Crane County Judge Charles Blue, right, and County Auditor Royce Fox rehash their fighting plight with the State Department of Highways and Public Transportation. Fox is heading up the

county's efforts to persuade the state to reconsider its decision not to build a 13-mile four-lane stretch of highway (on U.S. 385) that would run right into Crane.

Kissinger seeks pledges

DAR ES SALAAM, Tanzania (AP) — Secretary of State Henry A. Kissinger, as a follow-up to his talks with southern Africa's white leaders, is seeking two pledges which Rhodesian Prime Minister Ian Smith wants from black leaders, a senior American official in Kissinger's party reports.

One is that all guerrilla action in Rhodesia will be suspended as soon as negotiations begin for a constitution providing for the transfer of power to the black majority.

The second is that the security and interests of Rhodesia's 270,000 whites will be effectively safeguarded when power is transferred to the 6 million blacks.

Kissinger flew to Tanzania today to see President Julius Nyerere after reporting Monday to President Kenneth Kaunda of Zambia on his talks during the weekend with Smith and Prime Minister John Vorster of South Africa.

Meanwhile, Smith met with his cabinet in Salisbury, the Rhodesian capital, to discuss Kissinger's proposals for black rule in Rhodesia. Kissinger's aides expected that Smith would recommend approval of the proposals, and observers in Salisbury said opposition to the prime minister's recommendations was unlikely. But they said he probably would run into trouble with hard-

liners when he puts the proposals before other members of his Rhodesian Front in parliament on Thursday.

The observers in Salisbury also said there was little likelihood the black nationalists would leash their guerrillas, and this would give Smith an escape route if future negotiations didn't go his way.

Nyerere is the leading spokesman for the five black presidents who have been pressing hardest for an end to white rule in Rhodesia, South-West Africa (Namibia) and South Africa. The others are Kaunda, Sir Seretse Khama of Botswana, and two Marxists whom Kissinger is avoiding.

Agostinho Neto of Angola and Samora Machel of Mozambique.

Kaunda apparently did not give Kissinger a clearcut commitment to meet Smith's demands. He told reporters he could not comment without consulting the other presidents.

Kissinger told Kaunda he believed Smith will secure agreement from his supporters for early talks leading to black rule, an African diplomat in Lusaka reported.

The senior U.S. official said a Rhodesian constitutional conference could begin as early as November.

Crane feels cheated by state

By ED TODD
R-T Staff Writer

CRANE — When a man called Blue and another named Fox get their dander up, some colorful, cunning and dead serious things begin to take shape.

Like trying to get Uncle Tex to eat crow, to keep his promises and to build that long-awaited four-lane highway right up and into this fair town — the only town in Crane County.

But Uncle Tex, otherwise known as the State Department of Highways and Public Transportation, apparently ran low on ready cash. And now he's not going to lay down that additional 13-mile stretch of a four-lane highway. Not for awhile, at least.

So, Crane County Judge Charles Blue, County Auditor Royce Fox and a host of other Crane County folks reckon the highway department just

better reconsider its decision not to spend money on the roadway.

But they plan to be tactful in their persuasion.

Here, in short, is what the Crane County movement is up against.

About 3½ years ago, county taxpayers overwhelmingly passed a bond issue, including \$175,000 for buying the right of way, refencing

and making utility adjustments along that 13-mile stretch of U.S. 385 north of Crane.

That was done on promises that the highway department would extend that four-lane segment of the roadway that tapers to a two-lane about midway between Odessa and Crane.

"We've been working constantly on acquiring the right of way," Blue

said Monday. "There's been no slowing down on the county's part."

In fact, the county was so dead certain that that four-lane was coming through, that the people here again last July voted in another bond issue — for \$90,000 — to finish acquiring the right of way, refencing

(Continued on Page 2A)

Price increase slight

WASHINGTON (AP) — Consumer prices rose five-tenths of a per cent during August for the third month in a row, the government said today. A decline in meat prices failed to offset higher costs for most other foods, fuel and clothing.

The increase means inflation is running at an annual rate of 6 per cent, a level in line with the Ford administration's forecast.

At the same time, the Labor Department reported a further shrinkage in the purchasing power of the average workers' paycheck as inflation last month offset a slight increase in pay.

President Ford has claimed that his economic policies have helped cut the inflation rate in half from its 1974

levels. His Democratic challenger, Jimmy Carter, has charged that the current rate still is twice as high as when the Democrats were in office. Price increases averaged 2 per cent in the 1950s and 2.3 per cent during the 1960s.

Consumer price increases were smaller earlier this year but picked up to a 6 per cent rate in the spring. As the pace of inflation quickened, the economic recovery slowed and unemployment began rising again.

Although the administration contends the recovery will continue through next year, the Democrats have attempted to put Ford on the defensive about the economy.

In its August report, the Labor Department said consumer prices

were 5.6 per cent higher than a year ago.

Food prices rose three-tenths of a per cent in August as lower meat prices helped offset increases for fruits, vegetables, dairy products and coffee.

Busy Basin weekend leaves reporter tired

BASIN POINTS—I don't know about you, but I kind of pine for one of those weekends when there's "nothing to do" after dividing the last one among beauties and beastly chills at the Ector County Fair, bratwurst sandwiches and cascarones at St. Ann's Family Fair, tacos and Coahuilan terpsichoreans at the 16th of September fiesta of the Eastside Lions, a private reception for a West coast journalist at Gloria Roden's home in Odessa, and reviews of two new movies in the Basin.

The Girl Scouts of Troop 256 of Odessa were nosed out in the "Lone

Star Championship" chili cook-off Saturday by the outfit from KRIG Radio. (One of the girls—defending champs at Odessa and third-place winners among 25 states last year at Tropic, Calif.—told me their secret ingredient was "love," but I guess something a little spicier was needed this year.) Personally, I found a huge improvement in the quality of the massed bowls of red—a direct result, I think, of chiliodycy spawned by the Terlingua madness ten years ago. There wasn't an inedible offering among the 27 entries—and that may be a new record.

One world record was thought to have been set when we held the cookoff in Barn E at the Ector Fairgrounds as rain threatened.

The bodacious bunch from UTPB carried off showmanship honors with acts featuring the golden chords (vocal and guitar) of Bill Irvin, and the "Beaver Bunch" from an Odessa hospital may have set another record by earning what may have been the first "Bad Taste" award for a skit that involved a miscarriage by a transvestite in an elevator.

Beckie Bewley upheld family traditions by garnering the queen's crown, but she admitted at a reception later that the sultry voice that contributed to her win was just the result of a summer cold.

Across the Basin, Elida Ochoa was presented to a huge crowd of admirers during the 16th of September round-up activities Sunday night, and her red roses and white and blue gown

Rosalynn undaunted by Carter's remarks

NEW YORK (AP) — Jimmy Carter's wife says his statements that he has "looked on a lot of women with lust" and "committed adultery in my heart" have caused her no anxiety about his fidelity.

Rosalynn Carter said Monday that although her husband's candid remarks to a Playboy magazine interviewer came as a surprise, "I trust him completely. I've never had to worry about that at all."

Asserting in the interview that he would not attempt to impose his own religious beliefs on others, the Democratic presidential nominee said, "Christ set some almost impossible standards for us." He added that to sin is human and

"God forgives me for it."

In one excerpt from the interview to be published in Playboy's November issue, Carter said:

"I've looked on a lot of women with lust. I've committed adultery in my heart many times. This is something that God recognizes I will do — and I have done it — and God forgives me for it. But that doesn't mean that I condemn someone who not only looks on a woman with lust, but who leaves his wife and shacks up with somebody out of wedlock."

Mrs. Carter, in New York Monday to tape a television interview, said her husband was attempting to explain the Christian religion, "that God doesn't expect everyone to be perfect."

Bob Corley outlines six-point platform

By JUDY JOHNSTON

Popular election of federal judges and of state insurance and utility commissioners is the first step to returning to government by the people, according to R. L. "Bob" Corley Democratic candidate for 68th District State Representative.

In his first press conference after the announcement of his candidacy, Corley outlined his "six-point program" of goals he hopes to achieve if elected.

Corley was appointed to run for the slot left vacant when John Billingsley announced that he had dropped from the race. The appointment was made by the four Democratic chairmen of the district. Corley is running against incumbent Tom Craddick.

In addition to popular election of

Diplomat's car bombed; two killed

WASHINGTON (AP) — The former Chilean ambassador to the United States and a woman colleague were killed today when a bomb exploded in their car as it passed near the Chilean Embassy, hospital officials said.

Another person was seriously injured in the blast.

The two persons killed were identified as Orlando Letelier, 44, ambassador during the regime of the late Marxist President Salvador Allende, and Ronnie Karpen Moffitt, who worked with Letelier at a research institute. Mrs. Moffitt's husband was injured in the blast.

Officials at George Washington Hospital said a bomb caused the explosion.

Police said the blast ripped the metal siding off the drivers' door and twisted the hood and roof of the car.

Letelier was director of the Trans National Institute, a division of the Washington-based research organization Institute for Policy Studies. He also taught at American University. Mrs. Moffitt, 25, was a staff member of the institute. In his

Where the money goes

EDITOR'S NOTE: The Midland Community Action Agency has been in operation since 1966. During the ensuing 10 years, it received little public attention until events of recent weeks indicated the agency was having problems.

This series of articles examines the functions, operations and problems of the agency.

By SAM RENNICK

"To provide a vehicle for effective, cooperative citizens' action designed to further the health, growth and development of Midland County, including the city of Midland, Tex., is the purpose of the Midland Community Action Agency (MCAA), as stated in Article II of the agency's bylaws.

This purpose is to be realized by: (1) Analyzing carefully the health, recreation, character building and welfare needs of all the people therein" and "(2) Exerting voluntary leadership in the planning and coordination of efficient and economical programs of prevention and service."

Leland Ammons of the Community Services Administration (CSA) in Dallas said the agency's annual \$33,000 grant is intended for general community programming. In his

fiscal 1974 audit, Andrew Reed, CPA, wrote: "MCAA, Inc. received OEO Grant No. 61054 (Fund Source P. FFY 75, Action 03) totaling \$33,000 to operate a General Community Program (Program A/co5-Neighborhood Centers)."

Third of a series

MCAA has neighborhood centers in east, south and southeast Midland. The director of the eastside center, located at 1411 Garden Lane, is Santa Morales. She said the center runs sewing classes, distributes donated clothing, fills out welfare forms, food

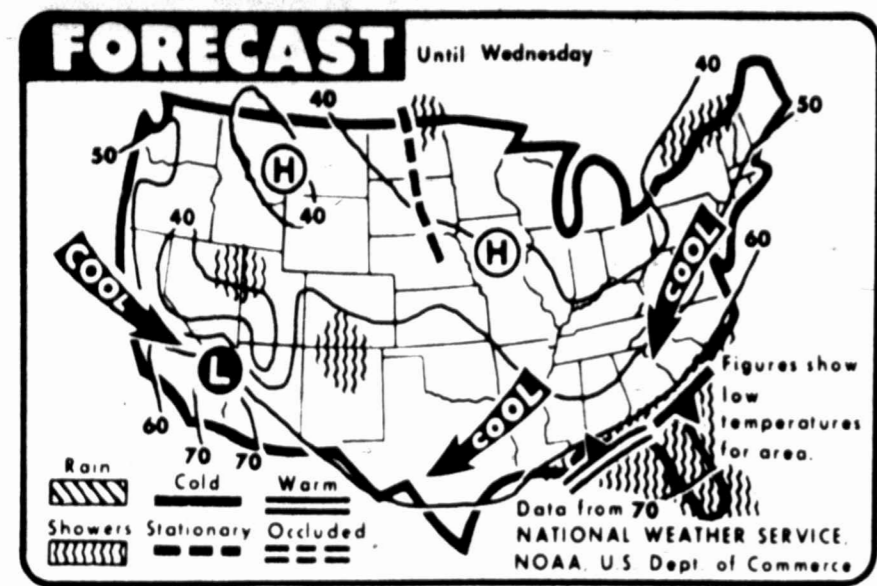

stamp applications, income taxes and social security papers, handles legal aid referral and voter registration, places maids, transports senior citizens and does Outreach work for the Texas Commission for the Blind. It also serves as a meeting place for the Eastside Association, which meets monthly.

Morales' salary for June, 1976, as listed on the financial statement for that month, was \$325. The southside director is Juanita Garza; the statement lists her as receiving \$318.

WEATHER SUMMARY

COOLER WEATHER is forecast from the central Rockies to the Tennessee Valley. Warm weather is expected for Florida and mild

weather elsewhere. Showers are forecast from the eastern Gulf to the south Atlantic coast.

MIDLAND STATISTICS

MIDLAND (ODessa, LAMESA, RANKIN, BIG LAKE, GARDEN CITY) Early cloudy and a little warmer through Wednesday. Low tonight near 60. High Wednesday upper 80s. Northern winds light and variable tonight.

Weather elsewhere

Table listing weather conditions for various cities including Atlanta, Albuquerque, Amarillo, and others, with columns for high and low temperatures.

Extended Texas forecast

Thursday through Saturday: North Texas: Clear to partly cloudy with slowly rising temperatures. Thursday through Saturday. Highest temperatures in the 80s. Lowest temperatures in the 50s.

Texas area forecasts

North Texas: Mostly fair through Wednesday. Cooler tonight. Low tonight 52 to 58. High Wednesday 78 to 88. South Texas: Generally fair and cool tonight. High tonight and mid 80s. Low tonight 55 to 65. High Wednesday 78 to 88.

Problems for flu inoculation are evident in Permian Basin

By JUDY JOHNSTON. The vague, hasty and seemingly uncoordinated aura surrounding the conception and distribution of the federal government's swine flu vaccination program has reached Midland.

region with population greater than 50,000. When the vaccine does come in, the health department will furnish it to the public free and to doctors, who may then supply it to private patients.

MCAA funds: its comings, goings

(Continued from Page 1) Southeast center director is Myrtle Hall, who received \$470 for the month. (Hall was made temporary executive director of MCAA at the Aug. 26 meeting, when the board of directors fired executive director Carol Burns.

persons, most of them kids, Taylor said. A special program, it includes classes and counseling. Participants also help senior citizens by doing such things as yard work. All in the program are from poor families and come through the Human Resource Center, in the county courthouse annex.

education, recreational and physical fitness instruction during summer months" and "(2) to provide supervision and parent involvement and related educational and counseling for youths enrolled in program."

MCAA from the Governor's Office on Aging, through PBRPC. Bill Smith, director of the regional office on aging at PBRPC, said MCAA ultimately received only \$1,705 of this allocation.

Two janitors are on the June 1976 statement. Other items include payment of loans amounting to \$7,340, rental to the Midland Independent School District, IBM copy and a salary to "MCAA Special OJT." Also, a salary of \$136 is listed for Ora Lee Gary. Total expenses, not including the \$7,340 payment of loans, comes to \$2,874.

A \$6,452 grant, from TDCA through West Texas Opportunities (WTO), Lamesa, was for a summer recreation youth program this summer. A similar program last summer was based on a grant of \$6,184.

And with arguments well rehearsed, Blue and his force will appear before the State Highway and Public Transportation Commission in Austin on the morning of Sept. 29.

headed, for instance, for Lake Amistad along the Texas-Mexico border at Del Rio and other places to the south.

Funds for manpower programs, other than migrant manpower, do not go into salaries. "All manpower money is for participants," said Willie Taylor, director of manpower at PBRPC.

started digging in, they contacted chambers of commerce, oil field service companies, hospitals and most anybody of any influence to bolster the county's cause.

DEAR ABBY

He treats 'illegitimate' children as his own

By ABIGAIL VAN BUREN

DEAR ABBY: I was recently granted a divorce after being married for 30 years. I had a lot of suspicions about my wife, but I had only a second grade education and was pretty dumb then. I didn't begin to add things up until after she had two children who couldn't possibly have been mine. Even so, I was always a good father to them, and they never had any idea they were illegitimate.

My question: I'm making out my will and have brothers and sisters who could sure use some money. I own my own home plus some stocks and savings, and I don't see why I should leave anything to my illegitimate children, do you? Who should be punished?—A PROBLEM OUT EAST

DEAR PROBLEM: Any children born during your marriage are legally your children. You say you've been a "good father," and I believe you. But how can you write off all the years during which they grew up loving you and being loved in return?

To leave them nothing would be punishing them for the "sins" of their mother. Unfair. Please reconsider.

DEAR ABBY: I graduated from high school last June and received some very nice gifts from friends and relatives.

Since I've had a very busy summer and hate to write letters, I decided to telephone all those who sent me gifts to thank them personally. I even called long-distance to thank those

who live out of town, and I intend to pay for the calls myself.

My parents aren't satisfied. They think a written thank-you note is necessary. I think a telephone call is enough. What do you think?—

WOMEN'S NEWS

PHONED MY THANKS

DEAR PHONED: Phoning one's thanks strikes me as the lazy man's way. It's adequate; but those who do it right write!

DEAR ABBY: I received an invitation to a golden wedding anniversary party. I am only an acquaintance, not a dear friend or relative, but I was told by a relative of

the celebrating couple to bring money rather than a gift because the golden wedding couple are having a money tree. With the money collected, they plan to take a cruise.

I asked how much I would be expected to contribute and was told, "At least a dollar for every year the couple have been married."

Abby, that's a minimum of \$50—as much as I gave my own niece for a wedding present!

What do you think?—PASADENA READER

DEAR PASADENA: I think you should give whatever you feel is appropriate and no more.

Everyone has a problem. What's yours? For a personal reply, write to ABBY in care of this newspaper. Enclose stamped, self-addressed envelope, please.

University women to hear Jena, Ortloff engineer

The Midland Branch of the American Association of University Women will have its first meeting of the 1976-77 club year at 7:30 p.m. Thursday in the Midland Room of The Midland National Bank.

Robbie Jena, electrical engineer in the Instruments and Electrical Department for the Ortloff Corp., will speak on "The Creative Individual in Society."

A native of Cuttack, India, Jena came to America to pursue his engineering career. He and his family moved to Midland from Baton Rouge, La. He teaches a class on yoga and meditation at Midland College. Swami Nikhilananda of India instructed Jena in the ancient cultural system more.

Jena's background also includes editor of a technical journal in college and a published editorial on conservation in Monroe, La.

Robbie Jena

SORORITY NEWS

Rush chairman of the Beta Eta Chapter of Epsilon Sigma Alpha, Mrs. Reggie Medley, announced the rush calendar for the sorority at a business meeting of the group.

The rush theme, "Once Upon a Time," will be followed in several special events for couples, members and rushees during the next month.

A report on the Texas State Council Leadership Seminar held in August was presented, with members asked to begin making plans to attend the state convention in May 1977 at Austin.

Educational director, Mrs. Dan Cotten, presented the format to be used for educational program during 1976-77. Using the theme "Take Time for Your Home 20" members will learn ways to spend their time more wisely in activities offered in Midland. Subjects to be covered include educational opportunities, community involvement activities, personal growth and development and entertainment.

Mrs. Clarence Grant, chapter president, presented each member with yearbooks for the new club year. Members also discussed summer activities and plans for the upcoming year.

Mrs. Frank Felts was hostess and Mrs. Grant was co-hostess. Introduced as a guest was Mrs. Sam Marrill.

Members of Beta Omega Chapter of Epsilon Sigma Alpha met in the home of Mrs. Sam Daugherty, 709 Lanham St.

The educational program for the year, "Come Out of Your Shell, Learn a New Skill," was discussed by Mrs. Tony Katoan, educational director. The program for the month, "Basics of Dough Art," was presented by Mrs. Gene Coppedge.

Secret sisters were revealed in a gift exchange.

A First Pearl Award was given to first year member, Mrs. Craig Holly. Mrs. David Wood announced that fall rush, "Happy Days," will begin today with a fondue and wine-tasting party in her home, 3206 Cimmaron St. Mrs. Daugherty, chaplain, gave the benediction.

MRS. C. D. "BUD" MARTIN, serves her husband, backyard picnic held by the Midland Lawyers Wives at the Tighe residence, 1509 Princeton St.

The first activity of the Midland Lawyers Wives to open the fall season was a membership buffet supper held at the home of Mr. and Mrs. Charles Tighe.

Robert B. Ross, first vice president; Mrs. C. D. "Bud" Martin, second vice president; Mrs. James Isbell, third vice president; Mrs. Richard Gibson, secretary; Mrs. Scott Shelton, corresponding secretary; Mrs. George Patterson, treasurer; Mrs.

Robert Dawson, telephone chairman; Mrs. Walter Hall, parliamentarian; and Mrs. Jim Brown, publicity.

Lawyers' wives new to the Midland area may contact Mrs. Baskin about membership in the group.

AT WIT'S END People make great pets

By ERMA BOMBECK
My name is Murray Bombeck and I'm a guest columnist.
I'm a 3 1/2 month old Yorkshire Terrier.
There are a lot of dogs who are wondering whether they want to own a person. They like people. They're fun to be around, but are they worth all the fuss and bother.
I felt the same way when a few months ago I observed this couple. Their dog (another Yorkshire) had just been killed and frankly, they were a psychological mess. During the interview, they kept calling me "Harry" (the deceased dog's name) and the woman kept swooping me off the floor and crying in my fur. They would take a lot of training.
First nights are generally a

disaster. At 11 o'clock at night just when things are beginning to cook, they turn off the lights and go to bed. (I had been warned by other person owners that this would happen.) I tried to keep them on their feet all night but things like this happen. Old habits are hard to break.
Another thing you have to know about people is that you have to keep them busy or they drive you crazy. Every time I ate a houseplant, they were there. When I chewed on shoes, they were there. They were smothering me. Once when I went into the white living room to go to the bathroom, she came in, swooped me up, ran around hysterically finding a key to the back door, opened it up and heaved me out onto the grass.

You cannot imagine what turned her on.
When I "performed" she jumped up and down and clapped her hands while summoning three other people from the house to observe. I felt like a fool.
The hardest part of training a person, however, is discipline. You have to be firm with people or they'll run all over you. When they want to play by grabbing your nose, at first you just walk off, but when they pursue it, you just sink your teeth into their hands. They may look shocked and hurt at first, but you'll eventually have a person you don't have to be ashamed to take places.
And lastly, be careful the first time you take them out in public. They wander away from you.

Mrs. Icie Morris, 78, honored with reunion

The family of Mrs. Icie Patricia Morris, formerly of Midland, now a resident of Los Angeles, Calif., was honored on her 78th birthday with a family reunion in the home of her grandson, R. J. Morris of 507 S. Madison St.
Attending were the honoree's

daughters, Mrs. Dawson Potts and Mrs. Tommy Young, both of Los Angeles; Mrs. Sylvia Baldwin of Cleveland, Ohio, and Mrs. Ernest Cross of Mineral Wells. Also present were 15 grandchildren, 11 great-grandchildren, eight great-great-grandchildren and other friends and relatives.
Parents of children in grades 1-3 will meet today and those with students in grades 4-6 will meet Thursday.
It was erroneously reported in Sunday's edition of The Reporter-Telegram these meetings would be held Tuesday and Wednesday.

HOROSCOPE

By CARROLL RIGTER (Wed. Sept. 22)
GENERAL TENDENCIES: A day when you can wisely spend your time getting rid of items and details that are considered to be unimportant, but which require your attention. Be more exact in your dealings.
ARIES (Mar. 21 to Apr. 19) Handle routine duties important to your welfare. Take time to improve your appearance. Make the evening a happy one.
TAURUS (Apr. 20 to May 20) Bring your finest talents to the attention of a higher-up. Also, be conscientious in the handling of important matters. Be wise.
GEMINI (May 21 to June 21) Study your surroundings well and see what is to be done to improve it. Obtain the data you need from the right sources.
MOON CHILDREN (June 22 to July 21) Attend to regular duties early so you will have time for more important matters later. Don't be too extravagant.
LEO (July 22 to Aug. 21) Stop daydreaming about big deals and get down to the practical side of life. Find better ways of increasing your income.
VIRGO (Aug. 22 to Sept. 22) Be sure your personal life is better organized so the future will be brighter. Dress in good taste and make a fine impression on others.
LIBRA (Sept. 23 to Oct. 22) Think of the best way to gain your wishes so that you can be happier in the future. Show increased devotion to the one you love.
SCORPIO (Oct. 23 to Nov. 21) Put extra effort on whatever it is you want to attain. Show more affection for your friends and gain their goodwill.
SAGITTARIUS (Nov. 22 to Dec. 21) You have an opportunity to add to your prestige via a new situation that arises today. Think constructively.
CAPRICORN (Dec. 22 to Jan. 20) Make new contacts with those who can help you advance in your line of endeavor. A meeting of minds brings greater success.
AQUARIUS (Jan. 21 to Feb. 18) Find the right methods through which you can take care of your obligations more intelligently. Show more devotion to mate.
PISCES (Feb. 19 to Mar. 20) Put those fine talents to work now that will bring you more success in the future. Join with friends at amusements you enjoy.

City girl pledges

LUBBOCK — Belle Battle, daughter of Mr. and Mrs. L. Hal Battle of Midland, has pledged Delta Delta Delta sorority at Texas Tech University.

Dr. Thomas K. Kim

McMurry president to speak

Dr. Thomas K. Kim, president of McMurry College, will be the speaker for the Constitution Week luncheon to be held at noon Thursday by the Col. Theunis Dey and Lt. William Brewer Chapters, Daughters of the American Revolution, in Midland Country Club.

Dr. Kim, who received the DAR Americanism Award in 1974 from the John Davis Chapter, DAR, Abilene, for being an outstanding naturalized citizen, was born in Shanghai, China, and came to the United States in 1948 to attend Berea College in Kentucky. He became an American citizen in 1960.

Dr. Kim was a professor of economics on the Texas Tech University faculty before becoming president of McMurry College in 1970. As chairman of the faculty at Tech, he assisted in the re-organization of the faculty and curriculum in the School of Business Administration. He received his Ph.D. in economics from Tulane University, and was awarded an honorary Doctorate of Humanities by Southwestern University.

A ray of hope

The earth may not have been shaken by the words from Moscow, but the anonymous assessment of the 17-month civil war in Lebanon in the official Communist newspaper hinted at a flexing of global muscle to restore peace.

The article in Pravda was critical of leftists who have rejected peace proposals in the troubled nation and deplored outside intervention by Syria and Palestinians.

"The only way to restore peaceful life is a political solution on the basis of reasonable compromise," the article continued.

The Soviet Union cannot impose a settlement, of course, but it can help open the door to the sort of "dialogue" urged in the Pravda item. The United States should put a foot into the opening.

The conflict in Lebanon is sustained largely through Soviet and American arms. The reluctance to resort to "outside pressure" emphasized in the article should not extend, certainly, to a cooperative effort to ease the pressures by phasing out the shipment of military hardware.

And if the Russians are sincere in their desire for a "peaceful, democratic solution," the United States should exploit the gesture.

The struggle in Lebanon involves more than religious differences. Economic factors have been influential in encouraging Syrian intervention. The tensions continue to jeopardize the entire Middle East tinderbox.

Pleas for reason from the Soviet Union are rare. In this instance, they concede that Moscow and Washington share concern.

The Pravda article insists that "the Lebanese themselves" must resolve their differences.

But a little constructive help from the major powers seems possible and in order.

Top rural minister

Congratulations are in order for the Rev. Carl Treat, pastor of the First United Methodist Church of Crane and one of the Methodist Church at Imperial, who has been selected as "Texas' Rural Minister of the Year."

The award is said to honor those ministers "who make outstanding contributions to rural life."

Selection is based on participation of the minister and his church in community activities and his efforts toward agricultural improvement.

And from all accounts, Mr. Treat is exceptionally well qualified to receive the honor. He is an active member of the Crane Noon Lions Club and has worked closely with other groups in practically all phases of community activity. He is a member of the 4-H Leaders Association and 4-H Parents Committee and has assisted the Crane County extension agent in numerous projects. He has served as president, player agent and score keeper of the Little League.

Mr. Treat, incidentally, was reared on a cotton, alfalfa and bean farm near Deming, N.M.

A top citizen of his community, Mr. Treat certainly merits the honor which has been bestowed upon him.

Pact long overdue

The new agreement between the United Nations Command and North Korea providing for elimination of intermingling of hostile personnel in the Panmunjom truce village should have been effected long ago.

North Korean objections to the plan apparently have been overcome by disapproval in Moscow and Peking over the killing of two U.S. Army officers in an incident last month that prompted a show of American force in the area.

Even the most optimistic of American diplomatic and military representatives concede that they are no more than "hopeful" that the new pact will prevent further clashes.

But separation of the opposing forces along a strict line of demarcation is the only sensible answer to the simmering tensions which have lingered in the "neutral" zone since the conflict of 1950-53.

NICK THIMMESCH Carter all-out in pursuit of Catholic ethnic vote

WASHINGTON — Jimmy Carter sweats in the hot afternoon sun to reclaim those amorphous millions whom political writers and other fretters solemnly describe as the Catholic ethnic vote, here listed, for brevity's sake, as the C-E's.

Carter toils because the seers proclaim that considerable vote is squishy soft, but can be nudged back to Democracy by folksy neighborhood campaigning. This implies the C-E's possess only the mind power of an amoeba.

Anyway, last week Carter was seen in one of Baltimore's more ethnic corridors, trafficking thickly with the hyphenated Poles, Italians and Greeks and displaying his teeth to full exposure.

That night, he was in Washington, D.C., for the Italian-American Bicentennial dinner, where some of Italy's most famous American sons (Judge John Sirica, Rep. Peter Rodino, Sen. John Pastore, Ambassador John Volpe and President Lyndon Johnson's favorite courtier, Jack Valenti) were in attendance. So was Carter's E-N (Ethnic-Nun), Sister Victoria Mongiardo, a Trinitarian, who appeared in a sleeveless blue evening dress for the festivities. Sister Mongiardo, habitless, is in charge of Carter's "Ethnic-Desk."

Carter was warned by the close presence of all those real live C-E's that day, and also by the "neutrality" statement of the National Conference of Catholic Bishops, whom, no doubt, Free-Masons, Abortion-Righters, and Women's Libbers had suspected

though both sides were using his appearance as an excuse to picket, and not allow the Right-to-Lifers to leave the impression Carter was being hounded everywhere for his views on this question," the campaign officer explained.

This kind of tomfoolery can only be created in an election year. Carter needs the C-E's votes which professional politicians declare belong to him, not Mr. Ford, but which went to Richard Nixon in 1972. They went that way because Democratic elitists ignored: the hard-hats whose taxes pay for welfare programs; the people whose children are based on orders from judges who schooled at Harvard and other holy places; the prosaic folks who play bingo, tend their flowers and go to Sunday Mass just the way they have for a generation or two in the big cities.

Nelson Rockefeller got their votes, and so did some other Republicans who paid attention to them, and so did Nixon because these people didn't trust George McGovern after what was said about him.

Mr. Ford will never say that he can win the C-E's because Nixon got them, but that surely is the reason for his ardent interest. No Republican candidate for President can win without taking a big chunk of independent and Democratic voters, and Mr. Ford knows he must win them in the "swing" states.

The "swing" states happen to have large Catholic populations, and I'm not sure that Mr. Ford thought of this as he left the Italian-American dinner

Blunt, blistering accusation

and even Saudi Arabia itself.

The secret memo quotes Yamani as saying tersely "that the talk of eternal friendship between Iran and the United States was nauseating to him and other Saudis. They knew the Shah was a megalomaniac, that he was highly unstable mentally and if we didn't recognize this, there must be something wrong with our powers of observation."

The respected Saudi oil minister, Ahmed Zaki Yamani, warned that the shah was "highly unstable mentally." If the U.S. authorities failed to recognize this, added Yamani, they must be losing their "powers of observation."

The Saudis confided their fears last year to James E. Akins, then the U.S. ambassador, who relayed the message to Washington in startling secret letters and memos.

One "memorandum for the file," dated Aug. 28, 1975, describes the explosive conversation with Yamani. The oil minister, according to the secret memo, said "the conclusion the Saudis were reaching was that we had an agreement with Iran to let it take over the entire Arabian littoral of the Persian Gulf."

Yamani believed the United States "had urged the shah to make peace with Iraq," Akins added, "so Iran would have a freer hand in the lower Gulf."

The Saudi oil minister was convinced that the United States was deliberately bolstering the shah's military power and that "Iran's extraordinary military buildup was quite clearly aimed at occupying the Arab states across the Gulf, the Emirates, Qatar, Bahrain, Kuwait

By JACK ANDERSON with LES WHITTEN

ART BUCHWALD Here's how system of leaks really works

WASHINGTON — Last week's House Ethics Committee hearings in which Daniel Schorr was asked to reveal the name of the person who gave him the Pike CIA Report was a big flop. The reason was that Mr. Schorr refused to tell his source and the committee, which had spent \$150,000 trying to find the culpable person, was still left in the dark as to how the report got into Mr. Schorr's hands.

A few of the committee members questioned Mr. Schorr's patriotism and others raised constitutional issues of Congress' "right to know." But what wasn't mentioned during the hearings is that trafficking in and passing on of top secret and classified information is an essential part of running the government and one that very few people in Washington would like to see abolished.

This is how the system works.

Every morning when I come to work I find a batch of top secret documents under my door. My secretary goes through them and throws most of them away, considering them "junk secrets" that I wouldn't be interested in. Then she briefs me on the ones that she believes might have some merit.

Here's a classified document from the Pentagon saying the Soviets have developed a new laser-guided bulldozer that could destroy every mobile home in America.

"Isn't the Pentagon going up on the Hill tomorrow to testify on its new defense budget?" I ask her.

"Yes, they are, and they've been reported," that the scientific standards "are still appropriate" and that the problems raised "had been resolved."

"In light of recent developments," confessed Train, "these assumptions are now questionable."

Under prodding from Kennedy, the Environmental Protection Agency has been re-registering pesticides. For this, the agency has been compelled to rely on the pesticide industry's tests. As we reported in an earlier column, the EPA has almost no testing facilities of its own.

The test results, therefore, are uncertain and incomplete. Many pesticides, in fact, were registered by the Agriculture Department before the EPA was established. No tests were required of these pesticides to determine whether they caused cancer, birth defects or gene mutations. These tests are now required by law.

EPA has been telling manufacturers, therefore, that they must conduct additional tests to comply with today's more stringent standards.

The whole pesticide testing program is in such chaos that EPA has abruptly shut down its registration program. Earlier this month, some of EPA's top brass met at the Annapolis Hilton Hotel outside Washington to figure out what to do.

WATCH ON WASTE: The National Endowment for the Arts, which provides government grants to assist individual art projects, operates on a stringent budget. At least this is what its officials tell applicants whose grant proposals are denied.

But the agency isn't quite so penny-pinching when it comes to the expenses of the top brass. A few weeks ago, the National Endowment's public relations director, Florence Lowe, flew from Washington to Los Angeles on official business. Her luggage, however, remained in Washington.

There was an urgent call for the suitcase, which was rushed across country to the impatient Mrs. Lowe. It cost the taxpayers \$18.90 to fly the bag to Los Angeles. The special delivery charges to haul the suitcase from the airport to the posh Beverly Wilshire Hotel cost even more. The taxpayers had to shell out an additional \$23.85.

All told, the misplaced suitcase cost the taxpayers \$42.75. Mrs. Lowe explained that it wasn't her fault the suitcase was left behind and that it contained documents she needed for her Los Angeles meeting.

Art Buchwald

inundating the media with top secret material on Soviet military strength. Everyone in town is on their list."

"I don't know if I should use this or not. I don't want to endanger my country's defenses."

"There was a covering letter with it," she says. "It reads, 'While this information has been classified Top Secret, we would like to remind you that the First Amendment gives you full protection to use it.'"

"They must be pretty desperate to get their budget. What else do you have?"

"I have a classified report from the CIA revealing their covert operations at Disneyland."

"Why would they send us that?" I ask.

"It was subpoenaed by Congress last week and if we print it, the CIA can say, 'You see what happens when we give the House of Representatives secret information.'"

"They're not very subtle," I said. "The CIA is going to have to come up with a better ploy than that if they expect me to play their game."

"I didn't think you'd buy it," she said. "Oh, by the way, we just got a confidential transcript of Henry Kissinger's talks with the King of Morocco."

"I wonder who sent it to us?"

"I don't know," she replies, "but there is a note on the top which says, 'If you use any part of this transcript, I'll tap your telephone. Best to your wife H.'"

"He probably sent the same stuff to Jack Anderson. What did the White House leak to us today?"

"Jimmy Carter's income tax returns and the FBI sent us over a classified file on the Socialist Workers' Party plans to disrupt the swine flu program."

"Anything else?"

"The Navy sent us a secret report on what a waste of money the B-1 bomber really is, and the Air Force sent us a 'For Eyes Only' study on how vulnerable the new Navy nuclear carrier can be. Treasury is blowing the whistle on the Federal Reserve Board's monetary policies, and Agriculture sent us over a top secret document on the State Department's plans to put a wheat embargo on Iceland."

"It doesn't seem like much of a day for violating national security."

"I agree. Oh, there was one call from the House Ethics committee. They wanted to know if you were interested in their top secret discussions on whether to impeach Dan Schorr or not. They've decided if they can leak them, it will get them off the hook with the rest of the press."

THE BIBLE CAN YOU QUOTE IT?

By LAVINA ROSS FOWLER

1. The miracle story of the feeding of the 5,000 with five barley loaves and two fishes, is the only one recorded in all four Gospels. The gathering of the twelve remaining baskets is an indication of God's unstinting generosity and love. One Gospel suggests that there were more than 5,000. Which? Mt. 14, Mk. 6, Lk. 9, Jn. 6.

2. This story is a symbolic forerunner of what great sacrament? Mt. 26, Mk. 14, Lk. 22:20.

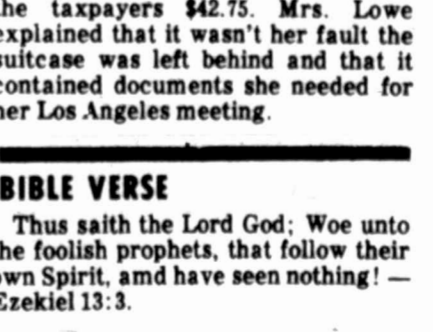

3. Who followed David as king of Israel? I Chron. 29:1.

4. How long after Paul's conversion did he make his visit to Jerusalem? Gal. 1:18.

5. "For whom the Lord loveth, he —" Proverbs 3:12.

Four correct...excellent. Three correct...good.

BROADSIDES YOUR CONGRESSMAN SHOULD BE JUST AS GOOD AS YOU ARE!

TAKING AIM, Rhodesian army scouts practice firing at the gallop at a training camp near Salisbury recently. The Rhodesians hope their new cavalry will give them speed, mobility and surprise in their war against the black nationalist guerrilla movement.

Assassination committee begins

The Los Angeles Times
 WASHINGTON — Hoping to finesse a congressional rule that could put it out of business in less than four months, a new House committee on assassinations plans to start as soon as possible its probe of the murders of John F. Kennedy and Martin Luther King.

Rep. Thomas N. Downing (D-Va.), selected by Speaker Carl Albert to head the 12-member panel, said Monday he hopes to pick a staff by next week and to begin closed-door screening of witnesses in mid-October.

Under House rules, special committees such as Downing's expire automatically with the end of the Congress that established them. This means that for the panel to accomplish anything at all, the House must vote next January to recreate it.

Downing was asked in an interview why advocates of the investigation did not wait and make their move in January.

"To get going," he responded. "We've been sitting around here now for almost 13 years. We can certainly get organized and get our priorities straight so that all you have to do is turn the key in the ignition in January."

Downing said he anticipates a more-or-less routine vote to re-establish the committee when the next Congress convenes.

But Rep. B. F. Sisk (D-Calif.), who

led the opposition which delayed creation of the committee for most of the current two-year session of the Congress, may try again in January to block the probe, which he calls a waste of tax dollars. The probe was authorized by a 280-65 vote last Friday.

An aide said Sisk would "more than likely" oppose recreation of the committee next year.

The vote to establish the committee resulted from marriage of convenience between lawmakers who wanted to reopen the investigation of the Kennedy killing and those who wanted to probe the death of King. There were signs the coalition is already starting to fray.

Downing, who originally had hoped to investigate the presidential assassination, said the committee would "take them in order, Kennedy first and then King."

But Delegate Walter E. Fauntroy (D-D.C.) said he planned to push for simultaneous investigations using separate subcommittees.

Fauntroy, a former aide to King, is the unofficial leader of a contingent of the Congressional Black Caucus which joined with Downing in overcoming the opposition of the House Rules Committee, which had blocked the proposed investigation.

Neither Downing nor Fauntroy would discuss in detail the evidence they hope the investigation will develop. But Fauntroy confirmed that motion picture writer-producer Abby

Mann would be a witness in the King phase of the investigation.

Mann, who is working on a television film on King's life, told Fauntroy that he had discovered that a Memphis detective who had been assigned as a bodyguard for King was pulled off the job shortly before the civil rights leader was killed.

"Mr. Mann's findings were of key significance in reversing the decision of the Rules Committee," Fauntroy said.

King was shot April 4, 1968 in Memphis. James Earl Ray pleaded guilty to the murder and was sentenced to 99 years in prison. Ray has since attempted without success to repudiate the guilty plea and obtain a trial.

Kennedy was shot Nov. 22, 1963 in Dallas. The Warren Commission concluded that Lee Harvey Oswald was the lone assassin. Oswald was killed by Jack Ruby two days after the assassination.

Panamanian students protest food prices

The Washington Post

PANAMA CITY — National guardsmen used tear gas and clubs to break up an anti-government demonstration by Panamanian University students Monday, arresting about 50 persons.

The noon disturbance, which involved about 250 persons, opened the second week of unrest here over several issues that Panamanian officials have blamed on the United States. Three persons, two of them American citizens, remain under arrest in connection with downtown looting and rioting last Wednesday. The Panamanian government has said that the Americans, both 18, are military intelligence officers.

motorcycle policemen nearby walls. "They only want food for their families," said an old man watching the five-block police manhandle the students into waiting vans. "I can't understand why the general is responding like this."

The demonstration began Sept. 10 when pro-government high school students clashed with an anti-government group with the bourgeois repression" and "Reduce the cost of living." Several of them spray-painted the words rice and milk, staples of the Panamanian diet.

Ex-boss defends Yale lecturer

NEW HAVEN, Conn. (AP) — A Yale University lecturer, who resigned after it was revealed that he had worked for the Nazis in World War II Russia, was a competent teacher who was told there was no basis for firing him, his former department head says.

Vladimir Sokolov-Samarin, 63, offered his resignation July 20 after his activities were detailed in a Russian journal and four colleagues wrote him a letter expressing moral opposition to his work in a Soviet city occupied by the German army. He had taught Russian literature at Yale for 17 years.

This right was conveyed to him," Robert Jackson, chairman of the Department of Slavic Languages and Literature, said Monday. "It is true that he would have faced an un congenial departmental atmosphere, but I think any person has to bear responsibility for his past."

Jackson said a Yale teacher can be dismissed only for incompetence, immoral behavior or using the classroom for propaganda purposes.

The reasons for Sokolov-Samarin's resignation were made public by the Yale Daily News, which published an interview with him on Monday.

Sokolov-Samarin has admitted writing anti-Semitic editorials in 1943 for "Rech," a pro-Nazi newspaper published in the occupied Soviet town of Oriol. He said his main purpose was to denounce communism, but that a Nazi censor forced him to attack Jews as well.

Prof. Edward Stankiewicz, one of four members of the Slavic department who wrote a critical letter to Sokolov-Samarin over the summer, said the purpose had been to "indicate personal indignation."

"We were fully aware, of course, as individuals that such a letter would constitute pressure. But that letter was never intended to pressure him into resigning."

Sokolov-Samarin told the Yale Daily News that "when such pressure occurs, there is nothing to do but resign. It would have been unpleasant for me, unpleasant for the university. I love the university, but..."

Sokolov-Samarin, who has been in poor health, said he had planned to retire in two years and said he now in-

tends to write his memoirs.

Jackson said his department came under pressure during the summer from Jews and others to fire Sokolov-Samarin and that the department was in "an extremely difficult situation."

"Had Mr. Samarin decided to stay on there isn't any question in my mind that the university and the department would have been under tremendous pressure" to take action against him, Jackson said.

Alexander Schenker, a Yale linguistics professor, defended Sokolov-Samarin, saying he had suffered greatly in Russia from 1929 to 1941. He said Sokolov-Samarin had been arrested, risked going to concentration camps and saw the German occupation as a chance to escape.

Carrillo says charges false

JOURDANTON, Tex. (AP) — Former State Rep. Oscar Carrillo of Duval County said Monday the theft charges against him are part of a conspiracy against the once-politically powerful Carrillo family of South Texas.

Asked by Asst. Texas Atty. Gen. Gerald Carruth if he believes the charges and the witnesses who testified against him are part of a conspiracy, Carrillo shouted "Everyone and the judge."

District Court Judge Darrell Hester of Brownsville said "Calm down, everyone."

The former legislator is being tried on a charge of stealing about \$200 worth of postage from a meter machine at the Benavides Independent School District office to mail campaign literature in 1972. At that time, he was opposing incumbent State Sen. John Traeger of Seguin in an attempt to gain election to the Texas Senate.

Carrillo told Carruth he would like for the witnesses against him to take polygraph (lie detector) tests "and we'll see who's telling the truth."

Testimony in the case was expected to end today. The trial was moved to Atascosa County from Duval County on a change of venue motion.

Carrillo is a brother of former District Court Judge O.P. Carrillo, who was removed from office earlier this year after the Texas Senate found him guilty on an impeachment charge. Another brother, Ramiro Carrillo, has been suspended from his post as Duval County commissioner by Judge Hester after the judge ruled that he had used county equipment for private work.

Mandel accused of wrongdoing

The Washington Post

BALTIMORE — Three businessmen who are among Maryland Gov. Marvin Mandel's closest friends "bought Marvin Mandel" with up to \$200,000 worth of land, clothing, vacations, jewelry and life insurance, the chief federal prosecutor charged Monday in his opening argument in Mandel's political corruption trial.

In return, Assistant U.S. Attorney Barnett D. Skolnik said, the businessmen — former Maryland house majority leader W. Dale Hess and brothers William A. Rodgers and Harry W. Rodgers III — plus their attorney, Ernest W. Cory Jr. — received for their businesses, including a race track, "a steady flow of benefits, almost all of them in secret."

In a two-hour opening statement, prosecutor Skolnik revealed several previously unreported examples of what the government alleged was a "pattern of corruption" involving Mandel and his co-defendants — Hess, the Rodgers brothers and Cory — beginning shortly after Mandel succeeded Spiro T. Agnew as governor in 1969.

Skolnik said Hess and the Rodgers brothers, bought the governor \$1,500 worth of clothing as a birthday present; paid life insurance premiums for Mandel in excess of \$1,000; paid for "a few thousand dollars worth of travel" for Mandel and his family, "picked up the tab" for more than \$5,000 worth of jewelry for members of Mandel's family and included him in two business partnerships allegedly worth \$185,000 to the Governor.

"Ladies and gentlemen," Skolnik told the jury, "we will prove that, beginning shortly after he became governor, these other men bought Marvin Mandel."

Texas coal

By AMY KIDD Austin Bureau

CLARK COUNTY gave Generating Station the Arizona-Nevada electric power for Los Las Vegas and sn in between.

Compared with generating facilities, remarkable systems of coal fire burns to power brought across 275 pipeline.

And it is this pipeline for their own operation. Houston Natural Gas, Grande Industries, Inc., to get in on the game have become a major carry coal from Mexico to industrial customers in Texas.

Mark Gillespie, Houston Natural's firm wants to transportation business doesn't need coal — and it just carries for other Texas customers. Railroad Commission natural gas a year, he adds, it will need 125 million tons to provide energy industrial and residential.

The two companies new firm to implement the 1,175-mile pipeline says possible delivery Fayetteville and perhaps the River Authority, Texas Christi, San Antonio Lighting & Power.

The new pipeline negotiate and a Denver & Rio Grande Railroad, a subsidiary of Grande Industries, Inc., pick up about 10 million tons per year mined in Colorado and delivered to the southern part of the pipeline.

At Walsenburg, crushed and mixed volume of water and delivery points in Five million tons would also be moved an auxiliary line at Farmington, N.M. pipeline station a then pumped with this.

This plan, based already in use at slurry pipeline the North Arizona to in Nevada could 1980, when most of potential customer fired boilers to generators.

The electricity from the Mojave Arizona coal — 100 miles before it reaches the generating company and the generating system that 1,580 megawatts — than 1.5 million tons.

The operation of Coal Co.'s round-trip facility on the Reservations at K the mine, which million tons of coal operation, coal is belts to the storage Black Mesa Pipeline Southern Pacific Southern Pacific.

Texas firms plan coal transportation

By AMY KIDD
Austin Bureau

CLARK COUNTY, Nev. — The Mojave Generating Station just west of the Arizona-Nevada border provides electricity for Los Angeles, Phoenix, Las Vegas and smaller communities in between.

Compared with any other electric generating facility, it is not a remarkable system — except that the coal it burns to power its generators is brought across 275 miles of desert by pipeline.

And it is this pipeline system that two Texas firms are using for a model for their own operations.

Houston Natural Gas Corp. and Rio Grande Industries, Inc., attempting to get in on the ground floor of what may become a national coal boom, have planned a pipeline system to carry coal from Colorado and New Mexico to industrial and municipal customers in Texas.

Mark Gillaspie, project officer for Houston Natural's proposal says the firm wants to get into the coal transportation business — although it doesn't need coal for its own operations — and it just wants to act as the carrier for out-of-state coal that Texas customers buy.

Since the Railroad Commission of Texas banned natural gas as a boiler fuel last year, he adds, it looks like the state will need 125 million tons of coal per year to provide electric power to industrial and individual consumers.

The two companies plan to create a new firm to implement and maintain the 1,175-mile pipeline, which Gillaspie says would carry fuel to possible delivery points in Temple, Fayetteville and Angleton by 1980, and perhaps the Lower Colorado River Authority, Texas Utilities, Corpus Christi, San Antonio and Houston Lighting & Power.

The new pipeline company would negotiate and agree with the Denver & Rio Grande Western Railroad, a subsidiary of Rio Grande Industries, Inc., and other lines to pick up about 10 million tons of coal per year mined at sites around Colorado and deliver it to Walsenburg in the southern part of the state.

At Walsenburg, the coal would be crushed and mixed with an equal volume of water to form a "slurry" solution and then pumped to its delivery points in Texas.

Five million tons of coal slurry would also be moved by pipeline from an auxiliary line at a strip mine site in Farmington, N.M., to the main pipeline station at Walsenburg, and then pumped with the Colorado coal.

This plan, based on the technology already in use at the world's longest slurry pipeline that carries coal from North Arizona to the Mojave Station in Nevada could begin operating by 1980, when most of Houston Natural's potential customers convert to coal-fired boilers to power electric generators.

The electricity that currently comes from the Mojave Station starts as Arizona coal — three days and 275 miles before it reaches Nevada. The mining company, the pipeline firm and the generating station itself, from the system that eventually supplies 1,580 megawatts of power to more than 15 million people.

The operation starts at the Peabody Coal Co.'s round-the-clock strip mining facility on the Navajo and Hopi Reservations at Kayenta, Ariz. From the mine, which has produced 17 million tons of coal in its five years of operation, coal is moved by conveyor belts to the storage facilities owned by Black Mesa Pipeline (a subsidiary of Southern Pacific Pipelines and Southern Pacific Railroad).

There, the coal is crushed to the consistency of granulated sugar and mixed with water. The slurry then is pumped into one of four 630,000-gallon storage tanks (where the solution constantly is mixed to prevent the coal from settling), and later pumped into the pipeline for its trip to the Mojave Station.

The pipeline, made of steel pipe, 18 inches in diameter, is buried at least 2.5 feet and conduits 4,200 gallons of slurry per minute, or 660 tons of pure coal per hour.

After crossing terrain that changes from 6,500 to 500 feet, the slurry reaches the Mojave Station.

Here, water is drained from the solution and the powdered coal is dried and pulverized again, then burned to power electric generators.

The water drained from the solution cannot be discharged into the Colorado River, and the generating facility uses 60 per cent of the water to cool its generators, recycling the rest as many as 30 times before the mineral concentration becomes too high to use.

Midland gets wells

A new site was staked in a Martin County field and Midland drew two new oil producers.

Durham, Inc., Midland, plans No. 1 F. E. Snell as a location northeast stepout to the most easterly Spraberry well in the Breedlove field of Martin.

It is planned for a bottom depth is 8,600 feet, and spots 660 feet from south and west lines of labor 7, league 259, Borden CSL survey, 5 1/2 miles southwest of Patricia.

MIDLAND OILERS

Parker & Parsley, Midland, finalized No. 1-D Turner, a new producer in the Spraberry (Trend Area) sector of Midland, to pump 77 barrels of 40-gravity oil and 77 barrels of water per day.

Completion was effected through perforations at 7,269-8,890 feet, after acidizing with 4,500 gallons and fracturing with 160,000 gallons and 320,000 pounds.

The new well is 1,320 feet from south and west lines of section 37, T-2-S, W-T Holcombe survey, about 10 miles southeast of Midland township.

Also, Murphy Oil Corp. has a new producer in the Germania (Grayburg) field of Midland County, 10 miles southeast of Midland.

It was completed on the pump for 10 barrels of 32-gravity oil and 25 barrels of water daily, through perforations at 3,950-3,960 feet. The section had been acidized with 1,650 gallons.

Location is 330 feet from north and east lines of section 14, block 37, T-2-S, J. V. Stokes survey.

North Pecos reentry set

Double H & Co. of Midland has filed application with the Railroad Commission to reenter and clean out a wildcat, to 2,200 feet, at a Pecos County 2,305-foot failure, nine miles northwest of Girvin. It will be designated No. 3 Ruth W. Thompson.

It originally was drilled by Amoco, et al., as No. 1 R. N. Thompson, and plugged and abandoned April 25, 1951, in the Bayview field.

It spots 5,610 feet from south and 330 feet from west lines of section 1, block 11, H&GN survey, and in lot 2.

Wildcat operations set in West Texas

Sites for wildcats have been staked in Runnels and Stonewall counties and two wildcat reentries are planned in Schleicher.

Aisabrook & Edwards Oil Co. of Dallas, plans No. 1 B. J. Frierich, a 4,000-foot venture in Runnels, 2 1/2 miles southeast of Rowena.

Location is 467 feet from north and 2,050 feet from east lines of section 529, T&NO survey, two miles south of the Rowena (Capps and Jennings) field.

Walsh & Trant Petroleum Corp., operating from Tyler, accounted for a 4,500-foot try in Runnels. It is No. 1 William Patterson.

Drill site, one mile east of Winters, is 2,173 feet from north and 800 feet from east lines of M. Fitzpatrick survey 492. It is 3/4 mile east and southeast of the depleted spike field.

STONEWALL PROSPECTOR

A. L. Sauder Jr. of Wichita Falls, plans to drill No. 1-Q Swenson Land & Cattle Co., a 3,750-foot explorer in Stonewall, 2 1/4 miles southeast of the Flat Top (Swastika) field.

It spots 2,328 feet from south and 1,676 feet from east lines of section 126, BBB&C survey, 10 miles northeast of Hamlin and surrounded by failures.

SCHLEICHER WORKOVERS

R. F. Thomas of Paris, Tex., filed application to reenter and clean out to 6,900 feet for testing at No. 1 Robert Pate, Schleicher, 6,912-foot wildcat failure, one mile north of Eldorado.

Originally drilled by Tucker Drilling Co., Inc., it was plugged and abandoned in August, 1972, after recovering 490 feet of gas and 10 feet of gas-cut mud on a drillstem test at 6,046-6,062 feet.

It is 1,710 feet from south and 1,320 feet from west lines of section 46, block LL, TCRV survey.

Gulf Oil Corp. has filed application to plug back to around 7,350 feet and test as a Straw searcher at No. 1 W. E. DeLong, dual gas producer in the Velre, Southwest field of Schleicher County.

Total depth is 7,473 feet. It was dually completed from the Canyon and Pennsylvanian conglomerate zones in 1966.

Location is 660 feet from north and 1,320 feet from west lines of section 6, block TT, TCRV survey, 1 1/2 miles northwest of Eldorado.

Crane test yields crude

Monsanto Co. No. 1 Kimsey-State, Crane County exploratory test, 10 miles north of Crane township and 1 1/2 miles northeast of the McElroy, North (Silurian, Devonian and Ellenburger) oil pool, recovered 180 feet of oil and 495 feet of gas, oil, and water-cut drilling mud on a drillstem test in an unidentified zone.

Tool was open one hour on the test taken through a 1/4-inch choke, from 7,860-7,876 feet.

The project is bottomed at 7,876 feet, no other information available.

It spots 1,980 feet from north and west lines of section 2, block 30, ULS, six miles north and slightly west of the recent Wolfcamp pay opener in the McElroy, North field.

That discovery was Mobil Oil Corp. No. 9-35 Hardwicke-University, which finalized in June, for 36 barrels of oil and 19 barrels of water daily, through perforations from 7,562-7,571 feet.

Jack Allen Lyons

J. A. Lyons appointed

Jack Allen Lyons has been appointed sales representative in the Midland sales office of Wilson Supply Co., a division of Wilson Industries, Inc.

A native of Texas, Lyons holds a BBusiness Administration degree from Southwestern University.

Lyons recently completed a one-year management training program concentrating on various aspects of sales in the oil field supply business.

Bill would allow states decisions

WASHINGTON (AP) — A plan to regulate development of the nation's offshore oil and natural gas resources is in place for immediate action on the floor of the House and Senate.

Approval of the compromise legislation is expected in both houses this week, although it may face a veto by President Ford.

Senate and House conferees reached agreement on the measure Monday.

The bill would impose stricter environmental standards on offshore drilling, offset economic and social impacts in affected coastal states and allow state and local governments a role in energy decisions.

Sen. Henry Jackson, D-Wash., co-chairman of the conference committee and head of the Senate Interior Committee, said that "moving ahead with this bill means that we will shorten the time we must rely on foreign oil sources."

The measure calls for new bidding procedures intended to yield the federal government more revenue in the leasing of offshore oil and gas drilling tracts.

The measure's ultimate fate is uncertain because Ford administration officials have generally opposed the bill, contending that existing legislation is adequate in the area of offshore energy development.

The conference panel's House co-chairman, Rep. John Murphy, D-N.Y., charged that "the administration has engaged in dilatory tactics and guerrilla warfare throughout the entire legislative process in trying to gut the bill with dozens of controversial amendments."

More than 25 administration-backed amendments were offered and rejected during the conference, which ended up approving a House-passed bill after making six minor technical changes, Murphy said.

Discovery potentials

Belco Petroleum Corp., Midland, has completed its No. 1 Jones Communized as a Morrow discovery, in Eddy County, N.M., 15 miles north of White's City, for a calculated, absolute open flow of 5.976 million cubic feet of dry gas per day.

Completion was through perforations at 10,385-10,422 feet, which had been acidized with 300 gallons.

Drilled to 10,630 feet, it has a 5-inch liner hung from 8,791-10,630 feet, and it is plugged back to 10,525 feet.

Location is 1,980 feet from south and 660 feet from east lines of section 9-22s-25e, 1 1/2 mile southwest of Morrow gas production in the Catclaw Draw field.

DRY HOLES

CONCHO — Raup & Hooker No. 1 A. Corbell, wildcat, 467 feet from north and east lines of C. F. Blanchard survey 1284, abstract 1217, four miles southeast of Eden, 14 1/2 miles.

COTTLE — Perkins-Prothro No. 1 L-O Swenson, wildcat, 460 feet from south and east lines of section 26, block B, J. H. Stephens survey, 11 miles southeast of Paducah, 14 1/2 miles.

KENT — Knox Industries No. 4 Morrison, wildcat, 197 feet from north and 467 feet from east lines of section 8, block B, PSL survey, 15 miles southwest of Spur, 17 1/2 miles.

KING — R. D. Gunn No. 1-I S. B. Burnett Estate, wildcat, 1,890 feet from north and 660 feet from west lines of section 17, 1/4-W survey, 10 miles northeast of Guthrie, 14 1/2 miles.

Taubert, Steed, Gunn & Medders No. 23-NA S. B. Burnett Estate, in the Big N field, 2,244 feet from southeast and 3,073 feet from southwest lines of section 2, block X, R. M. Thomson survey, 17 miles southeast of Guthrie, 14 1/2 miles.

LEA — Marathon Oil Co. No. 1 Northeast Anderson Ranch Unit, wildcat, 2,000 feet from south and 1,880 feet from east lines of section 14-15e-32e, 24 miles south of Caprock, 10 1/2 miles.

KUNZLE — Hack Drilling Co. No. 1 R. H. Allen, wildcat, 467 feet from north and 1,034 feet from east lines of lot 16, Burnett CSL survey, abstract 19, four miles north of Norton, 14 1/2 miles.

Offshore lease plans going at half speed

NEW ORLEANS (AP) — Plans to speed up leases of offshore oil and gas reserves to push the United States toward energy independence have slowed to half.

Instead of six offshore lease sales a year envisioned in June 1975, or the four originally targeted, Outer Continental Shelf sales have been running three a year.

Only in the Gulf of Mexico is the effort nearly on target, the Bureau of Land Management reports.

Several sales have been delayed by court challenges from environmentalists and adjacent states.

Adding to the slowdown is a move

ENERGY OIL & GAS

by federal officials to work more closely with state and local officials and with environmental groups and representatives.

A New Orleans land management official agreed the move was made in part to take the edge off some of the opposition in what he called frontier areas, where the oil rigs have never been.

"It's not that they are more concerned in the frontier areas with the environment," he said. "It's that in the Gulf there's more understanding."

First of the lease sales off the Louisiana and Texas coasts came in October 1974.

Of 17 lease sales projected through 1978, five are in the Atlantic. The Baltimore Canyon sale last month was challenged in court. A hearing in the U.S. Court of Appeals is scheduled in New York Sept. 27.

Eight others involve offshore areas in Alaska. Onshore forces there would like to see delays up to three years.

Opposition has sprung up, too, on offshore areas of California and Washington-Oregon.

Two Gulf of Mexico sales of leases off the coasts of Louisiana and Texas are scheduled — one in November and a second in April 1977.

Gulf sets projects

Two offsets to a recent Yoakum County discovery have been staked by Gulf Oil Corp., about 15 miles northeast of Plains.

Both are in section 5, block K, PSL survey, and are slated for an 11,700-foot bottom.

No. 65 Mallet Land & Cattle Co., 1/2 mile south of the Sundown (Wolfcamp) opener, is 660 feet from south and west lines of section 5.

No. 66 Mallet Land & Cattle Co., 3/4 mile east of the pool discovery, spots 1,980 feet from north and 660 feet from east lines of the section.

The discovery, Gulf No. 57 Mallet Land & Cattle Co., finalized Sept. 1, for 116 barrels of 44.8-gravity oil and 29 barrels of water per day, through perforations at 9,714-9,722 feet. It was drilled to 11,579 feet, with 5 1/2-inch casing set at that depth, and plugged back to 9,664 feet.

The flow was through a 3/4-inch choke and upper Clear Fork perforations at 3,123-3,141 feet, after the pay section had been washed with 750 gallons of mud acid and acidized with 6,000 gallons.

Testing continued at the project, which spots 467 feet from southwest and 968 feet from southeast lines of section 37, block 1, H&TC survey, 11 miles southwest of Crane.

The discovery, Norwood No. 1 J.E.C., finalized June 28, for 169.73 barrels of 40-gravity oil daily, through an 18-64-inch choke and perforations at 3,121-2,132 feet.

Confirmer is assured

Arvin Norwood Drilling Co., Midland, No. 1 Harris, location north offset to the upper Clear Fork pay opener in the W.E.R. field of Crane County, has assured production with the flowing of 166 barrels of oil, no water, in 23 hours.

The flow was through a 3/4-inch choke and upper Clear Fork perforations at 3,123-3,141 feet, after the pay section had been washed with 750 gallons of mud acid and acidized with 6,000 gallons.

Testing continued at the project, which spots 467 feet from southwest and 968 feet from southeast lines of section 37, block 1, H&TC survey, 11 miles southwest of Crane.

The discovery, Norwood No. 1 J.E.C., finalized June 28, for 169.73 barrels of 40-gravity oil daily, through an 18-64-inch choke and perforations at 3,121-2,132 feet.

Project planned

CHICAGO, Ill. — Plans for a multi-million dollar project to expand engine oil additives manufacturing capacity at Amoco Chemicals Corp.'s Wood River, Ill., facilities have been announced.

Amoco Chemicals President Richard M. Morrow said the three-phase expansion program will increase the company's capacity to produce calcium and magnesium sulfonates — which serve as detergents and corrosion inhibitors in engine oils — from 40 million pounds per year to 140 million pounds annually.

The project is scheduled for completion in 1979.

The November sale, originally listed for October, will consist of 61 tracts totaling 255,163 scattered Gulf acres. Final environmental impact statement was filed Sept. 3.

The 1977 Gulf sale, although still on the list at its original time, could be pushed back to July, a land management official said. It covers 1,117,827 acres in 295 tracts.

A sale process begins with a call for

nomination of tracts by prospective bidders, running through six more steps. Now the process takes about 12 to 19 months. That period may stretch out as environmental and onshore impact studies grow more detailed.

In an attempt to accelerate the program, land management officials are working on a revised schedule of sales, and one official said it couldn't come much before the end of the year.

Distillate, residual fuels supply ample

TULSA — The millions of Americans who rely on distillate and residual fuels can count on ample supply this winter to heat their homes and operate their businesses.

The Oil and Gas Journal reports this is the consensus of oil economists who say supply of the fuels is sufficient to meet demand that will increase from a variety of sources.

The weekly business magazine's Sept. 20 issue predicts combined consumption of distillate and residual fuels will amount to 6,465,000 barrels a day during the heating season from October, 1976 through March, 1977. That's a 6.6 per cent increase over the same period a year ago.

Analysts place their supply reliance on the oil industry's ability to step up refinery production, bring in needed products from abroad and call on inventories.

Demand is expected to increase because of a healthier economy, fuel switching by natural gas users and normal, colder weather during the winter.

"Before the first chill of winter," the Journal says, "the U.S. oil industry should be in good shape to take care of new distillate and residual fuel business."

Gasoline demand in late summer eased sharply from the rates of increase chalked up early in the spring. This is allowing refiners to emphasize production of distillate or residual fuel and build their inventories of these fuels to meet increased winter demand.

The Journal forecasts distillate demand at 3,665,000 barrels a day during the 1976-77 heating season, up 6.3 per cent from a year ago. Despite its sluggish performance so far this year, demand for residual is predicted to clumb to 2,800,000 barrels a day, up 4.5 per cent from a year earlier.

The combined increase takes into

account added consumption of heating oils expected from rising curtailment of natural gas sales. One oil company economist estimates the projected curtailments over a year will equal about 375,000 barrels of oil a day, 75 per cent of which will be met by distillate or residual fuels.

The expected increase in demand can easily be met, economists say, through stepped-up refinery runs and greater imports, without a serious drawdown on stocks.

Barring any international crude that might impede the flow of oil or refined products into the U.S., sufficient imports should be available, the Journal says.

Excess refining capacity is available outside the U.S. because high prices and struggling economies still depress demand for oil in many parts of the world. This spare capacity could be called on if U.S. demand for distillate and residual fuels is higher than predicted.

Jaycees plan golfing, picnic

Big Brothers and Big Sisters will gather with their little brothers and sisters at 10 a.m. Saturday for a day of companionship and fun at the Greenacres Miniature Golf Course on U.S. 80 East.

Midland Jaycees will sponsor the miniature golf picnic for this program of Family Services of Midland, Inc., an agency of the United Way.

The Big Brother-Big Sister program is available to all children from one-parent homes. For further information, interested persons may call John Stokes at 683-6236 or Gloria Lambert at 683-4241.

DRILLING REPORT

ANDREWS — Cox No. 1 Midland Farms, 12,450 feet, plugged back to 10,300 feet, running 4 1/2-inch casing.

Quaila No. 1 McWhorter, 10,440 feet, plugged and abandoned.

Wood, McShane & Thoms No. 2-Crews & Mast, 3,075 feet, flowing back load through perforations at 2,986-3,032 feet, after acidizing with 1,000 gallons and fracturing with 30,000 gallons and 38,000 pounds.

Operator set 5 1/2-inch casing at total depth.

DAWSON — Cox No. 1 Price, drilling 12,172 feet.

EDDY — Antwell No. 1 Dinkus, 10,934 feet, still preparing to perforate.

Antwell No. 1 Macho Norte, drilling 1,500 feet in lime, sand.

Mesa No. 1 Moore-Federal, 11,681 feet, still moving off rotary.

Mesa No. 3 Nash, 13,771 feet, still shut in.

Belco No. 1 Gissler, drilling 1,587 feet.

GAINES — Fasken No. 1 Rowan, drilling 1,791 feet in cement, after setting 5 1/2-inch casing at total depth.

GLASSCOCK — Williamson & Underwood No. 7 Clark, 10,867 feet, swabbing back load through perforations at 8,830-840 feet, after acidizing with 5,000 gallons.

Williamson & Underwood No. 8 Clark, drilling 6,350 feet in lime, shale.

Williamson & Underwood No. 9 Clark, 10,788 feet, waiting on cement, after setting 5 1/2-inch casing at total depth.

KENT — Highland, Brown, Brock & Equity No. 3 Morrison, drilling 4,465 feet.

LEA — Bess No. 2 Havins, 10,626 feet, plugged and abandoned.

LEA — Teal No. 1-B New Mexico-Federal, drilling 14,153 feet in lime, sand.

LOVING — C&K No. 1-47 Johnson, drilling 15,206 feet in shale, sand.

EXON No. 1-1 Ozark-Minor, drilling 9,406 feet.

MARTIN — Adobe No. 1-Q Sale Ranch, shut in after perforating opposite the Dean from 8,646-9,042 feet.

PECOS — Highland, Brown, Brock & Equity No. 3 Wimberly-Bryan, 10,200 feet, took a drillstem test from 10,050-10,125 feet, the tool was open one hour and 30 minutes, surface gas in 20 minutes; recovery was 30 feet of drilling fluid.

COQUINA No. 1 Neal-State, drilling 4,021 feet in dolomite and sand.

Texas Pacific No. 10 Eismore, drilling 10,446 feet in sand and shale.

EXON No. 1 May, drilling 9,406 feet.

Monsanto No. 1 Fay-Ellen, drilling 17,921 feet in shale.

Union Texas No. 1-71 Ligon, 12,432 feet in shale.

REEVES — Cox No. 1 Crow, 10,743 feet, taking a drillstem test from 16,810-16,743 feet.

COQUINA No. 1 Lowellling-State, 10,187 feet, logging.

STERLING — Hilliard No. 1 Ferguson, drilling 8,975 feet in lime and shale.

Texasco No. 2-E Sterling Fee, 10,800 feet, waiting on cement, set 5 1/2-inch liner from 2,970-5,880 feet.

Dow Jones climbs past 1,000 level

NEW YORK (AP)—The stock market embarked on a strong advance today, breaking through the 1,000 level in the Dow Jones industrial average.

The closely watched average of 30 blue chip stocks was up 9.06 at 1,003.57 at noon on Wall Street.

The average has made numerous runs past 1,000 this year, but has not closed above that point since it finished at 1,005.16 on July 14.

Advances outnumbered declines by a 2-1 margin in the over-all count of New York Stock Exchange-listed issues.

Brokers said buying interest was inspired by hopes for a more relaxed Federal Reserve credit policy.

The Fed's policy-setting open market committee was meeting today, and Wall Streeters seemed optimistic that it would decide on moves that would encourage a decline in interest rates.

General Motors, the most active NYSE issue, rose 1/2 to 72. Other blue chips gaining a point or more included Exxon, Du Pont, IBM and Eastman Kodak.

The Big Board's composite index of all its listed common stocks picked up 39 to 57.13. On the American Stock Exchange, the market value index was ahead 26 at 103.75.

Trading volume was active on the NYSE, totalling 11.39 million shares over the first two hours against 10.03 million in the like period Monday.

On the British side, Gen. Henry Clinton urged Gen. William Howe to land in Westchester, trapping Washington's whole army on Manhattan.

Sept. 1776 witnessed Battle of N.Y.

Sir George Collier paced the decks of the H.M.S. Rainbow as she rode at anchor in September 1776, hardly a cannon shot from New York, which was being besieged by the British.

He took out his frustrations on his journal: "Our brave veterans stand on the banks of the East River, like Moses on Mount Pisgah, looking at their promised land ... The rebel's standards wave insolently in the air ... the officers ... displeased and amazed, not being able to account for the delay."

Who could it be? George Washington's soldiers looked beaten even if they were not. "The merry tones on drums and fifes had ceased," said Brother Shewkirk, pastor of the Moravian congregation on Manhattan.

So many colonial soldiers were leaving the island that a guard was placed to keep them from crossing the Harlem River into what is now The Bronx. They had been looting. One was taking home a cannon ball he said was for his mother "for the purpose of pounding mustard." An ensign was caught leading 20 men "all loaded with plunder, such as house furniture, tableware, linen and kitchen utensils, china and delft ware."

Gen. Nathaniel Greene urged "a total and immediate removal from the city." Washington held a council of war on Sept. 7 and compromised. Gen. Israel Putnam would remain in New York (Lower Manhattan today) with 5,000 men. Gen. William Heald would hold the ground between Harlem and the bridge to The Bronx with 9,000 troops, and Greene with the remainder would guard Kip's Bay, the East River area around the present East Thirty-Fourth Street.

Greene petitioned for another meeting. The Americans, he insisted, should surrender real estate and withdraw to posts "where the enemy will be obliged to fight us, and not we them." A majority at the Sept. 12 council supported Greene. Evacuation began two days later.

Howe said no. Sir William might have figured that a series of continuing routs of Washington's army at little cost to him would create an aura of British invincibility. It has also been suggested by posterity that he still hoped for an accommodation with Congress.

On Sept. 15, Lt. Frederick Mackenzie of the Royal Welch Fusiliers watched as "five ships of War ... anchored with their broadsides on the shore." Eighty-four 16-ounce barges carrying the blue and red uniforms Hessians and Englishmen put out from the Long Island shore, looking like "a large clover field in full bloom." They passed under the sterns of the warships, which near noon exploded in a broadside of 70 cannon.

Washington had galloped down from Harlem Heights (now the site of Columbia University) along the Post Road (Lexington Avenue) and stood on a hill (near the present public library at Forty-Second Street and Fifth Avenue) to observe. He tried to rally the fleeing Americans, whacking them with the flat of his sword and his riding crop. Finally he threw down his hat and cried out: "Are these the men with whom I am to defend America? Good God! Have I such troops as these?"

As 50 of the enemy approached, Washington sat on his horse, staring, until sides rode up, grabbed his horse's bridle and led him away. Greene said Washington was "so vexed at the infamous conduct of the troops that he sought death rather than life."

HONEYMOON IS OVER for a young California couple who have been married one month. Following a spat over the car, Denise Harmon jumped in and started to drive away. Husband

Terry climbed on the hood in an effort to stop her, but she continued on eight miles to the police station, where both were arrested for disorderly conduct.

Children at Community Day Nursery learn to communicate with each other

For many years day nurseries were considered "play nurseries." Children at Community Day Nursery, a United Way agency, do play, but they learn at the same time. Children from 2 to 5 years old are accepted at the nursery on a regular basis, and drop-ins are accepted. Although created to take care of preschool children of working mothers, the nursery now accepts any child.

The children begin learning at 2 years to interact socially with their peers, an agency spokesman said.

By the time they are in school, the spokesman said, the children often are more advanced than children who do not attend a nursery. Young Michael, for instance, is in the first grade in a Midland

Thanks to you
It's working

the second grade after he completed kindergarten.

Michael's mother attributes his willingness and ability to learn to the solid background he received at the nursery, according to the agency spokesman.

This United Way agency was organized in 1949 by the City Federation of Black Women's Club. The original building was donated by the Midland Shrine Club. The nursery has been housed in Bunche Elementary since 1968.

Licensed by the State Department of Public Welfare, the Community Day Nursery received 54.8 per cent or \$24,317 of its 1976 budget of \$44,332 from the United Way.

Murder conviction reversed

Austin Bureau

AUSTIN — The Texas Court of Criminal Appeals Monday reversed an Ector County District Court murder conviction in the case of Robert Dean McClure, sending the case back to that court for a new trial.

In a trial before a jury, McClure was convicted of murder of his 17-year-old wife at the Ramada Inn in Odessa on June 10, 1974.

Court records show that on that date, McClure purchased a .22 caliber automatic pistol, went to the motel, had a brief conversation with his wife at a swimming pool and, as she turned from him and started to leave, shot her eight times, killing her.

At the trial, McClure testified that his wife had had a number of extramarital affairs during the course of their brief marriage. His testimony at the trial, the appeals court said, with evidence of other defense witnesses including a psychiatrist, was sufficient to raise the issue of voluntary manslaughter.

The jury in the case considered two charges, murder and voluntary manslaughter.

In his appeal, McClure argued and the appeals court agreed, that the prosecuting attorney's closing argument at the guilt stage of the trial "constituted a totally improper line of argument at the guilt stage of the proceedings."

In the case, the appeals court found that the harm done was in the prosecutor's argument that McClure should be convicted of murder because of the greater penalty. "It was a plea to the jury to consider the amount of punishment," the appeals court said, "rather than the facts in determining the offense for which the appellant should be convicted."

The court of criminal appeals overturned the Ector County District Court's conviction and remanded the case to that court for another trial.

Criminal appeals court Judge Leon Douglas filed a dissenting opinion in the case, saying the prosecutor's remarks were rendered harmless by the judge's instructions to the jury not to consider any argument concerning number of years.

Cathedral restored

ST. LOUIS, Mo. (AP) — The 181-year-old St. Louis Cathedral has been renovated at a cost of \$950,000 as part of the New Orleans Catholic Archdiocese's Bicentennial Observance.

All the interior walls and ceilings were repainted, with light tones replacing dark colors. Art specialists restored paintings and replaced deteriorating portraits of the apostles on the vaulted ceiling.

To complement the scrolls and curlicues in the ceiling and arches at each end of the church, chandeliers were added to replace the drum-type light fixtures.

Man indicted for murder

Fourteen more grand jury indictments have been served, the Midland County Sheriff's office said Monday.

That leaves only seven of the 53 indictments handed down by the grand jury earlier this month unserved.

After considering the evidence, the following indictments were submitted to District Judge Perry D. Pickett. The alleged offenses, those indicted, amount of bail and in-jail or not-in-jail status of each of those accused follows:

MURDER: James William Stewart, released on \$25,000 bond.

ATTEMPTED MURDER: Jerry Ramirez, released on \$15,000 bond.

FELONY THEFT: Ralph Gillespie, two counts, released on \$30,000 bond; Howard Foremar, released on \$5,000 bond; Gary Lynn Holley, released on \$5,000 bond. Holley was also indicted on a second count for burglary and posted a \$5,000 bond on that count as well. Thomas Benson Taylor was released on \$5,000 bond.

BURGLARY: Douglas Peters, released on \$7,500 bond; Larry Pullen, released on \$7,500 bond; Steven Steve Merworth, released on \$5,000 bond.

UNLAWFUL POSSESSION OF TETRAHYDROCANNIBOLS: Jimmie Earl Rose, Jr., released on \$5,000 bond; James Rhodes, released on \$5,000 bond.

AGGRAVATED ASSAULT: Carlton Fancher, released on \$3,500 bond; Samuel Arroyo, released on \$3,500 bond.

DRIVING WHILE INTOXICATED—SECOND OFFENSE: Gilbert Saenz, released on \$2,500 bond.

Flight simulator has visual aids

By JIM KLAHN

SEATTLE (AP) — Outside there is nothing but dull, gray clouds. Somewhere below is Runway 32M at Moses Lake in eastern Washington.

Inside, I struggle to see the ground from the cockpit of the Boeing 707. With only student instrument pilot skills, I angle for where the ground must be, the jet moving at 160 miles an hour.

Suddenly, a runway light. The four of us in the cockpit shout together. "There it is, there it is..."

A close call? A scene from "Airport 1976"? No, just Boeing training pilots exhibiting their newest toy: a flight simulator.

We never move out of the big tin building in south Seattle. But visual aids make it seem like the jet is plummeting through the air at Seattle, Moses Lake or Yakima, Wash.

Soon student pilots will land at airports in Tehran, London, Bangkok "or anywhere else you want to go," says Boeing test pilot Bill Allsopp.

The windows in the cockpit actually look into large television screens on which images are fed by computer.

"The computer has the information stored to actually make up the picture on the screen as you 'fly' along," said Skip Wahlin, public relations man for General Electric, which developed the system at Daytona Beach, Fla.

Systems to simulate flight by instrument are far from new. Old types had a pilot closed into a box mounted on springs and hinges with a number of attendants pulling ropes and pushing levers to move it around, simulating flight. The student would, hopefully, answer different movements with correct responses.

But putting the system in perspective — combining instrument functions inside the cockpit with realistic visual references through the windows — has been harder to accomplish. Different systems have been developed, but each had problems.

One system said Allsopp, used film, but before long the film developed streaks. "All a pilot had to do was line up the streaks and he was on final approach (to the airport)," he said. "So the pilot flew the simulator by false cues that don't exist in the real world."

Although the view through the 707's windows revealed a picture more like a painting with straight lines than a photograph, the addition of clouds, sun and darkness added realism to the picture.

"There is a certain cartoonish aspect about the scene, but we can control that with weather," said Allsopp. "It gets very realistic when you're in there flying it. I can scare hell out of a pilot."

Capt. A. L. Jones, a Boeing officer, said the goal is to completely train a pilot on the flight simulator, requiring only a short check ride before he is sent off to fly passengers.

He said advantages include the ability to "go into performance edges without risk," savings in money and fuel, reduction in noise and fuel pollution and a controlled environment for better demonstration and student retention. It costs \$1,400 an hour to train in a Boeing 727, \$280 in the \$3 million simulator.

Joke-spiked lectures keep students awake

LOS ANGELES (AP) — The University of Southern California's psychology department says the way to keep students awake during lessons on ponderous material is through their funny bones.

Instead of conducting conventional lessons, instructors have been urged to spice up lectures with jokes — to turn them into something resembling comedy routines.

It all began about 2½ years ago when Prof. Edward Conolley began one of his classes by saying: "It was in this very room that I attended my freshman orientation. I'll never forget it. We were addressed by a man with a nervous tic who was wearing a clip-on tie and what looked like a clip-on suit. He also carried a Roy Rogers lunch box with him."

"He was, I learned later, the head of the psychology department."

For several hours, the professor intermingled jokes produced by comedy writer Eric Cohen into his lecture. When class ended, his students stood up and applauded.

Conolley has since left USC, but his experimental lecture technique has been developed into what's known as the Quality Teaching Effectiveness Program. The department also called in Dick Shaal, an actor-director who is married to Valerie Harper, star of the "Rhoda" series on television and has played in "Phyllis," to show teachers stage techniques for capturing and keeping attention.

Critics say QTE does little more than make professors popular with their students.

But Dr. Scott Fraser, one of QTE's organizers, says the technique really works.

"We have run control groups and found that students in classes where the course material was infused with the humor and dramatic techniques did better than those in classes where such methods were not used," Fraser said.

Lee chatter

By MICA CASTOR, JANIS SANDERS & DEEHONA WISE

Well gang, it's really been good to hear from y'all and we hope you are glad to hear from us!

Contrary to what was reported last week, The 100 Club officers are not the Sophomore class officers. They are: Prissie Foster, president; Joni Reiml, vice-president; Pam Mosely, secretary; Martha Dern, Beth Welton and Angel Durr.

And now the Sophomore Class officers are: Holly Franz, president; Lety Rivas, vice-president; Pam Starnes, secretary, and Sara Hellinghausen, treasurer.

Go! Go! Go! Make it three in a row, Big Rebs! Our Mighty Maroon Platoon rolled over those many Plainview Bulldogs 27 to 7 last Friday night! Way to go, guys! This Friday our guys will be playing El Paso- Irving in our stadium at 8 p.m. We want everybody to be out supporting our Rebel Men! Let's Go, Rebs!

Have you all been supporting our J. V. football team? Well we want to see all of you at the Lee J. V. vs. Fort Stockton game at 7 p.m. Thursday. The place is at Memorial Stadium so, Beeee Thereeee.

The volleyball team will travel to Odessa tonight. The J. V.'s game is at 6:30, followed by the Varsity game at 7:30. We're behind you all the way, girls!!

Rebelettes: We'd like to thank the girls who led the Rebelettes at the Pep Rally. They are Stephanie Adams, Jean Ashland, Leigh Crenshaw, Linda Jeary and Alison Ware. Thanks loads, girls! Remember the squad meeting Wednesday morning at 7:30 and Honor Squad at 7:45.

Girls the lockers look great. Keep up the good work!!!

Aviation Explorers Post 747 will meet at 8 p.m. Wednesday at the Basin Flying Service at Midland Air Park. President Ronni says, "Be there if you want to have a say about the banner."

Mums? Have you guys gotten your date yet? You better hurry, and then buy her mum from the Senior Class! Have your money ready when the officers come around this week. Don't forget your M o m s , too!! Homecoming is not far away, only one week and five days!!

We congratulate Deehona Wise for having been chosen as National Honor Society Sweetheart. We are proud of you!!

Now's the time for everyone to bring their dollars to support our Key Club. Yes the Activity Calendar is only \$1. This calendar has beautiful girls and all sorts of good information. It's a real good buy, so get one now!!

VICTORY DANCE!!
Yes our first big dance is this Friday in the Youth Center, from 10:30 p.m. to 1 a.m. Come dance to J.J. and his Music Machine, after we send those El Paso Rockets into orbit. Admission with your Youth Center Card is only 50 cents. Without it, it's \$2.50. Varsity football players with Y.C. cards get in free—without Y.C. cards it's \$2.50.

Junior Council and 100 Club members: Come over after school Friday to set up for the dance. Remember to come at 10 a.m. Saturday to clean up. All hands are needed! We've got spirit, yes we do, We've got spirit, how about you?

See you at the game! Mica, Janis and Deehona

ALL WE WANT TO DO IS FLY TO MIDLAND AND IT'S GOING TO TAKE AN ACT OF CONGRESS.

Whether or not Federal Express flies in and out of your town has probably been the furthest thing from your mind.

But improbable as it may seem, it will directly affect the way you're connected with the outside world.

In order to understand this more clearly, you need a clear picture of exactly what Federal Express is.

Federal Express is the nation's first and only airline created in order to deliver small important packages around the country overnight.

Blood plasma, computer parts, drugs, electronics, film, hospital supplies, checks, blueprints: we handle over 20,000 packages a night like these.

But before we came along, this was all done by using space on the passenger airlines.

The only problem was, it wasn't done as well as it could have been.

There was no such thing as an overnight delivery service you could really count on, mainly because the airlines were designed for people, not packages.

And people don't like to fly overnight; yet overnight is when packages like these must fly.

And people don't fly to smaller cities as much as they fly to bigger cities, so the airlines have discontinued many, many flights and routes in and out of smaller cities like yours. Yet the need for a reliable overnight package delivery system in these smaller cities has never been greater.

So when we went into business, we decided to do things differently. We decided to service not only the big cities in the country but many of the smaller cities as well. And instead of trying to do it with a transportation system designed for people, we created our own system, from the ground up, just for packages.

First we bought our own planes, which

gives us control of our packages every step of the way.

They're picked up in our own trucks, flown overnight in our own planes, and delivered the next morning in our own trucks.

We're faster, more reliable, and generally cheaper than the passenger airlines.

In fact, each night we're carrying more vital shipments than any of the airlines, which is why we need bigger planes.

So guess who's giving us the most grief over this legislation in Washington.

You guessed it, the airlines.

Senate Bill 3684 and House of Representatives Bill 14623 would give the Civil Aeronautics Board the power to grant us an exemption from current legislation while we file for a Certificate of Public Convenience and Necessity.

In other words, we could fly bigger planes like Boeing 727's which would free our smaller jets to service smaller markets. This translates into giving more cities more and better service instead of less and worse, which is the way things seem to be going.

It means that your businesses, industries, hospitals, and other vital institutions will be connected with the rest of the nation by a transportation system you can rely on.

And it means that instead of bypassing cities like yours someone is interested in including you in the scheme of things, for a change.

If this sounds like a good idea to you, then support your representatives in Congress on this legislation.

Because the way things are going, if Federal Express doesn't provide you with this service, chances are, no one else will.

FEDERAL EXPRESS
