Roots of May Day found in cemetery

By F.N. D'ALESSIO

FOREST PARK, Ill. (AP) - Thousands of people massed in Moscow's Red Square and public celebrations were proclaimed around the world today to mark May Day - the workers' holiday. But the roots of the first International Labor Day lie in a cemetery in an old German neighborhood outside Chicago.

Waldheim Cemetery, nestled near the Des Plaines River in this unassuming, middle-class suburb, is the burial place of five men condemned to death after the Haymarket Square riot and bombing, which occurred 92. years ago this Thursday.

In memory of the labor uprising,

about 150 people gathered Saturday about nine miles to the east at Haymarket Square, now divided by a giant expressway.

At the rally, sponsored by a coalition of labor organizations, speakers called for full employment, an end to unjust taxation and a six-hour work day.

The Haymarket Square bombing, which killed seven policemen and injured scores of officers and protesters, occurred during a 'demonstration against the killing of strikers by police outside the McCormick Harvester plant. Those strikers had been supporting the then-radical idea of an eight-hour work day.

Although responsibility for the

bombing never was determined, five of those arrested were sentenced to be hanged. Their plight stirred worldwide protests by labor unions, political radicals and civil libertarians.

When, on May 1, 1887, various radicals, liberals and trade unionists . gathered in the major cities of the world, demanding that the Haymarket five be freed, it marked the first May Day.

Despite the outcries, four of the men - Albert Parsons, August Spies, Adolf Fischer and George Engel were hanged in Chicago on Nov. 11 of that same year. The fifth, Louis Lingg, had earlier committed suicide by detonating a stick of dynamite in his mouth.

Their monument at Waldheim carries Spies' prediction from the gal-lows: "The day will come when our silence will be more powerful than the voices you are throttling today.'

That day was slow in coming. The Communist scare sparked by the Haymarket riot impeded the labor movement's progress for years. The eight-hour day, apparently within reach in 1886, did not become the general rule in the United States until the 1930s

May Day demonstrations continued to grow, but in time they lost all but the most tenuous connection with events in the United States, where the bulk of the labor movement turned from socialism.

American anarchist Emma Goldman, who sought to avenge the Haymarket defendants, and her lover, Alexander Berkman, were deported after World War I. Both, however, were buried at Waldheim, as were a number of other non-Communist radicals.

Waldheim has become crowded and somewhat neglected now, hemmed in by several other graveyards. But it has fared better than the monument erected to celebrate the role of police at Haymarket.

Officer Thomas Birmingham, who was not at the riot, posed for a 10-foot bronze of an unknown policeman

shouting, "In the name of the People of Illinois, I command peace.' Several years later, Birmingham was thrown off the force for public drunkenness and shortly thereafter died a pauper.

In 1927, the statue was knocked over by a runaway trolley car and it was moved in the late 1950s when most of Haymarket was razed to make way for an expressway.

In 1969 and 1970, with a new form of radicalism in vogue, the statue was knocked down twice by terrorist bombs. It is now under constant guard - in the lobby of the Chicago **Police Department's headquarters.**

Carter, Congress ready for further fighting

By DONALD M. ROTHBERG

WASHINGTON (AP) - President Carter and Congress are preparing for another foreign policy fight, this time over the administration's plan to sell jet fighters to Saudi Arabia and Egypt.

The administration proposal, which includes fighters for Israel, is before the Senate Foreign Relations Committee and the House International **Relations** Committee.

There is strong opposition in both houses to the Egyptian and Saudi sales, but whether the opponents have majorities in the committees and then on the floor is uncertain.

Carter wants to sell 60 F-15s to Saudi Arabia, 50 F-5s to Egypt plus 75 F-16s and 15 F-15s to Israel, a proposal that carries a \$4.8 billion price tag Congress has 30 days from the president's formal submission of the proposal last Friday to disapprove it. Otherwise, he could proceed with the package. The chairman of the House panel, Rep. Clement J. Zablocki, D-Wis., says he is confident of getting enough votes to foreclose unfavorable action by his committee.

a Republican now running for governor of Pennsylvania, was fired because he was investigating allegations against two Democratic congressmen. -The House votes Tuesday on a motion to instruct the Justice Depart-

of Atlanta for contempt of Congress. Powell refused to testify before the Select Committee on Assassinations about statements he allegedly x made that he was offered money to kill Martin Luther King Jr.

several factors involved here now." ---- said Rhone, including such possibilities as the hoisting mechanism, which WILLOW ISLAND, W.Va. (AP) -

Also in Congress this week: -The Senate scheduled debate

today on a farm credit bill to make available \$4 billion in federally guaranteed loans to farmers facing bankruptcy.

Both houses also are scheduled to vote this week on a compromise bill providing emergency aid to grain and cotton farmers. An earlier version, faced with a veto threat from Carter, was killed in the House.

-The House spends two days debating a bill to limit congressional spending for the federal budget to \$501 billion.

The Senate passed a budget resolution last week that set a limit of \$498.9 billion on federal spending for the fiscal year beginning Oct. 1.

-The Senate votes this week on the nomination of Benjamin R. Civiletti as deputy attorney general.

The judiciary committee in April backed Civiletti, President Carter's choice for the No. 2 spot in the Justice Department.

The nomination had been stalled in the committee for weeks while Republicans used it as a vehicle for questioning Attorney General Griffin Bell and other officials about the firing of David R. Marston as U.S. attorney in Philadelphia.

Republicans contend that Marston,

Steele From their car windows, mourners could see federal investigators perched atop a huge but incomplete cooling tower, attempting to find a clue as to why scaffolding peeled off the tower Thursday, dropping the Steeles and 47 other men 170 feet to their deaths.

While the Steele brothers - Larry, 32; Ronald, 30; Miles, 26, and Ernest, - were being buried, together with their uncle, Emmett Steele, in the Willow Island Baptist Church cemetery, investigators bored into concrete near the rim of the tower, taking samples to be checked for quality.

The collapse occurred a day after workers had poured concrete at the narrowest point of the Monongahela Power Co. tower, which was a third complete and will eventually soar to 430 feet.

'The concrete poured during that week was at an angle that was just going outward," said David Rhone, who heads the investigating team from the Occupational Safety and Health Administration, the director of OSHA's Philadelphia regional office. It could have been that the structure was at its most vulnerable at that stage, he said.

The investigation into the accident, which slowed Sunday because of the funerals and because Gov. Jay Rockefeller had declared a statewide day of mourning, intensified today.

Rhone said there may have been no single cause for the disaster.

"I'm inclined to feel there may be

raised the scaffolding level-by-level as the four-foot sections of concrete were poured, the quality of the concrete and the hour-glass design of the structure.

"We know the failure, but we're trying to reconstruct those conditions that contributed to that," said Rhone.

When it is finished, the tower and itsgiant twin which stands nearby will cool water used in making steam to generate electricity. The cooled water then will be emptied into the Ohio River.

Man arrested in stabbing

LAMESA - Police here today theorized that a family disturbance resulted in the Sunday night stabbing death of a 57-year-old Lamesa man. A 22-year-old Lamesa man was ar-

rested Sunday night in connection with the stabbing. Police Chief Lee Bartlett said today

that police arrived at 400 N.E. Second St., Gonzalo Ramirez' residence, shortly after 9 p.m. Ramirez was dead when officers arrived, police said.

By HARRY F. ROSENTHAL

NEW YORK (AP) - Who's telling it straight? Richard Nixon? Charles W. Colson? H.R. Haldeman?

Reading their Watergate books, it is often hard to tell.

Nixon says he was flying back from Florida when he learned that one of the Watergate burglars was on the payroll of his re-election committee.

But Colson recalled that Nixon phoned him from Key Biscayne, Fla.; "furious that anyone connected with the campaign would be involved in anything so idiotic.'

The news, said Colson, "plunged Nixon into such a fit of temper that he hurled an ashtray across his Key Biscayne living room.

And Haldeman: "My suspicion of an involvement of Chuck Colson and, therefore, Nixon in Watergate was disssolved completely when I spoke to Nixon. The president wasn't con-

cerned at all by the break-in. Such inconsistencies run through 'R.N.: The Memoirs of Richard

Nixon," Haldeman's "The Ends of Power" and Colson's "Born Again." Nixon: On June 20, (three days after the break-in) Colson suggested that the four Cuban-Americans arrested inside Watergate might have planned it "on their own."

Haldeman: Nixon suggested "raising money for the defendants and using a Cuban cover for the money. Nixon writes that for nine months he assumed his major Watergate problem was determining who authorized the break-in, but that on

March 21, 1973 he learned from John Dean that the cover-up was the real problem

Haldeman: "The president was involved in the cover-up from Day One, although neither he nor we considered it a cover-up at that time. By June 20, 1972, he knew about (E. Howard) Hunt and (G. Gordon) Liddy - but never ordered me or anyone to inform the FBI.

Colson: "I never suspected for a moment that anyone in the White House, least of all the man I was talking to (Nixon) would for a moment tolerate or cover-up such bungling incompetence."

Haldeman: "Richard Nixon, himself, caused those burglars to break into (Larry) O'Brien's office." Haldeman reasoned that O'Brien, the chairman of the Democratic National. Committee, "became a symbol of hate" for both Colson and Nixon.

Nixon mentions two meetings on June 20 with Haldeman - but there is no word in the published excerpts about a telephone conversation dur-ing which, Haldeman asserts, the cover-up started.

Haldeman: "In this 'telephone conversation, on our very first evening back in Washington, Nixon, himself, initiated the idea of raising funds for the Watergate burglars in an indirect manner.'

Nixon writes that on June 20 he felt confident about Watergate because both Haldeman and Colson assured him no one at the White House had been involved.

Haldeman: "Even more surpris-

ing, he indirectly suggested the idea involving the CIA in the Watergate problem three days before the famous 'smoking gun' conversation in which

the same idea was consummated." Nixon says the only explanation for the 18½-minute gap that would be believed would be an admission that he or Rose Mary Woods erased it. He told David Frost in a television interview last year that "I have no recol-

Steele sons now at rest together

THE MIDLAND REPORTER-TELEGRAM, MON., MAY 1, 1978

By STRAT DOUTHAT

WILLOW ISLAND, W.Va. (AP) -Four sons of Lee and Mollie Steele lie in the Willow Island Baptist Cemetery today. Their graves are side-by-side, just the way they died.

The brothers - Ernest, Miles, Larry and Ronald Steele - were among 51 construction workers killed Thursday when a cooling tower scaffolding collapsed at the nearby Monongahela Power Co. generating plant. The mile-long funeral procession

Quotes set book's mood

(Continued from Page 1A)

ing the Florida White House about the five men arrested inside Democratic Party headquarters on June 17, 1972. The second segment ends with his emotional leave-taking of his presidency.

Most of what the two portions contain has been told before by others and by Nixon himself in his televised interviws last year with David Frost. The 1,184-page book, "R.N.: The Memoirs of Richard Nixon," will list for \$19.95 when it goes on sale this month.

"I now believe that from the time of the disclosure of the existence of the tapes (to the Senate Watergate Committee) and my decision not to destroy them, my presidency had little chance of surviving to the end of its term," Nixon writes.

He said he had believed that no one would ever know that his tape recorders were secretly eavesdropping on all his conversations in his various offices

His admission that he kept the tapes for insurance differs from his statement last year when he told Frost that he never believed anyone could force. him to give up the tapes.

Nixon admits he misjudged public reaction to some key events in the Watergate saga: his firing of Special Watergate Proszcutor Archibald Cox, his release of edited tape transcripts, and publication of the so-called "smoking gun" tape of a conversation in which he agreed that the FBI be warned off the Watergate investiga-

He writes that he made his resignation decision on Aug. 1, 1974 - a week before actually going on national tele-

Sunday rolled slowly past the power plant on its way to the cemetery, which is located less than a quarter mile from the site of the tragedy.

Mourners at graveside could plainly see the partially completed cooling tower and the federal investigators on top of it, even on Sunday trying to find a clue to why the scaffolding fell.

The brothers and their 61-year-old uncle, Emmett Steele, also killed in the scaffolding accident, were buried after a joint funeral at the Belmont Middle School, a service attended by about 2,000 friends and family members.

"We're not here because we have no hope," the Rev. Amos McVey said. "We're here with the knowledge that while we now are broken and sorrowful, some day we will be reunited and made whole.

The minister, pastor at the Belmont United Methodist Church where the Steeles worshipped, made no mention of the tragedy. Instead, he recalled his friendships with the victims and related the warm welcome the Steeleshad accorded him when he came to the community five years earlier.

"They took me in and made me a member of the family," he said. 'They knew how to have friends and how to be friends; they knew how to share.

During the funeral, McVey told the widows their faith would help them in their hour of need. "Put your trust in God," he said.

"And if you do, you will find the strengh to bear your burden."

Family members held up well until the caskets were being rolled out of the gym. Then their anguished cries echoed throughout the room.

Christian Democrat Party heads set another meeting on Moro

By HILMI TOROS

ROME (AP) - Leaders of the Christian Democratic Party scheduled another meeting today to discuss a bitter blast from Aldo Moro's family because of their refusal to negotiate with the terrorist kidnappers of the party's 61-year-old president

There was no indication Premier Giulio Andreotti and other leaders of the ruling par the statement from the Moro family. The nation's largest newspaper, Corriere della Sera of Milan, comment-

dreotti a majority in Parliament. The Communists are strongly opposed to any dealings with the Red Brigades, who are to the left of the Communist Party and attack it for its support of the Christian Democratic govern-

ment. The family's statement was issued after seven letters attributed to Moro' were received over the weekend by President Giovanni Leone, Andreotti, and five other political leaders.

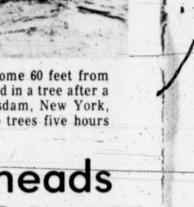

exchange for his life.

"Believe me, there is not a single minute to lose," said a letter to Bettino Craxi, the secretary-general of the Socialist Party.

However, there was no further direct word from the kidnappers. They have been silent for a week now, since their demand last Monday listing the 13 prisoners they wanted freed. The message renewed the threat to kill Moro but set no deadline.

A total of 14 letters purportedly

RECENTLY PRESENTED the Outstanding Student Award for the College of Geosciences at Texas A&M University in College Station is, right, lake Weissling, son of Paul Weissling of Midland. Congratulating him is Dr. Earl Cook, dean of the College of Geosciences. A senior geophysics major at the university, Weissling was one of 11 students receiving the honor. The award is given on the basis of students' leadership in the classroom, extracurricular activities and grade point average.

vision to announce he was yielding his presidency to Gerald Ford on the following noon.

Advisor sees no limits to battle

ATLANTA (AP) - President Carter's top inflation fighter said today the administration will talk soon with professional groups about holding down fees in line with President Carter's anti-inflation offensive. "We do not intend to limit our efforts to the industrial wage and price arena," Barry P. Bosworth, director of the Council on Wage and Price Stability, said in a speech prepared for the annual meeting here of The Associated Press.

"In the very near future we will begin meetings with leading representatives of professional groups such as physicians, dentists and lawyers - to determine what specific steps they can take to ensure that fee deceleration meets our target.

"And we will be asking that increases in executive compensation be

held to 5 percent," he said. Bosworth said meetings already have been held with industrial and union leaders.

Earlier this month Carter asked business and labor to cooperate in a new effort to slow down inflation. He said he expects industry and labor to keep price, wage and salary increases significantly below the average rate for the last two years.

Bosworth said the underlying inflation rate has been "stuck on a plateau of between 6 and 7 percent."

Bosworth said the 0.8 percent rise in consumer prices for March, which translates into an annual inflation rate of more than 9 percent, reflected higher energy costs resulting from the United Mine Workers settlement, higher meat prices and increases in the minimum wage.

"It seems pretty clear now that unless we can get some improvement we will begin to see an acceleration in the underlying rate of inflation," he said.

Bosworth repeated the administration's opposition to wage and price controls, saying they would not be a permanent solution.

Snelson honored

SAN ANGELO - A reception here Friday night honored state Sen. W. E. "Pete" Snelson of Midland.

Snelson received a plaque comme-morating "a decade of distinguished leadership.

Emil Rassman of Midland, a member of the Texas State University System Board of Regents, made the presentation.

During the evening, Snelson was serenaded with a special song com-posed by Dr. Raymond Carter of Angelo State Univerity

"On the one hand, there is a man who is desperately trying to save himself. On the other, there are men who must seek the safety of the entire national community."

The missing man's family broke with the other leaders of his party in a statement Sunday night that said the party leadership's "immobility and refusal of all initiatives ratify the death sentence" the Red Brigades said a "people's court" ordered for the five-time premier.

The statement said if the party leadership "doesn't want to assume the responsibility of declaring itself available to negotiations, it should at least call a meeting of the national council" of the party

Observers said the family's stand could divide the party and might undermine the alliance of Christian Democrats and Communists which Moro himself worked out to give An-

Anita to be in Joplin

JOPLIN, Mo. (AP) - After a nationwide tour with 26 stops, the Revival Fires religious campaign has returned to Joplin, where it began last September.

And Anita Bryant, who has appeared often on the tour, was scheduled to arrive in Joplin today for an appearance tonight on the 13th annual television anniversary of the religious organization.

She will appear on the talk show of the Rev. Cecil Todd, Joplin evangelist and founder of the Revival Fires organization.

The anniversary and homecoming activities over the weekend included Todd's announcement that he was seeking one million letters or signatures to petitions calling for President Carter's help to put "voluntary prayer and Bible readings back into our public schools," cleaner programs on television and remove homosexual teachers from schools. Todd said he plans to deliver the

letters to the president.

Whooping crane 'Tex' lays egg

BARABOO, Wis. (AP) - Tex has . laid an egg. And that, in a way, is a tribute to the fancing dancing of Dr. George Archibald, an ornithologist.

Tex is an 11-year-old whooping crane who was raised in the living room of Fred Stark of the San Antonio, Texas, Zoo. She did not meet another crane until after her second birthday. By then she was fonder of humans than birds.

Enter Archibald. The dancing he does is a mating dance, weird and awkward steps which he says help bring out the maternal urges of the whooping crane, an endangered species.

The International Crane Foundaion here, which cares for and studies dozens of rare birds in an effort to prevent their extinction, received recent notoriety for Archibald's mating dance with Tex.

Tex was impregnated by artificial insemination. Sperm was obtained from Tony and Angus, two male whooping cranes on loan from the

Scholarship won by Midlander

GEORGETOWN -- Maralee Buttery, daughter of Mr. and Mrs. Wilburn O. Buttery of 3216 Frontier Drive in Midland; recently was chosen as one of the first Brown Scholars at Southwestern University here.

A junior at the university, Miss Buttery is a political science major with a pre-law emphasis and also is interested in entering the foreign service. She has maintained a straight-A average while in college.

As a Brown Scholar, Miss Buttery will receive a scholarship for the upcoming school year which will cover most of her school expenses. She is one of six students to be given this award.

Hazard cited

WASHINGTON (AP) - A possible electrical hazard was cited by the Consumer Product Safety Commission in Friday's recall of 217,000 small ceramic pots used to heat

The agency said the ... ts. which sold for \$2.99 to \$4.99, were distributed nationwide by Nevco of Lyndhurst. N.J. and carried the Nevco name on the box. On the bottom of the pots there is the inscription "120V350W Japan." The commission said the pots could present a shock hazard if the exposed heating coil becomes damaged.

Audubon Zoo in New Orleans "Archibald was with the crane dur-

ing her egg laying ordeal," foundation spokesman Norris Klesman said. Tex has laid eggs before, but all were infertile. Archibald said he believes the latest egg is fertile, but he won't be sure until he performs tests in a couple of weeks.

If the results are positive, the chick will hatch around Memorial Day weekend, he said. Archibald said there are only an estimated 1045 whooping cranes in the world.

"Archibald and Tex continue to dance several times daily in an attempt to secure additional eggs," Klesman said.

RECENTLY SELECTED to serve on the 1978-79 Texas Tech University cheerleading squad in Lubbock is Patty Qualia, daughter of Mr. and Mrs. C. F. Qualia of Midland. She is a junior. majoring in telecommunications.

Woman proves oldtime family doctors not extinct

By WILLIAM ENDICOTT The Los Angeles Times

YONCALLA, Ore. - When you are down to your last dollar in this little western Oregon sawmill town, the doctor still will see you. For \$2, she will even make a house call.

That is the way it has been through good times and bad ever since Dr. Lydia Emery settled here with her husband, Jeep, 32 years ago and set up practice in the front room of their unpretentious 100-year-old house.

She had thought about raising her fees one time, maybe to as much as \$2 for an office visit and \$4 for a house call; but then the local plywood mill shut down and money became tight, so she dropped the idea.

"WHEN I FIRST CAME to Oregon I didn't have a license to practice here," she recalls. "It took about a year, but people started coming by asking for advice. Then, when I got my license, one thing led to another. I just never got around to formally opening an office.

"I was pretty ill the first year we were out here. I had a miscarriage and there was a question of whether I would be able to practice.

"So when people first started coming to my door. I hadn't set up anything at all. They would ask what they owed me and I knew...they were young and struggling, living from one paycheck to another, but would feel better if they paid something. So I would say \$1.

"Well, in those days, nobody charged more than \$4 or \$5, so it wasn't that much difference, Later on, I thought, well, maybe I should come up...But then the plywood mill closed down and I just was glad I hadn't changed."

TEXAS 1-Yr. 6-Mos \$46.20 \$23.10 \$33.00 \$16.50 \$33.00 \$16.50

"DR. LYDIA," as she is known to Yoncalla's 770 residents, is now 68 and, in addition to being the least expensive physician in America, is maybe the most loved by her patients. Last spring, the whole town turned out to honor her and her husband by dedicating a covered play area at the local elementary school in their honor. A letter signed by resident praised the Emerys "for touching our lives in such warm, loving friend-

ship." Mary Cox, who has lived here since 1929, described Dr. Emery as "the greatest" and recalled a time, several years ago, when the doctor "stayed all day and all night with my mother, just as a favor to a neighbor, because my mother was very ill.

Young mothers who have taken their babies to Dr. Emery for treatment speak of her in almost reverent tones

"She's just a fantastic human being," said Gerry Blanchfill, who runs the general store with her husband, Jim. "She's always available, very loving and giving of herself."

stayed on the farm. In addition to the doctors, one brother became a physicist, another a research chemist and one a teacher.

"My folks really bucked the trend by encouraging us to get an education," she said. "My father wasn't wealthy, but you always could borrow a little money if your father would sign (a note) with you. And that's how we did it.

She was graduated from medical school just before World War II and was interning at a hospital in Allentown, Pa., in 1943 when the Navy put out a call for women doctors. "So I decided to go in," she said. "They asked for 600 and I think they got 50"

WHEN STATIONED at the Marine Corps base in Camp Lejeune, N.C., she met Jeep, a Marine Warrant officer whose real name is Clifford but

who had picked up the nickname during recruit training in San Diego., "To this day, nobody knows why he was given that name," she said.

After the war. Jeep. who had two brothers in Oregon, headed west looking for work, and he and Lydia ended up in Yoncalla, where he took a job with the sawmill. He is now 64 and will retire soon

'I told Jeep I would go anywere with him but I just hoped there would be hills," she said. "Otherwise, Ididn't care. This is the first house we bought.'

HER OFFICE, such as it is, takes up a small corner of the front room and consists of two small wicker chairs and a three-drawer end table on which rests a stethoscope and a blood pressure cuff. She keeps note of her appointments on a small desk

calendar next to an ancient black telephone.

The adjoining living room is so filled with books and magazines that there is no more room for them on the shelves and newer ones are stacked neatly on the floor and a coffee table. A piano stands in one corner. "Mennonites, you know, frowned on

musical instruments," she said. "but my mother managed to sneak me a few lessons. I love music books and I love to play the piano."

One day a week she works at a family service clinic in Roseburg, 30 miles away, and she keeps up with medical developments through extensive reading but admits she occasionally is stumped by "something somebody has read in Reader's Digest."

ANYTHING that requires laboratory work or X-rays or

"anything else I think somebody else can handle better than I can. I refer." she said. "A lot of times people will come see me to ask whether I thinkthey should go further. And that's all right. That's very useful. And a lot of times they'll just want me to reassure . them a little or something.

"When we first came up here, people were so panicked about polio, and I can remember people coming to the door and pounding on it. They would just be so panicked because their child had a stomach upset or something. Now youngsters don't even know what polio is."

Ear aches and "acute upper respirtory things" are what she treats mostly now in children. "And hypertension in elderly people, plus the kinds of things that come up when other offices are closed."

Although she is the only doctor in Yoncalla, there are two in nearby Drain, and Roseburg and Cottage Grove are within easy driving distance.

"I just hope people don't get a false idea," she said, "that I'm some kind of old-time practitioner from the horse-and-buggy days that does everything - delivers babies and all

that. It's never been that way."

SHE SAID ALSO that there had never been any pressure on her from other physicians to raise her fees; but a local businessman chastised her one time for not charging more.

PAGESA

'He really felt. I could tell, that it just was wrong if you could make more not to do it. He sid if I didn't want to keep it all. I could give it to the church," she said.

"Sometimes my patients tell me I should charge more. And my father (now dead) said one time he thought maybe people would think I wasn't worth so much if I didn't charge more.

But her only concession to inflation has been to charge "a little more" for out-of-towners who occasionally bring their children in for physical exams. Both to discourage the practice and "so it doesn't make them feel their local doctors are socking it to them." A "little more" means \$3, sometimes \$4.

"I suppose we could have more security. Jeep's retiring now and we don't have that much. But it has never been my thing (to accumulate money) and I guess that's all I can Say.

Textile firm agrees not to violate laws

WASHINGTON (AP) - J.P. Stevens & Co. is agreeing not to violate labor laws in the future in return for the dismissal of a temporary injuction sought against the firm by the National Labor Relations Board.

The out-of-court settlement between Stevens and the board was announced late last week. The NLRB has alleged the company violated labor laws repeatedly during the past 15 years at its 80 plants around the country. Those plants employ 45,000 workers.

The Amalgamated Clothing and Textile Workers Union is trying to organize Stevens workers.

In agreeing to the settlement with the NLRB, the company did not admit to violating labor laws in the past.

The NLRB complaint charged Stevens, the nation's second largest textile producer, with a 15-year "massive, multi-state campaign to deny its employees their rights...to seek collective bargaining representatives of their own choosing."

Since 1966 the NLRB has decided against Stevens in 15 separate cases involving charges of labor law violateral courts have upheld tions. Th

of the other employees but has refused to reinstate the remaining two, whom the company contends were fired for fighting on the job.

Lavish Egyptian party defies scarcity hardships

The Washington Post

PAGE 10A

CAIRO - The manager of the Cairo Sheraton Hotel and his wife, the famous belly dancer Nagwa Fouad, recently threw a lavish early evening

cocktail reception to mark the hotel's eighth birthday. Every inch of wall space in the ballroom was lined with tables bearing limitless quantities of roast beef,

Crates full of money from recycling boxes

The Los Angeles Times

When Steven J. Thompson was 11 years old he helped his friends' grandfather who owned a pig farm in a St. Paul, Minn., suburb. The boys collected cardboard boxes which once held pig feed and redeemed them for \$10 a ton.

Twelve years later, Thompson at 23 is doing the same thing - recycling used corrugated boxes. Last year, he grossed \$110,000.

Jesse Sims simply says he wants to be a millionaire as he shows off his red Jaguar that he bought from a jonkyard for \$1,500.

Three years ago, the 41-year-old Sims quit his job as a produce clerk at a Los Angeles grocery store and embarked full time collecting corrugated board and other waste paper. He grossed well over \$65,000 in 1977.

"The two men — a generation and miles apart — are rising stars in the carboard world of recyclers. They are turning corrugated to gold.

"The American Paper Institute, a New York-based trade group, often cites Thompson and Sims in its \$300,-000 program to encourage collection of waste paper - newspaper, corrugated cardboard and office paper.

"Used corrugated is the largest.category for waste paper recycling," says Audrey P. Schwartz, manager of the institute's paper stock conservation committee. "We think it will

the state.

grow more this year and it is harder to find. We depend on the individual citizen to make the effort and we believe there is a good opportunity to

earn an income. In 1977 some 6.6 million tons of used corrugated were recycled domesti-cally or exported for recycling. That comprises about 40 percent of all waste paper recycled in the United States. Mrs. Schwartz estimated that about 5 percent to 10 percent of that was collected by individuals.

On most days, Sims is in his Jaguar by 6 a.m., leaving his rented, two-bedroom home in Watts. He heads for Watson Industrial Park, a couple of miles away, where he temporarily parks his five trucks - some of which he uses for storage.

Sims is a resourceful man. During his average 12-hour, 6-day work week, his mother-in-law takes his messages, his cousin is his sole helper and he buys almost nothing new.

They nicknamed me Sanford and Son ... " says the thir, wiry Sims as he jerks open the whitewashed door of a Ford truck which he bought used, revealing scrap metal, aluminum cans, and rags.

"I'm a collector. If I find a small piece of metal on the street, I pick it up and keep it."

Sims came upon the idea of collecting used corrugated boxes when he was a produce clerk.

smoked salmon, shrimp, and local delicacies like stuffed vine leaves and shawarma, marinated sliced lamb grilled on a spit and served on bread with sesame sauce.

The liquor supply, in a country where the retail price of a bottle of Scotch is nearly equal to a policeman's monthly salary, was unlimited.

Amid the usual conversation about Middle East peace prospects and vacations in Europe, hardly a word was heard about the issue that really matters to the overwhelming majority of Egyptians at the other end of the social and economic scale - a breaklown of the food distribution system that has created shortages of bread, flour; fruit and tomatoes and has driven meat prices even further beyond the reach of many families.

The supply of oranges and bananas, normally plentiful this time of year, dropped to a trickle a month ago. Long lines have formed at markets setting black market tomatoes at inflated prices. The bread shortage has touched off debates in the parliament and a burst of directives from Cabinet officials

What appears to have happened is

that Egypt's delicately balanced system of distributing essentials to its 40 million people - a hard-to-manage mixture of private enterprise, state and cooperative markets and government subsidies - gave way at several points at once.

The oranges are said to have vanished because the government, al-ways on the lookout for hard currency, tried to take advantage of the scare in Europe over mercury poisoning in oranges from Israel and authorized excessive exports. Tomatoes and other vegetables, though plentiful in the villages, are hard to find in Cairo because wholesalers kept them off the market in protest over price controls.

As for the bread shortage and the soaring price of meat, they are linked in a bizarre economic chain that the government has not been able to break.

A staple of the Egyptian diet is a rough loaf of bread made with coarse flour that sells for a few pennies. because it is heavily subsidized by the

fixed by law Some bakers are cheating by shorting the weight without cutting prices and using the extra flour to make higher-profit items like pastries. In rural villages, according to newspaper reports, peasants who in the past baked their own bread are buying in markets because the subsidy makes it cheaper. But the real problem is that the subsidized bread is so cheap that cattle breeders are using it for fodder.

It's about a third the price of hay, which is so expensive it has been driving up the price of meat, and since the bread can be purchased in unrestricted amounts, it's going to the animals instead of to the people.

In a wry commentary on this situation, a newspaper cartoon depicted a group of barnyard cows eating round loaves of bread, with one of them observing, "This people food isn't any good unless it's washed down with 7-Up."

The government cannot cut the bread subsidy because that would drive the price up beyond the reach of many families, "especially urban workers, who depend on it. But it is looking for ways to control abuses.

The Ministry of Supply authorized an increase in the flour allocations to government. Its weight and price are all provinces, and ordered surveillance teams to inspect the bakeries

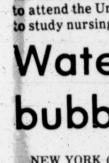

and make sure they produce author-ized products at full capacity.

Meanwhile meat prices have enriched Cairo's butchers, who are regarded with disdain by the Egyptian bourgeosie because they don't have the social standing or education to match their money.

At a recent luncheon sponsored by General Motors - also at the Sheraton - to introduce its new models, an Egyptian journalist who specializes in economics offered this list of the kinds of people who can afford air-conditioned Buicks and Chevrolets in such a poor country:

"First, thieves and smugglers. Second, butchers. Third, doctors. Every doctor in Egypt has a waiting list of patients. And fourth, anyone who owns an apartment.'

The last was a reference to the acute housing shortage in Cairo, in which ownership of an apartment is like ownership of a gold mine. With the approach of summer, the city is witnessing the annual phenomenon of people moving out of their own flats to live with relatives or parents so they can let out their own places to hotweather visitors from the Persian Gulf at vast markups.

COMPREHENSIVE ANNUAL SERVICES **PROGRAM PLAN FOR TEXAS**

PROPOSED

Public Comment Invited

May 1-June 14

October 1, 1978 to September 30, 1979

The Texas social services program helps residents support and take care of themselves, adjust to independent living, and offers them protective care.

SERVICES OFFERED-The services include day care and protective services for children, services for adults (including homemaker and chore services, and family care for aged and disabled persons), family planning, and employment services.

Most of the services will be available throughout Texas, but some may be limited to pilot projects, and others may be limited by the amount of funds. Some of the services may be expanded as funds become available.

WHO IS ELIGIBLE?- Recipients of Aid to Families with Dependent Children (AFDC), and recipients of Supplemental Security. Income (SSI) are eligible.

Some services will be provided people whose incomes are below 55 percent of the state's median income, adjusted for family size. (For example, the income of a family of four must be less than \$798.42 monthly.)

Only protective services and information and referral will be provided people whose incomes exceed 55 percent of the state's median income.

STANDARDS FOR FACILITIES SERVING SSI RECIPIENTS-The plan gives information about standards for residential facilities (other than those certified for Medicare or Medicaid) which serve SSI recipients. It includes the names and addresses of the agencies which will answer requests for information about standards, their enforcement, and waivers. If requested, the agencies will identify deficient facilities.

SOURCES OF ESTIMATED FUNDS-Total budget for 1978-79: \$203,843,667. Sources: Federal \$155,249,734; Non-federal \$48,593,933.

GETTING COPIES OF THE PLAN-The complete plan may be read or reviewed in the DHR offices listed below, or obtained free of charge by writing to the Title XX Information Center. (See address below.)

QUESTIONS AND COMMENTS-Questions about the plan can be directed to the DHR offices listed. Written comments are encouraged and should be sent to the Title XX Information Center, Texas Department of Human Resources, John H. Reagan Building, Austin, Texas 78701. Comments must be received no later than 5 p.m. June 14, 1978. A suggested format for comments is included in the plan.

A public hearing on the proposed plan will be held at the John H. Reagan Building in Austin at 9 a.m. on June 9, 1978. Public hearings will also be held across the state during the comment. period. For further information regarding the dates and places for these hearings, contact any of the offices listed below or write to the Title XX Information Center.

Addresses are for DHR offices. Where there are no offices, the address of the county judge is given.

Levi's turn America on to water?

Helpless family waits DEATHS

for kidnapper's voice

By CARL MANNING

McKENZIE, Tenn. (AP) - The lights burned late Sunday night in the front room of the Ben Gaines home as family members anxiously awaited some word about their abducted daughter.

Jodie Elizabeth Gaines, 18, a senior at the Lausanne School in Memphis, has been missing since Friday night when she left her family at the Carroll Lake Golf Club to visit her cousin an appointment she never kept.

The following morning, an unidentified caller told the mother, Ludie Gaines, that her youngest daughter had been abucted. A substantial ransom - reportedly \$250,000 - was demanded.

The caller was a male who apparently was trying to disguise his voice during the short conversation, the girl's father said.

The family said further statements were forthcoming at a midday news conference today.

Gaines is president of Gaines Man-ufacturing Co., one of this small West-Tennessee town's largest industries. The plant produces furniture for motels.

Water with As reporters clustered Sunday on the front porch of the expansive twostory house, family members issued a tearful plea for the safe return of the daughter.

"We, the family, appeal to those who have Jodie to contact us immediately," said sister Patti Gaines, 31, in a choking, quavering voice.

"We are fully prepared to act as instructed with no interference on the part of anyone. The money is ready now and we are prepared to pay the ransom. All we care about is Jodie's safety," she said.

Standing beside Miss Gaines as she read the statement was her mother and a brother, Ben Gaines Jr., 20.

"Please, all we want is Jodie . Please bring our daughter home," Mrs. Gaines said through tears before ducking back into the house.

The family concluded the news conditorium - announced ference by distributing color photoon a marquee outside as graphs of their smiling red-haired the "Celebration of a Life" - was a final tribdaughter and saying there would be nothing else said until today. ute by friends and family to the 76-year-old Geer. Inside, the father sat near the tele-

phone waiting for it to ring. "All I've done is sit by the phone

praying the guy would call and say what to do," Gaines told a reporter in a Sunday night interview.

Gaines said the last time he saw his daughter she was driving away from the golf club in her blue 1976 Chevrolet Vega. She was to visit a cousin, Yvonne Montgomery, who lives about two miles from the country club.

But somewhere between the club, at the end of a narrow, winding treeand he cous

disappeared.

Gaines said he became worried and called local police when his daughter failed to return home late Friday night. He said he feared a traffic accident.

The missing teenager was expecting to graduate later this month from Lausanne, an exclusive coeducational college preparatory school in Memphis, about 110 miles to the southwest.

Baby murder

trial resumes

SANTA ANA (AP) - After a day of rest, the jury in the Dr. William Waddill baby murder trial resumes its

deliberations for a seventh day today. On Sunday, the nine men and three women stayed at the hotel where they have been sequestered since their talks began last Monday. They were allowed to receive visitors and spend time outdoors.

The panel must decide whether Waddill, one of Orange County's most prominent obstetricians, murdered an infant shortly after it survived a saline abortion on March 2, 1977.

West Texas! Strong, and everywhere growing stronger. We need a man in Congress we can count on to help us build this strength.

As a state senator, Kent Hance has never missed a day's work ... never dodged the issues takes personal initiative to sponsor important new legislation.

Kent Hance is important to West Texans. He's the man with the experience to speak our voice in Congress.

Kent Hance. Because he's got experience where experience counts.

Authorized by the Kent Hance for Congress Committee, Mike Higgins, Treasurer 1203 Metro Tower, 1220 Broadway, Lubbock, Texas 79401. A copy of our report is filed with the Federal Election Com

No new taxes. What does it mean to you?

When Dolph Briscoe became Governor, he set a course of making state government better without new taxes.

In 1972, the experts - as well as Dolph Briscoe's opponents in this year's Governor's race - said it couldn't be done.

Dolph Briscoe proved that it could. He proved that saying "no" to new taxes is saying "yes" to economic prosperity.

Since Governor Briscoe has been in office: 1,200 new industries, representing an annual economic impact of more than \$11 billion, have moved to Texas.

 More than 850,000 new jobs have been created. Texas has been universally acclaimed as having the best political climate in the world for economic investment and growth.

Dolph Briscoe understands that the surest way for a government to strangle its economy is to overburden its taxpayers. In contrast, his most active opponent in this year's Democratic Primary does not. That opponent - by nature and by his own admission - is an activist intent on becoming an activist governor. That means only one thing. It means government regulating our lives with bureaucratic red tape. And it means a governor whose reckless spending promises, if kept, would result in the imposition of a State income tax on you in 1979.

Governor Briscoe has pursued - and throughout his tenure as Governor will continue to pursue - a firm policy of no new taxes. This policy has served the people of Texas well. It has produced the strongest economy in the United States today. And in the process it has enabled the extension of more and better state services to our citizens than ever before in our history - without new or additional taxes.

To keep Texas on this course of prosperity without a State income tax, let's keep the candidate with a proven record. Let's keep Dolph Briscoe as our Governor.

Governor Dolph Briscoe For Texas

THE MIDLAND REPORTER-TELEGRAM, MON., MAY 1, 1978

Flying scribe gazes hard at what's ever down there

By HUGH A. MULLIGAN AP Special Correspondent OVER ATLANTA (AP) — Facts a captive audi-

ence in a New Orleans-bound jet might never know if the pilot wasn't feeling the loneliness of command and had this compulsion to keep talking.

"Seventy-five miles off to the right there, you could see the Ohio River if it wasn't so hazy."

"Directly below us now is Monticello, the home of both Thomas Jefferson and James Monroe. Or was it Madison? Anyhow, they lived there at different times so it doesn't much matter."

"I'm putting the seat belt sign on because we always encounter a slight air chop over the Chesapeake Bay this time of year. Oyster mating season, you know. Hu-hu-ha."

"That's Andrews Air Base off to the right there, and the jumbo jet you see at the end of the runway is the communications plane the president uses to keep him abreast of what's going on in the world. Jimmy Carter often rides in it himself. This is also the home of Air Force One."

"Now you have a good view of the nation's Capitol, the Washington Monument and all those yellow school buses around the Lincoln Memorial. The Pentagon is that big octagonal-shaped building on the other side of the Potomac."

"Those of you on the left-hand side of the aircraft might just catch a glimpse of colonial Williamsburg

as we vector inland here, and the girls will soon start serving a delicious lunch in both cabins."

"I'm going to have to revise my estimated arrivaltime at the gate in New Orleans. These head winds are much stronger than we anticipated and we're running about 20 minutes behind the schedule. Off to the right there is Spartanburg, South Carolina. They say in summer you can smell the peaches way up here from those warehouses."

"That snaky looking thing is the Savannah River. It forms the border between South Carolina and Georgia and has some mighty fine fishing. Number three engine is coughing a bit, so I'm going to shut her down. Nothing to be the least concerned about, a normal procedure, but I am going to have to make another revision in our arrival time at the gate in

New Orleans. Right now, I'd say 28 minutes behindschedule, although the head winds have backed off a bit."

"You can just about see it through the cloud cover ... that's Stone Mountain almost directly below us, the largest chunk of exposed granite in the world ... looks like a big sandbank."

"Atlanta airport off to the right there, all those planes stacked up, waiting to land. Did you know Atlanta is now the second busiest airport in the world, after Chicago's O'Hare Field? Or is it London's Heathrow? Anyway, it's a busy place ..."

"Mobile and the Mississippi Gulf Coast stretching out below us now. A storm system is passing through New Orleans at the moment so we're going to go for a little ride around Lake Ponchartrain and a bit of the bayou country. On the banks of some of those winding little rivers you might catch sight of some of the fine old plantation homes and those live oaks draped with Spanish moss. Great fishing down there, they say."

"We're number nine in the landing order now, and I apologize for the delay in landing in New Orleans. Those flaming towers off to the left of the aircraft are offshore oil wells. Fishing is superb under those platforms they tell me, especially right after they dump the garbage ..."

"We're about 40 miles out now, and we've been cleared for landing, so please observe the no smoking sign when it goes up. That's Morgan City down there ... you can see all the shrimp boats they wrote the song about. We hoped you enjoyed flying with us today as much as we enjoyed having you and hope to have the pleasure of seeing you again aboard one of our flights ..."

"Better get off my lap now, Lula-Mae, and prepare the cabin doors for arrival at the landing bay (sounds of static, whistling, stewardesses running up aisle, loudspeaker system abruptly cut off) ..."

Peace at last. Golden silence. Only the whine of the three remaining engines, revving up for landing. Then suddenly the intercom music fades in, "Shrimp Boats Are Coming." And somewhere in the back recesses of the mind, among the winding banks of Bayou Dri-martini, a voice from the flight deck is droning on and on:

"That's Kitty Hawk beach off to the left there ... you know it was named for a Chapel Hill co-ed named Kitty Hawk who first went topless on those white sands and began the topless craze before the sheriff of Dare County hauled her off in his dune buggy with the star on it ..."

Candidates to conclude their efforts this week

By The Associated Press

Texas politicians put it all together this week as they wrap up their efforts to win election in Saturday's primary elections.

"They'll all be campaigning clear down to the last dollar," remarked one campaign strategist. There will be airport rallies, handshaking tours in downtown Dallas, helicopter tours of Houston, riding the polls in San Antonio and so-called news conferences anywhere a candidate can find a TV camera or

a reporter with a pencil.

Republican Jim Baker, candidate for attorney general, even plans a tennis match with former President Gerald Ford to attract attention to his campaign.

Gov. Dolph Briscoe, who normally dines on white

Black becomes mayor of New Orleans today

NEW ORLEANS (AP) — The first black mayor of New Orleans will be sworn in today, braced to walk a line between the great expectations of blacks and the doubts of whites.

Ernest N. Morial has vowed that he will win the respect of voters of every hue with sheer efficiency. "I am going to have to be a hardnosed administrator," he said. "If we can do what we are setting out to do, some people will hate me but most of the people in this city are going to be crazy about me."

Morial is a stocky 48-year-old lawyer known for his gold-rimmed spectacles, sober suits and bright ties. His nickname is "Dutch," which he says his parents gave him, probably because he was "such a hard head" — stubborn.

Though he finds it irritating, Morial knows he is stuck with the complications raised by race and color.

"I have to walk a tight rope," he said. "I have to hire an even mix of blacks, whites and women. Especially women. That's all right — I am a believer in equal rights."

His own complexion is best described as swarthy, not black or brown — a fact that figures in a new variation on the race issue.

It cropped up after Morial let it be known that among department heads who wouldn't keep their jobs when he took office was Andrew Sanchez, the black director of the Department of Property Management.

"The city's first black mayor has just fired the city's first black department head," said Sanchez no political friend of Morial.

"Now they're going around saying Morial is only hiring light-skinned blacks, no dark skins," Morial complained a few days later. "Hell, I'm not going around looking at white skin, light skin or black skin, I am trying to find out what's inside."

Morial owns a series of political "firsts" in Louisiana: the first black to graduate from Louisiana State University Law School, first black elected to the Legislature since Reconstruction, first to win a state Court of Appeal seat.

Morial, a Democrat, was elected mayor way back on Nov. 12. The long delay before inauguration almost six months — was tough on his finances.

At the height of the campaign, he had to resign his \$47,500-a-year post as a judge because a federal appeals court upheld a state law that a judge must resign before making a political campaign.

There he was — no job, no income, and expenses that included two offspring away at college. He became a consultant to a television station, studied and taught at Harvard under a fellowship and taught a weekend class on politics at the University of New Orleans.

The delay, which came about when the Legislature imposed a new election date, had political impact, too. "... you have a legislative session that is two weeks under way when the new mayor takes office," Morial noted. "It is almost like having two lame duck mayors — a lame duck going and a lame duck coming."

linen with candlelight, is inviting supporters to a lakeside noon picnic in Austin.

Attorney General John Hill will be carrying around a special rubber stamp with the word "VETO" in 4-inch letters to emphasize that he would not approve an income tax.

Rep. Bob Krueger, candidate for the Democratic nomination to U.S. Senate, expects to be called back to Washington for two of the final crucial days to vote on a budget bill and an emergency farm bill.

Here generally, subject to frequent change, are the plans of top statewide candidates for the final week: Hill plans to be in Dallas and Canton Sunday, in

Dallas and East Texas Monday, in Houston, San Antonio and the Valley Tuesday; in West Texas, Waco and back to Dallas Wednesday; hit the Panhandle, South Plains, El Paso and Midland-Odessa Thursday, and on Friday give a final fling at Dallas, Houston and San Antonio. The Hills will vote in Austin and there will be an election watch party at the Driskill Hotel.

Briscoe has a 14-hour schedule set Monday in Dallas. Tuesday it will be Austin, Houston and Baytown. Wednesday he will be in Houston and the Valley. Thursday, he is back to Dallas, and back to Houston. Thursday it's Houston, Galveston, Texas City and the area before returning to Austin. There will be an auto tour of South Central Texas Friday, ending with a rally in San Antonio and a final hometown rally in Uvalde. The Briscoes vote Saturday in Uvalde and will watch returns at the Uvalde headquarters.

Bill Clements, GOP candidate for governor, will be in Austin, San Antonio, Fort Worth and Amarillo on Monday; in Houston and Dallas on Tuesday; in Houston, San Antonio and Austin on Wednesday; back to Austin, Dallas and Houston on Thursday; in Midland, Amarillo, Lubbock, Fort Worth and Dallas on Friday. The Clements will vote in Dallas and watch returns at the Baker Hotel.

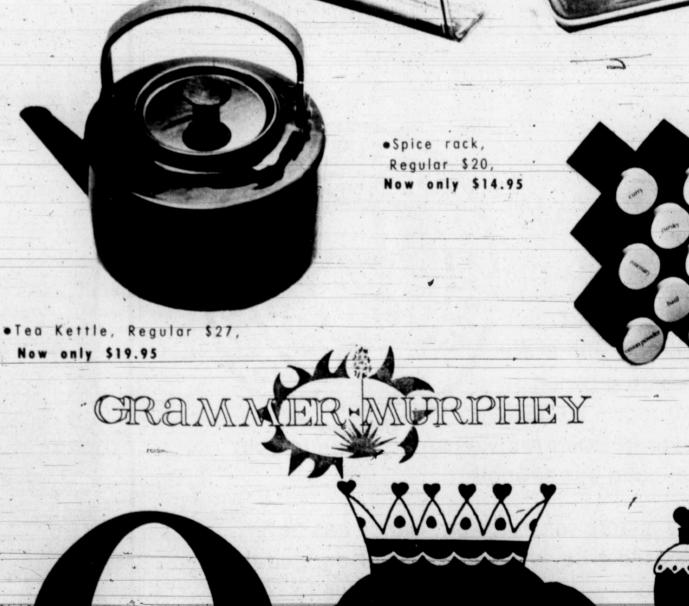

Ray Hutchison, the other GOP candidate for governor, called a news conference in Austin Sunday on the steps of the Capitol before starting off on his final trek across the state. From there he goes to San Antonio. The Hutchisons will vote in Dallas and will meet supporters election night at the Hilton Inn. Krueger plans an East Texas swing Monday.

ending up in Waco and Dallas. Tuesday he will be in Houston, Austin and Dallas. Wednesday and Thursday he expects to be in Washington for his congressional duties. Saturday he will work the polling places in San Antonio, an election day tradition in that city. He will spent part of the night in his hometown of New Braunfels, later going on to the Driskill Hotel in Austin.

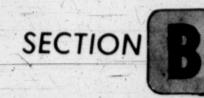

Joe Christie, Democratic candidate for U.S. Senate, will be in Austin, Waco, Fort Worth, Houston and the Golden Triangle Monday. Tuesday he goes on to Houston, Corpus Christi, San Antonio and the Valley. Wednesday he will be in Corpus Christi, Austin, Waco and Dallas. Thursday he's back to the Golden Triangle, Houston, San Antonio and Austin. Friday he finishes his campaign with a trip to San Antonio, Houston, Dallas and Fort Worth. The Christies vote Saturday in El Paso. Then they will spend most of the day in Austin, before going on to Houston to watch election returns.

Baker, who has no opposition in the Republican primary, meets the former president in "A Star-Spangled Night of Tennis" on Tuesday in Houston. Ford and Baker will be joined in a doubles match with tennis professionals John Newcombe and Dick Stockton.

Mark White, a Democratic candidate for attorney general, plans to finish his last week of campaigning in time to fly to Houston to vote Saturday, then return to Austin to wait for returns.

ENERGY

Liberals make angry noise about 'giveaway' - reported

By RICHARD L. LYONS and MARY RUSSELL **The Washington Post**

S

or Day

ar \$15

WASHINGTON - President's Carter's energy bill has more problems than you canXcount. Ironically, one of its most difficult at the moment is the White House ad hoc energy committee, which seemed a stroke of genius, when Speaker Thomas P. O'Neill created it last year and stacked it with liberals to guide Carter's bill through the House.

But now that the negotiating team. seeking agreement with the Senate has had to give up continued price controls on natural gas and accepted gradual deregulation, some of those liberals now sitting as House conferees who will decide whether the com-

promise is accepted or rejected are making angry noises and threatening to vote against a "giveaway" to the oil-gas industry.

The longer the natural gas issue hangs unresolved there, the more pressure will build up to cut loose and pass separately three noncontroversial parts of the energy program and leave the fiercely controversial natural gas pricing and domestic crude oil tax issues to go it alone. O'Neill wants to hold it together in one package, believing this is the only way the energy-saving tax proposals can pass.

Sen Russel B. Long, D-La., leader of Senate tax conferees, said again last week that the crude oil tax which Carter calls the most important part of his conservation program can't pass the Senate.

Grand Banks Energy Co. of Midland No. 1 E. E. Barbee Jr. and others will be drilled as a wildcat in Sterling County, 178 miles southeast of the Big Salute

Wildcats

an 8,350-foot bottom, is 16 miles southwest of Sterling City and 7,407 feet from the most northerly north line and 660 feet. from the most easterly north line of section 6. Moses Herrin survey

RE-ENTRY TEST

· Energy Fund of America. Inc., of Dallas announced plans to re-enter a project in Ector County and test it as a wildcat.

Originally drilled by Felmomt oil Co. as No. 1 Eidson and abandoned at 12,500 feet in 1953. the project will be operated by Energy Fund as No. 8 Eidson.

The location is 21/8 miles northeast of the Yarbrough & Allen field and seven miles northwest of Penwell. The site is 1,964 feet from

south and and 1,931 feet from west lines of section 10, block B-14, psl survey.

subsidy plan for East By T. R. Reid **The Washington Post** (Canyon) field. WASHINGTON - The Carter ad-The operation, scheduled for ministration is preparing a complex set of changes in federal energy regulations that could lower heat and

power prices for East Coast consumers by as much as half a billion dollars a year at the expense of the rest of the country.

The changes would increase price subsidies for Eastern refiners and oil importers. The increased subsidy would be paid directly by refiners elsewhere, and presumably passed on to those refiners' customers.

Energy Secretary James R. Schlesinger promised a group of Senators and staff aides from Eastern states last week that the changes would be proposed "quickly" - perhaps this week

East Coast members of Congress, including House Speaker Thomas P. O'Neill Jr., D-Mass., have been pressuring the administration for months to change the subsidy rules. Schlesinger, in turn, has been working to win Eastern support for the administration's beleaguered energy legisla-

Thus some members and lobbyists were quick to see Schlesinger's new commitment as a deal to win votes for the energy bills. As further evidence of political motivation, they noted that Schlesinger had also discussed with Rep. John Dingell, a Michigan Democrat who is influential on energy matters, an addition to the new rules that would give similar price subsidies to Michigan oil importers.

ment said the timing of Schlesinger's promise was not political. "We had to do this because the New England refiners have to know soon what price they'll pay for oil next winter," said the official, who said department regulations require that he remain anonvmous

If Schlesinger did hope for political gain from his promise to the Eastern legislators, he also incurred political loss, because some members from other regions were furious about the proposed changes.

Among them was Sen. J. Bennett Johnston, D-La., a leading spokesman for domestic oil producers.

might then reduce the current glut of residual oil on the West coast, which has been an embarrassment to administration spokesmen who kee8r talking about oil shortages.

President preparing

But some members of Congress said Schlesinger's plan could not work. They said the new changes would not eliminate the disincentive on domestic sales to Eastern markets. And they warned that foreign oil supppliers would raise their prices to soak up the new subsidies.

If that occurred, neither West Coast producers nor East coast consumers would gain much under the new rules. Instead, members of the Organization of Petroleum Exporting Countries would be the big winners.

Whatever the economic impact of the new rules, there was no question about one political result of Schlesinger's promise: it made a lot of East Coast members of Congresshappy

PAGE 18

The New England Congressional Caucus praised the administration's move, saying it could save consumers from Maine to Florida about \$500 million annnually in heat and power bills.

But it was not clear whether the changes would swing Eastern votes on the energy bills, Rep. Toby Moffett, D-Conn., a strong critic of the administration's energy package, said he welcomed the new regulations but considered them "completely separate" from the pending legislation.

Dual well completes; **TXO** potentials test

Texaco Inc., operating from Midland; has announced dual completion of a well in the Chapman Deep multipay area of Reeves County, one mile west of Orla.

From the Atoka, it completed for a calculated, absolute open flow of 2.213 million cubic feet of gas per day, through perforations from 12,990 to 13,566 feet after a 10,000-gallon acid treatment. No fluid was made with the gas.

The dual well finaled from the Fusselman for a calculated, absolute open flow potential of 9.4 million cubic feet of dry gas per day, through perforations from 15,611 to 15,684 feet. The pay was acidized with 20,000

gallons Total depth is 15,734 feet and 75/8-

YATES WELL Texas Oil & Gas Clorp. No. 2-K Wilson is a new well in the Girvintex (Yates) pool of Pecos County, six miles west of Girvin. Operator reported a calculated,

absolute open flow potential of 1.466 million cubic feet of dry gas per day, through perforations from 1,172 to 1,325 feet after 3,500 gallons of acid. Location is 3,200 feet from north and west lines of SF 13132, R. R. Ogden survey.

inch pipe is set at 10,299 feet and five-inch liner is at 15,734 feet.

Location is 1,320 feet from south and west lines of section 23, block 57, T-2, T&P survey and 1/2 mile east of Atoka productio4n and 11/4 miles northeast of other Fusselman production.

Higher 1977 profits offset by more cost TULSA, Okla. (AP) - Higher 1977

profits for the U.S. oil industry were partly offset by increased costs and foreign currency translation losses, a Tulsa-based petroleum industry magazine says.

In its May 1 edition, The Oil and Gas Journal reports oil industry profits were boosted by higher oil and gas prices and production.

The start-up of the trans-Alaska, crude oil pipeline also aided the advance in earnings, the weekly petroleum business magazine reported.

"The increases were partly offset by soaring costs and, in some cases, foreign currency translation losses," the magazine said. "The currency exchange losses were heaviest in the fourth quarter.

A group of 27 of the nation's biggest oil firms reported total net profits of \$12.55 billion during 1977, the Journal said, 4.5 percent more than in 1976.

Profits for a group of 14 smaller companies increased 19.2 percent, the magazine said. Among the larger firms, 19 reported earnings advances while all, but two of the smaller firms reported advances.

Meanwhile, the magazine pointed out the oil industry's overall return on ders equity remained less

equity averaged 12.3 percent, compared with 12.9 percent during 1976, the Journal said

The Journal compared that with Citibank's report that return on stockholders equity for 1,745 U.S. manufacturing companies averaged 15 percent in 1977, the same as in 1976.

Other statistics reported by the Journal for its group of petroleum companies included:

Capital and exploration expenditures totaled \$26.8 billion last year, an increase of 1.9 percent from the previous year.

Total net liquids output was 19.38 million barrels a day last year, compared with 19.08 million barrels a day during 1976.

Crude runs totaled 21.49 million barrels a day, up from 20.93 million barrels a day in-1976.

Natural gas production declined two percent to 38.06 billion cubic feet a

Estimated oil reserves declined 2.9 percent during the year to 39.435 billion barrels. Estimated gas reserves dropped two percent to 153.8 trillion cubic feet.

Net wells drilled increased to 7,590 last year from 6,479 during 1976.

Energy poor areas seek new sources

By LEE LESCAZE **The Washington Post**

BOSTON - Governors and premiers of desperately energy-poor New England states and eastern Canadian provinces called on experts last week for advice on how to reduce their dependence on high-priced and diminishing supplies of oil, natural gas and coal.

From two days of workshops aimed at providing the region's political leaders with projects and policies to further alternative energy development, however, emerged only general resolutions that demonstrated the difficulty of regional cooperation and the still embryonic state of alternative energy.

Moreover, the experts complained that their hosts (six governors and five premiers) don't really take alternative energy-whether it is solar,

Gomez well completes

Texaco Inc. No. 3-D Pecos Fee is a new well in the Gomez (Wolfcamp) pool of Pecos County, 13 miles northwest of Fort Stockton.

The well finaled for a calculated, absolute open flow potential of 2.45 million cubic feet of gas per day, through perforations from 11,006 to 11,110 feet after 13,000 gallons of acid and 47,400 gallons of fracture solution. Total depth is 11,260 feet and plubbed back depth is 11,180 feet? Operator set 75/8-inch casing at 10,100 feet. = The well is 2,179 feet from north and 660 feet from west lines of section 25, block 48, T-9, T&P survey and 2,469 feet north of WolfcampFproduction.

STRAWN WELL

- Chillion

Hillin Production Co. No. 3 C. (Canon, a new well in the Sheffield (Strawn) pool of Pecos County, was completed for a calculated, absolute open flow potential of 28 million cubic feet of gas per day, through perforations from 6,629 to 6,676 feet.

The pay was acidized with 3,500 gallons. No fluid was made with the gas.

Wellsite is 853 feet from north and 1,787 feet from east lines of section 18, block C-3, EL&RR survey and 16 miles west of Sheffield.

Total depth is 8,000 feet and 414-inch casing is cemented on bottom. Plugged back gtotal depth is 6,920 feet.

hydroelectric, wood or wind-serious-

"The fundamental problem is that the coming crisis is further away than the next election," grumbled one participant. "Is there a commitment to alterna-

tive energy on the part of our political leaders?" asked Joseph Levangle of the Northeast Solar Energy Center.

"There are political realities to be dealt with," answered Steven Millan of Canada's Department of Mines and Energy, in a statement echoed by others warning that any recommendations from this conference would be 'blown out of the water" if the participants suggested giving one political jurisdiction in the area something its neighbors might covet.

Wallace Bowley of the University of Connecticut illustrated the difficulty of Washington's doing business with alternative energy proponents with a joke: "The federal government is an elephant and when it looks around for something to have intercourse with, it looks for another elephant. The solar energy business is a mouse.

Businessmen in the field began to express their frustration as the conference wound toward its conclusion and talk swung toward drafting a statement for the governors and premiers to issue that would stress there is an energy crisis.

"You know I find it depressing to have to prove to our premiers and governors that there is a crisis. This is ridiculous," said Robert Wygant, who runs Solar Energy Systems Inc., in Prince Edward Island.

The conference did come up with some recommendations, which will be submitted soon to the governors and premiers for deliberation at the annual meeting of the political leaders in June.

As New Hampshire Gov. Meldrim Thomson Jr. made clear at the outset here, not all the political leaders are ready to throw all available support to alternative energy.

"This region will continue to be depressed until we solve the problems of energy," Thomson said. "What's practical is to continue to develop nuclear energy. We know it's clean and it's safe.'

Alternative forms of energy, whether from water, wind, the sun or wood, Thompson said, are highly experimental.

Again and again at the conference, sponsored by the New England Regional Commission and the Council of Maritime Premiers, people cited a poll taken in the United States last vear.

Americans to present and potential uses of solar energy.

Sponsors are hoping that Sun Day will be far larger than Earth Day, the 1970 environmental celebration which inspired it. They predict that millions of people will join in events in 400 communities, from Tuscaloosa, Ala., where folk singers will unveil a new song, "God Bless Solar Energy," to Fairbanks, Alaska, where a workshop will demonstrate how the Sun's energy can be tapped even in the Arctic north.

Sun Day provides a foum for the President to announce a major shift in his administration's search for answers to the nation's energy problems, and aides said his speech will answer complaints of solar energy activitists that he is doing too little to support alternatives to oil, gas, coal and nuclear power.

White House officials told the Los Angeles Times in Washington that Carter will disclose his backing for significant increases in funding for solar research. He also may announce an administration-wide review of energy policy and divulge still other initiatives, they said.

Meanwhile, officials in Colorado were hastily arranging for solar energy exhibits to use as a backdrop for his appearance on now-barren South Table Mountain between Denver and Golden. They will range from solar collectors to wind turbines to a "gasahol" powered bus, according to a spokesperson at the Solar Energy Research Laboratory here.

After spending Wednesday night in Colorado, Carter will fly to Los Angeles to address a noon meeting of the Los Angeles Bar Association, then travel to Portland, Ore., for a Thursday night press conference. He will conduct a "town meeting" in Spokane. Wash., on Friday before returning to the White House.

Carter's Western swing comes at a crucial time, both for him politically and for the future development of solar energy.

Solar activists, includiong many environmental leaders, say Carter has failed to follow through on campaign promises to redirect U.S. energy programs toward solar technologies. Instead of increasing solar research funds, his administration hs cut federal support to \$400 million, said Richard Munson, a Sun Day coordinator.

At the same time, Munson said, "public enthusiasm for solar energy is skyrocketing." He cited a Harris poll showing that 80 percent of Americans favor a program to develop renewable energy resources and, referring to reports tat the president will announce new initiatives here, he added: "The administration is beginning to get the message."

Some of Carter's advisers acknowledge it makes political sense for the president to give greater support to solar energy development. Congress already is starting to add to the solar budget and "there's no way in the world we could veto that bill," one presidential aid said. "We might as well get out front on it."

energy bill," said an aide to the senator. "But this isn't going to make him more likely to work with Schlesinger on anything."

Johnston told Schlesinger Thursday night that the proposed rules changes, which would make it cheaper for the East Coast to buy imported oil, would undermine the administration's own efforts to enhance domestic production.

The changes Schlesinger has promised would affect the government's "entitlements" program, a pricing mechanism that is generally conceded to be unusually complicated, even in the complex world of energy regulation.

"Entitlements" were created to deal with price disparities created by the government's oil pricing rules. Under federal regulations, domes-

tic oil is considerably cheaper than imported oil. Since the East uses much more imported oil than the rest of the country, Eastern consumers have been paying more for oil than consumers in other regions.

The "entitlements" regulations force refiners using the cheaper domestic oil to pay subsidies ("entitlements") to refiners, utilities and industries in the East to offset the higher price of imported fuel.

These subsidies have held down the price of oil used in the East, although prices there are still about \$1.40 higher for each barrel of fuel. At the same time, the subsidies have created a disincentive for domestic refiners to ship oil to East Coast markets. That has increased the East's dependence on imports.

The changes Schlesinger promised last week would more than triple the subsidy Eastern refiners now receive on each barrel of imported residual fuel oil. The subsidy would be offset somewhat by an import fee.

Schlesinger also said he would double the current subsidy for domestic residual oil shipped to East Coast markets.

Energy Department analysts say the result of all this would be a reduction in oil prices in the East and an increase in shipments of oil from the western U.S. to the East.

If everything worked as th Energy Department plans it, the new changes would please everybody.

Easterners would get lower prices, and western oil producers would have a profitable new market. The plan

Forecast

revised

HOUSTON (AP)-Hughes Tool Co. has made an upward revision in its annual forecast for domestic oil and gas drilling operations.

James R. Lesch, president, has told shareholders the company now expects an average of 2,175 rotary drilling rigs to be used this year. The earlier forecast was 2,175. Either level would give the industry its most active year since 1957.

AP Golf Writer NEW ORLEANS (AP) - Just as he'd predicted, the string ran out for Gary Player.

With everybody and his grandmother asking Gary if he thought he could win four in a row, it put tremendous pressure on him. I don't know how he played as well as he did," said Lon Hinkle, who parlayed power and precision into a final round 66 to win the New Orleans Open Golf Tournament Sunday and snap Player's victory string at three.

"You can't go on winning every single week," Player said. "Winning three in a row, in this day and age and against this competition, it's something I'll remember all my life.

"I've won six of my last 10 tournaments (three in South Africa). You can't be too greedy."

THE LITTLE man whose spectacular comebacks had netted him the titles in the Masters, Tournament of Champions and Houston Opens, could muster only a scrambling round of par 72 Sunday. He failed in his drive to become only the third man in history and the first in 26 years to win four PGA Tour titles in a row. Player finished tied for fifth, six shots off the pace.

thing has happened to me," he said. "I won 11 (international) titles in 1974. I enjoyed trying to win four in a row. And if I'd won four, I'd have enjoyed trying to win five. But it was not to be.

Player's streak stopped;

He dropped out of a five-way tie for the lead with a three-putt bogey on the first hole, missed a six-foot birdie putt on the fifth and bogeyed the ninth, his second shot hitting a cypress tree.

From that point on, it was a fight between the long-hitting Hinkle, Gibby Gilbert and Fuzzy Zoeller. Hinkle finally nailed down this first title of his six-year tour career with a magnificent wedge shot that set up the decisive birdie on the 72nd hole. The ball stopped four to five feet

from the flag. "The sound from the crowd, it sent chills up my back and down my legs and through my arms and up my neck," bubbled the 28-year-old Hinkle. And it set up the putt that allowed

him to break a tie with Zoeller and Gilbert and finish with a 271 total, a whopping 17 shots under par on the 7,080-yard Lakewood Country Club course

GILBERT AND Zoeller each shot 67 for a 272 total. Grier Jones was next at 67-274. Then came Player, Bob

"It's not the first time this sort of Murphy, Calvin Peete and rookie D.A. Weibring, tied at 277. Murphy shot a 67 in the hot, humid, hazy weather, Peete had a 68 and Weibring secured his playing rights for another year with a 71.

Homero Blancas, who entered the final round in a tie for the lead with Player, Zoeller, Gilbert and Hinkle, blew to a 78 and a 283 total.

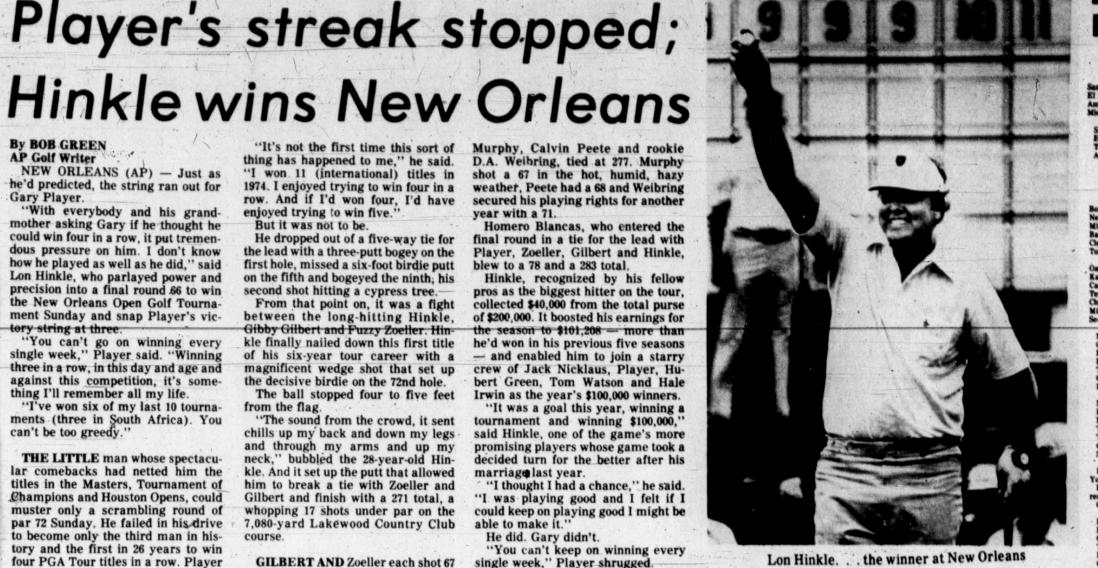

Hinkle, recognized by his fellow pros as the biggest hitter on the tour, collected \$40,000 from the total purse of \$200,000. It boosted his earnings for he season to \$101,208 - more than he'd won in his previous five seasons - and enabled him to join a starry crew of Jack Nicklaus, Player, Hubert Green, Tom Watson and Hale Irwin as the year's \$100,000 winners.

"It was a goal this year, winning a tournament and winning \$100,000," said Hinkle, one of the game's more promising players whose game took a decided turn for the better after his marriage last year.

"I thought I had a chance," he said. "I was playing good and I felt if I could keep on playing good I might be able to make it.'

He did. Gary didn't.

'You can't keep on winning every single week," Player shrugged

Solomon, bad food beats Barazzutti

LAS VEGAS, Nev. (AP) - Corrado Barazzutti had to face a pair of tough opponents in the finals of the \$250,000 Alan King Tennis Classic at Caesars Palace, and it was too much for the Italian to overcome.

Barazzutti was forced to quit during the second set of his nationally televised match with Harold Solomon on Sunday because of stomach pains. The score was 6-1, 3-0, retired.

"I'm sorry, I'm sick," Barazzutti told the crowd of about 3,000 on hand for the title match. "I cannot play anymore. I'm sorry

'I ate bad food last night and was vomiting all night," Barazzutti explained later. "I tried to play but could not. Solomon is a tough player. He hit so many balls back.

Solomon was in complete control of the match after breaking Barazzutti's serve in the opening game when the Italian committed a number of unforced errors, the first indication that he was not feeling well.

The victory was worth Solomon. After the match, barrow containing 50,000 lars was brought onto the c mon climbed inside and himself with his winnings.

Barazzutti collected \$25,0 ishing second. Solomon, an outstanding

player, wore down Barazzut steady game. He said he n opponent was not feeling that it did not change his st

"I was resolved to keep p game and not let up," said "I waited for short balls an the net, using my forehand on. This is the first time I've a final in this manner.

"Corrado had a great w expected a tough match," Solomon. "It's obvious he sick. I'm very sorry, but that I won.'

The tournament was pla

A legend shines in Legends tourney

By DENNE H. FREEMAN **AP** Sports Writer

AUSTIN, Texas (AP) - It was the stuff legends are made of - that is why Slammin' Sam Snead was playng in a tournament named The Legnds of Golf.

But what Snead had to do Sunday on he final 18 holes of this unique \$400,oo tournament would have turned a lot of legends into pillars of salt. Snead, with partner Gardner Dickinson along for the ride over the tricky Onion Creek Golf Club, took on Australians Peter Thomson and Kel Nagle in a one-on-two duel for the \$100,000 first prize.

Snead, highly visible because of his side-saddle style, shot a 1-under-par 34 on the frontside himself, then saved par with crucial putts on Nos. 13, 14, and 15. Then, he birdied 16, 17 and 18 and the Aussies wished Snead would go use his side-saddle to ride horses. For the 54-hole tournament, Snead

had 14 of his team's 18 birdies. It was a three-footer on the final hole that doomed Thomson and Nagle belly-up. "If I miss my (nine-foot) putt at 16 then school is out, " said Snead. "Then I made that putt (an eightfooter) at 17 and they started to stir a little. Then I put the drawers on that wedge at 18 and I knew we had 'em." Thomson made a 12-foot birdie putt

at 16 but Snead covered it up. "I thought we had it won after I

SWC tourney opens May 12

By The Associated Press

Texas A&M, Arkansas, Baylor and Houston will be vying for top honors, when the Southwest Conference postseason tournament opens May 12. For he Aggies, however, a tournament rown would be icing on the cake because they are assured of a berth in the NCAA baseball playoffs.

Texas, a participant in the SWC. tourney for the past 12 years, lost a bid for another try, finishing fifth in the loop for the season.

Texas A&M captured the regular season crown Saturday. The Razorbacks took the last game of a threegame Friday-Saturday series, 6-5, but the damage was already done. The Aggies won the first two outings, 6-1 riday and 5-0 Saturday.

holed that putt on 16, " said Thomson. "It was a big putt Sam made." Snead set up his birdie at the 590-Toronto Garvin W.2-1 California Knapp L.3-2 Griffin DMiller Hattaello yard par-5 No. 18 hole with a driver, av

one-iron and a pitch that hit eight feet above the hole and spun back near the cup. "It sure looked like we had lost it," said Snead after his team had started

Cleveland the day with a three-shot lead that Dade rf Grubb lf BBell 3b melted away when Nagle holed five birdie putts between the eighth and BBell 30 Thorntn 1b Blanks ss Horton dh Pruitt c Mannng cf Kuiper 2b 13th holes.

"Sometimes it's better to be coming up than to be going down ... you have more charge," said Snead. "Gardner is a great little pardner. He kept me. pumped up. He kept saying 'come on Sam ... I know you can knock it in." Dickinson volunteered, only so briefly to keep only \$1 of his \$50,000

share and give the rest to Snead. It was the biggest payday ever for both the 51-year-old Dickinson and Snead, who has won 84 major golf championships.

Snead and Dickinson were 17under-par 193 on the par-70 course that plays to a friendly 6,584 yards. They shot a final round .66 to the Aussies' 64. Nagle and Thomson split \$65,000 for their second place finish a stroke back.

The tournament, brainchild of Fred Raphael, included 12 twosomes of golfers considered legends.

The prizes were so rich it paid last place finishers Paul Runyan and Lew

Worsham \$10,000 each. "I hope they keep having it," grinned Snead. "I've never putted this well side-saddle. You have to throw your fanny out of gear to ue it. All I know is it helped us when it looked like we were in the bag."

Dibbs wins

TULSA, Okla. (AP) - Eddie Dibbs defeated Pat Dupre for the men's single title at the Bank of Oklahoma Colgate Grand Prix Tennis Tournament here Sunday. Dibbs, of New York City, had to go

three sets and come from a 4-1 deficit in the final set to defeat the second year pro from Stanford University 6-7, 6-2, 7-5.

Dibbs, currently ranked fifth on the Colgate Grand Prix tour, pickedup \$8,500. Dupre won \$4,250.

By SHIRLEY POVICH

Special to The Washington Post WASHINGTON - In the major league press boxes, there are certain inmates engaged in one of the world's oldest professions. They earn \$50 a day and take abuse that sometimes could tempt them to ask, "What is a nice person like me doing in a place like this?"

They are the wretches who have accepted hire as baseball's official scorers, baseball writers paid to call 'em as they see' em for the official records. It is a practice rooted in the first years of the century. But aside from the \$50 stipend, it is a no-win situation for the scorers. For their proper rulings, no applause; for the doubtful ones, much outrage.

The reaction of an athlete who believes himself unfairly charged with an error or deprived of a hit is generally to regard the whole press box as scum, a view often shared by indignant home fans

In Cleveland one day, Ben Chapman saw the "E" sign posted on the scoreboard after beating out what he thought was a hit. From first base, he

Scorekeeping is a thankless job

Park, where the stands were close to the diamond, Chapman's diatribe amounted to a public address.

THE OTHER day in St. Louis, when Bob Forsch of the Cardinals was credited with a no-hitter against the Phils, even some of his fellow writers joined the outcry against the official scorer. Neal Russo of the St. Louis Post-Dispatch was the suspected miscreant.

In the game stories, never was a nohitter so sharply questioned. Both wire services said flat out that it was a gift, that Russo had made a bad call when he ruled "error" on a ground ball hit to Ken Reitz in the eighth. Pitcher Forsch later made the astonishing comment that it was "a questionable call.'

The truth is that the official scoring rules are tilted against the pitcher and are lenient toward offending fielders. Rule 10:05, Sec. D says with

Slammin' Sam's putting style

great clarity. "In applying the rule always give the batter the benefit of thedoubt." All of the scoring rules apparently are hot studied by all of theofficial scorers or all of the players.

Chapman was an obvious scofflaw because it is spelled out in rule 10:01, Sec. C: "The scorer is an official representative of the league and is entitled to the respect and dignity of his office." Chapman was unaware of that dignity.

ALL PLAYERS do not know who the official scorer is. Joe Kuhel once took a punch at me after a game in which he was charged with an error on a ground ball. The fact that Bob Considine was the official scorer that day was of no matter to Kuhel. You've seen one lousy sportswriter, you've seen them all.

Alfred Friendly, then-managing editor of The Post, expressed shock at the practice and told Bob Addie. The Post baseball writer, to resign the scorer's job. Quietly, Friendly put in a pay raise for Addie equal to what he was paid by the league.

"Bob Jones got the croquet putter banned before he died," Snead said,

Scoring standards differed widely in different cities and still do. Boston was regarded as a city where the home-team players were most notably favored. New York had the reputation for being toughest on both teams. With one exception, to be detailed later, the Washington scoring was tough, if I do say so myself.

Ted Williams, who didn't need many breaks from scoring, got more than a few during his years in Boston. Red Sox fans expected Teddy Boy to get all the favors. They invaded the press box in force during one game when Williams didn't get a hit on a line drive that Gerry Priddy leaped for and dropped. When the "E" sign went up, they went to the press box and attacked the first writer inside. Bob Holbrook, despite his innocence. John Gilhooley was the official scorer that day.

IT WAS in Boston, too, that the most notable of all scoring stories occurred. This was in old Braves Field, not Fenway Park. It involved Paul Waner of the Pirates who, it was advertised, was seeking the 3,000th hit of his brilliant career.

Waner slashed a hard ground ball off an infielder's glove his first time up and was safe at first. The "H" sign went up, but nothing doing. Waner, on first base, was waving his hands furiously toward the press box and shaking his head and stepping off the bag to protest that he would not accept that kind of a hit, indicating it should have been an error. Not until they took down the "H" sign and put up "E" would Waner let the game continue. But, hurrah, he singled clearly next time up.

No ordinary baseball writer is selected as official scorer - no green peas, no novices. The requirements used to be that only writers who covered 100 or more games a year were accepted for the job. It's been dropped now to 81, because newspaper staffs change reporters more often and writers do not cover games with the former regularity.

THERE IS a plus to being an official scorer. Once in a great while, under very special circumstances, you just might do a deserving fellow a favor. This happened in 1938 on the last day of the season, when a certain writer who shall remain nameless was the designated official scorer at Griffith Stadium. Now let's switch to conversation with Manager Bucky Harris in the Senators' clubhouse before the game.

Harris: "I'll tell you something. (Al) Simmons just asked me to bench him. Says he doesn't want to play to-

day." "Why?"

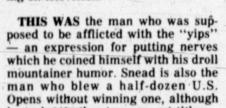

"Simmons says he don't want to referring to the immortal Grand risk going hitless because he's batting about .300 on the nose and don't want to fall below that figure and not get as good a contract next year." "What you doing about it?" "Simmons said Sammy West could play left field but I said I wouldn't ask him because I know Sammy is hitting. .300 on the nose, too."

Slambang Sam proved the legendest of the legends - not with his sledgehammer power but with watching on television. hole, adding an eight-footer at the

Houston picks up another running back

Snead. . . the side-saddle approach

HOUSTON (AP) - The Houston Oilers are rounding out their 1978 team with a little help from Tampa

Bay. Last week, the Oilers obtained a draft pick from the Bucs that will net Heisman Trophy winner Earl Camp-bell. Saturday, the Oilers traded fullback Don Hardeman for Bucs running back Anthony Davis.

Houston Coach O.A. "Bum" Phillips confirmed the transactions Satur-

"They wanted Hardeman and we wanted Davis," he said. "We were top-heavy at fullback and they needed a fullback. It's a good deal for both of us."

Davis was an All-American running back at Southern California. He was drafted by the New York Jets in 1975 but played instead for the World Football League before it folded.

In 1976 he rushed 104 times for 417 yards and caught passes for 408 yards while playing for Toronto in the Canadian League.

"Anthony's an excellent receiver

and he'll give us a lot more speed," Phillips said.

Hardeman gained 648 yards and scored five touchdowns in his rookie season for the Oilers in 1975. He was one of two first-round draft choices for Houston and started most of the season, but since then has been used primarily on specialty teams and in short-yardage situations.

The Oilers announced last week they had agreed to terms with Campbell and will sign him to a multi-year contract after making him the No. 1 draft choice in Tuesday's National Football League draft.

Slammer from Atlanta. "He didn't think it looked nice.

about 10 years ago.

"That's when I shifted to the side saddle. I didn't have any confidence any other way."

Under the revised rule, the center shafted putting blade was banished and it was mandated that a golfer must stand with both feet on one side of the ball - not astride it.

In Snead's unique technique, he holds his feet close together semi-sideways to the ball and with his right hand low on the shaft with his left hand several inches above. It isn't a pretty exercise, and Sam

doesn't recommend it "You got to be pretty agile," he

explained. "You have to throw your fanny out of gear."

ED TUTWILER, Indianapolis automobile dealer and a longtime playing companion of Snead, also sent out a danger signal to the millions of golfers who might have been watching Snead's success on television and might be of a mind to experiment with

"Few others could do it," said Tutwiler, who with partner Dale Morey made a reputable amatuer showing in the Legends event. "Sam can touch his palms to the floor without bending his knees and can kick as high as a Radio City Rockette. You have to be an acrobat to butt the way he does."

Shops

"Who is gong to play left field?" "West will play. Simmons asked him and Sammy volunteered."

ARMED WITH this information, the nameless official scorer ascended the press box with a mind to be lenient to Nice Guy Sammy West if possible. But his first three times up, no chance. All fly outs. In his fourth atbat. West grounded to the first baseman, who fumbled. "Hit," the official caller signaled quickly. There were some surprised looks from his colleagues.

The game went into extra innings and West needed another hit to preserve his .300. In the 10th, he reached base on a ground ball that some unfeeling people may have scored as an obvious error by the second baseman. "Hit," was the speedy judgment. Sammy wound up the season hitting .302 and you can look it up. Now, was the official scorer guilty of anything? Under the circumstances, we would prefer to call it executive privilege.
