Retiring Rep. Mahon readies Hance support

WASHINGTON, D.C. - Despite earlier statements he would not get involved in the race to choose his successor, U.S. Rep. George Mahon reportedly has taken steps to throw his support to State Sen. Kent Hance, Democratic nominee for the 19th Congressional District seat.

Mahon has held that seat for 44 years. Hance's Republican opponent in the upcoming November elections is George W. Bush of Midland.

Mahon, who earlier said he would not endorse any candidate in the race, is expected to express his support in a telegram to be read tonight at a rally in Wolfforth in honor of Hance.

Mahon reportedly has said the telegram praises Hance for the "superb" job he has done in the state senate and pledges Mahon's "full support" for

The retiring congressman has been quoted as saying he always has sup-

misunderstood.

Burge was serving a sentence for interstate transportation of forged se-curities, said police, whileBoyd was serving a sentence for interstate transportation of firearms by a convicted felon.

Probation Officer Jack Swan said
Boyd was due to be released Friday.
Authorities said they looked for Boyd at his girlfriend's residence after obtaining her name and address from a form requesting visiting privileges at the jail.

The search for Burge was including the use of police dogs to try to track him. authorities said.

Three try to extinguish thirst

BIG SPRING - In what may be a first in the history of West Texas robberies, three men used a fire extinguisher early today to commandeer a few six-packs of beer from a 7-Eleven Store,

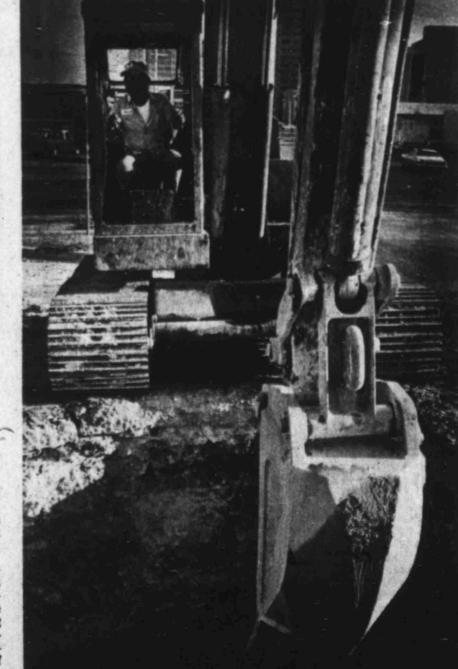

according to Big Spring police.
Police Lt. Claude Morris said three men tried to purchase some beer at about 2:30 a.m., but the clerk, Norma Reynolds. told them that it was after

"The clerk was sprayed in the face with a fire extinguisher and the men took off with some beer," Morris said.

"She got sprayed all over and the spray also entered the hot dog warmer and contaminated

some hot dogs." Big Spring police later gave a description of the men and a car to Stanton authorities. Stanton police about 3:45 a.m. arrested three men in a car which they said matched the description

A spokesman for the Martin County Sheriff's Department said four six-packs of beer had been found in the car, but that the fire extinguisher had not yet

Assassination probe 'trivial' for Cambridge acoustics firm

By FRED BAYLES

CAMBRIDGE, Mass. (AP) - Rifle fire in Dallas, students' screams at Kent State, an 181/2-minute gap on a Nixon White House tape — all are sounds that have punctuated major events of the past two decades.

But for the consulting firm hired to analyze those snippets of history, the job is a minor sideline.

"Congressional investigations are a trivial part of our work," says Samuel Labate, chairman of the board of Bolt, Beranek and Newman. "Most of our work involves acoustic designing for business offices, school dormitories. We only took on the investigations because it is of national inter-

Labate says the firm, named for three former Massachusetts Institute of Technology professors who formed the company in 1948, has built a \$30 million-a-year business from acoustic

He says the firm usually turns down the many requests it receives from police desartments around the country that want expert advice in analyzing sound data. 'It's not the thrust of our interest,"

says Labate. "We're very careful about the work we accept because we don't want to get involved in criminal investigations.

The firm first came into prominence in 1974 when, at the request of congressional investigators, it studled an 181/2-minute gap in one of then-President Richard Nixon's White House tapes.

The firm, and one of its founders, physicist Richard Bolt, said the section of tape containing critical discussions three days after the Watergate break-in was deliberately erased.

The company's electronic ears were listening in Dallas over the weekend as the slaying of President John Kennedy was reenacted for the House Select Committee on Assassinations to determine whether three or four shots were fired at the presiden-tial motorcade on Nov. 22, 1963. The Warren Commission decided three shots were fired that day, and experts generally agree a fourth shot would

indicate a second gunman. Labate said the results of the Dallas test will be available sometime next

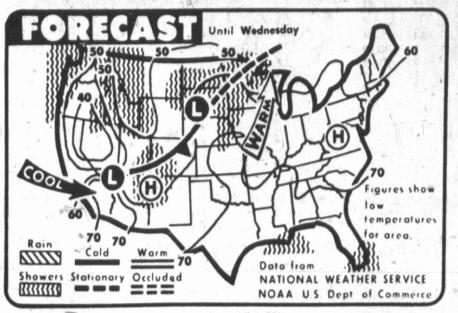

The firm analyzed similar test recordings made at the site of the Kent State shootings to determine the sequence of National Guard gunfire when four students were killed during a 1970 campus anti-war demonstration. That test was done for the Justice Department in its investigation of

Labate said both cases involve comparing recordings taken at the time of the actual shootings against test recordings, looking for "sound fingerprints" that will reveal the order of gunfire and even the types of weapons used.

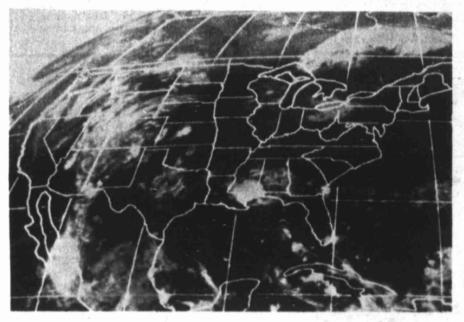

"Every noise has a certain unique frequency, a shape that we can compare with other recordings," he said. "We use standard equipment to analyze the frequency and then make tapes to comparte it with known sourds."

DOWN, DOWN, DOWN goes this 19-foot hole being dug by Darnell Washington at Front and Marienfeld. The cavity is part of a \$1.5-million underground telephone cable project by Southwestern Bell to improve long distance telephone service between Midland and Iraan. The project has been under way since June and is expected to be completed in December. Company officials say the underground cable will lower repair costs and provide more reliable service from Midland to the towns of Midkiff. Rankin and Iraan (Staff Photo by Brian Hendershot).

WEATHER SUMMARY

SHOWERS are expected today through Wednesday from the Pacific Northwest to the upper Great Lakes, in the Southwest, the central Gulf and southern Florida. Cool weather is forecast from the Pacific coast to the central Rockies, but most of the country is expected to be warm. (AP Laserphoto Map)

BROKEN CLOUDINESS covers the western third of the nation and scattered clouds can be seen over the Great Lakes and along the Gulf Coast in today's satellite cloud picture, recorded at 4 a.m. EDT. (AP Laserphoto)

Hector T. Morales, a former per-

sonnel director at the Corpus Christi

school, testified he knew of two per-

sons still employed at the school who were once involved in a marijuana

trafficking operation there.

Morales also said that during his 16

schools in Mexia and Richmond.

House panel to hear secret

testimony on school charges months at the school he learned of incidents of pill-taking, beatings and homosexual assaults involving both staff members and "clients."

Texas area forecasts

West Texas: Clear to partly cloudy through Wednes-lay. Widely scattered showers and thunderstorms ast, Panhandle and mountains. Highs 90e except to 102 lig Bend. Lows 60s except upper 50s mountains.

North Texas: Partly cloudy with widely scattered afternoon and evening thunderstorms through Wednesday. Highs 96 to 102. Lows 70 to 77.

South Texas: Partly cloudy and continued hot through Wednesday with a slight chance of mainly after-noon and early evening showers and thundershowers. Generally fair and warm tonight. High upper 80s immediate upper coast and in 90s elsewhere. Low near 80 immediate upper coast and in 70s elsewhere.

Port Arthur to Port O'Comnor: South and southeast winds 10 to 15 knots through Wednesday. Seas 3 to 5 feet today. Winds and seas higher in and near widely

Morales, who is now personnel director for the Nueces County sheriff's department, said he resigned his state job in January. He said his resignation was partially prompted by an order to promote a woman into a supervisory position above her husband, though that practice is prohibited by state law.

"There were people making love in closets and smoking pot," Morales said. "I heard of homosexual incidents, but I never saw any."

Panel chairman L. Dewitt Hale. D-Corpus Christi, asked Morales if he or any other employees had done anything to stop the alleged inci-

"I think maybe the superintendent should be asked that question," Morales answered, referring to Dr. Gary V. Sluyter who is no longer at the school. Morales said an internal investigation was conducted but employees were urged not to divulge the findings.

Delegation continuing Hanoi talks

WASHINGTON (AP) — As the U.S. State Department awaited official word on the finding of MIA remains by Vietnam, a congressional delega-tion continued talks in Hanoi today. Rep. G.V. Montgomery, D-Miss.,

heading the delegation, says he believes the Vietnamese are making efforts to recover the remains of missing Americans.

Late Monday, published reports said that Vietnam had found the remains of 11 Americans listed as missing and would return them.

Though there has been no official confirmation of the reports, State Department spokeswoman Anita Stockman said, "We welcome the return of further MIA remains.'

In Hanoi, the eight-man congressional delegation was greeted warmly on its arrival Monday by Trinh Quang Co, chief of the Foreign Ministry's North American section. "You're like at home here," he told Montgomery.

The lack of a full accounting of Americans missing in action remains a major obstacle to establishing U.S.-Vietnam relations.

TheDU.S. delegation hopes to gather new information on the MIAs in its six-day visit to Vietnam and Laos. But Montgomery was not optimistic about prospects over an accounting

"I sure hope we can make a break-through in Laos," Montgomery said. But he said, "They have no accounting, no records, no nothing."

Touching on the question of relations between Vietnam and the United States, Montgomery later told Vice Foreign Minister Phan Hien, "We cannot make policy or negotiate, but we come with open minds and we will take back what we learn to the president, the Congress and the people of the United States."

"President Carter will be watching our trip with great interest," he con-

Hien said Premier Pham Van Dong considered the visit "very important" and would meet with the congressmen in Hanoi. Rep. George E. Danielson, D-Calif.,

said he hoped the trip would lead to "putting behind us all the obstacles to normalized relations.' Carter is expected to announce soon

whether the administration will seek an extension of the trade embargo imposed against Vietnam after Communist forces toppled the U.S.-backed government of South Vietnam in

Others making the trip are Reps. won Pat, D-Guam John P. Murtha, D-Pa.; Sam B. Hall, D-Texas; Ike N. Skelton, D-Mo.; James Broyhill, R-N.C. and W. Henson Moore, R-La.

"I deplore the unauthorized use of my picture and the implication it suggests," Mahon said.

The rally at which the telegram is to be read is scheduled for 8 p.m. tonight at the Wolfforth High School

Welfare budget called 'fantastic'

AUSTIN, Texas (AP) - Human resources commissioner Jerome Chapman says his agency's budget request is "realistic" but concedes the \$735.2 million increase it contains is "fantastic." Chapman, commissioner of the

Texas Department of Human Resources - formerly the welfare department - presented the \$1.68 billion appropriation request Monday to budget examiners for the legislature and the governor.

The increase sought by the department would consume more than a third of the estimated \$2 billion in growth revenue that the Legislature will have available for budget increases next year.

Lawmakers will approve a budget for the 1980-81 biennium when they convene next year.

"We think it is a realistic budget. although we realize the dollars we are asking for are really fantastic We think this is a hold the line budget. except in a very few 'initiative areas,' "Chapman said.

In the audience was Harry Ledbetter, budget review man for Attorney General John Hill, the Democratic nominee for governor.

Chapman said over half the proposed increase — \$423.2 million — was 'dictated by external factors," including inflation, caseload growth in the medicaid program and federal regulations.

U.S. Rep. G.V. "Sonny" Montgomery, D.-Miss., is greeted by Tran Quang Co, chief of the American department in the Vietnamese Foreign Ministry

upon his arrival Monday in Hanoi with seven other U.S. congressmen. Diplomatic relations are being explored. (AP Laserphoto)

Davis' bond hearing slated today on charges of soliciting murder

By MIKE COCHRAN

FORT WORTH, Texas (AP) - Millionaire T. Cullen Davis goes before a district judge hopeful that today's bond hearing will prove more successful than one held here two years ago when a judge denied him bond, forcing him to spend 15 months in jail before being acquitted on capital murder charges last November.

Davis was arrested Sunday morning and charged with solicitation of capital murder. Tarrant County District Attorney Tim Curry said the 44-year-old industrialist attempted to hire the murder of District Judge Joe Eidson through karate expert David McCrory. Eidson is presiding over a 4-year-old divorce suit filed by Davis' estranged wife Priscilla

Still pending against the soft-spoken oilman are one capital murder charge and two attempted murder charges in connection with a 1976 summer shooting spree at his \$6 million mansion here.

Mrs. Davis was the state's chief witness at her husband's capital murder trial in Amarillo last year. He was tried and acquitted of charges he killed his 12-year-old step-daughter Andrea Wilborn in a midnight shooting spree at the lush, hilltop estate Aug. 2, 1976.

Mrs. Davis' lover, Stan Farr, 30, was also killed in the incident. Mrs. Davis and a chance mansion visitor. Gus Gavrel Jr., were wounded. Both survivors named Davis as the gunman, as did Beverly Bass, Gavrel's date that night. She escaped unharmed and summoned police.

Davis was initially charged with two counts of murder and two counts of attempted murder. He was freed on \$80,000 bond. However, the two murder charges were upgraded to capital murder Aug. 20, 1976 and he was jailed again.

Ironically, Sunday's arrest came two years from the day he was re-arrested while boarding his gleaming Lear Jet at a Fort Worth airport. Davis said he was en route to Houston on business at the time. District Judge Tom Cave conducted

an explosive five-day hearing shortly

after Davis was jailed and ultimately ruled Davis should remain behind bars until his trial.

Cave claimed his ruling was tantamount to a jury's verdict of guilty in the case. The prosecution had asked for a no-bond ruling, contending Davis killed his stepdaughter and would likely try to kill his wife if freed since she and Farr were his intended victims.

Davis remained in jail about 15 months before he was found innocent by a Panhandle jury Nov. 17, 1977. At his victory celebration, he referred to Cave as a "clown.

The Associated Press learned that the district attorney's office has knowledge of a "hit list" provided by McCrory, who worked with police as an informant, tipping them to Davis' purported plan to have Eidson and others killed. Sources said Cave, Mrs.

Davis, Gavrel, Miss Bass, and Davis' brother, Bill, were among the 12 names Davis allegedly listed.

Authorities said Davis gave McCrory, who was equipped with hidden recording devices, \$25,000 in \$100 bills after McCrory showed him a snapshot of Eidson's "body" stuffed in a car trunk. Sources said Eidson agreed to pose for the photo when asked by authorities. McCrory's affidavit said he met

with Davis several times between last Thursday and Sunday to discuss the alleged contract killing. He said Davis also asked him to get a .22-cali-ber pistol and a silencer, which he

Police confirmed Davis had the unloaded weapon in the trunk of his car Sunday morning when he was arrest-

Cliffhanger' vote seen on capital voting bill

WASHINGTON (AP) - Residents of the nation's capital are closer than they have ever been to victory in their decades-long battle for the right to elect senators and representatives.

"I think it's going to be decided by one or two votes," Sen. Edward M. Kennedy, D-Mass., told reporters as the Senate approached a vote scheduled for late today. "We're hopeful, but it's basically-a cliffhanger.'

"I think you would have to agree with that," said an aide to Sen. Orrin G. Hatch, R-Utah, a leading opponent of the measure. The aide said that the opponents thought they had a good chance to defeat it.

A number of amendments were expected, including one by Sen. William L. Scott, R-Va., giving the mayor of Washington, D.C. the power to fill senatorial vacancies. Kennedy said proponents expected little trouble defeating the amendments, which if approved could force the measure into a House-Senate conference committee.

dictory.

President Carter intensified pressure for passage with a statement late Monday calling the measure "a major human rights priority of my administration."

"Virtually every other country in the free world already provides full voting rerpesentation to the citizens of its capital city," Carter said. The proposed constitutional amend-

ment, already passed by the House, needs a two-thirds majority of the senators present.

If approved by the Senate, it will require the approval of the legislatures of 38 states within seven years to become part of the Constitution. Hatch told the Senate Monday the

measure had "almost no chance at all of being ratified." Scott predicted that legislators "would question ... whether they would diminish the representation of their own states" by electing two senators from the exclusively urban District of Columbia. The Senate last considered the

question of full congressional representation for the district in 1971. It was defeated 68-23. A partial list of congressional hearings on the issue compiled at that time showed that Congress had been considering it off and on since at least 1916. Kennedy said the "strongest" of the

amendments proposed by opponents was a proposal by Sen. James McClure, R-Idaho, to transfer the residential and business areas of the district to neighboring Maryland. It was defeated 47-35 on Monday.

Carter, family leaving for Salmon River trip

BOISE, Idaho (AP) - President Carter and his family are embarking upon a costly, elaborately prepared rubber raft trip down an isolated 80-mile stretch of the pristine Salmon

Carter, his wife, Rosalynn, daughter, Amy, and sons Chip and Jack were leaving a motel here shortly after dawn and flying by helicopter to Indian Creek to begin their wilderness adventure.

"It's probably been three years since I have been in a sleeping bag," Carter told reporters when he arrived in Boise Monday night.

AT WIT'S END

Good score possible

By ERMA BOMBECK

Parents have been under fire a lot lately for not knowing their children. They've been accused of selfishly pursuing their own goals and not giving a tinker's toot who their children are, where they are, or where they've been.

This is quite an indictment, and to make a distinction between parents who take their job seriously and those who don't, I offer today a quiz on "HOW WELL DO YOU KNOW YOUR CHILDREN?"

1. Can you name three of their best friends by their first and last names? 2. Do you know when they last

changed their underwear? 3. Do you know for a fact that the voice from under the bathroom door

belongs to your nine-year-old? 4. Do you know what books are being hidden that they think you don't know what you know they're reading?

5. Do you communicate? Or was the last time they spoke to you when the smoke alarm went off in their room?

6. Do you know where their school is located? 7. Would you recognize your child if

the braces were removed? 8. When it's 11 o'clock do they know

where their parents are? 9. Can you read their report card without an interpreter? 10. Did they have to flunk biology

11. How long has it been since they brought their gym shorts home to be

before you realized they were taking

laundered? 12. Do you know what they want to be this week when they grow up?

13. What are their allergies besides soap, homework and closing doors?

14. Who are their heroes? Heroines? 15. What do they do with their

16. What's under their beds?

17. What makes them laugh? Cry?

18. What size are their shoes?

19. Have you ever watched them play anything competively?

Plea given for cancer patient

Copley News Service

The mismanagement of cancer pain is one of the great deficiencies in the American health care

That is the contention of one of the world's leading authorities on pain control, who said that cancer pain 95 percent of the time in this country is mismanaged. Physicians do not have the proper training to treat cancer pain. Cancer literature ignores it. Even major cancer centers fail to provide proper pain-

control programs. These claims were made by Dr. John J. Bonica, who said he deplores the fact that while approximately \$1 billion is spent annually in this country for cancer research, only .022 percent of it goes for research into cancer pain.

"Certainly," Bonica said, "the prevention of cancer has to be the primary target, but we should also take consideration of the 600,000 cancer patients in this country who are suffering severe pain and are not getting the relief they deserve.'

Bonica, chairman of the department of anesthesiology at the University of Washington and president of the International Association for the Study of Pain, says cancer usually is not painful at the outset, but that pain persists in 75 to 80 percent of the patients with advanced cancer. Bonica said that about 15 percent of the time,

physicians are administering drugs for the alleviation of cancer pain in excessive doses when the pain could be managed with lesser doses or with such less-powerful drugs as aspirin or codeine. However, he said, from 70 to 80 percent of the time.

pain-wracked cancer patients are not being given enough medication because doctors fear patients will become addicts. He said that drug addiction among cancer

with pain should be totally ignored. In fact, he said, he supports legalization of heroin for clinical treatment of pain in cancer patients. 'The unfortunate patients who develop pain are

soul-stirring sights in great need of relief that frequently does not come," Bonica said.

Notwithstanding the hopeless prognosis of such cases, the pain problem deserves an intelligent appraisal and, perhaps equally simportant, a systematic plan for relief which will conserve the patients' physical, mental and moral resources and his social usefulness so long as possible."

He said cancer pain has been especially neglected by teachers, investigators, oncologists, authorities and national and regional cancer agencies.

"Until recently, research on cancer pain per se as virtually non-existent," Bonica said. "One of the most impressive and distressing aspects of this whole problem is that there are no accurate data on the incidence and magnitude of cancer pain."

He said that figures offered for the numbers of persons suffering cancer pain, including his own figures, are only estimates.

The efforts of (the National Cancer Institute)

have produced accurate information on every aspect of cancer except the incidence, magnitude and cost of the pain associated with malignant disease.

"The practice of some physicians to snow the patient under (with narcotics) because the end is (believed) inevitable denotes a lack of un-derstanding of the problem," Bonica said.

"Because it is very difficult to estimate the length of life in individual cases, such false humanitarianism may potentiate the effect of the disease and cause respiratory depression, stupefaction, anorexia (loss of appetite), nausea and vomiting and thus aggravate the cachexia (emaciated condition)."

CLOSER ENCOUNTERS

Sometimes you have to change

By LAURA SCHLESSINGER Copley News Service

Kevin is tired of being lonely, estranged and apprehensive about meeting people. He has never been involved with anyone, including himself; his usual answer to "What do you think or feel about that?" is "I don't know."

He describes himself as uninteresting and uncomfortable about what people think about him. He keeps to himself but really doesn't use any of that time to examine his life. feelings or motivations.

Kevin wants out of his present existence because he can no longer bear the unhappiness. If this is so, then why does he find it so painfully difficult to examine himself and his situation, design some measures to redesign his life and then begin.

As afraid as he is of remaining the same, so is he afraid of changing.

Change can be threatening - it means giving up what you know in exchange for what you don't know therefore, a risk.

There is something about

familiarity; it is at least predictable. And there is some safety in predictability because you are familiar with what is expected from you in order to

What do you risk when you venture into the unknown? Hurt, disappointment, rejection and failure are all possibilities. For without trying we may avoid some somber emotional mishap but we also avoid chances at happiness, accomplishment. closeness and success. It's all or

You also risk that the alternative you have chosen may not appear to be much better than what you had!

Another stumbling block to change for many people is the obvious requirement of having "to do something." For those caught in a long-term state of suspended animation due to perhaps fear or insecurity, the notion of having to get up and act is foreign, scary, and even the thought is exhausting.

There is no simple way around this. You need to build up confidence slowly. Success breeds success. Start

out a task for which there is minimal chance for failure.

Kevin felt he was uninteresting and didn't want that confirmed, so he kept a distance. "Interesting" to him was a person who did interesting things and shared thoughts and feelings.

Wisely, Kevin realized that a person is interesting for more than what he does per se. A person is interesting when he allows himself freedom of growth and expression, when he discovers and shares his real self.

So Kevin began his "growth to change" by first seeking out the roots of his feelings of inadequacy. In this way, he came to realize that this perception of himself was learned and not an inherent truth.

Next he set goals for himself, listing what he wanted to become and what he hoped to be able to experience within himself and in association with other people.

Change takes courage, determination, energy and perseverence. It offers no promise other than experiencing life. Joys and defeats are both part of the bargain.

Sweet-tart plums give other foods quite a lift

Delicious, fresh California plums make creating meals for two a lot more fun. Available into September, fresh plums, with their sweet-tart tangy flavor, bring out the best in meats and poultry, make spectacular salads and, of course, are a natural for desserts. They're so versatile!

And freezing fresh plums now will let you enjoy their versatility year 'round. It's so easy to freeze fresh plums, too. Just cut plums in halves or quarters. Add about 1 cup sugar per quart of fruit, plus 1/4 teaspoon ascorbic acid mixture to retain that lovely plum color. Or, if you wish, simply wash and prick whole plums and freeze just as is for a wintry diet conscious treat! Properly stored frozen plums will keep up to a year. Whether freezing fresh plums for

later or enjoying them now in favorite recipes or for refreshing snacks, be sure to select ripe, good quality plums. The California plum growers offer these tips:

Choose plums that are firm and full-color for the variety. A slightly, soft tip is a good indication of ripeness. Refrigerate ripe plums to keep them fresh and good for several days. And please do leave the skins on! The flavor contrast between tart skin and sweet flesh is what makes plums different from the other summer fruit...it's what makes them plums!

And that very special plum tang is what makes these plum muffins special, too. A rich batter is topped with a cinnamon and sugar mixture and a juicy plum wedge or two. Serve them piping hot with our Sacramento Fruit Bowl Salad for a delightful Sunday brunch for two, or as an accompaniment to a light summer meal. The salad is chock full of bright, ripe summer fruits and crowned with a zingy lime and yogurt dressing.

For more exciting ways to use and serve fresh California fruits this summer, write for a free, beautiufly illustrated 48-page recipe booklet. Send a stamped, self-addressed, businesssize envelope to "Fruits of Summer," P.O. Box 255627, Sacramento, Calif.,

Makes about 21/2 cups.

Plum Picking...What To Look For Choosing fresh summer plums from the multi-colored array available this season can be slightly bewildering. Some 20 major varieties of fresh plums are shipped throughout the country from California orchards. In August and September, you'll find the popular Casselman variety plentiful. Its lush red skin and sweet-tart yellow flesh make it an especially good choice for jamming, baking and,

of course, eating out of hand.
When buying fresh plums, the California Plum Commodity Committee suggests you select plums that are full colored for their variety and firm, except for a slightly soft tip. Both characteristics are good signs of ripeness. Let them ripen at room temperature if they're not quite ready. But refrigerate plums when ripe because they can over-ripen very quickly

Plum-Preserving Possibilities You can keep fresh summer plums handy all year round, but first you'll have to plan ahead a bit. Remember to use juicy ripe fruit-that's more important than size or shape when preserving fresh plums.

Canning: Prick whole plums and drop into a boiling medium or heavy sugar syrup. Simmer 2 minutes; cover and let stand 20 minutes. Remove plums from syrup; pack into hot, sterilized jars. Reheat syrup to boiling and pour over plums. Seal and process in boiling water bath 20 minutes. Syrup can be flavored to taste with brandy or spices.
Freezing: Halve or quarter plums.

Add about 1 cup sugar per quart of fruit, plus 1/4 teaspoon ascorbic acid mixture. Mix gently and pack into freezwr containers. Cover and freeze. Or, if preferred, simply wash and prick whole plums and pack into freezer containers just as is.

Conserving: By adding chopped walnuts and golden seedless raisins to your favorite plum jam recipe as you cook it, you'll have a delicious nonpurchasable plum conserve.

Pickling: Place 5 pounds washed fresh plums in a one gallon crock or jar. In large saucepan, boil together, for 15 minutes, 3 cups white vinegar, 5 cups sugar, 12 whole clovdes, 1 tablespoon mixed pickling spices and 4 cups water. Pour hot mixture over plums; cover and refrigerage 3 to 5 days before using. Makes about 2 quarts. **Plum Facts And Figures**

...Peel plums (if you must) by putting them in boiling water until the skins crack. Then peel as you would a

...Pit freestone plums by cutting along the seam and twisting in halfthe pits pop out easily. Som plums are freestone enough to cut along the seam, twist in half and then cut the pit away from one side. With non-freestone varieties, it's best to slice into the pit and then cut the fruit away in

...One pound of plums equals about: 21/2 cups sliced plums, or 2 cups diced or pureed plums.

Weevils bowl over homemaker

By JEANNETTE BRANIN

Copley News Service The caller did not identify herself,

and I did not ask who she was, Anonymity, at times, is the kind way The woman said she had just

finished preparing for the oven two loaves of her favorite bread when, on the breadboard, she saw two little objects wiggling out of the flour 'Can I go ahead and bake this

bread?" she asked. "Whatever those little things are, they're probably in the bread dough, too. Will they hurt No doubt they were weevils, the

larvae of which eat their way out of

seeds and grains. They're a familiar pest in many households. Weevils are no respecters of persons.

Neither are weevils an indication of the quality of sanitation in pantry or kitchen. Weevils can be brought in the house in spice cans; any webbing in the tin is a sure sign that something other than chili powder inhabits that

They can be brought into the kitchen in any grain or meal: flour, cornmeal, for instance.

They also can make themselves known by burrowing their own

luscious tunnels through cakes of

Even tender-hearted persons, buying wild bird seed for raucous jays or melodic mockingbirds, have probably brought weevils or the tiny black weevil beetle into the house in that sack of seed. Webbing shows the evidence, if more evidence is needed than the sight of little bitty wiggly

To answer the caller's first question: "Can I go ahead and bake this bread?" The answer was certainly, go ahead and bake it, knowing that you are probably baking weevils,

Ultrasound: Improving the medical picture

By JOHN STANSELL Copley News Service

LONDON - Only a few years ago ultrasound meant little to anyone outside the medical profession, where it has long been used as a diagnostic Since then the use of sound waves at

ultrahigh frequency has spread, first to the cleaning of metallic components, then into crack and flaw detection, and most recently into the monitoring of faults in the insulation surrounding joints in electric cable. During 1977 further interesting

developments occurred in Britain, with a resurgence of interest in medical ultrasound. As the images presented to the doctor have become clearer, its use as a diagnostic tool has become more common. The resurgence of interest in

ultrasound followed the enormous increase in diagnostic power that resulted directly from the development of the EMI system of computerized tomography in the 1960s. The latest ultrasonic scanners take

the external form of these tomographic instruments. Typically they comprise a free moving transmitter-receiver which can be directed over the surface of the skin by the clinician, increasingly sophisticated computers, and a television-type display coupled either to a photograpic or teletypewriter output for permanent recording.

Among the most recent ultrasonic developments is the three dimensional scanner from Sonicaid. The maker claims that the ability to build up a three-dimensional picture of organs within the body, or to provide vital information about a fetus as early as the fourth week of a pregnancy, gives it a two-year commercial and technological lead.

Sonicaid also emphasizes the equipment's safety, due to the use of low-energy ultrasound. The difference between the new

device and the scanners commonly used in hospitals is the three dimensional capability. The sensing probe on Sonicaid's Multiplanar Scanner can move in any dimension over the patient's body. The probe's movements and the reflected sound signals are fed into the computer, which displays the image on two screens. When viewed through a stereoscopic attachment, these give a three-dimensional picture Both slices of the body and com-

posite images can be viewed, and the operating clinician is free to select the angle from which he views a particular area of the body. At present the ultrasonic scanner is

predominantly used in medicine for the monitoring of pregnancy since the X-ray based tomographic scanner cannot be used for this purpose. However, the improvement in the images from devices such as the Multiplanar Scanner have widened its scope.

For example, Tom Brown of Edinburgh University in Scotland, who did the research resulting in the new scanner, believes that such instruments will open the way toward much greater use of ultrasound for diagnosis of diseases of the pancreas. liver, kidneys and spleen. Brown has some examples of

detecting a secondary tumor in the liver. If a tumor is very small it can fall between the "slices" of a conventional scanner, but with the three dimensional device the possible area of its location can be "boxed in" and then viewed from several angles. EMI's subsidary company, Nuclear

Enterprises, has launched a new

The suit asks that the state be enjoined from

Another company in the field is GEC Medical, whose latest equipment is a mobile artery and vein imaging system and a real time scanner. And ultrasound is also increasingly being used in the diagnosis of heart disease. One example is the Echocar-

diogram from Cambridge Instruments. This allows the doctor to study the movements of structures within the heart by aiming a beam of ultrasound at the valves and muscles and displaying the processed reflections on a cathode ray tube. Chart recorders give a permanent record for later detailed examination.

Printers turn to court

AUSTIN, Texas (AP) - Texas commercial printers have gone to court in an attempt to get the state out of the printing business.

A state district court suit filed Monday by Austin attorney Adrian Overstreet alleges that 35 state agencies now operate printing facilities which they call "reproductive services."

ties. It cites a portion of equipment estimated to the state constitution cost \$50,000 to \$70,000. that says, with a few exceptions, that all state printing and binding needs "shall be performed under contract,

The suit also asks that District Court Judge Hume Cofer issue a temporary injunction to keep the Department of Human Resources from buying an offset press further printing activi- and accompanying

responsible bidder."

Copley News Service
In the fall of 1975 Laurel Lee's life had settled into a rather comfortable, low-key pattern.

After the turbulence of the '60s at Berkeley. After numerous quests into what it is that makes life meaningful. After seeking alternatives to materialism in the academic world and not finding satisfaction. After turning from that to the Eastern religions. After finally finding her own answer in the Bible, in the teachings of Jesus, while she was on her way to homestead in Alaska.

After all that, Laurel Lee's life was, at last, relatively tranquil. She and her husband were living in Portland where she taught in a

private school and he drove a school bus. Their lifestyle was far from affluent, but they loved the free time their low-income careers provided. And they used that time to enhance their family life, spending time with their two small children, going camping throughout the northwest.

Then, that October, when she was 30 and pregnant with her third child, the tranquility of her life was rocked by the last threat she could have anticipated. She found herself facing the specter of death.

The confrontation began inauspiciously with a cold and a cough that lingered after it. There were tests and examinations and a diagnosis -Hodgkin's disease. A form of cancer that affects the lymph system and can spread throughout the body. Malignant and potentially fatal, but responsive to treatment by radiation and chemotherapy.

Yet for the pregnant woman, there's a hitch. The very treatment that can save her life can damage the baby she's carrying. And in this case the pregnancy was in its sixth month.

Doctors suggested a therapeutic abortion and immediate radiation

Lee refused both. She wanted to postpone treatment until after the baby's birth.

She won out on the abortion question.

But the progress of the disease and the doctor's warnings convinced her to accept the need for immediate treatment. And so it was begun with lead aprons being used to shield the developing baby from the dangerous

Medical treatment and hospitalization became a way of life There was progress. The original tumor shrank away. And setbacks. The disease invaded the spleen, requiring surgery, more radiation and chemotherapy. There were high points. Baby Mary Elisabeth was born strong and undamaged in January. And low points. Her husband left her in May to marry the young woman who had been caring for the children.

And face them she did, with determination to have an understanding of the disease and its treatment. With a will to live, but with the ability to accept death. And with humor. All of which she recorded in a

When her treatment was completed and her disease declared in remission nearly a year after the sickness began, she shared the journal - two notebooks filled with handwritten accounts of her feelings and illustrated with her own water color paintings - with the doctors who had treated her and become her friends. And again a train of unexpected

events was set in motion. The doctors shared the journal with a physician from New York, who was teaching that summer at the University of Oregon Medical School. Through him the journal was introduced into the New York publishing world and accepted for publication. It was titled "Walking Through the Fire" for a passage from

"When thou walkest through the fire, thou shall not be burned, neither shall the flame be kindled upon thee. - Isaiah 43:2.

It's symbolic of Lee's attitudes and her religious conviction.

She talked recently in an interview of her life since the autumn of '75, how it has changed and how her faith has held firm throughout.

"I became a Christian eight years before I got sick," she says. "I didn't start believing because I was dying. I was looking for something. Something that would give me strength and peace of mind. I knew it wasn't there in material success. My parents and a lot of their friends had that and they weren't happy.

"I soon found that it wasn't in study and research. I talked once with two Nobel prize winners and they weren't happy. I explored the Eastern religions and didn't find it there.

"But in the Bible, in the teachings of Jesus, I found what I needed and it served me well. When I got sick, I remember wondering if this same faith that had served me so well when my life was fairly normal would stand when I was in front of a firing squad of circumstances and everything was falling down around me. It did."

When things were difficult, she looked on them as tests of the strength "You can't be a David without a

Goliath.' But if she's found herself facing a Goliath, she feels she's also been blessed. With the health of her baby. With the success of her book and the

financial stability it has provided for her and her children. And the op-portunities for travel it has provided here and abroad through promotion tours.

And with a year of good health allowing her to enjoy the other blessings before the disease attacked again last November. It was once more brought under control.

But she knows it's there, could surface again, and could take her life too soon for her to see her children

Still, she's at peace. She is not bitter about what's happened to her. Nor is she fearful.

'Death holds no fear for me now. I'm not looking forward to going through the process But I am not afraid."

She doesn't let her mind dwell on the topic. Instead she busily crams as much life as she can into each day, spending time with each of her three children individually, doing simple things like gardening and putting up homemade jam when she's at home. Getting to know the people of the cities and countries she visits on her book promotion tours.

She faces the future with hopes rather than plans, remaining ever conscious of the importance of making the best use of the time alotted her.

"I have an unknown quantity of time," she said. "Everyone does. Because of my circumstances I'm more aware of the limitation than some people are. But none of us have infinite time. We all have to watch that we don't live our lives postponing all the pleasures for later.

"I don't make long-term plans. I can't. But I live with long-term hopes. To continue writing. To raise my children well. Maybe even to remarry

Handle your whiz kids with care

By MARGERY CRAIG Copley News Service

You've just found out what your child may have been telling you all along: He's smarter than you or at least has the potential to be.

The realization comes from learning your youngster has an IQ of 132 or above, a designation used to draw the line between children of "average" intelligence and the "mentally gifted minor," the child with exceptional learning abilities.

Ideally, the gifted child will be placed in a class where his or her potential can be developed, and as a parent you are told to be prepared for problems your child may find in

You have heard, for instance, that your child may have difficulties in relating to children with less potential, and you know there's no guarantee that you always will find teachers sufficiently trained to deal with exceptional learners.

What you may not realize is that your gifted child may face as many problems at home with you as in

She noted the new

"Even with all my background, it still took me two or three days to stop

She often calls upon her family experiences in counseling gifted children and their parents.

parent who has just learned he has a gifted child to go "lesson crazy." enrolling the youngster in an array of extracurricular classes - from ballet

Parents, she said, often make the faulty assumption that the gifted child is, indeed, gifted in all areas.

Malone said it simply does not follow that the second-grader who is capable of sixth-grade math also will be capable of rivaling Mozart on the piano. If the interest is not there, the ability doesn't count. The overzealous parent who keeps

forcing more and more achievements on his gifted youngster runs the risk of the child rebelling, deliberately becoming a non-achiever, she added.

The same holds true for the parent who lashes out at a child saying. "You're gifted so why can't you do

"This is a line I've heard way too many times," Malone said. "Parents have to realize that every child, including the gifted, has limitations." Parents of gifted youngsters also

are susceptible to what Malone described as the "We've-got-to-keephim-normal-just-like-the-other-kids" syndrome.

She said this is usually manifestedby the parent who insists his child participate in such activities as Little League, despite his athletic inclinations. Parents also may demand that a child spend as much time with playmates as with, for example, a chemistry set.

Here again, Malone said, parents may only be encouraging the gifted child to rebel and stubbornly refuse to do anything.

"These parents should back off. Gifted children are not so unlike the so-called 'average.' They, too, want friends and to do things like exercise. Leave them alone and they'll come

CLIP'N COOK

By CECILY BROWNSTONE Associated Press Food Editor

HAM-CHEESE SKIVERS For cooks who have ebleskiver

½ cup wholewheat flour 1 cup all-purpose flour ½ teaspoon baking powder

1/2 teaspoon baking soda 1/4 teaspoon salt

1 tablespoon sugar 2 tablespoons butter ormargarine,

1 cup buttermilk

Ham-Cheese Balls, see below Stir together the flours, leavenings and salt. Beat together until blended the egg yolks, sugar and butter; gently beat in the flour mixture in several additions, alternately with the buttermilk, until smooth. Beat the egg whites until stiff; fold into the flour mixture. Bake in an ebleskiver iron, following the manufaturer's directions, but fill each cup 2-3rds full of batter and place a ham-cheese ball in the center, pressing it down lightly into batter. Makes 28.

Ham-Cheese Balls: Mix together 2-3rds cup ground ham and 2-3rds cup grated (medium-fine) lightly packed Swiss cheese and 2 teaspoons mayonnaise; form into 28 balls.

DEAR ABBY Older woman, hubby carrying on like kids

By ABIGAIL VAN BUREN

say, "I'm the one who called yesterday." (At least 100 people DEAR ABBY: I'm 35 and my husband is 36, and my problem is his interest in a 66-year-old woman. Can you believe it? This has been going on for the last six years. They work together, and Jim gives her a ride to work and back. But that's not allthey talk on the phone every night, laughing and carrying on like two

Since she doesn't have any means of transportation, Jim carts her around on weekends to do her shopping, errands, doctors' appointments, etc. She pays him back by cutting his hair and giving him manicures and rubdowns. She even clips his toenails!

This woman has been a wodow for 20 years, and the only social life she seems to have is with my husband. Some of my friends have asked me if I'm "jealous," so I guess it's common knowledge that he and this old lady have something going.

What I want to know is, what can a 66-year-old woman do for a 36-yearold man?-WONDERING IN TEXAS DEAR WONDERING: All she has

to do is "be there." DEAR ABBY: I answer the telephone in an office in a small Southern city, and my employers have instructed me too find out who is

calling before they take any call. Over the years I have been subjected to untold abuse when I ask, 'Who is calling, please?" I've been told everything from, "It's none of your business." to "Andrew

Jackson!" Don't people realize that I couldn't care less who is calling-I'm only following instructions.

And there are those who call and

called yesterday.) Here's my favorite: "Didn't you give him my message?" (I just GIVE

messages, I can't make my employers return calls.) Abby, this is just a sample of how dumb people can be on the phone.

Please print this. It may make a few callers change their ways .--GULFPORT, MISS. DEAR GULF: I'll print your letter,

but don't expect miracles. Very few see themselves in my column-only others.

DEAR ABBY: We wonder how many other families living in the Midwest (or the Northeast) are blessed with relatives who live in Florida. Their letters are mainly weather reports. And whenever they visit, they take a special delight in bad-mouthing the old hometown and

First of all, this state was good enough for them for about 55 years. Suddenly, it's the pits! Secondly, not everyone likes hot weather all year. It's monotonous. We happen to enjoy the change of seasons. But somehow, when we try to defend our town, it comes out sounding like sour grapes.-HOORAY FOR MISSOURI

DEAR HOORAY: Whether one lives in Missouri or Florida, James Whitcomb Riley's little verse contains good counsel:

"It ain't no use to grumble and complane

It's jest as cheap and easy to

When God sorts out the weather and sends rain. W'y rain's my choice."

Fashion world: Color aids Western push

By NATALIE BEST

Copley News Service HOLLYWOOD — It's no secret. Eastern fashion experts have regarded the West a runner-up in the fashion

However, one exalted leader in the multi-billion dollar industry sees the West coming of age - a real threat in capturing the brass ring of apparel

dictates. "It'll all be done with color," said Beverly Hudson Marshall, the newest addition to the elite society of women retail fashion chiefs.

The charming, 42-yearold former fashion manager for Lord and Taylor, New York, and assistant general manager of merchandising for Saks Fifth Avenue, Chicago, has been named general manager of Saks, La Jolla, the wealthy beach community at the southern tip of California. She is one of five lady managers in Saks' 30 stores and one of perhaps 20 women in the top echelon of the industry.

"Moving to the West was a happy surprise," she said. "I have found that the one thing New York designers are not giving California women is the proper coloration." The . short-coiffed. smartly dressed Marshall added, "Color, you see it everywhere, on the

streets as well as in the stores. It's changing my

life. I've worn black and

browns for a long time.

Now I, too, am adding color to my wardrobe." Wearing a two-piece, bright blue print-on-print, quilted dress - her first California purchase - by West Coast designer Jeanne-Marc, the tall, graceful new manager said she likes Jeanne-Marc designs "because they are timeless, ageless and practical for traveling." She will be doing a lot of traveling in the next few years since she plans to commute. She and her husband, Al Marshall, a real estate broker in Chicago, have decided to maintain their home in Park Ridge, Ill.

DEATHS

Walter Chumley

WICHITA FALLS — Services for Walter W. Chumley, 73, of Wichita Falls, father of Mrs. Lloyd Delaney of Midland, were at 10 a.m. Monday in Hampton-Vaughan Funeral Home here with the Rev. Ben Ezzell, Baptist minister from Holliday, officiating.

Burial was in Rosemont Cemetery. Chumley died Saturday in a Wichita Falls nursing home.

He was born on Sept. 27, 1904, in Montague County. Chumley was a retired carpenter. He was a member of Jefferson St. Baptist Church.

Survivors include another daughter, Mrs. Ronnie Brown of Wichita Falls; a brother, Jim Chumley of Vernon, nine grandchildren and one great-grandchild.

Mary Rosson

Services for Mary V. Rosson, 73, a former Midlander, were to be at 10 a.m. today in the First Presbyterian Church Chapel with Dr. Ray Riddle officiating. Burial was to be in Fairview Cemetery.

Mrs. Rosson died Sunday in a Dallas hospital. She resided in Richard-

She was born on Dec. 1, 1904, in Clarksville, Ark., where she was reared. She married Samuel I. Rosson on April 27, 1935, in Clarksville. She moved to Midland in 1950, and resided in Midland until she moved to Richardson three months ago.

They had lived in Sutton Place Apartments. She was a member of the First Presbyterian Church.

Survivors include her husband of Richardson; a son, Samuel I. Rosson, Jr. of Dallas; a daughter, Mary Ada Espinosa of Houston, and one grand-

Pallbearers were to be Jack Mogle, Bill Osborne, Dr. Truman Spires, Robert Donnell and R.O.TSmith.

Hugh Jackson

OLNEY - Services for Hugh L. Jackson, 76, of Olney, father of Mrs. Ron Smitherman of Midland, were Friday in Lunn Funeral Home in

Burial was in Restland Cemetery. Jackson died Wednesday in an Olney hospital.

He was born Nov. 28, 1901, in Florence. He had resided in Olney for 32 years and was a retired oil field

Survivors include his wife, two sons, three other daughters, 12 grandchildren and two great grandchil-

Mrs. Ollie Reid

COLORADO CITY - Services for City and formerly of Midland, were to be at 4 p.m. today in Kiker-Seale Funeral Home here with the Rev. Everett Yeilding, an evangelist from May, officiating. Burial was to follow in Loraine

Cemetery, directed by Kiker-Seale

Funeral Home.

Mrs. Reid died Monday in a Colorado City hospital following a brief ill-

She was born Dec. 8, 1893, in Boyd. Mrs. Reid had been a Colorado City resident since 1937. She worked as a seamstress. She was a member of the Baptist Church.

Survivors include four daughters, a son, 16 grandchildren, six greatgrandchildren and three great-greatgrandchildren.

Robert T. Cox

Services for Robert T. "Bob" Cox, 69, of 3206 Boyd Ave. will be at 10 a.m. Wednesday in Newnie W. Ellis Funeral Home. Burial will follow in Eastland Cemetery.

Cox died Monday in a Midland hospital.

Cox was born Sept. 13, 1908, in Eastland. He spent his early life in Eastland and was a Texas A & M University graduate.

He came to Midland in 1930 and began work with Prairie Oil Co. When that company merged with a larger company, Cox began work with Atlantic Richfield Co. and remained with the firm for 45 years. He was married to Lenna Wright in

San Angelo in 1937. He was transferred to Casper, Wyo., in 1965. He retired in 1972 Survivors include his wife and two

sisters, Mrs. Bernie Blowers of Dripping Springs and Mrs. Jack Kilian of Lake Jackson.

Ruey D. Hays

GRAPEVINE - Services for Ruey David Hays, 66, of Grapevine, brother of Curtis Hays of Midland, were to be at 2 p.m. today in the Wilson-Miller Funeral Home in Monahans. Burial was to follow in Monahans Ceme-

Hays died in a Grapevine nursing home Saturday after an illness.

Born Jan. 6, 1912, in Tipton, he had been a resident of Monahans several times during the last 30 years. Hays was a retired carpenter. He was a member of the Church of Christ. Other survivors include two daugh-

ters, two sons, two brothers and a

Wade Baker

GOLDWAITE - Services for Wade Hampton Baker, 71, father of Neal Baker, Fred Baker and Janell Gibson, all of Midland, will be at 1 p.m.
Wednesday in the Wilkins Funeral Home here. Burial will be in Goldthwaite Memorial Cemetery. Baker died Monday at his residence

in Goldthwaite. He was born Feb. 16, 1907, in Jacks-

boro in Jack County. He was married to Erachel Allen in January 1927 in Lamb County. They moved to Goldthwaite from Stephenville. Survivors include another son, an-

other daughter, three brothers, two sisters, 11 grandchildren and five great-grandchildren.

Dam on Panhandle lake unsafe; draining planned

ALBUQUERQUE (AP) - Buffalo Lake at the Buffalo Lake National Wildlife Refuge near Canyon, Texas, is being drained because the dam's spillway would be unsafe if flash flooding occurred, the U.S. Fish and wildlife Service said.

A spokesman said draining was scheduled to begin today and would continue for about four

Carter's tax cut not half enough

WASHINGTON (AP) - Representatives of the nation's businesses. usually among the most conservative witnesses to appear before Congress, are calling for a tax cut nearly twice the size recommended by the Carter administration and the House.

There are two catches, though. The Chamber of Commerce says corporations and investors should get a bigger share of the \$30 billion tax cut it proposes and that the cut should be accompanied by a slowdown in federal spending growth.

"The time is ripe for Congress to limit 1979 outlays to \$480 billion," which would permit a 7 percent growth in spending and still allow a bigger tax cut without increasing the deficit, Jack Carlson, the chamber's chief economist, told the Senate Finance Committee on Monday.

Congress seems likely to limit spending to about \$489 billion next year. But the chamber's philosophy on taxes seems to fit well with that of the committee. That panel is expected to enlarge the House-passed tax cut of \$16.3 billion - though not to the chamber's \$30 billion mark - and is a good bet to increase the share for

business and investors. The Carter administration says it is

Ready reference, guide for anxious watchers awaiting smoke signals

By HUGH A. MULLIGAN

VATICAN CITY (AP) - Ready reference and handy historical guide for armchair Vaticanisti waiting for the smoke signals from the conclave beginning Friday to elect a successor to Pope Paul VI:

Conclaves — from the Latim cum clave, with key - began in 1216 when Roman crowds grew tired of waiting for the election of Honorius III and locked the cardinals inside the papal palace to hurry them along. The longest recorded conclave lasted two years, nine months and three days before choosing Gregory X in 1272. Adrian Florenz of Utrecht, in the Netherlands, who became Adrian VI in 1522, was the last non-Italian cho-

Angelo Roncalli was 77 when he became John XXIII in 1958, the first pope in more than two centuries over

Benedict IX, in 1032, is the youngest pope on record. Some scholars say he was 12, others 30. Both his uncles were popes and he disgraced himself by selling the office to his godfather.

Marcellus II, elected in 1555, was the last pope to keep his baptismal name. In the early church, most popes used their own names. The custom of choosing another name was firmly established with the election in

Crystal City revisited: LoVaca to suspend gas

AUSTIN, Texas (AP) - Faced with a potential "Crystal City situation," Lo-Vaca Gathering Co. says it will suspend gas deliveries to Pearsall in 30 days unless the city pays \$108,343 in back bills.

But even while Lo-Vaca vice-president Don Newquist was briefing reporters Monday, a break in the dead-lock between the company and the small South Texas town developed.

Near the end of the news conference, a telephoned message arrived

Miss Texas U.S.A. plans work in oil

EL PASO, Texas (AP) - A business and geology student who says she plans to work in the oil industry resented Harris County to become Miss Texas-USA in the annual pageant in El Paso.

Anne Hinnant, a student at Trinity University in San Antonio, will compete in the Miss USA pageant in Biloxi, Miss., next May. The winner of that pageant will travel to Perth, Australia, to compete for the title of Miss Universe.

First runner up in the Monday night contest was Bevelyn Pierce, Miss Clear Lake City. Miss Pierce will enter Southern Methodist University this fall to study fashion merchandising and dance.

Second runner up in the contest, Fran Ford, also won the Miss Swimsuit competition. A business student at the University of Texas at El Paso, she entered the pageant as Miss El that Pearsall wanted to negotiate and make a partial payment. Like Crystal City, Pearsall owns

and operates the natural gas system within its city limits. Newquist said the company doesn't

want "another Crystal City situation on our hands" and urged Pearsall to pay up before the debt gets bigger. While he was talking, a Capitol

employee brought in a note, and a company public relations man went to the telephone. He returned moments later with word that Pearsall city secretary Martin Garcia had requested a Sept. 6 meeting with Lo-Vaca and would bring a partial pay-Lo-Vaca cut off Crystal City's gas

last year after the town failed to pay \$800,000 in past-due bills. Service has not been restored. Newquist said Pearsall has given no reasons why it was withholding

payment for February, March, May and June. He said as far as he knew, Pearsall was charging its gas custom ers the proper rate - a big difference from the Crystal City situation. Crystal City had charged its cus-tomers a far lower rate, pegged to a

contract signed with Lo-Vaca before the railroad commission allowed a floating rate. Newquist said Lo-Vaca feared Pearsall was going to attempt to tie the past-due bills to its federal court

suit to biock implementation of the settlement of \$1.6 billion of customer claims against the company.
"The settlement doesn't have any

thing to do with it," he said. The Texas Railroad Commission recently approved the settlement, and Newquist said he expects it to go into effect Jan. 1 unless blocked by a court or federal agencies that also must approve it.

1009 of Sergius IV, who was born Peter Bocca Porci, or Peter Pig's Popes have been chosen by a two-

thirds majority vote of the conclave since 1274. The choice is not limited to cardi-

nals; any male who has "no just impediment" is eligible. But Urban VI. elected exactly six centuries ago, was the last non-cardinal to be chosen. He was bishop of Bari.

Some conclaves were also not so fussy about impediments. Julius II (1503-13), the patron of Michelangelo who commissioned the frescos in the Sistine Chapel, had three children. Alexander VI, the most scandalous of the Borgias, fathered at least five children, including Lucrezia.

The average age of the 111 cardinals who will enter the conclave area in the Borgia apartments on Friday evening is 66. They include 27 Italians, the fewest ever; eight Americans, the most ever; 12 Africans, nine Asians and 29 from the rest of Eu-One third of the world's Catholics

Reinvestment plan has appeal for all

By CHET CURRIER

NEW YORK (AP) - Increasing numbers of American companies and their shareholders are taking part in a type of program that seems to have appeal for all concerned — the dividend reinvest-

For the companies, faced with a sluggish market for sales of new stock, these plans provide a means of raising capital.

A prime example is American Telephone & Telegraph, the nation's most widely held corporation with close to 3 million shareowners, which reports that it raised \$1 billion through its dividend-reinvestment program in 1976-77, and expects to see another

For the investor, meanwhile, these optional plans typically offer a savings on the usual brokerage commissions. And recently some companies have added an extra feature, allowing the investor to buy stock at a 5 percent discount from the going market price.
Stockholders join such a plan by signing an agreement with the corporation authorizing it to invest all

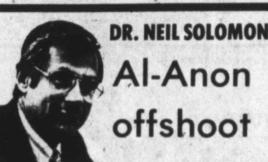

their dividends in additional shares rather than sending them the payouts in cash.

In a good many cases, they can also periodically invest additional money through the plan. Like most "new ideas," this one has actually been around for a long time. Many mutual funds have

offered automatic reinvestment programs for But as Robert Ferris, senior staff executive at the New York firm of Georgeson & Co., which specializes in investor relations, points out, it is only in the last

two to five years that the concept has caught on with "We've really just broken the ice so far," Ferris

Robert S. Salomon Jr., head of stock research at the investment firm of Salomon Brothers, estimated in a recent report that some 900 companies now have some sort of dividend reinvestment plan. Of these, the firm counted 43 that offer the 5 percent discount - about twice as many as there were a year ago.

Dear Dr. Solomon: Do you know anything about Al-Anon? Is it part of Alcoholics Anonymous or a different organization? And just exactly what does it

Dear X: Al-Anon is an offshoot of Alcoholics Anonymous. It has the same basic structure, but it is a completely separate organization.

Al-Anon serves the relatives and friends of alcoholics through informal group discussions. The point is to meet others who share similar problems, learn the facts about alcoholism, counter the despair that so often hangs over the family of someone afflicted with this disease, and rebuild self-confidence.

A provides information and assistance whether or not the alcoholic seeks help or even recognizes the existence of a drinking problem.

Alcoholism, as we know too well, affects not only the alcoholic but also his or her family and group of friends. In this sense, it is a family and social disease, and not merely an individual one. Al-Anon's approach is based to a large extent on this fact.

As in Alcoholics Anonymous, members are expected to respect the anonymity of other members and not to relay confidences outside of the group meetings. Also as in AA, the spiritual dimension of life is acknowledged but discussion of specific faiths

At the group sessions, anyone is free to express an opinion or ask a question upon being recognized by the chairman. And those who would rather just sit and listem are free to do so. Some groups choose a chairman for several months, while others invite a different member to preside over each meeting. Contributions are voluntary, and are used to buy Al-Anon pamphlets for free distribution, to pay for the meeting place, and to make contributions

periodically to Al-Anon headquarters in New York. There is also a junior branch of Al-Anon called Alateen. It is for the children of alcoholics-and helps them face this difficult problem and avoid the bitterness that is often engendered by it.

According to the last figures I have seen, there are 10,000 Al-Anon groups active in this country and elsewhere. If you are interested, check your local phone book. Or write Al-Anon Family Group Headquarters, 115 E 23, New York, N.Y. 10010. Dear Dr. Solomon: What are the complications of measles?—Mrs. C.D.

Dear Mrs. C.D.: Common complications include ear infections and pneumonia. Encephalitis or inflammation of the brain occurs in 1 case in 1,000 and may result in convulsions, mental retardation or (If you have a medical problem, see your doctor. If

♣ Q 10 9

♣J7643

East takes the ace of spades and sees that West has not led from six spades headed by K-J-10 since then South could have only 14 points in high cards for his vulnerable notrump bid.

Since there is no way to defeat the contract with the spades East must concentrate on killing dummy's diamonds. After taking the ace of spades, East must return a club to remove one of the side entries to the diamonds.

Declarer takes dummy's king of clubs and returns a diamond. East takes the first or second diamond and returns another club to remove dummy's other entry.

REFUSES DIAMOND

Then East makes sure to refuse one diamond trick. When East finally takes his second diamond trick, South is out of diamonds and dummy has no side entries.

Deprived of the diamonds, South cannot make enough tricks to score game. Declarer gets two spades, two hearts, one diamond and three clubs.

DAILY QUESTION

Partner opens with 1 NT (16 to 18 points), and the next player passes. You hold: S-J10986; H-J943; D-5; C-852. What do you say?

ANSWER: Bid two spades. Partner will pass unless he has 18 points and a good fit for spades. You expect to be safer at two spades than partner would be at one notrump.

Vietnam facing problems Lee High School's of hunger, population

WASHINGTON (AP) - A government mission is telling Congress the United States should establish diplomatic relations with Vietnam not only because it would be in this country's best interest but also for humanitarian reasons.

The mission was ready to report today that Vietnam faces severe problems of hunger and overpopulation and needs American aid.

"Famine is too drastic a term," said Dr. Jean Mayer, head of the mission which spent a week in Vietnam. "But the food problems are severe and could rapidly become critical if the weather doesn't stay opti-

Mayer, vice chairman of the President's Commission on World Hunger. led a four-member mission to Vietnam at the request of Sen. Edward Kennedy, D-Mass., and the Senate Judiciary Committee which will receive the report.

The mission succeeded earlier this month in bringing back 28 persons stranded in Vietnam since 1975 — to be reunited with American relatives. Mayer, a nutritionist who is presi-

Gulf Oil Corp. No. 2 G. C. Westervelt has been completed as a small pumping discovery to open a Bell Camnyon pay in the Waha, West (Delaware) field of Reeves County.

Operator reported a daily pumping potential of 16 barrels of 38.8-gravity oil, plus 102 barrels of water, through perforations from 5,084 to 5,098 feet. Gas-oil ratio is 500-1.

The pay section was fractured with 10,760 gallons. Total depth is 6,710 feet and 5.5-inch casing is set one foot off bottom. The

plugged back depth is 5,230 feet. The Lamar was topped at 5,030 feet, the Bell Canyon at 5,074 feet and the Cherry Canyon at 5,918 feet. Eleva-tion at ground level is 2,641 feet. Wellsite is 660 feet from south and

1,980 feet from east lines of section 9, block C-4, psl survey and 17 miles southeast of Pecos.

Exploration Geophysicists convenes. Mofre than 25 technical sessions will be presented ruing the meeting, Oct. 29-Nov.2, dealing with the broad role of geophysicis in oil and mineral exploration throughout the world.

A special panel session of the SEG conference will discuss the public's perception of the energy indusgtry and the industry's role in communication through the media. This Public Affairs Session, scheduled Oct. 29. will include representatives from oil and mineral companies, universities, government and the media.

The annual meeting general chairman, in charge of directing organization of the four-day conference, is L. C. Lawyer, with Chevron, U.S.A. in San Francisco.

Other principles on the annual meeting Steering Committee are: Norman P. Jokerst, with Chevron Overseas Petroleum general vice chairman; Walter R. Fillippone, Union Oil Co. of California, Technical Program chairman; Robert H. Brune, U. S,. Geophysical Survey, arrangements chairman; Robdert W, Mertz, Sohio Petroleum Co., entertainment chairman, and Colleen Sil-

cox, ladies program chairman. More than 6,000 delegates and their spouses are expected to attend the annual meeting and exhibition, according to Lawyer.

Keck said the organizational changes are designed to broaden the management team and its areas of responsibility. "The board's action further recognizes the contribution these men are making to Superior's continuing improved performance,"

Reid joined Shyperior in 1972 as a vice president, and as president of Superior Oil International. He has more than 22 years experience in exploration, production, financial planning and mining.

Reid has been a senior vice president since 1972, with responsibility for domestic and foreign exploration, mining, oil shale, purchasing and management information systems. He joined Superior from Trunkline Gas Co. where he was executive vice president and a director. Prior to that, he was manager of the Oil and

Gas Division of the Cabot Corp. Reid earned a degree in Petroleum Engineering and Geology from Louisiana State University. He played football with the Los Angeles Rams and then joined Shell Oil Co. as an exploitation engineer. He has an MBA

degree from Harvard University. He is a director of Falconbridge Nickel Mines, Ltd.; First City National Bank of Houston, Greenway Bank and Trust of Houston and Southwestern Group Financial.

Barney joined Superior in 1975 as vice president of production with responsibility for Superior's worldwide drilling and producing operations. He had been with Mobil Oil since 1949 in a variety of managerial positions including posts in Canada and Germany, in addition to those at New York headquarters.

Barney had management responsibility in the areas of planning and acquisitions, and he was corporate production manager when he left

He received a degree in petroleum engineering from Louisiana State University and served in the Navy. He is a direcgtor of Tejon Ranch Co. and Canadian Superior Oil, Ltd.

Hirsch joined Superior in 1976as vice president-Exploration after 20 years with Mobil Oil where he was involved in oil and gas exploration and related functions. He worked also in financial planning and held exploration management positions with responsibility for full-cuycle exploration programs in large geographic

69 strikes completed

AUSTIN, Texas (AP) - Wildcatters made 18 oil discoveries and succeeded at 51 gas wells between Aug. 1-15, the Texas Railroad Commission said Monday.

The commission's oil and gas division also 366 oil completions in the first half of August, compared to 295 last year. There were 203 gas completions in the 1978 period against 124 last

Between Aug. 1-15, 120 exploratory and field tests wound up as dry

Subcommittee told Alaska oil should stay in U.S.

By BRUCE ADAMS

SAN FRANCISCO (AP) — Surplus crude oil from Alaska and California should be distributed in the United States rather than exported, a congressional subcommittee was told

But before the surplus domestic oil can be used here, federal regulations must be eased to encourage oil companies to refine the low-quality crude and the pricing structure most be

ENERGY

modified, the committee was told. Rep. Harold Runnells, D-New Mex., chairman of the subcommittee on special investigations of the House Committee on Interior and Insular Affairs, said two days of hearings here were aimed at finding a solution

to the surplus crude oil problem. Solutions could include exchanging or exporting crude oil to Japan, he

Gov. Edmund G. Brown Jr. said the state had a 12 billion-barrel oil reserve but producers were "unable to get those barrels to market because

of misguided federal policies.' Brown said pricing policies and Department of Energy entitlements kept the cost of West Coast oil artificially high and discouraged refiners from modifying their equipment to handle the heavy and sulfur-rich West Coast

He said the entitlements were the "craziest, most complicated set of rules" he had encountered.

Rep. Stewart B. McKinney, R-Conn., said the entitlement program was needed to ensure that the East Coast received oil, but he termed the program "rinkydink, trapezoidal and a monstrosity that nobody under-

McKinney urged that West Coast crude be kept in this country, contrary to what he said were the wishes of the oil industry. "Contrary to their claims, Alaskan North Slope producers have since 1969 been pursuing plans to export Alaskan oil and have

hampered, rather than cooperated in, plans to deliver the oil to the lower 48 states.'

He asked for a federal energy policy that would realign commercial interests with those of the nation... to ensure that the long-awaited Alaskan oil is used where it is so desperately needed - the domestic market."

The subcommittee's ranking minority member, Rep. Don H. Clausen,

R-Calif., said the problem of surplus oil was temporary because the planned opening of the Sohio pipeline from Long Beach, Calif., to Midland, Tex., in three to four years would ease distribution problems.

"The pipeline will effectively re-lieve the West Coast of its locally unrefinable oil and supply the rest of the country with needed energy," he

Electric utilities speak out against regultions

WASHINGTON (AP) - Electric utilities spoke out sharply Monday against proposed governmental regulations designed to restrict the use of PCBs, a hazardous chemical often used to insulate electrical equip-

William C. Gerstner, executive vice president of Illinois Power Company and the chairman of the Electric Utility PCB Task Force, estimated it would cost the power industry \$4.5 billion to control 400,000 pounds of PCBs found in transformers.

By comparison, Gerstner said, the proposed regulations would exempt some 180 million pounds of PCBs contained in concentrated small sources such as home appliances.

Gerstner's comments came at an **Environmental Protection Agency** hearing on proposals to ban the manufacture and use of PCBs, and to prohibit the servicing and replacement of equipment with parts containing PCBs.

PCB is the common name given to polychlorinated biphenyls, which are believed capable of causing cancer, birth defects, and liver, nerve and skin damage to humans.

The most serious problem facing utilities concerns transformers, which sometimes are filled with mineral oil contaminated with small

N.J. Melton of the Duke Power Co. in Charlotte, N.C., said tests show that up to 32 percent of the utility's 418,000 transformers may contain mineral oil with PCB concentrations above 50 parts per million, with the total amount of PCBs estimated at

To comply with the complex proposals to insure the safe disposal of the PCBs, he said, would cost Duke Power a minimum of \$42 million.
