SUNDAY

FRIDAY, AUGUST 4, 1978 32 PAGES, 4 SECTIONS

Top photo shows a scene pretty much repeated over the three-county flood area. Two new model cars were left stacked after the angry waters of the Medina River receeded around Bandera Thursday. Next to the cars lies a wall from a destroyed house. The bottom photo shows the Pednernales River

overflow covering much of the Johnson family plot, where the late president, Lyndon Johnson is buried near Johnson City. The floods in which at least 21 persons have died, may be the worst in the state's history. (AP Laserphotos)

# Forecasters say more rain for flood region

By GREG THOMPSON Associated Press Writer

Weather forecasters predicted still more rain for Central Texas today, where at least 21 have died in flooding that followed weeks of harsh

The National Weather Service said conditions were favorable for rain to continue drenching flood-ravaged areas for another "three to four

Waterways already swollen by the rains threatened areas downstream of the three-county section where least 15 persons died Tuesday and

Six more were reported dead 200 miles to the north in the small farming community of Albany Thursday night, a Department of Public Safety spokesman said.

The storms spawned by the dregs of tropical storm Amelia set out on a new northeasterly path.

Weary rescue workers resumed their muddy search at daybreak in the Hill Country. Volunteers and law enforcement officers, on horseback and on foot, began combing the newly-accessible banks of the Medina

River at daybreak. "We're pretty sure we'll find some more (victims)," said Bandera police

deputy Jackie Doyle. "We wish we weren't so sure."

Hundreds have been left homeless in the Hill Country, and while official damage estimates may be weeks away, the figure is expected to run easily into the tens of millions of

Authorities struggled to restore communication and transportation links to Albany, where the National Guard attempted to pluck some residents from their rooftop outposts.

President Carter declared Texas a major disaster area Thursday, freeing federal recovery funds for the three hardest-hit counties in the central hill country-Kerr, Bandera and Kendall. Ironically, the three counties had already been named drought disaster areas

'This area has gone from a drought disaster area to a flood disaster area in a matter of two days," said Rep. Bob Krueger, D-Texas, who drove through Bandera County with Gov. Dolph Briscoe Thursday. "What we've gotten in the area is a year's astonishing to see the devastating force of the water."

Briscoe, who requested Carter's help, said, "This has to be one of the worst floods in the state's history. The

devastation is unbelievable.'

Army helicopters from Fort Sam Houston in San Antonio were called to the central Texas flood area again Thursday to rescue 10 people stranded by high waters.

Bandera County sheriff's dispatcher Jackie Doyle said more than 100 persons on ranches and in rural homes around the north and west prongs of the Medina River were cut

off.
"Lots of people live up there and are stranded with no water, no phones, no electricity and no food in some cases," she said. "There'll probably be some lives lost there of people we don't even know are missing yet.

Downstream from the area hardest hit by Wednesday's and Thursday's floods, riverfront residents braced for cresting rivers and streams. The Army Corps of Engineers hoped two dammed lakes could contain the

The Pedernales River was expected to flood its banks around Stonewall, Texas, and the LBJ Ranch was in its path. Late Thursday, a witness who flew over the ranch said water covered more than half of the family

# Government predicts rising beef prices (+32 percent) have peaked

WASHINGTON (AP) - The rapid climb in retail beef prices - up 32 percent from last fall - has peaked, the Agriculture Department is pre-

And in what could be even better news for inflation-battered consumers, a department report indicated on Thursday that beef prices could fall slightly in coming months.

The department was able to make those predictions at the same time it was saying retailers finally have begun passing on to consumers the full impact of soaring beef prices at the slaughterhouse.

That traditional pass-through normally takes only a few weeks but had been lagging in the current spiral. When beef retailers began to show a more normal pattern in June, slaughter cattle prices - which had risen by more than 40 percent since last fall slipped slightly, softening the blow.

At that point the increase in retail prices was lagging behind by 8 percentage points.

What department forecasters said they do not yet know is when cattle raisers are going to start rebuilding herds so that prices can come down

substantially. The current forecast calls for continued high prices. through 1980 or 1981.

Various department surveys have found retail beef prices sliding a little in recent weeks, largely because of supermarket price-cutting.

## Area weather may bring to mind autumn for some

Today began for at least one Midlander as "the kind of day that makes you wonder what you did with your summer wages.

It was cool and misty - like au-

tumn in other climes. While chances for more rain in Midland have increased and rainfall is commonplace throughout the surrounding area, however, the National Weather Service at Midland Regional

Airport today reported only a trace of

precipitation fell overnight. The weatherman said the station had received just a trace in the past 24 hours, while towns in the area received varying amounts - ranging from .05 inch in Lamesa to .43 in Big Lake and .75 in Big Spring.

Drizzle greeted most Midlanders (Continued on Page 2A)

# Family followed him even unto death

SALT LAKE CITY (AP) -Seven children who plunged 11 stories from a hotel balcony had lived in \$90-a-day luxury with a father who thought he was God. The children never went to school and rarely spoke to strangers, eating meals in their suite and shunning the hotel

The father, Immanuel David, 39, had committed suicide two days before his wife shoved their children or urged them to leap off the balcony with her Thursday in a bizarre murdersuicide that left only one child

Thirteen-year-old Elizbeth David was in critical but stabilizing condition early today.

Despite pleas from horrified people who watched from the sidewalk Thursday morning, Rachel David helped or pushed her children, ranging in age from 5 to 14, from the balcony. Police said at least three jumped willingly, but witnesses said the younger ones struggled and tried to grab the railing.

After all the children had fall-

en, officers said some of the onlookers yelled for Mrs. David to jump. She did,

Dead were Mrs. David, 38; Rebyca, 5; David, 6; Joseph, 8; Debbra, 9; Joshaha, 18; and Ra-Elizbeth was in surgery 10

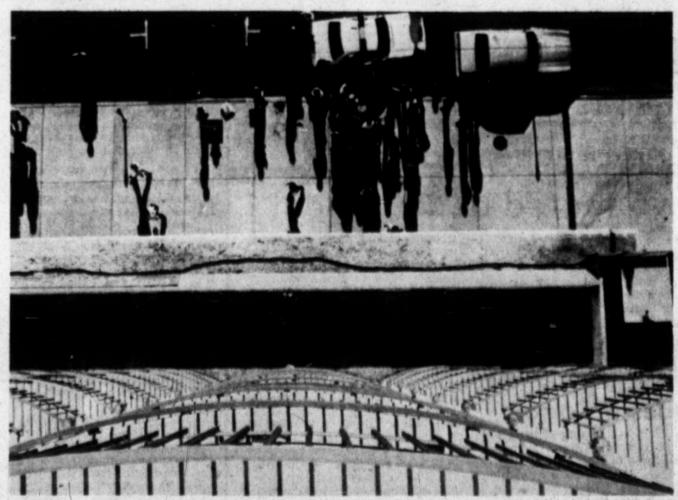

hours Thursday with a team of 15 doctors. Spokeswoman Karyn Haeckel at LDS Hospital said the girl had multiple compound fractures and abdominal in-

The family had secluded itself in the suite for 14 months. Hotel employees said the children spoke to strangers only with their parents' permission. They said the children stayed in the suite most of the time, never used the hotel pool and never went to school. They were

taught by their parents.

Hotel staff apparently didn't question the arrangement because David had told them he had teaching credentials, said hotel manager James Bradley. David grew up as Bruce Longo

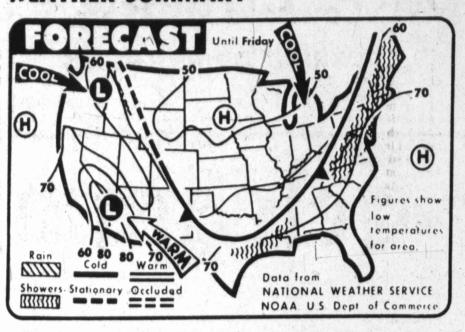

(Continued on Page 2A)

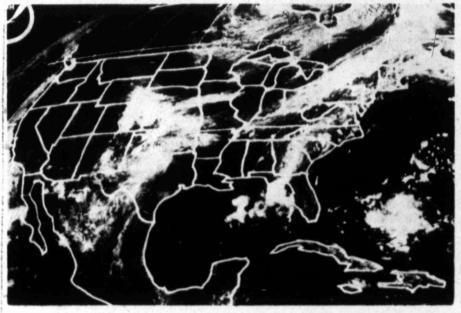

Eight members of one family jumped or were thrown from the balcony immediately beneath this 12th floor view. A woman and six of her children

died in the plunge Thursday morning. A seventh child was in critical condition. (AP Laserphoto)

#### **WEATHER SUMMARY**

SHOWERS predominate the National Weather Service forecast today and Saturday, with precipitation predicted for parts of Texas, Louisiana and Mississippi and for the East Coast, from Maine to Maryland and the western parts of Virginia and North Carolina. (AP Laserphoto Map)

THURSDAY'S SATELLITE CLOUD picture shows a weak frontal band extending from Texas to the Northeast. Light thunderstorms persist over northern Texas while mid- and low-level clouds are visible over the Central Plains. Scattered showers extend from the mid-Atlantic states to Georgia. (AP Wirephoto)

from the building because of the intense heat. The heat is just now getting down to where we can go in," said

Lee County Sheriff Don Arnold. He said several buildings were afire in the rural southeastern Iowa com-

Three personl were transferred to the burn unit at University Hospitals in Iowa City, and "two or three others were treated and released," Arnold

Hospital officials in Fort Madison identified three of the survivors as Robert Rider, 54, his wife Mary, 49, and their daughter Cindy, 23.

All three were in critical condition with extensive burns, a University Hospitals spokesman said.

Jean Hoffmeister, a spokesman for the disaster control office at the Fort Madison community hospital, confirmed that three persons injured in the fire were treated and released.

The six apparently lived in a house near the fire, she said.

# **Jobless** rate turns upward

By R. GREGORY NOKES

WASHINGTON (AP) - Unemployment rose sharply in July, climbing to 6.2 percent of the labor force, with teen-agers and women bearing the brunt of the increased joblessness, the government reported today.

The nation's jobless rate was 5.7 percent in June, the lowest in more than three years. The July rate of 6.2 percent was the highest since March, when it also was 6.2 percent.

Some increase in unemployment was considered likely because of government moves to slow the economy to help restrain inflation, but the July increase was surprisingly large and was spread throughout most employment categories.

The Labor Department gave the following breakdown in July joblessness compared with the previous month:

- Adult men, 4.1 percent, up from 3.9 percent in June. - Adult women, 6.5 percent, up

from 6.1. - Teen-agers, 16.3 percent, up from

Whites, 5.3 percent, up from 4.9. Blacks 12.5 percent, up from

- Full-time workers, 5.7 percent, up from 5.2. White-collar workers, 3.8 per-

cent, up from 3.5.on. The July increase more than reversed all of the employment gains in June, when unemployment had dropped to 5.7 percent from 6.1 per-

cent in May. A Labor Department analyst said the July increase in joblessness was "as hard to understand" as the steep June decline, and he said statistical problems could have accounted for

much of the change. "When something goes up so sharply and then falls back in the next month, there is a tendency to think the former figure was aberrant," he said.

The analyst also noted that a separate jobs measurement in July showed that non-farm employment had actually increased, rising by 265,-000 jobs, a further indication of statistical problems.

The difference between the two measurements, one taken in a household survey and the other provided by employers, is "not technically explainable ... there is something unreliable about one of them," said the analyst, who declined use of his name.

However, he said the 6.2 percent unemployment rate in July was a good indication of overall joblessness in the economy.

Carter administration economists say the 5.7 percent June jobless rate could turn out to be the best for the year, in view of the moves underway to slow the growth of the economy to combat inflation.

They said they hoped the public would give it credit for doing better than expected in reducing unemploy-

In January, when unemployment was 6.3 percent, the administration was forecasting a decline to only 6.2 percent by the final quarter of this year. After unemployment dropped to 6.1 percent in May, the forecast was revised to 5.9 percent.

But even that forecast appeared too pessimistic when unemployment declined to 5.7 percent in June, a threeyear low. The government said 700, 000 jobs were created during the month and that the proportion of the nation's working-age population with jobs rose to a record 58.9 percent.

However, with other indicators showing that the economy is growing at a slower pace than before, both government and private economists think it likely unemployment will rise slightly before heading downward

again by the end of the year. The administration is not yet willing to say that the jobless rate will drop below 5.7 percent by Decem-

downtown Salt Lake City. Witnesses said a mother threw some of her seven children off the balcony and others jumped. (AP Laserphoto)

# Disaster assistance centers being set up to aid stricken victims

WASHINGTON (AP) - State and federal officials are arranging to establish disaster assistance centers in the Central Texas Hill Country where devastating floods have killed at least 15, left hundreds homeless and caused tens of millions of dollars in dam-

President Carter Thursday declared the state a major disaster area, freeing federal agencies to lend assistance to the stricken area and releasing recovery funds for emergency relief. Following the presidential order,

William M. Wilcox, administrator of the Federal Disaster Assistance Administration, designated the counties of Kerr, Bandera and Kendall eligible for assistance.

Ironically, prior to the flooding the counties had been designated disaster areas by the Agriculture Department due to severe drought conditions.

Announcements of the location of the flood relief centers are expected within a few days. The centers will be staffed by representatives of federal, state and volunteer agencies which will provide individuals with the opportunity to apply the following assistance and information: Homeowners and businessmen

who suffered property damage may be eligible for Small Business Administration loans. Interest rates range from 1 percent to 6% percent, depending upon the amount of the - Those out of work because of the disaster also may apply for special

unemployment compensation program available through the U.S. Department of Labor as administered by the State of Texas. - The Internal Revenue Service will advise disaster-affected citizens

on special tax provisions that may provide quick tax refunds. - Personal needs of individuals (assistance) can be obtained from the

state and volunteer agencies represented at the disaster assistance cen-

- Individials or families with disas-

ter-caused serious needs for necessary expenses not covered by other programs may apply for a financial grant from the state of Texas.

Joe D. Winkle of Dallas has been named federal coordinating officer as part of the disaster declaration.

Winkle said residents of the floodravaged area can determine their eligibility for one or more forms of advice or assistance by visiting the disaster assistance centers.

He said the FDAA will conduct briefings for local governments wishing to apply for federal financial assistance for the repair or replacement of damaged public facilities. In the meantime, Winkle urged local officials to maintain careful records of expenditures that may be eligible for federal reimbursement.

The FDAA said this was the 28th presidentially declared major disaster for Texas in the last 25 years, during which time over \$85 million has been expended or obligated from the president's disaster relief fund in

lowers.

Near Texas Highway 16, the river swelled by 10 feet. At the Texas 281 bridge 40 miles north of San Antonio the Guadalupe lapped over the top of the 59-foot-high bridge's roadway.

Authorities warned persons in the paths of the Pedernales and the Guadalupe to be prepared to move to high ground and to remove livestock from the flood plain.

As waters receded, health precautions were urged by state officials.

The Texas Health Department warned those in the flooded area to boil drinking water if contamination was suspected.

They said community and private water supplies which lost pressure may have been contaminated by floodwaters and that such water should be boiled five minutes before it was drunk. They said contaminated water would look murky.

# World Vision mercy mission is barely tolerated

PETER ARNETT

Somewhere in the South China Sea, converted Navy landing ship waits do the job no government wants. A fishing boat arrives crowded with letnamese fleeing their homeland. low the crew aboard the old Navy essel goes to work. A sick child is reated. Food is given.

The tiny fishing boat then sails on, becoming just a speck on the western horizon bound for any place that will let its passengers land. And on the mercy ship they debate whether the little craft and its human cargo will

"Officially, we couldn't tell them what direction to take, or even point them the right way," explains W. Stanley Mooneyham, president of World Vision International, the humanitarian organization that chartered the landing ship to use as a

floating aid center for Vietnamese boat people fleeing across the South China Sea.

"The neighboring countries barely tolerate our activities because they are unhappy about accepting the refugees. There seems to be a conspiracy against the boat people. It is ludicrous that human life is held so cheaply," Mooneyham said in an interview after returning from Southeast Asia.

Since the World Vision ship began its \$50,000-a-month mercy mission in early July, President Carter has ordered American flag carriers to pick up Vietnamese refugees found in distress at sea. Ship owners are being assured that the United States will take the responsibility for their resettlement. No refugees are known to have been picked up yet.

Mooneyham said this was one step toward "changing the inhumanity that since 1975 has encouraged international shipping to pass by Vietnam-ese refugees without helping them, actions unique in the history of Western civilization.'

Much more is needed, he asserted. because we know large numbers of refugees are drowning at sea." Accurate figures on human losses are not available because the boat people set out in secrecy.

But eyewitness reports from surviving boat people suggest that up to 50 percent drown. Some of the 1,800 refugees who arrived in Malaysia one recent week reported that 200 of their number drowned en route.

Since the end of the Vietnam War in 1975 a total of 40,000 boat refugees have landed in Thailand, Malaysia, the Philippines, Indonesia and Australia, most of them in the past 12 months. There are 21,000 waiting in camps for resettlement, and the flow continues unabated.

Mooneyham said that when he broached his idea for a mercy ship in January and February "all five governments in the area, the United States and the United Nations officially discouraged me. One official

said, 'God, don't give them enough gas to get to Australia.' Mooneyham said, "I got the feeling that the more we saved, the bigger the problem for the world. But I knew the boat people were not vicious peo-ple. They just wanted to live in free-

World Vision, a Christian charity that gets its money from donations, located an old World War II Navy landing ship that had been used to haul supplies between Singapore, Saigon and Hong Kong.

The organization leased it and added portable living units to provide a first-aid clinic and living quarters for two Chinese nurses, an Indian doctor, an American captain - Burt Singleton, from Palos Verdes, Calif. - and a crew of nine.

A mechanic and an interpreter rounded out the ship's complement, and it has begun roaming the South China Sea about 100 miles off Vietnam, traveling a course known to be favored by the boat people. "We have family food packs aboard

with 10 days supply, charcoal bra-ziers, and gasoline," Mooneyham said. "When the boats leave Vietnam they are as lightly supplied as possi-

ble because of the risk of detection. "We give the sick first aid, and we provide a compass for ships that need

Officials were concerned about the mercy mission because most Asian points barred vessels arriving with Vietnamese refugees. "We will pick up people if we have to," said Mooneyham, but so far they have gotten by with aid and assistance to the boats

they encountered at sea.

Mooneyham said, "What we need to do is internationalize this problem. I believe America has a unique and specific responsibility to these debris of the war, but so does mankind. To abandon these boat people now is an unconscionable act.'

WASHINGTON (AP) - A congressional study of a Republican plan to cut income taxes by nearly a third over the next three years casts doubts on the plan's premise that it would leave the economy healthy and soon pay for itself with increased tax

The Library of Congress' Congressional Research Service, at the request of an opponent of the plan, analyzed the legislation which was introduced by Rep. Jack F. Kemp, R-N.Y., and Sen William V. Roth Jr., R-Del. Their bill also would reduce

corporate tax rates. The legislation has been endorsed by national Republican leaders and will be pressed as an alternative to a \$16.2 billion tax-cut proposal now on its way to the House floor. President Carter strongly opposes parts of that bill, especially its provisions for

a capital gains tax cut. The study was requested and made public by Rep. Charles A. Vanik, D-Ohio, a member of the House Ways and Means Committee and an opponent of the Roth-Kemp proposal.

Vanik contended the analysis "refutes almost every argument offered by the authors of the bill."

"The Library of Congress study cautiously points out that the favorable aspects of the econometric studies out of the Roth-Kemp tax cut bill would be accompanied by substantially higher inflation, higher interest rates and a larger federal deficit," he

The analysis was especially critical of the parallel drawn by Kemp-Roth supporters to a deep tax cut enacted in 1964 and of their premise that the 1964 reduction ultimately produced a substantial gain in tax collections by stimulating the economy.

The study said that "while there are important similarities between present economic conditions and those which existed in 1964, there are also crucial

One difference, it said, it that in the earlier period inflation was increasing by only 1.24 percent, while the average for the last five years has been 7.7 percent. By June of this year the consumer price index was advancing at a 10 percent annual rate.

Interest rates, the report said, are nearly twice as

The 1964 tax cut was followed by a \$20 billion increase in the gross national product, a prime measure of the economy, and a decline in unemployment to 3.8 percent, the study said, while inflation rose to 2.9 percent in 1966.

high now as in the early 1960s.

"However, the rapid economic growth and generally favorable economic conditions in the mid-1960s cannot all, or perhaps even mostly, be attribut-

ed to the 1964 tax cut," the report continued.

It said the escalation of the Vietnam war and accompanying government spending was a major stimulus to the economy. While tax collections for the six years through 1968 increased a total of \$54 billion, the study continued, only \$32.9 billion came from income and excise taxes, the rest from Social Security and related taxes that were in-

creased four times during the period.

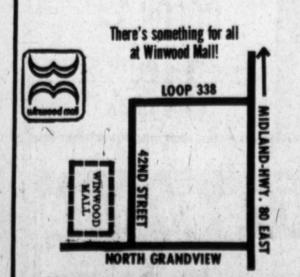

The report criticized the "Laffer Curve," frequently cited by supporters of the bill. It is a graphic representation of a theory about the relation of taxation to economic production and is used by tax cut proponents to argue that taxes are already so high as to stifle incentive.

"There is virtually no evidence to support this assertion," the study said. "The notions of the effects of taxation on incentives embodied in the Laffer Curve are considerably oversimplified and exag-

gerated. The study summarized the results of three studies of Kemp-Roth effects using various computer models of the economy.

# Allergists have advice for those who suffer the stings and bites of wasps, other winged creatures

The Washington Post

Mow your lawn, you enrage the yellow jackets. Weed your garden, you annoy the honey bees. Clean your attic, you upset the wasps.

In fact, it doesn't matter what you do in the summer, sooner or later you're going to become the enemy of a stinging or biting insect.

While there is nothing funny about being stung by a winged creature — it is not for nothing that certain unpleasant persons are referred to as waspish — the reality of a sting does not warrant the fear many of us harbor from our childhoods.

For about 99.2 percent of us, a sting brings nothing more than temporary pain, redness and swelling.

According to Dr. Lawrence M. Lichtenstein, a professor of medicine at Balitmore's Johns Hopkins University Medical School, of all the flying insects, wasps are gifted with the most painful sting. Next on the unpleasantness scale comes honey bees, followed by yellow jackets, he says. When stung by a honey bee, the first thing you have to worry about is removing the stinger, which the bee rudely leaves behind when he stings.

Dr. Martin Valentine, a colleague of Lichtenstein's at Johns Hopkins, says many of the old home remedies are effective in removing the stinger and helping to sooth the sting.

Household ammonia, baking soda or anything slightly alkaline is "slightly helpful," say Valentine. "What you're left with is trying to reduce a local reaction. Try putting ice on it," he recommends.

Also helpful in dealing with the pain and swelling are aspirin and aspirin products, according to Valentine, who, like Lichtenstein, is an aller-

Another thing that is said to help counteract the effects of a sting is an antihistamine. Valentine recommends Chlotrimeton, which he and many physicians claim is the best of the over-the-counter antihistamines.

Those other airborne plagues of summer, the mosquitoes, gnats, black flies and deer flies, want to eat you rather than sting you. They bite in order to suck blood, which does not make an encounter with them any more pleasurable than with a stinging

**WARSERY** 

DIAZINON

very, very few of us who have serious allergies involving the biting insects.

Some people experience a good deal of swelling and tenderness around the area of a bite, and occasionally a physician may need to use a derivative of cortisone, a hormone, for a few days to control the reaction, warns Valentine.

That is a far cry, though, from what the remaining 0.8 percent, or about 1.7 million, experience when stung by a bee, wasp, hornet or yellow jacket.

For that small percentage of the population, such a sting is life threatening. About 50 deaths a year are attributed to such stings, a figure Valentine says is an understatement. Additional sting deaths, he says, are probably wrongly attributed to heart

If you have ever been stung by one of the fearsome four and need to ask if you are one of the unlucky allergic persons among us, you are not.

Those suffering from any of these potentially fatal allegies experience such symptoms following a sting as having their tongues and throats swell or their breathing made difficult or impossible. Sometimes they go into convulsions. They may become comatose. It is not something one

One precaution such persons can take is that of carrying a prepackaged kit usually containing a dose of Adrenalin, an antihistamine and other items to combat the sting.

There is also good news from Drs. Lichtenstein and Valentine, who recently published findings of a sevenyear study indicating that those who are allergic to stings can be almost completely protected from them with a series of injections containing the venom of the insect, or insects, to which they are allergic.

Lichtenstein says he expects the new treatment to be widely available by next summer. It is not cheap (a patient will probably pay \$150 to \$200 for a year's shots) and not a one-time thing (one will have to have the shots on a monthly basis for an indefinite number of years). But the shots will give a sufferer the peace of mind to roam the golf course or garden without constantly worrying about the proximity of a single honey bee.

For the past 50 years persons suffering from hypersensitivity to insect stings have been taking shots of some-

**SHOWY PATIO PLANTS-**

According to Valentine, there are thing known as whole-body extract, a preparation of ground-up insect. Lichtenstein and his fellow researchers found, in clinical trials, that the whole-body extract provided no more protection against stings than totally useless placebos.

# Copter crash

#### Weed bed 'innocent'

DENVER (AP) - A Denver police sergeant says he is taking a bad razzing after the suspected marijuana patch he ordered destroyed apparently turned out to be a rag weed patch.

The patrolman who was sent to pick the weed wasn't too happy either. He ended up going to the hospital with a severe allergic reaction.

HAND OF THE PLANT PARTY OF THE PERSON IN

DEAR DR. SOLOMON: My daughter is on a big bread-baking binge. And I thought I would just ask you what kind of flour might be the most nourishing. I like to see her get good nourishment in any way she can-

DEAR PATRICIA: Wheat is certainly one good source of protein-but there is a problem. It is short of lysine, an essential amino acid without which protein cannot be considered complete.

It is important to have a balance of these essential amino acids in at least some of the protein you get in your diet. So the thing to do is add something to the wheat flour to make it complete dietary protein. One excellent way is to combine soy flour with wheat flour. However, soy flour does have a distinctive taste, which some people don't care for in their

Another method is pea flour. You may have a bit of trouble finding it at the moment, but researchers at the U.S. Department of Agriculture say they expect it to become much more widely available before long. They have found that, by substituting pea flour for 15 percent of the wheat flour in a loaf of bread, the protein value of the loaf rises 15 percent. And pea flour doesn't affect the taste, the cost or the baking quality. In case the idea of eating green bread is too much-even for your young vegetarian daughter—assure her that the color

n Junior

es in the

nd Satur-

gets bleached out in the oven. Another thing I'm sure your daughter and her vegetarian friends will probably be happy about: The USDA says that using pea flour in bread will benefit not only consumers but wheat farmers in the Pacific Northwest, where 90 percent of all peas are produced in this country. Here's why. There are severe erosion problems in the wheat fields of the Northwest. And rotating crops and growing wheat on pea stubble turns out to be a fine way to control erosion.

DEAR DR. SOLOMON: How do you feel about fruit juices you buy in nursing bottles, ready to use? Are they okay?-Franny.

DEAR FRANNY: They do save trouble, but they may also spell trouble. The American Academy of Pediatrics (AAP) says that juice in ready-to-use bottles can lead to a severe form of dental decay called 'nursing bottle caries." The same goes for using bottles of milk as pacifiers-especially at nap or bed-

The AAP is all for teaching infants to drink from a cup as they near their first birthday. This is especially important if they are given juice, as the natural sweetness makes it a favorite

## Rep. Craddick expresses disappointment in bill

AUSTIN - State Rep. Tom Craddick of Midland said Thursday he is disappointed the Texas House removed several provisions from a proposed constitu-

tional amendment on tax reform. Craddick told The Reporter-Telegram today he voted for the amendment. But, he said he voted against substituting the version ultimately passed Wednesday for an earlier one which contained provisions placing stiff requirements on passing future income tax bills. Craddick also said he favored provisions, included in the earlier version but not in the final one, which would have established

initiative and referendum procedures.

The Midland legislator said he is opposed to a provision in the version that passed which would establish a single property valuation agency in each county, with assessments to be based on state

the House version, and the amendment will be sent to

9:00-6:00 Mon. thru Sat.

Many parents also

By JANE SEE WHITE

NEW YORK (AP) - One morning, a Pennsylvania woman who divorced her husband because he beat her weekly was punched in the mouth by their 17-year-old son. "Aren't you happy now?" he asked. You've still got me to hit you.'

An 81-year-old Chicago man was chained to a radiator by his 19-year-old daughter. She stole \$2,300 from him before she set him free seven days later. He told police from his hospital bed that he would not press charges.

In New York, a 19-year-old youth was arrested for thrashing his mother and stealing her money repeatedly. He tossed off a final plea as police led him away. "Aw, come on Ma. I only hit you a couple

The social workers and scholars who move about the veiled corridors of family strife say no one is sure how many parents are battered by their offspring. But they say that this most private of miseries - the son who slugs his mother, the daughter who shoves her down the stairs - is more common than most would suspect.

Through the burgeoning number of shelters for battered women, bits of information have surfaced about offspring injuring their mothers. Next to nothing, however, is known about those who attack

"It's the last family problem to be explored," said Richard Gelles, a University of Rhode Island sociologist.

"It is a hidden problem, but it's something all of us found as we started to share information," said Sue Bienemann, director of a new coalition of 18 Pennsylvania projects for battered

"It's a strange thing, because oftentimes the mothers are reluctant to disclose that their children beat them. They want to protect them. They don't want to get them into trouble," she added.

After interviewing more than 2,100 families, Gelles and Murray Strauss, a University of New Hampshire sociologist, concluded that as many as one in 10 parents - both men and women - have been kicked, slugged, punched and otherwise battered by their offspring.

"The number may be higher, because not everyone will talk about it," Strauss said.

The researchers believe one in five parents may have suffered lesser abuse at the hands of their children, an expression, perhaps, of the adolescent turmoil that can bubble over: objects lobbed at their heads, shoving, pushing, furious verbal abuse. But at its most explosive, Gelles says, there is

"stark evidence" that such physical abuse is learned at the knee of an assaultive parent.

"Of the 5 or 6 million kids who assault their parents, most are probably kids who've been as-

saulted by their parents," he said.

Gelles and Strauss think the violence goes beyond self-defense or revenge. To strike out - to win by decking a parent — is the way these young people learned to handle family disagreements. a blacksmithing project

By CECIL SCAGLIONE Copley News Service

When Icarus fell into the sea, it was an indication that his research and development department was When the Wright Brothers lifted their heavier-

than-air machine off the ground, their research and development paid off. The prod toward corporate research and development has been described by one official as

'man's dissatisfaction with his current situation."

This dissatisfaction is pushing U.S. companies to spend almost \$35 billion this year on research and development in their greed-driven and curiositygenerated search for new and better products and improved manufacturing methods. The money set aside this year for research and development is 12 percent more than last year, according to the 23rd annual survey of such spending

by the economics department of McGraw-Hill Publications Co. There was a lull in research and development spending during the early part of this decade caused

by a sagging economy.

This spending has been accelerated during the last couple of years and the McGraw-Hill survey indicates business and industry in America will increase annual research and development spending to \$44.6 billion by 1981.

The Bell System probably spends as much on research and development as any other U.S. company. Dean Gillette, systems research division executive director of Bell Laboratories in New Jersey, said his company has earmarked \$900 million for research and development this year, compared with the \$785 million spent last year.

Of the total spending this year, \$685 million will be used by the Bell System for "long hair" research and new product development. This figure comprises less than 0.7 percent of total revenues for the "pure" research and 6 percent of revenues for Western Electric's product development program.

Gillette said the Bell System has been committed to research and development for more than half a century. "Call it a social contract with the nation to provide a highly reliable telephone system at a cost everyone can afford.

"If there were no research and development, telephone service would cost more. For example, 1.41 research and development led us to the microwave towers that were introduced about 25 years ago for telephone communications across the country.

"At that time, each tower could handle about 2,500 As a result of research and development, each tower can handle 10 times that number now. If we had to use old techniques, we would have to build more towers to meet increasing demands and charge more for the service. The research and development payoff is improved service at lower costs," Gillette

A recent survey of 325 members of the American Electronics Association across the country revealed they spent \$2.23 billion on research and development in 1976, the year their sales totaled \$45 billion.

Homer Meadows, national public affairs director for the association, said the electronics industry is 'near the top" in the percentage of sales revenue spent on research and development.

"The electronics industry is probably second only to the drug industry," he said. He said electronics companies are learning research and development is necessary to maintain a competitive edge despite a growing trend by government agencies to withdraw

"The government is beginning to feel it can get a little dicey to have a research and development project with a compnay that may be taken over by a foreign company," Meadows said.

"Last year, there were 25 U.S. electronics companies at least partially taken over by foreign

He said the U.S. television set industry is a good example of what can happen when insufficient attention is devoted to research and development.

"It was spending less than 1 percent of its sales on research and development and that's why Japanese TV sets ate up so much of the market."

A survey of 38 U.S. drug companies by the Pharmaceutical Manufacturers Association showed that research and development spending by the firms totaled \$130 million last year, an 11 percent increase over what was spent the previous year.

# 170-page gas price bill may again be in trouble

By RICHARD L. LYONS and HELEN DEWAR **The Washington Post** 

WASHINGTON — The natural gas pricing bill which seemed close to final congressional approval after several near brushes with death appears to be in big trouble again.

The fragile agreement worked out by a closely divided House-Senate energy conference to remove federal price controls from newly discovered gas by 1985 threatens to come unstuck because the agreement in principle appears different to some members now that it has been reduced to 170 pages of specific legislative lan-

The Senate has been forced to delay consideration of the conference agreement until next week at least because the necessary majority of House and Senate conferees have so far refused to sign it.

Sen. James McClure, R-Ida., thinks it wouldn't raise prices fast enough during the next 7 years. Rep. Henry S. Reuss, D-Wis, fears it would give producers more than he intended. Members from producing states contend it would discriminate against intrastate gas. They also fear that a recent Supreme Court decision may

dry up the intrastate market and should be overturned by adding language to the gas bill.

The issue of price controls versus deregulation involves billions of dollars and has eluded congressional solution for 24 years. But Sen. Henry M. Jackson, D-Wash, who has led the year-long effort to find agreement, insists the issue can be resolved this

> **ENERGY** OIL & GAS

It is a major part of President Carter's energy bill, though he requested continued regulation at higher levels. To the extent that higher prices produce more gas it would reduce reliance on foreign oil, which is the main purpose of Carter's stalled energy package.

One of McClure's major objections to the finished version of the bill is that it appears the annual price increases permitted up to 1985 would fail to raise prices to a free market level at the moment of deregulation. He had insisted on this.

Members from Louisiana and other producing states are concerned about a Supreme Court decision of two months ago which some construe as perhaps drying up the supply of gas for consumption within the state where produced. The court ruled that once gas from a tract is dedicated to the interstate market, gas from that land can never be sold for intrastate consumption. A staff member said Sen. Russell B. Long, D-La., wants congress to override this decision in the gas bill. But that would mean reopening the bill, and no hearings have been held to form a basis for

An attempt by Jackson to meet with Senate conferees Thursday to try to get their signatures on the agreement was postponed until next week because several conferees were out of

Meanwhile, a coalition of labor and citizen action groups that claims to represent about 20 million people announced what it called an "all-out" lobbying effort to scuttle the natural

International Association of Machinsts President William W. Winpisinger, chairman of a recently organized Citizen-Labor Energy Coalition, called pricing compromise an "insidious private tax that takes money from the pockets of the people and puts it into the over-bulging coffers of the oil and gas industry." It is, he said, "the worst scandal on the American energy scene since the Teapot Dome scandal of the 1920s."

## Re-entry scheduled

Estoril Producing Corp. of Midland No. 1-B Medlin is a re-entry project in the three-well V&S (San Andres) pool of Gaines County, 20 miles east of

The project, originally drilled to 5,050 feet by Youngblood & Youngblood, is 1,980 feet from north and west lines of section 44, block H, D&W survey. It was plugged in 1957.

Location is 1/2 mile northwest ofd The field was opened by Estoril No. 1 Medlin in April when it wss com-

pleted for a 24-hour pumping potential

of 15 barrels of 36-gravity oil and 15 barrels of water. Completion was through perforations from 4,932 to 4,967 feet. The gas-oil ratio was too small to mea-

# Californians curiously apathetic about the 'big one'

EDITOR'S NOTE: Beneath California, the 600-mile long San Andreas fault lies poised to deliver a minute or two of catastrophic shaking. But most Californians don't think about that, including AP reporter Bill Gardner, who here offers some thoughts on the curious apathy of those who live atop a sleeping giant. By BILL GARDNER

LOS ANGELES (AP) - I sometimes wonder if maybe these scientists warning of the "Big Quake" aren't in cahoots with my mom.

SOME-

LUMBO AND

KOUAK ?!

ETWEEN

D ABOUT

FLOWERS

She's always telling me I ought to come home and get the heck out of California before it's too late. It's only a matter of time, she says, before an earthquake knocks my house off its hillside perch.

Now comes this news story: "Scientists at the Goddard Space Flight Center in Greenbelt, Md., say new calculations suggest that the next major earthquake on the San Andreas fault may be larger and might occur sooner than expected.

It's true, of course, that there aren't many earthquakes or hillside perches where I grew up in central Illinois. It might be nice and safe to go back, but I'm going to stay right here and take

my chances with the big one.
I've hardly seen a bolt of lightning in the six years I've been here. No tornadoes, no snow, no icy roads, not many muggy days. And if I have to risk an earthquake for all this, well,

Mrs. Robley Evans, who came here with her husband from Wisconsin in 1959, feels the same way. They lived in the San Fernando Valley when the San Fernando quake struck in February 1971 and killed 58 people.

It was scary but they never thought

of moving away. "We're settled and that's the way it is," Mrs. Evans said. "In the Midwest there's tornadoes and blizzards and wherever you are there's something.'

Thomas Nemes, a woman's clothing manufacturer, also lived in the San Fernando Valley in 1971. A few days after the quake, Nemes said he was "definitely considering leaving Los Angeles."

Seven years later, Nemes is still here. "I like it here. I really do," he says now. "I think I'll stay put. Before moving here, I lived in New York for five years and couldn't stand it."

One measure of the concern people here have about earthquakes is that less than 5 percent of the homeowners had earthquake insurance at the time of the 1971 quake. It's about the same

The San Fernando quake was a big quake but not the Big Quake. It measured 6.6 on the Richter Scale, but scientists say a quake of more than 8.0 is due in Southern California.

They figure an 8.0 quake — which scientists consider a "great" quake — should occur on each segment of the San Andreas Fault every 100 years. Northern California last had a big quake in 1906, so one isn't due there yet. But Southern California last had

Earthquakes don't necessarily kill people directly. All but nine of the 58

victims of the San Fernando quake died in the collapse of one hospital. Three others died in the collapse of another hospital.

And there are plenty of old buildings around that were put up before modern construction codes required extra strengthening for earthquake protection. The City of Los Angeles is taking an inventory of those buildings. It's found 5,800 so far and expects to find 3,000 more.

A great many of these buildings are residential hotels and apartment buildings. Mostly old people live there. If anybody should be worried about earthquakes, they should.

Jim Davis lives in one of those old buildings. It's a four-story job, made of red brick and by the front door is a barely readable iron sign that says "Blasdel Arms."

But it's not the Blasdel Arms and hasn't been for some time. Painted on the building's side is another sign. Much of the paint has chipped off, but the words "Bel-Rio Hotel Apartments" can be made out.

Davis lives on the second floor. His door is open and he sits - no shirt on - by himself on his old couch, sipping something. He's 46 and says he came here 15 years ago from Oklahoma for a piece of California prosperity. He's quick to say he has a job, in the back shop at a drycleaner. Pays \$105 rent.

Earthquakes don't worry him. "If. it's going to happen, it's going to happen. If the quake is strong enough, it can knock down any building."

Geoffrey Goddard's wife died of

by himself in a fifth-floor apartment of another old building. After years of "termite work," he's retired at 62 but

There have been several fires in his building but he feels safe. "I'm right next to the fire escape," he says. "I can get out of here in nothing flat." Earthquakes?

"I don't know what's to worry about," he says. "It might happen 16 seconds from now or 16 years. You aren't going to do anything about it

Goddard is from New York and would like to return east for a visit.

#### Bush says he may run regardless

LINCOLN, Neb. (AP) — Former CIA Director George Bush said Thursday he is inclined toward a 1980 Republican presidential bid whether former President Gerald Ford or Ronald Reagan are candidates or

"I'm inclining that way...and I think I'm doing the things I should be doing in order to become a candidate," he told a Lincoln news conference. "I'm giving it consideration every waking moment.'

Bush, who appeared at a \$100 a ticket fundraiser for GOP gubernatorial candidate Charles Thone, said he expects to enter the presidential field early next year.

"If I had a car, I'd take a trip back to New York. But I know it's just like I left it, same old 8 million people." Over at the Bel-Rio, Davis, too, thinks about his old home sometimes. "If I died, I'd rather be in Oklahoma.

I ain't put down no roots here even though I been out here 15 years." The community of Palmdale, popu-

lation 12,600, sits atop a desert pla-

teau about 60 miles north of Los

Angeles. It also sits atop the San Andreas fault — right on top of it. But like their neighbors down in the city, Palmdale people aren't much wor-"I don't think anyone really worries

about it," said Patricia Hunt, a city hall secretary. "Everytime there's a new prediction in the paper, you think about it for a while and just forget

# Minor quakes shock Mt. Shasta area

MENLO PARK, Calif. (AP) - Seismologists said they were not sure if a rash of minor earth- after 2 a.m. Tuesday and potential volcanic eruption, but they continued studying while aftershocks from the quakes following hour. continued into their second day

Although Mount Shasta has not erupted for 200 years, it is still classified as an active volcano by the Interntional Volcanological Association.

quake hits

SANTIAGO, Chile (AP) - A strong earth-

quake shook northern Chile Thursday, causing

considerable damage in the city of Copiapo, the University of Chile's

Seismology Institute

Amateur radio opera-tors who contacted Copiapo said no deaths or injuries had yet been reported. The radio reports

said electricity and normal communications

channels were cut-by the quake, which toppled walls in the city, a min-

ing center 400 miles north of here of about

The seismology center

said the tremor struck Thursday afternoon and was felt in a large part of

the nation. A spokesman said the quake was cen-tered in the Pacific

Ocean on a westerly line from Copiapo, which is about 30 miles inland

The U.S. Geological Survey in Washington said the quake was measured at a magnitude of 6.7 on the Richter scale

and occurred at 2:11

A quake of magnitude

of 6 can cause severe damage and a 7 is consid-

ered a major quake. By comparison the San Francisco quake of 1906

has been estimated at

The Richter scale is a gauge of the energy re-

leased by an earthquake, as measured by the

ground motion recorded on a seismograph.

Every increase of one number, say from magnitude 5.5 to magnitude 6.5, means that the ground motion is 10

#### Daphne Marcum

ODESSA — Services for Daphne Mae Marcum, 69, of Odessa and formerly of Midland were to be at 2 p.m. today in Hubbard-Kelly Funeral Home. Burial was to be in Fairview Cemetery in Midland.

She died Thursday in an Odessa hospital.

She was born Nov. 21, 1908, in Roscoe. She moved to Odessa from Midland in 1968. She was a member of Parkview Church of Christ.

Survivors include a brother, D.A. Howe of Brady, and a sister, Faye Hawthorn of Odessa.

#### Mrs. McAdams

Services for Mary Bell McAdams of 206 S. Tyler St. will be at 2 p.m. Saturday in Calvary Baptist Church. Burial will be in Fairview Cemetery directed by Thomas Funeral Home.

Mrs. McAdams died Tuesday in a Midland hospital after a lengthy ill-

Mrs. McAdams was born on Oct. 26, 1901, in Longview. She had lived in Midland 37 years.

Survivors include three sons, Willie Price and James Price Jr., both of Midland, and Laurice Price of Paloma, Calif.; four daughters, Imogene Price of Midland, Lorene Griham of Madison, Ark., Doris Williams of Dallas and Wanda Pope of Los Angeles, Calif.; two sisters, Bessie Mae Royal of Riverside, Calif. and Lorene Wilson of Denver, Colo.; a brother, Robert Mosely of Midland, 17 grandchildren and 13 great-grandchildren.

#### Robert Pinkston

COLORADO CITY - Services for Robert L. Pinkston, 74, of Colorado City, brother of John Pinkston of Stanton, were to be at 2 p.m. today in Kiker-Seale Funeral Home with buri-

al in Colorado City Cemetery.

Pinkston died Tuesday in a Fort
Worth hospital following an illness.

He was born Aug. 30, 1903, in Eastland County and moved to Colorado City 18 years ago. He was married to Billie Hopper on March 30, 1956, in Reno, Nevada. Pinkston was a retired plumber and pipe fitter. He was a member of the First Baptist Church. He was an Army veteran.

Other survivors include his wife, two daughters, a stepdaughter, a brother, seven grandchildren and four great-grandchildren.

#### William Hathcock

ANDREWS — Services for William James Hathcock, 37, of Andrews were to be at 2 p.m. today in First Baptist Church with burial in Andrews Cemetery directed by Singleton Funeral

Hathcock died Tuesday in a San Antonio hospital from burn injuries received in an oilfield accident June

He was born May 4, 1941, in Van Zandt County and moved to Andrews from Lubbock in 1943. He attended Andrews public schools. Hathcock became a self-employed contractor in the oil fields five years ago. He also worked for Superior Welding Works. Survivors include his wife, Geor-

gia; a son, Brian Hathcock of Gridley, Calif.; his parents, Mr. and Mrs. W.G. "Dub" Hathcock of Andrews; a sister, Nelda Bills of College Station; a brother, Max Hathcock of Andrews, and his grandparents, Lillie Hathcock of Mabank and Jim Hedden of Can-

#### W.H. Luttrell

HOBBS, N.M. - Services for W.H "Bill" Luttrell, 63, of Hobbs, N.M., will be at 10:30 a.m. Saturday in Reynolds Funeral Home in Glenrose. Burial will be in Ward Branch Ceme-

Luttrell died Wednesday in a Hobbs hospital following a short illness.

Luttrell was born March 27, 1915. He lived in the Seminole area for several years. He was a member of the Church of Christ. He was a member of the Veterans of Foreign Wars.

Survivors include five brothers, Ray Luttrell of Vista, Calif., Bob Luttrell of Mineral Wells, Homer Luttrell of Lake Coleman, Jess Luttrell of Prineville, Ore., and Buford Luttrell of Morgan Mills.

#### Loleda Marino

BIG SPRING - Services for Loleda Marino, 56, of Big Spring will be at 2 p.m. Saturday in St. Paul Lutheran Church here with the Rev. Carroll C. Kohl, pastor, officiating. Burial will be in Trinity Memorial Park directed by River-Welch Funeral Home.

Mrs. Marino died Thursday at her

She was born Aug. 28, 1921, in Howard County. She was married to John Marino April 22, 1944, in Big Spring. She had lived in Big Spring all her life. She was a member of St. Paul Lutheran Church and the parish workers of that church. She was a member of the Heart Club of Lubbock.

Survivors include her husband; two sons, Bill Marino and Mike Marino, both of Big Spring; two daughters, Mrs. David (Helen) Laning of Covina, Calif., and Mrs. Duane (Sharon) Kiser of Denver; two brothers, George Heckler of Big Spring and Gus Heckler of Luther, and three grand-

#### Beulah Munnerlyn

SEMINOLE — Services for Beulah M. Munnerlyn, 76, of Seminole, sister of Elizabeth McKee of Midland, will be at 2 p.m. Saturday in First United Methodist Church here. The Rev. Weldon Rives, pastor, will officiate.

Burial will be in Seminole Cemetery directed by Singleton Funeral Home. Mrs. Munnerlyn died of natural causes Wednesday in her home.

She was born in Comanche County and came to Seminole from Vernon 45 years ago. She had been a member of the draft board during World War II. She was also a past president of the Eastern Star.

Mrs. Munnerlyn was the former owner of a dress shop here. She was a member of the First United Methodist Church. She was a member of the Seminole Study Club and a charter member of the Seminole Hobby

Other survivors include a son, a brother, five grandchildren and six great-grandchildren.

#### S. Rubalcado

Services for Santiago Rubalcado, 84, of Odessa and formerly of Lamesa were Thursday in St. Joseph Catholic Church. Burial was in Odessa Cemetery directed by Hubbard-Kelly Funeral Home.

Rubalcado died Tuesday in an Odessa hospital after a lengthy ill-

He was born Sept. 21, 1893, in Texas and moved to Odessa in 1950 from Lamesa. He married Juliana Acevano on Nov. 25, 1911, in Yorktown. He was a retired laborer.

Survivors include four daughters, Julia R. Portillo, Adada R. Jacobo and Susie R. Elizondo, all of Odessa, and Mary R. Marcelino of Lubbock; six sons, Robert Rios and Jim Rubalcado, both of Lubbock, Jose Rubalcado of McAllen and Adam Rubalcado, Mike Rubalcado and Jacinto R. Olivarez, all of Odessa, 32 grandchildren and 29 great-grandchildren.

#### Wert K. Dean

WINFIELD, La. — Services for Wert K. Dean, 61, of Odessa, father of Ronald Dean of Midland, were Monday in Southern Funeral Home here. Burial was in Garden of Memories

Dean died July 28 in an oilfield accident near Sayre, Okla.

He was born Oct. 17, 1916, in Winn Parish, La. Dean was a welder supervisor. He was a member of the Masonic Lodge in Levelland. He was a member of Kingston Baptist Church in Odessa. He was a former resident of Winfield.

Other survivors include his wife, a son, a brother and four grandchil-

## Religious community appeals court order to release youth

WOODLAND PARK, Colo. (AP) -A religious community here will appeal a Texas court order demanding a 16-year-old member be sent back to his family in Houston, a spokesman

announced. "We're not going to force him to leave if he wants to be here," said John Farra, a spokesman for the 53-member Community of Celebra-

Mr. and Mrs. Robert Mazak claimed their son, Michael, has been brainwashed by the community, and a Harris County Family Court judge on Tuesday ordered the group to send the teen-ager back to Texas.

Established three years ago by the Episcopal Diocese of Colorado, the community of families engages in missionary work in the Colorado Springs area but lives by no particu-

larly rigorous discipline, Farra said. The Mazaks - who reportedly spend 11 months on the 85-acre, fivehome compound in 1976 and 1977 have said the community's discipline was excessively harsh.

"I can't imagine the Episcopal church in this state or anywhere else sanctioning brainwashing," Farra said. "Any excessive discipline the Mazaks had, they imposed on them-

# Continental begins service

Continental Airlines will begin service Oct. 1 on its newly-awarded Phoenix/Las Vegas route, with oneplane service from Midland Regional Airport to Las Vegas, C.R. Logue, the airlines' regional director, announced

The new route award will enable Continental to provide vastly improved service between these cities, Logue said, since it "fits in perfectly with our existing patterns of service."

Passengers also will have the option of Continental's several discounted fare packages, which represent from 30 percent to 50 percent discounts from the regular coach fare. Logue

Continental will use Boeing 727 3engine aircraft with the wide-bodied interior look over the new route.

Logue said the combined efforts of city officials, chambers of commerce and interested residents of Midland and Odessa helped substantiate the need for improved service from West Texas. He said Continental is pleased to have been selected by the Civil Aeronautics Board to provide this particular service.

# Senate committee agrees to land acquisition

WASHINGTON (AP) — The Senate Appropriations Committee has agreed to provide an additional \$6.38 million for final acquision of lands in the Big Thicket National Preserve in eastern Texas.

The panel acted Thursday in response to the urging of Sen. Lloyd Bentsen, D-Texas, who said the additional funding was needed because timber costs had zoomed upward since Congress agreed in 1974 to buy the additional lands.

In a letter to Sen. Warren G. Magnuson, D-Wash., chairman of the Appropriations Committee, Bentsen said timber prices had "more than doubled" since 1974.

"Rising costs ... have driven the price of land to be included in the Big Thicket Preserve beyond the amount authorized and appropriated," Bent-A Senate subcommittee had failed

on Wednesday, the full panel unanimously voted to add the \$6.38 mil-

The money, if approved in the

to act in May on Bentsen's request but

House, will bring the Big Thicket land acquisition total to more than \$71 million. All but 6,000 to 10,000 acres remains to be acquired for the East Texas preserve.

Earlier this year, the funds had failed to clear a House subcommittee after Rep. Charles Wilson, D-Texas, dropped his support of the measure.

Texas environmentalists who wanted to condemn more East Texas timber lands for state parks. Almost all of the Big Thicket's 84,550 acres are in Wil-

son's district.
Wilson aide Charles Simpson said
Thursday that Wilson will support the
additional funding now. When the

matter came before the House, "we felt that the state should not condemn timberlands for parks. It should wait until someone offers the land," said

Simpson. "We feel all that has been straightened out now and we support the (\$6.38 million) measure 100 per-

# Permian Basin health hearings slated

Residents of the 1.

Basin region will have an opportunity bealth problems in Residents of the 17-county Permian to speak out on health problems in their communities when the Permian Basin Health Systems Agency spun-sors three hearings in the Permian Basin.

Midland residents can voice their opinions starting at 10 a.m. Monday in the Midland County Courthouse Commissioners Courtroom on the second floor. Odessa residents will have their chance at 2 p.m. Monday in the Ector County Courthouse, County Courtroom 214. Big Spring and area residents will have a hearing at 10 a.m. Tuesday in the Howard County Court-

house, County Courtroom on the sec-

The agency is holding the hearings in an effort to identify health problems that need special emphasis and

need to be incorporated into the five-year Health Systems Plan.

The plan development process is an on-going function of the PBHSA but is more apparent from August through October when the 10 Planning Task Furces meet to evaluate and revise

the existing Health Systems Plan.

Areas of health concern, which already are included in the Health Systems Plan are maternal, perinatal, child and adolescent, emergency

medical services, heart, cancer, communicable disease, drug abuse, mental health, alcoholism, mental retardation, end-stage renal disease, dental health, rehabilitation, and en-

Copies of the current Health Systems Plan are available in the Midland County Library and the Permian **Basin Regional Planning Commission** for reference.

# China now encouraging TV private ownership

By JAY MATHEWS The Washington Post

POSHAN, China - Pien Hsi-fang at first glance seems an unlikely object of envy in her small pottery factory. She is 40, has four children, a monthly wage of \$31 and a monotonous job filling clay molds.

Unlike more than 99 percent of the Chinese population, however, she also has a television set.

In a nation where 900 million people have no more sets than the 1 million or so in the Washington metropolitan area, private ownership of a television has become a sign of prestige for a worker like Pien. Now, in what appears to be a consumer revolution in China, people here are beginning to pursue such status symbols with almost capitalist fervor.

China's official news agency revealed this week that sales of all consumer goods are up 11 percent in the first five months of this year. Through June, sales of television sets

The administration of Communist Party Chairman Hua Kuo-feng has apparently decided that providing more of the nation's most soughtafter luxury item can both win popular goodwill and provide an enormously powerful medium for official propaganda. So, the government has just contracted with two Japanese firms to buy a \$150 million factory capable of producing a million televi-

A medium-sized black-and-white set (there may be only 10,000 color sets so far in the whole country) can cost fom \$200 to \$500, at least a year's wages for many workers. A young Chinese official was skeptical when he heard Pien mention her set. His own parents were still waiting for the prices to go down. A co-worker asvoice, "Oh, no, she really does have a

In this luxury-starved nation, a worker like Pien, with a working hus-

omy and expanding production is to provide for the step-by-step improvement of the people's material well-

"After a decade in which the private purchase of expensive goods like televisions was often officially criticized, the new post-Mao government is going to great lengths to assure Chinese that now they may buy more and will have more to buy."

band and practically no rent to pay on her factory quarters, can save a great deal of money simply because there is little to spend it on. Cars, refrigerators, stoves and countless other modern devices Ameicans depend on are simply not for sale to individuals

After many factory workers received raises of about 10 percent, personal savings in urban areas like this one, 12 miles southwest of Canton, jumped 20 percent in the first half of this year, according to official Chinese figures. There was little else to do with the money but deposit it, since "even if you had money in China, there's been almost nothing to buy,' said Grace Yuan, a Boston-area resident who recentlly visited relatives in

After a decade in which the private purhase of expensive consumer goods like televisions was often officially criticized, the new post-Mao government is going to great lengths to assure Chinese that now they may buy more and will have more to buy. Hua summed it up at a recent Peking conference: "Our fundamental pur-

Workers like to cite this and other signs of the government's new sensitivity to the needs of the individual

home and pocketbook. "Under Chairman Hua," said Shun Yin-chiang, the production director of Piens' pottery factory, "the rent on been cut from \$2 to \$1 a month."

Such well-publicized efforts on the part of the government could create a crisis of rising expectations. Hua has also called for the construction of 10 more oilfields the size of the massive northeast complex at Taching and for a nearly threefold increase in Chinese steel production by 1985.

The push for heavy industry is certain to make the production of light industrial consumer goods more diffi-cult. Peking leaders appear to be trying to restrict consumer appetites to the few items that are already on every family's shopping list — wristwatches, radios, electric fans, bicycles, television sets and sewing machines — and forego any effort to stimulate Chinese tastes for the more exotic varieties of Western consumption, like blenders.

Most Chinese will quickly tell visitors what they have their eyes on at the local department store.

"I know just the transistor radio I to increase the production of candy want," said tourist guide Hsiao Wei- and other treats. As one official Chikuo. "It's \$60 at the store, so I have to

keep saving. I don't know where my money goes. My mother keeps asking me if I have a girlfriend."

The Chinese leadership has tried to ease the life of its population in small ways, through measures such as large purchases of Philippine sugar,

nese news item bragged early in July: "China's largest city, Shanghai, is providing 25 percent more popsicles and ice cream, 11 percent more car-bonated drinks and 35 percent more beer this summer than in 1977."

More toys also produce more cheap

# Tomato hornworm

By TOM STEVENSON

Q: A big, green worm is feeding on the leaves of my tomato plant. What should I use to spray to get

long with a horn on its rear end, can strip many of the feeds on the foliage of tobacco, eggplant, pepper,

potato and several kinds of weeds. The best control is to pick it off by hand. It cannot sting or bite, the only damage is to the plant, which loses foliage that produces food by the process of photosynthesis. If picking it off by hand is too big a iob, spraying with Sevin is usually effective. Direct-

Q: My neighbor picks his tomatoes when they turn pink and takes them indoors to ripen. He says he gets better results that way. Do you recommend it?

A: To get the best flavor and color, tomatoes should be harvested after they are fully vine-ripened. That is one of the main reasons for growing them, to get that special flavor that you cannot find

appropriate them in the dark of the night, that is a different matter.

I can do to stop it? A: Usually it is due to too much moisture and poor

offensive odors occur. With good aeration, the disagreeable smell will soon be gone. Turning the pile with a pitchfork also will help by improving aera-

Q: I've had Oriental poppies for seven years, and the clumps are getting right large. Should they be

A: Clumps of Oriental poppies that have gotten too large can be dug, divided and replanted. The best time to do it is after the foliage dies down in mid-to-late August, when the plants go dormant for a month or so. Growth starts up again in the fall. It is best to replant them in a new location where the

# Book child raised without sex

By DAVID BEHRENS Newsday

It knew, of course. It couldn't help knowing. Its parents also knew and so did a few scientists. But nobody else was allowed to find out what gender it was - not even its grandmothers or grandfathers or uncles or aunts or the neighbors next door.

Its name was Baby X, the brainchild of Lois Gould, who is also the mother of two real-life teenagers and the author of four novels for adults.

Baby X, Gould's first here heroine, will make its literary debut today in a book called "X: a fabulous child's story," (Daughers Publishing Co., \$7.50). It's a simple fable about a young couple named Jones and their decision to raise their first child as an X instead of a son or daughter. It's about ordinary folks and how exercised they get when they're confronted with this little X.

The story of Baby X, illustrated by Jacqueline Chwast, is based on a shorter version which appeared in Ms. Magazine in 1972. Now in hard cover, it has already won advance praise from readers such as child psychologist Lee Salk, who has appreciatively observed: "Lois Gould shows us . . . how extensively our responses to children are determined by their gender."

For Baby X, there were problems right from the start. When it was brought home from the hospital, everyone's first question was: What kind of a baby is it? "When the Joneses smiled and said, 'It's an X,' nobody knew what to say." Nobody knew whether to praise the "cute little dimples" or compliment "the husky little biceps." No one knew whether to give it a tiny football helmet on a pink-flowered romper suit No one was sure if Baby X should be cuddled and kissed or bounced high in the air. And everyone was very embarrassed.

In fact, most of the adult characters remain embarrassed until the very end when the upbringing of Baby X appears to be a success

But the story of X is not a how-to book. "It would be very cruel to try to raise a child this way in the world we live in. You can't bring up a child in a vacuum. Any child would be hurt if you really tried it," Gould conceded. The story of Baby X is a fable, after all, and a bit of wishful thinking, she

There is, she also concedes, "a core of resistance about the question of gender identity." Many people, Gould said, are uncomfortable about the idea of questioning the traditional way of thrusting gender identity on the consciousness of children.

"Questioning the rightness of it makes some people feel anxious,"

was written by a group of Official Scientists who oversee the Baby X project and are determined to provide a most ecumenical childhood for their subject.

They advised, for example, that Baby X be bounced and cuddled. They suggested that Baby X play with both 'Boys' Fire Engines" and "Girls' Housekeeping Sets" and brother-andsister dolls you coudn't tell apart. They urged that Baby X never be told that "nice little Xes don't get dirty climbing rocks," or that "brave little Xes don't cry" when they hurt them-

"It would be very cruel to try to raise a child this way in the world we live in. You can't bring up a child in a vacuum. Any child would be hurt if you really tried it."

> Lois Gould Author

even in fable form, Gould speculated. But she is quick to point out that her Baby X does not deny it's own sexuality. "It knows." The mystery of Baby X provides Gould with a way of exploring the distinctions that surround gender identity that she feels are artificial.

Some people do worry that de-emphasizing gender identity will "encourage" bisexuality or homosexuality. Ms. Gould does not think so.

"That's the root fear, the specter of rampant homosexuality," she said. But Gould does not believe that the growth of natural sexual drives is connected with the emphasis on gender roles. "There is a lot of fear and hostility in a lot of homosexual behavior. If we develop healthy sexuality, I don't think we're going to have more homosexuality, just more friendship."

Right now, she added, "we program boys and girls to be strangers. Then later we tell them they ought to be attracted to each other because of bosoms or biceps, the external differences, not because of feelings of closeness or caring.'

Baby X is raised to believe in good feelings and itself, thanks to the Official Baby X Instruction Manual. The guidebook, used by Baby X's parents. selves.

Of course, people did get tired of Baby X saying ingenuous things like, "I'm a little X." One irate parent suggested that "little brat" was a more apt description. But the real test came when X reached school age. School, the Joneses discovered, was a land of gender apartheid.

Boys lined up with boys; girls lined up with girls. Boys went to the boys' room; girls

went to their room. Boys had boy secrets; girls had girl

secrets.

Boys had their games and books; girls had theirs.

And even though X wore nonsexist clothes, like overalls, and had a nonsexist haircut (was it a girl's short haircut or a boy's long haircut?), it was a trying time.

Gould, of course, was on hand with some sneaky solutions: a teacher who let boys and girls line up alphabetically rather than in separate lines and a principal who let Child X use the bathroom that was simply marked

But X had to face several crises with other children and with their parents as well. Happily, in the end, almost everyone agrees that an X really had an advantage, being able

There was nothing

relay race, being adept at being a quarterback as well-as a cake-baker. And almost everyone agreed that "by the time it matters which sex X is, it won't be a secret anymore."

Last week, while vacationing in the Hamptons on Long Island with her children and her husband, Bob Gould, a psychiatrist, Lois Gould recalled that her fable was drafted six years ago. At the time, Carole Hart, a friend of Gould, was producing "Free To Be

You and Me," Marlo Thomas' prize-winning album about nonsexist education for children, later adapted as a TV special. Gould was asked to contribute to the album.

"I kicked the idea around for a day and a half," she recalled. "What would happen if . . ." And the fable of Baby X was born. Hart loved the idea, but the Baby X segment was too long for the album. Instead, Ms. Magazine, which had paticipated in the production of the album, published a short version of the tale as one of its 'Stories for Free Children."

Since then, Gould said, Baby X has lived an undergound life. Using the Ms. Magazine version, a number of elementary and junior high school students have adapted Baby X for school plays. One new mother wrote Ms. Gould that she had used "X" as a middle name for her child. Church groups and colleges have used Baby K in teacher training programs. Children have written Gould to find out "what Baby X really is." Others wrote to tell the author that they really knew. And one little boy felt comfortable enough to write: "I wonder what it would be like to wear flowered underwear."

It's letters such as that one that probably make TV censors nervous. At one point, Gould recounted, Baby X was developed as a TV special, but the project was shelved when ABC censors turned it down. The gender identity question was too touchy for them, Gould says. In fact, even Marlo Thomas, an outspoken feminist, was anxious about the Baby X concept on television, she said.

Now, Gould thinks that the idea of a TV special may be resurrected, but Baby X may have to unravel another riddle if the project is adapted as a live drama. Somebody's going to have to decide: Who plays Baby X - boy or

# Book details weird TV shows

By JAY SHARBUTT

LOS ANGELES (AP) - If you want to curl up with a good book on TV's sci-fi, fantasy, horror, surrealistic or flat weird shows, get "Fantastic Television" by Gary Gerani. Then start

His 92-page effort surveys nearly 30 years of abnormal TV, from "The Time Tunnel" to "The Prisoner," from "Night Gallery" to "Kolchak: The Night Stalker," from "Superman" to "Capt. Nice."

Published in soft-cover a year ago, now in its third printing, it covers over 200 shows. Some get but a paragraph, others two and three pages of study. It's quite a scholarly work.

## **Beatle Harrison** fathers first son

LONDON (AP) - George Harrison of the Beatles and the Mexican woman he lives with, Olivia Arras, have had a son, friends of the couple reported Wednesday.

They said the 5-pound baby was born Tuesday at a nursing home in Windsor and the parents are calling him Dhani.

Harrison reportedly told friends: "I am on top of the world - utterly thrilled and excited."

Harrison, 35, and Miss Arras, 28, met in Los Angeles when she was employed by his record company as a secretary. They have been together for about four years. He was divorced last year from model Pat8ti Boyd after 11 years of marriage. They had

#### Vietnam movie rough, good

By BOB THOMAS **Associated Press Writer** 

WHO'LL STOP THE RAIN is an ambitious present-day allegory of how the Vietnam war corrupted individual lives. Michael Moriarty, a Marine turned journalist, decides to run heroin from Vietnam to the United States, and involves his wife, Tuesday Weld, and a former Marine buddy, Nick Nolte.

They immediately encounter a sadistic gang, who may or not be government agents. Motivations are hazy (Nolte reads Nietzsche), and some sequences fail, such as a meaningless foray into the film world.

tension mounting from the beginning, and he draws superior performances from the three stars.

Rated R, it contains rough language, torture sequences and demonstrations of drug use.

the Topps Chewing Gum Co. in New York, where he lives.

Many epics inspected by his "Fantstic Television," like "Atom Squad" (NBC, 1953), verge on the obscure. And who, except all of us, recalls that "Capt. Z-Ro" aired in 1955?

How did Gerani compile his data on shows major and minor?

"Well, much of it was memory,

OMPLETE MENU FAMILY MENU

OPEN 24 HOURS %

By HARRY F. ROSENTHAL

WASHINGTON (AP) - A federal judge refused Thursday to accept a negotiated guilty plea from Michael V. Townley, a young American who is accused of planting the bomb that killed a former Chilean ambassador to the United States.

Saying he had heard of the plea bargaining arrangement from prosecution and defense lawyers only minutes before the court session, the judge told Townley he would take up the matter in court at some unspecified time in the future.

Townley, 35, had agreed to plead guilty to a single count of conspiracy to murder a foreign official. It was not known what promises the government made in return.

A federal indictment returned Tuesday named Townley as an agent of the Chilean secret police and said he put a bomb in the car of Orlando Letelier, an outspoken critic of the military regime of Augusto Pino-

The indictment charges seven other men, including the former head of Chile's defunct secret police, DINA. with plotting and carrying out the murder on Sept. 21, 1976. All seven also are charged in the death of Lete-

lier's secretary, Ronni K. Moffitt. Townley, who was expelled from Chile last April, has cooperated with the prosecution and is expected to be the star government witness in the trials of the others.

The indictment said that Townley, acting on Contreras' orders, built the bomb with the help of five anti-Castro Cubans and put it into Letelier's car. Townley was not in Washington when the bomb exploded, according to the indictment, and the person who actually set it off was not named.

Seven of the men indicted are charged with conspiracy to murder, three counts of murder and one count of using an explosive to murder. Aprend eighth man is charged with lesser

#### Santa Fe season is rescheduled

The Santa Fe Opera House today announced that the new season will be delayed for at least two months while the maintenance men continue their present project. This is expected to cause some problems with booking of major attractions.
