Negotiators say accord reached on deregulation

Senate negotiators, after a stormy session with Energy Secretary James R. Schlesinger lasting into the early morning hours, said today they had reached a basic accord on the proposed deregulation of natural gas.

Although sources, who declined to be identified; said there was still a chance the negotiations might break down, most conferees expressed guarded optimism that a compromise may be near. An agreement would break the deadlock stalling President Carter's year-old energy program.

They said two relatively minor differences remain to be resolved on the controversial deregulation issue.

W.Va., said he hoped that those differences could be settled in about an hour later today. Sen. Henry M. Jackson, D-Wash., who leads the Senate conferees, said the negotiators decided to sleep on it because "some of us are tired.

Another meeting was scheduled for later in the day to take up the issues not yet resolved. Both involve the kinds of gas that will be eligible for deregulation on January 1, 1985, the date conferees have tentatively selected for lifting federal price con-

The conferees emerged with Schle-

door negotiations. Congressional leaders had hoped to be able to finish by midnight Thursday to keep the energy program's first anniversary from slipping by, but missed the selfimposed deadline.

On Thursday, Carter took note that a year had passed since he submitted the energy program to Congress. He declared that "precious time" already has been wasted and urged Congress to wrap up its deliberations on the legislation. The energy package had been stalled by the fivemonth debate over natural gas dere-

Russian jets force Korean plane down

MOSCOW (AP) - Premier Alexei a refueling stop in Anchorage, Alas- that the airline would send another N. Kosygin confirmed today that Soviet interceptors forced a South Korean jetliner to land on Soviet territory and said two of the plane's passengers were dead, Japanese sources said.

It was not immediately known how they died. Japanese officials here earlier said the Soviet Foreign Ministry was keeping them informed about the incident.

Fifty-one of the 110 persons aboard the Korean Air Lines Boeing 707 were reported to be Japanese. The plane had been bound from Paris to Seoul

via Anchorage, Alaska. The sources said Kosygin confirmed to visiting Japanese Agriculture Minister Ichiro Nakagawa the plane was now on Soviet territory and that two other passengers were in-

The nationalities of the dead and injured were not known.

WASHINGTON (AP) - American military sources say they have no evidence that Soviet jets used "hostile action" to force an Alaska-bound South Korean jetliner carrying 110 persons to land in a remote corner of

The Korean Air Lines Boeing 707 jet, en route from Paris to Seoul with

ka, was forced down Thursday after it entered Soviet airspace near the Finnish border close to the Arctic Circle, U.S. officials said

Although the officials said the aircraft, carrying 13 crew members and 97 passengers, was forced down, a high Pentagon official said there was no evidence that the Russians used 'hostile action." Airline officials in Paris said there were no Americans on the plane.

U.S. officials said they had heard speculation that shots may have been fired in connection with the landing, but one said "there is no way to confirm" any such reports.

Airline officials, citing State Department information, said all persons aboard Korean Air Lines flight

902, were safe. The plane left Paris at 1:39 p.m. (7:39 a.m. EST) Thursday. Officials in Washington could not confirm reports on the condition of passengers or the aircraft. There was

no definite word early this morning whether U.S. citizens were aboard. The South Korean Foreign Ministry said today that information it had indicated the plane made an emer-

gency landing after it violated Soviet territory but "not deliberately." A spokesman for KAL said today

Chaplin body theft told

Boeing 707 to Helsinki, Finland, tonight to stand by to pick up the passengers and crew when they are re-

Meanhwile, U.S. officials were trying to piece together just what hap-

There was no explanation of why the plane entered Soviet air space, but administration officials said radar reports seemed to confirm the

In speculating about how the Soviets may have forced the landing, an administration official, who asked not to be named, said:

"If a plane enters U.S. air space you tell the plane to land, if it is far enough in. If it doesn't follow your instructions, you may shoot it down.'

A special meeting of the President Carter's National Security Council was convened at 6:30 p.m. shortly after Carter was informed of the incident, associate White House press secretary Jerrold Schecter said.

Later in the evening, Carter was given a 20-minute briefing, White House officials said

U.S. officials attempted to play down the their involvement in efforts to locate the aircraft and maintain contact with the Soviet and the Seoul governments. The two countries do not maintain diplomatic relations.

gathered by the club in one of its projects. The taco sale is scheduled from 10 a.m. to 6 p.m. May 6 in Dellwood Plaza. (Staff Photo by Brian Hendershot)

Moro's wife makes plea

ROME (AP) - Aldo Moro's wife and children appealed to the government today to negotiate with his kidnappers, but the ruling Christian Democratic Party's chief parliamentary allies urged rejection of his captors' demand for release of jailed terrorists in exchange for the former premier.

Premier Giulio Andreotti's government, which has refused so far to deal with the kidnappers from the Red Brigades, made no immediate comment on the plea. Meanwhile, the cabinet was meeting to discuss an ultimatum received from the kidnappers Thursday

The family in a statement appealed to the government to "take a realistic attitude and declare availability to ascertain terms" for his release.

It said Moro's wife Eleonora appealed personally Thursday to leaders of the government and the Christian Democratic Party, of which her husband is the president.

Mrs. Moro, her son and three daughters had been publicly silent since the abduction March 16. But they were reported to have urged the government privately to negotiate Moro's release

The Red Brigades in a communique Thursday said Moro, 61, was still alive but would be executed unless the government agreed by 9 a.m. EST Saturday to negotiate the release of 'communist prisoners.'

Interior Ministry sources said experts determined the authenticity of both the communique and a photo demonstrating that Moro was still alive. It showed him with a copy of a Wednesday newspaper headlined Moro Assassinato?

Il Popolo, the Christian Democratic Party newspaper, said the picture was "evidence" Moro is alive, and "there exists no doubt about the authenticity of the message" that ac-

Christian Democratic officials said

the party secretary-general, Benigno Zaccagnini, also received another letter from Moro Thursday night, but they refused to disclose its contents. They said the signature appeared to be genuine

Andreotti and other leaders of the government party had met until 2 a.m. discussing the situation, but there was no word of any decision. Previously they rejected repeated appeals from Moro to exchange him for jailed terrorists, contending that he was acting under duress.

Press reports today said Interior Minister Francesco Cossiga threatened to resign if the government bowed to the terrorists' demand.

The Communists, Social Democrats and Republicans, three of the six parties making up Andreotti's parliamentary majority, called on the government to continue to reject the kidnappers' demands.

The "state cannot compromise on (Continued on Page 2A)

Delivery Service 682-5311 Want Ads 682-6222 Other Calls 682-5311 glass of wine after a regular meeting of the Municipal Council. Shortly after midnight, the streets

What happened next has been pieced together from the reports of police, judicial authorities and vil-

Around 2 a.m., Thursday, March 2, a mini-truck or station wagon drove up a dead-end road and turned right into the village cemetery. The cemetery's iron gate was open, as it always is. The vehicle stopped on a tree-lined central alley dividing rows of graves. Three or four men - investigators said later it would have taken at least three strong men to do the job walked to a grave marked by a simple oak cross with the inscription "Charles Chaplin, 16.4.1889-25.12.1977 - Born 16 April, 1889-Died 25 De-

With picks and shovels, they began what one official of an undertaker's company said was sure to be "very hard work" because the earth was heavy and wet after weeks of snow and rain. They worked for at least an hour before clearing the earth around a plain oak coffin with two silver handles and lifted it out. Marks in the grass later showed that the coffin was dragged for at least 50 feet before it was hauled into the vehicle. This was the last clue investigators were to find macabre mystery — the abduction of Charlie Chaplin's body At 1:50 p.m. the village gardener and cemetery gravedigger, Etienne Buenzod, 47, arrived at the cemetery and discovered the empty grave.

Investigators ruled out suggestions that a deranged person might have been behind the theft of the 300-pound coffin. "What about the others who helped?" one detective commented.

They later were to deny a report published in the United States that the body was stolen because Chaplin was born a Jew and that the thieves were against having him rest in a "Christian cemetery.

Investigators also tend to discount reports that a group of frenzied fans might have taken the body of the star of the American silent-movie era 'home" to his native England.

They say there is a remote possibility that the coffin was smuggled to neighboring France or Italy but that bringing it by air or boat to England was ruled out because of the danger of

Investigators lean to the theory that the body was stolen for ransom. Chap-lin's wealth has not been officially reported. But British newspapers valued his estate as high as \$100

Telephoned demands for ransom were received, in fact, but none of the callers have been able to prove they had possession of the body, officials

Polo longtime Midland tradition

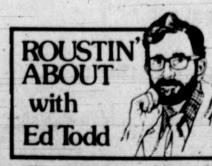

Yes, polo is coming to Midland in a big way this weekend. No polo buff or pony fancier would dispute that.

However, the sport certainly is not new to Midland. It's been here for at least two generations. And Midland andman Henry H. Bettis Jr. has some silver-clad proof of that.

It's in the form of a silver-plated champagne trophy bucket won in 1910 by The Midland Polo Club at the El Paso Fair. Engraved on the threehandled trophy are these names: Henry M. Halff, G. H. Coyle, John M. Cowden and B.A. Palmer.

Bettis is a grandson of the late George Houston Coyle, a polo pony dealer, horse trainer and horse racer who sold ponies to the likes of polo great Tommy Hitchcock Jr. and cowboy humorist Will Rogers.

Coyle, who came to Midland from Dallas in 1909 to groom horses for polo and to play the game here, recalled his daughter, Viola Coyle Bettis, 78, of

'They were playing right on the ranch on Western saddles and on whatever they could get a hold of,"

Coyle reportedly shipped his first herd of polo ponies to New York and Long Island in 1912. He left Mid-

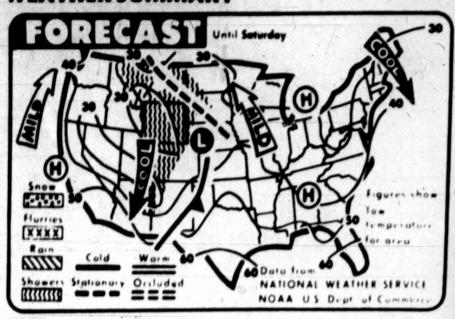

land in 1922 for Brownwood. It was in the mid-1920s when Rogers dropped in on Brownwood for a sche-duled show and wound up getting in a game or so of pole out on the G. H. oyle Ranch south of the city. On the field with the humorist were Coyle,

his son Carrell C. Coyle, Pete Patterson of Midland, polo pony dealer Jim Minnick of Crosbyton and industrialist Joseph E. Meyer of Newark, N.J. A testimonial to that is a photograph, treasured by Bettis, which depicts the six men on their mounts and mallets in hand.

Some years later, Coyle moved to Cisco. He died in 1940, at age 64, in New Orleans, where he was hospitalized following a fall from a horse in Canada a year earlier.

So much for that scrap of polo history. What's happening at the Midland Polo Club field this weekend will be games between the Tulsa, Okla., team and the Dallas team at 3 p.m. Saturday and then a tussle between the San Antonio team and the Wilson Ranch team of Midland at 3 p.m. Sunday. On the scene will be professional polo players Red Armour of Tulsa, Joe Barry of San Antonio, and

Dispatcher finds no difficulties

After her first week as the first woman dispatcher for the Midland Fire Department, Maxine Maddox said today no problems had arisen with her new job.

"I haven't had any problem with being the only woman member of the department because nobody's really made any big deal about it," she said.

"And it's been pretty slow this week. The calls have been scattered out so that I haven't really been pressed for time — except Tuesday when I got four calls 10 minutes before I got off work."

Prior to joining the Fire Department, Miss Maddox worked as dispatcher for a chauffeur-limousine service. A television show could be responsible for her new job with the

"I just thought it would be different and exciting. I watched 'Emergency' on television," she said. Fire Chief Raymond Lewis has said

other women may be added to the force as dispatchers. Until proper facilities are constructed, however, women firefighters are not in the

Miss Maddox will be in training for another five days, after which she will work the midnight shift.

The Fire Department now has five dispatchers who work at the central station serving the six Midland sub-

Hearings held on new policy in education

Public hearings on proposed new policies for the state's special education program for handicapped children were held at Alamo Junior High School Thursday morning and after-

R. A. Montgomery, assistant deputy commissioner for the Texas Education Agency, was in charge of the meetings. He said the purpose of the statewide hearings is to get citizen opinion and comment on the proposed new program.

The document containing the proposals lists many different kinds of handicapped children for whom the state must provide special education.

It defines these youngsters as students from ages three through 21 with educational handicaps, physical handicaps, mental retardation, emo-tional disturbances, learning disabilities, speech handicaps and pregnan-

A second group of the handicapped, listed from birth through age 22, have serious visual or hearing problems, or a combination of both.

Montgomery said the state must, by law, provide special education programs for students with any of these handicaps. "But we have a long way to go throughout the state before each one is served," he added.

The most difficult handicaps to serve are those for the severely retarded and for the completely deaf.

Montgomery, interviewed at the afternoon session, said one of the main objections of those attending the morning session was that the new proposals financially penalize the school district that attempts to provide a full range of services to handicapped children. He said citizens have suggested that such schools should receive more in state aid.

41:

LA

Mary Aikey, an educational diagnostician from Andrews, asked for a more flexible rule in the amount of time required in resource team teaching. The new rule proposes that each child get a minimum of one hour of special training per day. Ms. Aikey said some children need only a halfhour and others might need an hour

Hospital board occupied by indigent care policy

Guidelines for providing indigent care occupied much of the attention of the Midland County Hospital District Board of Directors Thursday afternoon, as the group considered wording to be used in the policy

A draft agreement calls for care of "needy and indigent" patients. defined as persons who live within the county, are not eligible for government programs to pay hospital costs. and are unable otherwise to obtain funds to pay their bills.

The draft statement would apply only to hospital costs and not fees charged by private physicians. Board attorney Ted Kerr told members the Midland County Medical Society has requested that such fees be included in the guidelines.

However. Kerr said, there is considerable doubt about whether payments to private physicians would be legal under the Texas constitution. New board member Dr. Michael

Burleson suggested consideration of a plan to set up an out-patient facility or nurse-practitioner to handle nonemergency cases. Otherwise, he said, the emergency room is going to become more and more over-loaded with general medical care cases.

Kerr said he would study the law further and examine possible methods to handle doctor payments before presenting a revised recom-mendation to the directors at their next meeting

In other action, the board voted to

purchase two lots in the 2100 block of Illinois Avenue if the hospital is granted a certificate of need for additional parking space.

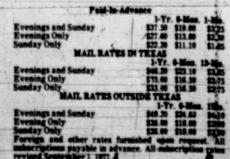

Kerr said the land would be purchased from the Midland Area Foundation Inc. at the price paid by the foundation.

Also Thursday, the directors elected E. H. Magruder Jr. president for the coming year; L. Decker Dawson, vice president, and R. L.

Pendleton, secretary. Burleson and Frank Cowden Jr. elected as directors in the April 1 election, were sworn into office by County Court at Law Judge Willie

HOME DELIVERY

piloted by Bill Hubbs of Pecos; a British Spitfire owned and piloted by may be the event of the year. Typical spring weather dominates area forecasts

Midlanders had a right to expect another typical West Texas spring day today as warm temperatures and winds make up the forecast.

The National Weather Service at Midland Regional Air Terminal predicts partly cloudy skies through Saturday with the temperatures to reach into the middle 80s Friday, but to drop to the high 70s Saturday. Southwesterly winds of 20 to 30 mph are to diminish to 15 to 30 mph tonight, the weatherman says. A low in the middle 50s is expected tonight.

Area towns this morning reported sunny skies and cool temperatures.

Fair skies and mild temperatures dominated the state meather picture, but the possibility of scattered thum-

derstorm activity, particularly in North Texas by the evening hours,

Forecasters called for continued fair skies in South Texas, partly cloudy skies in Northwest Texas and mostly cloudy skies in Northeast Texas. It was to be windy in Northwest Texas.

Only a few patches of clouds in South Texas and in the Panhandle kept the state from reporting fair skies statewide. Early morning tem-peratures ranged from the 30s in the mountains of Southwest Texas to the 50s in South Texas. Early morning extremes ranged from 42 at Lufkin, Wichita Falls and Dalhart to 58 at Del

man's life. But the newspaper took no stand on dealing with the kidnappers. The ultimatum spoke of "hundreds of communist prisoners in the con-

centration camps of the imperialist state" but did not specify how many must be released. Nor did it specifically demand freedom for the 15 Red Brigades members, including founder Renato Curcio, on trial in Turin An estimated 400 leftist extremists are in Italian jails, serving terms for arson, murder and other crimes of

Scouts in need of old uniforms

The Boy Scouts of Midland are in need of any outgrown or unused Scout uniforms that may be available in the city. Scoutmaster Lee May said Scouts and adults will pick up these uniforms from 1 to 6 p.m. Saturday.

Those having uniforms which they

wish to donate may telephone Mid land radio stations to give their ad-

If a pick up on Saturday afternoon is inconvenient, donors are asked to call Scout headquarters at 684-7171. A pick up early next week can be arranged, according to May.

Hedge to line Odessa highway

ODESSA-In a few years, a hedge of purple sage brush will line the south edge of Highway 80 from Loop 338 to Meadows St. here after 1,200 of the county's "adopted flower" were

dedicated in a ceremony Thursday. El Paso Products Co. is donating the plants and the Texas Departmen of Highways and Transportation will plant them and maintain them for a year, according to Grace King of El Paso Products Co.

"We're hoping other companies will follow suit," she said. The Oasis Foundation here last year planted purple sage brush in the Highway 80 median and Ms. King added the company is trying to help in beautifying the highways going into Odessa.

The plants were difficult to obtain

this year, she said. After the highway department has maintained them for the year, the plants should be large enough to thrive without continuous care, according to the company

Tuesday's message was a fake manufactured by Andreotti and his "acomplices" as part of a "psychological

Whale hunt gives journalist taste of Eskimos' life

By ROBERT WELLER

ON THE BERING SEA (AP) -Only walrus hide a quarter-inch thick separates the whaling crew from the icy Bering Sea. At times you can see the water through the skin of the boat.

Leonard Apangalook, the captain, works the sails skillfully to search in silence for the bowhead whale Preston Apangalook — the crew is

brothers - is ready to toss the harpoon if a whale draws near. Paul stands lookout The other brother, Mike, helps Leonard monitor

CB radio traffic in Eskimo dialect on

whale sightings

made up of the four Apangalook

On a recent trip, I sat in the middle of the boat, ducking the boom each time the sail swung round. Despite several layers of expensive winter clothing, the Arctic cold and cramped

conditions made it so miserable I felt I might never be warm again.

The Apangalooks didn't seem to notice the cold, though. And there is an unspoken rule on the whaling boats, especially for guests, that you never ask to go back just because you

At my side was what looked like a giant balloon made of skin from a spotted seal. All but the seal's head was used, even its feet. The device was attached to a harpoon and meant to float atop the surface and help track the whale underwater after it

Talk was kept to a minimum aboard the 29-foot boat; the bowhead has sensitive hearing. The quiet, broken occasionally by the sound of ice sliding under the hull, emphasized the sense of purpose.

A controversial quota system, imposed by authorities in fear the bowhead would become extinct, increased the tension. Each Eskimo village, like the Apangalook's town of Gambell is entitled to kill one whale or wound two, whichever comes first.

Many families will go hungry in Gambell if the hunters wound two whales before they succeed in killing

For hours we circled off St Lawrence Island, less than 30 miles from Siberia. About 20 other crews from Gambell were with us, creating a jagged line across the few areas of open water

With the white sails and white hulls, it could have been opening day at the vacht club except for the huge ice floes reflecting the sun with blinding intensity. Soon our eyes were locked in a squint

We saw walrus and seal, and one crew reported two polar bears. But this was a whale hunt! When we spotted several whales at a distance. the Apangalooks got "whale shivers." I felt just plain shivers.

After about six hours without getting closer than several hundred feet from our quarry, it was time for a break. Preston tied the boat up to a pole he'd stabbed into the ice. Suddenly Leonard gestured frantically a whale was barely 100 feet away

First we saw the head, almost the same color as the water, moving smoothly toward us. Then the bow head's massive back broke the surface as it headed straight for us.

"Raise the sail." Leonard com-

The scrambling effort to dislodge the light vessel from the ice and raise the sail apparently spooked the bowhead. Barely 10 feet away it dove under us and headed beneath the ice. They said it was a small whale, but it looked big enough to toss us into the drink

It had seemed close enough for a toss of the harpoon, laden with a gunpowder bomb that explodes if a solid hit is made. But Preston explained that it is the custom to wait until the whale is right next to a boat assuring a kill.

But that also increases the danger. Bowheads can capsize skin boats.

Had Preston hit the whale, we were to throw out the two floats booked to the harpoon. The harpoon is not connected to the boat itself because even a small bowhead could easily drag a skin boat down. The floats help the whalers find the mortally wounded whale when it returns to the surface and finish it off.

Leonard, following tradition, took the blame for the lost whale "We should have just let the boat drift and not tried to raise the sail."

In the excitement, something had clearly as trusted by the Kremlin as changed. "That warmed you up, didn't it?" said Paul. It was true. I found myself looking out intently, no longer attempting to turn my face from the wind

Later there was talk of how they would explain this to their 66-year-old father, John, one of Alaska's most successful whale hunters. He had flown to Nome to see a doctor a day before the hunt.

Hours later, as darkness began to set in, the CB talk was of who would lower sail first and head home. No one

wanted to leave first When it happened, it seemed that all the sails dropped at once. Mike turned on the motor, unused during the silent hunt. "When we go home,

we go home," said Paul. He explained that crews never know what to expect as they quit the hunt. "We could end up spending the night on the ice." he said.

The wind was nearly gone as we headed home across the now-placid water, but nothing is easy in the Eskimo world. Several times we got stuck in thin ice and had to rock the boat violently to get through

But the first full day of hunting by Gambell crews was not a total loss. Whalers from Savoonga, on the same island as Gambell, had gotten a whale more than 40 feet long. Some Gambell hunters traveled more than three hours roundtrip by snow machine to get their share.

The two villages, each with about 400 residents, share their catch. A 40-foot whale will provide about 40 tons of rich red meat. The meat includes muktuk, the favorite Eskimo dish, I which is the skin and layer of fat directly under the skin.

Schevchenko: important defection at critical time

(EDITOR'S NOTE: Szulc is a Washington writer whose latest book, "The Illusion of Peace." a diplomatic history of the Nixon years, will be published in May.)

By TAD SZULC Special to The Washington Post

WASHINGTON - As he scurries under federal protection from hideaway to hideaway along the eastern seaboard of the United States. a 47-year-old Soviet diplomat of exalted rank named Arkady N Shevchenko is writing one of the most unusual chapters in the annals of

postwar political defections The most improbable of defectors. the scholarly and self-effacing Shevchenko served as under secretary general of the United Nations for political and Security Council affairs. the No 2 political job in the world organization under Secretary General Kurt Waldheim when he made up his mind sometime on Thursday April 6. to defy a sudden order from Moscow to return home at once

No Soviet official of Shevchenko's stature had ever defected to the West

The initial Soviet charge that Shevchenko had been "coerced" by American intelligence into defecting and is being kept in the United States against his will is nonsense. He, vy hints dropped by Communist sources in New York that he had a "drinking problem" seem to come under the heading of a character assassination The defection obviously was an acute political and propaganda embarrassment for the Kremlin

And this embarrassment may deepen and turn into considerable discomfort for the Soviets if Shevchenko agrees, as may well happen. to share his knowledge of Moscow's diplomatic and disarmament policy secrets with the U.S. government. It would be particularly important at a time when Moscow and pinaton are entering the final shase of

negotiations for a SALT !! agreement Nothing would be more valuable to the L'nited States at this difficult juncture in the talks than to acquire through Sheichenko an inside understanding of how the Russians potentially the richest prize in diplomatic intelligence ever handed the United States

Contrary to Soviet charges. however. Shevchenko's willingness to submit to what are euphemistically called "debriefings" - if this is the case — would not necessarily suggest that he was recruited by the CIA or

This is not the way intelligence operates CIA specialists who have handled Soviet-bloc defectors since the late 1940s say that recruiment of defectors is exceedingly rare. The vast majority - such as KGB officers Yuri I Nosenko and Anatoli M. Golitsin - defect on their own, for whatever reasons, and intelligence co-option comes later, often as part of a quid pro que for protection and asylum in the United States and the chance to build a new life here. In

situations of this type, the first concern — a concern that has never been fully resolved after 14 years in Nosenko's controversial case whether the defector is a KGB "deep plant or a possible double agent

None of these considerations would apply to Shevchenko Traditionally the CIA prefers to recruit "agents in place - Col Oleg Penkovsky and Col Peter Popov. US covert agents who were executed by the Russians. were classical examples - who may serve indefinitely as deep-penetration intelligence sources unless they are

Defections are encouraged only rarely and when there are reasons to suspect that the situation is ripe for it To a given case And when it came to Shevchenko, the political and diplomatic risks in approaching him to defect would have been unacceptabie to the United States Ope simply doesn't urge senior ambassadors to

Now that Shevchenko has taken the plunge, however, he becomes an object of intense interest to the Inter-Agency Defector Committee, which is composed of representatives of the CIA, the FBI, military intelligence services and the State Department

plan and formulate their negotiating. And this probably explains why FBI positions. In this sense, Shevchenko is agents have been discreetly protecting Shevchenko since he decided not to return to the Soviet Union and spent several days hopping between motels in Pennsylvania's Pocono mountains (surprisingly registering under his own name at a White Haven. Pa) and friends' homes in New York City

> American officials, of course, have refused comment on any aspect of the Shevchenko affair, obviously an exceedingly sensitive one, except to say that he is free to stay in the United States, go home, or choose some other place of exile in the world

Ten days after his dramatic decision. Shevchenko's motivations remain wholly mysterious. All he said through his American lawyer before vanishing from his luxurious apartment on New York's East 65th Street late last April 9 - the defection was kept secret for nearly three days was that he had political "differences" with the Soviet govern-

Whatever this meant the gesture was as stunning as it was unprecedented Previous defectors had included some fairly senior officers of the KGB, the Soviet secret service, a destroyer commander with a wide and useful knowledge of the inner workings of the Soviet navy, quite a few Mig pilots, and a smattering of lesser diplomats - and that was all Western governments ever expected

BUT SHEVCHENKO was part of the elite of the Soviet establishment A career diplomat and protege of Foreign Minister Andrei A Gromyko he was his personal adviser on

disarmament in the early 1970s when the first Soviet-American agreement on limiting strategic arms (SALT) chenko received an ambassadorial title in 1971 when he was 40 years old the youngest Soviet foreign service of ficer to achieve it

Two years later, an even greater accolade was accorded him His government recommended him for the United Nations undersecretaryship. This was tantamount to being appointed by Waldheim, since under standing practice the top professional job in New York is reserved for a Russian Westerners never doubted that Shevchenko was Moscow's eyes and ears at the United Nations, with access to much significant international diplomatic information - no matter what is said about the ostensible independence of international civil ser-

Shevchenko, in other words, was any of its top envoys and, just as clearly, he was a comer. He had spent five years as undersecretary general the had also lived in New York from 1963 to 1971 as the disarmament ex pert of the Soviet mission to the United Nations; and his \$76,000 annual contract had been renewed for two more years only last Feb 3

Given Shevchenko's well-rounded legacy is international, experience everything from disarmament to the Middle East and United Nations peacekeeping forces streamed through his office he was a likely candidate for a Soviet deputy foreign ministership the next time around Perhaps someday he could even aspire to succeed Gromyko his aging growing legacy of THE patron, as foreign minster

The general view is that Moscow vaccination debacle will not use Sheychenko as an excuse brought more than 50 to let Soviet American relations lawyers from across the deteriorate even further although country to a federal Soviet Ambassador Anatolyi F Dobrynin has raised the subject with nesday to begin a billion-Secretary of State Cyrus R. Vance dollar legal battle likely The defection unpleasant as it is to to employ hundreds of the Russians, is essentially ex-lawyers for several traneous to the basic relationship bet years ween Moscow and Washington

Nevertheless the administration is handling Shevchenko with extreme of the nation's legal care to avoid needless frictions. The profession lawyers hope that the Russian dipolomat will allowhimself to be debriefed in secret of Americans who by American officials is a factor in allegedly suffered this exercise in utmost discretion

the approaching trial of the Soviet give everyone in 1976 to computer expert Anatoly Shcharan Stop an expected outsky on charges of spying for the break of swine flu United States Shcharansky's former roommate Dr. Sanya L. Lipavsky, swine flu cases were ever had covertly worked for the CIA at reported, but the flu shots one point, and the administrator here themselves prompted worries that the trial may be used as widespread complaints an attack on American intelligence, about serious side effects operations in the Soviet Union It thus and the vaccination doesn't want to have the Russians program was finally throw the Shevchenko case into the suspended hopper of intelligence accusations

Meanwhile it is necessary to sort out the question of Shevchenko's legal status in the United States. He has not yet requested political asylum here and, accoding to his New York attorney. Ernest A Gross a one-time American delegate to the United Natons, he has no intention of doing

This is one of the many mysterious facets of the Shevchenko story

General given asylum

NEW YORK (AP) -Pyotr Grigorenko, a former major general in the Soviet Union's Red Army and a member of the Communist Party for 50 years, has a new home.

Stripped of his Russian citizenship, Grigorenko cried when he learned this week that he had been granted asylum in the United States.

"I would like to return home," he said through an interpreter. "I left my earth and I left my peo-

The 70-year-old Grigorenko came to the United States in November to undergo a prostate operation. While here, his Soviet citizenship was revoked.

Soviet President Leonid Brezhnev said Grigorenko lost his citizenship because of "behavior that has damaged the prestige of the Soviet

The much-decorated military man was a friend of such dissidents as Andrei Sakharov, and had spent six years in psychiatric hospitals for his opposition to Soviet government policies, particularly those involving the government's treatment of the Crimean Tartars.

Maurice Kiley, district director of the Immigration and Naturalization Service, said Grigorenko's status was temporary and will be reviewed in one year.

"I am very honored that I have been granted asylum here. It is a great privilege," Grigorenko

He, his wife Zenaida and stepson Oleh are visiting another stepson, Andrei, a draftsman in Long Island City. His wife and stepson are still Soviet citizens and are here on temporary visas.

Grigorenko said he plans to lecture on human rights, and in-tends to write his memoirs and a military history of World War II.

TODAY at 7:30 and 9:10

Federal Trade Commission wants to take a closer look at just what getting for their money.

Advertisers spend about \$66 million a year to plug their wares in comics. And it's no wonder, says the commission's William Erxleben:

"Between the ages of 5 and 15 there are 40 million potential buyers. Independent figures show that 82 percent to 92 percent of all children between the ages of 7 and 11 read comic books.

"And our estimates indicate that for every \$1

these come-ons and the spent on comic book ads, there are \$3 in sales. That amounts to a \$200 million product industry young consumers are each year," Erxleben

> He said the commission worries especially about a child's first contact with the "free enterprise system."

"Children can become very disillusioned with the system and legitimate business should be very concerned," Erxleben said in a telephone interview.

He related a story told by a fellow worker whose daughter had saved for weeks to amass the 95

cents called for by a comic book ad. The pitch was for a machine that would turn plain paper into dollar bills.

"It arrived and the girl

put the paper in, turned the crank and nothing happened. She hadn't seen the fine print about putting your own dollar in first, then the plain paper. It (the ad) admitted there was nothing magic involved," Erxleben said.

DEATHS

B. Franklin

B. Herbert Franklin, 72, of 1901 Holloway St. died Tuesday in a Midland hospital.

Services were to be at 10 a.m. today in Newnie W. Ellis Funeral Home with the Rev. Bob Porterfield of West Kentucky Street Baptist Church officiating. Burial was to be in Resthaven Cemetery.

Franklin was born Aug. 1, 1905, in Hollins, Ala. He moved to Texas at an early age and lived in Orange, Alice and Humble. He attended Baylor University. Franklin began working with Houston Power and Light before working with United Gas Pipeline Co.

Franklin in 1944 went to work for Superior Oil Co. in Lafayette, La. He moved in 1945 to Midland, worked in the Persian Gulf two years and returned to Midland in 1953. In 1962 he retired as field auditor from Superior

Survivors include his wife, Doreen Franklin of Midland; two sons, Michael Franklin of Kerrville and Patrick Franklin of Hawaii; a brother, Ellis W. Franklin of Houston, and a sister, Marguerite Riley of Green-

Pallbearers will be Bill West, Ed Darnell, Edward H. Judson, Donald Judson, Richard S. Brooks and Vaughn Robertson

Mrs. Martinez

SWEETWATER - Mrs. Pascual Martinez Sr., 74, of Sweetwater, mother of Ester Cordova of Midland, died Thursday in a Sweetwater nurs-

Services will be at 2 p.m. Saturday in Cate-Spencer Funeral Home. Burial will be in Sweetwater Cemetery

Mrs. Martinez was born May 1, 1903, in Grand Falls and had lived in Sweetwater most of her life. She married Pascual Martinez Sr. Feb. 21, 1921, in Sweetwater. She was a Jehovah's Witness

Other survivors include her hus band, four sons, six other daughters, two sisters, a brother, 55 grandchildren and 33 great-grandchildren.

Mrs. Shive

BIG SPRING-Services for Mrs. Percy (Ruth) Shive, 82, of Coahoma, were to be at 3:30 p.m. today in Nalley-Pickle Funeral Home with burial in Trinity Memorial Park

Mrs. Shive died Wednesday in a Big Spring hospital after a lengthy illness. She was born July 21, 1895, in Milam County, and moved at the age of 16 with her parents, the William Wolfs, to Coahoma. She was married to Percy Shive on Oct. 14, 1919, in Coahoma. He died in 1958. She was a member of the First Presbyterian Church of Coahoma

Survivors include a son, Rex Shive of Coahoma; two brothers, Claude Wolf of Casa Grande, Ariz., and Otis Wolf of New York City; five sisters, Mrs. A. C. Hale of Coahoma, Mrs. H. L. Stamps of Big Spring, Mrs. A. A. Yale of Brownwood, Mrs. Cleve Holden of Casa Grande, Ariz., and Mrs. Bradley McQuerry of O'Fallon, Ill., three grandchildren and two greatgrandchilren

David Evans

MASON - Services for David 'Wes" Evans, 81, of Kerrville and formerly of Mason were to be at 1:30 p.m. today in Mason Funeral Home with burial in Long Mountain Cemetery. He was the brother of Lethy Gamel of Midland

Evans died Wednesday night in a Kerrville hospital.

He was born April 6, 1897, in Burle-son County. He married Ethel Blanche Sept. 7, 1919, in Mason. She died June 4, 1954. He then married Opal Green Nov. 11, 1967, in San

Other survivors include his wife, five sons, seven daughters, a brother, a sister, three stepdaughters, two stepsons, 45 grandchildren, 19 stepgrandchildren, 32 great-grandchildren and eight stepgreat-grandehil-.dren.

Zula Tripp

MONAHANS-Zula Blanton Tripp, 86, of Monahans, mother of Mrs. J. C. Lyles of McCamey, died at noon Thursday in a McCamey hospital.

Services will be at 10 a.m. Saturday in the Wilson-Miller Funeral Home here, with burial in a Big Spring

She was born June 21, 1891, in Hutto, and was married to Winfield Tripp Aug. 17, 1909, in Roscoe. He died in 1949. She had lived in Big Spring 20 years, and in Monahans the past 49 years.

Survivors also include three sons, two other daughters, 13 grandchildren and 19 great-grandchildren.

Drug search notover

At least three more persons were arrested Thursday in a two-county drug roundup by Department of Public Safety narcotics and intelligence officers, Midland police and Ector County Sheriff's deputies.

Marshall Odell Whitmire Jr., 28,

and Develan Jean Whitmire, 20, both of the 400 block of Cowden Avenue, were released Thursday afternoon on \$10,000 bond each. Carl Arlle Chambers, 21, of Odessa also was arrested Thursday and released the same day on \$25,000 bond. All were charged with delivery of a controlled substance.

Warrants for four persons in Ector County and five in Midland County today remained to be served.

The round-up is the result of a twoand-a-half-month investigation by Midland and Ector counties and the Department of Public Safety.

Arrests began Wednesday when an Odessa College music professor, Charles Edward Baxley, 28, was taken into custody and charged with delivery of LSD. Arrests continue with DPS officials expecting all but four persons to be arrested within the next few days. The four persons are out of state and "may be hard to find," a DPS spokesman said.

Two Midlanders were arrested Wednesday. Benjamin Aaron Brunston, 21, of the 2300 block of North A Street remains in custody today in Midland County Jail in lieu of \$60,000 bond. Brunston was charged with three counts of sale of heroin, and one count each on the sale of marijuana, methaquazline and amphetamine. Marsha Wilson Stilwell, 30, of the 3000 block of West Kansas Avenue was released Thursday on \$30,000 bond. She was charged with one count each of sale of heroin and placidyl.

Of the 17 persons arrested Wednesday in Midland County, four still are in custody in Ector County Jail. One of the 17 released Thursday was Rocke Flannigan, 22, a witness who was represented by deposition last week in the inquest into the death Jan. 22 ofLarry Lozano in Ector County Jail. Flannigan, charged with one count of sale of marijuana, was released on \$10,000 bond

The Midland draug charges are being presented to a Midland County grand jury this week

wider service

AUSTIN-Southwest Airlines has filed an application with the Texas Aeronautics Commission to include service to Amarillo and Beaumont-Port Arthur with Dallas as the connecting point to these cities from other towns the airline serves. Mid-landRegional Air Terminal wouldhave flights to these cities through Dallas, if the application receives approval.

The airline is asking to provide non-stop, through and-or connecting service between Amarillo and Dallas; Austin, Houston, San Antonio, Corpus Christi, Harlingen and Beaumont-Port Arthur and between Beaumont-Port Arthur and Dallas, Lubbock, Midland-Odessa and El Paso.

The first non-stop operations will be between Amarillo-Dallas and Beaumont-Port Arthur-Dallas. Connecting services will be provided between Amarillo-Austin and Amarillo-Houston. The remaining markets will be opened as they develop, according to Southwest's application.

A hearing on the application will be held at 9 a.m. June 5 in the State Office Building here.

March starts Saturday

Midlanders Saturday are being urged to join a fight - against birth defects.

The first 20-kilometer March of Dimes "Superwalk" will begin at 8 a.m. at Memorial Stadium. Walkers will follow a route which weaves through Midland, eventually returning to the stadium, a spokesman for the local March of Dimes chapter said.

They will collect contribution pledges for each kilometer walked. Funds raised will be used to support research, education, medical service and community programs provided by the Midland County March of Dimes chapter. The local chapter also plans to pur-

chase an intensive care incubator and transport unit for the newborn nursery at Midland Memorial Hospital, the spokesman said. The "Superwalk" is being spon-

sored by KCRS radio station and Burger King.

Further information on the walk may be obtained by calling 682-2573.

Southwest seeks Top Houston police dept. official fired

HOUSTON (AP) — Assistant Police Chief Carrol M. Lynn, charged with obstruction of justice after being arrested by federal authorities April 10, has been fired.

Police Chief Harry Caldwell said Thursday he offered Lynn an opportunity to resign but Lynn "opted not to take it."

Lynn, 45, who had been assistant chief since Dec. 3, 1976, also is a former police chief and the highest ranking Houston police chief ever accused in federal court. Assistant City Attorney Al Levine

said he made Caldwell's offer to Lynn to accept the former chief's resignation. Levine described the offer as "a matter of courtesy." Lynn has been free on \$50,000 bond

since his arraignment before U.S. Magistrate Lingo Platter following an investigation by the FBI. Conviction of the charge carries a maximum sentence of five years in

prison and a \$5,000 fine. In his announcement that Lynn had

been served papers of indefinite suspension, the same as being fired, Caldwell said the reason for the firing "is based on the facts in the affidavit filed before the U.S. magistrate in rest.

the recent case resulting in his ar-In the affidavit filed by the FBI, Lynn was accused of telling former. Houston businessman James Vincent Holden that he could have certain

charges against Holden dismissed for

a fee of \$45,000. The FBI report said Holden made two payments to Lynn, totaling \$26,-000, but that \$25,000 has been reco-

Al James, director of the Civil Service Commission, said that Lynn, who served with the police depart-ment 23 years, will be eligible to receive a pension totaling 36 percent of his base annual pay of \$40,239 or some \$1,200 a month.

He said Lynn will be eligible to receive his pension payments event if convicted and sentenced to prison on the obstruction of justice charge.

FLAG-BEARING RIDERS open the American Junior Rodeo Association rodeo at Joe Thorp Arena Thursday night. The event continues with daily performances at 7:30 p.m. through Sunday.

Huge crowd expected for D&D club meeting

to be on hand Saturday night for the Desk & Derrick Club's Industry Appreciation Night Banquet in the Midland Hilton

The banquet is one of the major events of the Desk and Derrick Clubs Region V annual meeting which gets underway tonight with a "Welcome Aboard" meeting and tour of the Permian Basin Petroleum Museum, Library & Hall of Fame.

Registration began this morning and will continue to 7 p. m. Signups will resume at 7 a. m. Saturday at the Midland Hilton

R. B. "Buddy" Hyde of Houston, president of Dresser Industries Oilfield Products Group will be the banquet speaker. Hyde began his career with Dresser as a sales and service engineer for the

old Magnet Cove Barium Corp. (Mag-

cobar) in 1949 following his gradua

tion from Texas A&M Univerity with a degree in Chemical Engineering. He has served in the Magcobar organization in a variet of management positions-district manager in Utah and Oklahoma, chief service engineer, manager of engineering and marketing services and manager of the Research and Engineering De-

partment, In 1968, he was promoted to manager of U.S. and Canadian Operations, a position he held until 1969 when he was promoted to executive vice president. In June 1972, Hyde became president of the Oilfield Products Division and this year was named presided of the Oilfield Products Group.

The theme of the annual meeting is "Gala Cruise" on the U.S. Midland Hilton. The cruise will embark at 7 p.m. today at the museum. The business session will be opened

at 8: 30 a. m. Saturday following a 7: 30

President's Breakfast in the Midland Joyce O'Bannon, with American Quasar, is the general arrangements chairman for the meeting. She and William H. Collyns, editor of The Reporter-Telegram, will make welcoming remarks. They will be followed by Clarke Straughan, area manager of the Compton Corp. in Midland. He will speak on the "Oil and Gas Story," a television film being prepared for national showing on a major network. Straughn is on the board of directors sociation and is a member of the West

The business session will continue until noon Saturday. At 1: 30 p. m., Dixie Lee, Association

Deadline extended

AUSTIN, Texas (AP) - Secretary of Transportation Brock Adams told Texas Thursday that he will let the state seek an amendment to the deepwater port license offered previously

to Seadock Inc. The telegram to Bob Casey, chairman of the Texas Deepwater Port Authority, said the April 20 deadline would be extended to allow the state time for the amendment application. Adams also said he would expedite

the processing of the amended appli-"This action is to the benefit of Texas and the nation," Casey said. 'The Texas Deepwater Port authority will now move forward expeditiously to get the amended application

and proceed with the project." Seadock Inc., made up of private financial backers, decided recently against going ahead with it plans for a deepater port. The state agency then took up the proposal and asked for the license that had been offered Sea-

Society aims to protect butterflies The Washington Post WASHINGTON - Butterflies are commonly fierce and often revolting (from a genteel human point of view) but they are beautiful and some of them are in Hence the Xerces Society, named for an extinct butterfly and dedicated to the proposition that too many butterflies have died. And not only butterflies. Numerous beetles and

converted into superhighways, supermarkets, supersecret installations and other super examples of mankind's messing up the world. The society has 500 members, "people who like butterflies," as you might guess, and Roger Pasquier, their treasurer, has just settled in at the Smithsonian Institution where he is working on a

other bugs face extinction as their natural homes are

book about birds. Birds eat butterflies. Pasquier is less worried about natural predators, however, than unnatural ones, such as humans bulldozing the meadows.

He arrived here a few months ago from New York where he lived on the 12th floor of a building and saw little, except an occasional monarch flying past. Manhattan is really no good for butterflies, and he looks forward to seeing a lot, now that he's nearer the

good earth, though downtown Washington is not actually a butterfly sanctuary either. Pasquier is trim, neat, well-modulated and 30. His first love is birds, which he began investigating when

he was 7, so that by his 20s he knew every bird that "I did not discover Darwin until I was in the seventh grade," he said — showing that it is never too late to learn, and never mind all the wasted

Butterflies and insects, like orchids, dogs, and the living world in general, vary in the most wonderful ways - in size, color, pattern and habitat.

Some of those gorgeous ones you see flitting along a dirt path at the edge of a woodland, on the fringe of a pasture, seem to be the ultimate in a life of a pasture, seem to be the ultimate in a life of indolent bliss, moving at leisure from a patch of sunlight to a bit of shade, done up in blue and vermilion, feasting on the nectar of wild orchids, say, and getting the best to be got from a summer's day.

"I also remember seeng a viceroy imbibing moisture from a dead rabbit," wrote a contributor to one of the society's publications. And some of those indolent butterflies along the forst edge are busy patrolling, defending their territory from other butterflies.

Life is as grim - and perhaps as beautiful -

butterfly as for anybody else. It used to be said the rich and powerful are killing all the butterflies, but that was not really true, unless you mean "humans" when you say "rich and

Proxmire, D-Wis., are among the Washington members of the society, and the butterfly's protectors include such unlikely patrons as Standard Oil, which has fenced off several acres at one of its installations in Los Angeles to protect the breeding grounds of the El Segundo blue (Philotes battoides

The Nature Conservancy is negotiating for some land at Antioch, on San Francisco Bay, the ancestral seat of Lange's metalmark, a butterfly. But unfortunately the last Xerces blue was spotted in 1941. on U.S. government land and is now thought to be as extinct as a dinosaur.

Besides doing what it can to protect the habitat of rare buterflies, the society puts out two magazines and three newsletters a year. It conducts an annual butterfly count on the Fourth of July. In this (the forms are only a bit more complicated than the income tax), you report all the butterflies you have seen in a certain area. It should be known that but-terfly enthusiasts are capable of examining "100 willow trees but did not find a single butterfly egg ..

Willows, in fact, are excellent for several butterflies, and of course milkweeds of several kinds, and parsley, which is even dearer to the swallowtails than to the cook, and buddleias and monardas— from time to time the society prints notes on plants that butterflies esteem. The membership of \$5 a year is tax deductible. The society has been given grants by the World Wildlife Fund and private citizens.

A question that will "never finally be decided" is whether it makes sense to preserve species facing extinction. Some people go into a Grade-A tailspin at the thought of any species dying out, while others (perhaps finding some inner need to be as rough, tough, hardnosed, lean-jawed, etc., as possible) say to hell with 'em. If they can't make it, well it's a tough world, baby, etc. Such persons tend to be solicitous about their own

silk shirts and electric platinum-plated toothpicks, but the plight of a wild species means no more to them than the plight of a used Kleenex.

Pasquier says a couple of butterflies in the Everglades are threatned and so is the Karner blue. up near Albany, N.Y. That one was discovered by Vladimir Nabokov, the novelist and great student of the butterfly. "You may find two pieces of land that seem much

the same," said Pasquier, yet one regularly has a certain butterfly and the other never does.

'You may say, 'There is a great deal of the plant that this butterfly's larvae feed on,' but you may overlook the fact that maybe that land does not have the right kind of plants for the butterfly to perch on. Butterflies are very particular, not only about the

plants on which they lay eggs, but also about the plants on which they perch to take the sun." Pasquier once spent time at a nature station on

Long Island, where people go to study terns. There he discovered butterflies at the age of 22. The wonderful orange monarchs, he discovered, migrate from eastern Canada to northwestern

Mexico. Not in great monotonous predictable waves (as birds migrate) but in spurts. Some monarchs migrate, some do not. Some go all

the way, some won't. By banding monarchs (a small paper tab on the wing), more is being learned of their habits, for even in so showy and obvious a butterfly as the monarch, some mysteries remain. The society's founder, Robert Pyle, has been to Papua New Guinea to advise the government there about its remarkable butterflies, which are an object

of export for collectors. Many of the society members are young and much occupied quite apart from the society's affairs — "it was founded by people who had a great deal else to do," said Pasquier, "such as graduate school, raising families and so on." Who knows how passionate interests in the real

world start? Pasquier once fell in love with dinosaurs, then antelopes — both them difficult for modern urban man to enjoy on a nature walk nowadays.
