school impact aid and the Labor-HEW appropriation bill for fiscal 1978. They involve a total of \$4 billion more in expenditures than the White House has asked for.

That isn't peanuts when added to the \$60 billion deficit already forecast for fiscal 1978 and \$184 billion in accumulated deficits since 1974.

But the \$4 billion, and the emotions it has and will produce, are apt to seem fairly insignificant when stacked up against the approaching struggle over the fiscal 1979 budget that Mr. Carter must send to Capitol Hill in January

That budget will be the first the President will have had a chance to shape from the beginning, using his zero-based budgeting techniques and applying his own theories of fiscal responsibility, including his pledge to balance the federal budget by 1981 only two budgets later.

To accomplish that goal Mr. Carter will have to begin closing the gap between federal revenues and outlays a deficit of \$60 billion next fiscal year - at a rate that would have to average \$20 billion annually over the next three budgets even if federal outlays remained at their presently projected fiscal 1978 level.

They won't remain there, of course, nor will the revenue total remain static. If all goes well, and the economy continues to expand as is now indicated, higher tax returns will close part of the income gap.

But even under optimistic projections Mr. Carter is apt to have to cut expenditures by as much as \$10 billion to \$15 billion or more annually to keep advancing toward that balanced budget he foresees in 1981.

And the difference between cutting \$4 billion from program levels that Congress wants and \$15 billion will probably be measured in decibels from the screams of anguish that will be raised as 535 congressmen and senators find out what has happened to their individual pet projects.

Then the fighting will become truly bloody and worthy of being called a "power struggle" between the legislative and executive branches.

Making this even more intriguing, if it happens, will be the fact that it would be a Democratic President battling a Democratic-controlled Congress for which has the final say over how the nation's money and credit are used.

Yet nothing is more certain in our government of divided powers than conflict between the executive and legislative branches no matter which party controls either one. The two branches have entirely different missions and compositions

The executive is unified. It responds through the President to a single national constituency as the President interprets the mood and needs of that constituency

Congress is diverse. It speaks at times with 535 voices, each representing its own piece of national turf. It is highly political. With 435 representatives and one-third of the senators having to be elected every two years, superficial political considerations linked to success at the polls can never be pushed very far below the surface. Their responsibilities are regional and provincial first, only national and international when conditions permit.

Intolerant educator

Albert A. Briggs believes that motivation is a prerequesite to learning and he's made his point in dramatic fashion to parents in the Chicago school district where he is superintendent.

He flunked half of the 1,289 eighth graders who expected to graduate from 16 schools because tests showed that they could not

read at even a sixth-grade level.

Briggs' approach acknowledges that schools are not performing their function if they turn out graduates unable to cope with daily life.

The students know that their superintendent is "tough." They also know that he cares.

INSIDE REPORT:

New vicious circle envisioned in the Middle East

By ROWLAND EVANS And ROBERT NOVAK

WASHINGTON - Extreme caution inside the Carter administration over Israel's new right-wing regime headed by Menahem Begin is clearly evidenced by the failure to invite Shmuel Katz, Begin's intimate political adviser and friend, to the White House during his recent visit to Washington.

A campaign to break down that caution and enlist President Carter as a full-fledged participant in traditional American-Israeli friendship is now at flood tide. But the gap is too broad for semantical bridging. Thus, some of Israel's most realistic backers here are looking to outside events — specifically, a reconciliation of Arab states with the Soviet Union to push political opinion here back in Israel's direction.

On a lengthy visit to the U.S. to whip up support for Begin, Katz used an emissary to sound out what would happen if he asked for an appointment with Dr. Zbigniew Brzezinski, Mr. Carter's national security aide. Pointedly, the chance to issue an invitation was passed up.

Although he is due back here shortly, Katz's first stopover did not lead to the White House. In fact, Brzezinski confided to intimates he did not know how he would react to a flat request from Katz. At any earlier time, the mere hint of a White House cold shoulder for the emissary of a prospective Israeli Prime Minister ould have been unthinkable.

This understandable coolness stems rom Begin's blunt post-election edict that the West Bank belongs to Israel.

Novak Evans

So. Israel's key backers here are beating a track into the White House on this errand: persuade Mr. Carter through his advisers and aides that Begin and his hawkish Likud party are really no different than outgoing Prime Minister Yitzhak Rabin and the Labor party.

One leading pro-Israeli lobbyist has made no fewer than three visits to the White House (though none to see the President) since the Israeli election. His message is the one that Katz has been delivering here and in New York: Begin accepts United Nations Resolution 242, which calls for the return of "territories" (unspecified) captured by Israel in the six-day war. in exchange for real peace and for what the Israelis call "defendable" borders.

Begin is portrayed as also accepting Mr. Carter's insistence on the return of all but "insubstantial" portions of the West Bank. He does so, Begin's agents here emphasize, because the President invariably adds that final borders must be a matter between the parties - Israel and the Arabs.

These semantical efforts to bridge the very wide gap between the

short. Jimmy Carter is the fourth President to take an ironclad position against any new Israeli settlements on the West Bank: Begin's first call after his election triumph was for "many" new Jewish settlements on the Arab West Bank.

So, political assets from events beyond the narrow Washington-Jerusalem channel are perceived by the pro-Israel bloc as essential to bridge the Carter-Begin gap, and the first may be the forthcoming meeting between Egyptian foreign minister Ismail Fahmy and Soviet foreign minister Andrei Gromyko.

Their meeting suggests relations between Egypt and the Soviet Union are in for a major overhaul, perhaps the beginning of the end of the fractured period starting in 1972 when President Anwar Sadat kicked some 14,000 Soviet "advisers" out of Egypt.

Sadat desperately needs Soviet spare parts and weapons to have any chance at all to match Israel's U.S. equipped forces. With Congress limiting Egypt to transport planes. Moscow is the only alternative.

Vienna talks between Fahmy and Gromyko have been rumored for several weeks, but Fahmy may now have decided to go to Moscow. That locale would heighten the dramatic impact of the talks and the change in Israel; but it would also have predictable political impact in the U.S. Congress.

In truth, however, Sadat and other Arab leaders could not be expected to show the same exemplary restraint of

President and Prime Minister will fall the past three years over U.S. mediated peace talks with an Israeli leader who proclaims West Bank settlement as a cardinal aim. Unless Mr. Carter can persuade those Arab leaders that he can change Begin's mind - or, far less likely, that Congress will use its power to twist Israel's arm - other Arabs will do what Sadat is doing in sending Fahmy to Moscow: look to the Soviets for

> help. That is the source of the other political assets for Israel. The closer the Arabs feel compelled to move toward Moscow, the greater will be Israel's political gain here. Accordingly, Begin's election may have started a new vicious circle, undercutting the Arabs' faith in the U.S. and sending them to Moscow. That in turn would intensify pro-Israel and anti-Arab emotions throughout the U.S. government, and especially in Congress

> > the small society

left, Helms is leading the Laetrile the Republican right, is leading brigade in a charge upon the Food and another ferocious charge against Drug Administration. The agency has the power not only The conservative crusader, his

to remove dangerous but ineffective drugs from the market. In the last few years, some 7,000 drugs have been banned from the United States because they have been found ineffective.

This offends Helms' sense of free enterprise. In a private letter to his Senate colleagues, he has complained: "The tremendous difficulty in proving a drug 'effective' has resulted in greatly increased costs to the consumer, decreased competition and innovation in the drug industry, and significant delay in the marketing of new drugs.

Countered a Food and Drug Ad-ministration spokesman; "These people are saying they do not want any government protection against fraudulent medicines." This could be dangerous, he suggested, for patients who abandon effective treatment for a drug that would do them no good.

Footnote: The bespectacled Helms, a diligent senator who puts in long hours and seldom misses a roll call, seems docile enough at his desk. But once aroused, he can be a forceful figure.

CARTER'S MAN FRI - A political changeover in Washington can produce some splendid gymnastics as the top officials scramble to switch course

Robert Fri, for example, is in charge of energy research. As President Ford's man Fri, he was a devoted proponent of nuclear energy. He solemnly called for production of the lethal fuel plutonium, despite the protest of environmentalists.

But as President Carter's man Fri. he now wants to store plutonium until a safer method is developed to use it in nuclear power plants.

BIBLE VERSE

And it shall come to pass in the last days, that the mountain of the Lord's house shall be established in the top of the mountains, and shall be exalted above the hills; and all nations shall flow unto it. - Isa. 2:2.

The government has imposed a 'porpoise kill quota'' on tuna fishermen, limiting the annual number of killed porpoises to 68,910. I don't know how you enforce that without putting a federal agent with a caulculator on every boat.

An environmentalist group, "Pals of the Porpoise," naturally wanted the amount to be lower. They should display pictures of adorable porpoises captioned "Don't ruin his chances of making a Disney movie.

I'm all for saving the porpoises. Show me one tuna who ever did five shows a day at Cyprus Gardens in Florida

In Washington these days, it appears that the recipient of most leaks is "Doonesbury." Don't be surprised if Jack Anderson and Evans and Novak enroll in art school

Some members of the House Ethics committee said that the comic strip, Doonesbury, is unethical. It's nice that they finally found SOMETHING unethical.

THE BIBLE **CAN YOU QUOTE IT?** By LAVINA ROSS FOWLER

1. The word "atonement" which means "at-one-ment" is of English origin and corresponds with the Hebrew "reconciliation." In Christian Science it means the "radical obedience and purification, exemplified in the life of Jesus, by which humanity finds man's oneness with What Israelite priest God.'' celebrated the first service of the "Atonement?" Lev. 8

2. What ecclesiastical title did Peter give himself in 1 Peter 5? 3. Why would frog-legs be accep-

table to the Mosaic dietary rules? Lev. 11:21

4. What is the lesson taught by the parable of "the lost coin."? Luke 15:10

5. "Lo, I am with you always even unto ----." Matthew 28:20

of Ore City; a daughter. Mrs. Debbie

Foryozewzze of Amarillo; his mother,

Mrs. May Darrow of Big Spring, and

McCAMEY - Alma Lacey, 71, of Los Angeles, formerly of McCamey, died June 6 in a Los Angeles hospital.

Services were to be at 2:30 p.m. today in South Union Baptist Church in McCamey with burial in McCamey Garden of Memories directed by Sheppard Funeral Home.

Mrs. Lacy was born Feb. 2, 1906, in Harrison County

Survivors include a son, L. A. McMairon of California; a sister, Peira Lee McCulloch of Los Angeles. and two brothers, O. L. Pettis of McCamey and Willie Washington of Fort Worth.

Allie Moore, 85, dies at Lamesa

LAMESA - Services for Miss Allie Moore, 85, of Lamesa were at 3 p.m. Sunday in the First United Methodist Church of Lamesa with the Rev. Alvis Cooley, pastor, officiating

Burial was in Lamesa Memorial Park

She died at 3:30 p.m. Saturday in a Lamesa hospital following a lengthy illness.

A native of Stewart, Miss., Miss Moore had been a 33-year resident of Lamesa and Dawson County. She was a farm owner and a member of the First United Methodist Church. Survivors include a sister. Carey of

Lamesa, and two nieces.

H. Darrow Jr. dies; rites set

BIG SPRING - Ross Darrow Jr. 48, of Ore City, formerly of Big Spring, died Friday.

Services were to be at 4 p.m. today in Nalley-Pickle Funeral Home in Big Spring with burial in Trinity Memorial Park.

Darrow was born in Snyder. He moved to Big Spring as a child and

Three Girl Scouts bludgeoned to death

LOCUST GROVE, Okla. (AP) - Three Girl Scouts were found beaten to death in their sleeping bags at a summer camp today, the Oklahoma Highway Patrol said

Initial details from the scene were sketchy, and police gave no indication whether there was any suspect in the case

The patrol said the bodies were found at Camp Scott in hilly, wooded country about two miles south of this Eastern Oklahoma community about 45 miles east of Tulsa

COM swimmers complete

week of breaking records

The seven-member relay team from the City of Midland Swim Team completed a week of swimming at noon today, setting a world record for the longest time swum by a relay team

The team actually set the record Sunday when it passed the mark set by a swim team in California. However, the team stayed with its original plan to swim a solid week. and beat the record by just under 24 hours.

This record is the fourth world record set by the team during the past week. In addition to today's record. the team set the record for the 100mile swim, the longest distance swum by a relay team in 24 hours and the 300-mile swim.

The team set the 300-mile swim record at 5:27 a.m. Saturday. Its record time was four days, 17 hours and 27 minutes.

The team covered a distance of

436.51 miles during its seven-day marathon. The City of Midland Swim Team is the first team to ever swim over 400 miles.

Coach Doug Ingram said the team will submit the 400-mile mark to the Guinness Book of World Records. which now has no 400-mile swim record listed.

Andrews trustees

to meet Tuesday

ANDREWS - The Andrews Independent School District Board of Trustees will meet Tuesday evening at the School Administration Building. The board will conduct a public hearing on the tentative budget, set the tax rate for 1977-78, accept bids on the building trades house and approve participation in Region 18 Education Service Center media services for 1977-78.

Other survivors include a son, two Don't SPEND the summer here ... ave here ABILENE - Services will be Tuesday at First Baptist Church in

Clyde for Mrs. Marion E. (Bettie) Jolly . 86. of Clyde, mother of Dr. Marshall Jolly of Midland. Burial will follow at the Clyde cemetery. Mrs. Jolly died Sunday night at an

Abilene hospital.

Born in Honey Grove, she moved to Clyde at an early age. She and her husband celebrated their 68th wed ding anniversary last December. Other survivors include her

husband, two daughters, three sons, 14 grandchildren and 13 greatgrandchildren.

Japan's Chako Higuchi plays an iron shot on the way to surprise victory in the LPGA championship Sunday

Higuchi wins by three

NORTH MYRTLE BEACH, S.C. (AP) — A jubilant Chako Higuchi said after winning the Ladies Professional Golf Association Championship Sunday, "It's going to be a great thing in Japan.

'I'm so happy, I'm speechless,'' the

ahead of Pat Bradley, Sandra Post and Judy Rankin, who tied for second with 282s and earned \$10,953 apiece.

Mrs. Higuchi said she deliberately did not look at the scoreboard until after the last of her five birdies, on the 15th hole. "It was not until that point she knew she w

back side, plus the 15th JoAnne Carner and Joyce Kazmierski tied for fifth at 283 and earned \$5,715. Mrs. Carner had the best round of the day, a 65, tying Kathy Mc-Mullen's third round for the best round of the tournament.

Albert, Pepper pace **Cubs over Dodgers**

BY TED BATTLES

Jeff Albert lost the first game of the series with San Antonio, but anyone who saw him snuff out the Dodgers on five hits at Cubs Stadium Sunday night might have found it difficult to believe this was the same guy

A 7-3 loser in that opener, the native New Yorker was a 7-3 winner in the game that gave the Midland Cubs a 4-3 edge in the Texas League series.

"The difference was the fastball," confided Albert after the game. "Tonight I could get it over. The other night I couldn't control it," and, as a result, walked himself out of the game with seven passes. Sunday he walked just three and only one figured in the scoring

"HE HAD a good fast ball and made them hit it on the ground." Manager Jim Saul said. "And he also had them swinging in front of the ball a lot with a good changeup.

Saul also was pleased with what first baseman Tony Pepper's 3-for-4 night might mean in the future. Tony didn't just go 3-for-4, he crushed the ball in the process.

The big Californian tripled into the right-center corner to the wall to start the two-run second, singled sharply to right in the two-run third and then got his best wood on the ball in the threerun fourth when he doubled off the top of the double deck fence in center Any place else and it would have been a 420 foot homer

"I knew I had a chance at hitting for the cycle that last time up and I was going for it," Tony admitted. However, he bounced out to third and didn't get a second opportunity

"IF TONY hits like that, it's going

Cubs averages 14 3 18 67 370 9 4 0-16 293 Steve Haug

watered at what that could mean. Pagel contributed a double and single to the Midland attack for two more rbi, 69 now for the year.

Ted Farr's two-run homer in the second gave San Antonio a 1-0 lead. The blow came after shortstop Steve Davis made one of the outstanding plays of the year to retire Cleo Smith. Steve went into the hole toward third to glove the ball and had no time to plant himself in whirling around and getting off a throw to first.

Then, on Jeff Leonard's routine grounder right at him. Davis fumbled the ball to set up Farr's homer.

"The first play was easy," said Davis with no sign of a tongue-incheek. 'I figured I had nothing to lose, so I just cut loose with the throw

the last time Jeff pitched. I booted one and then Charles Meyers hit a homer.

Pepper's triple, a hit batsman and singles by Steve Haug and Albert tied it in the home second. In the third, the Cubs ripped off five straight singles against first-game winner Mike Seberger for two runs, Joe Hernandez and Pagel producing the run-scoring

In the fourth, an error, Hernandez' run-scoring single and doubles by Pagel and Pepper made it 7-2.

ALBERT'S only serious trouble came in the seventh when Leonard singled, Farr walked and Mike Rushde singled to load the bases. But then Davis proved he's really on Albert's side by starting a double play. although the run scored.

CUBPRINTS - The Cubs are off today and Saul plans to hold a workout to go over fundamentals before the club leaves for Amarillo Tuesday and the series opener Wednesday night Carlos Lezcano bounced off the fence in right to rob Rick Ollar of extra bases in the first while Ollar came up with the defensive play of the night for the Dodgers, a diving catch after a long run to onehand Albert's sure-single ... Albert felt his fast ball was moving as well as behaving, but still feels his best game in a short pro career was a 17strikeout, no-walk game for Bellingham, Rookie League, last year.

Although you'd never have guessed from the way they played against the Cubs, Ollar wished the Cubs luck in their drive for the first-half pennant. "We don't like that El Paso bunch any more than you guys do.

Renault loss keeps LeMans

race alive

LE MANS, France (AP) - A record fourth triumph by Belgian Jackie Ickx in a Martini Porsche Turbo 936 may well have saved the Le Mans 24 hour endurance race for yet another year.

The triumph of the German car in this weekend's dramatic edition of the race dealt a severe blow to the ambitions and prestige of the Renault Alpine team, which had entered four cars and dominated the first part of the race only to see its entries knocked out one by one.

"We just cannot avoid coming back again next year," said Renault team manager Gerard Larrousse, himself a winner here in 1973 and 1974.

He was clearly referring to the \$350,000 the state-owned French company had invested in preparing the Le Mans team, hoping to sweep the event and then concentrate on Formula I racing starting early next month in the French Grand Prix at Dijon

"It would be silly to invest all that money and then give up as a loser.' one racing expert said after the stunning Renault defeat.

Without Renault and its drivers, the race would have surely become a minor event next year

Bert Campaneris, Texas shortstop, completes double play throw to first during doubleheader at Fenway Park Sunday.

THE MIDLAND REPORTER TELEGRAM, MON. JUNE 13, 1977

Bosox' sweep trims Yank lead

By The Associated Press

Boston pitcher Luis Tiant, hurling a complete game for the first time this season, gave up just three hits in leading the Red Sox to a 2-0 victory over the Texas Rangers Sunday as Boston completed a doubleheader \$weep

The Red Sox won the opener 3-2 when pinch-runner Rick Miller scored from third on Fred Lynn's sacrifice

Tiant struck out eight and walked none in evening his record at 4-4. The 36-year-old right-hander, who has won 20 games in three of the last four seasons, received all of the support he needed in the first inning when Rick Burleson and Jim Rice doubled and Carlton Fisk singled.

Boston's two victories coupled with New York's 6-1 loss to the Minnesota Twins narrowed the Yankees' American League East lead over the Red Sox to just one-half game. Twins rookie Paul Thormodsgard tossed a five-hitter and Rod Carew and Larry Hisle each hit two-run homers to down New York.

Chet Lemond, who hit a two-run homer in the sixth, reached first on an error to lead off the 11th inning, stole second, went to third on a throwing

error and scored the he-breaking run on a wild pitch as the Chicago White Sox defeated the Baltimore Orioles 6-

Milwaukee's Jerry Augustine hurled a seven-hitter to lead the Milwaukee Brewers to a 4-0 victory over the Kansas City Royals. Joe Rudi drove home five runs with a pair of home runs as the California Angels crushed the Cleveland Indians 11-4. giving Angels hurler Nolan Ryan his ninth victory of the season.

A pair of two-out singles by Ruppert Jones chased home two runs as the Seattle Mariners downed the Toronto Blue Jays 5-2. Vida Blue snapped a personal five-game losing streak, pitching the Oakland A's to a 7-1 victory over the Detroit Tigers.

Mike Tyson's two doubles drove in three runs and Hector Cruz added a solo homer as the St. Louis Cardinals downed the Los Angeles Dodgers 5-2. Jeff Burroughs smashed a three-run homer in the bottom of the ninth to lift the Atlanta Braves over the Philadelphia Phillies 5-3.

The New York Mets defeated the Houston Astros 3-1 as Tom Seaver tossed a five-hitter and Len Randle scored the winning run on a wild pitch. Gene Clines scored the tiebreaking, run on Bobby Murcer's sacrifice fly as the Chicago Cubs edged the San Francisco Giants 6-5.

Cincinnati swept a doubleheader from the Montreal Expos, 7-6 and 14-8. The Reds won the opener when pinchrunner Ed Armbrister scored on a ninth-inning grounder, then blasted Montreal pitching for 20 hits in the

Bears, Gophers try again today

OMAHA, Neb. (AP) - Don't tell Minnesota and Baylor-or the crowd of 8,869 that was in attendance Sunday night for the College World Seriesthe one about a tie being as exciting as kissing your sister.

They won't believe it

Tournament co-favorite Minnesota and Baylor battled to a 3-3 tie when rain forced the game to be suspended in the top of the 11th inning

Minnesota Coach Dick Siebert summed it up best, saying, "That was some kind of show for baseball fans There was something for everybody Maybe it wasn't beautiful, but it was one lot of baseball.

Along the way the crowd saw: -A submarine pitcher who walked 10, but still was around at the end.

-Minnesota's third base coach.ex major leaguer George Thomas. ejected from the game, then repor-

ST. JOVITS, Que. (AP) — It almost looked too easy

tedly making a comment about the afternoon drinking habits of some hitter Tarry Boelter

-A pair of intentional walks that came within an eyelash of forcing in the winning run.

umpires.

The game was moved to the evening after a brief afternoon shower and thus forced the two scheduled night games-Southern Illinois, 39-10, against Arizona State: 53-11, and California State-Los Angeles, 41-20, against South Carolina, 41-10 - to Monday night.

Baylor, 43-14, led 3-1 after six innings, thanks to some shoddy play. including two errors by All-American shortstop Paul Molitor of Minnesota. the No. 3 selection in the free agent draft last week

Facing elimination, Minnesota, 38-11, rallied for two runs in the seventh

on an error, a triple by Tim Loberg and a run-scoring single by No 9

In the bottom the 10th, Kenny Kolkhorst doubled with one out and Minnesota elected to issue two intentional walks around an infield out.

Dan Morgan, a 6-foot-4 junior righthander who throws nothing but submarine pitches-and at times extremely slow-ran the count to 3-1 and appeared to have walked in the winning run with his next pitch. But a delayed strike call by plate umpire Gus Steiner made the count to 3-2 and Fritz Connally grounded out on the next pitch.

"Give both pitchers a lot of credit." said Siebert. "They faced some very tough situations and continued to come through with outs when they had to

For a second straight night, Baylor had strong pitching-a seven-hitter by Burl Coker-but came away with nothing

"We needed that one," said Coach Mickey Sullivan, whose team lost 3-2 to South Carolina in 10 innings on an inside-the-park homer Saturday night. "That ole boy (Morgan) was a little unorthodox, but he's a good pit-

cher. The game was to be resumed in the 11th inning today.

And most of the crowd also witnessed some natural excitement on the field.

The sudden storm turned the infield into a pond before the ground crew could get it completely covered and lightning temporarily knocked out the lights twice and finally darkened the left field light towers. And it was only a losers' round

Sunday as Tom Klausler drove his Schkee DB-1 to victory on a wet track in the first race of the 1977 Can-Am Challenge series.

Going into the race, the Palatine, Ill., native was one of many given a chance to take the first race in the revived series. Can-Am racing was dropped following the 1974 season.

The race was a tossup because Jackie Oliver of England, the 1974 Can-Am champion, was absent due to Formula One commitments in Sweden

CHRIS AMON of New Zealand was the first of the favorites to drop out of the race, abandoning on the seventh lap with control problems in his Wolf Delara Americans Elliot Forbes Richardson in a Lola, Bobby Brown in a March and Randy Lewis in a Shadow dropped out with mechanical problems in the 15th. 22nd and 36th laps, respectively

But even before they dropped out, Klausler showed he was a cut above the rest by lapping all the drivers except Amon.

"It's a real driver's track, I'll drive up here any time," said Klausler, who has twice won Quebec's Trois Rivieres Grand Prix for Formula Atlantic cars.

IN SPITE of his huge lead, Klausler's victory was in doubt on the 28th lap when he went into the pits for a long stop for gas and a change from rain tires.

"I didn't think it lasted four mnutes." he said of the stop that had fans wondering if he was out of the race. His car requires that the whole rear end come off to change tires.

"We'd better cut the back off before the next race.

During the stop, Horst Kroll of Toronto and John Gunn of Miami, both driving Lola's, surged ahead by more than a lap. But Klausler came back and overtook both cars, with Gunn finishing second and Kroll third

Former Midlander takes new post

J. B. Davenport, former division engineer for Halliburton Services, has been named manager of the North Sea Division of the company's international operations at Aberdeen. Scotland.

J. B. Davenport

Davenport joined Halliburton in 1960 as an engineer in South Texas. He received a Petroleum Engineering degree from the University of Corpus Christi

He served as a district engineer, assistant district superintendent and district superintendent in South Texas before coming to Midland in 1974 as division engineer. He transferred to

International Operations in 1976 when he went to Aberdeen as assistant manager of the North Sea Division. Halliburton also has promoted K. R.

K. R. LeSuer

LeSuer to assistant manager of its British Isles, Europe and Africa Region

He has moved from Aberdeen to London. He had been North Sea Division manager at Aberdeen since

LeSuer has been with Halliburton since 1959 after receiving a degree in Petroleum Engineering from Texas A&M University. He worked in New

Mexico as an engineer and transferred to Australia as an engineer in 1966. He later was area engineer at Singapore and then became division manager in Indonesia in 1972.

J. E. Vick

J. E. Vick, vice president-International Operations at Duncan, Okla., has been elected to the board of directors of Halliburton

Vick, with Halliburton Services since 1947, was elected vice president in 1975. He had served as president of Halliburton Services Ltd. in Canada before returning to Halliburton Services' headquarters in Duncan in early 1975.

Champlin consolidates operations

FORT WORTH – Exploration and production operations of Champlin Petroleum Co. have been combined into one department under Bobby F Abernaty as vice president-Exploration and Production.

The announcement was made by William T. Smith, president of Champlin

'Consolidation of Champlin exploration, development and producing operations will provide more direct and effective

management of our long-range program to enhance our crude oil and natural gas positions." Smith said

Smith also announced that Edward H. Chittick Jr. will transfer from Fort Worth to Houston as vice president and regional manager. Formerly vice president-Exploration, Chittick now will be responsible for the exploration and production activities of the Houston Region.

Frank L. Jones, vice president, will transfer from Houston to Fort Worth

and assist in the operations of the newly-formed department. He will have responsibility for budgeting, administration, planning and producing property acquisition.

The consolidation follows the realignment made in early 1976 to place more emphasis on regional management with vice presidents headquartered in the regions where Champlin's major oil and gas programs are being conducted, Smith

Nuclear plants repair could cost consumers

By JOANNE OMANG

The Washington Post WASHINGTON - Virginia's two nuclear power plants, Surry I and II, will be shut down for \$60 million worth of major repairs next year because of a problem that has the nuclear energy industry worried nationwide.

Virginia consumers, who may be asked to underwrite the repairs, also may have to pay for the more than \$54 million in coal or oil that must be burned to provide power while the nuclear plants are closed, according to a spokesman for the Virginia

The plants could be closed for as long as three months each, for a total six-month period of reduced production

The problem, called "denting," is the subject of a \$40 million research effort by the nuclear industry.

So far, over the last two years the problem has shown up in 14 of the 38 plants that are technologically susceptible to it, according to Vic Stello, director of the operating reactors division of the Nuclear Regulatory Commission (NRC). In four of those cases, including the two in Virginia, Stello described the damage as "extensive.

Denting is the term used to describe a buildup of a substance around pipes containing the water that is superheated by the nuclear reactor. The substance buildup eventually strangles the pipes, causing cracks and leaks

VEPCO has already ordered six new Westinghouse steam generators — at \$10 million each — to replace the ones damaged by denting. The complex replacement operation, the first such one ever conducted in a U.S. utility, will involve cutting holes into the protective containment walls of the nuclear reactors, removing portions of the steam generators, and cutting the pipes that cool the heart of the reactors

"Installing the (steam) generators in the first place was a whole lot easier than this will be, because now we have to go through the containment ... wall to get to them." said James Wittine, electrical engineer of

the NRC. "Nuclear power gets a lot more publicity and it's a lot more spectacular, but I'm not so sure that the economics of a coal plant are so different. They also shut down for major maintenance. The most economic fuel source is still nuclear.' he said.

The denting problem is complex, involving all three of the water systems that make up a nuclear power generator. The first water system flows around the nuclear reactor itself, carrying the heat produced away. This water is superheated to more than 650 degrees Fahrenheit but is kept under tremendous pressure so that it does not boil

Pipes carrying the superheated water are in turn surrounded within the steam generator by water from the second system, which is heated and allowed to boil to make steam. The steam is then carried away to drive the turbines that produce the electric power.

After passing through the turbines. the steam flows over the pipes that make up the third system. The third system's pipes contain cold water from the outside. And, after passing over the cool pipes, the steam is condensed back to water and returned to the steam generator for another round of heating

Denting occurs on the outside of the primary system pipes where they pass through support plates inside the steam generator, like spaghetti through a sieve.

For reasons that are still debated, a substance called magnetite or "green grunge" builds up around the holes in the plates, pinching and denting the primary system tubes. Eventually they crack and leak and have to be plugged as useless. ''The question becomes an

economic one very quickly," said Stello of the NRC. "When 20 per cent of the tubes are plugged, the plant might have to operate at less than 100 per cent of capacity. The Surry plants are at a point where further plugging could cause that." A VEPCO spokesman said 18.5 per cent of the

primary system tubes were already plugged in Surry I and 16.8 per cent in Surry II.

Florida Power & Light Co. has the next most severe denting problem after the Surry plants. Its Turkey Point III and IV units have 5.5 per cent and 7.5 per cent of their primary system tubes plugged. Florida Power & Light has ordered six replacement steam generator "tube bundle assemblies" for \$10 million each from Westinghouse for delivery beginning in 1979. The company estimates total cost of the units and replacement fuel and labor at \$380 million.

A spokesman for Florida Power & Light said repairs there could take nine to 11 months for each unit. "We still hope the problem could be solved and the process arrested so that we won't have to replace the units," said Charlie Scheer, the spokesman. He called the \$60 million order for new units "a hedge" because of the 21month delivery time.

Denting has also occurred in California's San Onofre nuclear power plant and New York's Indian Point, which use salt or brackish water - as do the Surry and the Florida plants - for the third cooling water (condenser) system. That was at first thought to be significant, but Stello of the NRC said denting has also been found at fresh water coolant plants: Palisades on Lake Michigan, Point Beach in Wisconsin and the Ginna plant on Lake Ontario.

Denting is much less in some plants than in others and just why perplexes officials. "The industry is kind of tied up in knots trying to answer that question right now," said Ron Britt of the San Onofre, Cal., plant headquarters.

The \$40 million research effort on denting by 19 utilities will be conducted by the Electric Power Research Institute (EPRI) of Palo Alto, Cal. It will investigate the water chemistry problem as well as the kinds of metals involved, and will check design factors while trying to find a way to reverse the buildup of the "green grunge," according to company head Chauncey Starr.

"I expect they're not going to just ask their The Washington Post stockholders to pick up the tab," he JEDDAH, Saudi said. Arabia — just how rich is

Some industry sources ridiculed VEPCO's repair estimate of \$60 million as too low and said it could cost five times that amount since labor costs will be substantial

Costs of the coal and oil needed as replacement fuels cannot be estimated now for next year because of the unpredictable world energy situation, Wittine said. However, he said it would cost between \$215,000 and \$300,000 a day if the repair work began now, he said. Energy costs are expected to rise in the next year.

The two Surry plants produce 22 to 23 per cent of all power in the VEPCO system. Company spokesman Doug Cochran said the utility hopes to have the North Anna plant in Louisa County operational by the time the Surry repairs begin, although North Anna faces strong opposition from citizens' groups.

Spokesmen for each of four nuclear power companies contacted agreed that their plants remained reliable and had already paid for themselves, often twice over, in fuel savings costs to consumers.

"If these were coal-fired plants, such a conversation (about costs) wouldn't be going on," said Stello of

AUSTIN - The Railroad Commission of Texas' Oil and Gas Division has set 14 additional dates for hearings to review reservoir performance and re-determine the most efficient rate of oil, gas and water from major Texas oil fields.

As of June 9, the division had conducted hearings on 10 fields out of more than 30 that are on the review schedule

All hearings are being held at the commission headquarters in Austin. The newly-posted schedule of hearing dates are:

Hastings, West field in Brazoria and Galveston counties, Aug. 16; Hawkins in Wood County, Aug. 23; Anton-Irish in Lamb and Hale, Aug. 30; Fairway (James lime) in Anderson and Henderson, Sept. 7; Slaughter in Cochran, Hockley and Terry, Sept. 13: West Ranch (Greta and 41-A) in Jackson, Sept. 20; Wasson in Gaines and Yoakum, Sept. 27.

And, Tom O'Connor (5.900 sand) in Refugio, Oct. 4; Seminole (San Andres) in Gaines, Oct. 13; Neches (Woodbine) in Anderson, Oct. 18; Kelly-Snyder in Scurry, Oct. 25; Claytonville (Canyon lime) in Fisher. Nov. 1; Yates in Pecos, Nov. 8; and East Texas in Upshur, Gregg, Smith. Cherokee and Rusk, Nov. 15.

CALL OR WIRE

Pipeline personnel ready

By ROBERT WELLER

PRUDHOE BAY, Alaska (AP) -Standing in front of a wall of flashing computer lights that would make a mad scientist proud, technicians wait for the order to begin sending oil through the trans-Alaska pipeline. The order is due June 20, but it

probably could be carried out now.

"We could pump oil right now, says Mike Jens, who is in charge of operations at Pump Station 1 for the Alyeska Pipeline Service Co.

That station is where the oil from the richest oil field in North America begins to flow down the 800-mile-long tube

Alyeska is the consortium of oil companies which have built the \$7.7 billion pipeline

Jens says Alyeska is taking nor chances with an early startup.

"We wouldn't feel comfortable starting up now, because we couldn't pump oil reliably ... that's part of startup, to make sure your equipment is relable," he said.

Testing last week, for example, showed that an important valve was malfunctioning. It had to be flown to Texas for repairs.

And there are "continual lastminute problems," Jens added, "We have put a number of hours on all the equipment so that when we push the button on that magic day we have a great deal of confidence that things will work

Henry Moller, Alyeska vice president for operations, agreed that oil flow could start earlier than planned but added, "We don't do things in a great rush. Everything should be so practiced that it looks like they are doing it just one more time.

Alyeska has another reason for sticking to the June 20 date.

'We made a commitment to the federal government not to start until we gave 60 days notice. June 20th is the 60th day," Jens said.

Before oil reaches Pump Station 1. it must be extracted from the ground and processed. Two of the eight pipeline owner-companies - Atlantic

Richfield and British Petroleum are responsible for that.

Both collect the oil at what ARCO calls flow stations and what BP calls gathering centers. There the oil is separated from gas and water before being sent slightly less than two miles to Pump Station 1.

Ben Odom, manager of ARCO's Prudhoe Bay operations, says both companies are ready to begin delivering oil.

"We are in communication with Alyeska and BP on a daily basis ... we will do what they want us to do, when they want us to do it," Odom said.

Alyeska handles the oil once it reaches the pump station. Moller compares it with "giving the keys of your car to your son. He has custody, but it's your car."

Each owner-company gets its share of the oil once it arrives at the ice-free port of Valdez, the southern terminus of the line.

Alyeska expects it to take 30 to 45 days for the first oil to reach Valdez. Normally it would take much less time, but the flow will be restrained so the line and pump stations can be monitored carefully for leaks and mechanical problems.

In Valdez the oil will be loaded into tankers. Nobody knows for sure where it will go from there.

There are several proposals to build pipelines from the West Coast to the Midwest or to use parts of existing pipelines, as well as talk of sending the oil to Japan in a swap for Middle Eastern oil that then would be sent to the Northeast.

Another idea is to ship it through the Panama Canal to ports on the Gulf of Mexico. Still another scheme would be to use railroad tank cars to get the crude to the Midwest.

Odom and his BP counterpart are concentrating on making sure they can supply the 600,000 barrels the pipeline is scheduled to carry each day after startup.

Each company is to supply 300,000 barrels. Preparations so far include trial runs in which "we pretend to open the valves. The man will walk to the valve and he will say, 'I am opening this valve.

"It looks kind of silly, but we don't want to ask him to go open that valve and find he doesn't know where it is,' said Odom, who has been with the pipeline from the start

Two full-scale drills are planned this week

When the order to turn the oil loose is received at ARCO's Flow Station 1. Dexter Smith and John Harville say they'll be ready.

Harville, who also moved to Anchorage from the Southwest, is a flow station operator. He follows the oil that comes from the wells into the station and out to Alyeska.

Like most of the employes, he works seven days a week. 12 hours a day. Then he gets seven days off, and ARCO pays the air fare to Anchorage.

"We've been kind of spinning our wheels," Harville said. "We're anxious to get going with production.'

Smith doesn't have Harville's years of experience in the oil industry. Two years ago he gave up a teaching career to take a job here.

Since then, he has been trained extensively to handle the computer terminal that runs the two dozen wells ARCO controls. He's getting paid twice as much as he did for teaching while working fewer days.

The computer that governs pipeline flow is in Valdez, but there's a telephone hot line to Valdez on Smith's desk, as well as a phone labeled "Startup"

A lot of workers are waiting for that phone to ring.

At Pump Station 1, Jens takes no small measure of pride in the workers' ability to meet the construction schedule set four years ago. Alyeska has promised all along to be in operation by July 1, 1977.

Jens says, "It is really something to set a date four years in advance and go through everything that we've gone through and get it done on time, and it means a lot to a lot of people up here.'

porary liquidity," Abul Khail said. He and **RRC** slates 14 hearings end of this decade and

THE MIDLAND REPORTER-TELEGRAM, MON., JUNE 13, 1977

Carter Korea plan dates to 1975

By DON OBERDORFER The Washington Post

WASHINGTON - Jimmy Carter's decision to withdraw ground troops from South Korea goes back at least to January, 1975, and the earliest days of his campaign for president. His original idea was to pull out all U.S. forces - ground and air - and to negotiate assurances from China and the Soviet Union that North Korea would not invade the south.

The origins and evolution of Carter's ideas are of unusual importance, because his campaign stand has been translated directly into U.S. policy with a minimum of official review. In order to avoid a battle within the government, a National Security Council study leading to the U.S. withdrawal plan did not question whether American ground troops should be removed, but focused instead on how they should be removed.

As sent to the White House in mid-March, the council's Presidential Review Memorandum 13 acknowledged that there are differences of opi nion about the troop withdrawal policy and that the impact of it is difficult to predict.

At the explicit instruction of Secretary of State Cyrus R. Vance, however, the State-Defense-Central Intelligence Agency study accepted as its premise Carter's previously announced conclusion that the troops should be taken out.

Without making an overt recom-mendation, PRM-13 reported the carefully hedged view that the risk would be within acceptable limits, provided that the withdrawal of ground troops were carefully managed, that essential U.S. support elements remained, that adequate commpensation be supplied to South Korea for the reduction in its defense capacity and that other U.S. actions did not send the wrong signals to North Korea.

While after-the-fact justifications have been made public, there is no indication that the government review considered Carter's own reason for the pullout, and some responsible officials have conceded that they do not know what they are.

Maj. Gen. John K. Singlaub, who was relieved last month as chief of staff of U.S. forces in Korea after publicly criticizing the withdrawal. told Congress that the Joint Chiefs of Staff never gave its Seoul command a reason for the planned withdrawal. despite requests for an explanation.

About the closest thing to serious governmental scrutiny of Carter's decesion was a special National Security Council meeting, which was convened to hear the reservations of Central Intelligence Agency Director Stansfield Turner. Informed sources said that after hearing Turner's misgivings. Carter issued orders in early May that the troop-withdrawal plan proceed

A CIA staff briefing, which presumably reflected Turner's views. caused heated discussion Friday in a closed meeting of the Senate Foreign Relations Committee. The committee decided to ask for the text of a CIA estimate that was prepared in connection with the withdrawal plan.

Carter, in response to an inquiry about the origin of his views, replied through press secretary Jody Powell that they arose from his "basic inclination to question the stationing of American troops overseas." Powell quoted him as saying that keeping troops abroad "is something you need a good reason to do." and that Carter "has yet to see a convincing argument keeping those troops in Korea in perpetuity. Powell went on to point out that

Carter has taken a different position over many months about U.S. troops in Europe, never saying that he believes they should be removed.

Carter told another White House aide that he began to form his troopwithdrawal ideas before 1975. The Nixon administration's action in the early 1970s to remove 20,000 U.S. troops from Korea was said to have been a factor

In the background of Carter's views and to some who know him well. fundamental factors - are his Naval Academy schooling and his early career as a naval officer. The stationing of ground forces in exposed and static positions abroad is counter to traditional naval thinking. Air and sea power operating from offshore. augmented by mobile landing forces if needed, are the preferred solutions of naval docrtine as well as the "Nixon Doctrine" enunciated in 1969.

Several of those whom Carter consulted in 1974 and early 1975 believe the deployment of U.S. ground troops in South Korea is especially dangerous, because they are a "tripwire" intended to guarantee nearly automatic U.S. involvement in any new Korean war. Though Carter did spell out to these advisers the basis of his views, some of them believe the "tripwire" danger is central.

Retired Adm. Gene R. LaRocque. director of the privately funded Center for Defense Iformation, recalled a telephone call from Carter asking about U.S. troops in Korea while Carter was still Georgia governor. LaRocque said he told Carter that

either North Korean President Kim II Sung or South Korean President Park Chung Hee or their successors 'could get us involved in a land war in Asia. and it would tear this country apart.'

The retired admiral added that, "We have to think of the Middle East and Europe. On a scale of importance to us, I'd put Korea about 1 and the Middle East and Europe about 10.1 Carter listened carefully but did not disclose his own views, LaRocque said

On Jan. 16, 1975, a month after declaring his candidacy for President and two weeks after leaving the governorship of Georgia, Carter told a meeting of the editorial page board of The Washington Post that he favored taking U.S. troops out of Korea and would be prepared to begin as soon as he became President.

Editorial page editor Philip L. Geyelin recalled that Carter said he would remove 5,000 troops as a start - remarkably close to the 6,000 who reportedly will be withdrawn during the firts year of the new U.S. plan. In the discussion with the Post editors. Carter spoke of the troop withdrawal from Korea largely as a moneysaving measure in the context of better defense management, Geyelin said

Seven officials of the Brookings Institution discussed Korean and other diplomatic and military issues with Carter in a four-hour meeting on Jan. 28,1975, at the organization's Washington headquarters. Stuart Eizenstat, the aide who accompanied the fledgling candidate, said recently the Brookings sesison was "a significant development" in Carter's think

BRIDGE Disregard mother on problem hands

Suppose South has A-K-Q of hearts. He can draw trumps and give up three clubs. A dull hand to read about.

In the actual hand South has no such cinch. If he draws trumps he will lose a heart and three clubs.

The correct play is to draw no trumps voluntarily. South wins the first trick, cashes the ace of clubs and gives up a club. South takes the trump return and gives up another club.

TWO CHANCES South will be safe if the missing clubs break 3-3 since his last club will be good. The other chance is that the opponent with club length will be out of trumps; and this happens to be the case

South wins any return and ruffs his last club with dummy's king of trumps. This is the trick South loses if he draws trumps

In actual play you get many hands that present no problem. You draw trumps in such hands, but you wouldn't enjoy reading about them. Follow Mother's advice when you can see at the beginning of a hand exactly how you are goint to play each trick. Do your own thinking (and leave trumps alone) when you can see a problem coming up DAILY QUESTION

Partner opens with one heart, and the next player passes. You hold: S-98; H-Q104; D-KJ64; C-KJ76. What do you say

ANSWER: Bid two clubs. You are too strong for a raise to two hearts but not strong enough for a jump to three hearts. Bid a side suit and show heart support later to show this amount of strength

Midlife letdown serious problem

Joe,"'recounted Fred Replogel, now retired from the international industrial psychology firm of Rohrer, Hibler & Replogle in Chicago. "He used to be a top performer, but now his company discovers he's not really interested any longer in promotion and he's no longer performing. If Joe would talk about what he's going through, he'd find he had a lot of

cohorts. For some, the answer is a career change, Replogel said. "Multiple careers go with better health and longer life. I think we're going to see more of them.

But the problem is that too often the career change is an unreasoned one. Edmond C. Hallberg, an education

Truckers' problems affect crops

By MILLER H. BONNER JR.

HARLINGEN, Tex. (AP) - Lower Rio Grande Valley produce growers and haulers say nearly a million dollars worth of fruits and vegetables destined for Midewest and East Coast markets rotted in the fields this year because of an acute shortage of refrigerated trucks needed to haul the produce out of the Valley

Terry Neal of Starr Produce Co. Rio Grande City, said "Every year we have a truck shortage during our peak season, but this year it was exceptionally bad.

"For about two weeks, we couldn't move any of our produce. It probably cost us between a quarter and a half million dollars.

'We were shipping about 25 to 30

can or they rot.

Growers said they were forced to either ship produce via more expensive refrigerated rail cars or sell to nearby Texas markets at a cheaper price.

'We had a few less trucks available this year because so many things are working against the truckers," said Deberry

Millard Holden, former president of the Independent Produce Haulers of America and a Rio Grande Valley trucker, said the governmental regulations forced on haulers are driving the little man right out of business

"I used to have nine trucks. Now I have two," he said Friday from his Pharr office.

"Insurance rates have doubled. The

Farm roundup: big ones sell

Holden said truckers must file forms every three months for each state they travel through reporting mileage travelled in that state and the amount of fuel purchased

"If you took the family on a vacation and drove through eight states, how would you feel about buying permits in each state?" he asked

'The bookwork is stifling me,' he said

"You can imagine what a man with one truck just trying to make a decent living thinks of this business.

Holden said he paid between \$14,000 and \$15,000 per truck in taxes and permits last year.

"The tax doesn't bother you. What's costing me money is keeping up with all the paperwork

they'll tell Congress, 'Hey, we need \$6 billion or we're going to have to shut down all those trucks.

Holden continued, growing angrier by the minute

"The federal government raised the weight limit to 80,000 pounds and 37 states ratified it, but the rest stayed with the old limit of 73,280 pounds. Now if I'm carrying 80,000 pounds and hit the Mississippi state line, I can't go any further because that state is still on the old weight limit.

"That's just like putting a Berlin wall around the state

"President (Gerald) Ford was going to do something about this, but; of course, that administration is gone.

"I've been talking with the Carter people about it, but Carter doesn't have anybody who knows a hill of

By JOHN F. LAWRENCE The Los Angeles Times

The man is a top-flight manufacturing executive, respected by his superiors and employes alike. Yet at age 45 he has begun to question his own ability.

At one point he even went to his boss and offered to resign, an act he knew almost immediately was irrational. He also realizes that he has begun to snap at his wife for no reason.

A 44-year-old partner in a suc cessful restaurant chain suddenly dissolved the partnership and without warning, sat down with his wife to ask whether their marriage was worth continuing.

A 37-year-old production manager

for a computer company, his marriage already on the rocks, began dumping all his office responsibilities on subordinaters, some of them untrained to handle them, and filling his own day with unimportant work.

There have always been jokes about a male menopause, but many experts don't think it's so funny any more. They call it the midlife crisis and they insist it's getting to be a major problem for individuals and for corporations whose employes are affected by it.

It's an important factor in divorce and career changes in middleage and may explain why previously successful workers suddenly lose their effectiveness.

Moreover, these experts contend. only a handful of big companies appear to recognize that the problem exists. Fewer have active programs to deal with it

"The midlife crisis has been around a long time, but not with the kinds of consequences you're seeing now, said Homer R. Figler, a psychologist at Ernst & Ernst in New York with 25 years of experience in counseling executives.

The fast pace of modern life, plus the breaking down of some traditional values are intensifying the emotional stresses of this period in life, he maintains. Divorce, extramarital affairs and job-hopping are all more common because there is less stigma attached to them now.

Managers and professionals have no monopoly on midlife problems, but psychologists say the impact generally is worse on the highly career-conscious individual.

"Corporate life in particular encourages a man to slight all other aspects of his personality to fit the narrow role of organization man, wrote Gail Sheehy in her bestseller. "Passages." "If he has learned well the lessons of conformity, he will believe that his work performance is the only criterion of his worth.

The crisis may come when this creature of the company begins to recognize that he is not going to make it to the top, or that the position he sweated so hard for and finally got isn't all he expected. About the same time, he may become a bit more conscious of his age and begin thinking for the first time about retirement. Generally, he realizes that he is not a superman.

Meantime, at home, his wife, freed finally of the burden of raising the children, branches out on her own, maybe into a career, and that puts added stress on the marriage.

Is it primarily a problem for males? Psychologists say women with similar career backgrounds face it, too. But while the physiological midlife problems of women have been studied for years, only in recent times is attention being paid to the male.

'Men are so damned nondisclosing - they think they're sissies if they talk about such feelings," observed Herbert Levitt, a professor and director of the associated clinics at California State University, Los Angeles.

professor at Cal State Los Angeles and author of a new book, "The Grey Itch," on the midlife problem, calls it "the Gauguin syndrome" - after the French artist who dropped out and went to Tahiti.

Psychologists complain that they have had little success in interesting corporations in dealing with midlife problems - even though doing so might pay off in better performance by employes.

"I was talking about this with the personnel director of one large company and his reaction was, 'Well, these people ought to be glad they have a job these days," recalled Verne Walter, a consulting psychologist in Santa Monica.

'Management really spends very little time on people problems — there are very few one-on-one meetings," insisted Clark B. George, a La Jolla, California-based management consultant and former president of CBS radio

In an attempt to stimulate corporate activity, the American Management Assns. in New York has launched a series of one-day conferences across the country through its National Center for Career Life Planning. The center, established last year, has issued what it calls a 'declaration of independence and opportunity for older Americans." and deals with both the midcareer problems of people age 40 to 60 and with post-60 problems.

One of the rare corporate efforts on midlife problems was born of adversity at the defense and space systems group of TRW. It began with the heavy layoffs at the time of the space program cutbacks in 1970 and 1971. Trying to help laid off managers and professionals find other jobs, "We discovered many people felt immobilized, they didn't know what else they could do," explained Sam Shirley, director of training and organizational development at the TRW unit

That was true even though the bulk of the people were only in their 30s or 40s and earning \$25,000 a year or more

Out of that experience. TRW has developed regular career-goal workshops for 20 to 30 employes at a time. The workshops try to stimulate personal planning by the individual. looking at his or her own strengths and motivations.

They examine questions like, "Do I have a need for power?" And participants are given a clearer idea where to go to get information about other jobs, mostly within TRW.

"A lot of people move laterally within the company as a result of these sessions," Shirley said. "Not everyone necessarily wants to be promoted.

The TRW unit posts about 800 jobs weekly. The workshops probably help to overcome some of the inertia and fear of taking a new risk that keeps the typical employe from going after one of them.

Special vernacular on tapes helps blacks read better

delay

EDITOR'S NOTE - There are many ways to say the same thing. Therein lies the problem. They grow up on the streets, pick up their brothers' jive. Then comes school and reading words alien to them. They lose interest, fall behind in their work. Now comes a course called Bridge. closing the gap between ghetto slang and English grammar.

By DANIEL Q. HANEY

AMHERST, Mass. (AP) - The first thing the black students hear is a tape-recorded voice telling them: "If you sittin' in this class, you don't be readin' any too cool.

In silky, knowing tones, it in-troduces a new reading program to black youngsters who made it into high school without learning to decipher the printed page.

The words are the same as the kids'. The course assumes these youngsters are illiterate because the writing in books - the language of middle-class blacks and whites -- is incomprehensible to children of the ghetto.

"This here readin' program is really kinda different," says the voice. "It was done by a brother and two sisters, soul folk, ya know? And they put something extra in it for ya.

They put a little touch of jive." Like the tape, the textbooks in this program are tinged with soul. When students start, all of their course material is written in the dialect of

poor blacks.

As they progress, their books contain more standard English and less black vernacular. Finlly, if all goes well, the children are reading from textbooks commonly used in classrooms.

"It's about some of the most interesting people in the world, black people, and you know how interesting bloods can be," the voice says. "Now the reason we do this is so when it come to what you don't know so good. you can use what you know to deal with what you don't know. You understand what I'm talkin' about?''

The voice on the tape belongs to Kenneth Booker, a Los Angeles probation officer. The course he is enticing kids to accept is called Bridge, a Cross Culture Reading Program.

It was created by Gary Simpkins, a professor at Westfield State College. He wrote it with his wife. Charlesetta, an education specialist for the Massachusetts Department of Education, and Grace Holt, director of black studies at the University of Illinois.

The course, which has been published by Houghton Mifflin, consists of five reading books that take children from black English to accepted English.

The theory is simple. 'We start where the kids are," says Simpkins. "Then we can take them where they want to go.

Simpkins says that the speech of

poor city blacks is similar in cities across the country The dialect often is incomprehensible to whites, and the speech of the rest of America is equally obscure to them.

"When the kid opens his mouth, he's put down for not talking right." he says. "So he doesn't talk much anymore. The basic reader he gets is the 'Dick and Jane' type with stories about children going to spend a day with grandma on the farm. Many black kids can't identify with this Simpkins grew up speaking the

language of urban blacks. "I experienced all of these problems when I hit school." he said.

Mrs. Simpkins adds, "Often the kids are unaware they are speaking a dialect. I remember once writing a college paper and using the word 'aloose.' The teacher said there was no such word. I said, 'Of course there is. My mother, my grandmother, everybody I know says "aloose.""

With this in mind, Booker and the Simpkins sat down to write "Shine," a story about a black stoker on the Titanic

"It was a superbad ship, the meanest thing on water. It could move like four bloods in tennis shoes. It was out of sight.

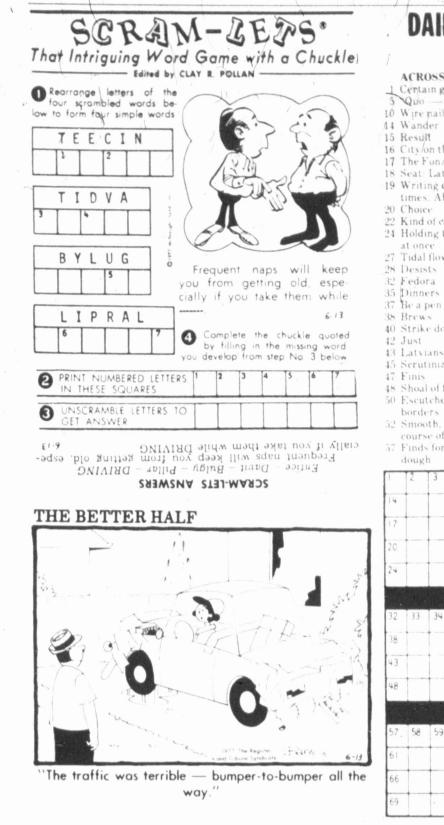

The plot was simple. Shine managed to jump into the sea and swim away before the ship went down. "When the news reach land that the great Titanic had sunk. Shine was down on the corner, half-way drunk."

Also, the Joint Advisory Committee on Agricultural Statistics; the Condor Advisory Committee: Forest Pest Research and Development Program Board; Advisory Committee on Hog Cholera Eradication: Advisory Committee to the Forest Service, California Region; and the Northeastern Forest Research Advisory Committee

Oklahoma opens special session

OKLAHOMA CITY (AP) - The Oklahoma Legislature was to convene at noon today for a special session to consider seven major appropriation bills - and Gov. David Boren's call for a proposed constitutional amendment to limit the length of future sessions.

The regular session ended last Wednesday when

Swim team sets fourth record, keeps plugging

The City/of Midland Swim Team has set its fourth world record, but the seven-member relay team plans to keep on swimming until noon today. according to team coach Doug Ingram.

- The team has already surpassed the record for the longest time swum by a seven-member relay team. The previous record was approximately six days. The City of Midland Swim Team passed the six-day mark at noon Sunday.

At noon today the team will have completed a solid week of swimming. If the team continues at its present pace, they will break t he record by 'just under 24 hours," Ingram said.

The team set the record for the 300mile swim at 5:27 a.m. Saturday. Its record time was four days, 17 hours and 27 minutes.

At 8 a.m. today the team had passed the 427-mile mark. Coach Ingram said the team plans to submit the 400-mile time to the Guinness Book of World Records. There is no 400-mile record listed. Ingram said, because no other team has ever gone that distance. Other records set by the team last week were for the longest distance swum in 24 hours and for the 100-mile swim.

Andrews trustees

to meet Tuesday

ANDREWS - The Andrews Independent School District Board of Trustees will meet Tuesday evening at the School Administration Building. The board will conduct a public hearing on the tentative budget, set the tax rate for 1977-78, accept bids on the building trades house and approve participation in Region 18 Education Service Center media services for 1977-78.

Center

S

WASHINGTON - Government investigators are contending that Lockheed Shipbuilding and Construction Co. built 12 war vessels for the Navy but billed the government for enough steel to build 20, The Washington Post learned Sunday.

The excess steel at issue - nearly 80 million pounds valued at about \$8 million - figures in disputed claims for \$62 million that the Lockheed Aircraft Corp. subsidiary has filed

Administrator Douglas M. Costle acknowledged that he has "made a

final decision" to allow the plant to

discharge 1.2 billion gallons of heated

water into the Atlantic Ocean daily -

an issue that has held up construction

However, he added in an interview

that announcement of the decision has

been delayed several days because "I

want to go through the record one

against the Navy.

Investigations of the claims were begun in April, 1975, by the FBI, and in June, 1976, by the Renegotiation Board, the executive-branch unit responsible for recovering excess profits from defense contractors. In addition, one source told a reporter that federal prosecutors have been presenting evidence in the case to a grand jury for several months.

In Seattle a spokesman for Lockheed Shipbuilding said that LSCC "has been cooperating fully with the Justice Department's ongo-

Go-ahead for Seabrook expected

ing investigation ... We are aware of no wrongdoing in connection with the claims and believe the department's investigation, when concluded, will bear this out. We will not comment further on this matter until the investigation is concluded.

A piece of the story is to surface today at a Senate Banking, Housing and Urban Affairs Committee hearing on a bill to strengthen the Renegotiation Board.

One part of the bill would require the board to look for excess profits on each product line in each division of

conglomerate contractors such as Lockheed, instead of letting the contractors consolidate all their various costs and profit figures, as they can do now.

Renegotiation Board Chairman Goodwin Chase, in testimony prepared for today's hearing, says the board relied on a consolidated rather than product-by-product financial statement to conclude in 1974 that one major contractor had not earned excessive profits on government business during fiscal 1971.

postponed until later Friday, then

until this week, after consultation

with the White House. EPA officials

Costle denied that the decision was

postponed because the President did

not want to answer questions about it

at his scheduled news conference

Monday. Costle said he was busy on

oppose the plant because it would

release low-level radiation, because it

is being built near an ancient ear-

thouake fault and in their view might

cause a major radiation accident and

because the government has not yet

developed a program to store

Nuclear proponents, on the other

said.

The testimony does not name the

contractor, but a reporter learned independently that it was Lockheed. Chase says a new analysis of data

given only "cursory, inadequate review" three years ago shows that the company claimed a \$68 million loss that "was in fact a \$4 million profit

Chase claims in his prepared testimony, on which he refused to elaborate Sunday, that under the proposed legislation board, in examining all the company's divisions separately, "would have unquestionably concluded that excessive profits existed

His statement cites - but does-not name - one division of the company with sales of \$727 million that has been found to have had "a return on net worth of 246 per cent." This was a reference to Lockheed Shipbuilding, a reporter determined.

This division showed a loss of \$7 million for the period in question. But according to Chase's testimony, a board investigation found that the division, over a three-year period, had claimed to have purchased 73 million more pounds of steel than it needed to build 7 ships.

The ships he referred to are amphibious transport docks known as LPDs, which the Navy commissioned between October, 1968, and July, 1971. Each contains about 12 million to 14 million pounds of steel. Thus the excess was enough for at teast five more.

Other ships involved in the case are five destroyer escorts in the so-called 1052 class that the Navy commissioned between May, 1970, and September, 1972. Each contains, according to Renegotiation Board staff investigators, 2.46 million pounds of steel, or a total for the five DEs of 12.3 million pounds.

PAGE 3A

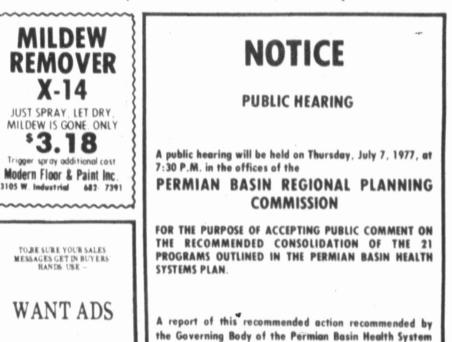

But in a report last July, which a reporter has obtained the investigators said LSCC bought 18.7 million pounds - about 6.4 million pounds more than it claimed to have used in the DEs.

Normally shipyards allow 10 per cent for scrap. LSCC allowed, for bidding purposes, 20 per cent, on the grounds that the DEs were a new class of vessel. Changes in plans added another 2 per cent, bringing the total accounted for to 15 million pounds - 3.7 million less than the 18.7 million purchased.

"As the steel did not end up on the ships and if LSCC's books are valid. the contractor purchased enough steel for almost three more ships instead of one ship, as indicated by the scrap and growth estimates," the report said.

The reference to the validity of LSCC's books is illuminated elsewhere in the report, where the investigators said, "Both the Navy and the FBI reported that many records were destroyed and that it was impossible to trace entries on the books to source documents."

The report said it was "theoretically possible" that some of the excess steel had ended up in a commercial ship and in a ferry for the State of Alaska, both built by LSCC.

Agency is available at the Planning Commission offices,

to Carter's campaign promise to make nuclear energy "a last resort." WASHINGTON - The Carter ad-Pro-nuclear forces, including New ministration is on the verge of Hampshire Gov. Meldrim Thompson allowing construction of the con-Jr. and Public Service Co. of New troversial Seabrook, N.H., nuclear Hampshire, which is building the power plant, which has become a plant, say it will provide crucial nationwide symbol in the battle over electricity to New England and relieve dependence on Arab oil -Environmental Protection Agency

another Carter goal. The decision to go ahead with the plant conforms with the administration's emerging nuclear policy, as outlined in the energy program: to discourage the use of plutonium, from which bombs can be made, but to promote the building of conventional reactors such as Seabrook's.

Another situation where a nuclear plant conflicted with environmental goals was also recently decided in favor of the plant: Interior Secretary Cecil D. Andrus decided not to fight a proposed Indiana reactor on the edge of Indiana Dunes National Lakeshore. The 2.300-megawatt Seabrook plant

had been granted a license by the Nuclear Regulatory Commission and was under construction last November when EPA's regional administrator in Boston, John

Locke

SAN ANTONIO -

Bobby Locke has for-

mally announced his

candidacy for Congress

from the 21st District.

official

McGlennon ruled there had to be modifications in its cooling-water system to protect the delicate ecology of Seabrook's estuary. The plant would discharge a daily

volume of water equal to the flow of a large river, 39 degrees hotter than ocean temperature. Large numbers of fish and aquatic organisms would be drawn into the 19-foot-wide water tunnels and "fried," McGlennon contended after reading 5,000 pages of administrative hearing testimony by the utility and environmental witnesses.

The utility appealed McGlennon's decision to EPA Administrator Russell Train, who left it to the Carter administration to decide.

"It's a very complicated case that has to be decided on very narrow legal grounds," Costle said, adding that he has "painstakingly" read the administrative hearing record.

"It has to do with the sufficiency of the record," he said. "The central issue is, can I find from that record the effect one way or another" of the plant on the environment?

Costle's decision was scheduled to be announced last Friday afternoon. But the announcement was abruptly

IDLAND REPORTER-TELEGRAM, MON., JUNE 13,

Reagan still travels major political trade routes

By WALTER R. MEARS

WASHINGTON (AP) --- When Republicans start campaigning for president again, the new crop of candidates will find footprints on the major political trade routes. Ronald Reagan is traveling them now.

All he lacks is an election, and Reagan hasn't let that discourage him. He is touring, speaking, writing and broadcasting his brand of

Republican conservatism as though the voters would be judging him next week

It's good for the cause — and the wallet. The standard Reagan speech fee is \$5,000, although he does some without charge to raise money for his political organization and, periodically, for the Republican party.

He is making 13 speeches this month. He is doing daily radio broadcasts, weekly newspaper columns.

Twice a month his views are featured, under his picture and over his signature, in the newsletter of his own political action committee, Citizens for the Republic.

None of this proves that Reagan will try again for the Republican presiden-tial nomination in 1980. But don't bet against it, despite his age (now 66) and his past defeats in that quest (two) And, if Reagan doesn't try again

himself, the apparatus he and his allies are creating now will be there to serve the conservative of their choos-

The old Reagan campaign organization is being tended careful-ly. It is knit together in two ways: through Citizens for the Republic, and through unpublicized, relatively in-formal meetings of 1976 campaign teams in various parts of the country. Citizens for the Republic is out

front, as the successor to Reagan's presidential campaign committee, and heir to the money he raised but didn't spend in losing the nomination to Gerald R. Ford.

The leftover campaign money comes to about \$1.5 million, a healthy political endowment. Something over one-third of the money is supposed to be repaid to the federal Treasury, but nobody has asked for it yet. Reagan received federal matching

funds for his primary election campaign, and the unused portion of the government subsidy has to be repaid. But the Federal Election Commission hasn't sent any bill yet.

"Eventually, I suppose they'll come around and say 'give us our money back,''' said Lyn Nofziger, the veteran Reagan aide who runs the organization. "Then we'll give them their money back."

Bloodhounds bring to end Ray's liberty

By RICHARD PYLE

BRUSHY MOUNTAIN, Tenn. (AP) - James Earl Ray was tracked down early today by a brace of bloodhounds named Sandy and Little Red, ending a desperate 541/2-hour flight for freedom from life in prison.

At the end of a three-hour, threemile run through a wooded creek valley and up thickly covered mountain slopes, the assassin of civil rights leader Martin Luther King Jr. was found hiding in a pile of leaves.

A few hours after Ray was seized, police arrested another of the six inmates who had fled with him -leaving only one fugitive at large.

The 49-year-old Ray, driven and exhausted, covered with mud and

sand, offered no resistance to his captors. His first words, according to prison guard Sammy Joe Chapman. Sandy's handler and the first officer on the scene, were: "I feel good.

Chapman, 33, petted Sandy after returning with Ray and said: "She's the prettiest dog in the world." Sandy and Little Red are 14-month-old sisters.

The location of Ray's recapture was only five miles from the Brushy Mountain State Prison where he and the six others escaped over a wall with a makeshift pipe ladder on Friday evening

The sixth fugitive, Donald Ray Caylor, 24, was spotted this morning by a patrolman walking along a street in Oak Ridge, 20 miles east of the

prison. Officers said Caylor had no identification on him and the patrolman brought him to police headquarters where FBI agents and prison guards identified him.

Joel Plummer, state public safety commissioner, said authorities were delighted with the success of the manhunt

Caylor's return to the prison left only Douglas Shelton, 32, still free.

Two others were captured Sunday: Larry Hacker, 32, Hamilton, Ohio, serving 28 years for armed robbery and safe cracking, was the reputed ringleader of the escape; Earl Hill Jr., 34, Erwin, Tenn., convicted of murder and rape, was a former cellmate of Ray's.

Another fugitive, David Lee Powell, 27, Chicago, was recaptured Saturday. He was serving 100 years for murder.

Plummer said Gov. Ray Blanton was "extremely pleased with Ray's capture.

Blanton said earlier he had kept U.S. Atty. Gen. Griffin Bell briefed on the search and that Bell had kept President Carter informed.

nessee.

Escape remains puzzle

By RICHARD PYLE

BRUSHY MOUNTAIN, Tenn. (AP) - The questions linger in the James Earl Ray escape story

-How did seven convicts get under a live electric wire that dangled less than a foot above the top of the prison wall?

-Why didn't guards in the wall towers notice the breakout in progress?

-And perhaps the most puzzling of all, how was the escape ladder, a contraption of more than 20 pieces of pipe screwed together, made in secret?

Tennessee Gov. Ray Blanton's theory on the 2,300-volt cable is that the fugitives used a notch in the wall to bypass it.

Blanton said Sunday that investigators have found marks on the prison wall where it meets a rock cliff that helps form one side of the compound. There is a gap between the wall and the cliff, creating a notch that makes the wall lower at this point and provides more space beneath the cable. Investigators think the marks on the wall came from a makeshift ladder used for the escape. Blanton said.

C. Murray Henderson, corrections commissioner, said the gap apparently worsened because severe winter weather eroded the aging stone wall.

Another theory concerns a power outage at the prison. Henderson acknowledged that there was an outage the night of the escape, but he said it happened after the breakout and lasted only minutes. The official explanation for guards failing to spot the breakout is that other prisoners collaborated with the escapees by staging a fight and other minor disturbances in the prison yard to distract the guards. The only gunfire came from Tower 3, a wall observation post more than 150 yards across the compound. It slightly wounded Jerry Ward, the last man to make it over the wall. Ward was recaptured almost immediately. Another guard post less than 50 yards away was empty because it is manned "only in emergencies," according to Davis and Henderson. Neither defined an "emergency." The ladder was custom-designed for the job, with a keyshaped foot at the bottom to keep it away from the wall and an angled piece at the top that fit almost perfectly across the wall. It also could be concealed in pieces and quickly assembled.

Dutch machine guns riddled terrorists

By ED BLANCHE

ASSEN, The Netherlands (AP) -Dutch marines shattered the South Moluccan terrorists' command post at the head of a hijacked train with more than 7,000 rounds of .50 caliber machine gun fire, riddling the sleeping gunmen, a Justice Ministry spokeswoman said today.

'They were completely torn to pieces," spokeswoman Toos Faber said. "We could recognize them, but they were riddled with bullets. They were stone dead. Six terrorists died in the dawn assault Saturday, as did two of the 51 hostages they held for 20 days on the commuter train stopped in a pasture near Glimmen, in northern Holland Troops also burst into the school in Bovenmilde, 12 miles south of the train, freeing four teachers, and seizing four gunmen. One hostage, Saskia Sein, 48, said another captive told her a terrorist killed the male hostage, 40-year-old M. Van Baarsel. The other dead was a 19-year-old girl, J.M.O. Monsjou. Mrs. Sein's report was told to the Associated Press by her husband.

sies performed Sunday. The report, including results of ballistics studies to determine what type of bullets killed the hostages, was expected Tuesday or Wednesday, a Justice Ministry spokesman said.

Justice Ministry spokesman Wim van Leeuwen said today the bodies of the six terrorists have been released to their families. He said it would be up to the families to release their names.

He said the bodies would be brought Assen, where a service was scheduled for tonight at the South Moluccan Evangelical Church. One gunman, wounded in the attack, remained in critical condition at a hospital in Groningen. One of the dead terrorists identified by the government was Hansina Autosia, a 22-year-old dental assistant, from the farming village of Bovensmilde, reportedly the home to several of the terrorists. The terrorists' leader, 24-year-old Max Papilaya, also died in the hail of gunfire that ripped the train, authorities said The four teachers held hostage in the school could have escaped several times, one of them told a news conference Sunday. But she said they feared the other group of terrorists aboard the train would harm some of their captives in retaliation. "On one occasion, the Moluccans all fell asleep, and we had a key with which we could have gotten out of the building," said 35-year-old Sjaan Abbink. "But at that time, they still had a direct telephone line to the Moluccans on the train and we feared for the lives of the hostages. The six uninjured terrorists were split up and put in separate jails in northern Holland. The law required their appearance before the public prosecutor today, but official sources said the prosecutor would probably visit them in prison instead of having them brought to court. Young South Moluccans among the community of 40,000 exiles in The Netherlands angrily mourned the dead terrorists as martyrs to their struggle for the independence of their native islands from Indonesia

Plummer said Ray's capture "concludes one of the largest manhunts in the history of Ten-The capture, at 2 a.m., was

reported at 2:35 a.m. and Ray was returned to the prison soon afterward in a squad car driven swiftly through

Roelie Brihkman, 18, gave another account. She said the man was killed because he obeyed a terrorist's order to stand up.

Miss Brihkman, quoted by her fiance in a telephone interview, said, "One man, who apparently panicked" obeyed the order to stand when the marines attacked "and was gunned down. I do not know whether he was hit by a shot from the gunmen or by fire coming from outside.

The question of how the hostages died probably won't be resolved until authorities release results of autop-

Crash kills Odessa man

ODESSA - An Odessa man died this morning from injuries sustained in a one-vehicle accident

Kenneth Orland Hamric, 43, of Odessa died in Medieal Center Hospital about one hour after his pickup truck struck a traffic light pole at the intersection of the Kermit and Andrews highways, police said.

Police said no skid marks were left. Justice of the Peace Manuel Valles ordered an autopsy to determine cause of death.

Services are pending at Hubbard-Kelly Funeral Home.

LATE NEWS

WASHINGTON (AP) - President Carter will hold a White House news conference at 2:30 p.m. today. The conference will be carried live by all three commercial television networks.

WEATHER

Mostly sunny today and Tuesday with a slight chance of thunderstorms tonight. Continued hot in the afternoons. High today and Tuesday near 100 and low tonight in the mid-60s.

By SUSANNA McBEE The Washington Post

WASHINGTON - President Carter welcomed his wife Rosalynn home Sunday and said her two-week trip to seven Latin American countries was one "of great significance to our country and to the peoples she has visited.

Carter said the First Lady's goals in dealing with the leaders of the contries, "as laid out by the State Department and the White House, have all been carried out almost to perfec-

Mrs. Carter's Air Force 707 jet landed at 4:20 p.m. (EDT) at Andrews Air Force Base after a 12,000-mile journey that took her to Jamaica. Costa Rica, Ecuador, Peru, Brazil, Colombia, and Venezuela.

A large sign saying "Bienvenidas (Welcome to) Washington" was on the airfield as Carter, their daughter Amy, and Secretary of State Cyrus R. Vance met the plane to greet Mrs. Carter and Vance's wife Grace, who had accompanied her. Vice President and Mrs. Mondale and National Security Adviser Zbigniew Brzezinski also met the plane.

Mrs. Carter, alluding to the speeches she has been giving the last two weeks, said, "Es un gran placer para mi (it's a great pleasure for . She also used the language me). of a diplomat in referring to her husband: "I look forward to consulting closely with him on a regular basis.' Declaring that "we are ready to

develop balanced, natural, normal

relations" with Southern Hemisphere nations, Mrs. Carter told the President, "They love you in the Caribbean and Latin America

She said that on the major issues she had discussed with the foreign leaders - human rights, nuclear nonproliferation, economic development, and arms control - "I think we've made progress.

On her flight from Caracas to Washington, Mrs. Carter said that "at times they told me things I didn't want to hear.

She did not specify them, but clearly one was a refusal by President Ernesto Geisel of Brazil to agree to sign the 1969 American Convention on Human Rights, which President Carter signed earlier this month.

Prime Minister Michael Manley of Jamaica and President Francisco Morales Bermudez of Peru told her they would sign it, and President Carlos Andres Perez of Venezuela informed her Sunday that his nation had signed and ratified it, she said.

Leaders of those three countries and Costa Rica, Colombia and Ecuador told her they are willing to discuss human rights at the meeting of the Organization of American States, which starts Tuesday on the Caribbean island of Grenada.

Asked why Brazil had balked on the human rights question, Mrs. Carter said that all countries in the United Nations (including Brazil) had signed its Declaration on Human Rights, 'and some countries think this is sufficient.

Mrs. Carter said, however, she

A pair of bloodhounds used in the search for James Earl Ray are the center of attention as they

are driven into the Brushy Mountain State Prison. (AP Laserphoto)

thinks the American Convention which calls for an inter-American court on human rights and compensation for victims of injustice, "is very important

Terence A. Todman, assistant secretary of state for inter-American affairs, who accompanied Mrs. Carter on the trip, said that if the Convention were ratified by the requisite 11 nations, the Inter-American Human Rights Commission would become more active. Until Perez' announcement Sunday only Colombia and Costa Rica were known to have ratified the agreement

The commission, which is supposed to look into alleged violations of human rights, is small and "inadeguately financed." Todman said.

Brazil has been at odds with the Carter administration because of a State Department document made public in March that criticized Brazil for not providing trials for political prisoners.

Officials said they didn't know (Continued on Page 2A)

Six in one family hurt in automobile accident

Two automobile accidents over the weekend sent eight Midland residents to the hospital, including six members of one family.

As a result of the first accident, 13year-old Jessie Heredia of 418 E. Elm was listed in serious condition at Midland Memorial Hospital early today.

According to police, a car driven by Ramon Bonilla Heredia, 35, of 418 E Elm and a car driven by Edward Vernard, 19, of 1110 E. Parker Ave. collided at the intersection of Lamesa Road and Elm Street at about midnight Sunday while Heredia was attempting to turn west onto Elm Street

Vernard also was listed in serious condition at Midland Memorial Hospital early today.

Also injured in that mishap were Alice Heredia, 15, Maria Heredia, 37, and Tony Heredia, 12, all listed in satisfactory condition. Ramon Heredia and Tony Heredia, 12, were treated at Midland Memorial Hospital and released

In the second mishap, Richard Reni Cornett of 504 N. Mineola was sent to Midland Memorial Hospital where he

Ed Todd is on vacation. His column will resume upon his return.

å

was listed in fair condition early today.

According to police, Cornett was injured when the motorcycle he was riding and a car driven by Jimmy Ray Wallace of Dallas collided at the intersection of South Clay Street and New York Avenue about 1 p.m. Sunday.

DOBERMAN PINSCHER TAKEN

The third theft of a Doberman pinscher within a week was reported to Midland police early Sunday morn-

According to police, Louis Palomba of 400 W. Shandon said his dog, valued at \$150, was taken from his backyard about 12:45 a.m. Sunday.

Palomba told police a barking dog awakened some neighbors who looked out the window and saw two men carrying the dog from Palomba's back yard.

TOOLS TAKEN

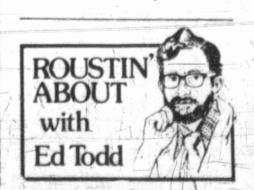

Clyde T. Tannerhill of 5009 Leisure Drive told police someone made off with \$355 worth of tools from his pickup between 5:30 p.m. Saturday and 5:30 p.m. Sunday.

Tannerhill told police he stopped at bar Saturday afternoon and the tools were still in the vehicle. He left the bar and did not notice the tools missing until Sunday afternoon, police said.

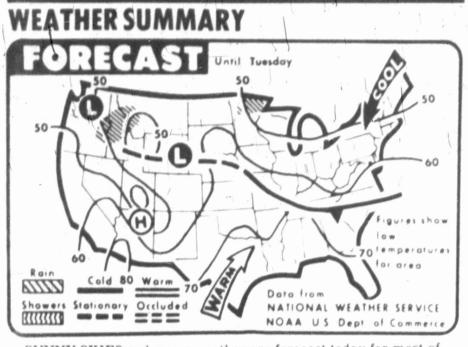

MONEY TAKEN

A money bag containing \$350 was taken from a car belonging to Freddie G. Haynes of 707 W. Texas Ave. sometime Saturday night or early Sunday.

Haynes told police he put the money in the trunk of his car after closing his bar Saturday. He returned to the car

Evangelist Moon's top aide says Korea scandal being overplayed

By ROBERT L. JACKSON The Los Angeles Times

WASHINGTON - Pak Bo Hi, the long-silent chief lieutenant to Rev. Sun Myung Moon, the controversial Korean evangelist, says public attention being devoted to the Korean influence-buying scandal is "all out of

Pak, whose own role is under scrutiny as head of the Korean Cultural and Freedom Foundation, said charges that he and Moon are Korean government agents are 'outrageous and slanderous lies.'

In his first interview since the Capitol Hill scandal erupted months ago, Pak also told The Los Angeles Times that Tongsun Park, the central figure in the case, was "an ambitious and over-zealous businessman'' who lobbied Congressmen on his own not at the direction of the South Korean government.

"I believe Tong Sun Park saw a chance to promote his own business interests and to win favor with the Korean government, knowing that Koreans desperately wanted closer ties to the United States," Pak said, adding that he had known Park several years

Hyung Wook Kim, a former director of the Korean Central Intelligence Agency, has said Tong Sun Park had 'a very close working relationship" with the Korean government. But Kim said he knew of no official government role.

Pak also attacked Kim for having told reporters that Pak and Moon were "lesser operatives" of the Park Chung Hee regime.

"I demand that Mr. Kim come forth with some documented proof before he speaks such damaging things. Pak said.

Pak, a well-groomed, articulate man of 46, said his much-investigated foundation has had no ties to the Korean government. He denied charges being probed by federal investigators that the foundation had "laundered" money used as payoffs to congressmen.

Ostensibly the foundation is a children's relief fund

Pak, who has traveled frequently to Seoul from his Washington-based office, acknowledged that he had carat least \$5,000. He could not recall the details.

Informed sources said U.S. Customs Bureau records show Pak declared he was carrying sums in excess of \$5,000 on seven occasions since 1972 when he passed through customs. Pak said some of these reports may have been filed by his brother - Park No Hi - who has carried expense money while traveling with the foundation-sponsored "Little Angels," a well known Korean children's singing group.

Pak blamed the U.S. State Department for causing investigations that he said have left his multi-milliondollar foundation virtually bankrupt. He said State Department officials became irritated in the early 1970s because Radio for Free Asia, another activity of the foundation, "was not under their control.

RFA, patterned after Radio Free Europe, beamed anti-Communist views and entertainment programs to mailand China and North Vietnam from a powerful Seoul transmitter leased from the Korean government

Pak said the State Department in-

Texas area forecasts

North Texas. Clear to partly cloudy in the west and partly cloudy with scattered mostly afternoon and nighttime thunderstorms over central and east sections through Tuesday. Little change in temperatures. Highs 68 to 98. Lows tonight 68 to 76.

Upper Coast out 50 miles. Winds increasing to 15 to 20 knots tonight and Tuesday. Seas three to five feet in creasing to five to seven feet tonight. Winds and seas will be higher in showers and thunderstorms.

Lower Coast out 50 miles. East to southeasterly winds 10 to 15 knots through Tuesday. Winds and seas will be higher in showers and thunderstorms.

South Texas, Partly cloudy and warm with a chance of

south Frank Party cloudy and warm with a chance of showers or thunderstorms through Tuesday. Showers and thunderstorms more numerous over the east portion Highs Tuesday 86 to 96. Lows tonight 68 to 78

West Texas Mostly sunny Tuesday except partly cloudy with widely scattered afternoon and evening thundershowers in the west and north portions. Highs **Tuesday 94** to 102 except near 90 in the mountains. Lows tonight 58 to 72 except near 50 in the mountains.

New Mexico, Oklahoma Oklahoma Fair to partly cloudy with little change in temperatures through Tuesday. Highs Tuesday mostly 90s. Lows tonight mid 60s Panhandle to low 70s southeast

Wednesday through Priday North Texas Fartly cloudy and hot Wednesday through Friday with a chance of thunderstorms Thur-sday Highs in the 90s and lows in the 70s South Texas Partly cloudy warm and humid with widely scattered mainly afternoon and evening showers and thundershowers. Highs mostly in the 90s Lows mostly in the 70s

and thundershowers right modely in the mostly in the 70s West Texas Scattered thunderstorms mainly north with no important temperature changes Wednesday through Friday Lows 30s mountains 60s north to mid 70s south Highs 90s except near 105 Big Bend

A sudden early-morning thunderstorm brought a small amount of rain to the Midland area Sunday and the National Weather Service at Midland Air Terminal forecasts a slight chance of more thunderstorms tonight.

All area towns reported clear skies. warm temperatures and calm to slight winds early today

The NWS also predicts more of the warm afternoons experienced over the weekend at least through Tuesday.

Forecast for the Permian Basin calls for mostly sunny skies today and Tuesday with a slight chance of thunderstorms tonight. Hot afternoons will continue. High today and Tuesday will be near 100 and the low tonight in the mid-60s. Winds will be southeasterly at 10 to 15 mph today, and decreasing to 5 to 10 mph tonight. The probability of precipitation is 20 per cent tonight.

Thunderstorms packing winds in excess of 50 miles per hour and two inches of rain have brought an abrupt halt to scorching hot weather in much of North Texas, but 100-plus readings were still forecast in Southwest Texas today

Dallas Love Field got a 2.01-inch downpour late Sunday along with near-hurricane force winds. Tree limbs and power lines were downed in both Dallas and Fort Worth, which got only .36 inches of rain officially. The Associated Press reported.

Both cities recorded late afternoon temperatures of 100 degrees before the storm hit, but despite its punch, the severe weather at least had a welcome cooling effect.

A possible tornado was sighted at Sulphur Springs in the early evening.

The area from the Big Bend to Lub bock, far South Texas and Central Texas also had severe thunderstorms Sunday, with Palacios and Brownsville both reporting more than 11/2 inches of rainfall

Early today, Central and Dast Texas were buffeted with thunderstorms again, with the heaviest activity along a line from near Paris southward into the Waco-Austin area. Other thundershowers were reported in the vicinity of both Corpus Christi and Galveston on the coast.

Meanwhile the thunderstorms that brought locally heavy rains to portions of West Texas Sunday night had generally dissipated.

Early morning temperatures rang-

the gate to the administration building

Ray appeared tired but alert and wide-eved. His hair was wet and matted and his clothes, a black sweatshirt and black pants, were covered with sand and mud. His face also was smeared with mud.

It was not known whether Ray had eaten during the weekend chase, said Warden Stoney Lane

He was examined by a medic and placed in a prison hospital. Lane said this was "routine procedure.

Lane said Ray would be placed in "administrative segregation" for three days while a hearing on the escape is conducted. "It is not solitary confinement, but his movements inside the prison are sharply restricted," the warden said.

Park, now living in London, has ignored a subpoena to give testimony to a federal grand jury here

Pak's description of Park as an in dependent agent conflicts with evidence being gathered by Justice Department and congressional investigators. According to this evidence. Park was spreading money and favors for the regime of President Park Chung Hee.

ried large sums of cash into the United States on at least one, and possibly two, occasions.

Pak is suspected by some federal agents of having been a courier for the Korean government, a role he strongly denied

He said he once passed through U.S. customs a few years ago with \$10,000 in U.S. currency. These funds, he said, were from Japanese donors for Moon's Unification Church or for his own foundation, which has supported children's hospitals in Indonesia, the Philippines and South Vietnam

On another occasion, Pak said, he may have returned from abroad with

House panel resumes energy plan studies

By JIM LUTHER

WASHINGTON (AP) — The House Ways and Means Committee, whose rejection of three White House energy proposals brought sharp criticism from President Carter, is about to decide whether businesses should get a new tax break for conserving fuel.

The panel will vote later this week on still another Carter energy proposal, one which would sharply increase U.S. oil prices and raise the cost of a gallon of gasoline by nearly eight cents.

But heading the committee's agenda today was the President's plan to give businesses a tax credit of 10 per cent of the cost of their investments in such energy-saving equipment as insulation and solar heating and cooling systems. Similar credits for homeowners and renters were approved last week

While the Ways and Means Committee considers various energy taxes all week, the full House plans to vote on several appropriations bills for the 12 months that begin on Oct. 1.

Included are two bills that could produce the first veto of the Carter administration. The \$10.2 billion public works appropriation has raised the President's ire because of congressional insisence that funding continue for 17 water projects that he opposes

The other bill would appropriate \$61.3 billion for the Departments of Labor and of Health, Education and Welfare. This bill, which carries money for numerous social programs, is about \$1.4 billion above what the President requested for HEW alone.

The Senate, meanwhile, will focus its attention on foreign affairs. Votes are expected this week on bills authorizing foreign-aid spending and increasing U.S. participation in international lending organizations.

The Ways and Means Committee. which handles all tax legislation in the House, ripped apart Carter's energytax proposals last week. The panel rejected outright a standby gasoline tax of up to 50 cents a gallon, which would go into effect only if conservation goals are not met, and turned down a plan for federal bonuses of up to \$500 for persons who buy fuel-efficient cars.

Carter's proposed tax on cars that get poor gasoline mileage was defeated in favor of a much milder version. And another panel, the House commerce subcommittee on energy and power, voted to remove price regulations from new natural gas, which Carter opposes.

The White House reacted quickly Presidential press secretary Jody Powell said Carter accused Congress of knuckling under to pressure from the oil and automobile lobbies.

He quoted Carter as saying. "The people of this country will be the ones to suffer if our hopes for an energy plan are thwarted. They will be the ones to pay for ... (Friday's) special interest victories

In an interview Friday with magazine publishers. Carter said the public should apply pressure on Congress to counterbalance pressure from the oil and auto lobbies. "Unless the American people speak up." he said. "the special interests are going to prevail.

Diamond leading, but couples design own rings

By REBECCA CASARES

Copley News Service LOS ANGELES — Diamonds, as a girl's best friend, rapidly may be becoming passe. In their place, garnets, rubies,

textures are heralded as the new measures of love. The traditional solitaire diamond engagement ring came into vogue in the 1920s along with white gold. It

Diamonds sparkle in this close-up of a free-form gold setting. While custom-made rings are increasingly in demand, the majority of brides still prefer traditional diamond rings

replaced the plain gold bands that emeralds, and seaweed and bark American brides had been wearing. This tradition has been refined over

the years to the utmost in matching sets, swirling, curving, interlocking bands, and has switched from white to yellow gold Traditional brides of the 1970s still

select a variation of this theme from the plentiful styles available at commercial jewelry stores.

In an effort to not conform, more brides (and grooms) are frequenting custom jewelry makers, designing their own rings or selecting a design of the jewelry that is one of a kind.

"We get to express ourselves so little in this world," said jeweler Susan Owen. "A wedding ring is something you plan to wear the rest of your life.

More and more couples are selecting rings that they know no one else will have, Owen says.

While more people think custommade rings are a more personal expression of their personality, the majority of brides prefer traditional diamond rings according to local jewelers.

"I think every girl wants a diamond ring," said Ron Cahill, another jeweler. "A diamond is still the measure of a gentleman's love."

A gentleman's love notwithstanding, women are now buying fancier rings and sometimes diamonds for their husbands-to-be. "Twenty-five years ago every man

wore a plain band," Cahill said. "Now men are becoming more styleconscious

Jack Allen offers a full selection of commercial stock as well as specializing in custom work. Customdesigned rings are chosen by only 10 to 15 per cent of the brides. Allen says, but that is a significant increase over 10 years ago.

"Wedding rings haven't changed as much as people think," Allen said. "Except for a new swirl here, or a

curve there, designers are doing the same thing they've been doing for 30 years.

The biggest change in wedding ring fashion was from white gold, which was popular 25 years ago, to yellow gold.

The custom-made rings often have different colored stones, different textures in the bands such as seaweed and bark and often have personal themes.

"A forest ranger came in here and wanted a bear, a deer and a pine tree on his band," Owen said. "It was a beautiful ring

Some brides reject commercial rings and prefer to wear a ring that belonged to their grandmother, or their groom's grandmother.

Often jewelers are asked to design a ring that looks antique, or the bride will select something that looks an-

plans to design her own bands, said, 'I just didn't want something someone else had. Besides, we want

weddings. Rose Jaffe, a wedding consultant, says that young couples are just more considerate of each other these days.

"They pick out something for both of them," Jaffe said. "Usually

traditional rings if they can afford them "I've been married 22 years and we just bought new rings. Mine has roses,

26¼ Pounds, 38¾" Lost

Mrs. Jo Ann Nutt, from here in Houston, is 26¼ pounds lighter and 38¼ inches trimmer this summer thanks to her Pat Walker figure correction and she's still losing. She writes: "I have been honestly astounded at the ease and speed with which the pounds have fallen away. Having dropped down 4 dress sizes, now I can wear the variety of styles I was looking for."

=Lose Weight and Lose it Like a Lady=

The exlusive Pat Walker figure program has been effective for millions of women of all ages. Safe passive exercise tone your tissue, improves your circulation and removes unwanted pounds and inches. ...without crash dieting. You enjoy complete privacy in elegant surroundings and you do not have to disrobe. In fact, you can take your half-hour treatments anytime, because you don't need special clothing and you won't even muss your hair. Call today for a figure analysis and a complementary treatment. . .there is no cost and no obligation. We will plan your personalized program and tell you the total cost of your figure correction before you even begin (based on \$3 per treatment.)

THE MIDLAND REPORTER-TELEGRAM, MON., JUNE 13, 1977

Soviet 'renegades' complain of human rights violations

EDITOR'S NOTE - In the summer of 1975, the Communist movement has achieved Soviet Union and 34 other nations, including the In response to this, the dissi United States, signed a document in Helsinki, Finland, pledging to respect human rights of their citizens. What is the situation now in the U.S.S.R? In this article on how Soviet dissidents and the Soviet movement view things, an AP correspondent gives the position of antigovernment forces.

By SETH MYDANS

MOSCOW (AP) — "It's no secret that the human rights situaton in the Soviet Union is bad and that it has not improved since the Helsinki accords were signed," says a document signed by 22 of the nation's most outspoken dissidents.

complying with the human rights provisions of these travel. accords

In contrast to the furtive meetings on street corners of a few years ago, dissidents now openly telephone Western correspondents and invite them to well-publicized news conferences at their apartments.

The document, on special letterhead paper, was presented at one such news conference recently by a ty group formed a year ago to monitor Soviet compliance with the 1975 Helsinki accords, which pledged the 35 signatory nations to respect the human rights of their peoples. The accords, however, are nonbinding

The official Soviet government position is that it does indeed respect its citizens' human rights and that the dissidents are "renegades" who do not represent the views of the Soviet people. The Kremlin maintains that the dissidents are being used by the West to cloud the successes it claims the world

Texas politics good training, White indicates

By DON KENDALL

WASHINGTON (AP) .- John White says he and Agriculture Secretary Bob Bergland are working out well in harness as leaders of Jimmy Carter's farm team.

One reason, White says, is that both he and Bergland "have a little political background" which comes in handy around Washington where a wrong step can be as messy as in any old Texas barnyard.

White is deputy secretary of agriculture, the second-ranking job in the department. Until he was chosen by Carter three months ago, White was Texas commissioner of agriculture for 26 years and had had a voice in Texas politics right along

Friends and some of his enemies say that White's easygoing ways and folksy humor can fool you. Underneath the Texas patina is a John White who can be tough as a buggy whip and twice as stinging when need be

But for right now, White is enjoying life and saying nice thing about almost everybody. At least that was the way it was at an informal luncheon meeting with ters last week

In response to this, the dissidents, crowded together on chairs and benches at their news conference, noted that only two of the original 11 organizing members of their group remain free and active. The others have been imprisoned or have been quickly granted permission to emigrate.

Nevertheless, the group has added many new members. Some have joined the Moscow branch, and new chapters have sprung up in the Ukraine, in Latvia and in Soviet Georgia, dissident spokesmen claim. Similar groups have been formed to tell Westerners about religious problems and about alleged psychiatric oppression.

Dissident claims of activities outside Moscow are difficult for Western correspondents to check "The Soviet Union had no real intention of ever because of governmentimposed restrictions on

The dissidents at the recent news conference described the following problems, which fall under the provisions of the Helsinki accords:

"In the Soviet Union there is no free exit from the country." Even for tourist trips, they say, a citizen must receive a character evaluation from his place. of work, which is controlled by the Communist par-

-"In the Soviet Union there is no free choice of place to live." The dissidents cite the system of registration which requires citizens to maintain an internal passport showing place of residence.

"In the Soviet Union there is no free exchange of information; in particular there is no free press. They also cite censorship of overseas mail and telegrams and the barring last December of an internatinal seminar in Moscow on Jewish life

-"Denial of the right of emigration and reunification of families." The dissidents say emigration of Jews, of religious minorities such as the Pentecostalists, and of the 1.8 million member Volga German community, remains severely restricted.

"Discrimination against national minorities, They cite the difficulties of Crimean Tartars in returning to their home area in the Crimea, after their dispersion under Stalin. Jews have also been complaining that they are the subjects of a new wave of anti-Semitism

Meanwhile, the dissidents said, those who speak out at meetings and in documents have been subject to arrests, searches and interrogations. They claimed they have been followed and their telephones have been cut off

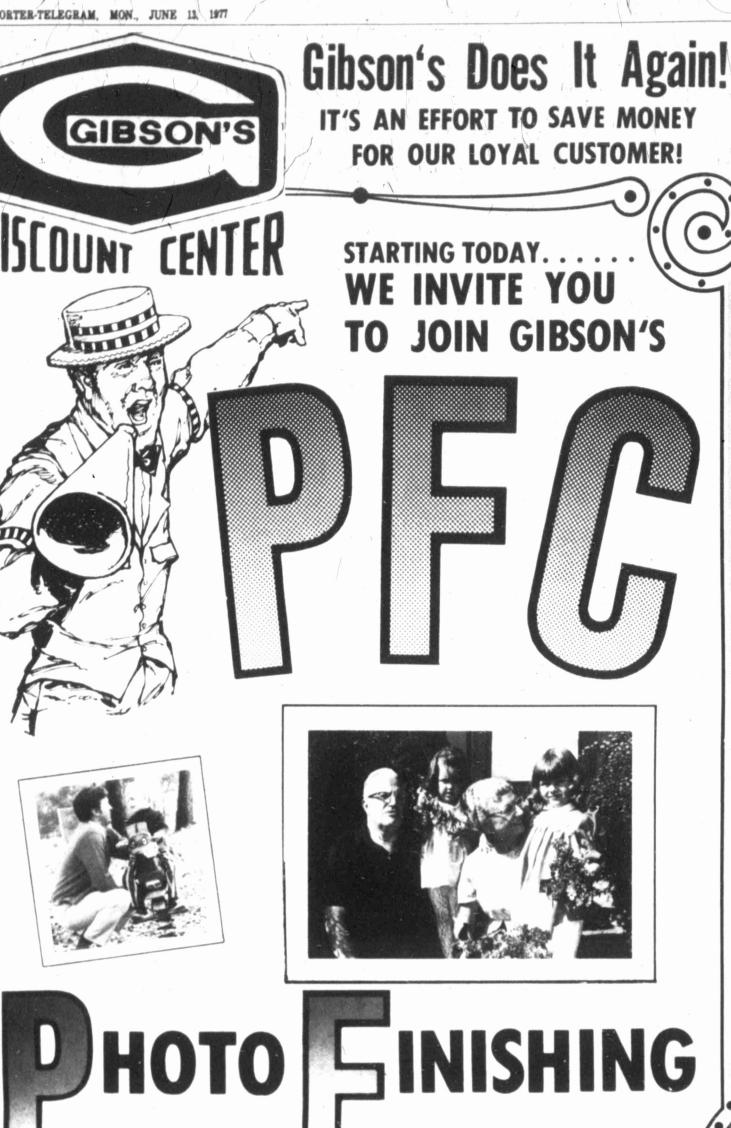

The Helsinki group's founder, physicist Yuri Orlov, was arrested in February and has not been heard from since. The charges against him are not known. The same thing has happened to Alexander Ginzburg, a group member and the manager of a fund to aid the families of jailed dissenters.

Another group member, Anatoly Shcharansky, was arrested in March and is said to be under investigation for treason, a charge that could bring the death penalty upon conviction.

In the Ukraine, Helsinki group members Mykola Rudenko, Oleksa Tikhy, Marislav Marinovich and Mykola Matosevich have been arrested and are being held incommunicado on unspecefied charges, the dissidents say. Their relatives and friends are undergoing searches and interrogations.

In Soviet Georgia, dissidents Zviad Gamsakhurdia, Mera Kostava and Viktor Rtskhiladze have been arrested

In sum, the dissidents say, the positive effects of the Helsinki agreement have been only indirect ones: it has emboldened people to demand their

At 52, White could spend a hitch or two in the Carter administration and still have time to get back into Texas politics. At least he admits readily that these thoughts have crossed his mind

"I told them I would maintain a very strong interest in politics there," White said. "I was, of course, an elected official, but I was also heavily involved in organizational and party affairs.

That was before he came to Washington and got into the full swing of working with Bergland in running USDA, helping evolve administration farm policy, making speeches and trying to placate angry wheat farmers who want higher prices

"When I said that, I really didn't realize how timeconsuming this operation was going to get." White said. "Nor do I even know what my legal standing would be (in relation to Texas politics). But I don't intend to lose interest it it.

Although White has spent most of his life in his native Texas - his father was a sharecropper - he is no novice around Washington. He was a farm trade negotiator for President Kennedy in 1963 and later served as a special trade representative to Greece. Vietnam and Yugoslavia for President Johnson.

"I always thought I had the best political office in Texas as commissioner," White said. "Texas is a little different than most states. The executive department of the Texas governor is basically a ceremonial office, it has no patronage to speak of and very little executive authority

"So the commissioner of agriculture was one where you could get all the prerogatives of statewide elective office holding but folks didn't pay a hell of a lot of attention. You make a mistake or two and they forgive you, from time to to time.

'As long as you performed reasonably well, you have a lot of room to do whatever you felt like you could do. So I had a wide range of interests there. As well as being commissioner of agriculture. I was able to take a great deal of interest in party affairs. and I enjoyed it very much.

White's wife, Nellie, likes to redo old houses. They are renting a townhouse at present but are looking at an old beat-up mansion in hopes of buying it. "It's rough, I mean it is really rough." White said.

"But it really has some potential if she can get 'em to accept our offer. So I'm not planning to leave within 30 days or anything like that

UT regent says energy program would cut funds

AUSTIN, Tex. (AP) - President Carter's national energy program would cost the University of Texas almost \$4 million a year in oil and gas income, a UT regent says

Ed Clark, chairman of the committee that administers the university's vast oil and gas acreage. made the statement in a letter to all Texas congressmen.

The \$4 million is the difference between oil and gas royalties and bonuses under existing price controls

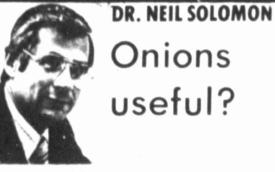

and those proposed by Carter. Clark said the Carter plan does not provide enough incentives for the independent drillers who do most

of the nation's exploration. "The potential supply is undoubtedly there, but where are the oil and gas finders," he said. Clark said it was "simply incredible to me that

anyone would think that continuation of price controls would encourage a significantly higher rate of domestic drilling activity." He said that if all price controls were eliminated.

the oil and gas income to university lands would run \$48 million higher each year than they now do.

Dear Dr. Solomon: Is it true that onions are especially good for you? When I was a child, I was always told that they purified the blood, and I still keep hearing about how valuable they are. - Nellie

Dear Nellie: I'd say that onions are good for you because they make all sorts of dishes taste good. They are a wonderful flavoring agent. But so far, they don't have any recognized medicinal value However. I did happen to come across a study by four Indian nutritionists recently that said onions seemed to help prevent a rise in blood cholesterol after a meal containing a good deal of fat. So maybe we don't know the full story about onions yet. But don't take this as an excuse to go on a high-fat, highonion diet!

Dear Sr. Solomon: I'm not in such great shape right now - I'm about 20 or 25 pounds overweight, for one thing - and I have been thinking that if I joined a health club this might help. Do you think they are worthwhile--- I've priced a couple near where I work, and they run about \$250 to \$300 a year. That is a lot of money for me, but I'm 45 and I feel I've got to start doing something pretty soon. It's a good 15 years since I've had any regular exercise to speak of. - Harold H.

Dear Harold: There are two big problems with the great majority of commercial health clubs. They don't give prospective customers a through checkup to see just how much they can do without having a heart attack or damaging a joint. And they don't have qualified personnel to supervise their clients.

There may also be the question of whether or not you are getting your money's worth. People have complained of getting roped into long, expensive programs that don't live up to their billing

Most Ys have physical fitness programs. They vary from branch to branch, but some are excellent. And you certainly won't spend as much as in commercial clubs. In any case, you should have your doctor give you a

physical before embarking on any exercise program - especially if you are out of condition. While you are at it, ask him if he has any recommendations about local health clubs or the Y

If there is a university near you, particularly one with a medical school, find out if it offers any facilities to the public. Dr. Allan J. Ryan, the editor of Physician and Sports Medicine, pointed out recently that many institutions have developed training and testing facilities that are available to anyone interested in maintaining physical fitness to counter heart disease risks such as overweight, high blood pressure, and elevated blood fats. And there are also, he notes, independent centers for exercise testing and prescription, such as the Seattle Heart Watch Program.

Former Midlander takes new post

J. B. Davenport, former division engineer for Halliburton Services, has been named manager of the North Sea Division of the company's international operations at Aberdeen. Scotland

Davenport joined Halliburton in 1960 as an engineer in South Texas. He received a Petroleum Engineering degree from the University of Corpus Christi

He served as a district engineer, assistant district superintendent and district superintendent in South Texas before coming to Midland in 1974 as division engineer. He transferred to International Operations in 1976 when he went to Aberdeen as assistant manager of the North Sea Division.

Halliburton also has promoted K. R. LeSuer to assistant manager of its British Isles, Europe and Africa Region

He has moved from Aberdeen to London. He had been North Sea Division manager at Aberdeen since

LeSuer has been with Halliburton since 1959 after receiving a degree in Petroleum Engineering from Texas A&M University. He worked in New

Mexico as an engineer and transferred to Australia as an engineer in 1966. He later was area engineer at Singapore and then became division manager in Indonesia in 1972.

E. Vick, vice president-International Operations at Duncan, Okla., has been elected to the board of directors of Halliburton.

Vick, with Halliburton Services since 1947, was elected vice president in 1975. He had served as president of Halliburton Services Ltd. in Canada before returning to Halliburton Services' headquarters in Duncan in early 1975.

Champlin consolidates operations

FORT WORTH — Exploration and production operations of Champlin Petroleum Co. have been combined into one department under Bobby F Abernaty as vice president-Exploration and Production.

The announcement was made by William T. Smith, president of Champlin

'Consolidation of Champlin exploration, development and producing operations will provide more direct and effective management of our long-range program to enhance our crude oil and natural gas positions," Smith said. Smith also announced that Edward

H. Chittick Jr. will transfer from Fort Worth to Houston as vice president and regional manager. Formerly vice president-Exploration, Chittick now will be responsible for the exploration and production activities of the Houston Region.

Frank L. Jones, vice president, will transfer from Houston to Fort Worth

WT sectors gain prospectors, wells

and assist in the operations of the newly-formed department. He will have responsibility for budgeting, administration, planning and producing property acquisition.

The consolidation follows the realignment made in early 1976 to place more emphasis on regional management with vice presidents headquartered in the regions where Champlin's major oil and gas programs are being conducted. Smith

Nuclear plants repair could cost consumers

By JOANNE OMANG

The Washington Post WASHINGTON - Virginia's two nuclear power plants, Surry I and II,

will be shut down for \$60 million worth of major repairs next year because of a problem that has the nuclear energy industry worried nationwide.

Virginia consumers, who may be asked to underwrite the repairs, also may have to pay for the more than \$54 million in coal or oil that must be burned to provide power while the nuclear plants are closed, according to a spokesman for the Virginia Electric Power Co. (VEPCO).

The plants could be closed for as long as three months each, for a total six-month period of reduced production

The problem, called "denting," is the subject of a \$40 million research effort by the nuclear industry.

So far, over the last two years the problem has shown up in 14 of the 38 plants that are technologically susceptible to it, according to Vic Stello, director of the operating reactors division of the Nuclear Regulatory Commission (NRC). In four of those cases, including the two in Virginia, Stello described the damage as "extensive.

Denting is the term used to describe a buildup of a substance around pipes containing the water that is superheated by the nuclear reactor. The substance buildup eventually strangles the pipes, causing cracks and leaks.

VEPCO has already ordered six new Westinghouse steam generators — at \$10 million each — to replace the ones damaged by denting. The complex replacement operation, the first such one ever conducted in a U.S. utility, will involve cutting holes into the protective containment walls of the nuclear reactors, removing portions of the steam generators, and cutting the pipes that cool the heart of the reactors

'Installing the (steam) generators in the first place was a whole lot easier than this will be, because now we have to go through the con-tainment ... wall to get to them," said James Wittine, electrical engineer of the Virginia State Corporation Commission, which oversees VEPCO

the NRC. "Nuclear power gets a lot more publicity and it's a lot more spectacular, but I'm not so sure that the economics of a coal plant are so different. They also shut down for major maintenance. The most economic fuel source is still nuclear." he said

The denting problem is complex. involving all three of the water systems that make up a nuclear power generator. The first water system flows around the nuclear reactor itself, carrying the heat produced away. This water is superheated to more than 650 degrees Fahrenheit but is kept under tremendous pressure so that it does not boil.

Pipes carrying the superheated water are in turn surrounded within the steam generator by water from the second system, which is heated and allowed to boil to make steam. The steam is then carried away to drive the turbines that produce the electric power

After passing through the turbines. the steam flows over the pipes that make up the third system. The third system's pipes contain cold water from the outside. And, after passing over the cool pipes, the steam is condensed back to water and returned to the steam generator for another round of heating.

Denting occurs on the outside of the primary system pipes where they pass through support plates inside the steam generator, like spaghetti through a sieve.

For reasons that are still debated, a substance called magnetite or "green grunge" builds up around the holes in the plates, pinching and denting the primary system tubes. Eventually they crack and leak and have to be plugged as useless. "The question becomes an

economic one very quickly," said Stello of the NRC. "When 20 per cent of the tubes are plugged, the plant might have to operate at less than 100 per cent of capacity. The Surry plants are at a point where further plugging

Sterling gets

could cause that." A VEPCO spokesman said 18.5 per cent of the primary system tubes were already plugged in Surry I and 16.8 per cent in Surry II. Florida Power & Light Co. has the

next most severe denting problem after the Surry plants. Its Turkey Point III and IV units have 5.5 per cent and 7.5 per cent of their primary system tubes plugged. Florida Power & Light has ordered six replacement steam generator "tube bundle assemblies" for \$10 million each from Westinghouse for delivery beginning in 1979. The company estimates tota cost of the units and replacement fuel and labor at \$380 million.

A spokesman for Florida Power & Light said repairs there could take nine to 11 months for each unit. "We still hope the problem could be solved and the process arrested so that we won't have to replace the units." said Charlie Scheer, the spokesman. He called the \$60 million order for new units "a hedge" because of the 21month delivery time.

Denting has also occurred in California's San Onofre nuclear power plant and New York's Indian Point, which use salt or brackish water - as do the Surry and the Florida plants - for the third cooling water (condenser) system. That was at first thought to be significant, but Stello of the NRC said denting has also been found at fresh water coolant plants: Palisades on Lake Michigan, Point Beach in Wisconsin and the Ginna plant on Lake Ontario.

Activity noted in East Crane

A Crane area gained an extension and plans were made for a pool reentry

Atlantic Richfield Co. has completed No. 4-C Block 31 Unit as a 34mile southwest extension to Atoka production in the Block 31, East field, 15 miles northwest of Crane.

It finaled to flow 407 barrels of 40.8gravity oil and four barrels of water daily, on a 13-64-inch choke and through perforations at 7,500-7,508 feet, after 1,000 gallons of acid It is 1,320 feet from north and 2,640 feet from east lines of section 34, block 31, ULS. Amoco Production Co. intends to reenter and attempt completion above 9,000 feet at No. 1-FC University, for completion try as a 3%mile east extension to upper Pennsylvanian oil production in the Block 31, Northwest field. Originally drilled by Skelly Oil Co. as No. 1-E Texas, it was abandoned in 1949 Location is 736 feet from north and 1,979 feet from west lines of section 10. block 31, ULS.

and Winkler fields were extended.

Hilliard Oil & Gas, Inc., Midland, will drill No. 1 Grant-State, a 5,700foot searcher for oil in Pecos, 10 miles southwest of Imperial.

Location is 2,173 feet from northeast and 660 feet from southeast lines of section 18, block 10, H&GN survey COMPLETION

Mid-America Oil & Gas, Inc. Houston, has completed No. 3 Effie Sibley as an extension to Wolfcamp gas production in the Gomez field, 121/2 miles northwest of Fort Stockton.

The calculated, absolute open flow potential was for 2.950 million cubic feet of gas per day, with gas-liquid ratio of 12,154-1. Condensate gravity is 54.5 degrees.

Well is producing through per-

liner is hung from 10,2 feet

Wellsite is 1,980 feet from north and 660 feet from west lines of section 76. block OW, TCRR survey.

CRANE SEARCHER

Crown central Petroleum Corp. operating from Midland, has scheduled a 3,800-foot wildcat in Crane, as No. 1 Brown Foundation, It spots 7.250 feet from northeast

and 660 feet from southeast lines of section 3, block 1, H&TC survey.

WINKLER EXTENSION

Texaco Inc. has announced completion of No. 1-B Winkler Fee as a Wolfcamp confirmer and ½-mile southeast extension to that pay in the Flying W, Southeast field of Winkler.

A former Devonian well, operator has tentative plans to commingle Wolfcamp and Devonian production at a later date.

Location is 1,980 feet from north and 660 feet from east lines of section 27. block 46, T-1-S, T&P survey., 14 miles northeast of Kermit.

The Wolfcamp opener, Amoco Production Co. No. 1 J. M. Williamson, finaled March 4, for 132 barrels of oil per day, through perforations at 8,132-8,254 feet.

He said the commission would decide how much of the cost of labor and materials would be borne by consumers when VEPCO makes some sort of proposal on it. "I expect

stockholders to pick up the tab," he said. Some industry sources ridiculed VEPCO's repair estimate of \$60 million as too low and said it could cost five times that amount since

they're not going to just ask their

labor costs will be substantial. Costs of the coal and oil needed as replacement fuels cannot be estimated now for next year because of the unpredictable world energy situation, Wittine said. However, he said it would cost between \$215,000 and \$300,000 a day if the repair work began now, he said. Energy costs are expected to rise in the next year.

The two Surry plants produce 22 to 23 per cent of all power in the VEPCO system. Company spokesman Doug Cochran said the utility hopes to have the North Anna plant in Louisa County operational by the time the Surry repairs begin, although North Anna faces strong opposition from citizens' groups.

Spokesmen for each of four nuclear power companies contacted agreed that their plants remained reliable and had already paid for themselves, often twice over, in fuel savings costs to consumers.

"If these were coal-fired plants, such a conversation (about costs) wouldn't be going on," said Stello of

RRC slates 14 hearings

AUSTIN - The Railroad Com-mission of Texas' Oil and Gas Division has set 14 additional dates for hearings to review reservoir performance and re-determine the most efficient rate of oil, gas and water from major Texas oil fields.

As of June 9, the division had conducted hearings on 10 fields out of more than 30 that are on the review schedule.

All hearings are being held at the commission headquarters in Austin. The newly-posted schedule of

hearing dates are: Hastings, West field in Brazoria and

Galveston counties, Aug. 16; Hawkins in Wood County, Aug. 23; Anton-Irish in Lamb and Hale, Aug. 30; Fairway (James lime) in Anderson and Henderson, Sept. 7; Slaughter in Cochran, Hockley and Terry, Sept. 13; West Ranch (Greta and 41-A) in Jackson, Sept. 20; Wasson in Gaines

and Yoakum, Sept. 27. And, Tom O'Connor (5,900 sand) in Refugio, Oct. 4; Seminole (San Andres) in Gaines, Oct. 13; Neches Woodbine) in Anderson, Oct. 18: Kelly-Snyder in Scurry, Oct. 25; Claytonville (Canyon lime) in Fisher, Nov. 1: Yates in Pecos, Nov. 8; and East Texas in Upshur, Gregg, Smith, Cherokee and Rusk, Nov. 15.

stepout sites

Texaco Inc. has staked sites for two stepouts to Canyon production in the Big Salute oil pool of Sterling County, 13 miles southwest of Sterling City. No. 4-J Sterling Fee, slated to 7,920 feet, spots 1,320 feet from south and east lines of section 25, block 31, T-5 S. T&P 1/2-mile north and 5/8-mile

southeast of production. No. 2-K Sterling Fee, a 7/8-mile southeast stepout, spots 660 feet from north and west lines of section 29. block 31, T-5-S, T&P survey. It has a projected depth of 8,080 feet.

DRILLING REPORT

ANDREWS - Gulf No 1-A Fisher, td 4,589; pb 4,540 feet, swabbed 16 barrels of fluid, cut 25 per cent oil in 12 hours through perforations at 4,472-4.502 feet Texaco No. 3-Z State of Texas,

Gulf No. 939-D McElroy;

Pipeline personnel ready

By ROBERT WELLER

PRUDHOE BAY, Alaska (AP) ---Standing in front of a wall of flashing computer lights that would make a mad scientist proud, technicians wait for the order to begin sending oil through the trans-Alaska pipeline.

The order is due June 20, but it probably could be carried out now.

We could pump oil right now, says Mike Jens, who is in charge of operations at Pump Station 1 for the Alyeska Pipeline Service Co.

That station is where the oil from the richest oil field in North America begins to flow down the 800-mile-long tube

Alyeska is the consortium of oil companies which have built the \$7.7 billion pipeline.

Jens says Alyeska is taking no chances with an early startup.

"We wouldn't feel comfortable starting up now, because we couldn't pump oil reliably ... that's part of startup, to make sure your equipment is relable," he said

Testing last week, for example showed that an important valve was malfunctioning. It had to be flown to Texas for repairs.

And there are "continual lastminute problems," Jens added. "We have put a number of hours on all the equipment so that when we push the button on that magic day we have a great deal of confidence that things will work.'

ALRINA S

AUG

Henry Moller, Alyeska vice president for operations, agreed that oil flow could start earlier than planned but added, "We don't do things in a great rush. Everything should be so practiced that it looks like they are doing it just one more time

Alyeska has another reason for sticking to the June 20 date.

"We made a commitment to the federal government not to start until we gave 60 days notice. June 20th is the 60th day," Jens said.

Before oil reaches Pump Station 1 it must be extracted from the ground and processed. Two of the eight pipeline owner-companies - Atlantic Richfield and British Petroleum are responsible for that.

Both collect the oil at what ARCO calls flow stations and what BP calls gathering centers. There the oil is separated from gas and water before being sent slightly less than two miles to Pump Station 1.

Ben Odom, manager of ARCO's Prudhoe Bay operations, says both companies are ready to begin delivering oil

"We are in communication with Alyeska and BP on a daily basis ... we will do what they want us to do, when they want us to do it," Odom said.

Alyeska handles the oil once it reaches the pump station. Moller compares it with "giving the keys of your car to your son. He has custody, but it's your car.

Each owner-company gets its share of the oil once it arrives at the ice-free port of Valdez, the southern terminus of the line.

Alyeska expects it to take 30 to 45 days for the first oil to reach Valdez. Normally it would take much less time, but the flow will be restrained so the line and pump stations can be monitored carefully for leaks and mechanical problems.

In Valdez the oil will be loaded into tankers. Nobody knows for sure where it will go from there.

There are several proposals to build pipelines from the West Coast to the Midwest or to use parts of existing pipelines, as well as talk of sending the oil to Japan in a swap for Middle Eastern oil that then would be sent to the Northeast.

Another idea is to ship it through the Panama Canal to ports on the Gulf of Mexico. Still another scheme would be to use railroad tank cars to get the crude to the Midwest.

Odom and his BP counterpart are concentrating on making sure they can supply the 600,000 barrels the pipeline is scheduled to carry each day after startup.

Each company is to supply 300,000 barrels. Preparations so far include trial runs in which "we pretend to open the valves. The man will walk to the valve and he will say, 'I am opening this valve. 'It looks kind of silly, but we don't

want to ask him to go open that valve and find he doesn't know where it is,' said Odom, who has been with the pipeline from the start. Two full-scale drills are planned

Rumors of the emergence of a new generation of the socalled Kennedy dynasty have circulated in recent weeks among Massachusetts politicians.

Joe is brawny, curly-haired and taller than others in his family. He bears a striking resemblance to his father and his two uncles, the late President John F. Kennedy and Sen. Edward M. Kennedy.

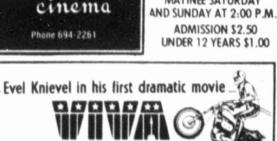

The young Kennedy is a Democrat, and if he decides to run for treasurer, he'll have to confront the Democratic incumbent, Robert Q. Crane, who says he will seek re-election.

Crane, who has done political work for a succession of Kennedys, was the object of a well publicized grand However, the grand jury did not return indictments

Asked whether he was worried about the reports

challenge him, Crane he says. "And that may said, "I don't think or may not be running for elective office.'

a creek bed.

DALLAS (AP) - Ex- learned the cause of actly four months after death.

Ladina McCoy left from The girl vanished Feb. home for school, clut-11 while walking the 10 blocks from her home to ching a purse filled with Valentines for her school on a rainy morning. Some other children classmates, a man discovered the remains of said they saw the girl walking and heard a car the seven-year-old girl in quickly pull away when The badly decomposed. they looked away. She was gone when they lookskeletal remains were found Saturday and idened back.

Dr. Linda Norton of the tified Sunday by the Dallas County medical medical examiners office said identification was examiner's office those of the East Dallas first made largely through clothing since Ladina had Robert Maxam, a no dental records and no

history of broken bones. A piece of red cloth, furnished by Mrs. Barbara Baughman, the girl's mother, proved to be the key in making

identification of the remains, Dr. Norton said. The body, was still clothed in the red knit pants, white blouse and a multi-colored pastel sweater she was wearing when she left for school. Officers theorized that the body had been in water that evaporated during the recent dry spell

Dr. Norton did not disclose the cause of death, saying that police officers had asked her not to reveal anything. The medical examiner's office will conduct more tests in their investigation, she said. Dr. Norton also said

she could not pinpoint the time of death and could not say if the child had been killed in the creek bed

The girl's family left its apartment here Sunday after learning of the identification and went to the home of a relative in nearby Garland. Mrs. Wayne Hogan, an

aunt, said Mrs. Baughman was "resting comfortably," but would not talk to reporters. "The hardest part now is accepting the truth. It's been a long, very hard four months. The waiting

is over, but what a dreadful way for it all to end." Mrs. Hogan said. QUAD

NORTH MYRTLE BEACH, S.C.

(AP) — A jubilant Chako Higuchi said

after winning the Ladies Professional

Golf Association Championship

Sunday, "It's going to be a great thing

Mrs. Higuchi finished three strokes

SECTION

ahead of Pat Bradley, Sandra Post and Judy Rankin, who tied for second with 282s and earned \$10,953 apiece.

Higuchi wins by three

Japan's Chako Higuchi plays an iron shot on the way to surprise victory in the LPGA championship Sunday.

Mrs. Higuchi said she deliberately did not look at the scoreboard until after the last of her five birdies, on the 15th hole. "It was not until that point

back side, plus the 15th.

JoAnne Carner and Joyce Kazmierski tied for fifth at 283 and earned \$5,715. Mrs. Carner had the best round of the day, a 65, tying Kathy Mc-Mullen's third round for the best round of the tournament.

Albert, Pepper pace Cubs over Dodgers

SPORTS

BY TED BATTLES

The Midland Reporter-Telegram

MONDAY, JUNE 13, 1977

Jeff Albert lost the first game of the series with San Antonio, but anyone who saw him snuff out the Dodgers on five hits at Cubs Stadium Sunday night might have found it difficult to believe this was the same guy

A 7-3 loser in that opener, the native New Yorker was a 7-3 winner in the game that gave the Midland Cubs a 4-3 edge in the Texas League series.

'The difference was the fastball,'' confided Albert after the game. 'Tonight I could get it over. The other night I couldn't control it," and, as a result, walked himself out of the game with seven passes. Sunday he walked just three and only one figured in the scoring.

"HE HAD a good fast ball and made them hit it on the ground," Manager Jim Saul said. "And he also had them swinging in front of the ball a lot with a good changeup.

Saul also was pleased with what first baseman Tony Pepper's 3-for-4 night might mean in the future. Tony didn't just go 3-for-4, he crushed the ball in the process.

The big Californian tripled into the right-center corner to the wall to start the two-run second, singled sharply to right in the two-run third and then got his best wood on the ball in the threerun fourth when he doubled off the top of the double deck fence in center. Any place else and it would have been a 420 foot homer

'I knew I had a chance at hitting for the cycle that last time up and I was going for it," Tony admitted. However, he bounced out to third and didn't get a second opportunity.

Cubs averages

"IF TONY hits like that, it's going

ab r h 2b 3b hr rbi avg. 181 45 67 14 3 18 67 370 174 31 51 9 4 0-16 293

"The first play was easy," said

the last time Jeff pitched. I booted one and then Charles Meyers hit a homer.

PAGE 1D

Pepper's triple, a hit batsman and singles by Steve Haug and Albert tied it in the home second. In the third, the Cubs ripped off five straight singles against first-game winner Mike Seberger for two runs, Joe Hernandez and Pagel producing the run-scoring hits.

In the fourth, an error, Hernandez' run-scoring single and doubles by Pagel and Pepper made it 7-2.

ALBERT'S only serious trouble came in the seventh when Leonard singled, Farr walked and Mike Rushde singled to load the bases. But then Davis proved he's really on Albert's side by starting a double play, although the run scored.

CUBPRINTS - The Cubs are off today and Saul plans to hold a workout to go over fundamentals before the club leaves for Amarillo Tuesday and the series opener Wednesday night....Carlos Lezcano bounced off the fence in right to rob Rick Ollar of extra bases in the first while Ollar came up with the defensive play of the night for the Dodgers, a diving catch after a long run to onehand Albert's sure-single...Albert felt his fast ball was moving as well as behaving, but still feels his best game in a short pro career was a 17strikeout, no-walk game for Bellingham, Rookie League, last year.

Although you'd never have guessed from the way they played against the Cubs. Ollar wished the Cubs luck in their drive for the first-half pennant, "We don't like that El Paso bunch any more than you guys do.

Meyers 2 Fischetti 3b Boras 3b 5 1 Hernandez cf 4 2 Pagel 1f 4 1 Smith Leonard of Farr o Pepper 1b Lezcano rf Davis ss

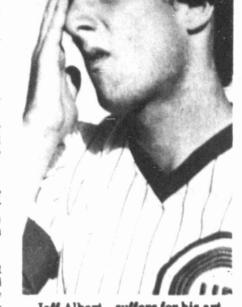

Rogers sa

Jeff Albert...suffers for his art.

Ted Farr's two-run homer in the second gave San Antonio a 1-0 lead. The blow came after shortstop Steve Davis made one of the outstanding plays of the year to retire Cleo Smith. Steve went into the hole toward third getting off a throw to first

Then, on Jeff Leonard's routine grounder right at him, Davis fumbled the ball to set up Farr's homer.

Davis with no sign of a tongue-in-"I figured I had nothing to cheek. lose, so I just cut loose with the throw

to be tough to pitch around either Karl (Pagel) or 'Tony,'' Saul's mouth-

Pagel contributed a double and single to the Midland attack for two more rbi, 69 now for the year.

to glove the ball and had no time to plant himself in whirling around and

watered at what that could mean.

Mickey Howard, Texas Electric lineman

"All of us at Texas Electric get electric bills too, and they're up.That's why I'm trying to use less."

"My electric bills have gone up like everyone's.

Of course, working for Texas Electric, I'm more aware of how expensive new plants are and how high fuel is. But that won't solve my problem at home.

That's why I'm checking the weatherstripping around all my doors and the caulking around the windows.

I mean I could feel air under the door and I'm paying for it. So I put storm doors on and that really made a difference.

Gives me four inches of dead Electric air. And that's a lot better than nothing."

Electricity. You count on it today. We're working to keep it that way.

Renault loss keeps LeMans race alive

LE MANS, France (AP) - A record fourth triumph by Belgian Jackie Ickx in a Martini Porsche Turbo 936 may well have saved the Le Mans 24 hour endurance race for yet another year

The triumph of the German car in this weekend's dramatic edition of the race dealt a severe blow to the ambitions and prestige of the Renault Alpine team, which had entered four cars and dominated the first part of the race only to see its entries knocked out one by one.

"We just cannot avoid coming back again next year," said Renault team manager Gerard Larrousse, himself a winner here in 1973 and 1974.

He was clearly referring to the \$350,000 the state-owned French company had invested in preparing the Le Mans team, hoping to sweep the event and then concentrate on Formula I racing starting early next month in the French Grand Prix at Dijon

"It would be silly to invest all that money and then give up as a loser." one racing expert said after the stunning Renault defeat.

Without Renault and its drivers, the race would have surely become a minor event next year.

Bert Campaneris, Texas shortstop, completes double play throw to first during doubleheader at Fenway Park Sunday

THE MIDLAND REPORTER TELEGRAM, MON., JUNE 13, 1977

Bosox' sweep trims Yanks' lead

By The Associated Press

Boston pitcher Luis Tiant, hurling a complete game for the first time this season, gave up just three hits in leading the Red Sox to a 2-0 victory over the Texas Rangers Sunday as Boston completed a doubleheader sweep.

The Red Sox won the opener 3-2 when pinch-runner Rick Miller scored from third on Fred Lynn's sacrifice fly

Tiant struck out eight and walked none in evening his record at 4-4. The 36-year-old right-hander, who has won 20 games in three of the last four seasons, received all of the support he needed in the first inning when Rick Burleson and Jim Rice doubled and Carlton Fisk singled.

Boston's two victories coupled with New York's 6-1 loss to the Minnesota Twins narrowed the Yankees' American League East lead over the Red Sox to just one-half game. Twins rookie Paul Thormodsgard tossed a five-hitter and Rod Carew and Larry Hisle each hit two-run homers to down New York

Chet Lemond, who hit a two-run homer in the sixth, reached first on an error to lead off the 11th inning, stole second, went to third on a throwing

error and scored the tie-breaking run on a wild pitch as the Chicago White Sox defeated the Baltimore Orioles,6-

Milwaukee's Jerry Augustine hurled a seven-hitter to lead the Milwaukee Brewers to a 4-0 victory over the Kansas City Royals. Joe Rudi drove home five runs with a pair of home runs as the California Angels crushed the Cleveland Indians 11-4, giving Angels hurler Nolan Ryan his ninth victory of the season.

A pair of two-out singles by Ruppert Jones chased home two runs as the Seattle Mariners downed the Toronto Blue Jays 5-2. Vida Blue snapped a personal five-game losing streak, pitching the Oakland A's to a 7-1 victory over the Detroit Tigers.

Mike Tyson's two doubles drove in three runs and Hector Cruz added a solo homer as the St. Louis Cardinals downed the Los Angeles Dodgers 5-2. Jeff Burroughs smashed a three-run homer in the bottom of the ninth to lift the Atlanta Braves over the Philadelphia Phillies 5-3.

The New York Mets defeated the Houston Astros 3-1 as Tom Seaver tossed a five-hitter and Len Randle scored the winning run on a wild pitch. Gene Clines scored the tiebreaking run on Bobby Murcer's sacrifice fly as the Chicago Cubs edged the San Francisco Giants 6-5.

Cincinnati swept a doubleheader from the Montreal Expos, 7-6 and 14-8, The Reds won the opener when pinchrunner Ed Armbrister scored on a ninth-inning grounder, then blasted Montreal pitching for 20 hits in the

nightcap, including three doubles by Dan Driessen.

Dave Parker's solo homer snapped a tie and gave Pittsburgh a 7-4 nightcap victory over the San Diego Padres after the Pirates had won the opener, 6-1, behind pitcher Jerry Reuss' first complete game of the season

Bears, Gophers try again today

OMAHA, Neb. (AP) - Don't tell Minnesota and Baylor-or the crowd of 8.869 that was in attendance Sunday night for the College World Seriesthe one about a tie being as exciting as kissing your sister.

They won't believe it

Tournament co-favorite Minnesota and Baylor battled to a 3-3 tie when rain forced the game to be suspended in the top of the 11th inning

Minnesota Coach Dick Siebert summed it up best, saying, "That was some kind of show for baseball fans. There was something for everybody. Maybe it wasn't beautiful, but it was one lot of baseball

Along the way the crowd saw: A submarine pitcher who walked

10, but still was around at the end. -Minnesota's third base coach.ex-

major leaguer George Thomas. ejected from the game, then reportedly making a comment about the afternoon drinking habits of some umpires

-A pair of intentional walks that came within an eyelash of forcing in the winning run.

The game was moved to the evening after a brief afternoon shower and thus forced the two scheduled night games-Southern Illinois, 39-10, against Arizona State, 53-11, and California State-Los Angeles, 41-20, against South Carolina, 41-10 - to Monday night

Baylor, 43-14, led 3-1 after six innings, thanks to some shoddy play. including two errors by All-American shortstop Paul Molitor of Minnesota, the No. 3 selection in the free agent draft last week

Facing elimination, Minnesota, 38-11, rallied for two runs in the seventh

Tmpsn

Sykes

Howell Fairly Rader

Brutto De Barr

on an error, a triple by Tim Loberg and a run-scoring single by No. 9 hitter Tarry Boelter.

In the bottom the 10th, Kenny Kolkhorst doubled with one out and Minnesota elected to issue two intentional walks around an infield out. Dan Morgan, a 6-foot-4 junior righthander who throws nothing but submarine pitches-and at times extremely slow-ran the count to 3-1 and appeared to have walked in the winning run with his next pitch. But a delayed strike call by plate umpire Gus Steiner made the count to 3-2 and Fritz Connally grounded out on the next pitch.

"Give both pitchers a lot of credit." said Siebert. "They faced some very tough situations and continued to come through with outs when they

BOSTON

For a second straight night, Baylor had strong pitching-a seven-hitter by Burl Coker-but came away with nothing

"We needed that one," said Coach Mickey Sullivan, whose team lost 3-2 to South Carolina in 10 innings on an inside-the-park homer Saturday night. "That ole boy (Morgan) was a little unorthodox, but he's a good pitcher.

The game was to be resumed in the 11th inning today.

And most of the crowd also witnessed some natural excitement on the field

The sudden storm turned the infield into a pond before the ground crew could get it completely covered and lightning temporarily knocked out the lights twice and finally darkened the left field light towers.

And it was only a losers' round game

ST. JOVITS, Que. (AP) - It almost looked too easy Sunday as Tom Klausler drove his Schkee DB-1 to victory on a wet track in the first race of the 1977 Can-Am Challenge series.

Going into the race, the Palatine, Ill., native was one of many given a chance to take the first race in the revived series. Can-Am racing was dropped following the 1974 season.

The race was a tossup because Jackie Oliver of England, the 1974 Can-Am champion, was absent due to Formula One commitments in Sweden

CHRIS AMON of New Zealand was the first of the favorites to drop out of the race, abandoning on the seventh lap with control problems in his Wolf Delara. Americans Elliot Forbes Richardson in a Lola, Bobby Brown in a March and Randy Lewis in a Shadow dropped out with mechanical problems in the 15th, 22nd and 36th laps, respectively.

But even before they dropped out, Klausler showed he was a cut above the rest by lapping all the drivers except Amon

'It's a real driver's track, I'll drive up here any time," said Klausler, who has twice won Quebec's Trois Rivieres Grand Prix for Formula Atlantic cars.

IN SPITE of his huge lead. Klausler's victory was in doubt on the 28th lap when he went into the pits for a long stop for gas and a change from rain tires.

"I didn't think it lasted four mnutes," he said of the stop that had fans wondering if he was out of the race. His car requires that the whole rear end come off to change tires.

"We'd better cut the back off before the next race.

During the stop, Horst Kroll of Toronto and John Gunn of Miami, both driving Lola's, surged ahead by more than a lap. But Klausler came back and overtook both cars, with Gunn finishing second and Kroll third

9-1 shot wins Futurity

RUIDOSO DOWNS, N.M. (AP) ---Prissy Gold Digger wasn't known much outside of Oklahoma and most of the people at Ruidoso Downs didn't think she had much of a chance the \$512,080 Kansas Quarter Horse Futurity.

But the 19-1 outsider, with only a paltry \$5,004 in career earnings, turned on an early burst of speed after taking an uncertain jump from the gate Sunday to upset favorites Diamond Chicklet and Blinkers Off in the first leg of the Triple Crown for two-year-old quarter horses.

"This filly is just now comng into herself," said jockey Harley Crosby, who booted Prissy Gold Digger to the wire for a one length victory in the 350-yard scramble

Crosby said Prissy Gold Digger 'just ran a great race. She stumbled a bit leaving the gate, then she picked herself up and went to running.

The victory was worth \$168,857 for the filly's owner, Cadillac dealer Robert W. Moore of Oklahoma City.

Moore could derive more than \$450,000 from Prissy Gold Digger before the summer is out, too, if she is able to sweep the Triple Crown with victories in the \$400,000 Rainbow Futurity and the \$1 million All-American Futurity at Ruidoso

Prissy Gold Digger won the 27th running of the regionally televised Kansas Futurity with a clocking of 17.81 seconds and paid \$40.40, \$14.20 and \$7.20

Diamond Chicklet, which was 7-2-1 in 10 races for earnings of \$81,972 going into Sunday's battle, went off as the 8-5 favorite. He came on strong at the end but wasn't able to make up the ground he lost in the first 100 yards of the race

Payoffs for Diamond Chicklet were \$4.40 and \$3.20. He earned \$70,484 for

Bears to join in rejuvenation

By BOB OATES The Los Angeles times

CHICAGO - After a long slump this is a city making a comeback. In baseball the Cubs and White Sox have returned from the dead and in football the Bears have lately improved remarkably.

A year ago the Bears showed everything but a pass offense and this year they may have fixed that. As their new offensive coordinator they've hired Sid Gillman, the former Ram coach who is probably the game's top pass-offense expert.

'It comes as no surprise to me that this club is suddenly on the rise.' Gillman says. "They made the big move here two years ago when they brought in two professionals: (general manager) Jim Finks and (coach) Jack Pardee. The Bears are destined for success now because we're being run by skilled pros. There are three kinds of football teams, you know - winners, losers and those coming up or going down - and the differences in each instance is

management. If the guy who calls the shots for you knows football, you win. Show me an owner who doesn't understand football and I'll show you, a loser.

PAGE 3D

MOST OF the National Football League's 28 teams are chronic losers, Gillman notes, continuing:

"The draft can't equalize these teams. There's no way to equalize them by changing the rules or adding more games. The 16-week schedule next year means only one thing: the winner will win two more games and the losers will lose two more. Then the winners will draft low again and the losers will draft high. And again it won't make a damn bit of difference. A winner in football is a professional who knows how to put together a winning team --- as Tex Schramm did in Dallas, Al Davis in Oakland and Jim Finks in Minnesota. If you want to catch up with pros like them, you can't do it by changing rules. You've got to find yourself another pro and let him call the shots."

At 65, Gillman has lost none of his enthusiasm for his favorite sport.

"I've had a recent opportunity to compare my energy with others," says, recalling his first busy days in Chicago this spring with the youngsters on the Bears' coaching staff, "and I still rate 'A'. I still love what I'm doing. I won't ever give it up. Football isn't my job, it's my life. The thing I enjoy the most is getting up and going to work at 5:30 or 6 and staying with it day and night. Some people are old at 30. Some get younger as they gather years chronologically. My view is that getting old is for other folks. There isn't much I can't do today that I did 25 years ago. Of course I can't run as far or as fast - but who needs it?"

A FORMER All-Big 10 end at Ohio State, Gillman has spent half a century in football, including 22 years with pro clubs in Los Angeles, San Diego, Houston and, as a scout last fall, Oakland. If he's on the football field you can't miss him. He's the restless, stocky one with the bulging calves, bulging chin, deep-set piercing eyes and the thin lips that contract to nearly nothing when he is angry or concentrating.

Lions split

in twinbill

HOBBS, N.M. - The Midland East Side Lions went on a hitting tear in of a the nightcap doubleheader with Hobbs here Sunday afternoon, and earned a split with the Stars, dropping the first 14-6, but taking the second, 15-7.

Ray Rayos picked up the win in the second game for the Lions with plenty of offensive help from his teammates. including Javier Torrez, who had a home run.

Denny Ray of the Lions had a homer in the opener and Mario Torrez went three-for-four, but the Stars had a field day on the East Side team's pitching to pick up the win:

The Lions, now 7-7 on the year, will be home next Sunday, entertaining the Andrews Mustangs in a 1:30 p.m. doubleheader at Simon

iephraam wins

Abilene tourney

ABILENE - Midland Country Club tennis pro Keith Diephraam defeated Barry Laing, Dallas CC pro, 6-1, 6-3, to win the Abilene Tennis Tournament Sunday.

Diephraam and Bill Harris, Midland, lost in the semifinals of the doubles tournament.

Diephraam left today to play in the U.S. Nationals 35 Tournament at San Antonio. The Midlander is seeded fifth in the week long tournament, ranking just ahead of Frank Frohling and behind Fred Stolle.
