Camp David talks bring Sadat, Begin face-to-face

CAMP DAVID, Md. (AP) - Anwar Sadat and Menachem Begin are talking face-to-face for the first time since Christmas, but President Carter is sealing their words at the Mideast summit in secrecy.

METRO EDITION

Carter brought the Egyptian president and Israel's prime minister together for nearly two hours Wednesday afternoon on a flagstone patio behind Carter's mountaintop lodge.

But there was no word on any progress nor was there an announcement of today's schedule. The main sticking points involve control of the Gaza Strip and the West Bank of the Jordan River, lands Israel captured in the 1967 war

Jody Powell, the White House press secretary and official summit spokesman, told reporters not to expect any substantive announcement until later in the meetings - which could contin-

"We'are not going to be involved on a daily basis in attempting to characterize or discuss the substance of the

meetings," Powell said. As Carter arrived Monday, he said the participants "will be almost uniquely isolated from the press and from the outside world."

The president said he hoped the secrecy would remove any need for Sadat or Begin to engage in "political

After the talks, Carter, Begin and their wives hiked through the 134-acre wooded retreat for more than an hour. Mrs. Begin had arrived early in the afternoon, as had Carter's 28year-old son, Chip.

Sadat, who grew up on a farm, took a 45-minute drive around the rolling Maryland countryside, dotted with picture postcard farms. An official said Sadat, whose wife is in Paris tending to a sick grandchild, had never seen this part of the United

Powell had no comment on the first joint session, but said Carter's meetings with Sadat earlier Wednesday and with Begin on Tuesday were in-

"The style and tone has been quite informal," Powell said. All three government chiefs were in casual clothes, he said. Official photos of the first joint meeting, however, showed only Carter in sports clothes.

The president's intervention marks the first time an American chief executive has met simultaneously with Israeli and Egyptian chiefs of state in hopes of settling the decades-old conflict in the Mideast.

Egyptian President Anwar Sadat, left, President Carter and Israeli Prime Minister Menachem Begin share a lighter moment Wednesday at Camp

David, Maryland, during the crucial three-power conference attempting to devise a Mideast peace

Tight budgets spark consideration of park land dedication ordinance

R-T Staff Writer

Lack of funds for park land acquisition has caused some Midland city officials to consider the merits of an ordinance which, if passed, would require developers to dedicate land for public recreational areas.

Under the city's subdivision ordinance, developers are required to reserve a tract of land for a 12-month period in which the city has the option to purchase the property for park

purposes. However, several city officials say the ordinance has not proved effective in helping Midland meet its recreational needs as the city undergoes a period of tremendous growth.

Wayne Kohout, chairman of the Parks and Recreation Commission, told the Planning and Zoning Commission Wednesday it should advise the City Council to study a possible land dedication ordinance - or risk paying higher prices for park land in the future.

The Planning and Zoning Commission has scheduled a special session with parks and recreation commissioners and the Department of Public Works for 3 p.m. Oct. 2 to discuss alternatives in park planning.

"The process of obtaining park land exists (in Midland), but it really has not been effective in the recent past because the funds have not been available to purchase land," said Ri-chard A. Hennessy, director of planning and community developmen

Hennessy told The Reporter-Telegram acquiring land through a mandatory dedication process is an alternative city officials are considering, but that that process would have to be researched by attorneys before it could be adopted.

"It's an important question to be answered due to the rapid growth now. Because of the rapid growth, there may be no park facilities available in some areas unless plans are made to set the land aside," he said.

The city already has an elaborate master park plan, according to Ro-bert Truitt, Planning and Zoning Commission's new chairman.

But under the current circum-(Continued on Page 2A)

Clements urges teacher pay hikes, 'real discipline' in Texas schools

Bill Clements, Republican candidate for governor, Wednesday called for teacher salaries commensurate with those in other state agencies for persons of equal qualifications.

Speaking at a press conference at Midland Regional Airport, Clements outlined his plan for improving public school education.

His salary proposal, he said, would increase state salaries for a beginning teacher by \$50 to \$60 a month. Clements also called for stiffer qualifications for teacher certifica-

tion and education degrees at state

universities. Formation of faculty senates in schools as a "communications device" and standardized textbooks and testing are other elements of Clem-

"Real discipline" also is needed in the schools, he added.

Asked where he would cut state bureaucracy, Clements said he would start with the attorney general's of-fice, which he called the "fastest growing piece of bureaucracy in Austin." Attorney General John Hill is the Democratic gubernatorial nominee. Clements also called for cuts in the Department of Human Resources (formerly the Department of Public

Welfare) budget. Clements called his summer campaigning efforts a "huge success." He has organizations in approximately 230 of Texas' 254 counties, he said, with 130 of those county organizations headed by former Briscoe sup-

The candidate said he expects to raise between \$1.5 and \$2 million of

his \$3.5 million campaign budget at a \$1,000-a-plate fundraising dinner next week at which former President Gerald Ford and former California Gov. Ronald Reagan are scheduled to

Clements expressed support for the tax relief constitutional amendment which will appear on the November general election ballot, but criticized the Texas Legislature for not going

He called for a "taxpayers bill of rights," which would include provisions for initiative and binding referendum, a ban on personal or corporate state income taxes, a requirement for tax bills to be approved by a two-thirds majority of both houses of the Legislature and a provision to allow local taxpayers to call elections to ratify or reject tax increases by

local taxing bodies. He said he is "positive" the people of Texas would approve the initiative and referendum proposal and pro mised, if elected, to push for it in a constitutional amendment during the next session of the Legislature.

On issue of energy, Clements said he is opposed to the U.S. House-Senate conference committee compromise on natural gas pricing. He called the bill "probably the biggest tax bill ever put forth."

The way to solve energy problems is to "unfetter" energy-producing industries, Clements said. In the short term, he said, the solution is increased petroleum production. For the latter part of the 20th century, coal use needs to be increased.

The candidate said he has "reason to believe" the federal government will establish a nuclear waste disposal site at White Sands, N.M. The Department of Energy currently is proposing an area near Carlsbad, N.M., as the disposal site.

Clements said he sees no problem with transporting nuclear materials across Texas. It is "not unusual to transport nuclear material. We've been doing it for years," he said.

U.S. Senate race hinging on baseball

By LARRY MARGASAK

WASHINGTON (AP) -"Baseball Bill" Holdforth has never forgiven Bob Short for moving the Washington Senators to Texas. Now comes Holdforth's revenge: an attempt to derail Short's Minnesota race for the U.S. Senate.

After strategy sessions at which more than a few beers were consumed, the 27-year-old bartender and four friends formed "The Committee to Keep Bob Short Out of Washing-

The committee held its initial effort Wednesday night: a beer bust to pay for an ad in Sunday's Minneapolis Tribune, urging Minnesota voters not to support

Holdforth said about 250 people paid \$10 each to raise most of the the \$2,700 cost of the halfpage ad and others who couldn't show up to drink made contributions. The rest came from auctioning the original copy of the ad, he sai.

This is the same "Baseball Bill" - he says exactly how and when he picked up the nickname is a long and murky story - who draped a stuffed dummy of Short over the railing at Robert F. Kennedy Stadium in 1971 during one of the Senators' last games in Washington. That cost him his job as a stadium usher. He later paraded the dummy through the stands to the cheers of downcast fans.

Washington newspaper stories say he doused Short with beer when the owner brought his Texas Ranger team to Baltimore in 1972. Holdforth claims he arrived at Short's box just after the incident, and contends he would not have wasted good beer on the man who ended 71 years of baseball tradition in Washington.

Short, the former Senators' owner, is battling Rep. Donald M. Fraser for the Democratic-Farmer-Labor Party nomination for the Senate in Tuesday's Minnesota primary.

The general election winner will fill the remaining four years of the late Sen. Hubert H. Humphrey's term. Humphrey's widow, Muriel, appointed to

If there's ever a time when fatalism needs no excuse, it's war time. Ideally, you do your duty, survive, come out unscathed and are wel-

comed home an unsung hero. If you like fanfare, let the confetti descend on you like snow, bow humbly as your pride exudes, behold your medals and ribbons and salute

Your deeds, for naught or gain, in time will be forgotten by most. And only the Unknown Soldier will be remembered for deeds untold and suffering unknown.

Fatalism can be talked about so comfortably when there's no real threat. It's something like philosophical discourse and debate; they suddenly transform into luxuries when your life becomes one of desperation and is jeopardized by famine, war, injury, disease or the mere passing

of time.

Soldiers joke about the threat of death. Sometimes the GI Joe jokester is just as serious as the Sad Sack in the foxhole, the wounded Johnny on the litter and the dying warrior on

The light side of the death threat is evident in the reprint of a 1944 booklet on the World War II Army Air Base at Pyote. This base, which was for training B-17 and B-29 bomber crews, was popularly known as Rattlesnake Bomber Base. Captioned below photographs of

succeed her husband, is not running.

"You people of the great state of Minnesota must make a decision," the ad says. "Bob Short held our trust for three years (as Senators owner) and we were 'Short-changed.' So before you vote Tuesday please consider these facts about Bob Short as we know him. Consider what he promised us, then what he

The ad then lists quotes from Short, such as "I did not buy the team to move it," and the com-mittee response: "Three years later he moved the team." Short's campaign manager,

Fred Gates, said in a telephone interview, "The campaign is talking about inflation and taxes. We're speaking on issues, not the Washington Senators baseball club."

Holdforth says he is ignorant of the ins and outs of politics, and that he obtained the required forms to report campaign spending only on the advice of congressional staffers

who drink at his bar. He showed up at the Federal **Election Commission in his blue** and gray rugby shirt - "I wasn't the typical looking committee chairman" - and had trouble making commission staffers understand that his committee had no candidate of

Couple injured in eighth bombing

By ANNE PERRY

SPEEDWAY, Ind. (AP) - The bomber "has got to be caught," says a friend of the man and woman injured in the eighth explosion to rock this central Indiana community in six days. But police say they have no suspects and know of no motive.

Wednesday night, for the first time. a bomb exploded where people were present, in the parking lot of Speedway High School just four blocks from the Indianapolis Motor Speedway.

Carl David DeLong and his wife,

Sandy, both 39, were injured as they waited for their son, Steve, to shower after a freshman football game.

The bomb was believed placed in a paper bag and DeLong may have kicked the bag, setting it off, officials said. He was in critical condition today at Wishard Memorial Hospital where doctors said he might lose half his right leg. Mrs. DeLong was in fair

Snyder, 37, a friend of DeLong and one of an estimated 200 persons who attended the game. "The bomber has been lucky before tonight and nobody's been hurt. That person has got to be caught."

A group of businessmen prepared to offer a reward today for information

condition. "I knew something like this was bound to happen," said Marlin

about the bomber.

Authorities theorize the bombings are the work of one person.

The device in each case was composed of a six-volt battery, a cooking timer, gunpowder packed tightly in a 12-ounce beverage can wrapped in a towel and a coil, believed to be part of a timer.

The first four explosions came Friday night, starting about 10 p.m., and early Saturday. A car was damaged and plate windows were shattered. One of the Saturday bombs was set outside the high school.

Two more blasts went off Sunday at a bowling alley, the first again coming at 10 p.m. The seventh exploded

about the same time Tuesday night, wrecking the unoccupied car of an off-duty policeman outside an apart-

ment complex. Because no people had been endangered before, police originally theorized the explosions were part of

a prank. Agents of the Treasury Department's Bureau of Alcohol, Tobacco and Firearms were called in after the first four bombings, assistant U.S. Attorney Bernard Pylitt said.

On Wednesday, the ATF and local police began referring reporters' questions to the office of U.S. Attorney Virginia Dill McCarty, who is assisting in the investigation.

Officials considering park land ordinance

(Continued from Page 1A)

stances, the city is unable to provide neighborhood recreational services in Midland's growing northwest section, he said.

Kohout said the practice of taking land from developers for recreational park purposes is constitutional in some states, but unconstitutional in others. Although the practice has been invoked by several Texas cities, a test case of its legality currently is before the state Supreme Court, he added.

"It's really all a matter of philoso-phy," said Kohout.
"Texas has looked upon land as

owners' domain. That is why we don't have very strong dedication laws."

Kohout said the city's subdivision ordinance providing for reservation of potential park land is useless without the funds available to purchase

He added that a mandatory dedication ordinance would actually be ineq-

Repair of 30 homes authorized

The Midland Commission for Local Community Development to date has spent or committed \$81,896 to repair 30 homes, Midland Housing Authority commissioners were told

Mrs. August Wenck, commissioner, reported to other members that the average cost of homes thus far repaired is \$2,730. Five more houses have been approved for repairs. The Commission for Local Community Development has another \$17,354 in contributions available for other

Also Wednesday, the Housing Authority, on recommendation of its inspecting architect, approved final payment to the builder of Hillcrest Manor. Inspecting architect Jimmie E.

Leath told authority commissioners all of the necessary corrective action has been taken. Commissioner Smith Ray voted against authorizing the payment until a test can be made of repairs to eliminate leaks. The commissioners also approved a

list of charges for repairs, other than routine maintenance, in Hillcrest Manor apartments.

uitable unless it would compet aii developers in the community to share the cost of providing recreational

In some instances in which the developer would be required to dedicate a certain percentage of his land for recreation, the land would not be usable unless a large tract was involved, he added.

"In this type of situation, some developers would get away without giving up anything while others would have to pay a penalty," Kohout said.

"Mandatory dedication with a feein-lieu-of clause would be more equitable. The developer could set aside money for development of recreational park land instead of providing the

"If you don't leave the option for cash in lieu of land, you could wind up with a bunch of property that you have no use for," Kohout said.

Midland is "hurting" for future park land in the city's developing areas, particularly in the northwest and northeast sections, according to Kohout "We need to get it in the most

prudent way possible, otherwise we're going to go miles and miles and not obtain the land we need," he Hennessy believes the city is capable of acquiring park land without

requiring developers to dedicate some of their land. "The council, due to other priorities, has not seen fit to provide funds

for land acquisition," he said. "If the council felt it was timely, it

could just as easily provide funds for parks," Hennessy said.

In the Wednesday session that lasted nearly five hours, the Planning and Zoning Commission designated land in the Air Park property at the southwest corner of Wadley Avenue and A Street as a recreational park area.

The commission also approved the preliminary plat of the Skyline Terrace Shopping Center at Midkiff and The commission elected Truitt as

chairman and John Phipps as vice chairman. New members on the panel include Robert Southerland, Mrs. William Sumner and Steve Drum-

By SUSAN STOLER

AUSTIN, Texas (AP) - Only time will tell whether a 5.2 percent average increase in automobile insurance rates will forestall another hike next year, an industry spokesman says.

"I'm guardedly optimistic," said David Irons of the Texas Automobile Insurance Service Office. He commented after the State Insurance Board Wednesday approved the first

auto insurance rate hike in two years. "Of course, any time we're adjusting rates, we're paying for losses two

years in the future," he said. "Only time will tell. The industry had asked for a \$125

million, 10.7 percent rate increase for private and commercial vehicles. The board instead approved a staff recommendation which includes a 3.2 percent average increase in personal car premiums. The new rates take effect Nov. 1.

Although the industry will receive less than half its requested income

'Survival main concern (Continued from Page 1A)

other day mentioned that survival. not the cause involved, is the immediate concern in the death struggle on the battlefield. The cause may get you there and build up morale, but the will to survive may be the saving force. Driggs was talking about the "de

vastating" effect of the .50-caliber machine gun fired by a sniper. Fitted with a scope, the weapon can be accurate up to 1,500 meters. "Snipers are an important thing in wartime," he said. "I know it's a grisly business...But it's a matter of survival. It's not a matter of winning

for Uncle Sam, but a matter of surviv-And in the survival process, perhaps "The Cause" ultimately will have been served.

increase, Irons said he was pleased with the board's action.

"I'm very, very pleased that for the first time in two years, we do have a rate adjustment," he said. The last increase in automobile in-

surance rates was October 1976, when a 7.1 percent hike took effect after a 15.5 jump the previous January. Texans will pay a total of \$35 million more annually for private pas-

senger automobile insurance, while commercial premiums will go up \$27 Actual premiums will vary across the state, ranging from a \$17 increase

for a typical driver in Jefferson County to a \$15 cut in Kaufman County. The "typical driver" is over 25 and owns a Ford, Cheverolet or Plymouth. which is driven to work, but not used in business. His or her coverage consists of \$50-

deductible comprehensive; \$200-deductible collision; no-fault Personal Injury Protection, with basic liability of \$10,000 per person and \$20,000 per accident for injuries and \$5,000 for property damage.

Motorists face premiums hike

Austin Bureau

AUSTIN - If there is a such thing as an "average" Midland County motorist, he will face a \$7 increase in auto premium rates.

That amounts to a change of 2.6 per-

The new rates take affect Nov. 1, and are the first statewide change in auto premiums in two years.

The change was included in the decision of the State Insurance Board to approve a 3.2 percent average statewide increase in private auto

In establishing such rates, an "average" motorist is defined as driving a 1978 medium-priced Ford, Chevrolet or Plymouth, not for businesses, and with no mail operators under the age of 25.

duced by Safeway Stores Inc. in Midland. Gene Podoll, El Paso Division retail operations manager takes a look Wednesday at the Scotch Buy generic brand pears in comparision to the higher priced national brand of peaches. (Staff Photo)

Safeway introducing line of low-cost generic foods

In an effort to fight the increasing price of foods, Safeway Stores Inc., has announced that it is introducing a new line of generic foods that could save consumers up to 28 percent of their food bill for those foods.

Company officials in Midland Wednesday said that the Scotch Buy brand is being introduced into Safeway stores throughout the United

Gene Podoll, Safeway El Paso Division Retail Operations Manager, said "we think it's going to have a tremdous impact" on food prices for con-

He said Safeway will be introducing 33 items in the initial phase of the marketing, and he expressed hopes that the items would expand to frozen

foods and items throughout the store

Officials had drawn up a list with 17 items and compared Safeway's Scotch Buy brand with its own house brand and a national brand name

The national brands totaled \$16.46, while the Scotch Buy brand came to \$11.73, the comparison list showed.

The differences between extra fancy and good, Podoll said, was that extra fancy foods must all be of uniform shape, color and size, while the good grade of the Scotch Buy brand may have slight variations in its shape, color or size.

Podoll said the nutritional value of the Scotch Buy brand may be slightly less than the national brand, but the

WASHINGTON (AP) - President Carter faced the first possible rebuke of his veto power today as the House neared a showdown vote on whether to authorize construction of a \$2 billion nuclear-powered aircraft carrier over his objection.

Both opponents and supporters of the carrier claimed to have enough support to carry the vote, expected about midday.

Carter vetoed the \$37 billion defense

Indian Summer visiting Basin

Summer seems to have turned to Indian Summer this week in the Permian Basin, and the relatively cool weather is expected to continue at least through Friday.

Some rain fell in the area Wednes-

day with the National Weather Service at Midland Regional Airport recording .01 inch.

The weatherman lists a chance of showers and thundershowers in the Midland area through Friday, with the possibility of a few locally heavy showers late this afternoon and early tonight. Chance of rain is 40 percent tonight and 20 percent Friday, according to the Weather Service.

Otherwise, mostly cloudy and mild weather is expected through Friday with a low tonight in the mid-60s and a high Friday in the low 80s.

Southeasterly winds at 8 to 10 mph are predicted for tonight.

Partly cloudy and cool weather was reported this morning throughout the Permian Basin.

authorization bill featuring the nuclear carrier Aug. 17, describing the carrier as wasteful at the expense of other, more vital defense projects.

Although the chairmen of both the House and Senate Armed Services committees joined the intensive drive to override the president, Speaker Thomas P. O'Neill and other House Democratic leaders stood by Carter and predicted he would be sustained by a narrow margin.

Carter's veto was the fifth of his presidency and the first to draw an attempt to override, which requires a two-thirds vote in both houses.

It was also the first veto of a major defense program in modern history, triggering protests from many that Carter was interfering with the constitutional duty of Congress "to make rules for the government ... of the land and naval forces."

Crawford gets suspended sentence; Eyes now on trial in New Jersey

By HARRY DUNPHY

MOSCOW (AP) - Soviet Judge Lev Mironov convicted U.S. businessman Francis J. Crawford today of buying rubles on the black market and gave him the five-year suspended sentence requested by prosecutors.

Normally conviction and a suspended sentence would be followed by an order expelling the 37-year-old American from the country. But it was assumed Crawford would be kept here until after the espionage trial in New Jersey of two Soviet U.N. employees and exchanged for them.

Selection of the jury for the trial of the two Russians was delayed in Newark Tuesday until Sept. 27, after Soviet Foreign Minister Andrei Gromyko's annual visit to the United States for the opening of the U.N. General Assembly and talks with U.S. officials. There has been no indication how long the trial will last.

"The court considers that all the cases were proved and all the defen-dants are guilty," Mironov said. "Crawford's guilt was proved without

He put the American on probation for three years, meaning that the conviction would be removed from his record after that time if he commits no other crimes.

He added that the 500 rubles confiscated when Crawford was arrested would be retained by the Soviet state because they were earned in a crimi-

"I'm very disappointed not to be acquitted," said Crawford as he emerged smiling from the courthouse with his fiancee, Virginia Olbrish, a secretary at the U.S. Embassy.

"I thought there was a definite possibility that I would be acquitted because of the way the evidence stacked up," said Crawford, who was wearing a brown three-piece suit, brown lizard cowboy boots and a loud tie.

Although Crawford was liable to a maximum sentence of eight years, prosecutor Mikhail Ilyukhin asked Wednesday for a five-year suspended sentence. He explained that it was the defendant's first offense and he had grown up "in a different country with different customs and way of life." He

also said International Harvester, Crawford's employer, helped improve U.S.-Soviet relations.

Crawford in his final statement to the court asked the judge to find him innocent.

"A company of our size and financial position would have no reason to engage in illegal currency transactions, nor, being an executive of the company, would I," he declared.

He repeated his charges earlier in the trial that some of the documents introduced by the prosecution were frauds or forgeries and that the chief witnesses against him — three Russian co-defendants who pleaded guilty

"Surely with this much doubt and contradiction in the statements presented, the court cannot find me guilty," Crawford said.

His Soviet attorney, Leonid M.

Popov, told the judge there were "serious flaws" in the prosecutor's case, and "many questions remain up in

the air." "We, as the defense, insist that he should be acquitted," Popov said.

The prosecutor asked for five years in a strict labor camp for Vladimir Kiselev, the chief co-defendant who admitted selling black market currency and contraband to a number of foreigners; a five-year suspended sentence for his wife, Ludmila, and a four-year labor camp sentence for Alla Solovyova, a cashier in a souvenir shop who said she sold currency to

Crawford, a native of Mobile, Ala., was accused of buying 20,000 rubles from Kiselev for \$8,320, about onefourth their official value, and of the illegal purchase of six antique samo-

Company says drill bit plant not military aid

DALLAS (AP) - Officials of Dresser Industries Wednesday said the Soviet Union will not be receiving any helpful military technology from a \$145 million drill bit plant the American firm has agreed to build.

"Our drill bits could be said to help them militarily only in the same sense that buttons would help them militarily since they hold up the soldiers' pants," said Ed R. Luter, a company senior vice president for finance in answer to a reporter's question.

The new plant would increase by only 10 per-cent the Soviet drill bit production capacity, which is already the world's largest, added J.J. Murphy, a senior vice president for opera-

Dresser was chosen Correct count sought for Hispanics earlier this year to build the plant after several years of negotiations. Soviet officials also had sought bids from other drill bit companies in the international market.

President Carter was e sale to demonstrate rights — as in the recent trial of two dissidents in Moscow. World of Medieval brick lies below asphalt, steel

LONDON (AP) — In a hole 15 feet below London's hustling financial district, volunteer archeologists are racing to uncover traces of the city's Roman past that soon will be lost forever.

From asphalt and steel the layers step down to Medieval brick and stone, Saxon wood and clay, and a few patches of mosaic floor laid in a fortress called Londinium, a first century supply base for Roman legions that grew into the hub of an empire as London.

It is a slow-motion race, befitting a science that counts in centuries: whiskbrooms, trowels and vacuum cleaners digging to beat the coming bulldozers and pile drivers.

"It is now or never. The office block

that goes up here next year will obliterate the whole lot," says John Schofield, 30, a field officer for the Museum of London's Urban Archeology Department, which is sponsoring this and another major dig in the square mile that comprised the old walled

Forty amateurs, teen-agers to pensioners, from Britain, Europe and the United States, most with only a few days of experience, are busy here at Watling Court, and another dozen a five-minute walk away in the shadow of St. Paul's Cathedral.

Ten professionals supervise and teach, record artifacts, take photographs and make drawings to be studied long after it is too late to dig any more, fitting pieces to the jigsaw map

of ancient London The museum's five-year "rescue archeology" program has given tantalizing glimpses of Henry VIII's Bridewell Palace among other sites, and has already revealed much about how

London grew.

Seventy percent of the city has been rebuilt this century with modern foundations. Many precious repositories of history are safe for the time being, locked under islands of Victorian structures. But their days too are numbered, and Schofield worries about losing them.

"The end of the building recession has put the pressure on us," says Schofield. "To do this site right we should have a year. At best we have four more months.

"We're not bitter; it's a fact of life for urban archeologists. But next year we will have as many as 10 major sites coming open, and with our present resources we will be able to dig only two or three of them.'

Continuity of life is sought here more than treasure. The possibility, for instance, that within this acre barmaids have been dispensing tepid beer for 1,900 years.

Here foundations mark what might have been a Roman inn. A few yards away broken bottles in a cistern hint at the site of a Medieval public house. There was a pub in the Victorian pile that stood here until this year, and there will be another in the modern building that arises in its place.

"It's beautiful. In the States we don't have anything like this," says Professor Glen Ashburn, 47, a sociologist from Western Maryland College at Westminster and an enthusiastic volunteer digger.

"A place like England has such a succession of people - Romans, Saxons, Normans, layer upon layer of

Ashburn, who has been studying British law enforcement in London this year, says he has learned things about Britain from the dig and fellow diggers that he would not have any other way.

Schofield says he would welcome more American volunteers next summer - or even better, a few archeology professors and their classes.

The focus will be under the riverfront at Trig Lane — "We'll find hundreds of well-preserved objects shoes, scabbards, pins, Medieval tourist souvenirs, cloth, hair and

But the objects are not the point, he adds: "We're trying to get away from this idea that archeologists dig up things - treasures. We dig up ways of

"We are trying to understand why London is here, how it started, how it developed, and by understanding the mistakes of yesterday we might help prevent the mistakes of tomorrow.

Teachers either struck or continued walking the picket line Wednesday in some of the nation's largest districts— Cleveland, Seattle, Chicago and New Orleans. But in Philadelphia, a tentative agreement could send the city's 250,000 pupils back to school.

Strikes were either in effect or threatened by teachers in Washington state, Michigan, Pennsylvania, Louisiana, Rhode Island, Connecticut, Illinois, Massachusetts, Ohio, Indiana, Vermont, California, Idaho, New York and New Jersey. More pay was the main topic in negotiations with belt-tightening districts, but fringe benefits and a reduced number of pupils per class also were factors in some areas.

Teachers in the dept-ridden, 182school Cleveland district decided Wednesday to strike after last-minute negotiations failed to resolve employee demands for a 20 percent pay hike

Classes for the 100,000 public school students had been scheduled to start Friday. Peter Carlin, acting school superintendent, said every attempt would be made to keep schools open, and more talks were set for today.

Cleveland teachers now make between \$9,100 and \$18,650 a year. They have not had a pay raise in two years, but officials say no funds are available. The district got a \$21 million state loan last week to keep the schools operating. In Philadelphia, 13,000 striking

In Philadelphia, 13,000 striking teachers were voting today on the two-year proposal approved Wednesday by the executive committee of the Philadelphia Federation of Teachers. The average Philadelphia teacher's salary would be \$22,425 a year under the proposal, up from the current

An offer of a 4 percent raise for striking New Orleans teachers has been withdrawn — a move one school official contended would complicate negotiation to end the week-old

strike.

"We're really positioning ourselves with some options," Assistant Superintendent Jerry Hart said Wednesday after the board cut its 4 percent pay offer to 1.6 percent. "It will complicate the settlement, but it is not intended in any way as an antagonistic or negative act or an effort to in any way punish the union's posture"

About one-third of the system's 91,000 students have been in the class-rooms despite the walkout. New Orleans teachers now earn between \$10,096 and \$15,250 annually.

A disagreement over the number of hours teachers are required to work has idled 1,450 teachers in Chicago's nine city colleges since Aug. 18. The strike affects 112,000 students.

An eight-day strike in Rockford, Ill., the state's second largest district, was settled Wednesday, and 36,000 students were able to open classes. But in Elgin, Illinois' third-largest district, teachers threatened to strike today. About 26,000 students would be affected.

In Boston, teachers reported for classes for the scheduled opening Wednesday, but set a vote for Sept. 13 for a possible strike the next day if school officials and the Boston Teachers Union have not reached agreement. At issue is a 6½ percent-a-year raise over two years and what has been termed a "zipper clause."

Henry Robinson, president of the Boston Teachers Union, said the clause would deny the union any right to raise an issue not included in the contract.

"In 10 days or more, we will have an acceptable contract to vote on or we will go on strike," said Robinson. There are 69,000 students and 5,500 teachers in Boston.

About 55,000 students were out of class in Seattle where 4,000 teachers have walked off the job in a wage dispute

Also in Washington state, a strike by Tacoma teachers kept 31,000 pupils out of school.

Storm kills 4, strands 17 hikers

RIDGECREST, Calif. (AP) — Four mountain hikers are dead and at least 17 others are missing in heavy Sierra snows caused by the remains of Tropical Storm Norman.

The summer snows apparently caught many people by surprise as they hiked in the area of Mount Whitney, the nation's highest peak outside of Alaska.

Search and rescue teams in Inyo County rescued several stranded hikers Wednesday as the storm, once Hurricane Norman, dumped up to 5 inches of snow in scattered areas of the high Sierras.

"At this time, we have no way of knowing how many people might be in trouble," said Inyo County sheriff's deputy John Dorsey.

Another deputy, Jerry Nash, said searches had been suspended until daylight. He added, "Right now, we're just standing by. There have been a lot of people coming out."

Three hikers reported missing in the Italy Lake area were rescued and reported in good condition Wednesday, said Dorsey, and some 21 hikers stranded in Mono County near Convict Lake and Mount McGee were also found safe.

However, authorities said 17 persons who signed out for the back country around Mount Whitney were still unaccounted for. The missing, Dorsey said, probably were experienced hikers who had taken cover while waiting out the storm.

The bodies of three men and a woman have been located. But Nash said the bodies were at the 10,000-foot level or higher and had not yet been recovered.

The identities of the dead were not immediately available.

Meanwhile, surging tides in Los Angeles Harbor slammed two ships into their berths and snapped a

Meanwhile, surging tides in Los Angeles Harbor slammed two ships into their berths and snapped a steel cable of another, officials said. In addition, a 10,000-ton Shell Oil Co. tanker was swept from its moorings.

In Orange County, a 262-foot vessel and two barges ran aground in Dana Point Harbor after being ripped from their anchors.

None of the ships appeared seriously damaged, authorities said.

In other areas, Norman was less severe than

expected, dropping only .35 of an inch of rain in Los Angeles.

But the rain forced Sun-Maid Raisin Growers of California, which produces 40 percent of the nation's raisins, to halt worldwide sales until damage to the 1978 crop is assessed. Agricultural authorities said some tomato and lima bean crops also had been

No crop damage estimates were immediately available.

Police try to unravel knot

ruined.

OKLAHOMA CITY (AP) — Police are hoping two stolen handguns; a straw hat and a pawn shop burglary will unravel the knot that ties two of the worst mass murders in Oklahoma history.

Investigators say a "positive connection" was established Wednesday between two guns found in a crime-ridden Oklahoma City neighborhood and the slayings of six employees at a steakhouse and the deaths of a Texas family on Interstate 35.

Ballistics tests showed the weapons, which were found by children Sunday, were both used in the slayings of the steakhouse employees. One of the guns, a .357 Magnum, had been stolen from Melvin Lorenz, who was shot to death with his wife and son three weeks before the steakhouse slayings, police said.

Tom Kennedy, Oklahoma State Bureau of Investigation director, said one of the guns found by the children, a .38-caliber Taurus revolver, was the only item reported stolen in a pawnshop burglary in Purcell the day before the Lorenz family was shot to death

A straw, Panama-style hat found in the pawnshop after the break-in may provide a clue, Kennedy said.

He said the hat might not be too much help, but "somebody might just remember this hat."
Police searched the Oklahoma City neighborhood today where children found three guns. The third

weapon has not been linked with any crime, police said.

Authorities said the isolated neighborhood is a frequent dumping ground for stolen goods, and was the site where the body of armored truck guard was

found a few years ago after a robbery.

"The first thing we have to do now is solve the burglary where one of the guns was taken in Purcell and then work on numerous new avenues from there," Kennedy said, adding it was obvious the person who burglarized the pawnshop knows "who committed these nine killings or was directly involved."

He suggested the burglar was "in great danger" and should surrender to authorities.

The Lorenz family, who had been driving to a funeral in North Dakota, were slain about a mile south of Purcell June 22.

Their camper was later found abandoned in Oklahoma City, a few miles from the Sirloin Stockade restaurant where some three weeks later six employees were herded into a meat locker before being shot to death.

He swam off the job

GALVESTON, Texas (AP) — Jodie Ray Dutton got tired of his job as a fishing boat crewman but he couldn't walk off the job — so he swam off.

Coast Guard officers said Dutton jumped into the

Coast Guard officers said Dutton jumped into the Gulf of Mexico about five miles east of the Galveston jetties and started swimming for shore.

Authorities said Dutton was nicked up by the

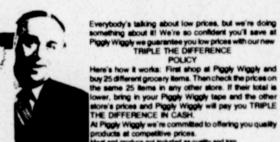

Authorities said Dutton was picked up by the Dutch tanker Stella Nova as the captain of the fishing boat came alongside and pleaded unsuccessfully for him to return to work.

BROWNFIELD — Services for Lee Fulton, 79, of Brownfield, son of Mrs. W.A. Fulton and sister of Mrs. Henry Thomas, both of Hobbs, N.M., were to be at 10 a.m. today in First United Methodist Church here.

Officiating were to be the Rev. Jimmy Tidwell of San Antonio and the Rev. Merrill Abbott, pastor of First United Methodist Church. Burial was to be in Perry County Memorial Cemetery directed by Brownfield Funeral

Fulton died Tuesday in a Lubbock hospital after a brief illness.

He was born in Freestone County and moved to Terry County in 1903. He attended school in Gomez. He attended West Texas State University and was graduated from Texas Tech University. He taught in Terry and Lubbock counties.

Fulton was Terry County's first school superintendent, serving from 1938-1950. He was the owner and operator of Johnson's Inn at Johnson until

He was a member of Brownfield Masonic Lodge No. 903, was past mastor of the Brownfield Lodge, was a charter member of Lubbock Scottish Rite, and was a member of Amarillo Shrine. He was a member of First United Methodist Church at Brownfield.

He was married to the former Ethel Moore Sept. 7, 1921, in Lubbock.

Other survivors include his wife, two foster sons, two brothers and three other sisters.

Virgil Faulkner

ODESSA - Services for Virgil Faulkner, 52, of Odessa, personnel representative for El Paso Natural Gas Co.'s Permian Division in Midland, were to be at 10 a.m. today in Immanuel Baptist Church in Odessa.

Graveside services will be at 2 p.m. Friday in Bogata Cemetery in Bogata directed by Hubbard-Kelly Funeral Home of Odessa.

Faulkner died Tuesday in an Odessa hospital following a lengthy ill-

He was born Jan. 20, 1926, in Frankston. He was married to Carol Ann Fortner on June 7, 1952, in Bogata. He came to Odessa in 1954 from Hughes Springs. He was a member of Immanuel Baptist Church. He was a Mason. He served in the Navy during World War II.

Survivors include his wife; his mother, Mrs. Homer Faulkner of Linden; a brother, Boots Faulkner of Marshall; three sisters, Mrs. Carroll Grainger of Longview, Mrs. Olin Humphrey of Linden and Mrs. Ray Ransom of Garland.

The family requests memorials be made to the Immanuel Baptist Church organ fund

Elizabeth Brooks

ANDREWS - Services for Elizabeth "Sally" Brooks, 35, of Andrews, were to be at 3 p.m. today in Trinity Baptist Church here with the Rev. McKinley Oats, pastor of Truelite Baptist Church in Seminole, officiat-

Burial was to be in Seminole Cemetery directed by Singleton Funeral Home of Seminole

Mrs. Brooks died here Monday. She moved to Andrews from Seminole 16 years ago. She was a licensed vocational nurse at Community General Hospital in Seminole. She had attended Seminole public schools.

Survivors include her husband. John Brooks; her mother, Louise Williams of Seminole; two sons, Robert Keith Brooks and Kirby Lynn Brooks, both of the home; four daughters, Jonya Monique Brooks, Sandra Denise Brooks, Dedra Lannette Brooks and Kelli Lea Brooks, all of the home; a sister, Ellen Brown of Seminole, and a brother, Nelson Linzy Williams of

Pearl Faulkner

TUSCOLA - Services for Pearl Faulkner, 75, of Tuscola, mother of R.L. Faulkner of Midland, will be held at 2 p.m. Friday in the Tuscola Church of Christ with E.R. Harper, a minister from Abilene, officiating.

Burial will follow in Tuscola Cemetery under the direction of Fry Funer-

Mrs. Faulkner died Tuesday in an Abilene hospital after a one-month ill-

Born Abby Pearl Briley July 10, 1903, in Rogers, she moved to Taylor County in 1907 with her parents. She married Bennie G. Faulkner Dec. 24, 1922, in Tuscola. She was a member of the Church of Christ.

Her husband preceded her in death on April 28, 1953.

Other survivors include two daughters, a sister, a brother, nine grandchildren and six great-grandchil-

Grandsons will serve as pallbear-

Winny White

ODESSA - Services for Winny Haggard White, 70, of Odessa, sister of Mae Darroll and Alta Grant, both of Andrews, were to be at 4 p.m. today in Second Baptist Church here. Burial was to be in Sunset Memorial Gardens.

Mrs. White died Wednesday in an Odessa hospital.

She was born April 10, 1908, in Palo Pinto County. She moved to Odessa in January 1944 from Goldsmith. She was a member of Second Baptist

Other survivors include two sons, a daughter, two sisters and two greatgrandchildren.

Castro says exile links need opening

HAVANA, Cuba (AP) — President Fidel Castro says he will try to open ties with Cuban exiles in the United States even though attempts to improve relations with Washington are

Trading friendly comments with the first Cuban exiles he has met publicly since taking power in 1959, the Cuban leader offered his olive branch to Cuban exiles Wednesday during an informal three-hour news conference with a dozen reporters from Cuban community newspapers and television stations in Miami and New York. Several visiting American reporters attended the meeting held at the presidential palace in Havana.

"We must take steps to protect the child so it does not die during birth," Castro said in revealing that he has initiated contact with Cuban exiles in America and that the news conference was his next move.

The visitors from the United States, all of whom were born in Cuba but who left after the revolution, had arrived expecting a major announcement on the release of up to 1,000 political prisoners, about one-third of the number Cuba admits to holding.

They had also hoped for more regular visiting rights between the Cuban communities abroad and in their homeland.

Castro described such reports as "highly inaccurate," but indicated that he was serious about warming up

"As far as a change in policy is concerned, maybe it is significant that for the first time in nearly 20 years, we are willing to talk to personalities from Cuban communities abroad," Castro said.

Chinese art subject of talk

Susan Rutherford, Reporter-Telegram Lifestyle writer, was speaker at the Downtown Lions Club meeting Wednesday in the Midland

Speaking on a recent trip to the People's Republic of China, Mrs. Rutherford made cultural comparisons between Mainland China and Taiwan, where she had studied Chinese art for two summers with groups from Southern Methodist University.

For those studying Chinese art, she said the People's Republic is the best place for the study of Chinese architecture and large sculptural pieces, while Taiwan has the best examples of paintings, and art works in jade, bronze, ivory and other "portable" materials. This is because Chang K'ai-shek was able to rid the mainland of two major palace collections of art when he fled for Taiwan in

Ozona jail loses Dallas inmate

OZONA - A 21-year-old Dallas man being held on auto theft charges for Irving authorities escaped from the Crockett County Jail here shortly after midnight Tuesday, according to deputies.

Chief Deputy Wayne Wahl said today that James Laningham escaped through a hole in the wall of the jail and then climbed up plumbing pipes until he reached the ceiling

"He apparently scooted up the sewer pipes to the roof. That took him to an area between the roof and the ceiling," said Wahl.

Laningham then apparently discovered another hole and dropped down into an office area where he reportedly secured keys and let himself out, said Wahl.

"It's the first escape from this jail since the 1800s," said the chief depu-

An all-points bulletin has been issued to other law enforcement agencies for the apprehension of Laningham, said Wahl

National mulling over merger bid

NEW YORK (AP) - National Airlines' directors are mulling a \$350 million merger bid from Pan American World Airways which would make the new company the nation's second largest air carrier.

National's board met for the past two days but company spokesman Harvey Berman gave no indication Wednesday if the line was ready to accept Pan Am's terms. Pan Am spokesman Jay Beauseigneur said 'negotiations are continuing," but refused to elaborate.

Even if National accepts Pan Am's proposal, numerous obstacles remain before the merger can take place.

One obstacle is Texas International Airlines' competing merger proposal. The other is the approval process by National and Pan Am shareholders and by the Civil-Aeronautics Board — that is necessary for the prospective merger to take effect.

Texas International, owner of 18.2 percent of National, gave no immediate signs that it was about to give up

Speakers named

Roger Freidline was selected best speaker and best table topic speaker when the Tall Town Toastmasters met today at Sambo's

Most improved speaker title went to Dwayne Slemmons while Tom Buford was named best evaluator.

Running for their lives, Martha Rhodes, left, and Margaret Lance will be participating in the Midland Parks and Recreation Department's jogging program for women to begin on Monday. Program director Em Carnett, right, keeps an eye on a stopwatch to monitor their progress. Runners will meet Monday and Wednesday at 1:30 p.m. and Friday at 9 a.m. (Staff Photo)

Political action groups have fat bank accounts

WASHINGTON (AP) — Political action committees of specailinterest groups, a growing factor in American election financing, raised \$54 million the past 18 months, a new study showed today. Half the money is in the bank, available for the fall elec-

During the same period, the Republican Party collected \$49.6 million and the Democrats \$14.4 million, according to the report issued by the Federal **Election Commission**

The GOP had \$10.5 million cash on hand, with \$500,000 in debts; the Democrats had \$2 million cash and owed

The computer study showed that Ronald Reagan's Citizens for the Republic collected more money - \$2.1 million — than any other non-party related committee. Two similar conservative groups were right behind. "The FEC figures released today

confirm the alarming trend in the growth of special interest group political money in general and corporaterelated political money in particular," said Fred Wertheimer, senior vice president of Common Cause, the citizens' lobby.

"We are rapidly headed toward a new political system of PAC democracy," he added, "with Congress representing the political action committees of America instead of its citi-

Political action committees cannot be affiliated with a specific campaign, but they can contribute to candidates, raise funds and engage in lobbying efforts. Wertheimer said that in January

1975 there were only 89 corporate PACs and only eight months ago there were 538. The new study, through the

end of June, showed there were 711 such committees.

"The world of political action committee money is on the way of getting totally out of hand," he said. "It seems to operate in strange ways, but it isn't strange any more when you realize what is going on. Campaign contributions are being used to buy political influence from those in of-

The study shows that of the money that corporate PACs contributed to campaigns for the House of Representatives, half went to Democratic incumbents and 30 percent to Republican incumbents. Democratic challengers got only 3.3 percent and Republicans, 4.3 percent.

"Most people would think corpora-tion and business money would go to Republicans," Wertheimer said. "But when you look behind it and look at Democratic incumbents versus Republican challengers, the ratio is

Labor organizations, too, lavished their congressional contributions on incumbents but mostly to Democrats, who got 70 percent of the pie to 4 percent for Republicans.

The top five non-party money raisers included National Conservative Political Action Committee, \$2 million; Committee for the Survival of a Free Congress, \$1.5 million; American Medical (Association) Political Action Committee, \$1.5 million; Gun Owners of America Campaign Committee, \$1.1 million.

The AFL-CIO's COPE political contributions committee was eighth with \$732,000 collected, and the United **Auto Workers Volunteer Community** Action Program was 10th with \$700-

Woman

posts bond

An Odessa woman is free on a \$5,000 bail bond posted Wednesday after she appeared before Peace Justice Robert H. Pine in connection with the charge of possession of a controlled substance, according to authorities.

Lynn McElmurry, 26, was arrested at 6: 15 p.m. Tuesday at Continental Airlines' air freight section of Midland Regional Airport for alleged possession of a controlled substance, according to

reports. Midland Police said they had received information that an ounce of cocaine would be shipped to the airline freight section at the airport.

After obtaining a search warrant, authorities said, they made the arrest and confiscated an ounce of a substance believed to be cocaine.

Officers chosen

RANKIN-Naldo Esparza was elected president of the Rankin High School sophonore class in recent school elections. Other class officers in-

clude James Barrett, vice president; Lisa Copeland, secretary; Robby Winford, treasurer; and Connie Sageser, reporter. Student council representatives are Tammie Jeannotte and Stephen Midkiff.

sale to Soviet Union

Carter okays equipment

However, Sen. Henry Jackson, D-Wash., wrote Carter asking that the export license be delayed pending hearings by the Senate Permanent Investigations Subcommittee, which Jackson heads, on possible national security implications.

Brzezinski and the Energy and Defense departments had sought to hold up the sale pending a thorough review of government policy on the supply of sophisticated energy technology to the Soviets.

Brzezinski presided last week at a Cabinet-level meeting concerning a secret Pentagon report critical of the deal, a source who asked not to be identified said. The report by a Defense Department science advisory committee was said to argue that the technology involved in the Dresser deal might help the Russians produce armor-piercing shells.

However, Dresser Industries officials maintained the Soviets would be a said and the said and

not gain any helpful military technology from the plant.

Project sites reported in West Texas sectors

Jordan Engineering, Inc., of Abilene spotted its No. 2 J. A. Prewitt as a north offset to Elliott Oil Co. No. 1 Pruitt-Henson Ranch, discovery well of the Johnson's Chapel (Tannehill) field of Stonewall County

660 feet from east lines of south of Kenna, 4,350. Scientists produce genes Ozona, Northeast that make human insulin

DUARTE, Calif. (AP) - Scientists said Wednesday they have used manmade genes to change bacteria into living factories that produce human insulin — an achievement that could greatly benefit the world's 100 million diabetics. The dramatic accomplishment ful-

controversial field that deals with the genetic messages, or heredity, of living things. This would be the first really useful product that has resulted from the research," said Dr. Arthur D. Riggs of the City of Hope National Medical

fills a hope held out since the early

days of recombinant DNA research, a

Center here. Riggs said the tiny factories hold the promise of better and probably cheaper insulin for diabetics, whose lives depend on daily injections of the hormone. But he said more refinements and testing are needed before the new insulin will be publicly available. It has not been tested on humans, although researchers are confident it will work.

City of Hope researchers collaborated with scientists from Genentech Inc., a private South San Francisco laboratory that funded the project. A spokesman said Genentech has applied for patents on the pro-cess, which includes several scientific advances and shortcuts The insulin work was built on a foundation laid late last year when

City of Hope and the University of California-San Francisco announced they had built an artificial gene that ordered bacteria to produce a much simpler, less valuable, human hormone called somatostatin. Similar procedures may now be used to create bacterial factories that could produce virtually any human

hormone and many other medically

important substances, said Dr. Keii-

chi Itakura, a molecular biologist at

City of Hope.

Insulin, a vital hormone that governs the rate at which carbohydrates are burned to supply energy, is normally produced in the pancreas.

Two successful years followed by real setback

HOUSTON (AP) — Health officials fighting the war against infectious syphilis, the deadliest venereal disease, have suffered a setback after two years of success.

"Four of the largest cities in the country, including Houston, have experienced increases in syphilis, which is a change from the last two years, where a decrease had been noted," said Jerry Wheeler, a federal public

health official on loan to the city Health Department from the Center for Disease Control in Atlanta, Ga.

Wheeler said there has been a 28 percent increase in the number of infectious syphilis cases reported in Houston in the first seven months of 1978 compared with 1977, when there were 754 cases reported.

"The question we have to ask, of course, is 'Why?'," Wheeler said.

"The answers for Houston are varied. One reason is the population increase. Houston is growing extremely rapidly, and this is becoming more and more of a problem."

Wheeler said another possible variable was better cooperation from private doctors in reporting cases to health officials, which allows them to trace contacts made by these per-

"Then we can make sure they receive medical evaluation from a clinic or private physician," he said. "The more cases we know about, the better handle we can have on the problem."

Another variable, Wheeler said, is people today are better informed about the signs and symptoms of venereal disease.

"If a person knows something about

venereal disease, and what they should do, we're going to identify more cases," he said.

"But there's a lot of people out there who have syphilis and don't know it, and those are the people

we're after," he added.
Wheeler said health officials are trying to find those people by cutting down all possible barriers that might keep a person out of a VD clinic.

"Anybody can walk into one of the three clinics we have in the city and get treated regardless of age, free of charge, day or night," Wheeler said. "We don't have to have parental consent, and any information we get is strictly confidential."

"Our business is not trying to stop people from having sex," Wheeler said. "It's to stop the transmission of

Investors start

eyeing gambling industry plunge

By CHET CURRIER

NEW YORK (AP) — Speculators have been placing some heavy bets lately on the future of the legal gambling business in this country.

Their hopes that the gambling industry can win

approval to spread out from Nevada and Atlantic City, N.J., and accelerate its already strong growth rate have inspired a much-publicized bull market for stocks with links to the business.

Wall Street investors, of course, are always busy

trying to catch a ride on the wave of the future. This has led to a steady succession of stock-market fads bowling, mobile homes, CB radios and many more
 most of which eventually collapsed.
 But the fact remains that a lot of money has been

made, at least on paper, in the gambling stocks. According to figures compiled by Barron's magazine, the aggregate market value of 12 gambling-related stocks increased by some \$2.26 billion in the first eight months of the year. Caesars World shares gained more than 600 per-cent in price; Resorts International and Golden

Nugget each rose better than fivefold; Playboy Enterprises and Bally Manufacturing tripled; and Ramada Inns, Del E. Webb Enterprises and Harrah's more than doubled. Most of these stocks have been heavily traded, contributing to a record pace of activity for the year

to date on the New York Stock Exchange. Such a booming market would appear to be a stockbroker's dream, since it helps generate extra commission dollars, which are still a basic source of revenues for the securities industry. But many Wall Streeters profess wariness or

downright concern over the periodic outbreaks of "gambling fever" that have hit the market. And in the past few days leading exchanges and brokers have limited or barred altogether any buying of the stocks on credit. "With recent prices five or 10 times this year's low

quotations, anyone who calls these things 'investments' probably thinks a lottery ticket is as sure a thing as a certificate of deposit," said William LeFevre, an analyst at Granger & Co., in his latest market commentary.

"Caveat emptor, where the gaming stocks are concerned, is perhaps an understatement.' Brokers involved in giving market advice are

supposed to issue such warnings whenever they feel speculation has overheated. The gambling stocks also have acquired a reputa-

tion for depressing the rest of the market whenever they have one of their periodic runups. Because they are so speculative, brokers say, they scare some conservative money managers away from the market entirely.

And even though the market is usually thought of as an amoral mechanism that concentrates on matters of dollars and cents and leaves value judgments to others, many brokers evidently feel more comfortable putting their customers into steel or com-puters or food than into gambling. In fact moral, social and aesthetic questions, not

just sheer economics, are closely involved in the industry's long-range prospects, just as they are in debates over whether gambling should come to Miami Beach, New York City or other possible

In a report on the industry's history and outlook, which attracted wide attention in the financial world last month, Merrill Lynch, Pierce, Fenner & Smith analyst Harold Vogel observed:

"Although employment for thousands would undoubtedly become available from such investment, there is a moral question, answerable only by society at large, as to whether nationwide investment in gambling plant and equipment totaling billions of dollars is desirable.

"The answer will in part be reflected by the taxes imposed on the industry. High taxes would obviously reduce the potential return on investment, thereby making such investment relatively less attrac-

Open-end credit charges 'hidden'

WASHINGTON (AP) Because of increasing use of credit cards, a growing number of consumers are not being given the most important information on credit costs, the head of the Federal Trade Commission said Wednesday.

FTC Chairman Michael Pertschuk said the problem arises because credit cards carry "open end" credit, meaning the consumer can make more purchases on credit before paying off all charges for the first

The Truth-in-Lending Act does not require full disclosure of credit costs for "open-end" credit, as it does for the traditional "closed-end," or installment contract, method of financing major purchases

The law requires the "closed-end" creditors to make disclosures about their finance charges so that consumers can compare the cost of credit offered by various merchants.

Pertschuk told a House Banking subcommittee that creditors financing sales of furniture, appliances, encyclopedias and even automobiles have abandoned the old

type of credit. 'The victim of this movement is the individual consumer who ends up without the information needed to make a prudent choice among the various sources in the consumer credit marketplace," he testi-

Pertschuk said a con-

card to buy goods costing several thousand dollars will be told only what the annual percentage rate and minimum monthly payment is.

He said the consumer will not be told the total of all finance charges, the number of payments to be made, the total cost of credit related insurance and other charges or the total amount that he is obligated to repay.

The subcommittee chaired by Rep. Frank Annunzio, D-Ill., is considering a Senate-passed bill designed to simplify the 10-year-old Truth-in-Lending Act.

Pertschuk said tightening of weaknesses in the current law should accompany any simplification of the reporting requirements. The FTC is the main agency for enforcing the Truth-in-Lending Act.

Annunzio, in an opening statement, said he wants to go slow in changing the law if that means eroding hard-won consumer gains in an effort to reduce the paperwork burden to credi-

sulation business. Includes necessary equipment and first barrel of chemical. Call collect (405) 733-0800. Universal Foam, 3635 Engel Road, Inc., 3635 Engel Oklahoma City, OK.
