plants from taking more moisture from the parched ground. (AP Laserphoto)

Probe witness to testify

By JIM ADAMS

WASHINGTON (AP) - Suzi Park Thomson, the reluctant witness in the House investigation of alleged South Korean attempted influence-buying arrived on Capitol Hill today. reportedly ready to begin answering questions. The former secretary to retired House Speaker Carl Albert planned to meet in a closed-door session with investigators for the House Ethics Committee in an attempt to head off a contempt of Congress citation, her lawyer said

Hirshkop, promised that Ms. Thomson would answer all questions about the alleged influence-buying.

contempt over her refusal to answer Wednesday after the lawyer, Phillip three questions.

1975 congressional trip to Korea.

Her lawyer said she was asked whether she knows of "payoffs" by Park or former South Korean am-

Congress, plus what she knows of a

Ms. Thomson gave parties attended

by congressmen and Korean officials

and had an affair with one con-

gressman then under investigation in

connection with the alleged influencebuying

But she has denied any involvement or even knowledge of such an operation and said the affair was a private bassador Kim Dong Jo to members of matter that involved nothing of national interest.

Vance ends China talks

more aware

By BARRY SCHWEID

PEKING (AP) - Secretary of State Cyrus R. Vance wound up four days of talks with Chinese officials today without claiming progress toward normalization of relations.

But Vance told a news conference that the talks, which included a lastminute meeting with party Chairman Hua Kuo-feng, "enhanced our mutual understanding of a wide range of issues.

Hua presumably told Vance that if diplomatic relations are to be established between the United States and China, Washington has got to make the concessions by cutting its ties with the Nationalist Chinese government in Taiwan.

"I go away from here better informed, certainly there is no question about that," Vance said after his afternoon meeting with Hua, the 57year-old successor to long-time Communist party Chairman Mao Tsetung. Vance, as he had at the start of his visit, described the talks as 'exploratory.

Speaking of the effect of the meetings on both sides. Vance said: "We are both more understanding and thus in a position where we have a better grasp of the problems of normalization.

Hua, who was meeting a high-

promised progressively closer ties between Peking and Washington.

"We appreciate that," said Hua. The Chinese leader said he understood Vance considered his visit 'an exploratory one.

'We also think it's good for the new administration to send someone here to explore China and to get to know the leaders of China," Hua said.

Vance's meeting with Hua followed four negotiating sessions with Foreign Minister Huang Hua and a discussion and dinner Wednesday with Vice Premier Teng Hsiao-ping, one of China's three top leaders.

The secretary of state, in a dinner toast to his Chinese host, said the United States "looks forward to the movement forward of the relations of our two nations.

He said his talks had been candid. "useful and helpful." And he assured the Chinese that the Carter Administration is committed to the 1972 Shanghai Communique signed by President Nixon and Premier Chou En-lai which pledged the two countries to move closer together. "We believe this visit to Peking is an important step toward progress along that road," said Vance.

Teng in his toast told the American visitor: "Our view is that we should move forward to full normalization of

She appeared with her lawyer and a young woman described as her niece. She had no comment but her lawyer said she might talk to reporters later.

Investigators had sought to question her earlier, but she insisted on answering the committee's questions only in public, saying she feared secret testimony would be distorted against her.

Sources said the committee held off deciding on a contempt action

But Hirshkop said Ms. Thomson did not intend to answer questions about her personal life.

In another development, special committee counsel Leon Jaworski said Wednesday he is confident the panel will get testimony from Korean rice dealer Tongsun Park despite his vow not to cooperate.

Jaworski called Park's testimony 'highly significant'' and said the committee has a strategy - which he refused to spell out - to get it.

But Jaworski, the former Watergate special prosecutor, added, "I don't believe his testimony is something that is either going to

make cases or is fatal to cases.' Ms. Thomson has said she knows nothing about any scheme to buy congressional influence.

The committee's investigators threatened last week to cite her in

Midland hospital buys Mast Clinic property

Midland Memorial Hospital has purchased the Mast Clinic property located immediately south of Illinois Street across from the hospital, Wayne E. Ulrich, hospital administrator, announced Wednesday. Purchase price for the building and

property was \$300,000. 'Sometime ago when we learned

that the property was for sale, our board of trustees entered into negotiations to acquire it." Ulrich said. "The board has long recognized the need to acquire adjacent real estate to provide for future hospital expansion.

This additional property brings Midland Memorial's total fixed assets to \$8.2 million." Ulrich said. "This purchase is in keeping with our progressive plans to expand and to

AMARILLO, Tex. (AP) - Priscilla Davis testified today she has taken up to 100 painkilling tablets a week and that she was aware of their addictive dangers.

of her estranged husband Cullen.

It was after the shootings at her

"I have never been told I was ad-

Richard (Racehorse) Haynes in a vigorous attempt to discredit Mrs. Davis' testimony

However, Davis is on trial only for the slaying of Mrs. Davis' daughter Andrea, 12, whose body was found lying in a basement utility room.

Haynes took the state's star witness through a day-long examination Wednesday of her friends, acquaintances, lovers, lifestyle and her previous testimony.

He touched on topics ranging from drugs to guns and set off a flurry of courtroom excitement when he produced a color photograph of Mrs. Davis with a partially nude male friend.

Prosecutors blocked the poster-size photo from admission as evidence but the defense indicated it would renew its efforts later to get it to the jury.

Although not visibly disturbed by the photo, Mrs. Davis broke into tears during the closing moments of testimony as she recalled events

leading up to her brush with death. She steadfastly maintained that Davis was the man in black, wearing a shoulder length woman's wig, who

stepped from a stairwell, said "Hi" and shot her in the chest. In a surprise series of questions about the killer, there was this exchange between Haynes and the witness:

'Was the subject Horace Copeland?" Haynes asked.

'No sir," she replied. "Was it W.T. (Rufner)?"

"No, it was Cullen Davis."

"Was it Robert Downing?"

"No sir." "Was it David Hack?"

"No sir."

Switching abruptly to a previous statement by Mrs. Davis, Haynes pointed out her earlier remarks conflicted in part with her trial testimony.

As she struggled to explain her emotions at the time, Mrs. Davis said

when she saw the bloody handprints on a wall and door of the mansion she knew something was wrong.

"I saw the blood," she said, gesturing nervously with her hands."My whole mind was going ... I wanted to find Andrea . . . I screamed: Stan. come down here, Stan!"

"I was getting more and more panicky," she said, when her voice broke at that point and the judge ordered an end to the day's testimony.

Afterwards, Haynes would not discuss the names he tossed at the witness.

Davis dismissed reporters' questions by identifying those persons simply as "characters in the drama." Mrs. Davis previously identified her companion in the photograph as

W.T. Rufner but told Haynes she did not recall the picture being taken. the Although the judge ruled photograph inadmissable, a pro-

secutor grumbled, "the damage was done.

Air corps player could smoke 'em, stroke 'em

Smokey Joe must figure that he's just about the winningest pitcher and best darn hitter he ever knew . . . outside the major leagues.

"I lost five games in 14 years," said the trail blazer, who pitched baseball in the Army, in the old Army Air Corps and for semi-pro teams in the 1930s and in the early '40s.

He's not modest about his feats. Nor is he immodest. He's just straightforward.

'When I went out there to pitch." Smokey Joe said, "I went out to win. I had one of the fastest downers (sinkers) you ever saw.'

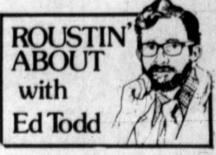

This ex-baseball character, whose straight name is William Frederick (after "Buffalo Bill" Cody) Woods, also, was a top-notch batter.

He vouched for that himself.

"Hell," he said, sort of swearing, "I never hit below .349. That was my lowest batting average."

Woods, who just turned 66 on Wednesday, has been out of baseball and the air corps for many years now. But the passing of years has in no way dampened his spirits, enthusiasm and willingness to rap about those things he favors best.

Before he got stuck with the Smokey Joe nicknamed, Woods was just plain Bill in high school at Center. He was on the baseball mound then and put on a good show.

After high school, trim 'n' tough Bill Woods tried to get into the flying corps but ended up in the infantry down at Fort Sam Houston. That was in 1931. Jobs were scarce.

'Hell, you couldn't even buy a job,' he said.

When he wasn't soldiering or doing something else, young Bill Woods was out on the baseball diamond. He was in the 23rd Infantry.

And he made good.

His downers, curves, fastballs, screwballs and the rest of his repertoire delighted his fans and teammates and impressed the opposition.

The fans started calling him Smokey Joe after the original Smokey Joe Woods of Boston. He was a fireball of a pitcher in baseball's early years.

Before he knew it, Smokey Joe was (Continued on Page 2A)

City said together as school looms

said

Midland is approaching the school year together. Parker Humes, chairman of the Midland Alliance steering committee said Wednesday. just five days before the start of school and the court-ordered desegregation program in Midland)

Humes added that it was no surprise to him that the city would be entering the school year with the Alliance slogan "Midland Together" a reality.

Support for the Alliance and its goals to provide "a safe and orderly transition in August to the courtordered integration plan" and the creation of additional programs and services in the schools to insure educational excellence has come from a vast cross section of the Midland community, Humes said.

The 16 members of the Alliance steering committee have made more than 60 presentations, Humes said, adding that more endorsements are expected to come in.

The Los Angeles Times

he holds a 9-to-5 office job.

all-time high.

The Midland Alliance was formed to get broad-sectioned community support for a safe and orderly ap-

WASHINGTON - Every weekday

morning Ron Spitzer gets up before

dawn and goes out to do the chores on

his rural Illinois farm. Then, the

chores done, he climbs into a business

suit and his automobile and begins an

hour-long commute to Chicago, where

Spitzer is a moonlighter - someone

who holds down more than one job at

a time. And in a period when millions

of unemployed Americans are unable

to find any job at all, somehow the

ranks of Spitzer and his fellow

moonlighters have jumped up to an

Wednesday by the Labor Depart-

ment, 4.6 million Americans held two

or more jobs this May. That is an

increase of 15 per cent over the 3.9

million in May, 1976, and the highest

total in the 14 years that the Depart-

ment's Bureau of Labor Statistics has

Moonlighting follows no single

pattern. A decreasing share of the

total involves Spitzer's combination

of farm work and a city job. A quarter

to a third of all moonlighters are

people who work part of the day in

their own business and the rest of the

day for someone else. Some may have

two separate employers, such as the

teacher who works as a grocery store

been conducting this annual survey.

According to figures released

Parker Humes

regarded as regular working hours.

Analysts at the Bureau of Labor

Statistics admitted they had no solid

explanation for the jump in

moonlighting during the past year.

There is no apparent tie, they said,

between the rate of moonlighting and

the total level of employment in the

economy, the amount of overtime

hours being worked, or any other

However, at least one element

emerges from the statistics: while

women are moonlighting as never

before, the practice has fallen off

sharply among blacks and other

In 1962, 2 per cent of all working

women held two jobs. At present, 3.4

per cent are moonlighting. Mean-

while, the proportion of moonlighting

black and other nonwhite workers has

tumbled to 2.7 per cent from 4.6 per

THE MIDLAND REPORTER-TELEGRAM. THURS., AUGUST 25, 1977

the Alliance philosophy. The Midland Alliance was patterned after a Dallas group that may have helped that city get peacefully through the start of a busing program involving 80,000 students. Humes

popular. But now that we have it the

approach is to make it work the best

possible way it can." Humes said of

With the final days before school opening ticking away, the Alliance group has a heavy list of activities still on its schedule. And after phase one, the safe and orderly transition to the integration plan, has been accomplished, that Alliance will continue to work on phase two, the creation of additional programs and services in the schools, Humes said. Among those endorsing the Alliance

are First National Bank, Midland National Bank, Commercial Bank, Western State Bank, First Savings and Loan, Citizen's Savings and Loan, Midland Savings and Loan, Midland Association of Churches, Midland Junior League, Midland Chamber of

Commerce, Midland City Council PTA, Midland Independent School District Trustees, American Association of University Women. League of Women Voters, Midland Jaycees, Midland Girl Scout Leaders, Christ Presbyterian Church, Midland Association of Retarded Citizens, Midland Opportunity Auxiliary, St. Nicholas Episcopal Church, Midland Human Relations Council, Drilco, Magnatex, Southwestern Bell Telephone, Elcor Inc., Orthoff Corporation, Rocky Ford, Midland Reporter-Telegram, KCRS Radio, KWMJ Radio, KMID TV, Compressor Systems Inc., Twentieth Century Study Club, Casa de Amigos, KWEL Radio, KBAT Radio, Mid-West Electric, Sohio Petroleum, Abbott Building Company, Midland County Attorney Les Acker, First Presbyterian Church, Altrusa Club. Eastside Lions, PTA Executive Committees of Bonham, Bowie, De Zavala, Milam, Emerson, Pease, and Washington schools, and the First United Methodist Church Administrative Board.

More Americans moonlighting attending school and spends much of have squeezed out some job oprestaurant workers frequently have the weekend studying, so the wife has other jobs during what is generally

taken a Saturday job at a pizza parlor. Or, she said, there was the case of a policeman's wife who took a second job because her husband was on duty most weekends.

As for the decline in moonlighting among blacks, Mrs. Ratajczak said there were at least two possible explanations, one of them encouraging and one not.

The encouraging one, she said, is that reduced discrimination barriers since 1962 may have given blacks opportunities to obtain higher-paying jobs formerly denied them.

"They may be able to earn in 40 hours what they used to earn in 60 hours, and haven't set their sights on higher income yet," she suggested.

The alternative hypothesis, the more troubling one, is that increased penetration of the work force by white, better educated women may

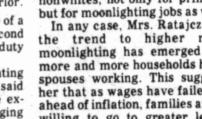

maintain their standards of living. According to the Bureau of Labor Statistics, workers most likely to be moonlighters are those in the prime working ages, 25 to 44. This is true for

Married men are more apt to moonlight than single men, according to the statistics. Among women, moonlighting is most prevalent among those widowed, divorced, or separated.

Order signed allowing county to collect taxes

State District Judge Vann Culp this and college districts, and the county morning signed an order to allow are correct in saying the tax should be Midland County taxing bodies to The bank said in its petition that it, collect almost \$225,000 in ad valorem rather than Hines, owns the building. taxes. The dispute has arisen because if the Culp ordered the district clerk to pay \$224,009 held in trust in litigation bank owns the property and pays the tax, it can deduct the value of the concerning 1976 property taxes for the property from the cash value of its Midland National Bank tower. The amount of taxes due the City of stock, which is taxed in a special bank Midland, Midland Independent School tax. District, Midland County Junior In his order, Culp said ordering the College District and Midland County The question at issue in the suit continue the legal fight.

portunities for blacks and other nonwhites, not only for primary jobs but for moonlighting jobs as well. In any case, Mrs. Ratajczak noted, the trend to higher rates of moonlighting has emerged even as more and more households have both spouses working. This suggested to her that as wages have failed to keep ahead of inflation, families are simply willing to go to greater lengths to

both men and women.

Still no location for fire station

No location for the city's new downtown central fire station has been selected yet, Midland Mayor Ernest Angelo Jr. said today.

Angelo said that the location of the new fire station will have to be between the downtown area and the Village Shopping Center.

On Tuesday, the Midland City Council approved a revenue sharing plan that would allocate \$500,000 for the construction of the new central fire station.

Although a consultant's report indicated the 1700 block of West Wall Street would be ideal from the standpoint of response time, no site in that area has been chosen. Angelo

City Attorney Joe Nuessle this morning said if the bank wins its suit the city will simply change the tax rolls to reflect the bank's ownership of the property.

UW agency works

with kids

"I really love it," Juanita Ramirez said. "I've worked with kids for about six years."

Mrs. Ramirez is an employe at La Florecita Nursery, which is budgeted through parents of the children and the United Way.

"She's not your average employe who only works from 8 to 5." Olivia Alcazar, supervisor in charge, said. 'She is very devoted and is being underpaid for what she does. She cooks, cleans, vacuums, mops and does any other chores."

"Right now we have about 30 kids from 2 years old up to six. We work on puzzles with them, color, try to get them to write some, and we take them to the park. I do a little bit of everything," Mrs. Ramirez said.

Mrs. Ramirez, mother of four, previously worked as a teacher's aide at Travis Elementary for five years.

"I think working with my children helped in working with other kids." she said. "About the only requirement for a teacher's aide at the nursery is that you have your GED and that you like kids and get along with them. That's very important."

roustabout and roughneck for the old Humble Oil and Refining Co. down at McCamey. That was in 1937.

Naturally enough, he pitched baseball for the company team. Shortly before that, he played semipro ball "and loafed" at Iraan. "I got fed up with that," he said of

his oil field work and play.

In 1938, Smokey Joe moved over to Los Angeles, Calif., where he shared a first-place prize in Uncle Billy Walker's radio talent show. He played the spoons to a rendition of the "Tweifth Street Rag," played on the "breathing French harp" by the mayor's son.

Later, Smokey Joe pitched for semi-pro teams in Atlanta, Ga. He was a pretty good outfielder, too.

In 1940, he, again, re-enlisted in the air corps and played on corps teams at Randolph Field at San Antonio and at. Goodfellow Field at San Angelo. Then along came the war.

Army Air Corps T. Sgt. Smokey Joe wound up as the flight chief for Brig. Gen. Otto P. Weyland, who was "over all the fighter planes in England," he said.

"He (Weyland) picked me out of 250 (candidates) to be his flight chief." Smokey Joe said.

"And Bobby Jones, the great golfer, was my intelligence officer." Smokey Joe said with his usual pride.

After the war, he worked for the old **Civil Aeronautics Administration as a** mechanician. His baseball days were

He left the CAA and went to other lines of work.

(Smokey Joe, it seems, just about has "done it all" before, after or during the war. He was partner in a night club at Shreveport, La. But the operation went sour, and he got out. He was a traveling cigarette salesman, a motel operator, an airplane builder and salesman, personnel counselor and so on. Those "things" span the decades.)

In 1948, three years after the war, Smokey Joe, once again, joined up. This time, it was with the Air Force. He worked in the Berlin Airlift. Again, he got out of the service.

That was in 1949, when he went to work for the Boeing. (aircraft)

Company. Later, he went into other lines of work.

And in 1960, he met a lady named Dorothy, a stenographer and notary public, in Dayton Beach, Fla. They were married the following year. Years went by.

In 1970, Smokey Joe and his helpmate moved to Midland from Phoenix, Ariz., where he had been a

personnel counselor. Smokey Joe retired

Still, he's a "spring chicken" - as he put it.

Instead of pitching baseball and doing whatever, he's bent on a crusade. It keeps him and the missus busy

Today, he's collecting tools, medicine, clothing, stable foods, Bibles and, yes, even money for a band of Hopi Indians in Arizona. A friend of his, Dr. M. S. Knisely, has joined in on the effort. (Smokey Joe has a couple of telephone numbers. should some folks want to give to "our first, original Americans": 684-4215 or 694-6311. They're in need, he said.)

And Smokey Joe, once he somehow gets the use of a trailer, is going to haul those gifts to the Hopi reservation. Some missionaries are

Like baseball was in his past, Smokey Joe's crusade for these

awaiting the tidings.

Juanita Ramirez works with some of the children at the La Florecita Nursery.

Midland

Citizens,

ANNAPOLIS, Md. - Maryland Gov. Marvin Mandel, who "doesn't have two nickels to rub together" according to acting Gev. Blair Lee III. Wednesday pondered a future described by a possible prison term and neither home nor job to go to.

Lee had breakfast Wednesday with Mandel, who was convicted the day before along with five other defendants on political corruption charges. Lee quoted Mandel as saying that he has no intention of resuming the role of governor prior to Oct. 7, the date he

is to be sentenced and, by law, the date he must relinquish the governorship

Mandel did not say, according to Lee, whether he would resign before Oct. 7. Mandel's wife, Jeanne, asked if the governor would resign before sentencing, replied "absolutely not." Strolling back to the governor's

mansion from lunch in a downtown restaurant Wednesday, a casuallyattired Mandel commented: "I have no home. I have no place to go.' He also faces loss of his status as a

lawyer through disbarment. Regulations of the Maryland Attorney Greivance Commission require that disbarment charges be filed against Mandel in the Court of Appeals following his sentencing as a convicted felon. A similar charge would be filed against co-defendant ernest N. Cory Jr., who is also a lawyer.

L. Hollingsworth Pittman, bar counsel (executive director) of the Grievance Commission, said that if the Court of Appeals determined that a lawyer has been convicted of a crime "involving moral turpitude," the offender may be suspended regardless of whether the conviction is being appealed.

Although "moral turpitude" is not defined in the regulations, the Court be handled no differently than any

other." the official said. of Appeals in 1974 disbarred a lawyer who practiced in the Washington

Mandel will draw a pension from the state regardless of whether he

resigns or is removed from office. Chris G. Christis, who heads the retirement system for Maryland's state employes, said Mandel will receive one-half of his \$25,000- a-year salary annually for the rest of his life. plus another \$2,000 a year as a pension for his 18 years service in the state's House of Delegates - a total of something over \$13,000 each year.

Christis said that state law requires only that a governor serve a full term to be eligible for a pension. "There is nothing in the pension law prohibiting the payment of pensions" to employes who have been convicted of a felony. Christis said.

Lee, who will become governor in fact/ whenever/ Mandel steps down, said it doesn't matter to him when that occurs because "the operation of state government is in my hands. All he is doing is occupying that house (governor's mansion) across the street.

PAGE 34

Lee, who was named acting governor by Mandel shortly after the start of the governor's second trial in federal court in Baltimore, said "the only tangible fact" to come out of their hour-long meeting Wednesday was that "he has no intention of withdrawing that designation (of acting governor), even though under the law he could come over here and say. 'get yourself across the hall," (to the lieutenant governor's office)."

Judge approves look at Nixon files

The Washington Post

WASHINGTON - A federal judge Wednesday approved a search of former President Nixon's private files in an attempt by the federal government to determine the location of possibly missing expensive foreign gifts.

At the same time however, U.S. District Court Judge Aubrey E. Robinson Jr. expressed reservations about the procedure under which such searches will be made in the future situations and suggested the government improve its regulations governing such searches.

Tests blamed for scores

The search through the foreign gift inventory contained in the impounded Nixon files will be the first made other than for national security reasons or legal proceedings.

Either Nixon or a person designated by him can attend the search and raise objections if he believes an item to be personal and private instead of a valid presidential historical document. The search probably will occur within a week or so, according to government attorneys.

The search had been requested by U.S. Protocol Chief Evan Dobelle after questions were raised about the location of certain gifts the Nixon family received from foreign countries

Nixon's attorneys won a temporary order blocking the search about one month ago from another judge who said the search could wait until Rodinson, who has heard other aspects of the Nixon papers cases, could hear arguments.

should make sure its regulations "insure there is minimal intrusion" on Nixon's privacy when such searches are made and that the regulations provide guidelines for the General Services Administration to follow when such searches are conducted.

The specific box of documents to be searched is reported to contain photographs of foreign gifts and lists of foreign gifts. U.S. law requires officials, including presidents, to turn over to the State Department's gift unit any foreign gifts worth more than \$50.

The Washington Post reported on Monday that, while some gifts to Nixon may be unaccounted for because of sloppy records, in some cases, State Department and GSA officials say the gifts are believed to Paso. be in the custody of the Nixons

'Keep 'em guessing'

Former Gov. Preston Smith of Lubbock is a past master in the art of keeping his name before the public and of "keeping 'em guessing."

And right now he really has a lot of people guessing as to which office, if any, he will seek in next year's elections.

The question mark loomed larger even when it was announced recently from Austin that Mr. Smith had filed his own name as treasurer for a 1978 political campaign. But he carefully avoided designating the office for which he might run. And if this doesn't make potential candidates for state and district offices scratch their heads, we don't know what will.

This is the sort of thing the former governor really enjoys.

He has intimated from time to time that he might run for governor again next year. But he apparently hasn't made up his mind for sure in this regard.

There are, however, a number of other possibilities for him to consider. Congressman George Mahon, also of Lubbock, has announced that he will not seek re-election next year, and Mr. Smith just might be thinking about the possibilities of going to Washington.

It is possible also that a state Senate vacancy might occur in his home district. Whether or not he might be interested in returning to the Senate is unknown at this time

He also has served as lieutenant governor, but there is considerable doubt if he would run against Bill Hobby for that office.

...PUBLISHER

Mr. Smith, in the past, also has indicated some interest in seeking a place on the three-man Texas Railroad Commission - another possibility.

And, of course, a U.S. Senate race is shaping up and the Lubbock businessman might join other Democrats in seeking to unseat incumbent John Tower, Republican.

There are other possibilities, but these perhaps are the major ones. Chances right now are that if Mr. Smith makes a race next year it will be against Dolph Briscoe for the office of governor. Smith served two 2-year terms as governor, 1968-1972, but lost his bid for a third term to Briscoe. Earlier, Smith had served 14 years as state representative and senator and six years as lieutenant governor.

The feeling is that he might like to return to Austin for a few more years. It also could be that the former governor just wants Texans to know that he stili is around - and available.

It is said, however, that the filing of a campaign treasurer's name with the secretary of state is just short of actually filing for office.

As the boys and girls on the air often say, "We'll just have to wait, and see.

THURSDAY, AUGUST 25, 1977

"It better come out whiter than white!"

WASHINGTON MERRY-GO-ROUND

Smith's private mailing clerks

By JACK ANDERSON and LES WHITTEN

WASHINGTON - Rep. Neal Smith, D.-Iowa, is a Midwestern farmer and lawyer with a reputation for being as straight as a stalk of Iowa corn. But the low-keyed Smith has been using his position as chairman of the House Small Business Committee to promote himself throughout Iowa. At Smith's direction, several committee lawyers and staff members have been preparing a huge mailing aimed only

at the voters in the congressman's

received a separate, personalized letter from Smith

Committee funds, we have learned, are being used to pay for printing the letters and envelopes. Any use of committee staffers for outside business, meanwhile, would violate the rules of Congress.

The counsel of one small business sources, however, say Smith "had his subcommittee, David Metzger, eye on the governorship. complained in a secret memo that the mailing was disrupting important congressional business. "I can undisrupted committee business because the five professional staffers derstand Mr. Smith's political reasons for wanting the mailing done quickly," Metzger fumed in a memo to the conmittee's chief counsel, Thomas Powers.

ART BUCHWALD Then there were the joints and washers

WASHINGTON - Investigators claim that \$1.5 billion were wasted building the Alaska pipeline. You are probably asking, "Where did the money go?

To find out, I spoke to Stanton Carruthers, my plumber.

Stanton wasn't surprised at the overrun since he's had similar ones fixing the pipes in our house. Although he didn't work on the pipeline himself, he has some good ideas why the Alaska pipeline cost so much to install

"I figure a billion of the overrun went for labor," Stanton said. "It's not easy to get a plumber to make a house call in Alaska. Then there was the pipe. The cost of pipe is going up every day, and probably the people who bid on the job didn't take this into consideration at the time. Then, of course, there were the washers. You have to have a lot of washers on a pipe 800 miles long

"It sounds like one of your jobs," I said

"Well, there's not much difference in building a pipeline and installing plumbing in someone's house. You have to expect an overrun or the plumber wouldn't make a profit. The guy who got the Alaska contract also forgot to include the joints in the pipe. Joints really add up, particularly if you have to thread them before you join them

how

"I guess you do have to have joints in an 800-mile pipeline. You would have thought the plumber would know he needed joints.

'You only find this out after you start the job. Remember that sink I installed for you?

'The one you said would cost \$200 and wound up costing me \$500?'

"That's the one. Well, what happened was after we installed the sink and the pipe we forgot to hook it up to the main water line.

"I remember that," I said. "I had to shave without water for a week. I cut up my face pretty bad."

'That can happen. So what we did was tear out the installation, drill a hole in your wall and hook up the pipe with the water. That's why we had to charge you \$300 more than we figured the job would cost."

"And something like that might have happened on the Alaska pipeline?

'I'm sure of it. They probably got the whole thing built and then discovered it wasn't hooked up to the oil. Then they had to tear it up and begin all over again.

They said a lot of the welding was of poor quality and the X-rays and records were forged.

"That's possible," Stanton said. "When you're working with pipe, you can do a lot of sloppy work. It's like that shower head I installed for you and it leaked all over the bathroom, and we had to come back and put in a whole new faucet system. That was faulty welding.

"Why did you charge me for it if it was faulty?

"Who was I going to charge - the guy next door? Everyone thinks plumbers are infallible. We're human, too. We make mistakes."

"That's for sure," I said. "But the one in Alaska was a lulu.

"You can say that because you didn't do the work. But if you were a you'd think differently umber.

Look, the pipeline was supposed to

cost \$1 billion Instead it cost \$8

billion. Most of that probably went for

Taxpayers' delight

It isn't very often that the longsuffering taxpayer has the last word in a controversy with the Internal Revenue Service.

But it appears that two million California residents soon may have that pleasure.

The IRS decided two years ago that the payroll deduction for the California state disability insurance fund was not a state tax like other state and local taxes which could be deducted from gross income by federal taxpayers who itemized deductions.

NICK THIMMESCH

The U.S. Tax Court, however, has rejected that reasoning in a case brought by two Californians.

If the IRS does not appeal in 90 days, those two million taxpayers will have a refund coming their way: It could mean \$50 to a typical taxpayer but the amount would vary by tax bracket.

regime

home state. Perhaps it is more than a coincidence that Smith may run for governor of Iowa next year. Important committee business has gone unattended, our sources say, while well-paid lawyers, investigators,

secretaries and clerks have spent weeks on such mundane chores as sticking on labels and licking envelopes. Between 150,000 and 200,000 letters are being mailed to Iowa residents, many of them outside of Smith's district. They explain that farmers who are struck by natural disasters, such as droughts, are eligible for special low-interest loans. Such letters have not been mailed to

any other state. "A bill which I authored and promoted," Smith proudly informs his fellow Iowans in the letter, passed the Congress a few days ago and may be of great and special interest to you." Mayors throughout Iowa also

mittee's publications specialist, Lois Liberty, has been so busy licking envelopes that she hasn't been able to prepare a committee report. The committee is falling behind on other projects due this fall involving solar energy and occupational safety and health "The deadlines do not lend themselves to losing an entire week in August," Metzger griped.

Smith, however, insisted to our associate Gary Cohn that the mailing is a proper and appropriate outreach program." He said that lowans are not aware of the disaster loans and he believes it is important to inform them of the new program.

The Iowa Democrat maintained that the mailing project was "only taking several hours." Several

IT HAPPENED HERE

1 1/25 "A fellow should begin to question his position when some folks start to agree with

SEOUL - For one generation now, the most insane regime in the Communist world, North Korea, looked down only 25 miles to this capital, vowing to conquer it and destroy the Republic of South Korea. For one generation now, combined U.S. and South Korean military forces stood fast, and the Communists did not invade because they knew that meant a war with the United States, whom they greatly fear.

But then President Jimmy Carter, in clumsy, traumatizing fashion, announced all U.S. ground forces would be withdrawn in the next five years. Now there is trepidation in this land and much adjusting in military planning.

The man charged with stopping any assault on South Korea is Gen. John W. Vessey Jr., the 16th successor to Gen. Douglas MacArthur as commander-in-chief of the United Nations command. Since one of his subor-dinates, Gen. John K. Singlaub, was exfled to Georgia by Jimmy Carter for observing that the troop withdrawal will lead to another war, Gen. Vessey measures his words.

"It's not absolutely necessary to keep our troops here." he says, with some reservation. But it is absolutely necessary to make it clear to the powers in this part of the world that we will stand by our commitment to South Korea.

"We must make it clear to Kim II-Sung (North Korean boss) that we will provide South Korea with whatever U.S. support is necessary to clean his clock for him if he attacks.

"The North hasn't changed its goal to unify the Korean peninsula. Its strategy is to separate the United States from South Korea and to create a climate of physical insecurity and political instability in the South. It hopes to succeed without military action, but it can threaten force. "If our commitment remains firm

to South Korea, with or without U.S. ground troops, and it is perceived that way by the North and South, and by the Soviet Union, China and Japan, well, South Korea will continue to strengthen, and I wouldn't be surprised that in 10 years time-if he's still alive-Kim Il-Sung will come hat-inhand, looking for a little help."

If you travel to the demilitarized zone near Panmunjom, you quickly sense the tension. It was in this noman's-land one year ago that North Korean sholdiers, shouting "Kill!," attacked a U.N. command group of Americans and South Koreans who were trimming a tree - with the prior approval of the North.

The North Koreans beat two American officers, with clubs and axes and then methodically crushed their skulls, as they lay unconscious on the ground. People looking at the autopsy photos became sick to their stomachs. Even the Communist world was disgusted with these murders.

Since the "end" of the Korean war, Communists have shot first and asked questions and tortured their victims afterward, Cmdr. Lloyd Bucher and his Pueblo crew; the 31 Americans killed in 1969 when a North Korean MIG shot down a U.S. Navy plane 90 miles offshore, clearly in the right; the scores of kidnapped South Korean fishermen; the three Americans, killed last July after their unarmed

Secretary Melvin Laird, in 1970. happy Communist soldiers are only some of the victims of an irrational recommended a pullout of U.S. ground forces from Korea, Gen Vessey says: "The problem was that The extraordinary restraint by the we didn't know then that North Korea United States following these incidents "probably doesn't do much to had embarked on a military buildup. They increased their jet combat by 30

discourage the North Koreans," Gen. Vessey observes. After learning of the latest vehement denunciation of the United States by the North Koreans, Gen. Vessey can mutter, "Those bastards are building up another incident.

helicopter was shot down by trigger-

From age three on, North Koreans are taught hatred toward the South and the United States. Children play military "games' and even learn arithmetic by subtracting "five South Korean lackeys" from "15 U.S. imperialists" and getting what?

When pecksniffs tucked away in Washington's safe lofts complain about South Korean President Park's repressive government, they might be forgetting that Park's wife was killed in his presence in 1974 when a North Korean agent tried to assassinate him. They might also be unmindful that small South Korea suffered over 2 million dead and wounded, military and civilian, in the drawn-out Korean war.

South Korea is an armed, and well fortified peninsula of people who will fight to save what they built in the past 25 years. The South's armed forces number 600,000, the Americans about 40,000. North Korea has an estimated 510,000 in the military. Gen. Vessey says his side has sufficient defense now, but:

"South Korean equipment is one generation behind ours. Their tanks are inferior in numbers and need upgrading. North Korea' forces were built by the Soviets, but North Korea now has a military production capability of its own. In recent years, equipment deliveries from China exceeded those of the Soviets.

we will keep our "nuclear umbrella" over South Korea and will make sure their military equipment is sufficient and up to date. But the South Koreans remember that the United States withdrew its troops in 1949, and a long, horrible war resulted. Nuclear weapons and

Report fails to link moderate drinking with heart disease

PAGERA

S

THE MIDLAND REPORTER-TELEGRAM, THURS. AUGUST 25: 197

The Washington Post

WASHINGTON — Neither coffee nor moderate use of alcohol causes heart attacks, and a few drinks a day may actually help protect against heart disease, according to the lead article in today's New England Journal of Medicine.

The conclusion is drawn from six years' study of heart disease among 7,705 men of Japanese descent in Hawaji In an accompanying editorial. Dr. William Kannel — a leading authority on causes of heart disease — says several other American and European studies. studies cutting across racial lines. have found similar evidence. Based on what doctors now know.

adds Kannel. "It is encouraging to note that not everything one enjoys in life predisposes to cardiovascular disease. There is nothing to suggest, for the present, that we must give up either coffee or alcohol in moderation to avoid a heart attack."

"I am sure that many who read this editorial will be quite willing to drink to that statement." he concludes,

to that statement." he concludes, The examination of Hawaiian men was made by the federally funded Honolulu Heart Study, headed by Dr. Abraham Kagan. Drs. Katsuhiko Yano. George Rhoads and Kagan report that in the 294 men who developed coronary heart disease, there were fewer moderate drinkers and more non-drinkers than the group's average.

By moderate drinking, "we mean one, two, possibly three drinks a day," Kagan said by telephone Wednesday. He defined a single drink as "a 1 1-2 ounce jigger of whiskey, a bottle of beer or" — with less certainty because of "so little evidence" on wine drinkers — "a four-ounce glass of table wine."

Kagan and Kannel cautioned that heavy drinking can severely harm the heart and other organs: that alcohol and coffee may have to be limited in some persons, for example, those subject to irregular heartbeat; and that doctors can only base their recommendtions on current knowledge, not what someone might learn tomorrow.

"Alcohol isn't a completely innocuous beverage by any means" and "the evidence on coffee is perhaps(not completely in yet," Kagan said.

Honolulu data now under development may show some connection between moderate alcohol consumption and some kinds of strikes, he reported.

In an unrelated study, doctors at the Kaiser-Permanente Medical Center in Oakland, Calif., have found that three or more drinks daily increase the risk of developing high blood pressure, which does increase the risk of both heart disease and strokes.

The just-published study of 102,

largely professional and business men in Southern California found some "significant" loss of mental processes — specifically, "higherordered cognitive processes" like ability to adapt, form concepts and shift from one idea to another — in perfectly sober men who usually consumed only two drinks per occasion.

This study was made by Drs. Elizabeth Parker and Ernest Noble, who are both now at the government's National Institute on Alcohol Abuse and Alcoholism in Rockville, where Noble is the institute's director.

Another scientist, Dr. Floyd Bloom of the Salk institute in San Diego, said he has not yet seen the Parker-Noble study. But he disputed some past reports that even moderate alcohol use destroys brain cells. He called that "kind of an old wives' tale of neuropathology." but one not backed by good data. In a brief newspaper notice published today in neighboring Nice, the rulers of the 350-acre principality on the French Riviera announced:

"...Prince Rainier III and Princess Grace are happy to announce the engagement of their eldest daughter, Princess Caroline, to Mr. Philippe Junot. Princess Caroline and Mr. Junot met in Paris through mutual friends in the month of December 1975."

No wedding date was announced. The couple were to pose for photographers at the palace later today.

Red and white flags were flown today in the tiny principality to celebrate the engagement. Shopkeepers displayed portraits of the comely princess in their windows.

White House mess changing

By JURATE KAZICKAS

WASHINGTON (AP), — As restaurants go, the decor isn't much. But the service is fast, the food is inexpensive but good and the address is the best in town: 1600 Pennsylvania Avenue.

The White House mess may be the most exclusive luncheon spot in Washington, a city where membership in a small club counts a great deal.

The man at the salad bar may be Vice President Walter F. Mondale. Or he may be a Cabinet member or a top presidential assistant. On a rare day, President Carter stops by for a bite to eat. Picture it: red carpeting, fresh carnations, nautical paintings and a ship's clock. Lunch is served on white china embossed with the presidential seal. It's available to a select 180 persons and an occasional, lucky guest.

THE MIDLAND REPORTER-TELEGRAM, THURS., AUGUST 25, 1977.

The bite-sized home fries are cooked just right, crisped to a golden brown. The salad, topped with bacon bits, bean sprouts, egg, crouton and peppers, is nearly a meal in itself. But the tender lobster tails, even though succulent, are a bit on the cool side.

Mom might have sold her soul to lay claim to the apple pie, topped with vanilla ice cream so rich it has a sheen like meringue.

A little chilled white wine with the

meal would make it perfect, but Carter has ordered everything stronger than iced tea off the menu. In other days, it was different. Richard Nixon permitted beer and Margaritas at least once a week, part of a Thursday Mexican special. LBJ went all the way with daily cocktails. The White House notes with pride that it has increased the mess membership from 150 to include more aides. The list of honorary members has been trimmed to 30 or so.

These days, the list includes Federal Reserve Chairman Arthur Burns; Ken Curtis of the Democratic National Committee; CIA Director Adm. Stansfield Turner, William Scranton, a member of the In-

telligence Oversight Board; Charles Kirbo, an Atlanta lawyer and Carter's longtime friend and several less familiar names like Henry Owen of the Brookings Institution.

Unlike the days when Alan Greenspan. President Ford's economic adviser, defied the rules to sheak television personality Barbara Walters in for lunch, reporters now can be invited to sample the presidential cuisine. Eavesdropping and picture-taking are frowned upon.

All this democratizing of the mess, which is operated by the U.S. Navy, has not impressed William Gulley, director of White House Military Affairs. Gulley, on the staff since 1966, thinks the changes are self-defeating.

Chance plays role in fight against microorganisms

By B. D. COLEN The Washington Post

PAGE 10A

DETROIT -On a November day 17 years ago an employe of an Italian branch of Parke-Davis and Co, the American pharmaceutical firm. scooped a thimble-size quantity of dirt from the ground in Bosco Trecasae. Naples Province, poured it into a plastic-bag-lined manila envelope and mailed it to company headquarters here

Cicillo Aldo was simply doing what Parke-Davis employes have done in various places around the world 75,000 times since 1940. But Aldo's package of dirt did not prove to be just another soil sample. It yielded a

microorganism containing 9-Beta-Darabinofuranosyladenine, nicknamed vidarabine or ara-A, the first effective weapon man has found against, one of the usually fatal virus-caused, diseases.

Like the discovery of penicillin, medicine's first major weapon against bacterial disease (which was stumbled upon when it contaminated a bacteria sample) the discovery of ara-A in nature was in part a chance occurrence.

Like many major scientific advances the discovery was made almost simultaneously by two groups of researchers. In 1960, a group of scientists reported in the journal of the American Chemical Society that

they had artificially produced ara-A. But they were looking for anti-cancer agents and ara-A proved useless to them and was discarded. Parke-Davis then became the first organization to find ara-A in nature, grow it and find a use for it:

Had Aldo taken his ample of dirt a few miles, or even a few yards, away from where he gathered it, the sample might not have yielded ara-A.

"The search for antibiotics, antifungals and antivirals, grown or produced by microorganisms, requires a source of microorganisms, and the greatest source is the earth itself," explained H. E. Machamer, Parke-Davis's director of boilogical research and development.

as soil sample from any one area;" he fungi, or, in this case, virus." said during an interview at the firm's headquarters here. "The basis of the meteorological characteristics - the soil texture, plant life, you name it - , tion. you have a better chance of getting a wide array of different organisms.

"What one is really doing is searching for a microorganism that I'd like to call a natural mutant, one which when cultivated under the proper conditions in the laboratory . produces a material that seemingly has no value to (the microorganism), but when extracted and purified has

There is no rational reason to want the effect of destroying bacteria, or

The search, said Machamer, is serendipitous "and empirical. it's a search is that by getting soil samples numbers game. The more 'isolates' from a lot of different localities. you get from more and more soils, the which would change the better your chance of finding one better your chance of finding one which performs a useful, novel" func-

> It all comes down, then, to whether a particular salesman or employee chooses to help the company by voluntarily providing it with a soil sample, and where he decides to gather the sample.

Machamer, for example, sent the company samples gathered while he was vacationing in Brazil. They have not led to any startling discoveries.

Cicillo Aldo gathered his single sample in Italy and helped save the lives of persons suffering from perpes encephalitis, a disease which kills 70 per cent of those who contract it.

Aldo's soil sampling was the major "accident" leading to the discovery of ara-A in nature. The steps which followed over the next 17 years were anything but accidental.

Like all the other samples gathered-at that time as part of a search for new antobacterial, or antibiotic, agents-the Italian soil sample was stored until the Parke-Davis scientists were ready to use it.

Using the sample meant placing bits of the dirt in a liquid solution and placing drops of the solution in a jellylike material in a glass-petri-dish.

Johnnie Johnson services set

Johnnie M. Johnson, 81, a former rural mail carrier, died Wednesday night at his home, 1304 S. Loraine St., following an illness.

Services will be at 10 a.m. Saturday in Newnie W. Ellis Funeral Home. Officiating will be the Rev. David Herman, pastor of Midland Lutheran Church.

Burial will be in Resthaven Memorial Park.

Johnson was born July 22, 1896, in Bosque County, spent his early life there, and in 1939 he moved to Midland and operated a star route mail service to Andrews and Seminole

Later, he worked for A&L Lumber Co. and then became a painting contractor.

He was a member of the Midland Lutheran Church.

Survivors include the widow, Pauline Johnson of Midland; three sons, Darnell Johnson of Midland, Eugene Johnson of Rockwood, Tenn. and Johnnie M. Johnson Jr. of Albuquerque, N.M.; two daughters, Mrs. Billy Ray Robbins and Mrs. Joe N. Cooper, both of Midland; two sisters. Christine Tergerson amd Nanna Jermstad, both of Cranfills Gap: 15 grandchildren and three great-grandchildren.

Pallbearers will be grandsons Eugene Johnson, Terry Johnson, Marty Cooper, Johnnie Matt Johnson, Tony Robbins and Brad Robbins.

Rites Saturday for Beck infant

DENVER, Colo. - Leslie Caroline Beck, 2-month-old daughter of Mr. and Mrs. Barry N. Beck of 3315 Windsor Drive, Midland, died at 7:30 p.m. Wednesday in a hospital here. Services will be at 1 p.m. Saturday in St. Nicholas Episcopal Church in Midland, Burial, directed by Newnie W. Ellis Funeral Home, will be in **Resthaven Memorial Park**.

R.L. Maddox's services today BIG SPRING - Raymond Lee

Maddox, 58, a resident of Big Spring. died Tuesday morning at Saint Jo. Tex. He was the father of Ronald Maddox of Midland.

Services were to be at 10 a.m. today in the chapel of Scott Funeral Home of Saint Jo, with graveside services scheduled for 10 a.m. Friday in Andrews Cemetery under direction of Scott Funeral Home.

Maddox, a five-year resident of Big Spring, formerly lived in Stanton and Andrews. He was born Nov. 30, 1918, at Dye Mound, A veteran of World War II, he was a Baptist and a member of the Denver City Masonic Lodge, the Dallas Scottish Rite Consistory and the San Angelo Suez Shrine Temple.

Surviving are the widow, Wanda; another son, Lynn E. Maddox of Big Spring: two sisters, Mrs. Dee Cole of Bellevue and Mrs. Betty Martin of Bowie; two brothers, Lynn Maddox of Big Spring and Melvin Maddox of Fort Worth: three half brothers. Milton Dunn of Weatherford, Okla., and Wilson and Wallace Dunn, both of Saint Jo, and four grandchildren.

Stone services set in Lubbock

LUBBOCK - Services for George M. Stone, 60, of Lubbock, brother of Mrs. Fay Spence of Midland, will be at 10 a.m. Friday at Resthaven-Singleton-Wilson Funeral Home. Burial will be in Resthaven Memorial Park.

Stone died Tuesday at his residence.

Stone retired in 1962 as an Air Force master sergeant before going to work for Trice Wholesale and Electronics. Other survivors include his wife, a

daughter, three other sisters and three grandchildren.

United Way executives, representatives to meet

Key representatives from 11 firms and organizations will meet with Midland United Way executives Friday morning to review the plans for the Pilot Firm Campaign which Way campaigns and make their pledges that help the 19 member agencies supported by the United Way of Midland.

A key person from each firm has

Andrews rites for Mrs. Morgan

ANDREWS '- Mrs. Lela Mae Morgan, 64, a former Andrews resident, was dead on arrival at a physician's office in Fort Stockton Tuesday morning, following an apparent heart attack.

Services were to be at 3\p.m. today in Chapel of the Chimes of Singleton Funeral Home of Andrews, with the Rev. Eddie Freeman, pastor of Calvary Baptist Church, officiating. Burial was to follow at Andrews Cemetery.

Mrs. Morgan, born Sept. 2, 1912, at Evant, had resided at Fort Stockton the last two years, moving there from Andrews. She was a Baptist and a member of the Eastern Star.

Survivors include the husband, A. V. Morgan Sr., of Fort Stockcon; two sons, A. V. Morgan Jr., and W. H. "Bill" Morgan, Fort Stockton; a daughter, Mrs. Mitzi Glaze Puckett of Brackettville; three sisters, Mrs. Noel Galloway of Andrews, Mrs. S. L. Warren of Gatesville and Mrs. Esther Summers of Roscoe; ten grandchildren and two greatgrandchildren.

Services today for Harry Bruner

LAMESA - Services for Harry M. Bruner, 75, a former resident of Lamesa, were to be at 2 p.m. today in the First United Methodist Church of Lamesa with the Rev. Alvis Cooley, pastor, the Rev. Newton Starnes. minister of the Tahoka First United Methodist Church, and Ray Cunningham, Baptist minister from Slide, officiating.

Burial was to be in the Lamesa Memorial Park under the direction of Branon Funeral Home.

Bruner died about 6:30 p.m. Tuesday in a Big Spring hospital.

Bruner was a 27-year resident of Lamesa. He moved to Coahoma four years ago. He married Jewel Johnson in Big Spring September 1943.

Survivors include his wife and a niece, Earlene Beggs of Madris, Ore.

man. The man then pulled a gun and

Mahon speaks to Lions, covers varied subjects

The advent of the neutron bomb has brought a "new twist" to people's rights, U.S. Congressman George Mahon of Lubbock said here Wednesday

"We've heard a lot about people's rights," Mahon said. "We've got the neutron bomb designed to kill people without destroying property. Well, that's a new twist," he said.

The congressman was in Midland Wednesday to give his "first official speech" since July 7, when he announced he would not seek reelection' to the 19th Congressional District post he has held continuously since 1934.

Mahon's seemingly impromptu talk to the Downtown Lion's Club covered a hodgepodge of subjects: from the B1 bomber to the energy crisis to the Panama Canal

Mahon said most Americans want the United States to maintain jurisdiction over the canal. However, of the treaty that will determine the canal's fate, Mahon, 76, said "the (U.S.) Constitution gives him (the President) the right to negotiate treaties.

The treaty, he said, "must protect the vital interests of the United States in the Panama Canal.

He touched on welfare reform. "Everybody is for welfare reform.

Orientation, rally planned

Orientation for sophomores at Lee High School will be at 7:30 p.m. tonight.

Sophomores should meet in the auditorium and parents should meet in the cafeteria:

arrests have been made in the incident, police said.

WINDSHIELDS BROKEN

Vandals wielding what police believe to have been a hammer or baseball bat broke windshields of cars parked at nine north Midland residences sometime Tuesday night or Wednesday morning, according to police

area bounded by Goddard Drive on the north and Maxwell Drive on the south, reports indicated. Police said they believed all the damage was caused by the same person or persons.

A stereo valued at \$250 was taken from the Clarke Straughan residence, 706 E. Broadway, Wednesday night, according to police.

Straughn told police the stereo was taken from the living room of the house. Entry was gained through a door on the east side of the house. police said.

June traffic report lists six fatalities

The Midland County rural traffic report for June, released Wednesday by Midland College Traffic Safety Planning, listed four fatal accidents with six fatalities, 38 injury accidents with 53 injuries and 95 property damage accidents.

"Every incident cited above caused economic loss to the community and the individual in the form of salaries, taxes, hospitalization, repairs and insurance, not to mention the personal losses," said Sue Alford, traffic safety coordinator at Midland College.

According to the National Safety Council, Mrs. Alford said, economic losses from the June accidents totaled \$1,409,760 for fatalities, \$593,600 for injuries and \$47,500 for property damage

"The driving public can affect this tragic loss, through awareness of conditions of the road, the traffic, the weather, your car and your abilities.' Mrs. Alford said.

Group plans square dance The M-Squares square dance club will host a square dance at 8 p.m. Saturday at the M-Squarena on Warren Road. Jim Lavalt of Monahans will be guest caller.

Hua expected

By BARRY SCHWEID

PEKING (AP) - Communist party Chairman Hua Kuo-feng held a last-minute meeting with Secretary of State Cyrus R. Vance today, presumably to tell him that if diplomatic relations are to be established between the United States and China, Washington has got to make concessions by cutting its ties with Taiwan.

Meeting a high-ranking member of the Carter Administration for the first time, Mao Tse-tung's successor said both President Carter and Vance had stated "explicitly" that they would be guided by the 1972 Shanghai Communique, which recognized Taiwan as an integral part of China and promised progressively closer ties between Peking and Washington.

"We appreciate that," said Hua. The Chinese leader said he understood Vance considered his visit

"an exploratory one." "We also think it's good for the new administration to send someone here to explore China and to get to know the leaders of China," Hua said.

Vance's meeting with Hua followed four negotiating sessions with Foreign Minister Huang Hua and a discussion and dinner Wednesday

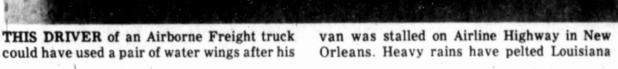

the Chinese that the Carter Administration is committed to the 1972 Shanghai Communique signed by President Nixon and Premier Chou En-lai which pledged the two coun-tries to move closer together. "We believe this visit to Peking is an important step toward progress along that road," said Vance.

Teng in his toast told the American visitor: "Our view is that we should move forward to full normalization of relations." He said that would be good for people all over the world.

But Hua in a speech to the Chinese Communist party congress last Thursday reiterated his govern-ment's previous terms for diplomatic relations with the United States. The United States, he said, must break diplomatic relations with the Nationalist Chinese regime on Taiwan, withdraw its military forces and installations from Taiwan and the Formosa Strait, and abrogate its mutual defense treaty with the Nationalists.

There was no expectation that he would modify these demands a week later.

has been occupied by several physicians including Doctors Henrie E. Mast, John R. Mast and Clarence S. Mast. Dr. Clarence Mast moved from Midland a number of years ago.

Dr. Henrie E. Mast retired August 1, 1977, leaving Dr. John R. Mast in active practice. Another physician has rented office space in the clinic and will begin his practice Sept. 1. The building has space for four physicians.

Rain chance 20 per cent

Rain dancers would be welcome in Midland today to help boost the 20 per cent chance of rain the weatherman is giving the city tonight.

Thus far this year, the city has had only 5.17 inches of rain, by the official measurement of the National-Weather Service at Midland Regional Air Terminal. That is more than four inches less than the average 9.58 inches by the end of August.

The forecast calls for partly cloudy skies through Friday with a chance of thunderstorms slight tonight. The low tonight and Friday night should be in the lower 70s. The high Friday is expected to be in the mid-90s. Winds should be south from 10 to 20 mph tonight.

"A good little shower" was reported Wednesday in Rankin, and brief showers were reported Wednesday in Big Spring, Big Lake, Odessa and Crane. But Andrews, Lamesa and Stanton were bypassed by the rain clouds. Weather this morning was partly cloudy throughout most of the area.

by congressmen and Korean officials and had an affair with one congressman then under investigation in connection with the alleged influencebuying

But she has denied any involvement or even knowledge of such an operation and said the affair was a private matter that involved nothing of na-

whether cash contributions itts and favors Park and other South Koreans gave U.S. congressmen were part of a scheme to buy influence in Congress for the South Korean government.

Park said at a news conference in Seoul on Wednesday that he would not cooperate with any American investigator, including Jaworski.

with Vice Premier Teng Hsiao-ping. one of China's three top leaders.

The secretary of state, in a dinner toast to his Chinese host, said the United States "looks forward to the movement forward of the relations of our two nations."

He said his talks had been candid. "useful and helpful." And he assured

even the abandoning the Nationalists. There has been speculation, however, that the United States might offer to break diplomatic relations with the Taipei government while continuing the military alliance and the multi-billion-dollar trade between the United States and Taiwan.

Defense not through with Priscilla

ing in a basement utility room.

Haynes took the state's star witness through a day-long examination Wednesday of her friends, acquaintances, lovers, lifestyle and her

drugs to guns and set off a flurry of courtroom excitement when he produced a color photograph of Mrs. Davis with a partially nude male

Prosecutors blocked the poster-size

the photo, Mrs. Davis broke into tears during the closing moments of testimony as she recalled events leading up to her brush with death. She steadfastly maintained that Davis was the man in black, wearing

a shoulder length woman's wig, who

in a surprise series of questions about the killer, there was this exchange between Haynes and the witness: "Was the subject Horace

Copeland?" Haynes asked. "No sir," she replied.

"Was it W.T. (Rufner)?" "No, it was Cullen Davis." "Was it Robert Downing?" "No sir.' "Was it David Hack?"

"No sir." Switching abruptly to a previous

statement by Mrs. Davis, Haynes pointed out her earlier remarks conflicted in part with her trial testimony.

As she struggled to explain her emotions at the time, Mrs. Davis said when she saw the bloody handprints on a wall and door of the mansion she knew something was wrong.

"I saw the blood," she said, gesturing nervously with her hands."My find Andrea . . . I screamed: Stan, come down here, Stan!""

"I was getting more and more panicky," she said, when her voice broke at that point and the judge ordered an end to the day's testimony. Afterwards, Haynes would not discuss the names he tossed at the witness.

Davis dismissed reporters' ques-tions by identifying those persons simply as "characters in the drama."

Mrs. Davis previously identified her companion in the photograph as W.T. Rufner but told Haynes she did not recall the picture being taken.

Although the judge ruled the photograph inadmissable, a prosecutor grumbled, "the damage was done.

Haynes' vigorous crossexamination was designed to impeach Mrs. Davis' testimony for the prosecution.

Smokey Joe must figure that he's just about the winningest pitcher and best darn hitter he ever knew . . . outside the major leagues.

"I lost five games in 14 years," said the trail blazer, who pitched baseball in the Army, in the old Army Air Corps and for semi-pro teams in the 1930s and in the early '40s.

He's not modest about his feats. Nor is he immodest. He's just straightforward.

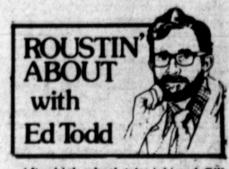

"When I went out there to pitch," Smokey Joe said, "I went out to win. I had one of the fastest downers (sinkers) you ever saw."

This ex-baseball character, whose straight name is William Frederick (after "Buffalo Bill" Cody) toods, also, was a top-notch batter. He vouched for that himself.

"Hell," he said, sort of swearing, "I never hit below .349. That was my

lowest batting average." Woods, who just turned 66 on Wednesday, has been out of baseball and the air corps for many years now. But the passing of years has in no way dampened his spirits, enthusiasm and willingness to rap about those things he favors best.

Before he got stuck with the Smokey Joe nickname. Woods was just plain Bill in high school at Center. He was on the baseball mound then and put on a good show.

After high school, trim 'n' tough Bill Woods tried to get into the flying corps but ended up in the infantry down at Fort Sam Houston. That was in 1931. Jobs were scarce.

"Hell, you couldn't even buy a job." he said.

When he wasn't soldiering or doing something else, young Bill Woods was out on the baseball diamond. He was in the 23rd Infantry. And he made good.

His downers, curves, fastballs, screwballs and the rest of his repertoire delighted his fans and teammates and impressed the opposition

The fans started calling him Smokey Joe after the original Smokey Joe Woods of Boston. He was a fireball of a pitcher in baseball's early

years. Before he knew it, Smokey Joe waa (Continued on Page 2A)

City said together as school looms

Midland is approaching the school year together, Parker Humes, chairman of the Midland Alliance steering committee said Wednesday. just five days before the start of school and the court-ordered desegregation program in Midland.

THE MIDLANT REPORTER TELEGRAM, THURS. AUGUST 25, 1977

Humes added that it was no surprise to him that the city would be entering the school year with the Alliance slogan "Midland Together" a reality

Support for the Alliance and its goals to provide "a safe and orderly transition in August to the courtordered integration plan" and the creation of additional programs and services in the schools to insure educational excellence has come from a vast cross section of the Midland community, Humes said.

The 16 members of the Alliance steering committee have made more than 60 presentations. Humes said, adding that more endorsements are expected to come in.

The Midland Alliance was formed to get broad-sectioned community support for a safe and orderly ap-

Parker Humes proach to the court-ordered program.

Humes said. "We have never approached the busing as something that was

popular. But now that we have it the approach is to make it work the best possible way it can." Humes said of the Alliance philosophy.

The Midland Alliance was patterned after a Dallas group that may have helped that city get peacefully through the start of a busing program involving 80,000 students, Humes said

With the final days before school opening ticking away, the Alliance group has a heavy list of activities still on its schedule. And after phase one, the safe and orderly transition to the integration plan, has been accomplished, that Alliance will continue to work on phase two, the creation of additional programs and services in the schools, Humes said.

Among those endorsing the Alliance are First National Bank, Midland National Bank; Commercial Bank, Western State Bank, First Savings and Loan, Citizen's Savings and Loan, Midland Savings and Loan, Midland Association of Churches, Midland Junior League, Midland Chamber of

Commerce, Midland City Council PTA, Midland Independent School District Trustees, American Association of University Women, League of Women Voters, Midland Jaycees, Midland Girl Scout/Leaders, Christ Presbyterian Church, Midland Association of Retarded Citizens, Midland Opportunity Auxiliary, St. Nicholas Episcopal Church, Midland Human Relations Council, Drilco, Magnatex, Southwestern Bell Telephone, Elcor Inc., Ortloff Corporation, Rocky Ford, Midland Reporter-Telegram, KCRS Radio, KWMJ Radio, KMID TV, Compressor Systems Inc., Twentieth Century Study Club, Casa de Amigos, KWEL Radio, KBAT Radio, Mid-West Electric, Sohio Petroleum, Abbott Building Company, Midland County Attorney Les Acker, First Presbyterian Church, Altrusa Club, Eastside Lions, PTA Executive Committees of Bonham, Bowie, De Zavala, Milam, Emerson, Pease, and Washington schools, and the First United Methodist Church Administrative Board.

More Americans moonlighting

The Los Angeles Times

WASHINGTON - Every weekday morning Ron Spitzer gets up before dawn and goes out to do the chores on his rural Illinois farm. Then, the chores done, he climbs into a business suit and his automobile and begins an hour-long commute to Chicago, where he holds a 9-to-5 office job.

Spitzer is a moonlighter - someone who holds down more than one job at a time. And in a period when millions of unemployed Americans are unable to find any job at all, somehow the ranks of Spitzer and his fellow moonlighters have jumped up to an all-time high

According to figures released Wednesday by the Labor Department, 4.6 million Americans held two or more jobs this May. That is an increase of 15 per cent over the 3.9 million in May, 1976, and the highest total in the 14 years that the Department's Bureau of Labor Statistics has been conducting this annual survey.

Moonlighting follows no single pattern. A decreasing share of the total involves Spitzer's combination of farm work and a city job. A quarter to a third of all moonlighters are people who work part of the day in their own business and the rest of the day for someone else. Some may have two separate employers, such as the teacher who works as a grocery store check-out clerk by night Cab drivers, private security guards, night sanitation and maintenance workers in office buildings, weekend gardeners, store clerks and restaurant workers frequently have other jobs during what is generally regarded as regular working hours.

Analysts at the Bureau of Labor Statistics admitted they had no solid explanation for the jump' in moonlighting during the past year. There is no apparent tie, they said, between the rate of moonlighting and the total level of employment in the economy, the amount of overtime hours being worked, or any other basic trend.

However, at least one element emerges from the statistics: while women are moonlighting as never before, the practice has fallen off sharply among blacks and other nonwhite races.

In 1962, 2 per cent of all working women held two jobs. At present, 3.4 per cent are moonlighting. Meanwhile, the proportion of moonlighting black and other nonwhite workers has tumbled to 2.7 per cent from 4.6 per cent

In an interview, Rosalinda Ratajczak, a labor economist based in Atlanta, offered some possible explanations for these trends.

The rise in moonlighting among women, she said, can be accounted for by the increased participation of women in the labor force and by the fact that women who have few or no children, as has been increasingly the case in recent years, have more time to make available to employers.

Or, she said, there was the case of a policeman's wife who took a second job because her husband was on duty most weekends.

As for the decline in moonlighting among blacks, Mrs. Ratajczak said there were at least two possible explanations, one of them encouraging and one not.

The encouraging one, she said, is that reduced discrimination barriers since 1962 may have given blacks opportunities to obtain higher-paying jobs formerly denied them.

"They may be able to earn in 40 hours what they used to earn in 60 hours, and haven't set their sights on higher income yet," she suggested.

The alternative hypothesis, the more troubling one, is that increased penetration of the work force by white, better educated women may have squeezed out some job opportunities for blacks and other nonwhites, not only for primary jobs but for moonlighting jobs as well. In any case, Mrs. Ratajczak noted, the trend to higher rates of

moonlighting has emerged even as more and more households have both spouses working. This suggested to her that as wages have failed to keep ahead of inflation, families are simply willing to go to greater lengths to maintain their standards of living.

According to the Bureau of Labor Statistics, workers most likely to be moonlighters are those in the prime working ages, 25 to 44. This is true for both men and women.

Married men are more apt to moonlight than single men, according to the statistics. Among women, moonlighting is most prevalent among those widowed, divorced, or separated.

Asked why they worked at the second job, 33 per cent of the moonlighters said the most important reason was to "meet regular expenses." A few cited such reasons as paying off debts, saving for the future, or buying something special. Nearly 20 per cent of both men and women said the main reason was that they "enjoy the work."

Severe thunderstorms hit midwestern states

New Mexico, Oklahoma

Oklahoma: Partly cloudy tonight. Scattered showers and thunderstorms mainly shat tonight. Fair to partly cloudy Friday with widely scattered thundershowers. High Friday in the 80s. Low tonight mid 60s Panhandle to 70s elsewhere.

Nebraska Thunderstorms with brief periods of heavy rain also occurred Wednesday in portions of southwest Texas. Heavy thundershowers hit parts of Utah and western Colorado Wednesday night

Elsewhere, there were scattered showers and thundershowers from Maine to Florida along the Atlantic Coast and in a few areas along the Gulf of Mexico.

Rain and showers continued in the Pacific Northwest. The Northern Rockies also had a number of showers and thunderstorms Wednesday night.

Cool weather remained entrenched over the Northern Great Lakes with 40s and 30s noted early today. A few readings in the 40s were recorded in northeastern New York. Elsewhere, more seasonable temperatures prevail

Early morning temperatures around the nation ranged from 37 at Marquette, Mich., to 92 at Needles, Calif.

Some other reports:

Eastern U.S.: Atlanta 72 foggy, Boston 60 partly cloudy, Chicago 56 clear, Cincinnati 58 clear, Cleveland

A few years passed by Again, Smokey Joe "busted out" of the military and landed a job as a roustabout and roughneck for the old

Humble Oil and Refining Co. down at McCamey. That was in 1937. Naturally enough, he pitched baseball for the company team.

Shortly before that, he played semipro ball "and loafed.' at Iraan. "I got fed up with that." he said of

his oil field work and play. In 1938, Smokey Joe moved to over to Los Angeles, Calif., where he shared a first-place prize in Uncle Billy Walker's radio talent show. He playe1 the spoons to a rendition of the "Twelfth Street Rag." played on the "breathing French harp" by the

mayor's son. Later, Smokey Joe pitched for semi-pro teams in Atlanta, Ga. He was a pretty good outfielder, too.

In 1940, he, again, re-enlisted in the air corps and played on corps teams at Randolph Field at San Antonio and at Goodfellow Field at San Angelo. Then along came the war.

Army Air Corps T. Sgt. Smokey Joe wound up as the flight chief for Brig. Gen. Otto P. Weyland, who was "over all the fighter planes in England," he said

"He (Weyland) picked me out of 250 (candidates) to he his flight chief ... ' Smokey Joe said.

"And Bobby Jones, the great golfer, was my intelligence officer," Smokey Joe said with his usual pride

After the war, he worked for the old **Civil Aeronautics Administration as a** mechanician. His baseball days were

He left the CAA and went to other lines of work.

(Smokey Joe, it seems, just about has "done it all" before, after or during the war. He was partner in a night club at Shreveport, La. But the operation went sour, and he got out, He was a traveling cigarette salesman, a motel operator, an airplane builder and salesman, personnel counselor and so on. Those "things" span the decades.)

In 1948, three years after the war, Smokey Joe, once again, joined up. This time, it was with the Air Corce. He worked in the Berlin Airlift. Again, he got out of the service.

That was in 1949, when he went to work for the Boeing (aircraft) Company.

how to "play the spoons." "Hell," he explained, "when I had my leg broke, ... what do you think I had to do?" Play with spoons, of Later, he went into other lines of work.

And in 1960, he met a lady named Dorothy, a stenographer and notary public, in Dayton Beach, Fla. They

were married the following year. Years went by.

1970, Smokey Joe and his helpmate moved to Midland from Phoenix, Ariz., where he had been a personnel

Smokey Joe retired. Still, he's a "spring chicken" - as

he put it. Instead of pitching baseball and doing whatever, he's bent on a crusade. It keeps him and the missus busy.

Today, he's collecting tools, medicine, clothing, stable foods, Bibles and, yes, even money for a band of Hopi Indians in Arizona. A friend of his, Dr. M. S. Knisely, has joined in on the effort. (Smokey Joe has a couple of telephone numbers. should some folks want to give to "our first, original Americans": 684-4215 or 694-6311. They're in need, he said.) And Smokey Joe, once he somehow

gets the use of a trailer, is going to haul those gifts to the Hopi reservation. Some missionaries are awaiting the tidings. Like baseball was in his past,

Smokey Joe's crusde for these 'original'' American Indians seems to be his consuming interest. Instead of going into the sport, just

plain Bill Woods might have been an evangelist or a missionary in his

now, he's going "to preach up a storm." He does like to talk religion and

Smokey Joe will always go back to baseball talk.

Juanita Ramírez works with some of the children at the La Florecita Nursery.

Canada: Montreal 46 clear, Toronto 45 clear.

UW agency works with kids

"I really love it," Juanita Ramirez said. "I've worked with kids for about six years.

Mrs. Ramirez is an employe at La Florecita Nursery, which is budgeted through parents of the children and the United Way.

'She's not your average employe who only works from 8 to 5." Olivia Alcazar, supervisor in charge, said. 'She is very devoted and is being underpaid for what she does. She cooks, cleans, vacuums, mops and does any other chores."

"Right now we have about 30 kids from 2 years old up to six. We work on puzzles with them, color, try to get them to write some, and we take them to the park. I do a little bit of everything," Mrs. Ramirez said.

Mrs. Ramirez, mother of four. previously worked as a teacher's aide at Travis Elementary for five years.

"I think working with my children helped in working with other kids. she said. "About the only requirement for a teacher's aide at the nursery is that you have your GED and that you like kids and get along with them. That's very important."

Man's condition satisfactory after Wednesday night shooting

A 25-year-old Midland man was listed in satisfactory condition early today at Midland Memorial Hospital after he was shot in the right arm about 7:10 p.m. Wednesday.

THE MIDLANL REPORTER-TELEGRAM, THURS. AUGUST 25, 1977.

Leonard Ray Smith of 1221 E. Cowden Ave. told police he was a passenger in a car in the 200 block of Lamesa Road when he saw a man he knew walking along the street. Smith told police he yelled at the

man. The man then pulled a gun and

Mahon speaks to Lions, covers varied subjects

The advent of the neutron bomb has brought a "new twist" to people's rights, U.S. Congressman George Mahon of Lubbock said here Wednesday.

"We've heard a lot about people's rights," Mahon said. "We've got the neutron bomb designed to kill people without destroying property. Well, that's a new twist," he said.

The congressman was in Midland Wednesday to give his "first official speech" since July 7, when he announced he would not seek reelection to the 19th Congressional District post he has held continously since 1934.

Mahon's seemingly impromptu talk to the Downtown Lion's Club covered a hodgepodge of subjects: from the B1 bomber to the energy crisis to the Panama Canal.

Mahon said most Americans want the United States to maintain jurisdiction over the canal. However, of the treaty that will determine the canal's fate, Mahon, 76, said "the (U.S.) Constitution gives him (the President) the right to negotiate treaties.

The treaty, he said, "must protect the vital interests of the United States in the Panama Canal. He touched on welfare reform.

"Everybody is for welfare reform."

STEREO TAKEN

A stereo valued at \$250 was taken from the Clark Straughn residence, 706 E. Broadway, Wednesday night, according to police.

Straughn told police the stereo was taken from the living room of the house. Entry was gained through a door on the east side of the house, police said.

June traffic report lists six fatalities

The Midland County rural traffic report for June, released Wednesday by Midland College Traffic Safety Planning, listed four fatal accidents with six fatalities, 38 injury accidents with 53 injuries and 95 property damage accidents.

"Every incident cited above caused economic loss to the community and the individual in the form of salaries, taxes, hospitalization, repairs and insurance, not to mention the personal losses," said Sue Alford, traffic safety coordinator at Midland College.

According to the National Safety Council, Mrs. Alford said, economic losses from the June accidents totaled \$1,409,760 for fatalities, \$593,600 for injuries and \$47,500 for property damage.

Investigators said. believe that for 20 years he ran a "sex school" for children that "graduated" almost 200 youngsters and awarded prizes for performance. Heacock is in the Oakland County jail under \$125,000 bond. He pleaded innocent at his district court arraignment Wednesday on a five-count charge of firstdegree criminal sexual conduct with a 9-year-old boy. Heacock requested a court-appointed attorney.

Describing the case as probably the largest child molesting incident in the history of this of-fice," Oakland County **Prosecutor L. Brooks** Patterson said handwritten diaries found in Heacock's home detailed sexual encounters with youngsters, mainly boys. The diaries dated back to 1957.

The prosecutor said no evidence has linked Heacock to the recent sex murders of several children in Oakland County, but the special task force investigating the murders would examine material seized at Heacock's home.

Patterson said investigators confiscated tape recordings, movies and photographs. Heacock also surrendered at least two boxes of documents in addition to the diaries. Patterson said.

He said the diaries and other documents menioned the operation of a secret group called "The IC Club," in which youngsters were invited to participate in sexual

aliens give selves up

By ROBERT B. CULLEN

WASHINGTON (AP) - One day last week, a Border Patrol agent in Laredo, Tex., was hailed by four Mexicans.

Stopping his car, the agent was told the four wanted to turn themselves in, claim their amnesty and get work permits. Instead, they became U.S. government statistics.

They are among 50,705 illegal aliens reported rounded up and deported along the Mexican border since President Carter announced his amnesty plan on Aug. 4.

Officials said Wednesday a survey of Border Patrol stations along the Mexican border found that the number of aliens captured and deported for the first three weeks of this month is 51 per cent higher than last year's figure of 33,495.

Government experts admit they have no way of knowing exactly how many aliens entering the country escaped capture during the same period. The Border Patrol usually estimates that two-thirds of the alien who cross

the border get away. That would mean that 100,000 aliens have sneaked into the country from Mexico without being caught since the amensty proposals.

along the Mexican border say interviews with the captured aliens indicate that the amensty pro-

posals, as well as worsening Mexican economic problems, are the reasons for the increased flow of aliens.

But aliens who enter the country now are misinformed if they think that Carter's proposals will help them. First, they must be approved by Congress to become

Carter's plan would only apply to aliens who arrived before 1977. Aliens who could prove they arrived before 1970 would be eligible for permanent resident status under the Carter plan. Aliens who came between 1970 and 1977 would be eligible for a five-year temporary resident status.

But apparently, many Mexicans, like the four arrested in Laredo, do not understand the details of the proposal. "A lot of the ones we've caught mention the amnesty when we ask them why they came," said chief agent Roger Stout of Laredo.

Stout and his colleagues point out that the flow of illegal aliens was increasing by about 20 per cent each year before Carter made his suggestion for amnesty. Two new factors have exacerbated the economic woes that drive poor Mexicans across the border in search of work, they

The agents who run the stations say.

Unclear on amnesty, Ex-nurse criticizes Rusk hospital

RUSK, Tex. (AP) - Some patients are held in solitary confinement without doctor's orders for up to 18, days at the Rusk State Hospital, according to a former nurse who claims she was fired after trying to report incidents of patient abuse.

Mary Cooke, who was fired in June. also said this week that patients at the East Texas facility are organized into "goon squads" to discipline fellow patients.

Mrs. Cooke's husband, Dr. Edwin T. Cooke, was also fired. Another physician, James O'Hara, was also dismissed. He claims it was because he was friendly with the Cookes.

mishandled drugs, illegal confinement of patients, understaffing and 'dehumanizing' procedures.

THE MIDLAND REPORTER TELEGRAM, THURS. AUGUST 25, 1977

Dr. Robert Shelton, superintendent at the hospital, denied the allegations in a Tuesday news conference. He also said a Department of Mental Health and Mental Retardation lawyer in Austin advised him not'to state why Mrs. Cooke had been fired Hearings set for this week for the

three former employes have been rescheduled for next month at the request of the trio's attorney. Mrs. Cooke said the "goon squads'

or "bully boys," as they are known at the facility, are encouraged to discipline fellow patients.

Dr. Cooke said, "It's simple, the

staff knows that they cannot strike a patient, but it causes no problems if another patient does.'

Dr. O'Hara said since he arrived at the hospital in October 1975 14 doctors have left + including seven psychiatrists. He said they were pushed out" or "just got fed up" with conditions at the 950 patient hospital.

Mrs. Cooke told of a patient who had voluntarily committed himself but was unable to leave when he wanted. She said the patient wrote a letter requesting discharge but it was destroyed by staff persons.

"When a person admits himself or herself, anytime after 10 days, that person can request to be discharged

and the hospital is legally required to honor the request unless the person is a danger to himself or others and then the doctors at the hospital have to begin commitment proceedings," the nurse said.

PAGE 5B

Dr. Cooke said conditions at the hospital were "shocking."

"I just didn't believe conditions such as this could exist in the 20th century," Dr. Cooke said.

At his press conference, Dr. Shelton said proper investigations had been conducted when abuses were reported and employes have been discharged.

The superintendent also gave specific denials to allegations concerning lack of doctors at the hospital and missing or mishandled narcoties.

factor in firing

SAN ANTONIO, Tex. (AP) - A key factor in the decision to fire former Southwestern Bell Telephone Co. executive James Ashley was his threats to sue the firm and damage its reputation, according to the testimony of a top Bell official.

Louis Bailey, Southwestern Bell's vice president for operations, said Wednesday that reports compiled by Bell security agents concerning Ashley were also considered in making the decision.

Bailey's testimony was a part of the firm's defense in a \$29 million damage suit filed by Ashley and the family of T.O. Gravitt, who headed Bell's Texas operations when he comitted suicide on Oct. 17, 1974.

State District Court Judge Peter Michael Curry refused to allow Bell attorneys to place into evidence the thick, bound volumes containing the reports of the Bell security agents. Curry, however, reserved the right to change his decision later.

Bailey also testified that Gravitt was not a target in the controversial 1974 internal investigation by the company

Bailey, who is assigned to Bell's St. Louis office, was Gravitt's immediate boss. He said Gravitt was informed of the probe on Oct. 9, 1974, the same day Bell executive James Ashley was suspended in San

Ex-wife surprised, dismayed at Mandel conviction

THE MIDLAND REPORTER TELEGRAM. THURS. AUGUST 25, 1977

The Washington Post

PAGE 6B

And a second

G

BALTIMORE — Barbara Mandel was composed. She sat in a small chair in the powder blue living room of her Baltimore apartment, adjusting her gold earings and smoothing the skirt of her aqua dress. She was about to be interviewed for television. Four hours earlier, her exhusband, the governor of Maryland, had been found guilty of political corruption. "I'm very distressed. I never

thought there would be a guilty verdict. "Never." she said. "I didn't think they had enough evidence. I thought the case was very weak." "I know Marvin Mandel I've

"I know Marvin Mandel I've never known him to be dishonest," she said of the man who left her after 32 years of marriage for what he then described as "the woman klove" It was the circumstances of their 1974 divorce, the \$300,000 worth of

money bonds and insurance for Mrs. Mandel, that played a key role in the

prosecution of the governor.

"I don't think (the divorce) had anything to do with it." Mrs. Mandel said of the troubles Mandel found himself involved in.

The bonds, she said, were offered by Mandel's co-defendant and close friend Irvin Kovens because "he wanted to make sure I was taken care of."

And as to the diamond bracelet, the bracelet the prosecution said was part of a payoff to the governor, "it was a

bet," Mrs. Mandel insisted, the prize in a bet she had won.

It was a bet, she said, "because statesma Barbara Mandel can't be bought." "We w She doesn't say these things, she through

doesn't insist on her exhusabnd's innocence because she still loves him. Mrs. Mandel said. She says them because she has known Mandel since he was 15-years-old and "I only know Marvin Mandel to be an honest man."

"I could speak about the boy, I

could speak about the man. I could speak about the politician — or statesman as I called him." she said. "We went up the ladder together" through the long years of Maryland

politics, she said. "A lot of these things happen in government and I think in many ways they are misconstrued." she said. Her reputation is that she is a shrewd observer of Maryland politics.

During the lengthy trial, Mrs. Mandel said people from her banker

to a shoemaker told her they supported the governor. And she told him herself, "You're going to be alright" and sent messages to him during the trial "wishing him well."

"I think he's a definite victim of our times." she said, calling him a target of the prosecutorial mentality spawned by the revelations of Watergate.

"I think Barney Skolnik was out for another scalp," she said of the chief government prosecutor.

No. 1 Byers finaled July 18 for 55 barmels of 43-gravity oil per day. producing through a 14-64-inch choke and perforations at 3,820-3,827 feet.

FISHER EXTENDER

Basin sector wildcats,

pool activity reported

Alpha Petroleum Corp. has taken over and completed the former Amerada Petroleum No. 2 Toler, a 1.500-foot south extension and fifth producer in the Keeler-Wimberly (Canyon sand) field of Fisher. The 24-hour potential was for 59

barrels of 45-gravity oil and 39 barrels of water, producing through pemforations at 4,482-4,532 feet. The new well is 2,173 feet from south

and 467 feet from east lines of section 188, block 1, BBB&C survey.

EDWARDS SSER

The Edwards field gained a 14smile sonth extnsion to Canyon production in Edwards County with completion of U Amoco Production Co. No. 6 H&C Peterson

The calculated, absolute open flow potential was for 560,000 cubic feet of gas per day, producing through perforations at 2,355-3,688 feet. It is 1,160 feet from south and 1,620

feet from west lines of A. J. Nevill survey 43/2, abstract 2648, 10 miles north of Rocksrings.

Scurry test to complete

Lario Oil & Gas Co., Midland, No. 1 Longbotham, Scurry County prospector, % mile northwest of the Gill field and 14 mile southwest of the Ride, South pool, both producing from the Pennsylvanian reef, was bottomed at 6.925 feet, and operator was preparing to run casing, after it recovered oil on a drillstem test in an unidentified formation.

Tool was open an unreported time on the test taken from 6,911-6,925 feet. Gas surfaced in 15 minutes, flowing at 58,000 cubic feet per day. Recovery was 70 feet of oil- and gas-cut mud. 1.370 feet of free oil and 1.800 feet of salt water. The sampler contained .60 cubic foot of gas, 500 cubic centimeters of oil and 900 cubic cen-

draw tests

Exploration activity has been slated for Winkler and Ward counties.

Brock-Highland Equity, Midland, No. 1 Kermit townsite is slated as a 12,500-foot wildcat in Winkler, 1/2 mile south of Kermit. Drillsite, in the Kermit field area, is 1,980 feet from south and 1.830 feet from west lines of section 4, block B-5, PSL survey.

Gulf Oil Corp. filed application to drill No. 5 T. B. Pruett Gas Unit, et al, an 11,800-foot undesignated test, as a southeast twin to a Fusselman confirmation test in the Soda Lake pool of Ward.

It spots 1,000 feet from northeast and 1,400 feet from southeast lines of section 24, block 1, W&NW survey, 10 miles northwest of Barstow.

Discovery completes

Hilliard Oil & Gas. Inc., Midland, former Pennsylvanian, South reopener in the GPM field of Winkler County, 10 miles southeast of Kermit, has been repotentialed as a Tubb discovery

It finaled for a daily pumping potential of 74 barrels of 35.2-gravity oil and 40 barrels of water, with gasoil ratio being 270-1.

Production was through perforations at 6.151-6.298 feet, after the section had been acidized with 12,000 gallons.

Total depth is 8,900 feet, and it is plugged back to 8,400 feet. Five and one-half inch casing is seated at 8,886 feet. Top of the Tubb was picked at 6,122 feet, under ground elevation of 2.812 feet.

Wellsite is 1,320 feet from south and 467 feet from east lines of section 15.

Energy, Canal subjects for governors' meeting

By GARTH JONES

AUSTIN, Tex. (AP) - Control of the Panama Canal will be one of the subjects up for discussion at the Southern Governors' Conference meeting Aug. 27-31 in San Antonio.

Other resolutions at the 43rd annual meeting concern mostly the energy and economic needs of the 19 Southern states and territories.

Seven policy statements and resolutions to be considered by the governors have been prefiled with the Southern Governors' Conference.

Conference action on the resolutions will come when the resolutions committee reports Tuesday, Aug. 30.

The proposed resolution on the Panama Canal was offered by Louisiana Gov. Edwin W. Edwards, said the proximity of the canal to the Southern states "makes its continued control and operation under the terms of the existing treaty imperative."

It calls on U.S. Senators representing the Southern states "to oppose vigorously any treaty which would alter, remove or reduce the existing control over and operation of the Panama Canal and the Panama Canal Zone as presently and historically exercised by the United States of America.

The conference also will be offered a lengthy policy statement on energy that was prefiled by Oklahoma Gov. David L. Boren, chairman of the conference energy committee.

A similar stand on deregulation of natural gas was adopted recently at a meeting of Midwestern governors. Texas Gov. Dolph Briscoe, Southern Governors' Conference chairman,

Judge nixes gas petition

EL PASO, Tex. (AP) - Plans by Lo-Vaca Gathering Co. to cut off its gas supply to Crystal City have said at the time that he hoped the Southern governors would follow with a stand on "phased" deregulation.

ENERGY

OIL & GAS

STOCKS/COMICS/ENTERTAINMENT

The policy statement sent to Southern governors for preconference study includes the specific recommendation that "federal legislation should be enacted which would remove wellhead price controls on new natural gas. The legislation should also contain provisions designed to limit or eliminate windfall profits. The deregulation should be phased into effect to mitigate its impact on consumers."

The policy statment on energy also calls for "maximum efforts" to develop all outer Continental Shelf areas including the Atlantic seaboard; for a maximum but reasonable time to replace natural gas with coal as a boiler fuel: for a study to see if the federal government should "oversee" renovation of railroad beds for long-haul coal transportation, at no cost to the tax payer, and for federal support of both nuclear fission and fusion for future

energy Other policy statements and resolutions to be considered by the Southern governors include:

Meet slated on taxation

A two-day institue on Basic Oil & Gas Taxation will be sponsored by the American Association of Petroleum Landmen Sept. 22-23.

The institute will be held at the Airport Marina Hotel at Dallas-Fort Worth Regional Airport.

The meeting will covery the basic concepts of oil and gas taxation, including depletion, sale or sublease, tax free receipt of interest under the "pool of capital" concept deductions of intangible drilling and develop-ment cost, associations taxable as corporations and how to avoid, use of "tax partnerships" to avoid capitalization of drilling costs; use of formal partnerships, farmouts, production payments, at risk limitations and secondary recovery and unitization.

Instructor for the course is Timothy M. Marason, a member of the

Two areas

It spots 1,787 feet from south and 467 feet from west lines of section 261. block 1-A, H&TC survey. Planned depth is 6,700 feet.

RUNNELS PROJECT

Walsh & Trant, Abilene, No. 2 Cora Byers has been staked as a south offset to the firm's No. 1 Cora Byers . Gardner oil reopener in the Byers pool of Runnels

The test, slated to 4,000 feet, spots 1,514 feet from north and 2,253 feet from east lines of J. K. Thompson

Exxon develops new notor oil

HOUSTON (AP) - Exxon Co. USA said today it plans to start marketing in September a new gasoline-saving motor oil that improved mileage an average of 4.5 per cent on road tests. Randall Meyer, president, said gasoline consumption in the United States could drop by more than 200 million gallons a year if only one out of every 20 cars used the new oil instead of typical multi-grade oils.

Meyer said the new oil is expected to result in savings equivalent to about three cents per gallon of gasoline for the average motorist or about one gallon per typical tank of gasoline.

The mileage improvement was attributed to a reformulation of Exxon's Uniflo motor oil through new technology that reduces the friction between moving parts in automobile engines.

The new light-colored and nonsynthetic motor oil was a four-year project of Exxon Research & Engineering Co.

timeters of water. Location is 660 feet from north and 1.980 feet from east lines of section 149, block 97, H&TC survey, three miles northwest of Ira.

Gas field extended

C&K Petroleum, Inc., Midland, has completed No. 1-12 Carlsbad Communitized as an extension to Morrow gas production in the Carlsbad, South field of Eddy County, N.M.

The calculated, absolute open flow gauge was for 2.396 million cubic feet of gas per day. Completion was effected through

perforations at 11,485-11,559 feet, in 5½-inch casing set at 11,683 feet. Treatment was not reported.

Wellsite is 840 feet from south and .760 feet from east lines of section 12-22s-26e, one mile southwest of Carlsbad townsite.

Pecos field Stepout set

George T. Abell, Midland, plans to drill No. 6 State-Heierman as a west stepout to the current two-well marginal Montoya 4775 area of the Abell, West field in extreme North Pecos County

Location is approximately 4,700 feet from most northerly north line and 4,400 feet from most easterly east line of section 12, block 3, H&TC survey, or 2,249 feet from northwest and 1,000 feet from southwest lines of the section, two miles north of Imperial.

Mesa reveals prolific gas-condensate strike

AMARILLO - Mesa Petroleum Co. has announced that No. 13 South Pelto, in which Mesa holds a 25 per cent working interest, has been production tested from two zones at a combined daily rate of 1925 barrels of oil and 1.4 million cubic feet of gas.

The first test, taken through perforations at 13,257-13,277 feet, flowed at a daily rate of 1.300 barrels of oil and 1.1 million cubic feet of gas on a 20-64-inch choke.

The second test, taken on a 12-64inch choke, through perforations at 2,006-12,018 feet, flowed oil at the daily rate of 625 barrels, plus 300,000 ubic feet of gas.

Mesa, as operator, has ordered a six-well drilling platform and a production platform to partially develop the field. Initial production is

expected in mid-1978. The block is located 10 miles offshore Louisiana in 35 feet of water and was purchased for \$5.3 million in the May, 1975 federal offshore lease sale. Mesa and its partners were awarded three tracis contiguous to the discovery tract in the June 1977 lease sale, for a total of \$18.2 million.

Other partners with various interests include: Oil Development Co. of Texas, a subsidiary of Santa Fe Industries, Inc.; American Natural Gas Production Co., a subsidiary of Michigan-Wisconsin Pipe Line Co.; Osy Petroleum, Inc.; Reserve Oil, Inc.; a subsidiary of Reserve Oil & Gas Co.; Aminoil USA, Inc., a subsidiary of R. J. Reynolds Industries, Incl: and General Crude Oil Co., a subsidiary of International Paper Col.

block B-10, PSL survey

Terra plans office here

Terra Resources, Inc., has announced plans for the establishment of a new District Office in Midland, in the Wall Towers West Building

The Southwest District Office will be responsible for the firm's oil and gas exploration and production activities in West Texas and New Mexico.

Terra is a wholly-owned subsidiary of Farmland Industries, Inc., Kansas City, Mo., and plans for exploration, production and administrative staffs totaling 45 in the Midland office.

The Midland office plans follow by a few days Terra's announcement that it had activated a new Mid-Continent District Exploration and Production office, also with 45 members, in Oklahoma City.

Outpost site set in Eddy

Petroleum Development Corp. Albuquerque, N.M., has filed application to drill a 3/4-mile northwest outpost to Morrow gas production in the Lusk, North field of Lea County, NM

It is No. 1 Pedco-Gulf-Federal Communitized, slated 1,980 feet from south and 660 feet from east lines of section 33-18s-32e, nine miles south of Maljamar. It also is 21/2 miles southwest of the Querecho, East (Morrow) field.

Pogo hires K. R. Joynt

HOUSTON - Kenneth R. Joynt, a former resident of Kermit, will join Pogo Producing Co. Sept. 1 as senior vice president - operations, as well as a member of the board of directors.

Joynt, who is retiring as general manager of the Houston exploration and producing division of Mobil Oil Corp. is a graduate of Missouri School of Mines. He began work with Mobil in Kermit, first as a roughneck and then in a variety of production department positions in New Mexico, Oklahoma and Louisiana, as well as Texas. He was named production manager, vice president and director of Mobil Oil Canada, Ltd., in 1960.

He was named operations coordinator and vice president of operations of Mobil's North American Division in New York in 1974, and in 1969, he became regional vice president in Houston of Mobil's Gulf Coast exploration and producing region

He has held his present position since 1975, following a worldwide realignment of Mobil's explorationproduction ofganization.

moved closer to reality following a federal judge's refusal here to enter the controversey.

U.S. District Court Judge John H. Wood Jr. on Wednesday dismissed a petition by five Crystal City residents to obtain a temporary restraining order against Lo-Vaca to prevent the company from cutting off the city's gas supply on Aug. 27.

Wood said his court lacked jurisdiction to act on the request by the residents of the South Texas city.

Lo-Vaca officials say they will cut off the gas supply to the city-owned gas distribution system because the city will not pay over \$800,000 owed to the firm for gas already supplied.

The dispute arose when Crystal City refused to pay more than the 36 cents per 1,000 cubic feet (mcf) called for in the city's supply contract with LoVaca signed several years ago.

After the contract was signed, the **Texas Railroad Commission granted** Lo-Vaca the right to charge more than the contract price. The current rate is now about \$2 per mcf.

Crystal City argued the case to the Texas Supreme Court, which ruled that the city must pay.

Judge Wood in his order dismissing the petition said the residents failed to show that the State of Texas was sufficiently involved in the activities of Lo-Vaca to meet the federal court requirements of showing state action before the court could act.

Wood said Lo-Vaca is a private utility and the fact that the Railroad Commission sets the rates the firm may charge does not mean the utility is state controlled.

The judge also said the plaintiffs failed to show they could not get adequate relief in state courts.

Also named as defendants in the suit were the Railroad Commission, the City of Crystal City and its mayor.

The plaintiffs were expected to appeal Judge Wood's ruling to the 5th Circuit Court of Appeals in New Orleans

career challenging

By DAN HALL

NEW HAVEN (AP) - John Collins is a male midwife who says his biggest problem is that people don't know what to call him

"I get 'mid-hubby' and 'nurse man.' One day I could hear one of my patients coming down the hallway asking, 'Where is my? ... where's? John?"

The bearded Collins is one of the first men in the United States to become a certified nurse midwife. Since he broke the ice four years ago, fewer than a dozen men have followed him into the world of about 3,000 female midwives, so he expects to remain a bit of an oddity.

Collins, 35, entered the Yale School of Nursing master's program in 1970 "ignorant of how much pioneering I'd be doing.

Today he sees himself as a small but important part of a health-care revolution. He considers the small band of men a "minority group" but that doesn't mean a male midwife can't be successful, he said in an interview.

"When the patient first blinks and says, 'YOU'RE a midwife?' it actual-

U.S. farm exports said headed for rare decline

By DON KENDALL

WASHINGTON (AP) — The dollar value of U.S. farm exports appears headed for its first decline in nearly a decade next fiscal year, according to Agriculture Department analysts.

Although the yearly increases recently have eased from their soaring climb of a few seasons ago. the value of the exports has climbed steadily since they dipped 9.4 per cent in 1968-69 to about \$5.8 billion from \$6.4 billion the previous year.

For the fiscal year that ends Sept. 30, farm exports are expected to be a record \$24 billion, up from less than \$22.8 billion in 1975-76.

But while actual export tonnages are expected to decline only slightly in the coming year, prices of some commodities - mainly grains - have tumbled sharply because of large harvests in the United States and elsewhere.

Thus, according to USDA's Outlook and Situation Board, 1977-78 fiscal year farm exports may be down perhaps 5 to 10 per cent" from the \$24 billion estimated this season. That would put next year's export value at \$21.6 billion to \$22.8 billion.

The recent report said, however, that "much uncertainty exists" about the final outcome of 1977-78 farm exports and that this year's harvests including the U.S. corn crop to be harvested this fall - will have an important bearing.

ly gives us something to begin talking about. I don't know about you, but I don't want to have someone give me a physical exam until I know him better." he said.

Midwives who have had children may have a special basis for their patient relationship, but Collins insists that he does, too, because he "won't be tempted to tell a patient I did this or that differently when I was pregnant.'

Since the nurse-midwife tries to minister to the whole family, not just the mother, being a man can be a plus

"It really doesn't matter whether it's a man or woman providing the care as long as they follow the principles of nurse-midwifery." he said.

After breaking away from the tradition of midwives helping women give birth when no other aid was available. today's college-trained midwife is gaining popularity among women with uncomplicated pregnancies who want a closer relationship with their medical adviser, he said.

"There are a lot of sick people," he noted, and they take much of the typical obstetrician's time. "We're geared to health, not to illness."

On the basis of quality, 1976-77 farm exports are currently estimated

at 100.8 million metric tons, down from almost 106.9 million tons in 1975-76. Officials said that "only a marginal decline" in tonnage is expected next year. "Somewhat smaller shipments of

feed grains, tobacco, fats and oils are expected, but shipments of wheat and soybeans are expected to increase.' the report said.

Of the 100.8 million tons of exports estimated this year, 23.5 million will be wheat and flour: 50 million, feed grains; 2.1 million, rice; 15.5 million, soybeans; 1.2 million, vegetable oils; 4.5 million, oilcake and meal; 1.1 million, cotton; 300,000, tobacco; 1.3 million, fresh fruit; and 1.3 million, animal fats. A metric ton is 2,205 pounds.

There was no breakdown by commodities in the 1977-78 export tonnages, but the report said shipments of wheat and soybeans may increase while exports of feed grains. tobacco, fats and oils are expected to be "somewhat smaller" in the year ahead.

Japan continues to be the largest single foreign customer of the U.S. farmer, buying an estimated \$3.9 billion worth of products this fiscal year, up from 3.4 billion in 1975-76.

By comparison, the Soviet Union is buying \$1.1 billion worth of/ U.S. commodities this year, down from nearly \$2.05 billion in 1975-76.

Miniseries reenacts news events

By JAY SHARBUTT

LOS ANGELES (AP) - Several years ago, public TV offered two fine shows, "The White House Transcripts" and "The Watergate Cover-Up Trial," reenacted accounts of the end of Richard M. Nixon's

THE MIDLAND REPORTER-TELEGRAM, THURS. AUGUST 25, 1977

The guy who made those shows - with actors, stage sets and verbatim dialogue from the

ENTERTAINMENT

Watergate tapes and trial - is using the same technique again for four more it-really-happened programs.

He's Thomas McCann, who with KERA-TV in Dallas and \$625,000 from the Corporation for Public Broadcasting - CPB - has come up with "Eye- 90-minute pilot show CPB funded for \$125,000 a year witness," a public affairs miniseries for public TV.

The first one-hour show, about a jetliner crash, the Karen Ann Quinlin case and the trial of a Massachusetts masseur on a prostitution charge, is being fed stations tonight by the Public Broadcasting Service.

nights in various areas. KCET here, for example, won't show it until Spet. 7.

As with his first two shows. McCann says the from public documents, verbatim, and we try to dramatist's surmise is taboo.

come as close as we possibly can to the real situation

But there are exceptions. In the jetliner segment. about the 1974 crash of an Eastern Airlines DC9 in South Carolina that killed 71 person. he didn't use the names of the piolot or copilot.

This, he says, is both out of consideration to the fliers' families and because the copilot survived 'and is trying to make a living again flying air-

planes. There was no need to use his name." He said the 10-minute segment, shown entirely in the plane's cockpit, uses the fliers' words as taped on a cockpit voice recorder, later made part of National Transportation Safety Board documents.

At the end, he said, newsman Andrew Macmillan recounts the board's findings on the probable cause of the accident

McCann says "Eyewitness" is an outgrowth of a ago

He said it was tested last fall in five cities - New York; Boston; Des Moines, Iowa; Brimingham, Ala., and Seattle, Washington.

'It got astonishingly high marks, so they decided Check local listings, as it may air on different to fund these four programs," he siad, adding that each costs about \$125,000

He said all the series' reenactments are based only miniseries reenacts major news stories "directly on official transcripts. Invented dialogue of

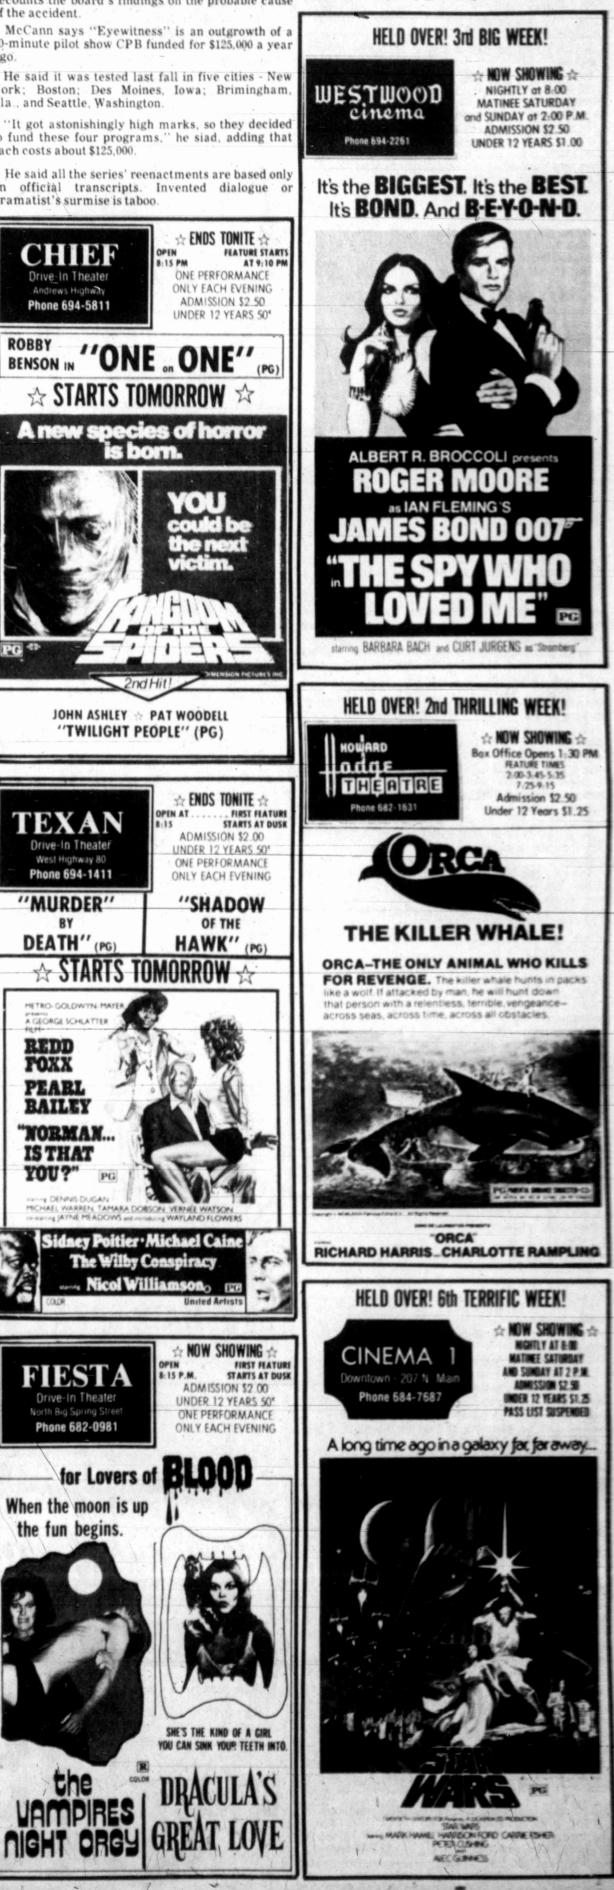

"I think there's less chance for distortion thisway than in, say, 'Missiles of October''-an ABC docu-drama on the Quban missile crisis - "which is largely the product of a writer's mind," he said. >

There's more chance for objectivity and balance.

PAGE SC

McCann said he may seek CPB funding for six more "Eyewitness" shows in 1976. However, he added, he wants to see how the first four do.

"I don't plan to go back to CPB until I see how the viewers like it - and the reviewers," he said. "But based on the reaction we got to the pilot last fall, I think we're in pretty good shape.'

Rock fascimiles in art exhibit

ALPINE - Facsimiles of Indian rock art and rock art paintings make up a fascinating and definitely informative new exhibition in the Museum of the Big Bend at Sul Ross State University here.

The rock art reproductions were done by Miriam A. Lowrance, associate professor of art at SRSU. She has coducted extensive studies of rock art in the Big Bend region and her copies on display in the museum depict Indian paintings found in Brewster, Presidio and Jeff Davis counties. Her studies also resulted in the location of several previously-unknown rock art sites. In the interim since her original visits to the sites, many of the paintings and carvings have been erased by nature, or destroyed by vandals.

'Early Big Bend inhabitants left paintings and carvings on the rock walls of caves and canyons throughout the region." explains Museum of the Big Bend director Ken Perry. He said the cave paintings are difficult to date but speculates that most were done between 900 A.D. and the latter part of the 19th Century

The Museum of the Big Bend is open to the public portrait that appears in The box office, though it assured, the radio is 9 a.m. to 5 p.m. on Saturdays, and from 1 to 5 p.m. between 1 and 5 p.m. Tuesday through Friday, from

Center celebrates years as teacher

Everett F. Bingham will be celebrating 25 years as a Midland dance teacher when he opens his Bingham Dance Center for the fall term Monday.

The dance school is located at No. 7 Inperial Shopping Center on West Wadley Avenue.

Bingham said the stuido will offer instruction in funny, but it soon became was wrong. Trying to ballet, tap, toe and modern jazz dance, in addition to bothersome, so much so make a movie is like acrobatics and baton classes. There also will be a that the door is locked trying to run the 4-minute special class for 3-year-olds. Especially for adults will be classes in ballet, tap and country-Western dance.

> Joining Bingham on the staff of the center for the upcoming fall term will be Jeanne Burk, Carol Rubin, Peggy Jacobs and Cherry Jones. Two new instructors on the staff will be Sunny Allen, who formerly operated a dance studio in Houston, and Polly Campbell, who formerly directed a studio in Austin.

The Bingham Dance Center is now enrolling students for the fall term. Full information on course "Actually, it's a very offerings and registration procedures is obtainable successful debut in their by dialing 694-2428. terms. To paraphrase

George Bernard Shaw, if you want to know about Specials to be key art, talk to the businessmen - they have money. If you want to to TV programming know about money, talk to artists - they're very interested in it. I realize NEW. YORK (AP) - Specials will be a key to that as long as art and business try to coexist,

winning the ratings race this year, a major advertising agency says in its report on prime time there will always be that network television. Feldman is bright

"Each network is depending on special programming to flatten the competition," Batten, perceptive and likable. Barton, Durstine & Osborn said in the report Finally, the time for the released Tuesday. question has come and

Its analysis of the new season further noted that viewers can expect more general and family dramas, more situation comedies, more sports renewed is rather like shows and, of course, more specials this year.

> The agency also said there was a trend toward more science fiction and fantasy programs. In addition, viewers should expect a broader scope of subjects in made-for-TV films, including wife beating, breast cancer and the loss of sexual prowess in a youth

option. We've yet to agree But there has been a 43 per cent decline since last on the terms for the next year in the amount of programs classified as music. comedy or variety and an 11 per cent decline in action, adventure and mystery shows.

> "During the past year prime time network programing has been marked by innovation, quick. action and monumental change," the report said, 'and this volatility will continue to influence the networks' scheduling policies for the fall season."

> BBD&O said that networks found it easier to make new programing less violent than to modify longrunning shows such as "Kojak" and "Police Woman" for fear of losing audiences.

The "real threat" to the old police and detective action shows, the agency continued, was science fiction, such as "Six Million Dollar Man." "Bionic Woman,"""Wonder Woman" and the new entries, "Man from Atlantis" and "Logan's Run."

The report said that the networks were answering their need for dramatic programs lacking violence with general and family drama shows, which have increased 50 per cent this year to occupy 18 per cent f the schedule.

Soviet 'swap' by Churchill bared in book

By ROBERT G. KAISER The Washington Post

WASHINGTON - Winston Churchill did more to encourage a Soviet "sphere of influence" in Eastern Europe than has previously been realized, according to a document revealed in a recently published book.

In October, 1944, Churchill actually told Joseph Stalin, the Soviet dictator, that the two of them should disguise an agreement on sphere of influence in Eastern Europe "because the Americans might be shocked.

And in fact, Churchill never did explain fully to **President Franklin D. Roosevelt or the American** government precisely what he and Stalin had agreed to in Moscow on Oct. 9, 1944.

Diplomatic historians have long been intrigued by that Stalin-Churchill meeting. Some have concluded that Stalin probably interpreted Churchill's behavior then as acquiesence to a Soviet sphere of influence in Eastern Europe after the war.

The only first-hand account of the Oct. 9 meeting sublished previously was Churchill's own in volume five of his war memoirs, "Triumph and Tragedy." Charles E. Bohlen, the American diplomat, described the meeting in his memoirs as "an important one still clouded in mystery.

But Daniel Yergin, author of the new book "Shattered Peace" (published by Houghton Mifflin), discovered the official British minutes of the meeting in the military archives at Imperial College, London. Yergin found them in the personal papers of Gen. Hastings Ismay, Churchill's chief of staff.

The minutes show that Churchill misreported the meeting with Stalin both in his memoir, and in a message to Roosevelt written two days after the meeting occurred.

In his memoir Churchill recounted his decision to jut down some figures on a half-piece of paper and pass them to Stalin. The paper listed countries and "percentages" of influence that Russia and the Western allies would have in each one.

Churchill allocated the Russians 90 per cent in Romania, 75 per cent in Bulgaria, 50 per cent in Yugoslavia and Hungary and 10 per cent in Greece (the Balkan country of greatest strategic importance to Britain).

In his memoirs Churchill admitted his own nervousness about this piece of paper; he suggested to Stalin that it burned. But Churchill also claimed that the percentage deal was not meant to have lasting significance.

"We were only dealing with immediate wartime arrangements," Churchil wrote. "All larger questions were reserved on both sides" for a later peace conference, he wrote.

In his personal letter to Roosevelt on May 11 Churchill wrote from Moscow: "Nothing will be settled (during Churchill's Moscow visit) except preliminary agreements between Britain and Russia, subject to further discussion and melting fown with you."

À

G

But the minutes of the meeting that Yergin wered tell a different story. Churchill did not

say the percentage arrangement was temporary at all. Stalin told the British prime minister that he "understood" him. The dictator noted that "it was a serious matter for Britain when the Mediterranean was not in her hands" - a reference to Churchill's desire for an upper hand in Greece. So, Stalin said, Britain would enjoy "first say" 'in

Greece, as Russia would have "first say" in **Romania**

The minutes continued: "The Prime Minister said it was better to express these things in diplomatic terms and not to use the phrase 'dividing into spheres' because the Americans might be shocked. But as long as he and Marshal Stalin understood each ather, he could explain matters to the President (Roosevelt).'

Yergin describes Churchill's willingness to cut this deal with Stalin as "paradoxical, if not cynical, in the light of Churchill's bitter denunciation of exactly such a division (of Europe) in his Iron Curtain speech (at Fuiton, Mo.) a year and a half later."

Yergin notes that Churchill suffered constantly from ambivalent feelings about Russia. He was a Serce anti-Communist, but also a practical war leader who believed Soviet help against the Nazis was crucial.

The only ranking American in Moscow when Churchill made his arrangement with Stalin was W. Averell Harriman, then the U.S. ambassador there. Harriman was included in several of the meetings, and Churchill wrote in his memoir that the American attended the crucial Oct. 9 session. Harriman said in his own memoir that this was not true - that he was otherwise occupied.

Harriman only learned of the percentage deal on Oct. 12, when he visited Churchill at his guest house in Moscow. Churchill showed him the draft of a letter he planned to send to Stalin, reviewing the British derstanding of the percentages agreed to on Oct. 9 Harriman advised him not to send the letter, according to his memoir, and added that Roosevelt would "repudiate the letter if it was sent."

"I don't understand now, and I do not believe I understood at the time, just what Churchill thought he was accomplishing by those percentages." Harriman recalled.

It is unclear why the British minutes of the Oct. 9 meeting have not emerged earlier. Yergin said in a shone interview that the copy of them that should be in the British Public Records office in London is missing. He said he thought it was an unintended accident that he was able to find the minutes in the lismay papers.

Midland Cubs split pair with Gold Sox

Gregg Wilkes hogtied the Midland Cubs on eight hits, 5-2, in the first game of a doubleheader and Andy Muhlstock handcuffed Amarillo on six hits, 5-2, at Cubs Stadium Tuesday night to set the stage for the fivegame showdown with El Paso's Diablos.

The Texas League West Division leading Diablos, who already have the first half pennant in safe back on the border, lead the Cubs by a game going into tonight's 7:30 game at Cubs Stadium.

Midland, by virtue of its split with the Gold Sox and El Paso's loss to San Antonio, picked up a half game on the leaders.

Manager Jim Saul will lead with Darrell Turner, 12-7, in the series opener

THE BURDEN is pretty much on the Cubs to take at least three games in the series since the Diablos head home to finish up the season with lastplace Amarillo while the Cubs must go to San Antonio to play the Dodgers, who are still harboring pennant aspirations of their own.

After the 5-2 loss in the first game Tuesday, the Cubs were in desperate straits going into the second game. A loss would have dropped them two

games back and meant they would have had to virtually sweep the El Paso series to keep their hopes flickering the second game.

Muhlstock' with a big three-run homer from Steve Haug, was equal to the occasion, notching his sixth straight win to raise his record to 12-4. It was 1-1 going into the fourth when the Cubs exploded for four runs, Haug's authoritative wallop over the left field fence providing the clincher against Mike Lentz, 3-6, who also

pitched a creditable six-hitter.

KARL PAGEL'S one-out double got the uprising underway and then Steve Davis reached first on an error, a miscue that made the entire inning possible.

Aaron Randall popped up and then Carlos Lezcano singled to plate one run and Haug followed with his second home run of the year.

Muhlstock surrendered a leadoff homer to Craig Stimac in the fifth for Amarillo's only earned run. Midland had gone ahead in the first without the aid of a hit when Kurt Seibert walked. stole second and scored on Scott

Boras' infield grounder. Amarillo tied it in the second with an unearned run when Gene Quirk beat out an infield hit, Paul O'Neill was hit by a pitch and then third baseman Boras' throw to second on Bill Hallstrom's double play grounder let the run score.

IN IHE first game, Amarillo struck for four first-inning runs off Gary Martz, 3-3, and Wilkes kept the Cubs bats under control the rest of the way. Broderick Perkins, who had three hits in the game and five for the night, doubled home Craig Stimac, who had singled, and Ivan Murrell, who had walked. Luke Wrenn singled Perkins to third and Quirk's fly brought in the run while Steve Smith's single plated the fourth run.

Doubles by Perkins and Wrenn accounted for another run in the third. However, the big story continued to be Muhlstock, who didn't become a starter July 11 after eight saves as a reliever. He lost his first two starts. but has reeled off six straight wins since, including five complete games and two shuouts

In that stretch, he has fanned 26 and walked only three in 52 innings.

HIS EARNED Run Average for that period has been 1.52, dropping his season's ERA to 2.68, which should give him a pretty good shot at the

And in spite of the first game loss, Saul also got some pitching encouragement in the first game when he relieved starter Martz with lefthander Tom Butler, until now an unknown quantity.

Butler, a product of Oral Roberts University, who was a combined 8-0 at Bradneton, Rookie League, and Geneva, New York-Penn League, blanked Amarillo on three hits over the final five innings, fanning four and walking none.

Unfair to Lee youngsters

By PAUL DOMOWITCH

PAGE 2D

How do you tell a 16 or 17-year-old kid that he's being punished for something he had absolutely no control over? How do you tell a young teenaged football player who had dreamed of playing for a district championship since he was old enough to walk, that his dream just isn't going to come true this time around?

Life can be so unfair at times, and Wednesday, it dealt a cruel blow to some 60 Lee High School football players who were told that they were ineligible to compete for the District 5-4A championship this year because they violated a rule they have probably never even heard of, in a book they have probably never even seen

IF YOU'VE ever wondered why young people have so much trouble trusting older ones, now you know.

I feel very bad for those kids, which may comes as a surprise to a lot of people who for some reason , think I dislike Lee High. They did absolutely nothing wrong, except obey the orders of a football coach, and now they're being punished.

Tuesday night, at the Lee booster club meeting in the school cafeteria. Coach Jim Acree explained that he was unaware of the ruling, and didn't know that the use of blocking shields by his players during the first four days of pre-season workouts was a University Interscholastic League infraction. He stood by his story on Wednesday, when he went before the 5-4A executive conmittee in Big Spring.

HERE'S ANOTHER surprise for some of you people. I believe Acree. Personally. I'm not too fond of the man. But I am convinced that he had no knowledge at the time of the infraction, that he was violating a UIL rule. I can't believe anyone would be stupid enough to break a law knowingly in front of a television camera. camera.

But that's no excuse. Jim Acree is pleading ignorance, and ignorance is no excuse here. Anybody who is being payed \$23,000 a year for doing nothing

but coaching football, damn well better know EVERY rule he's supposed to abide by.

> I CAN'T tell you how many calls Bob Dillon and I received Wednesday from people who got the notion that we were trying to run Acree out of town. One guy wanted to know why we couldn't write anything good about the man. I told him we weren't trying to write anything good or anything bad. We were simply trying to do our job, which was to report the facts --- and we did.

> It's strange how people's minds work though. Angry over what had happened earlier in the day, they felt the need to lash out at somebody, and we were nice and handy. Like Frank Boggs was nice and handy last year, after the Oklahoma City Times sports editor reported that the Oklahoma Sooners were under preliminary investigation by the NCAA. OU fans threatened the man's life for just telling the facts to a public that had a right to know. Nothing more or nothing less. I haven't gotten a threat on my life yet, but if I do, I've got just one request. Do it in person.

> THERE ARE two things that bug me about this whole mess. The first of course, I've already mentioned. Innocent kids are being punished for someone else's mistake. The Lee High School football team, before they even put one foot on the field this season, knows they cannot win - except in their own minds. It's bound to be a helpless feeling.

The second thing that bugs me is that Midland schools Athletic Director Sam Cox is being made the fall guy in what's happened, and that's just not fair.

I could probably count on the fingers of my hand the number of times I've had personal contact with Sam in the year I've worked in Midland, but I respect him as much as any man I've ever met. He's honest and fair, and there isn't anything more you can ask out of anyone.

But others seem to think differently. They are blaming him for Lee's woes, because he reported the rules violation to the UIL office in

Austin on Monday. They are saying he too has some sort of a grudge against Acree

Well, here are the facts, and if you still think Cox was wrong for reporting the infraction after reading this, you've really got problems.

On Wednesday, August 17; KMID-TV ran the broadcast of an interview at the Lee practice field with Acree. and in the background was the team practicing with blocking shields. When it was run, it can be assumed KMID had no idea of the significance of the tape, because, after all, a television station isn't supposed to

know Rule 24 of the UIL code. I didn't know Rule 24 of the UIL code.

ON THAT same day, Cox, while visiting the Rebels' practice session, realized they were violating the UIL rules by using blocking shields before the pre-assigned date.

After talking with Acree the next morning, Cox tried to contact Bailey Marshall, the director of the UIL, and report what had occurred. He was told that Marshall was out of town and would not be back until the following Monday. On Monday, Cox called Marshall again, and reported the violation.

I can't say for sure if Sam reported it because he felt it was the right thing do, or because he realized to somebody else would if he didn't. It's a fact that quite a few people in Midland and Odessa who saw the film, realized what was going on and were prepared to contact Marshall.

THE LATTER had to enter into his mind obviously, but I think Sam reported it because he thought it was git thing to do. It was. Some the a the Midland Independent peo Sch District administrative staff to Cox that he sit on it for a sug wh but Sam said no.

So, the UIL would have found out about what Lee did one way or .other. If they didn't turn themselves in, somebody else surely would have. And you don't know how much of a difference Sam's phone call may have made. Lee will not be able to compete for the 5-4A football title this season, but at least they can still play

their games. If Cox and the school district had tried to sit on it, and the UIL found out, there would be no season at all for the Rebels. And brother, you can take that to the bank. So, think about that for a while. There are definitely some guilty parties in this citair, but Sam Cox is not one of them. And he doesn't deserve the shabby treatment he's been getting. If you want a fall guy, look somewhere else. Because Sam just did his job. And you can take that to the bank too.

THE MIDLAND REPORTER-TELEGRAM. THURS. AUGUST 25, 1977

Bjorn Borg star

BROOKLINE, Mass. (AP) - The brash young king of tennis has been dethroned. James Scott Connors no longer is No. 1 in the world

'Well, you can't hold it forever," Jimmy Connors said Wednesday. 'I've had it for 31/2 years. I didn't even know I lost it

But he did indeed lose the world's top ranking. The Association of Tennis Professionals, whose computer ranking is highly respected, said Wednesday that Bjorn Borg of Sweden was No. 1 and Connors No. 2.

The news didn't strike Connors like one of the lightning bolts that rumbled around the Longwood Cricket Club. It was more like he had known all along that he would be replaced.

"I haven't fallen; I've only missed a step," Connors said. "I don't like No. 2. There are a lot of claims to No. 1. But a lot can happen next week (in the U.S. Open at Forest Hills).

The ATP rankings were used to make the seedings for the Open. Thus, Borg is at the top and Connors right behind him.

Connors had been No. 1 in the world in the ATP rankings since July, 1974 when he replaced Australia's John Newcombe. The young left-hander from Belleville, Ill., held the top spot longer than any player in the ATP's history

Sox' pitching for 19 hits, 14 off starter Steve Stone, 13-9. Texas and Boston spent more than

Baltimore Manager Earl Weaver wasn't around to watch the bumbling. Weaver was thrown out of the game in the second inning, his sixth ejection of the season.

"We've played good baseball all year and we played good tonight,' insisted Weaver.

Possibly the biggest goof of the night was committed by Chicago catcher Jim Essian, who missed third base on a single by Alan Bannister. Essian was called out on a Baltimore appeal play, costing his team a run.

Yankees 11, Twins 1

A 62-minute rain delay in the first inning may have been Minnesota's undoing. After scoring a run in the top of the inning, the Twins saw Mickey Rivers double and Reggie Jackson walk for the Yankees before the rain halted play. When the game resumed. Pete Redfern immediately surrendered Chris Chambliss' 15th homer and the rout was on.

Roy White, Bucky Dent and Mickey Rivers also slammed home runs for New York, which stretched its firstplace Eastern Division lead to two games. Catfish Hunter, 9-7, hurled a four-hitter for his third straight victory.

Rivers, who had three hits in the game and eight consecutive safeties over two games before striking out in the eighth, was not ecstatic about his hitting streak, which brought his average up to .326.

Royals 4, Brewers 3, 15 innings

John Wathan doubled home John Mayberry with the tiebreaking run, then scored what proved to be the winner on Amos Otis' single as Kansas City took its eighth straight game, lengthening its AL West lead to two games.

Doug Bird, 10-4, hurled 51/3 innings of one-hit relief, striking out seven, to earn the victory.

Indians 5-2, Angels 3-5 Cleveland beat Nolan Ryan in the

Family, friends, crafts fill life of president

By PATSY GORDON

Friends, needlework and her children fill the life of Mrs. A. N. (Dorothy) Sharrick.

When the longtime Midlander is not busy serving as president of Chapter BS of the P.E.O. Sisterhood, she creates with needlepoint and works with the Midland Memorial Hospital Auxiliary and informal organizations of friends.

Mrs. Sharrick, who has been a member of the Sisterhood for 40

years, thinks one of the advantages of belonging to the organization is the friendships which are cultivated. "It's purposes are both educational and charitable, but we also have close association, which means everything to me. In times of joy and in times of sorrow, there is this close association I have never found in any other club."

The programs of the chapter, organized May 6, 1936, vary. The 1977-78 schedule includes programs on pyramid power, home safety, the trial of Christ from a lawyer's viewpoint and a tour of the Holy Land by way of slides. A Founders' Day luncheon in January with Chapter DD, P.E.O., as hostesses also is on the yearly agenda.

Nationally, a supreme convention is scheduled Sept. 26-28 in Chicago, Ill., and a state convention will be held April 24-26 in Lubbock.

According to the chapter's yearbook, "The objects and aims of P.E.O. Sisterhood shall be general improvement which comprehend more especially the following points: To seek growth in charity toward all with whom we associate, and a just comprehension of and adherence to the qualities of Faith, Love, Purity, Justice and Truth.

To seek growth in knowledge and in culture and to obtain all possible wisdom from nature, art, books, study and society, and to radiate all light possible by conversation, by writing and by the right exercise of

any talent we possess. To aim at selfcontrol, equipoise and symmetry of character and temprance in opinion. speech and habits.

The Midland chapter has 44 resident members, including four charter members, Mrs. James N. Allison, Dr. Louise Fillman, Mrs. Paul H. Kolm and Mrs. J. L. Norman. Mrs. Sharrick's children are a daughter, Mrs. Susan Mossberg of Longmont, Colo., and two sons of Midland, Jack Sharrick and Tom Sharrick.

County fairs evolving into big businesses

By JOHN J. GOLDMAN The Los Angeles Times

ALLENTOWN, PA. - The big man in the dark suit had the kind of face that looks natural with a cigar. He stood just inside the wire mesh grandstand gate, amid drying puddles from a sudden summer thunderstorm, and through his bullhorn he shouted an urgent message: "Two-minute warning in the house.

Police and maintenance men lounging nearby stiffened, and none too soon. Precisely 120 seconds later, as the gate opened the stampede began -thousands of teen-agers, some in T-shirts, some shirtless, girls with braces on their teeth, a boy with a broken arm, couples carrying blankets and sleeping bags, all running flat out for a place close to the stage at the Great Allentown Fair, where Kansas, a rock group, was to play more than three hours later. At \$6 and \$7 a head, it was a gold

rush America's state and county fairs have become far more than jelly apples, cotton candy, prize sheep, cake decorating and cow judging. They are startlingly bit business.

Top attractions like The Osmonds, Sonny and Cher, Johnny Cash and the Beach Boys can make as much as \$175,000 for a night's work. Midways with more than 175 booths and rides come in triplicate so that a single firm can serve three different fairs at once. Major companies, including Ford, General Motors, Sears Roebuck, Coca-Cola and Pepsi Cola have become exhibitors to deliver their messages to the grass roots.

Image-makers now frown on the word carnival; it's goodbye hoochikootchie, hello corporate life.

"The character of the fair business had changed," says Charles R. Byrnes, general manager of the International Assn. of Fairs and Exposi-

than ever before. They are luring people from cities as well as the rural areas. Attendance is now 50-50 between city folk and country fork. They have the top attractions from show business."

In his office alongside the grandstand, Martin H. Ritter, general manager of the Great Allentown Fair, stops to reflect. He is a dapper figure in a seersucker suit, blue tie with

stickpin, white shoes and white socks. "Fairs are a great big business," he says. "We pump in close to \$100,000 alone for advertising and promotion." An aide added, "Crowds are changing. We are appealing to younger audiences. Kids have money these days.

WOMEN'S NEWS

GENERAL NEWS

Historians say that fairs originated in connection with gatherings of merchants at ancient religious festivals in Syria and Palestine. The Book of Esther in the Bible tells of a 180-day fair held by Xerxes, king of Persia in the 5th century B.C. The king's motive, which still underlines many modern exhibitions was to "display the riches of his kingdom.

In ancient Rome, merchants at fairs combined business with more "Fairs have more lures nowadays than a little pleasure. Their revelries were the roots of today's carnivals and amusement parks.

Perhaps the earliest fair in the United States took place in 1765-11 years before the Declaration of Independence. Thomas Penn signed the charter of that York, Pa., Interstate Fair. He was the son of William Penn, founder of Pennsylvania

Judy Boyum's True Story: My husband never said, "You look fat." But he

must have thought it. Three years ago, my weight had reached 130, and on my 5'3" build that was just too much, since most of the pounds seemed to be between my waist and my knees. It wasn't as if I

hadn't ever dieted or ex- See where my weight problem was twenty pounds ago. ercised. I'd been going to a spa for a long time ... and yet, the big change I wanted hadn't happened.

Then a friend began going to Pat Walkers. She told me about her treatments on the passive exercise unit, and how she didn't have to undress or muss her hair. When she started losing weight, I decided to give Pat Walker's a try.

I became a believer so fast. Within a month I'd lost eight pounds! Suddenly I had such energy, and I was feeling much happier with myself.

Over the next several months I went from a size 12 to a size 5. That summer, for the first time in my life, I wore a bikini.

I've been able to maintain my figure from that day two years ago to this. Now, as manager and buyer for a gift shop in Houston, I have the confidence I need to do my job well.

My husband thinks I look super. And you know what? No matter what your age, if you're as heavy as I once was, I'll bet your husband would like to see you happier, too. Maybe he'd give you a Pat Walker's program for Easter!

Go ahead. Call for your free figure analysis and sample treatment, and tell your husband all about it. This Fall could be as special for you as it will be for me-you may be starting a new way of life.

Food specialist answers honestly

By ELLEN M. PORATH **Associated Press Writer**

PAGE 2B

MADISON, Wis/ (AP) Whether it is safe to eat a recently deceased lobster or lasagna that has matured five hours in the trunk of a car falls within the expertise of Charlotte Dunn.

Miss Dunn, who announces cheerfully she is "55 and over the hill," is a food nutrition specialist with the University of Wisconsin Extension

She works from an office crammed with canning lids, notebooks and piles of the 43 food information pamphlets she has written for the Extension. She says she gets about 30 calls a day from people who have questions on nutrition and food.

Miss Dunn, settling back casually with her right foot propped on the chair seat, recalls some of the questions.

"There's this one: 'Grandma died and we're cleaning out her basement. We've found food from umpteen years back and we can use it, can't we?"

She grimaces. "I tell them, umpteen years you've lived without it and I want you to go on living."

She admits her telephone manner is occasionally abrasive. "I get a little impatient," she

says. "I always say if anyone talked to me like I talk to some of them, I'd hang up on me. But you're taking such a chance. You have a product that could mean death and you're being sloppy with it.

Miss Dunn says she thinks many callers' problems arise from carelessness or inexperience, and "they want you to tell them it's all right.

Often it isn't all right - as in the case of a woman who wanted to be reassured that a lasagna casserole left in her car trunk five hours was still edible. It. wasn't.

MDERIA

ANSWER WOMAN **Charlotte Dunn**

Miss Dunn, who has held her position since 1956, fires off answers like a drill sergeant surveying the troops. She seldom has to consult books for answers.

Many callers want to know if they can freeze a certain food. In most cases they can, although Miss Dunn advises them to freeze a small amount first to see if they like the quality of the thawed food.

"I tell them you can always freeze your husband, too, but the quality may not be there when you thaw him out," she says in her Oklahoma twang.

Occasionally she gets calls at home. She answers all questions, including one about a deceased lobster

"We had two live lobsters in an ice chest. One passed away during the night. Is it okay to eat it?"' she reads.

"Oh no," she says with a shake of her head. "We don't know what time he died.

three years. She was For the past two years. You'd be surprised how married and had two I've been trying to find a many lonely women in children, but because she lady to go steady with, their 60s would buy the fell in love with our son, but I've given up. I can't deal you propose.

(Fri., Aug. 26)

GENERAL TENDENCIES: Avoid making drastic changes or doing dramatic things which are in your mind. Go along with other persons as well as you can, giving them the benefit of any doubts. Do whatever you have to do in proven ways ARIES (Mar. 21 to Apr. 19) Be careful in dealing with friends to-

day who are apt to be out of sorts as arguments could follow. Don't e forceful where some personal aim is concerned. TAURUS (Apr. 20 to May 20) Taking no risks with your worldly status is wise. Do not jeopardize credit in any way. Be more

diplomatic in business. Take time for some charitable work. GEMINI (May 21 to June 21) You want to make radical changes but it is best not to do so. Your intuition is not accurate during day

but rely on it implicitly by night. MOON CHILDREN (June 22 to July 21) Be conventional in the of obligations. You

like the contents of the Louvre. My husband compares it to the new baby anxiety complex where you get up five times a night to see if it is still where you left it.

At least three times a day. I check the bike to see if anyone has been tampering with the tires, stolen the light, lifted the gears or swapped the book rack or the basket.

If there is no moon. I bring it into the house and park it by the dining room table.

If it sleeps out in the garage, it is secured by three chains and two locks

The other night as I was oiling the bicycle locks and testing them, my husband said, "Look, we've all been pretty busy and under a strain lately. Why don't we grab a weekend and go camping

"Maybe the Walthers could keep an eye on things." he offered.

"Hah! They don't even bring their bicycles in when it rains. Not on your sweet tintype.

"You can't go through life mothering a bicycle," said my husband patiently. "These things happen. You are beginning to regard that bike as something human!"

"Don't be ridiculous," I said. "To me a bicycle is just a couple of tires held together by bolts and nuts, rust and chrome.

'That's better," he said. "Let's go in the house and plan our trip."

As I heard my son drive the bike into the garage. I ran to the door and yelled out hysterically, "DON'T FORGET TO LOCK YOUR BROTHER

"DON'T

For months, I thought that Della's first name was Mant. "Mant Della" was what I heard her called.

Mant Della, I was told, was the best cook in the Ozarks.

"People come from miles around to order one of Mant Della's angel cakes," was the report. "No one else can make an angel cake so light and high

When I finally met her, the introduction was, "This is Della. She's mant. She's married to muncle." So then I knew. That's the way the words 'my aunt'' and ''my uncle'' came out in Ozarkianese.

When I told Della that I had heard, over and over, about her wonderful angel cakes, her answer puzzled me.

"I'll bake you an angel cake the first breezy day," she said. Breezy? I wondered, why breezy? Because otherwise the kitchen, with its oldfashioned wood-burning stove, would be too hot? It was a good guess, but not the right one.

On the first breezy day, true to her promise, Della separated 12 eggs and placed the whites in a very large, shallow ironstone platter. She carried the platter and a wire whisk up the hillside back of her home and, facing

into the wind, began to beat the egg whites.

There was her secret to success in baking angel cakes; 12 egg whites, beaten into the wind to incorporate. air, for a full 30 minutes.

That was the "olden days" way. We, of weak wrists and little patience have reached happily for boxed cake mixes for years. We have been completely conditioned to believe thatnever would we go back to the olden days way of baking.

But we dropped something when we reached for those boxes. We dropped flavor, nutrition and purity. I realized that when my son said, recently, "Whatever happened to Bostoncream pie? You made it a lot when I was little, and I loved it."

I remembered that it was a split cake layer, filled with custard and topped with a thin chocolate frosting. So on the next trip to the market I reached for a box of cake mix, a box of pudding mix and a can of frosting.

"This is Boston cream pie?" asked my son. It didn't look like one. The cake was crumbly

The frosting didn't run down the sides of the cake in little rivulets. It didn't smell or taste like one. The pudding filling was violently vanilla; the frosting only approximated chocolate. I examined the containers.

Without exception the listed ingredients included artificial flavoring, artificial coloring.

Even when I took the cake out to the garden for the birds, I thought I should offer it with apologies. So I decided I would dip back into

recipe files kept for two generations, and share some real cake recipes. This is the one I should have prepared:

BOSTON CREAM PIE 2 cups sifted all-purpose flour One and one-half cups sugar Two and one-half tsps. baking powder 1 tsp. salt One-third cup soft shortening Two-thirds cup milk 1 tsp. vanilla One-third cup milk

1 egg

Sift together flour, sugar, baking powder and salt. Add shortening, the two-thirds cup of milk and vanilla. Beat for two minutes. Add egg and the one-third cup of milk and beat another two minutes. Pour batter into greased and floured nine-inch pan and bake at 350 degrees for 30 minutes. Cool on a wire rack. When cool, split cake into two thin layers.

CREAM FILLING

One-fourth cup sugar 1 tbsp. cornstarch

saucepan and stir in milk. Bring to a boil over medium heat, stirring constantly. Boil for one minute, Remove from heat and stir at least half of the hot mixture into the egg yolk. Blend this into the remaining mixture. Boil one minute more; remove from heat, add butter and vanilla. When cool, smooth on one cake layer and top with the other. Ice with thin chocolate frosting. THIN CHOCOLATE FROSTING

I square unsweetened chocolate 1 tsp. butter 1 cup sifted powdered sugar

2 tbsps. boiling water Melt chocolate and butter over hot

water. Remove from heat and blend in sugar and water. Beat only until smooth but not stiff. Pour over cooled and filled cake, allowing frosting to run in irregular rivulets down the sides of the cake.

Believe me, it's worth the effort. The house will not smell of phony chemical substitutes; the taste buds won't recoil from phony flavorings; there will be no apologies, and no crumbs left for the birds.

Beat egg whites Two and one-half tsps. other situations where until stiff but not dry. the special qualities of Carefully fold into batter. the egg are useful. Bake in a hot waffle iron. WAFFLES Makes eight waffles. 2 cups flour Calories per waffle: 230.

One-fourth tsp. salt 1 cup milk 1 egg yolk, beaten slightly 1 tbsp. butter 1 tsp. vanilla

Mix sugar, cornstarch and salt in

pancakes that would be you want to roll up the is tall and slender, needs strawberries and other saturated oil to watch the cholesterol berries are all good. If but not the calories. Answer: Make pan pancakes without the cakes from old-fashioned sugar, you can use them pancake mix. You may to roll around creamed new liquid egg substitutes asparagus or tuna. fat. To make your own: PANCAKES 2 cups flour

baking powder One and one-half tbsps. sugar One and one-half cups

skim milk 2 tbsps saturated oil Sift flour, measure,

then sift again with baking powder and sugar into a bowl. Combine the milk and oil; add to dry ingredients, stirring only enough to moisten.

Bake on a hot griddle lightly greased with polyunsaturated oil, turn to brown both sides. Makes 12 pancakes. Calories per pancake:

Variations: Beat two egg whites until stiff but not dry and fold into the batter or add one-fourth cup liquid egg substitute. Because the basic recipe for pancakes is made without eggs, the batter tends to be slightly dense. You might like to try flavoring these "tortillas" this way.

Bake thin pancakes and spread each one with one tablespoon jam, roll up, and place side by side in a flame-proof dish. Shake a little powdered sugar over pancakes. Broil for two minutes, then pour two tablespoons of warm brandy over pancakes and light. When the blue flames die, serve one or two pancakes.

BLUEBERRY PAN-CAKES

Prepare the recipe above for plain pancakes; fold one-half cup well-drained canned unsweetened blueberries into the batter. Save the juice. Bake pancakes on a hot griddle. To make a syrup, stir one teaspoon cornstarch into one-half cup unsweetened blueberry juice; cook and stir until slightly thickened. Remove from heat and add one-fourth cup sugar. Makes 12 pancakes. Calories per pancake: 120.

Sausage-maker follows style of his old country

The Los Angeles Times

PAGE 4B

SAN FRANCISCO - Every morning Fred Casissa dons a white jacket and hobbles down into the concrete basement of his little sausage factory in North Beach, just as he has done for 28 years, to check the temperature and humidity.

If it is too warm the little old man with the thick Italian accent opens the windows to let the cool breezes in; if it is too cold he shuts them out. When the air is too humid he spreads some sawdust on the floor

Temperature and humidity are crucial to Casissa, for hanging from the steel hooks in the basement of his Buon Gusto Italian Dry Salame pounds of prepared sausage, covered with white mold, which must have just the right conditions to cure properly. It takes up to 45 days to fully cure the salame

only manufacturer of Italian Dry Salame in the Bay Area who still way his father did in the Old Country. (Although it can be spelled either salame or salami, the spelling more commonly used by sausage-makers in San Francisco's Italian community

with year-round mild temperatures. San Francisco and surrounding communities are the only areas in the United States where Italian Dry Salame can be manufactured without the aid of air conditioning and other artificial environmental controls.

In recent years this cured meat product, once used to feed roman armies, has become a tangy addition to the American diet as some of Casissa's more ambitious competitors have turned to aggressive advertising and marketing campaigns backed up by air conditioned factories, refrigerated trucks and jetfreighters to expand their market beyond /the friendly little Italian. delicatessens of San Francisco's traditionally Italian North Beach area

Casissa and his seven employes ("This is my newest," he says beaming as he introduces a woman packer. "She's only been with us 11 none is sold in the San Francisco area.

The biggest of the salame makers here is talkative Ernie Gabiati who other Italian sausage products, each week in his highly mechanized factory. Gabiati markets his Gallo can more than double production.

flavor, concentrated flavor.

Curing fatty meats is an ancient art, mentioned in literature as far back as Homer's Odyssey. Most of the San Francisco salame makers learned the trade from their fathers,

who in turn learned it from their fathers in Italy.

Salame makers mix finely ground lean beef and fatty pork with pepper. garlic, sometimes wine and more recently nonfat dry milk and preservatives.

This uncooked mixture is then stuffed/into cellulose casings up to four feet long. Usually the casings are cut into short sections, called chubs, and tied off with a metal twist at each end.

The chubs are hung in a "green room" with high humidity while the penicillium-type mold begins to form on the casing. After four days they are moved to the curing rooms.

Salame makers insist that the mold

use fans to circulate the fungus

production in the new plant began.

dustry said the curing process actually results from the growth of bacteria inside the chub which turn fat to lactic acid

"it's the acid which is the preserving agent in the meat." said Dr. George York, a University of California at Davis food microbiologist who has worked extensively with the Italian Dry Salame makers.

York said he is not convinced the outer mold is needed to cure the salame and is experimenting in his Davis laboratory to see if Italian Dry Salame can be cured without the mold. He said his work with Italian Dry Salame also indicates the mold does not draw water from the chub.

rooms.

bacteria created gas which made them burst open," York said.

two firms because of what Asst. Dist. Atty. Gordon Bowley of the prosecutor's consumer fraud unit called | a "consistent pattern" of shortweighting by the two companies.

Under a permanent injunction issued by the court the two firms must overpack their salames sufficiently to allow for weight loss during the time they hang from grocer's shelves or must sell the product in vacuumsealed containers to prevent any weight loss after shipping.

They must also keep more accurate and detailed records of product weight samplings taken in the factories before shipment.

There are two basic kinds of Italian Dry Salame.

One is Milanese, the finely ground product sold in supermarkets.

The other is called Toscana. It has much larger pieces of meat and fat and a somewhat sweeter flavor. Usually it is available only in Italian delicatessens.

Each of the salame makers here is careful not to criticize his competitors' product, trying not to revive bitter disputes of years gone by:

Peter Giorgi, president of P'G. Molinari and Sons Salame, will say only after some gentle prodding that "each of us spices his salame differently.

rkets.

WASHINGTON (AP) - One day last week, a Border Patrol agent in Laredo, Tex., was hailed by four Mexicans.

Stopping his car, the agent was told the four wanted to turn themselves in, claim their amnesty and get work permits. Instead, they became U.S. government statistics.

They are among 50,705 illegal aliens reported rounded up and deported along the Mexican border since President Carter announced his amnesty plan on Aug. 4.

Officials said Wednesday a survey of Border Patrol stations along the Mexican border found that the number of aliens captured and deported for the first three weeks of this month is 51 per cent higher than last year's figure of 33,495.

Government experts admit. they have no way of knowing exactly how many aliens entering the country escaped capture during the same period. The Border Patrol usually estimates that two-thirds of the alien who cross the border get away.

That would mean that 100,000 aliens have sneaked into the country from Mexico without being caught since the amensty proposals

The agents who run the stations

Dallas teenager tells friend's death plot

along the Mexican border say interviews with the captured aliens indicate that the amensty proposals, as well as worsening Mexican economic problems, are the reasons for the increased flow of

But aliens who enter the country now are misinformed if they think that Carter's proposals will help them. First, they must be approved by Congress to become law

Carter's plan would only apply to aliens who arrived before 1977. Aliens who could prove they arrived before 1970 would be eligible for permanent resident status under the Carter plan. Aliens who came between 1970 and 1977 would be eligible for a five-year temporary resident status.

But apparently, many Mexicans, like the four arrested in Laredo, do not understand thedetails of the proposal. "A lot of the ones we've caught mention the amnesty when we ask them why they came," said chief agent Roger Stout of Laredo.

Stout and his colleagues point out that the flow of illegal aliens was increasing by about 20 per cent each year before Carter made his suggestion for amnesty. Two new factors have exacerbated the economic woes that drive poor Mexicans across the border in search of work, they say

RUSK, Tex (AP) - Some patients are held in solitary confinement without doctor's orders for up to 18 days at the Rusk State Hospital, according to a former nurse who claims she was fired after trying to report incidents of patient abuse.

Mary Cooke, who was fired in June). also said this week that patients at the East Texas facility are organized into 'goon squads'' to discipline fellow patients.

Mrs. Cooke's husband, Dr. Edwin T. Cooke, was also fired. Another physician, James O'Hara, was also dismissed. He claims it was because he was friendly with the Cookes. The trio's allegations include tales

of abuses at the facility including

mishandled drugs, villegal confinement of patients, understaffing and "dehumanizing" procedures.

THE MIDLAND REPORTER-TELEGRAM, THURS., AUGUST 25, 1977

Dr. Robert Shelton, superintendent at the hospital denied the allegations in a Tuesday news conference. He also said a Department of Mental Health and Mental Retardation lawyer in Austin advised him not to state why Mrs. Cooke had been fired. Hearings set for this week for the

three former employes have been rescheduled for next month at the request of the trio's attorney Mrs. Cooke said the "goon squads"

or "bully boys," as they are known at the facility, are encouraged to discipline fellow patients.

Dr. Cooke said, "It's simple, the

staff knows that they cannot strike a patient, but it causes no problems if another patient does

Dr. O'Hara said since he arrived at the hospital in October 1975 14 doctors have left --- including seven psychiatrists. He said they were 'pushed out'' or "just got fed up" with conditions at the 950 patient hospital

Mrs. Cooke told of a patient who had voluntarily committed himself but was unable to leave when he wanted. She said the patient wrote a letter requesting discharge but it was destroyed by staff persons.

"When a person admits himself or herself, anytime after 10 days, that person can request to be discharged

and the hospital is legally required to honor the request unless the person is a danger to himself or others and then the doctors at the hospital have to begin commitment proceedings." the nurse said.

Dr. Cooke said conditions at the hospital were "shocking.

"I just didn't believe conditions such as this could exist in the 20th century," Dr. Cooke said.

At his press conference, Dr. Shelton said proper investigations had been conducted when abuses were reported and employes have been discharged.

The superintendent also gave specific denials to allegations concerning lack of doctors at the hospital and missing or mishandled narcotics.

Company claims Ashley's threats factor in firing

SAN ANTONIO, Tex. (AP) - A key factor in the decision to fire former Southwestern Bell Telephone Co. executive James Ashley was his threats to sue the firm and damage its reputation, according to the testimony of a top Bell official.

Louis Bailey, Southwestern Bell's vice president for operations, said Wednesday that reports compiled by Bell security agents concerning Ashley were also considered in making the decision.

Bailey's testimony was a part of the firm's defense in a \$29 million damage suit filed by Ashley and the family of T.O. Gravitt, who headed Bell's Texas operations when he comitted suicide on Oct. 17, 1974.

State District Court Judge Peter Michael Curry refused to allow Bell attorneys to place into evidence the thick, bound volumes containing the reports of the Bell security agents. Curry, however, reserved the right to change his decision later.

Bailey also testified that Gravitt was not a target in the controversial 1974 internal investigation by the company

Bailey, who is assigned to Bell's St. Louis office, was Gravitt's immediate boss. He said Gravitt was informed of the probe on Oct. 9, 1974, the same day Bell executive James Ashley was suspended in San

The suit alleges Gravitt was hounded to his death and Ashley wrongfully fired as a result of the in-

Bailey said the investigation "had to do with sexual irregularities going on in the San Antonio area." He said the reports were "pretty much rumor'' initially.

But, when the rumors persisted, he discussed the matter with other Bell corporate officials.

As a result, he said, an investigator was sent to San Antonio although Bailey said the investigator was advised to be extremely "careful, quiet and discrete" because of the "delicate nature" of the

PAGE 5B

band, Harry, 36, had been then "dump their bodies tion. He said he had no investigation shot like dogs.

Lucinda's girlfriend, Ona Villasana, testified decided to "tell the truth"

San Jacinto Sweet Potato Gasserôle

- 3 cups (1 pound, 14 ounce can) sweet potatoes, drained and mashed

1 THE MIDLAND REPORTER TELEGRAM. THURS. AUGUST 25, 1977 PAGE 6B Ex-wife surprised, dismayed at Mandel conviction

The Washington Post

BALTIMORE - Barbara Mandel was composed. She sat in a small chair in the powder blue living room of her Baltimore apartment, adjusting her gold earings and smoothing the skirt of her aqua dress. She was about to be interviewed for television. Four hours earlier, her exhusband, the governor of Maryland, had been found guilty of political corruption. "I'm very distressed. I never

there would be, a guilty thought verdict. "Never." she said. "I didn't think they had enough evidence. I thought the case was very weak.

'I know Marvin Mandel ... I've never known him to be dishonest. she said of the man who left her after 32 years of marriage for what he then described as "the woman I love." It was the circumstances of their

1974 divorce, the \$309,000 worth of money bonds and insurance for Mrs. Mandel, that played a key role in the

prosecution of the governor. "I don't think (the divorce) had anything to do with it," Mrs. Mandel, said of the troubles Mandel found himself involved in.

The bonds, she said, were offered by Mandel's co-defendant and close friend Irvin Kovens because "he wanted to make sdre I was taken care And as to the diamond bracelet, the

bracelet the prosecution said was part of a payoff to the governor, "it was a

bet." Mrs. Mandel insisted, the prize in a bet she had won.

It was a bet, she said, 'because Barbara Mandel can't be bough

She doesn't say these things, she doesn't insist on her ex-husabnd's innocence because she still loves him. Mrs. Mandel said. She says them because she has known Mandel since he was 15-years-old and "I only know Marvin Mandel to be an honest man.

"I could speak about the boy, I

could speak about the man, I could to a shoemaker told her statesman as I called him." she said. "We went up the ladder together"

through the long years of Maryland politics, she said.

"A lot of these things happen in government and I think in many ways they are misconstrued." she said. Her reputation is that she is a shrewd observer of Maryland politics.

During the lengthy trial. Mrs. Mandel said people from her banker

speak about the politician - or ported the governor. And she told him herself, "You're going to be alright" and sent messages to him during the trial "wishing him well.

THE MIDLAND REPORTER TELEGRAM, THURS., AUGUST 25, 197

The Los Angeles Times

WASHINGTON — The federal government, while endorsing affirmative action as a means of correcting effects of race bias, is expected to stop short of totally supporting the University of California in a key Supreme Court reverse discrimination case.

In a friend-of-the-court brief expected to be filed in the Bakke case, the Justice Department will seek to avoid an "on-the-one-hand, on-theother-hand" stance that would "muddy the waters," Drew S. Days III, assistant attorney general for civil rights, said. Days' and other department officials, in interviews, insisted no final decision has been made to file the brief with the high court. But Atty. Gen. Griffin B. Bell said Aug. 8 that it would be filed.

The Bakke case raises sweeping questions involving employment and education far beyond the matter of rejecting a white applicant at the UC-Davis medical school under a quota system favoring "disadvantaged students."

"We can come down in favor of affirmative action without agreeing with the method adopted by the university," said one official familian with the latest draft of the government's position prepared by the department's civil rights division. The draft is now being worked on in the office of Solicitor Gen. Wade H. McCree, the official responsible for presenting the government's position to the Supreme Court.

The case began when Alan Bakke was rejected for admission to the medical school in 1973 and 1974. In both years, the school reserved about 16 per cent of its entering classes for disadvantaged students.

That category included blacks. Hispanic and Asian Americans, but

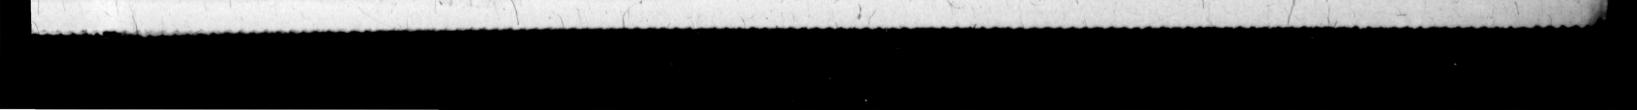

no whites. Bakke had a 3.51 gradepoint average and scored in the 90s on medical school aptitude tests. Some of the disadvantaged students had grade point averages below 2.5, and had a mean percentage on the aptitude tests below 50.

Bakke, after his second rejection, sued, contending that he and other whites were being denied equal protection of the laws guaranteed by the 14th Amendment.

The California Supreme Court ruled 6-1 in Bakke's favor on Sept. 16, 1976, and the university appealed to the U. S. Supreme Court.

PAGE 8B THE MIDLAND REPORTER TELEGRAM, THURS., AUGUST 25, 1977 DIA reports China not a threat to U.S. militarily

By GEORGE C. WILSON The Washington Post

WASHINGTON - China has hoped for a gradual modernization of its military forces that does not pose any immediate threat to the United States, according to U.S. intelligence estimates just made public.

In contrast to dire warnings from the Pentagon in past year, the Defense Intelligence Agency said no committee on June 30. Subcommittee missile in the Chinese inventory can hit the United States.

Also, said the DIA, the improved the DIA testimony on Monday tong range missile that China has under development "will not be operational before the next decade."

Lt. Gen. Samuel V. Wilson, director of the DIA; gave that report to a Joint Congressional Economic sub-

Chairman William Proxmire (D-Wisc.) released a censored version of "China's nuclear delivery capability remains with a small force of bombers and missiles" oriented primarily "to the periphery of China," DIA said. The 'limited range' in-

tercontinental ballistic missile China

has built could hit "parts of" the than an all-out nuclear war, the DIA's Soviet Union, the Marianas/Australia estimates were similarly calm/ "The "but not the United States," said the intelligence agency.

China's main bomber for carrying nuclear bombs, DIA continued is the old Soviet TU-16, with no modern replacement in sight. Only "modest quantitative improvements" were predicted for China's air forces. As for Chinese forces to fight less

ground force continues to emphasize qualitative improvements with only slight increases in the number of combat divisions by 1980." the agency said.

China's naty remains far outclassed by those of the United States and Soviet Union, DIA said, and will not be able to put up a good fight

against either of them (within the next decade.

Francis J. Bomance, DIA's China specialist, said "it may be a paradox" that China has more naval shipyards than it is using but their idleness may stem from a shortage of high quality, steel

WASHINGTON - The government is quietly closing down Project Haven, its embattled multimilliondollar enforcement effort against tax cheaters who use secret Caribbean bank accounts

Once a much-heralded campaign to prosecute well-to-do tax evaders. Problow last April by a federal judge who ruled that the IRS illegally obtained evidence from the pilfered briefcase of a Bahamian banker.

Confidential Internal Revenue Service documents obtained by The Los Angeles Times showed that "all open Haven cases in Group 902, with the exception of those previously submitted

ject Haven was dealt a near-fatal for prosecution, are to be withdrawn from. Sources said the directive means

that IRS special agents will abandon work on dozens of pending cases where no indictments have yet been obtained

Group 902 is the ARS command group, based in Miami, which has worked with Justice Department prosecutors and a special federal grand

jury over the last two years. A series of 12 indictments were returned against taxpayers across the country. The chief obstacle in the Haven project, which has been stalled for months, was U.S. Dist. Court Judge John M. Manos' decision that tax fraud evidence against Cleveland businessman Jack Payner was Vimproperly obtained from a locked briefcase by an IRS informant. Manos rul-

ed that this evidence was tainted and could not be used for prosecution. Dozens of other cases are believed

to be in the same category After discussing IRS agents' withdrawal from Project Haven cases, the minutes of Group 902's meeting of July 22 in Miami said :

"M. Carr Ferguson, assistant attorney general (for the tax division), will provide a letter to IRS specifying

'taint' as a basis for withdrawing. Agents should begin putting together their withdrawal reports pending the receipt of this letter.

PAGE 9B

The minutes further said that "with the approval of Department of Justice, these cases should be closed to Intelligence (the IRS intelligence division) by the end of August.'

boom likely

No baby

By ROBERT C. TOTH The Los Angeles Times

WASHINGTON - A blackout baby boom in New York City next April 6, nine months after July's big power failure there, is not expected because the first blackout baby boom never was.

If anything, fewer babies were born in the period nine months after the first blackout on Nov. 10, 1965, than in the same period a year earlier, a researcher says.

"Laymen still believe in the blackout baby boom, by and large," according to Prof. Richard Udry of the University of North Carolina, who did the debunking research.

"One obstetrician has tried to maintain, in a medical journal that the boom really did happen - and he should really know better. But then he also tried to prove a baby boom nine months after Pearl Harbor (Dec. 7, 1941)," said Udry in a telephone interview Tuesday.

"Two fundamental mistakes were made" in finding that there was a blackout boom, he added. "First, it was assumed that when lights go out, people copulate, and without contraceptives.

"It's like the World War II story about Mussolini who, faced by declining birth rates in southern Italian villages that had recently been electrified, ordered the power turned off at nine each night.

The second mistaken assumption. Udry said. "was that all babies conceived on the same day must be born on the same day nine months later. The average gestation period is 267 days from conception, or 280 days from the last menstrual period, but actual births can normally be spread over a six-week period around the due date, with half of them within a three-week period Several New York City hospitals did experience a large bulge in births nine months after the first blackout. This gave rise to newspaper stories blaming it all on boredom during the dark night.

But Udry, _ analyzing city-wide data four years later, found births from late July to mid-August, 1966, were no higher than during the same period for each of the previous five years. In fact, the 1966 crop averaged a bit lower than those of the same period in 1965 (434.5) vs. 457.7 births per day, respectively), he wrote in the journal "Demography.

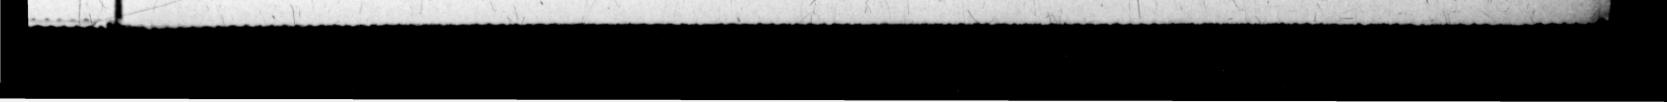

Meanwhile, unaware that it was following a false lead, Chicago predicted that it would have a snow baby boom in 1968 after the great snow fall of 1967. But that didn't happen either, Udry said.

"There is, of course, an underlying grain of truth in all this." he said in the interview. "There are natural, seasonal birth patterns, as in fishing villages in Norway where the men are away long periods at sea and all return about the same time.

There are also unnatural baby booms. In Japan, for example, births that occur near the end of a year may be registered in the next one that year is more favored by religious belief, and vice versa, according to Udry.

In Britain, there is always a baby boom toward the end of March when births are induced to allow parents to claim the tax deduction within the fiscal year ending March-31.

Basin sector wildcats, pool activity reported

Exploration has been scheduled for Nolan, Schleicher Coke and Runnels sectors, and a stepout site has been staked in a King County field.

Campana Petroleum Co., operating from Midland, filed application to drill No. 1 Walker, a 7,000-foot venture in Nolan, 34 mile southwest of Canyon reef production in the EVB, Southwest field.

Driilsite is 660 feet from south and west lines of section 56, block X, T&P survey, four miles northwest of Nolan townsite

SCHLEICHER VENTURE

Claud B. Hamill, Houston, staked site for a 7,000-foot Schleicher County explorer. It is No. 1 M. L. Mertz, et al. Drillsite, 3/4 mile northeast of the W.J.B. gas field, is 2,055 feet from north and 660 feet from west lines of section 7, block A, HE&WT survey. seven miles southeast of Eldorado. It also is 11/4 mile northwest of the Venado (Wolfcamp) gas field but separated by a failure.

RUNNELS SEARCHER

Walsh & Trant, Tyler, No. 1 G. M. Wood has been planned as a wildcat in Runnels, four miles southeast of Hatchel.

Location is 660 feet from south and 8,424 feet from east lines of Domingo Diaz survey 532. It has a projected depth of 4,100 feet.

KING STEPOUT

Taubert, Steed, Gunn & Medders, Wichita Falls, has slated its No. 4-GG S. B. Burnett Estate as a ^{1/2}-mile southwest stepout to the two-well Strawn) oil area of the Big "S" field of Southeast King County

It has a projected depth of 5,300 feet, and spots 940 feet from north and 333 feet from west lines of section 15. block X, R. M. Thomson survey, 17 miles southeast of Guthrie.

COKE PROSPECTOR

James L. Moore, Midland, No. 1 King has been scheduled as a 4,300foot wildcat in Coke, four miles west of Blackwell

oil pool and 3/8 mile east and slightly south of a 7,061-foot failure.

Mann Rankin, Midland, has scheduled No. 2 Arledge, a north stepout to the three-well Odom lime oil sector of the Arledge multipay pool of Coke.

It spots 1,787 feet from south and 467 feet from west lines of section 261. block 1-A, H&TC survey. Planned depth is 6,700 feet.

RUNNELS PROJECT

Walsh & Trant, Abilene, No. 2 Cora Byers has been staked as a south offset to the firm's No. 1 Cora Byers, Gardner oil reopener in the Byers pool of Runnels

The test, slated to 4,000 feet, spots 1,514 feet from north and 2,253 feet from east lines of J. K. Thompson survey 156, four miles northeast of Ballinger. Ground elevation is 1,772 feet.

No. 1 Byers finaled July 18 for 55 barmels of 43-gravity oil per day, producing through a 14-64-inch choke and perforations at 3,820-3,827 feet.

FISHER EXTENDER

Alpha Petroleum Corp. has taken over and completed the former Amerada Petroleum No. 2 Toler, a 1,500-foot south extension and fifth producer in the Keeler-Wimberly (Canyon sand) field of Fisher. The 24-hour potential was for 59

barrels of 45-gravity oil and 39 barrels of water, producing through pemforations at 4,482-4,532 feet. The new well is 2,173 feet from south

and 467 feet from east lines of section 188, block 1, BBB&C survey.

EDWARDS SSER

The Edwards field gained a 1%mile south extision to Canyon production in edwards County with completion of Amoco Production Co. No. 6 H&C Peterson.

The calculated, absolute open flow potential was for 560,000 cubic feet of gas per day, producing through perforations at 2,355-3,688 feet.

Drillsite is 1,980 feet from south and It is 1,160 feet from south and 1,620 west lines of section 270, block 1-A, feet from west lines of A. J. Nevill H&TC survey, 1% miles northwest of survey 41/2, abstract 2648, 10 miles Blackwell north of Rocksprin

Two areas draw tests.

Exploration activity has been slated for Winkler and Ward counties.

Brock-Highland Equity. Midland, No. 1 Kermit townsite is slated as a 12,500-foot wildcat in Winkler, 1/2 mile south of Kermit.

Drillsite, in the Kermit field area, is 1,980 feet from south and 1,830 feet from west lines of section 4, block B-5, PSL survey.

Gulf Oil Corp. filed application to drill No. 5 T. B. Pruett Gas Unit, et al, an 11,800-foot undesignated test, as a southeast twin to a Fusselman confirmation test in the Soda Lake pool of Ward.

It spots 1,000 feet from northeast and 1,400 feet from southeast lines of section 24, block 1, W&NW survey, 10 miles northwest of Barstow

Meet slated on taxation

A two-day insitute on Basic Oil & Gas Taxation will be sponsored by the American Association of Petroleum Landmen Sept. 22-23.

The institute will be held at the Airport Marina Hotel at Dallas-Fort Worth Regional Airport.

The meeting will covery the basic concepts of oil and gas taxation, including depletion, sale or sublease, tax free receipt of interest under the 'pool of capital'' concept deductions of intangible drilling and development cost, associations taxable as corporations and how to avoid, use of "tax partnerships" to avoid capitalization of drilling costs; use of formal partnerships, farmouts, production payments, at risk limitations and secondary recovery and unitization.

University of Oklahoma, Nor-

Energy, Canal subjects for governors' meeting

By GARTH JONES

The Midland Reporter-Telegram

THURSDAY, AUGUST 25, 1977

AUSTIN, Tex. (AP) - Control of the Panama Canal will be one of the subjects up for discussion at the Southern Governors' Conference meeting Aug. 27-31 in San Antonio. Other resolutions at the 43rd annual

meeting concern mostly the energy and economic needs of the 19 Southern states and territories.

Seven policy statements and resolutions to be considered by the governors have been prefiled with the Southern Governors' Conference.

Conference action on the resolutions will come when the resolutions committee reports Tuesday, Aug. 30. The proposed resolution on the

Panama Canal was offered by Louisiana Gov. Edwin W. Edwards, said the proximity of the canal to the Southern states "makes its continued control and operation under the terms of the existing treaty imperative."

It calls on U.S. Senators representing the Southern states "to oppose vigorously any treaty which would alter, remove or reduce the existing control over and operation of the Panama Canal and the Panama Canal Zone as presently and historically exercised by the United States of America.

The conference also will be offered a lengthy policy statement on energy that was prefiled by Oklahoma Gov. David L. Boren, chairman of the conference energy committee.

A similar stand on deregulation of natural gas was adopted recently at a meeting of Midwestern governors. Texas Gov. Dolph Briscoe, Southern Governors' Conference chairman,

Judge nixes gas petition

EL PASO, Tex. (AP) - Plans by Lo-Vaca Gathering Co. to cut off its gas supply to Crystal City have

said at the time that he hoped the Southern governors would follow with a stand on "phased" deregulation.

ENERGY

OIL & GAS

STOCKS/COMICS/ENTERTAINMENT

The policy statement sent to Southern governors for preconference study includes the specific recommendation that "federal legislation should be enacted which would remove wellhead price controls on new natural gas. The legislation should also contain provisions designed to limit or eliminate windfall profits. The deregulation should be phased into effect to mitigate its impact on consumers."

The policy statment on energy also calls for "maximum efforts" to develop all outer Continental Shelf areas including the Atlantic seaboard; for a maximum but reasonable time to replace natural gas with coal as a boiler fuel: for a study to see if the federal government should "oversee" renovation of railroad beds for long-haul coal transportation, at no cost to the tax payer, and for federal support of both nuclear fission and fusion for future energy

Other policy statements and resolutions to be considered by the Southern governors include:

-A statement submitted by North Carolina Gov. James B. Hunt Jr. urging the states and federal government to recognize the needs of the nation's smaller cities along with metropolitan areas for a "national balanced growth policy."

-A statement proposed by Georgia Gov. George Busbee urging Congress

Exxon develops new motor oil

HOUSTON (AP) - Exxon Co. USA said today it plans to start marketing in September a new gasoline-saving motor oil that improved mileage an average of 4.5 per cent on road tests. Randall Meyer, president, said

gasoline consumption in the United States could drop by more than 200 million gallons a year if only one out of every 20 cars used the new oil instead of typical multi-grade oils. Meyer said the new oil is expected to result in savings equivalent to about three cents per gallon of gasoline for the average motorist or about one gallon per typical tank of gasoline. The mileage improvement was attributed to a reformulation of Exxon's Uniflo motor oil through new technology that reduces the friction between moving parts in automobile engines.

to reserve for American businessmen all the advantages, "morally and economically equitable, multinational markets competition.

Bradford

promoted

DALLAS - Texas Oil & Gas Corp. has announced the promotion of Richard L. Bradford to administrative manager for its Kansas District, at Wichita, Kan.

He will handle all district-level accounting and administrative matters.

Before joining the company earlier this year, Bradford was affiliated with National Oil Co. in Wichita, as treasurer.

Probe slated for Scurry

Delta-Gulf operating from San Antonio, has staked site for a 7,600foot wildcat in Scurry County. It is No. 1 Sterling-Willingham.

Drillsite is 1,980 feet from south and 660 feet fffm east lines of section 88, block 2, H&TC survey, six miles northeast of Hermleigh.

Site is also 21/2 miles southeast of the Ellenburger discovery in the Hermleigh field.

Outpost site

Mine workers group defies UMW orders

By The Associated Press

Violence was reported as dissident miners defied leaders of the United Mine Workers and refused to end their wildcat strike.

State police said shots were fired Wednesday night when two rival UMW groups gathered in the Cabin Creek area of Kanawha County in West Virginia. No injuries were reported and police said the groups dispersed shortly after the incident.

About 10 shots reportedly came from the direction of about 40 miners who said they would not return to work as directed in an order issued Monday by the union's International Executive Board.

UMW president Arnold Miller "has sent his thugs up here." said the miners. The dissidents, believed to be from the union's Charleston-based District 17, referred to the second group, which consisted of about 100 men.

Members of the larger group said they were there "to make sure the pickets don't stop the men from going back to work.'

Earlier Wednesday, Miller had met with members of the union's organizing department and made plans to insure that pickets did not keep miners in the Cabin Creek area from their work.

The groups remained about 75 yards apart. State police arrived about 30 minutes after the shots were fired.

"It's brother against brother," said Talmadge Dean, of Ellsworth, Pa., a member of the larger group. "We were asked to come down here by our local union president. But we can see that District 17 isn't ready to get back to work.'

Dean said about 20 of the miners in

the group were from other states Meanwhile, roving pickets moved

back into UMW District 30 in eastern Kentucky on Wednesday, closing mines that had opened the day before. District President Robert Carter

said the wildcat strike appeared to have slippped back into high gear after the brief interruption. "It's pretty widespread. I don't reckon there's anything working." Carter said.

The West Virginia Coal Association estimated 18,000 miners remained off the job Wednesday, primarily in District 17. That was down from the 30,000 strikers reported out Tuesday. About 10,000 eastern Kentucky miners were idle Wednesday.

The renewed picketing was a blow to the UMW's embattled leadership which had ordered the miners back for a 60-day period while the union continues negotiations on health benefit funds with the Bituminous Coal Operators Association (BCOA).

Pecos field stepout set

George T. Abell, Midland, plans to drill No. 6 State-Heierman as a west stepout to the current two-well marginal Montoya 4775 area of the Abell, West field in extreme North Pecos County.

Location is approximately 4,700 feet from most northerly north line and 4,400 feet from most easterly east line of section 12, block 3, H&TC survey, or 2,249 feet from northwest and 1,000 feet from southwest lines of the section, two miles north of Imperial.

Instructor for the course is Timothy moved closer to reality following a Marason, a member of the federal judge's refusal here to enter Oklahoma City law firm of Andrews, the controversey. Mosburg, Davis, Elam, Legg & U.S. District Court Judge John H. Bixler, Inc. He attended the

Wood Jr. on Wednesday dismissed a petition by five Crystal City residents to obtain a temporary restraining order against Lo-Vaca to prevent the company from cutting off the city's gas supply on Aug. 27.

Wood said his court lacked jurisdiction to act on the request by the residents of the South Texas city. Lo-Vaca officials say they will cut off the gas supply to the city-owned gas distribution system because the city will not pay over \$800,000 owed to the firm for gas already supplied.

The dispute arose when Crystal City refused to pay more than the 36 cents per 1,000 cubic feet (mcf) called for in the city's supply contract with LoVaca signed several years ago.

After the contract was signed, the Texas Railroad Commission granted Lo-Vaca the right to charge more than the contract price. The current rate is now about \$2 per mcf.

Crystal City argued the case to the Texas Supreme Court, which ruled that the city must pay.

Judge Wood in his order dismissing the petition said the residents failed to show that the State of Texas was sufficiently involved in the activities of Lo-Vaca to meet the federal court requirements of showing state action before the court could act.

Wood said Lo-Vaca is a private utility and the fact that the Railroad Commission sets the rates the firm may charge does not mean the utility is state controlled.

The judge also said the plaintiffs failed to show they could not get adequate relief in state courts.

Also named as defendants in the suit were the Railroad Commission, the City of Crystal City and its mayor.

The plaintiffs were expected to appeal Judge Wood's ruling to the 5th Circuit Court of Appeals in New

gas-condensate strike AMARILLO - Mesa Petroleum Co. has announced that No. 13 South Pelto, in which Mesa holds a 25 per cent working interest, has been

Mesa reveals prolific

production tested from two zones at a combined daily rate of 1925 barrels of oil and 1.4 million cubic feet of gas. The first test, taken through perforations at 13,257-13,277 feet, flowed at a daily rate of 1,300 barrels of oil and 1.1 million cubic feet of gas on a

20-64-inch choke. The second test, taken on a 12-64inch choke, through perforations at 12,006-12,018 feet, flowed oil at the daily rate of 625 barrels, plus 300,000 cubic feet of gas.

Mesa, as operator, has ordered a six-well drilling platform and a production platform to partially develop the field. Initial production is expected in mid-1978. The block is located 10 miles offshore Louisiana in 35 feet of water and was purchased for \$5.3 million in the May, 1975 federal offshore lease sale. Mesa and its partners were awarded three tracts contiguous to the discovery tract in the June 1977 lease sale, for a total of \$18.2 million.

Other partners with various interests include: Oil Development Co. of Texas, a subsidiary of Santa Fe Industries, Inc.; American Natural Gas Production, Co., a subsidiary of Michigan-Wisconsin Pipe Line Co.; Osy Petroleum, Inc.; Reserve Oil, Inc.; a subsidiary of Reserve Oil & Gas Co.; Aminoil USA, Inc., a subsidiary of R. J. Reynolds Industries, Inc.; and General Crude Oil Co., a subsidiary of International Paper Co.

Pogo Producing Co. Sept. 1 as senior vice president - operations, as well as a member of the board of directors. Joynt, who is retiring as general manager of the Houston exploration and producing division of Mobil Oil Corp. is a graduate of Missouri School of Mines. He began work with Mobil in Kermit, first as a roughneck and then in a variety of production department positions in New Mexico, Oklahoma and Louisiana, as well as Texas. He was named production manager, vice president and director of Mobil Oil Canada, Ltd., in 1960.

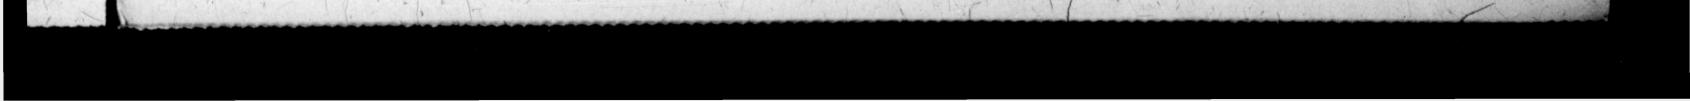

He was named operations coordinator and vice president of operations of Mobil's North American Division in New York in 1974, and in 1969, he became regional vice president in Houston of Mobil's Gulf Coast exploration and producing region.

He has held his present position since 1975, following a worldwide realignment of Mobil's explorationproduction organization.

unidentified formation Tool was open an unreported time on the test taken from 6,911-6,925 feet. Gas surfaced in 15 minutes, flowing at 58,000 cubic feet per day. Recovery was 70 feet of oil- and gas-cut mud, 1,370 feet of free oil and 1,800 feet of salt water. The sampler contained .60

career challenging

By DAN HALL

NEW HAVEN (AP) - John Collins is a male midwife who says his biggest problem is that people don't know what to call him.

"I get 'mid-hubby' and 'nurse man." One day I could hear one of my patients coming down the hallway asking, 'Where is my? ... where's? John?

The bearded Collins is one of the first men in the United States to become a certified nurse midwife.

Since he broke the ice four years ago, fewer than a dozen men have followed him into the world of about 3,000 female midwives, so he expects to remain a bit of an oddity.

Collins, 35, entered the Yale School of Nursing master's program in 1970 "ignorant of how much pioneering I'd be doing.

Today he sees himself as a small but important part of a health-care revolution. He considers the small band of men a "minority group" but that doesn't mean a male midwife can't be successful, he said in an interview

"When the patient first blinks and says, 'YOU'RE a midwife?' it actual-

ly gives us something to begin talking about. I don't know about you, but I don't want to have someone give me a physical exam until I know him better." he said.

Midwives who have had children may have a special basis for their patient relationship, but Collins insists that he does, too, because he "won't be tempted to tell a patient I did this or that differently when I was pregnant.

Since the nurse-midwife tries to minister to the whole family, not just the mother, being a man can be a plus

"It really doesn't matter whether it's a man or woman providing the care as long as they follow the principles of nurse-midwifery," he said.

After breaking away from the tradition of midwives helping women give birth when no other aid was available. today's college-trained midwife is gaining popularity among women with uncomplicated pregnancies who want a closer relationship with their medical adviser, he said.

"There are a lot of sick people," he noted, and they take much of the typical obstetrician's time. "We're geared to health, not to illness."

U.S. farm exports said headed for rare decline

By DON KENDALL

WASHINGTON (AP) - The dollar value of U.S. farm exports appears headed for its first decline in nearly a decade_next fiscal year, according to Agriculture Department analysts.

Although the yearly increases recently have eased from their soaring climb of a few seasons ago, the value of the exports has climbed steadily since they dipped 9.4 per cent in 1968-69 to-about \$5.8 billion from \$6.4 billion the previous year.

For the fiscal year that ends Sept. 30, farm exports are expected to be a record \$24 billion, up from less than \$22.8 billion in 1975-76

But while actual export tonnages are expected to decline only slightly in the coming year, prices of some commodities - mainly grains - have tumbled sharply because of large harvests in the United States and elsewhere.

Thus, according to USDA's Outlook and Situation Board, 1977-78 fiscal year farm exports may be down 'perhaps 5 to 10 per cent' from the \$24 billion estimated this season. That would put next year's export value at \$21.6 billion to \$22.8 billion

The recent report said, however, that "much uncertainty exists" about the final outcome of 1977-78 farm exports and that this year's harvests - including the U.S. corn crop to be harvested this fall - will have an important bearing.

On the basis of quality, 1976-77 farm exports are currently estimated at 100.8 million metric tons, down from almost 106.9 million tons in 1975-76. Officials said that "only a marginal decline" in tonnage is expected next year.

"Somewhat smaller shipments of feed grains, tobacco, fats and oils are expected, but shipments of wheat and soybeans are expected to increase." the report said.

Of the 100.8 million tons of exports estimated this year, 23.5 million will be wheat and flour; 50 million, feed grains; 2.1 million, rice; 15.5 million, soybeans; 1.2 million, vegetable oils; 4.5 million, oilcake and meal; 1.1 million, cotton; 300,000, tobacco; 1.3 million, fresh fruit; and 1.3 million, animal fats. A metric ton is 2,205 pounds.

There was no breakdown by commodities in the 1977-78 export tonnages, but the report said shipments of wheat and soybeans may increase while exports of feed grains, tobacco, fats and oils are expected to be "somewhat smaller" in the year ahead.

Japan continues to be the largest single foreign customer of the U.S. farmer, buying an estimated \$3.9 billion worth of products this fiscal year, up from 3.4 billion in 1975-76. By comparison, the Soviet Union is buying \$1.1 billion worth of U.S. commodities this year, down from nearly \$2.05 billion in 1975-76.

e trouble

Puerto Rican woman's magazine teaching aid

By SYLVIA MORENO Newsday

Two years ago, Dora Martinez de Zutis returned to New York from and visit to her native Puerto Rico and wondered why her relatives who had moved to the United States had not reaped the benefits of living in the land of opportunity.

The members of her family, spread between Puerto Rico and the New York metropolitan area, are of the same stock, but they are living two different types of lives. Uncles and aunts in Puerto Rico run their own small businesses; one cousin who lives there attended West Point; several others have gone to college, and still others have the potential and probably will have the opportunity to pursue higher education. But in the metropolitan New York area, Mrs. Zutis' relatives can best be classed as socioeconimcally deprived. What happened?

The irony of life," Mrs. Zutis, 35, said in an interview recently. "Those who had remained in Puerto Rico had done better. This is supposed to be the land of opportunity, and the opposite had happened. I started wondering 'how come?' and I decided it must be the education.'

Her solution - or her attempt at a solution - was born in arco iris. Una Revista Bilingue. She calls it a children's magazine - not in the sense of Highlights for Children - but one designed for junior and high school-age youths. It covers just about everything any children's magazine does, except that it does it in Spanish as well as in English. The features include poems, short stories, fables, jokes, riddles, crossword puzzles, anagrams, biographies on famous Hispanos, hints on proper nutrition, histories on Latin American countries and even a section called 'Hablemos Correctamante' (speaking correctly)

Mrs. Zutis, formerly a bilingual secretary, has had no training as a teacher, but she believes that informative reading material is the key to keeping young Hispanics interested in education So far, Mrs. Zutis, her husband,

Mrs. Zutis had read several times in reference to Puerto Ricans, a multicolored people. But that didn't mean she wanted to restrict the magazine to the Puerto Rican culture. "The name just always stuck with me."

"My main interest is to develop a child intellectually, and I don't like provincialism," Mrs. Zutis said, "I realize how important it is for a child to know his own culture, but I don't want to restrict him to that.

Hence, one of the problems choosing Spanish material that all Hispanos can understand. For example, what a Mexican child would call a turkey (guajalote) is not what a Puerto Rican or Dominican child would call a turkey (pavo). The problem is trying to find the most universal term.

"I have a difficult time choosing stories with dialects of a different country," Mrs. Zutis said. "So I use Latin poets who are well-known and use standardized Spanish.

And what the feature "Hablemos Correctamente" attemps is to teach that "spanglish," as it is called, is improper.

The other part is learning about and learning to appreciate hispanismo and the cultures of the rest of the world. So far, such features have included the histories of Mexico, Bolivia and India and a Puerto Rican legend of El Yunque, one of the tallest peaks in the Luquillo Mountains. Just as important, Mrs. Zutis contends, are the feature stories on famous Hispanos.

'There are nine Spanish-speaking Nobel prizewinners. But it seems everything you ever hear is negative. I want to encourage Hispanic children to aspire and create," she said.

Some of the renowned persons featured so far have been cellist Pablo Casals, painter Pablo Picasso and Yankee pitcher Eduardo Figueroa

Her attempts at soliciting financial backing from private corporations have failed so far. "We're in the hole, definitely," she said. "Everybody tells me the same thing. (The magazine) is a very needed thing; but they can't spend any money on it.'

Andrew, a book designer for Macmillan Publishing Co., and the According to the Bilingual Educational Service Center in receipts from about 2,000 sub-Arlington Heights, Ill., and Albar scriptions have financed the three quarterly issues of the magazine. She Pena, the director of the division of edits and her husband designs each bicultural and bilingual studies at the issue of arco iris, which is distributed University of Texas at San Antonio, here is no other bilingual magazine for teens distributed nationwide.

THE MIDLAND REPORTER-TELEGRAM: THURS., AUGUST 25, 1977

WHEN EMANUEL MANIS found these mastodon tusk fragments while operating a backhoe in a peat bog on his farm near Sequim, Wash., he thought they were tree sections. Washington State University scientists say they belong to a rare forerunner of the modern elephant which died between 11,000 and 15,000 years ago. (AP Laserphoto)

An article in the educational service center's newsletter described arco iris as a publication that fills a previous void for young, Hispanos. It also praised the magazine for discussing Hispanic culture in terms other than ethnic recipes, a description of a dance or the how-to about pinatas.

Pena was more pessimistic, however, saying a magazine for third- to sixth-graders would be more beneficial because teenage Hispanos are more likely to seek escapist, not educational, reading material, "I don't think we have created the kind of student that would seek that kind of publication," Pena said.

But Mrs. Zutis believes the younger teens, with a basic knowledge of English, are the ones who need the most help in keeping their interest in education alive.

"They sit in their classes, many times not fully understanding what's going on. They get bored and they rest eventually get out and get in trouble." she said. "The child who doesn't learn in the classroom only gets in trouble."

PARKING PROBLEMS?

cialists. No charge -

563-3500

Wanna better parking place? Avoid traffic congestion? Be chaffeured to and from your office? And save money all at the same time?

THE CHAUFFEUR, you answer to the hassle of parking and walking, from one to several blocks to your office, will now provide an ELEGANT chauffeur service to your office building in an elegant, luxurious air-conditoned van, complete with stereo music

The new service will start on September 1st from our lot at 3302 West Wall, corner of Wall & Kelly. We have a parking space waiting for you (on our newly paved lot) from which we will transport you to your office building five days a week between the hours of 7 and 9 a.m., pick you up in the afternoon between the hours of 4 and 6 p.m., and deliver you back to your car; all for a cost of \$32.00 per month. This service will also be available from our lot at 1008 N. Big Spring and 1802 N. Big Spring beginning October 1, 1977.

If you have passengers in your car who want to use THE CHAUFFEUR, non-parkers may ride for only \$24.00 (each) per month.

In the event you are part of a group of 12 to 14 persons who would prefer to be picked up at a mutually agreeable point, we will provide special CHAUFFEUR service, at a specific time, for only \$24.00 per month per passenger provided that arrangements are made in advance for this service.

To become one of Midland's fortunate few who are elegantly chauffeured to and from work, please call me at 683-4853, or better yet, stop by and visit at 1400 Gihls Tower West

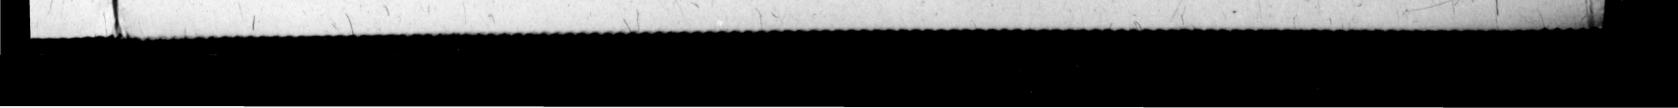

Elegantly yours,

hauffeur

Patt Sayers General Manager

P.S. THE CHAUFFEUR is also available, and at your service, during evening hours and on weekends for picking up and delivering your guests to your next party, football games and for other occasions at reasonable rates.

THE MIDLAND REPORTER-TELEGRAM, THURS, AUGUST 25, 1977

Star's mother explains his death

stars may need help coping with the success that ended in tragedy for Freddie Prinze.

Prinze, star of the weekly television series "Chico and the Man." was not the first 22-year old/American youth to die from a self-inflicted bullet wound in the head. But he was a star, which presents an anomaly.

His material success was far more dramatic than that of most people, who have questioned how he could do it. He had everything to live for. But his ability to seek help anonymously was limited.

So Prinze's 56-year-old mother, Mrs. Maria Pruetzel, may provide a glimpse of the problems of successful young people. The Puerto Rican-born Mrs. Pruetzel sits in the

house Freddie bought her and her husband about two years ago for \$50,000 and talks in a heavy Spanish accent about her son, whose famous face looks down from a giant poster on the living room wall.

She stands to gain financially from her recently mounted verbal campaign to prove that Freddie's death was accidental, not suicide. Her attorney, Martin Friedlander, says Mrs. Pruetzel could lose up to \$500,000 in Prinze's life insurance benefits if a jury rules the death a suicide

She insists that her son's death last January definitely was not suicide and probably was an ac-cident, the result perhaps of a mind confused from Set in park taking too many tranquilizers. Friedlander says Prinze had feigned suicide before with a pistol and that his death came as "merely another chapter in Freddie's game playing."

But Prinze's troubles truly related to his quick success, Mrs. Pruetzel says.

"Some kids, they say, 'I'm going to make it in show business.' They try so hard. And don't kid yourself, they work hard. And some of them think, once I get to the top, I'll have it made. I'll be happy."

Mrs. Pruetzel notes that her son's death came after a full day's work at the studio.

With a successful, busy schedule, she said, "It's hard to adapt yourself to new friends. You become so involved that you become a celebrity like he did overnight, but you have no time for yourself

Nor to his parents.

Since Prinze's death, the young star's estate, including whatever is coming in from residuals, has been tied up in complex litigation, leaving the Pruetzels to accept donations from friends to meet their house payments. The father currently is dying of throat cancer and requires daily hospital treatment, says Friedlander.

But Mrs. Pruetzel prefers to talk about her son. 'My interest is to make clear what happened to

Freddie could happen to somebody else," she says. "They should have some kind of organization to

Wide-ranging

music program

give orientation to these young people to teach them how to cope with success, with sudden success.

A wide-ranging program of music is scheduled for presentation at Saturdays annual "Pops in the Park" concert. The 8:15 p.m. event in Wadley Barron Park, West Cuthbert and North A streets will feature the Midland-Odessa Symphony, joined by a guest vocalist, Linda Jean of Fort Davis. The concert, free to the public, will offer portions of Dvorak's "New World" Symphony and Offenbach's 'Tales of Hoffmann'' as well as the overture to Gershwin's "Strike Up the Band" and a medley of favorites by composer Vincent Youmans. The theme from the recent motion picture, "Rocky," will also be played. The guest vocalist will be heard in a selection of well-loved ballads and folksongs, including "Down By the Glen" (with harp ac-

LOS ANGELES (AP) - A mother's love and her a tool and die maker, when the couple's son offered to There's no reason for them to jump from the barrio to Hollywood.

The American Federation of Television and Radio Artists, the union to which Prinze belonged, recently announced a joint program with the three television networks to counter what AFTRA believes is "the increasing incidence in the use of and abuse of alcohol and drugs.

A union spokesman said "the people want anonymity, that's crucial to the program.

After all, a major star can't just call a local crisis line, officials explain, and expect to receive discreet help for a problem.

AFTRA Executive Secretary Sanford Wolff says the program so far consists of committee meetings with union and network officials and a telephone hot line specifically for industry personnel. However, the program, Wolff says, currently is

geared primarily for alcohol - not drug - abuse and is not specifically set up to handle psychological pressures which might be more subtle.

And a spokesman for "Chico" producer James Komack says his company would be pleased to cooperate with such a program but wonders how much it would have helped Prinze, who in fact was under psychiatric treatment and was visited by his doctor the day the gun went off.

Mrs. Pruetzel concedes her son had problems, but she remains unswerving in her desire to disprove the suicide theory

"Let's say he was in despair," she says. "But a lot of people are in despair. That doesn't mean they kill themselves.

Others have said Prinze was despondent over the break-up of his 15-month marriage. But Mrs. Pruetzel says even that trauma, including his wife Kathy's request for \$5,000 a month support didn't couldn't have - prompted suicide. The two "still were friends," Mrs. Pruetzel asserts.

Mrs. Pruetzel stands in one year to lose her son. her husband and her house, and it's too much for her to believe that it started with Prinze's wish to die.

"He loved me too much for that. He wouldn't cause me that much pain.

Miniseries reenacts news events

By JAY SHARBUTT

LOS ANGELES (AP) - Several years ago, public/ TV offered two fine shows, "The White House Transcripts" and "The Watergate Cover-Up Trial." reenacted accounts of the end of Richard M. Nixon's era.

THE MIDLAND REPORTER-TELEGRAM, THURS. AUGUST 25, 1977

The guy who made those shows - with actors, stage sets and verbatim dialogue from the

ENTERTAINMENT

Watergate tapes and trial - is using the same technique again for four more it-really-happened programs

He's Thomas McCann, who with KERA-TV in Dallas and \$625,000 from the Corporation for Public Broadcasting - CPB - has come up with "Eyewitness," a public affairs miniseries for public TV.

The first one-hour show, about a jetliner crash, the Karen Ann Quinlin case and the trial of a Massachusetts masseur on a prostitution charge, is being fed stations tonight by the Public Broadcasting Service.

Check local listings, as it may air on different nights in various areas. KCET here, for example, won't show it until Spet 7

As with his first two shows, McCann says the from public documents, verbatim, and we try to dramatist's surmise is taboo.

about the 19/3 crash of an Eastern the product of a writer's mind," he said. Airlines DC9 in South Carolina that killed 71 person. he didn't use the names of the piolot or copilot.

This, he says, is both out of consideration to the fliers' families and because the copilot survived 'and is trying to make a living again flying airplanes. There was no need to use his name.'

He said the 10-minute segment, shown entirely in the plane's cockpit, uses the fliers' words as taped on a cockpit voice recorder, later made part of National Transportation Safety Board documents.

At the end, he said, newsman Andrew Macmillan recounts the board's findings on the probable cause of the accident

McCann says "Eyewitness" is an outgrowth of a 90-minute pilot show CPB funded for \$125,000 a year ago

He said it was tested last fall in five cities - New York; Boston; Des Moines, Iowa; Brimingham, Ala., and Seattle, Washington.

'It got astonishingly high marks, so they decided to fund these four programs," he siad, adding that each costs about \$125,000.

He said all the series' reenactments are based only miniseries reenacts major news stories "directly on official transcripts. Invented dialogue or

Rock facsimiles in art exhibit

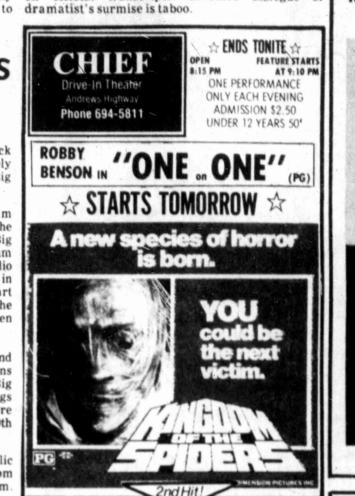

ALPINE - Facsimiles of Indian rock art and rock art paintings make up a fascinating and definitely informative new exhibition in the Museum of the Big Bend at Sul Ross State University here.

The rock art reproductions were done by Miriam A. Lowrance, associate professor of art at SRSU. She has coducted extensive studies of rock art in the Big Bend region and her copies on display in the museum depict Indian paintings found in Brewster, Presidio and Jeff Davis counties. Her studies also resulted in the location of several previously-unknown rock art sites. In the interim since her original visits to the sites, many of the paintings and carvings have been erased by nature, or destroyed by vandals.

"Early Big Bend inhabitants left paintings and carvings on the rock walls of caves and canyons throughout the region," explains Museum of the Big Bend director Ken Perry. He said the cave paintings. are difficult to date but speculates that most were done between 900 A.D. and the latter part of the 19th Century

The Museum of the Big Bend is open to the public portrait that appears in The box office, though it assured, the radio is 9 a.m. to 5 p.m. on Saturdays, and from 1 to 5 p.m. between 1 and 5 p.m. Tuesday through Friday, from

years as teacher

Everett F. Bingham will be celebrating 25 years as a Midland dance teacher when he opens his Bingham Dance Center for the fall term Monday.

The dance school is located at No. 7 Inperial Shopping Center on West Wadley Avenue.

Bingham said the stuido will offer instruction in funny, but it soon became was wrong. Trying to ballet, tap, toe and modern jazz dance, in addition to bothersome, so much so make a movie is like acrobatics and baton classes. There also will be a that the door is locked trying to run the 4-minute special class for 3-year-olds. Especially for adults will be classes in ballet, tap and country-Western dance

> Joining Bingham on the staff of the center for the upcoming fall term will be Jeanne Burk, Carol Rubin, Peggy Jacobs and Cherry Jones. Two new instructors on the staff will be Sunny Allen, who formerly operated a dance studio in Houston, and Polly Campbell, who formerly directed a studio in Austin.

The Bingham Dance Center is now enrolling students for the fall term. Full information on course "Actually, it's a very offerings and registration procedures is obtainable successful debut in their by dialing 694-2428. terms. To paraphrase

George Bernard Shaw, if you want to know about Specials to be key art, talk to the businessmen - they have money. If you want to know about money, talk to TV programming to artists - they're very

interested in it. I realize NEW YORK (AP) - Specials will be a key to that as long as art and winning the ratings race this year, a major adbusiness try to coexist, vertising agency says in its report on prime time there will always be that network television.

'Each network is depending on special Feldman is bright, programming to flatten the competition." Batten, perceptive and likable. Barton, Durstine & Osborn said in the report Finally, the time for the released Tuesday. question has come and

Its analysis of the new season further noted that viewers can expect more general and family dramas, more situation comedies, more sports shows and, of course, more specials this year.

The agency also said there was a trend toward more science fiction and fantasy programs. In addition, viewers should expect a broader scope of subjects in made-for-TV films, including wife beating, breast cancer and the loss of sexual prowess in a youth.

But there has been a 43 per cent decline since last year in the amount of programs classified as music. comedy or variety and an 11 per cent decline in action, adventure and mystery shows.

"During the past year prime time network programing has been marked by innovation, quick action and monumental change," the report said, "and this volatility will continue to influence the networks' scheduling policies for the fall season."

BBD&O said that networks found it easier to make new programing less violent than to modify longrunning shows such as "Kojak" and "Police Woman" for fear of losing audiences.

The "real threat" to the old police and detective action shows, the agency continued, was science fiction, such as "Six Million Dollar Man," "Bionic Woman," "Wonder Woman" and the new entries, 'Man from Atlantis" and "Logan's Run."

The report said that the networks were answering their need for dramatic programs lacking violence with general and family drama shows, which have, increased 50 per cent this year to occupy 18 per cent of the schedule.

Proto

Soviet 'swap' by Churchill bared in book By ROBERT G. KAISER The Washington Post

PAGE &C

WASHINGTON — Winston Churchill did more to encourage a Soviet "sphere of influence" in Eastern Europe than has previously been realized, according to a document revealed in a recently published book.

In October, 1944, Churchill actually told Joseph Stalin, the Soviet dictator, that the two of them should disguise an agreement on sphere of influence in Eastern Europe "because the Americans might be shocked."

And in fact. Churchill never did explain fully to President Franklin D. Roosevelt or the American government precisely what he and Stalin had agreed to in Moscow on Oct. 9, 1944.

Diplomatic historians have long been intrigued by that Stalin-Churchill meeting. Some have concluded that Stalin probably interpreted Churchill's behavior then as acquiesence to a Soviet sphere of influence in Eastern Europe after the war.

The only first-hand account of the Oct. 9 meeting published previously was Churchill's own in volume five of his war memoirs, "Triumph and Tragedy." Charles E. Bohlen, the American diplomat, described the meeting in his memoirs as "an important one still clouded in mystery."

But Daniel Yergin, author of the new book "Shattered Peace" (published by Houghton Mifflin), discovered the official British minutes of the meeting in the military archives at Imperial College, London. Yergin found them in the personal papers of Gen. Hastings Ismay, Churchill's chief of staff.

The minutes show that Churchill misreported the meeting with Stalin both in his memoir, and in a message to Roosevelt written two days after the meeting occurred.

In his memoir Churchill recounted his decision to jot down some figures on a half-piece of paper and pass them to Stalin. The paper listed countries and "percentages" of influence that Russia and the Western allies would have in each one.

Churchill allocated the Russians 90 per cent in Romania, 75 per cent in Bulgaria, 50 per cent in Yugoslavia and Hungary and 10 per cent in Greece (the Balkan country of greatest strategic importance to Britain).

In his memoirs Churchill admitted his own nervousness about this piece of paper; he suggested to Stalin that it burned. But Churchill also claimed that the percentage deal was not meant to have lasting significance.

"We ... were only dealing with immediate wartime arrangements," Churchil wrote. "All larger questions were reserved on both sides" for a later peace conference, he wrote.

In his personal letter to Roosevelt on May 11 Churchill wrote from Moscow: "Nothing will be settled (during Churchill's Moscow visit) except preliminary agreements between Britain and Russia, subject to further discussion and melting down with you."

But the minutes of the meeting that Yergin discovered tell a different story. Churchill did not say the percentage arrangement was temporary at all. Stalin told the British prime minister that he him. The dictator noted that "it was a serious matter for Britain when the Mediterranean was not in her hands" - a reference to Churchill's desire for an upper hand in Greece. So, Stalin said, Britain would enjoy "first say' 'in Greece, as Russia would have "first say" in Romania. The minutes continued: "The Prime Minister said it was better to express these things in diplomatic terms and not to use the phrase 'dividing into spheres' because the Americans might be shocked. But as long as he and Marshal Stalin understood each other, he could explain matters to the President (Roosevelt). Yergin describes Churchill's willingness to cut this deal with Stalin as "paradoxical, if not cynical, in the light of Churchill's bitter denunciation of exactly such a division (of Europe) in his Iron Curtain speech (at Fulton, Mo.) a year and a half later." Yergin notes that Churchill suffered constantly from ambivalent feelings about Russia. He was a fierce anti-Communist, but also a practical war leader who believed Soviet help against the Nazis was crucial. The only ranking American in Moscow when Churchill made his arrangement with Stalin was W. Averell Harriman, then the U.S. ambassador there. Harriman was included in several of the meetings. and Churchill wrote in his memoir that the American attended the crucial Oct. 9 session. Harriman said in his own memoir that this was not true - that he was 'otherwise occupied. Harriman only learned of the percentage deal on Oct. 12, when he visited Churchill at his guest house in Moscow. Churchill showed him the draft of a letter he planned to send to Stalin, reviewing the British understanding of the percentages agreed to on Oct. 9 Harriman advised him not to send the letter, according to his memoir, and added that Roosevelt would "repudiate the letter if it was sent." "I don't understand now, and I do not believe I understood at the time, just what Churchill thought he was accomplishing by those percentages." Harriman recalled. It is unclear why the British minutes of the Oct. 9 meeting have not emerged earlier. Yergin said in a telephone interview that the copy of them that should be in the British Public Records office in London is missing. He said he thought it was an unintended accident that he was able to find the minutes in the Ismay papers.

Women protest doctor's policy

ZEEHAN, Australia "A lot of us can go (AP) — Women in this small town on the Australian island of Tasmania are angry because the only doctor refuses to prescribe birth "A lot of us can go elsewhere, and will," said Joy Hiddlestone. "but the nearest town is 25 miles away over a winding road." The doctor told a pro-

control pills.

Dr. Desmond Bracken, opposes the pill on a 64- year old general practitioner, says he won't issue the prescrip-

test meeting this week he

tions necessary to obtain the pill because he opposes mechanical and chemical methods of contraception. "They cannot make me is a dictatorial attitude."

"They cannot make me is a dictatorial attitude." change my mind," said The doctor, married 33 Bracken, who took over years, said he believes' the medical practice in oral contraceptives cause the mining town of 3,000 fatal side effects, inthree weeks ago.

Rising prices may cut home building pace

PAGE TC

NEW YORK (AP) — With housing prices con-tinuing to rise, government officials, homebuilders and others will be watching the statistics to see if the rate of home ownership, the highest in the world,

So far it hasn't. More than 60 per cent of the nation's housing is owner-occupied, and the current pace of some 2 million starts a year suggests it will hold in that range for the time being.

Many of the new units being built, however, are in multifamily dwellings - rental units, that is. If the pace quickens, it could mean the gradual reversal of a trend that is nearly 30 years old.

It began in the post-World War II days, when the percentage of owner-occupied dwellings was less than 50 per cent, a rate that had prevailed in every decade since before the turn of the century

Through the use of government-backed mortgage loans and mass production techniques, the nation's landscape became dotted with single-family units during the 1950s, and the owner-occupied percentage rose sharply. It reached 62.9 per cent in 1970.

The period was marked by the greatest financial mobility in the nation's history, accompanied by vast social changes. Fields were turned into towns as the new concept of the good life created an exodus from

There is no assurance it will continue. Financial, demographic, social and cultural conditions have changed. Money is expensive and so is wood. A surge of singles, urban-oriented, is developing. The price of heating oil is high and so is commuting from the suburbs. The urban rental units look a bit more

While there is housing to be found at almost any price, providing the purchaser is able to exercise ingenuity and perhaps a good deal of daring, the median price of new single-family homes rose to

Compare that with a median of \$35,900 in 1974. Note the percentage increases: 10.5 per cent in 1974, 9.5 in 1975 and 12.5 per cent last year. Faster than prices in general, faster than wage increases.

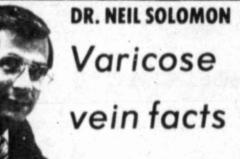

In 1972, nearly 60 per cent of all new, single-family homes were offered at a price less than \$30,000, says the U.S. League of Savings Associations, Last year only 12 per cent of homes for below \$30,000.

At a selling price of \$44,200 the median-priced home may represent an investment of more than \$100,000 before the purchaser owns it fully, and this figure does not include taxes, maintenance or

It is figures such as this that convince some sociologists that young Americans are bound to rebel against what has often been termed the American dream, the ownership of a single-family house on a

But ask real estate people and they tell you the signs aren't very obvious. Yes, they concede, the suburbs have lost some of their fascination. And true, young couples are reinvesting in downtown

But if you probe the psyche of most young house-seekers, they say, you'll find they are remarkably like their parents, and they want a house like the one in which they grew up. Or better.

Dear Dr. Solomon: I'm considering having an operation for varicose veins. Is this very risky? Is it pretty sure to work? I have never had any kind of an operation before, so I'm rather nervous about itjust the thought of going to the hospital is a bit

Dear Clare: Surgery for varicose veins is extremely common, and it is not a dangerous operation. In the great majority of cases, the patient comes out of it looking much better and also in healthier condi-tion. What is done is that the weak, dilated sections of vein where blood tends to stagnate and which are often quite disfiguring, are tied off and removed. The blood flow is automatically diverted to deeper veins that are in good shape. So there should be no problem

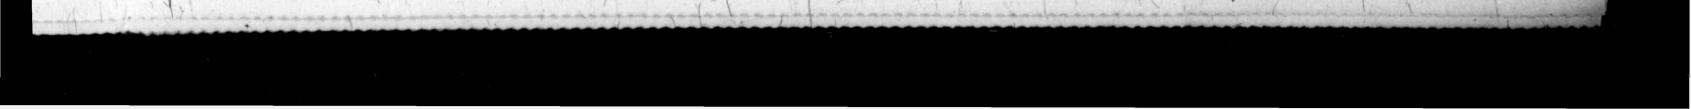

Sometimes, the protruding veins are simply tied up at key points and left in your leg. A recent report from England says that this technique is proving very effective and practical as no hospitalization is needed. Results are checked immediately by having the patient stand up. If any bulging veins have been missed, he or she lies down again, and additional ties are made at the appropriate spots.

Some hospitals, such as Mount Sinai in New York do varicose vein stripping in a day. A patient enters the hospital early in the morning, is through with surgery and walking around by 10:30, and back home by late afternoon. Dr. Robert A. Nabatoff, who has done almost 1500 such in-and-out operations, says that complications like vein inflammation and clotting which occur in one or two percent of hospitalized patients, are virtually eliminated by the early return

So if your doctor feels that you should have surgery for varicose veins, I would follow his advice con-fidently. It's really no big deal.

Dear Dr. Solomon: I have a rather unattractive scar on my arm-it's where I was vaccinated. I know lots of people have them, but I just don't like it. Would plastic surgery be a way of getting rid of it, do you think?—Inez D.

Dear Inez: A good plastic surgeon would certainly be able to give you advice about this. However, let me mention a non-surgical treatment I read about recently in the British Medical Journal. A vaccination mark that was quite noticeable was treated with insulin injections every day for 12 weeks, and by the end of this time, all trace of it had disappeared. The physician who used the treatment, Dr. F.K. Armroliwalla of the Royal Air Force Hospital in Ely, says it is effective because of insulin's ability to promote fat and protein synthesis. He adds that the technique is simple, cheap, painless and worthy of wider use. You might ask your doctor if he thinks that the procedure might be advisable for you.

Shopping tips help housewives evolve better buying practices

By LOUISE COOK

NORWALK, Conp. (AP) - Like millions of other women, Sarah French balances her food budget with an agility worthy of a professional economist, matching demand - the tastes and appetite of her family against supply - her husband's biweekly paycheck.

In 12 years of marriage, Mrs. French has learned many of the tricks of supermarket shopping

She passes up displays of tempting, but expensive products, strategically placed to catch the eye of the shopper. She reads labels and studies the fine print in the ads.

Mrs. French clips coupons, buys house brands, watches for specials and tries not to be swayed by the pleas of her daughter, Emily, 8½. "You've got to resist children," she says. "Children want this or that. A lot of parents will buy just to keep the kids quiet."

Recently, Mrs. French learned a few more tricks from "Be a Better Shopper - Buying in Supermarkets." a kit prepared by Cornell University experts.

Before getting the kit, Mrs. French did virtually all of her shopping at one supermarket. A month later, she visited three competing stores to take advantage of advertised specials. She paid more attention to prices on the second trip, comparing supermarket offerings. She stocked up on some items that were on sale

Mrs. French rejected some of the suggestions of the experts, however. She said she couldn't see herself spending the time to write down every purchase and price as recommended. She was dubious about finding space to store items bought, in large quantities, on sale.

An attractive brunette who worked until the birth of her second child, Catherine, 31/2 months, and who plans to return to her clerical job in the fall, Mrs. French also said that the experts did not pay enough attention to individual tastes.

"There are certain things we will eat and it's no use for me to buy other things," she said. When it comes to changing brands to take advantage of a special, Mrs. French is selective. "Certain ones are worth the money. I wouldn't switch no matter what the price.

Family members are particular. Emily, for example, prefers a par-

G

ticular brand of hot dogs. It would be a false economy to buy a cheaper brand, Mrs. French said.

Heinz Biesdorf, the Cornell professor who headed the team that developed the Better Shopper kit. concedes that consumer preference can be a factor in shopping. But he argues that most people do not really taste any difference; they only think they do.

If you honestly can tell the difference, Biesdorf says, you should try to decide which is more important the taste or the money - and spend accordingly. Biesdorf says his aim is not so much to teach people what to spend as it is to make them aware of the money they have and the use they make of it.

Mrs. French is determined not to make concessions when it comes to quality. She says of food: "It's one of the necessities of life and it can jolly well be enjoyable.

Mrs. French does her main shopping once every two weeks; the trips coincide with French's payday. Perishables such as bread and milk are replaced more frequently. When she needs an item like milk, she says, "I try to go straight to the place (where it's located), get it and get out of there. If you don't, you're doomed (to impulse buying).

There are other shopping pitfalls. "The things that bug me about supermarket practices are the things that are profitable for the supermarkets such as putting tempting items like their fresh baked cake right at the doorway where you're bound to fall over it coming in the door," Mrs. French says.

'It took a long time" to learn to withstand temptation, she adds. "And it's still hard to go by those little goodies at the door. I always stop and look at 'em. I never buy 'em.

Another danger: "You go to a store with a marvelous bargain and decide to pick up other things on which the store is making up the cost.'

Mrs. French avoided such a trap on her most recent shopping trip, after using the Better Shopper kit. Displaying advertisements for ham, sausages and baby shampoo and discount coupons for spaghetti and soda, she said: "With luck, that's all we're going to get.

When she left the store 35 minutes later, Mrs. French had purchased the items on her list and nothing more. "This is the first time I've been in a store, bought exactly what I came to home. Emily and Catherine: who stayed home during the morning. came to the store. (Mrs. French said she tries to leave the children home when her husband's work schedule permits him to watch over them, but it is not always possible.)

THE MIDLAND REPORTER-TELEGRAM, THURS.

She entered the store at 12:28 p.m. The first purchase was a box of English muffins for Emily. "She's been begging me for them for weeks. That's impulse number one," Mrs. French said ruefully.

Wheeling the cart past the produce department, Mrs. French paused at a display of potatoes. "The sign says Idaho, but the bag says Russet. I think I'll pass.'

Next comes a package of frankfurters - "I should have bought them at the other store; they were 10 cents cheaper," chocolate chip cookies for which she has a coupon, crackers, flank steak - "It's \$2.38 a pound, but it's pure meat," some other meats. beer, fruit juice, soda, breakfast items, cat food, cheese and so on. Mrs. French was at the checkout at 1:15 p.m. Her bill was \$32.26. Earlier in the day, she spent about \$16. She bought slightly less than usual because the family was going away for the weekend and because a current hot spell meant lighter and smaller meals.

Four weeks before, Mrs. French spent almost \$56 at a single supermarket. She normally spends about \$75 every two weeks

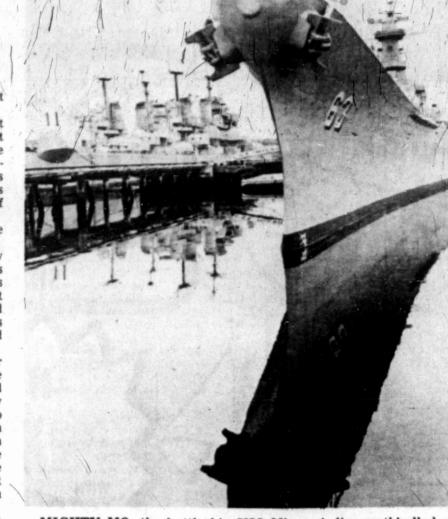

With a family income somewhat above the U.S. median of about \$14,000, the Frenches have a little leeway when it comes to food purchases. Mrs. French says she is aware of inflation, but feels there is little she can do. "You just sort of absorb it," she says.

Had she learned anything from the shopping kit?

Yes, said Mrs. French, particularly about laws and regulations on labels and pricing practices. She also was determined to continue shopping in at least two competing stores. She said she would stock up on paper products if there was a special - "I could probably store them in the attic.

Mrs.French questioned whether most shoppers would have the dedication, determination and organizational ability to shop the way the experts recommend. She also noted that many of the suggestions in the Cornell kit - first published in 1968 and revised this year - have become common knowledge with the growth of the consumer movement and shoppers' increasing concern about prices.

Information is the consumer's best defense against rising prices, Mrs. French says. "You don't get cheated at the supermarket," she says. "You cheat yourself."

Midland Cubs split pair with Gold Sox

Gregg Wilkes hogtied the Midland Cubs on eight hits, 5-2, in the first game of a doubleheader and Andy Muhlstock handcuffed Amarillo on six hits, 5-2, at Cubs Stadium Tuesday night to set the stage for the fivegame showdown with El Paso's Diablos.

The Texas League West Division leading Diablos, who already have the first half pennant in safe back on the border, lead the Cubs by a game going into tonight's 7:30 game at Cubs Stadium.

Midland, by virtue of its split with the Gold Sox and El Paso's loss to San Antonio, picked up a half game on the leaders.

Manager Jim Saul will lead with Darrell Turner, 12-7, in the series opener.

THE BURDEN is pretty much on the Cubs to take at least three games in the series since the Diablos head home to finish up the season with lastplace Amarillo while the Cubs must go to San Antonio to play the Dodgers, who are still harboring pennant aspirations of their own.

After the 5-2 loss in the first game Tuesday, the Cubs were in desperate straits going into the second game. A loss would have dropped them two

games back and meant they would have had to virtually sweep the El Paso series to keep their hopes flickering the second game.

Muhlstock' with a big three-run homer from Steve Haug, was equal to the occasion, notching his sixth straight win to raise his record to 12-4.

It was 1-1 going into the fourth when the Cubs exploded for four runs, Haug's authoritative wallop over the left field fence providing the clincher against Mike Lentz, 3-6, who also pitched a creditable six-hitter.

KARL PAGEL'S one-out double got the uprising underway and then Steve Davis reached first on an error, a miscue that made the entire inning possible.

Aaron Randall popped up and then Carlos Lezcano singled to plate one run and Haug followed with his second home run of the year.

Muhlstock surrendered a leadoff homer to Craig Stimac in the fifth for Amarillo's only earned run. Midland had gone ahead in the first without the aid of a hit when Kurt Seibert walked. stole second and scored on Scott Boras' infield grounder.

Amarillo tied it in the second with an unearned run when Gene Quirk beat out an infield hit. Paul O'Neill

was hit by a pitch and then third baseman Boras' throw to second on Bill Hallstrom's double play grounder let the run score.

IN IHE first game, Amarillo struck for four first-inning runs off Gary Martz, 3-3, and Wilkes kept the Cubs bats under control the rest of the way. Broderick Perkins, who had three hits in the game and five for the night. doubled home Craig Stimac, who had singled, and Ivan Murrell, who had walked. Luke Wrenn singled Perkins to third and Quirk's fly brought in the run while Steve Smith's single plated the fourth run. Doubles by Perkins and Wrenn

accounted for another run in the third. However, the big story continued to be Muhlstock, who didn't become a starter July 11 after eight saves as a

reliever. He lost his first two starts, but has reeled off six straight wins since, including five complete games and two shuouts. In that stretch, he has fanned 26 and

walked only three in 52 innings.

HIS EARNED Run Average for that period has been 1.52, dropping his season's ERA to 2.68, which should give him a pretty good shot at the title

And in spite of the first game loss, Saul also got some pitching encouragement in the first game when he relieved starter Martz with lefthander Tom Butler, until now an unknown quantity.

Butler, a product of Oral Roberts University, who was a combined 8-0 at Bradneton, Rookie League, and Geneva, New York-Penn League, blanked Amarillo on three hits over the final five innings, fanning four and walking none.

Lee kids suffer from ruling

By PAUL DOMOWITCH

PAGE 2D

How do you tell a 16 or 17-year-old kid that he's being punished for something he had absolutely no control over ? How do you tell a young teenaged football player who had dreamed of playing for a district championship since he was old enough to walk, that his dream just isn't going to come true this time around?

Life can be so unfair at times, and Wednesday, it dealt a cruel blow to some 60 Lee High School football players who were told that they were ineligible to compete for the District 5-4A championship this year because they violated a rule they have probably never even heard of, in a book they have probably never even seen

IF YOU'VE ever wondered why young people have so much trouble trusting older ones, now you know.

I feel very bad for those kids, which may comes as a surprise to a lot of people who for some reason, think I dislike Lee High. They did absolutely nothing wrong, except obey the orders of a football coach, and now they're being punished

Tuesday night, at the Lee booster club meeting in the school cafeteria. Coach Jim Acree explained that he was unaware of the ruling, and didn't know that the use of blocking shields by his players during the first four days of pre-season workouts was a University Interscholastic League infraction. He stood by his story on Wednesday, when he went before the 5-4A executive conmittee in Big Spring.

HERE'S ANOTHER surprise for some of you people. I believe Acree. Personally. I'm not too fond of the man. But I am convinced that he had no knowledge at the time of the infraction, that he was violating a UIL rule. I can't believe anyone would be stupid enough to break a law knowingly in front of a television camera.

But that's no excuse. Jim Acree is pleading ignorance, and ignorance is no excuse here. Anybody who is being payed \$23,000 a year for doing nothing

better know EVERY rule he's supposed to abide by.

I CAN'T tell you how many calls Bob Dillon and I received Wednesday from people who got the notion that we were trying to run Acree out of town. One guy wanted to know why we couldn't write anything good about the man. I told him we weren't trying to write anything good or anything bad. We were simply trying to do our job, which was to report the facts - and we did.

It's strange how people's minds work though. Angry over what had happened earlier in the day, they felt the need to lash out at somebody, and we were nice and handy. Like Frank Boggs was nice and handy last year, after the Oklahoma City Times sports editor reported that the Oklahoma Sooners were under preliminary investigation by the NCAA. OU fans threatened the man's life for just telling the facts to a public that had a right to know. Nothing more or nothing less. I haven't gotten a threat on my life yet, but if I do, I've got just one request. Do it in person.

THERE ARE two things that bug me about this whole mess. The first of course, I've already mentioned. Innocent kids are being punished for someone else's mistake. The Lee High School football team, before they even put one foot on the field this season. knows they cannot win - except in their own minds. It's bound to be a helpless feeling

The second thing that bugs me is that Midland schools Athletic Director Sam Cox is being made the fall guy in what's happened, and that's just not fair.

I could probably count on the fingers of my hand the number of times I've had personal contact with Sam in the year I've worked in Midland, but I respect him as much as any man I've ever met. He's honest and fair, and there isn't anything more you can ask out of anyone.

But others seem to think differently. They are blaming him for Lee's woes, because he reported the rules violation to the UIL office in

but coaching football damn well , Austin on Monday. They are saying he too has some sort of a grudge against Acree

Well, here are the facts, and if you still think Cox was wrong for reporting the infraction after reading this. you've really got problems.

On Wednesday, August 17, KMID-TV ran the broadcast of an interview at the Lee practice field with Acree. and in the background was the team practicing with blocking shields. When it was run, it can be assumed KMID had no idea of the significance of the tape, because, after all, a television station isn't supposed to know Rule 24 of the UIL code. I didn't know Rule 24 of the UIL code

ON THAT same day. Cox, while visiting the Rebels' practice session, realized they were violating the UIL rules by using blocking shields before the pre-assigned date.

After talking with Acree the next morning, Cox tried to contact Bailey Marshall, the director of the UIL, and report what had occurred. He was told that Marshall was out of town and would not be back until the following Monday. On Monday, Cox called Marshall again, and reported the violation.

I can't say for sure if Sam reported because he felt it was the right thing to do, or because he realized somebody else would if he didn't. It's fact that quite a few people in Midland and Odessa who saw the film, realized what was going on and were prepared to contact Marshall.

THE LATTER had to enter into his mind obviously, but I think Sam reported it because he thought it was the ight thing to do. It was. Some n the Midland Independent Sch vistrict administrative staff to Cox that he sit on it for a sui bu. Sam said no. w

o, the UIL would have found out about what Lee did one way or other. If they didn't turn them-

selves in, somebody else surely would have. And you don't know how much of a difference Sam's phone call may have made. Lee will not be able to compete for the 5-4A football title this season, but at least they can still play history

St. Louis reliever Al

shave.

Hrabosky believes his pier and happier."

their games. If Cox and the school district had tried to sit on it, and the UIL found out, there would be no season at all for the Rebels. And brother, you can take that to the bank. So, think about that for a while. There are definitely some guilty parties in this affair, but Sam Cox is not one of them. And he doesn't deserve the shabby treatment he's been getting. If you want a fall guy, look somewhere else. Because Sam just did his job. And you can take that to the bank too.

THE MIDLAND REPORTER-TELEGRAM, THURS, AUGUST 25, 1977

Bjorn Borg No. 1 star

BROOKLINE, Mass. (AP) - The brash young king of tennis has been dethroned. James Scott Connors no longer is No. 1 in the world.

"Well, you can't hold it forever." Jimmy Connors said Wednesday. "I've had it for 3½ years. I didn't even know I lost it.

But he did indeed lose the world's top ranking. The Association of Tennis Professionals, whose computer ranking is highly respected, said Wednesday that Bjorn Borg of Sweden was No. 1 and Connors No. 2.

The news didn't strike Connors like one of the lightning bolts that rumbled around the Longwood Cricket Club. It was more like he had known all along that he would be replaced.

'I haven't fallen; I've only missed a step," Connors said. "I don't like No. 2. There are a lot of claims to No. 1. But a lot can happen next week (in the U.S. Open at Forest Hills)."

The ATP rankings were used to make the seedings for the Open. Thus, Borg is at the top and Connors right behind him.

Connors had been No. 1 in the world in the ATP rankings since July, 1974 when he replaced Australia's John Newcombe. The young left-hander from Belleville, Ill., held the top spot longer than any player in the ATP's

Texas Rangers sweep 2 tilts from Red Sox

By The Associated Press

Texas and Boston spent more than eight hours at Fenway Park Wednesday night. The Rangers got a raindelayed doubleheader sweep out of the evening; all the Red Sox got was wet.

"Just a wasted evening," said Boston Manager Don Zimmer after his Red Sox dropped their eighth consecutive game and fell into a tie with Baltimore for second place in the American League East. The Rangers defeated Boston 3-0 and 6-3 in the twinighter, which was delayed two hours and 22 minutes in the opener.

Gaylord Perry and Adrian Devine combined to stifle the Red Sox in the opener, surrendering just three hits. Jim Sundberg's bloop double provided the only run Texas needed. Poor Rangers' baserunning prevented the game from being a rout \ Four Texas runners were thrown out at the plate, two by shortstop Rick Burleson and one each by third baseman Butch Hobson and

first baseman George Scott. In the nightcap, Jim Mason slammed his first homer since the 1976 World Series, when he was with the Yankees, for the winning run. It was only the 12th home run of Mason's career.

Claudell Washington also homered in the contest as Texas moved into second place in the AL West, two games behind pacesetting Kansas City and .001 ahead of third-place Minnesota

Elsewhere in the American League, Baltimore outscored Chicago 10-5, New York demolished Minnesota 11-1 and Kansas City outlasted Milwaukee 4-3 in 15 innings. Cleveland and California split a twi-nighter, the Indians winning the opener 5-3 and California winning the nightcap, 5-2; Toronto swept a pair from Seattle, 7-0 and 9-3, and Oakland took two from Detroit, 3-1 and 6-5 in 10 innings.

Orioles 10, White Sox 5

Doug Decinces and Lee May each had three hits as Baltimore topped Chicago. The Orioles pounded White

Sox' pitching for 19 hits, 14 off starter Steve Stone, 13-9.

game

Baltimore Manager Earl Weaver wasn't around to watch the bumbling. Weaver was thrown out of the game in the second inning. his sixth ejection of the season.

"We've played good baseball all year and we played good tonight," insisted Weaver.

Possibly the biggest goof of the night was committed by Chicago catcher Jim Essian, who missed third base on a single by Alan Bannister. Essian was called out on a Baltimore appeal play, costing his team a run.

Yankees 11, Twins 1

A 62-minute rain delay in the first inning may have been Minnesota's undoing. After scoring à run in the top of the inning, the Twins saw Mickey Rivers double and Reggie Jackson walk for the Yankees before the rain halted play. When the game resumed. Pete Redfern immediately surrendered Chris Chambliss' 15th homer and the rout was on.

Roy White, Bucky Dent and Mickey Rivers also slammed home runs for New York, which stretched its firstplace Eastern Division lead to two games. Catfish Hunter, 9-7, hurled a four-hitter for his third straight victory

Rivers, who had three hits in the game and eight consecutive safeties over two games before striking out in the eighth, was not ecstatic about his hitting streak, which brought his average up to .326.

Royals 4; Brewers 3, 15 innings

John Wathan doubled home John Mayberry with the tiebreaking run, then scored what proved to be the winner on Amos Otis' single as Kansas City took its eighth straight game, lengthening its AL West lead to two games.

Doug Bird, 10-4, hurled 52/3 innings of one-hit relief, striking out seven, to earn the victory

Indians 5-2, Angels 3-5 Cleveland beat Nolan Ryan in the

Home runs by Joe Morgan and George Foster powered Cincinnati over New York. Dave Concepcion chipped in with four of the Reds'

eighth. But the St. Louis hitters didn't get that many hits off Giants' starter Ed Halicki. Halicki was touched for three hits in the first inning, including consecutive triples by Jerry Mumphrey and Garry Templeton. But the Cardinals scored the eventual winning run in the fourth without getting a hit as Mike Anderson walked, stole second, moved to third on an infield out and scored on a wild pitch. Derrell Thomas knock-

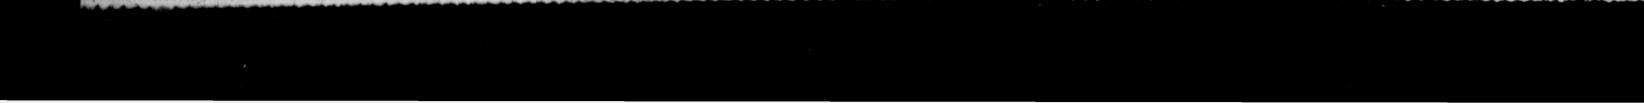

ed in both San Francisco runs with a homer and a triple

Astros 3, Phillies 1 Joe Niekro's five-hitter was backed by Enos

Cabell, who drove in a pair of runs with a double and a single to lead Houston over Philadelphia. The victory snapped Houston's sixgame losing streak and ended the Phillies sixgame winning string. "I threw nothing but

knuckleballs to (sluggers Mike) Schmidt and (Greg) Luzinski," said Niekro, 9-5.

Only Jerry Martin solved Niekro's assortment of pitches, slamming his fifth homer of the season in the eighth inning after getting a double in the

Rangers sweep

(Continued from/2-D)

opener, spoiling his attempt to become the AL's first 18-game winner. Jerry Remy's fifth-inning error on Rico Carty's grounder allowed the winning run to score. Ryan, 17-12, fanned 10, the 102nd time in his career he has struck out at least 10 men in a game

In the nightcap, Remy knocked in three runs to provide much of the Angels' offense.

Blue Jays 7-9, Mariners 0-3 Rookie Jerry Garvin hurled a sixhitter in the opener for his first major league shutout and his ninth complete game. Hector Torres' three-run

homer and solo blasts by Ron Fairly and Doug Rader provided the offense.

Torres' knocked in three more runs in the nightcap and Jesse Jefferson hurled a six-hit complete game.

A's 3-6, Tigers 1-5 Vida Blue pitched a four-hitter and struck out seven in leading Oakland to its firstgame triumph. Jerry Tabb hit his fourth homer of the year to support Blue, 12-15, who outpitched Detroit rookie standout Dave Rozema, 14-5.

Oakland completed the sweep as Mitchell Page scored from second base on a 10th-inning error by Detroit shortstop Tom Veryzer.
