## Nation's striking teachers suffer 'foxhole mentality'

By GLENN RITT

NEW YORK (AP) - Teachers, frustrated by inflation and classroom turmoil, are encountering voters, equally inflation-weary and frustrated by falling student test scores. The result is teachers' strikes hitting a near-record pace as the school year

And there is a growing conviction among school officials, union leaders and teachers that the discontent is so deep and complex that September's turbulence will only intensify in the months ahead.

Albert Shanker, president of the 500,000-member American Federation of Teachers, says his members are developing a "foxhole mentali-

Dr. Thomas Shannon, executive director of the National School Boards Association, sees a "new dimension" in negotiations. After years of concessions, he says, "school boards want to get something back

for what they are giving up."

By mid-September, teachers had called 50 strikes nationwide, and the National Education Association estimates such a pace could put job actions by year's end at least near the record of 203 set in 1975-76.

Strikes have affected school districts ranging from Philadelphia with 250,000 students, to Oak Harbor, Wash., with 5,300 pupils.

As teachers grow angry over their situation, school officials watch, and sometimes are controlled by, the voters' mood. Citizens whose own incomes have been cut by inflation are voting down school budget in-creases, and the tax revolt fueled by California's Proposition 13 is only increasing the confrontation.

In Bridgeport, Conn., where more than 100 teachers have been jailed in a strike, Ellen Wisser, an English teacher with three children in college, sat by a telephone at her union's "crisis center."

"I can't believe it's come to this," she said. "But they've underestimated our strength. We won't be stripped

It is more than dignity being jeopardized, of course. Between September 1975 and June 1978, teacher salaries nationwide rose an average 5.9 percent while inflation averaged more than 7.1 percent.

"We haven't even kept up with in-flation," says Chuck Richards, an American Federation of Teachers official in Washington.

The federal government estimates a public school teacher this year will earn an average of \$15,250. In 1960 dollars — to offset inflation's impact - that comes to only \$6,750.

Teachers are not alone, however. It is difficult for taxpayers to show compassion when statistics show teachers' real wages increased 32 percent since 1960 compare to only 16 percent for all private non-farm workers.

"Yes, we have scored some success," says Terry Herndon, executive director of the 1.8 million-member NEA. "But now we want to sustain those gains and inflation threatens to erode our improvement.'

Marilyn Smith, 30, a Bridgeport art teacher, earns about \$10,500 a year and understands Herndon's view. "I can't save anything. I'm paying \$260 a mouth for an apartment and utilities. I've got a car to commute 40 miles a day and a student loan to pay back.

"And I'm probably a little above average because I don't have any children to support," Miss Smith

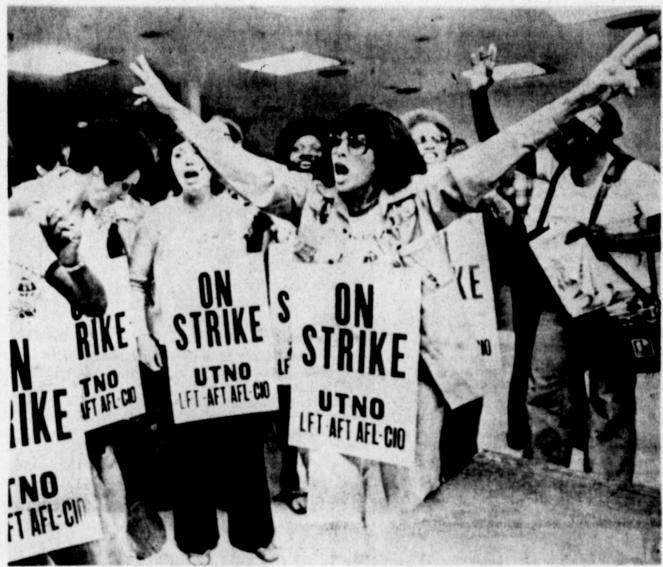

That same inflation has stimulated voters to approve such measures as Proposition 13 and to defeat a growing

number of school budgets. In New York, voters rejected 14.8 percent of school budgets in the 1974-75 school year but 29 percent last year. In New Jersey, the 1974-75 rejection rate of 24.6 percent has grown

to 57.5 percent. "Frustrated taxpayers have a chance to express themselves on only one form of taxation and that's when they vote for school budgets," Richards explains.

He says it's totally inequitable that schools should be hit more than other

(Continued on Page 2A)

Teachers, battered by inflation, aroused by a swelling taxpayer revolt, and frustrated by classroom turmoil, are striking at a near-record pace as the new school year begins. Pictured are members

of the United Teachers of New Orleans as they react to an August-30 strike vote. (AP Laserpho-

## Big Spring lake environmental report of questionable value

By MARK VOGLER R-T Staff Writer

Big Spring's environmental review record supporting drainage of a natural lake in the city limits was based on a 15-year-old federal study and the analysis of an administrator who lacked professional ecological expertise, according to the official who drafted the report.

The environmental review record later was approved by the U.S. Department of Housing and Urban Development in the awarding of a \$165,-000 HUD grant to begin plans to drain One Mile Lake.

Paul Feazelle, now assistant city manager in Big Spring, said Tuesday that he compiled the environmental review record in June of 1977 mostly from a study by the U.S. Army Corps

**R-T Special Report** 

of Engineers, dated about 1963, and from his own experience in drafting reports for federal grants.

The report found that drainage of One Mile Lake would "have no significant effect on the environment." The city already has awarded a bid for a drainage improvement project along Beal's Creek, which also would include drainage of One Mile Lake. Feazelle, who acknowledged he has no professional ecological expertise, said the city had him draft the report

because funds did not permit hiring an environmental consultant. He was director of housing and community development at the time he wrote the grant proposal.

Feazelle's report recommended drainage of One Mile Lake because of contentions the lake is the source of mosquito infestation, is responsible for flooding in the city's northwest

## Londoner had to see the States

Brian Conway is one to know another limey

"Look at that bloody bugger. He's got to be English, walking like that," Conway said of the hitchhiker waving the Union Jack.

If the blimey British have a peculiar gait, then Conway's got it, too. He's basically British, though he's well Canadianized and Americanized since he left his British homeland in 1953 at age 21.

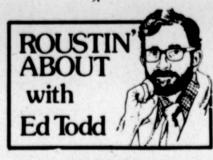

#### WEATHER

The walk and the flag-waving that caused Conway to stop and see what 21-year-old Roland Taylor was up to came on a recent weekend, when Conway and his family were on an outing into New Mexico.

Out of curiosity, they picked the hiker up, made a tour of Carlsbad

Caverns, dropped by his campsite to pick up his rucksack and other be-longings, and brought him home to Midland with them for a week's

The hiker with the Union Jack and an expired bus pass was into his 74th day of touring Canada and the States when the Conways gave him a lift.

"I've heard bad things about the States," the Londoner said, "I wanted to go over and see the States for

So he jolly well did. He took leave of his law studies at the University of London, got a Greyhound "unlimited" pass for two months for \$300 to tour the continent by bus, climbed aboard Freddie Laker's Skytrain and

## More cool, rainy days ahead

Just when it appeared that the weather had bounced from rainy and cool to warm and summery, the weatherman did a flip-flop in his forecast: more rainy days ahead.

A cooling trend set in and thunder showers broke out Tuesday afternoon, dropping rain over most parts of the Permian Basin. The weatherman said it should be partly cloudy through tonight with a 50 percent chance of rain. The chance drops to 20

percent Thursday.
The Natonal Weather Service at

Midland Regional Airport reported a total accumulation of .09 inch of rainfall overnight. That brings the total rainfall in the Midland area so

far this month to 1.14 inches.

In the south central part of Midland at the Permian Basin Petroleum Museum, rainfall was measured at .3 inch. Rainfall reported elsewhere included Midland College, .28 inch; Greenwood Estates, .5 inch, and Midkiff, .10 inch

Rain also fell over area towns. The (Continued on Page 2A)

## Gas bill opponents gearing last attack

WASHINGTON (AP) - Opponents of a natural gas pricing compromise are organizing for one last attack despite a resounding defeat at the hands of President Carter and his allies in the Senate.

In the first showdown vote on the volatile issue, the Senate rejected by a 59-39 vote Tuesday an effort to return the compromise to the conference committee, a move supporters said would kill it.

Given the margin of that vote, it appeared unlikely opponents would be able to reverse the current tide in support of the compromise. An Associated Press count showed

50 senators either firmly or tentatively in support of the compromise with 39 in opposition and 11 still undecid-Nonetheless, Sen. Russell Long, D-La., is leading a last-ditch effort to

would send it back to a House-Senate conference committee.

The current compromise would lift federal price controls on new natural

gas by Jan. 1, 1985 and allow pro-

ducers price increases of about 10 percent between now and then.

There is general agreement that the compromise would mean higher prices to homeowners and other consumers but no agreement on how much those increases would be. There is also disagreement over the extent to which the bill would stimulate production of additional supplies.

"The battle isn't over," a slightly dispirited Sen. Howard Metzenbaum, D-Ohio, said shortly after Tuesday's vote. "We have been counted out before. We'll try to find a compromise to work out some middle ground. ... Maybe now we have to take a fallback

But Sen. Henry Jackson, D-Wash., chairman of the Senate Energy Committee, said the wide margin by which the recommittal motion was defeated assures ultimate Senate

pricing scheme. A final vote on the compromise has been scheduled for next Wednesday, but Senate sources indicated oppo-nents might not object to a quicker

vote, perhaps by the end of this

Long, other oil-state senators, conservative Republicans and consumer-oriented Democrats have joined together in efforts to defeat the White House-supported measure.

All previous attempts to defeat the compromise, said by Carter to be the most vital portion of his energy plan, called for removing all of its pricing

But now Long and his supporters are discussing a proposal to cut back the increases in producer revenues to 7 or 8 percent in hopes of picking up support from liberal Democratic senators who fear the Carter compromise would raise consumer prices too

To appeal to oil state senators and some Republicans, Long is expected to try to eliminate portions of the compromise which oil companies say will make federal regulation a bureaucratic mightmare.

## Except for the hearing aids left on desks, classroom like any other

By Susan Toth R-T Staff Writer

The classroom looks like any other elementary room when the class is at recess.

Desks are grouped together. Chairs are scattered about. The walls are covered with student

artwork and posters. Except for the hearing aides left on the desks while their owners play outside, the classroom is like any

The 15 students attending class at Lamar Elementary School are part of the state-funded regional deaf educa-

tion program. Divided into three groups, the youngsters work to overcome their special problems with the help of teachers whose patience and love

seem to be endless. "Self-direction," "self-discipline" and "independece" are the goals listed by these teachers for their

"A hearing teacher doesn't understand," said Suzanne Donnolo, who currently teaches three preschool and kindergarten-aged students.

"They hear only three students or only eight. But they don't understand the kind of individual attention each

child requires. Students in the regional program come from 14 Permian Basin counties to Midland where they can attend preschool through grade six. The Odessa center has students from pre-

school through high school. Degrees of hearing loss in the classes range from mild to profound, according to Floy Hinson, supervisor

for the regional program. While some students are very oral, having learned to speak before losing their hearing, others had no opportunity to learn to speak before their loss.

"We do a lot of work in small groups," said Barbara Jones, teacher for the intermediate group at the Midland school

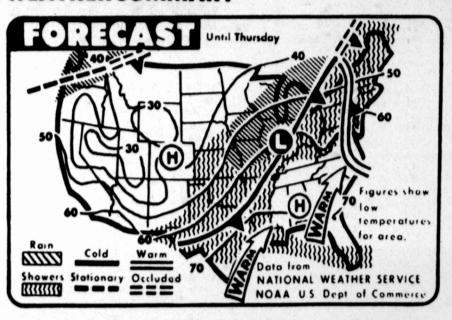

"The students are at so many dif-ferent levels, the whole day is spent trying to individualize."

Students at the Midland center attend physical education and art classes with hearing students. Those students who are able are "mainstreamed" into more hearing

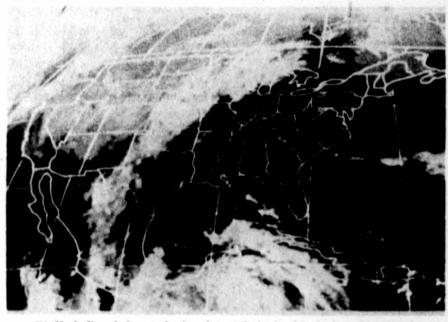

"Most hearing classrooms are not set up to handle our students," Hinson

(Continued on Page 2A)

#### *NEATHER SUMMARY*

Rain and showers are expected from Texas and the western Gulf through the southern Plains, Midwest, Great Lakes and Northeast today through Thursday morning, according to the National Weather Service. Showers or rain are also likely in southern Florida and Washington state. (AP Laserphoto Map)

Well defined frontal clouds with imbedded thunderstorms stretch from West Texas to the Great Lakes, as seen in today's satellite cloud picture, recorded at 3 a.m. Unusually cool air and a few clouds spread westward from the front while warm, humid air dominates in the East, excepting the Northeast. (AP Laserpho-

The weather elsewhere

#### Extended forecasts

Friday through Sunday

West Texas: Partly cloudy to clear with no significant precipitation expected. Warming trend mainly north. Highs in the 80s except mid 90s Big Bend. Lows from the 50s north and mountains to the low and mid 60s south.

South Texas: Considerable cloudiness with scattered thundershowers mainly northern parts. A little cooler north. Partly cloudy and a little warmer Sunday with widely scattered thundershowers mainly east. Highs in the 50s except in the iow 50s lower Rio Grande Valley. Lows in the mid to upper 50s northwest and in the low to mid 70s elsewhere.

## Lake drainage review based on 1963 study

(Continued from Page 1A)

section, is responsible for odors in the area and is adversely affecting the quality local drinking water.

"Most of information for the report comes from the Army Corps of Engineers and local knowledge. The residents of the area of One Mile Lake all feel the lake is as much a contributor to the problems as anything else," Feazelle said.

The official said his qualifications for compiling the report were "just past experience in preparing other environmental assessments.

He said he did not consult with a county-based entomologist or local wildlife experts in compiling his

James Lee, the Howard County County Extension Office entomologist has said that he doesn't believe the lake is the cause of the mosquito

It is in the trash area of the nearby railroad tracks that mosquitos actually breed, according to Lee. The area on the south side of the tracks is cut off from adequate drain-

age. If the area around the railroad tracks could be cleaned up, it is more likely the mosquito problem would be solved than if One Mile Lake were drained, the entomologist said.

L.B. Paul, a local bird expert, said in an August 17, 1977 memorandum to the city that the report's findings on what the impact might be on wildlife in the area "is the biggest joke of

The environmentalist also criticized the city for declaring the lake area unattractive.

"Since this is inside the city limits, why doesn't the city enforce some dumping codes? By draining the lake, you will only expose a vast new area that will soon be full of wrecked cars, torn matresses and dead dogs," he

Feazelle said the drainage of the lake would not solve all the problems, but is the "most expedient method" available to the city to improve the

situation. He thinks the charges made against him by the environmentalists are for the most part unfair and unsupported in documentation.

## Bad year could influence prices

WASHINGTON (AP) — A bad year for America's farm crops could near-ly double the expected \$3.40 weekly hike in a four-person family's grocery bill in 1979, says the Agriculture Department's top economist.

Inflation's inevitable effects will increase prices that much, says Howard W. Hjort, but reduced meat and dairy supplies could raise the mythical family's average grocery bill another \$2.75.

That projected increase, totaling \$6.15, would be on top of the \$6.21 weekly hike predicted for such a family this year. In 1977, it cost \$62.10 a week to feed such a hypothetical fam-

Hjort, testifying Tuesday before a House banking subcommittee, said food prices this year are expected to be 10 percent above 1977 averages, with most of 1978's increase having come in the first five months of the

One year ago, Hjort came before the same committee and predicted food prices would be up from 3 percent to 6 percent this year.

"You can see that we didn't take into account the effects of farm policies and programs," he said in an

The impact of congressional and

administrative decisions which affect the price of food can easily be seen.

For example, the House Agriculture and Ways and Means committees are considering legislation to hike federal sugar supports by up to 16 cents a pound although the administration has set a target of 14.5 cents

But the effects of weather and low production are more difficult to pre-

Hjort said last year's predictions on farm prices were off because an expected "significant expansion" of 10 percent to 11 percent in the hog mar-ket, which would have led to lower pork prices, did not occur.

Bad weather and disease which killed animals combined with uncertainty among producers following claims that chemicals used to cure bacon may cause cancer to keep expansion of the hog market to about 2

Economists had hoped increased pork and poultry production would offset decreased beef supplies caused by ranchers attempting to compensate for four years of losses by trimming their herds.

He said another factor in higherthan-predicted prices this year was

"That didn't happen," Hjort said.

bad spring weather in California that damaged lettuce crops and pushed up the price of fresh vegetables.

Similar factors could boost retail food prices next year, too.

Meanwhile, Hjort said halting the annual rise in retail food prices would require either an end to inflation or a willingness by farmers to accept a price cut of about 14 percent for their

booth and and trying to learn Russian

come threats to job security and classroom conditions. An NEA study indicates teachers are worried too by large classes, student discipline, school crime, and public criticism of teachers because of students' falling test scores.

These morale problems, teachers and union leaders agree, often fuel the friction. And like the salary issue, their resolution often lies with money, an increasingly rare commodity.

"You can't get blood from a turnip," says Shannon, describing the fiscal plight of many school boards facing teacher demands.

Shannon and union leaders agree. however, that the culprit is not teachers or school boards, but property taxes. "The property tax never was designed to support education to the degree it's expected to today," Richards says.

And as all levels of government begin to scramble for the shrinking tax dollar, Shannon says, "school boards may be in serious contention with city and county government."

## Pornographic photo album may lead police to killer

SCOTTSDALE, Ariz. (AP) — An album of pornographic pictures may lead police to the killer of Bob Crane, TV star of the "Hogan's Heroes" series.

Detectives have been looking for the album since June 29, when Crane, 49, was beaten to death with a heavy metal bar. Crane apparently knew his killer and had let him into the apartment Crane was using while appearing here in a Windmill Dinner Theater production of "Beginner's Luck," police said. "Apparently there was an album missing — pornographic stills," said Police Chief Walter Nemetz. "It

might be a clue."

Crane suffered two skull-crushing blows and his neck was tied with an electrical cord from a videotape camera, investigators said. Dozens of videotapes reportedly were found in the apartment, showing Crane engaged in sex with women in various stages of undress. Several of the women have been contacted and cooperated with investigators.

"There are lots of motives," Nemetz said. "He (Crane) developed a lot of acquaintances. His peculiar activities offstage could lead to many motives amongst his acquaint-

The weapon, believed to have been a tire iron or jack handle, has not been found. Blood was wiped from it onto a corner of Crane's bedsheet, and the weapon may have been tossed into a canal near the murder scene, officials said.

"We've expended about 2,000 man-

hours on the case and we're still coming up with new people to talk to," Nemetz said. "I still have one investigator assigned fulltime."

The investigation has gone to Texas, where Crane also appeared in dinner-theater productions, and to Los Angeles, home of Crane's estranged wife, Patty Olsen, and Crane's friend, John Carpenter, 49.

Carpenter has told police that he

Carpenter has told police that he was out with Crane and two women until about 2 a.m. the day of the murder, and last saw Crane outside a

coffee shop. Carpenter also said he flew to Los Angeles after the evening out, but telephoned Crane in his

apartment just before leaving.

Crane also received a telephone call from his estranged wife the night before his death, Nemetz said. Carpenter told police he was with Crane at the time of the call, which developed into a loud argument. Crane and Miss Olsen apparently had argued the previous week as well

**Elderly participants** exceed estimates in state drug plan

TRENTON, N.J. (AP) — Until this

year, the choice for 80-year-old Bridie Brennan often was food or medicine. The bedridden grandmother of five takes more than a dozen pills a day for arthritis, hypertension, hardening of the arteries and other ailments.

"It was pretty grim," said her son, Jack, with whom she lives. "We had to cut into the food budget, because she couldn't handle the drug expenses

But since the first of the year, Mrs. Brennan and about 255,000 other older residents of New Jersey have been beneficiaries of a novel \$1 discount drug program now threatened by runaway costs - because it is too

"The program is wonderful, but I don't know what I would do if it was cut off," said Mrs. Brennan, who has only a modest income from Social

The program, which began Jan. 1, authorizes eligible senior citizens to obtain prescription drugs for \$1, with the state paying the rest. Its estimated \$5 million first-year cost is expected to zoom to more than \$37 million.

"This program is vitally needed and we don't want anyone trying to do a hatchet job on us now," said Eugene Zoppo of Paterson, president of the New Jersey Federation of Senior Citizens, which has 494 groups representing nearly 100,000 seniors.

"Before this, there were a lot of

people who were forced to use their food money to pay for prescriptions,"

State officials estimated there would be about 50,000 annual participants, but more than 255,000 were enrolled by the end of August. In addition, at least 3,000 had not been processed.

"We were wrong about the estimates," said the state's deputy human services commissioner, Gerald J. Reilly. "The original application form was very cumbersome, but when access was made easier, the original estimates stayed the same."

To make things worse, there have been reports that senior citizens from the neighboring states of New York

and Pennsylvania are trying to get discount drugs through relatives or by setting up fake New Jersey resi-

Under the Pharmaceutical Assistance Act, seniors living alone are eligible if their annual income does not exceed \$9,000. Couples may have

income up to \$12,000.

Other states are watching the progam to see how New Jersey officials balance the goal to help seniors on fixed incomes in the face of public outcries against increased government spending. Gov. Brendan T. Byrne, who used the program to woo older voters in a successful re-election bid last year, has urged legislative leaders to adopt modifications immediately.

- The government's investigation of the General Services Administration so far has uncovered questionable practices ranging from outright theft to a contract calling

for the impossible. But the "ugly and disgusting saga," as GSA Administrator Jay Solomon called it, is apparently far from over. Solomon said Tuesday the revelations to date may be only "the tip of a gigantic iceberg yet to

Fifty GSA employees have been disciplined and 80 transferred. Six grand juries are

looking into the scandal. GSA investigators have developed six other cases the Justice Department feels contain "sufficient indication of fraud" for the department to take over, according to Vincent Alto, the man GSA hired to clean up its mess.

More cases are close to going to district attorneys in Houston, Dallas and New Orleans, Alto

tionable activities are turning up in Colorado, Montana, Missouri, California and Hawaii.

More than \$100,000 in apparent fraud has been uncovered in the past two weeks alone, GSA officials say. The agency's head investigator, William Clinkscales, says his staff has "high hopes that we will shut down thefts of \$3,000 to \$5,000 a week that have been occurring for years" at a Midwest GSA ware-

That was the picture proofed. painted by officials Tuesday before the Senate Governmental Affairs subcommittee on federal spending and open government.

The GSA witnesses told the subcommittee about cases ranging from the "\$80,000 parking place" to a contract that called for painters to apply two coats of waterproof paint — a physical impossibility, investigators said, because the second coat "just runs

As for the \$80,000 park-

ing place, Clinkscales said an employee of the federal Office of Education gave a credit card good at GSA self-service stores to a parking lot attendant in return for a free parking space.

"Over a few months, he had charged \$80,000 on the card," Clinkscales said. The goods were then sold to a criminal fencing operation, he tes-

The federal employee received a suspended sentence for her part in the case, Clinkscales said and has since been given a job promotion. The parking lot attendant, according to Dis-trict of Columbia police, was named in a 170-count indictment in connection

with the incident. The subcommittee heard of GSA employees who stood up against private contractors, then were transferred to lesser jobs. And they were told of a blind GSA attorney who, in the midst of determining a dispute between GSA and a private contractor, found his funds for overtime reading help curtailed, thereby limiting his ef-

fectiveness. Illegal activities are continuing, said Sen. Lawton Chiles, D-Fla., the subcommittee chair

He told Solomon he had some good news: GSA investigators recently found "file cabinets still in their packing cases which are being sold at half price.

"The bad news," Chiles said, "is that someone is stealing your file cabinets.

Much of the hearing was devoted to office furniture supplied by Art Metal U.S.A. of Newark, Howard Davia, head of

audits for the GSA, said

Art Metal products "are frequently rusty, re-ceived in damaged condition or in what is generally described as shoddy condition. He said one shipment of 33,000 cabinets "required so much mainte-

nance to repair that it was not considered feasi-GSA witnesses said a recent shipment of chairs appeared not to meet government specifica-Art Metal President

Philip J. Kurens denied any problems with his company's products, saying, "We have shipped in excess of one million pieces of office equipment to the government. The rate of complaints has been less than one-half of one percent on our shipments.'

## Automatic tax cut favored by Republicans on panel

WASHINGTON (AP) — Republicans on the Senate Finance Committee are plugging for a system of automatic tax cuts to keep inflation from pushing wage earners into ever-higher income tax brack-

Sponsored chiefly by Sen. Bob Dole, R-Kansas, the "tax-indexing" plan would require yearly increases in personal exemption and standard deduction as well as cuts in individual tax rates pegged to the rate of inflation.

The indexing measure, scheduled for a committee vote today, represents an attempt by the Republicans to bounce back after failing three times Tuesday to pass the Roth-Kemp proposal to cut individual income taxes by an average of 33 percent over the next three years.

Meanwhile, the Republicans began a coast-tocoast flying caravan today with party leaders such as former President Gerald Ford and former California Gov. Ronald Reagan talking tax reform and boosting GOP candidates.

They are carrying the message that a big change in taxes will require a big change in the composition

Back in the Senate committee, Dole argued his case this way Tuesday in a statement:

"The average family of four earned \$15,000 last year. The effective tax rate on that income is about 9 percent, or \$1,400. Assuming the inflation rate is at 7 percent and the family keeps up by a cost-of-living increase, the family next year will earn

"The family, of course, has not increased its spending power of the previous year. However, the family is now confronted with an 11-percent effective tax rate and a new tax bill that is nearly \$1,600."

Dole calls that \$200 difference to his hypothetical family "an unlegislated tax hike that cheats the American worker." Under his proposal, it would be offset by a 7 percent increase in deductions allowed the family and by expanding the tax rate tables to allow a 7 percent increase in wages without going into a higher tax bracket.

Opponents say the Dole amendment, which would be for a two-year trial period beginning in 1980, would worsen inflation by raising the federal deficit, forcing the government to borrow more money and giving taxpayers little incentive for their own inflation fight.

The committee, writing its own version of a \$16.3 billion tax cut approved by the House, also is nearing a final decision on how the House bill should be changed to direct more of the tax cuts to low-and middle-income taxpayers.

In a major decision Tuesday, the panel voted new tax relief for business by increasing from 20 percent to 30 percent the asset-depreciation range.

The sponsor, Sen. Lloyd Bentsen, D-Texas, said this would stimulate plant modernization and increase productivity, resulting in more output per dollar spent and, thus, less inflation. It would cost \$513 million next year.

## Former majority whip to testify on Korean influence-buying scheme

paid for by Park.

WASHINGTON (AP) - The third of four congressmen accused of involvement in an alleged Korean influence-buying scheme got a chance to detail his defense with House colleagues today.

Rep. John J. McFall, D-Calif., a former majority whip, was slated to testify before the House Committee on Standards of Official Conduct about gifts he received from Korean rice merchant Tongsun

Park is also expected to appear although committee officials would not confirm the central figure in the case, a former Washington socialite, would

McFall is accused of violating House rules by receiving a \$3,000 campaign contribution from Park in 1974 and failing to report it.

The committee also alleges that McFall diverted the contribution to his personal use and that he earlier had received \$1,000 in cash and a \$500 tea set from Park "under circumstances which might be construed...as influencing the performance of his government duties.

McFall, seeking re-election in November, has admitted receiving the money and tea set from Park and has acknowledged writing letters on the South Korean's behalf, but he has denied any wrongdo-

In a written response to the committee's allegations, McFall contended he accepted the \$3,000 in 1974 and \$1,000 in 1972 for his congressional office account, not as campaign contributions. He also wrote that he was unaware the tea set was entirely

He added that his other dealings with Park, including the letters, were intended to help increase ble to use them. the rice sales of his rice-growing district in Califor-

Last week, the committee held public hearings on Korean-related allegations against Reps. Edward R. Roybal and Charles H. Wilson, both California Democrats. Roybal and Wilson also denied any wrongdo-

A third hearing involving Rep. Edward J. Patten. D-N.J., scheduled for Tuesday, was postponed to give Patten more time to prepare his defense. An aide to the congressman said Patten should be ready for the hearing in a week to 10 days.

The committee could recommend that the full House take disciplinary action against the congressmen, ranging from reprimand to expulsion.

None of the four faces criminal charges stemming from the matter.

## Hearing on liquor asked - State liquor administrator Sherman McBeath asked the Texas Su-

AUSTIN, Texas (AP) preme Court today to get him out of the middle of the tangled controversy over an Abilene liquor election.

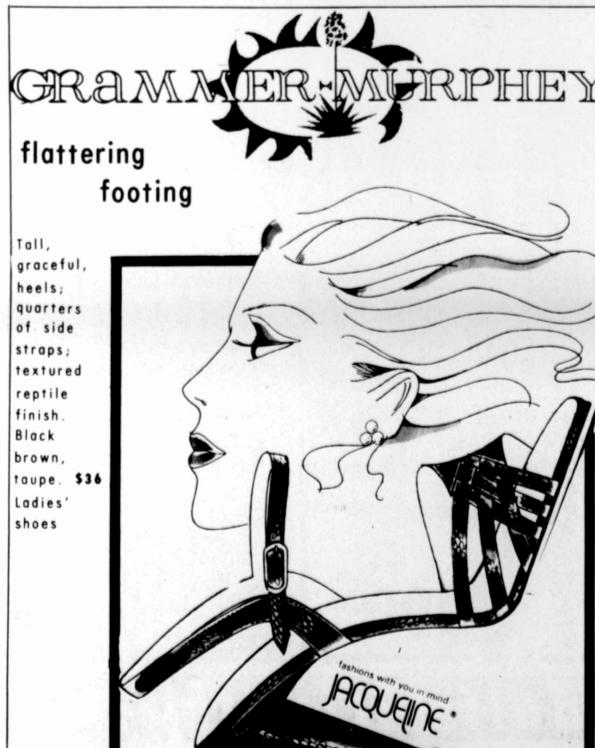

The court ordered a hearing on McBeath's plea to set aside Austin District Judge Charles Mathews' order that has left Abilene "dry" until the matter is settled in the courts.

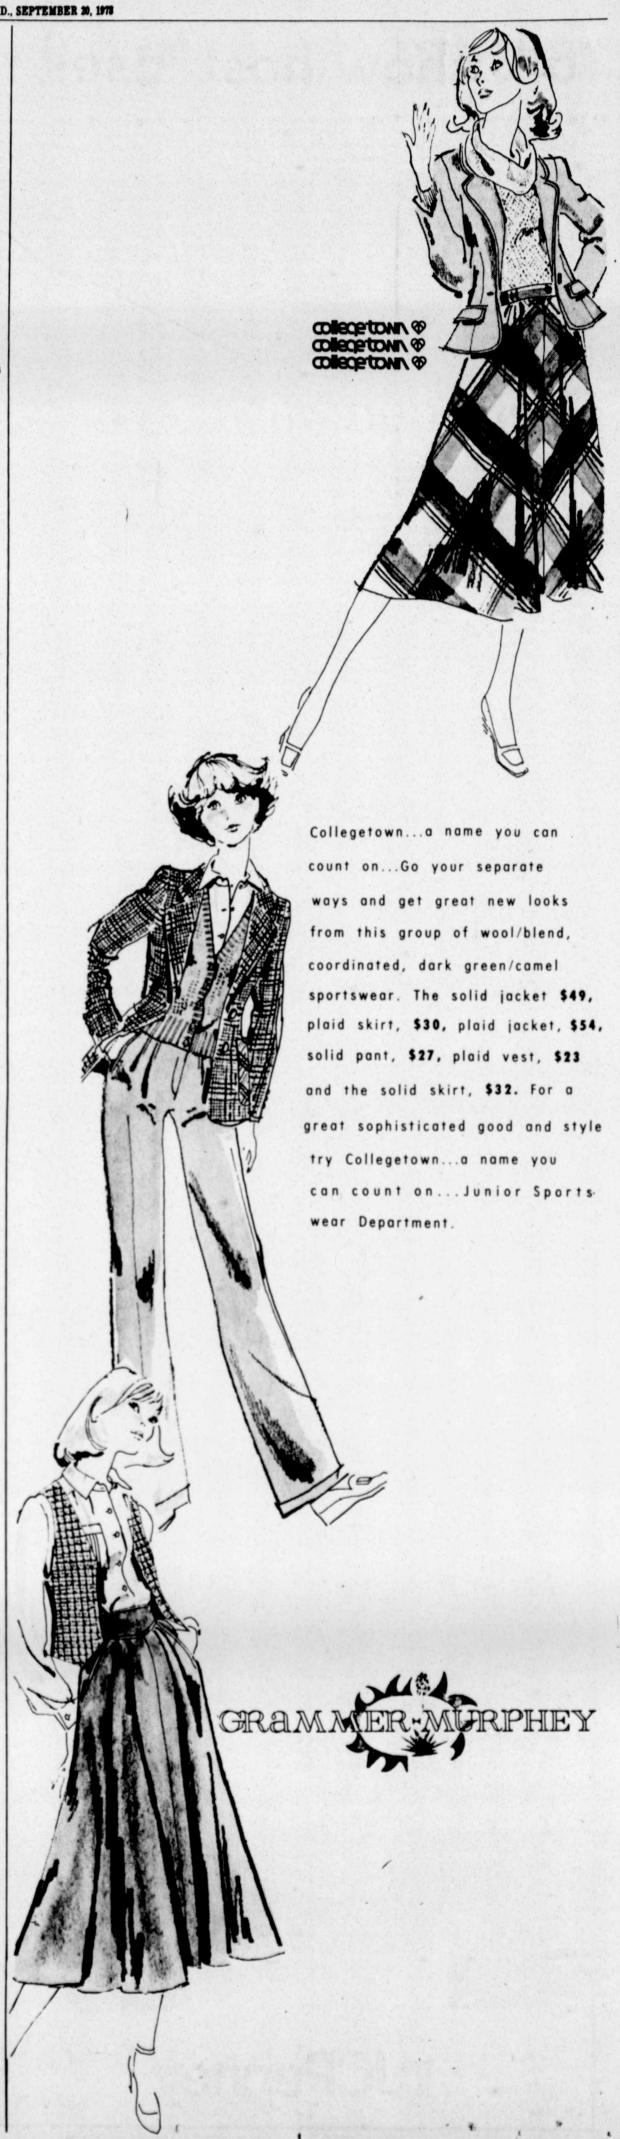

Abilene held a local option election June 17 and a July 10 canvass by the Taylor County commissioners court showed that anti-liquor forces won. However, a second canvass on July 20 changed the results to favor the "wets."

Mathews' order said an Abilene judge should never have ordered the second canvass, leaving the July 10 canvass as the official election re-

McBeath says he has received several applications for liquor licenses backed up by the county clerk's certificate that the July 20 canvass showed the city was wet. Mathews' order keeps McBeath from issuing the licenses, so he appealed to the supreme court.

A suit challenging the July 10 canvass has been filed in Abilene but no hearing has been set.

ports.

SECTION

LONDON - The British government's oil sanctions against Rhodesia for the past 13 years have been totally ineffective, according to a blue ribbon official report released Tuesday.

In fact, the amount of oil consumed in Rhodesia has doubled since the country's unilateral declaration of independence from Great Britain in

Further, the report stated, from 1965 to 1967, subsidiary companies of British Petroleum and Shell actually shipped oil directly to Rhodesia apparently without the knowledge of the parent companies.

The discovery of this led the British government under Prime Minister Harold Wilson to tacitly approve a swap arrangement under which oil was provided to Rhodesia by a French company, whose stocks were in turn replenished by British Petroleum and Shell.

The government's justification for the oil swap - after learning of the sanction-busting by the oil companies - was that it could not really enforce an oil embargo again8st Rhodesia without coming into a serious economic confrontation with South Africa, through which some of the oil was

And British officials decided that

## Explorers scheduled in West Texas areas

Three West Texas counties have gained locations for wildcat operations, and field work has been reported in other Permian Basin counties.

**HMH** Operators of Midland spotted its No. 1 Harwell as an 8,000-foot wildcat in Dawson County, one mile northwest of Pumpkin.

It is No. 1 Harwell, 660 feet from south and west lines of section 13, block M, EL&RR survey and 1.5 miles southeast of the Welch field.

#### RORDEN WILDCAT

Great Western Drilling Co. of Midland No. 1 Miller will be drilled as an 8,600-foot wildcat in Borden County, 9.5 miles northeast of Gail.

Location is 467 feet from north and 1,980 feet from west lines of section 48. block 30, T-6-N, John H. Gibson sur-

It is 7/8 mile north and slightly east of the Gail, South area. Elevation at ground level is 2,555 feet.

GARZA EXPLORER Wil-Mc Oil Corp. of Dallas sche-duled its No. 1 V. F. Lott as an 8,700-foot wildcat operation in garza County, 12 miles southwest of Post.

## Atoka well potentials

Amoco Production Co. has filed potential test for the second well in the Fasken, South (Atoka) field of Ector County

It is No. 1-BF David Fasken, 16 miles north of Odessa.

Operator reported a 24-hour flowing potential of 240 barrels of 43-gravity oil and 13 barrels of water, through a 17/64-inch choke. Gas-oil ratio is 1,-050-1

The pay section, behind perforations from 10,178 to 10,278 feet, was acidized with 10,000 gallons.

Total depth is 13,231 feet and 5.5inch casing is cemented at 10,688 feet. The plugged back depth is 10,320 feet and the ground elevation is 3,038.6

Wellsite is 1,980 feet from north and east lines of section 20, block 42, T-1-N, G&MMB&A survey. The project originally was staked

as a wildcat. It is 7/8 miles northwest of the tripple discovery of the Fasken, South (Wolfcamp, Fusselman and Ellenburger) pool. The Railroad Commission schedule shows no wells to be producing from the Ellenburger

The No. 1-BF David Fasken is approximately one mile northwest of the other Atoka producer in the pool.

Location is 2,517 feet from south and 1,609 feet from west lines of section 12, block 1, Jasper Hays survey. There is no nearby production. Ground elevation is 2,540 feet.

#### GAINES PROJECT

Amerada Hess Corp. announced location for an 8,975-foot project in the Seminole (Wolfcamp) pool of Gaines County, four miles northwest of Se-

Location is 1,880 feet from north and 660 feet from west lines of section 229, block G, WTRR survey, A-302. Ground level elevation is 3,346 feet.

The Railroad Commision of Texas proration schedules shows one Wolfcamp, one Wolfcamp lime and one Wolfcamp reef well in the Seminole

#### MITCHELL TESTER

Sun Oil Co. No. 8-A J. F. McCabe is to be drilled as a 7,300-foot Ellenburger project in the Jameson, North area of Mitchell County, four miles north of Silver.

It is 660 feet from north and east lines of section 3, block 1-A, H&TC survey. The location is 1.5 miles southeast of Ellenburger production in the Dixon field.

#### CROSBY STEPOUT

Boone and Moore Oil Co. of Lubbock spotted No. 3 Amoclo-Collier Estate as a 3/4-mile southeast stepout to production in the Ridge, South (Clear Fork) pool of Crosby County, 14.5 miles south of Ralls.

It is 1,980feet from south and 660 feet from east lines of section 10, block 2, DAS&E survey. It is contracted for a 4,200-foot bottom.

#### STERLING WELL

The Sterling Co. No. 1-17 Terry (formerly W. C. Blanks No. 1-17 Terry) has been completed in the W.A.M. (Fusselman) field of Sterling County, six miles southwest of Sterling City.

Two and one-quarter miles northeast of other Fusselman production, it finaled for a daily flowing potential of 115 barrels of 66.7-gravity oil, with a gas-oil ratio of 9,809-1, through perforations from 8,676 to 8,698 feet.

The pay section was acidized with 5,000 gallons. The flow was gauged through a 14/64-inch choke.

Total depth is 8,800 feet and 5.5-inch casing was landed on bottom. The plugged back depth is 8,750 feet. Ground elevation is 2,612 feet.

The well is 660 feet from south and 933 feet from west lines of section 17, block T, T&P survey.

The well originally was sgtaked in the Conger (Pennsylvanian) pool. It is 7/8 mile northeast of production from that pay section.

#### such a confrontation would risk "seriously damaging" the British economy, the report said.

In 1970, the Conservatives replaced the Labor government and they apparently went along with the swap agreement under which Rhodesia got its oil through Mozambique, then a

During much of this period, the British navy spent an estimated \$200 million maintaining a blockade outside the Mozambique port of Beira.

This blockade was practically useless - since the oil was coming in at the capital, the Port of Lourenco Marques. The report was commissioned by

Foreign Secretary David Owen 18 months ago when he appointed a to investigate the charges that the oil companies were breaking the embargo. The Bigham report is expected to cause reverberations in Britain's political world.

While senior government officials had knowledge of the ineffectiveness of the oil embargo and of the swap arrangement, neither Parliament nor the British public was informed.

And now, politicians of both the Labor and Conservative parties have begun arguing as to who knew that the embargo was being broken. Sir Harold Wilson, the former

prime minister, denied knowledge of Yet his former colleague, Common-

wealth Secretary George Thomson (now Lord Thomson) said that he had conveyed in writing to Wilson and other ministers a full account of the swapping arrangement in 1968.

He also told the Bigham report investigators: "We (the government) came increasingly to the conclusion that we couldn't bring the Rhodesian government to an end by sanctions, unless we were prepared to apply them to South Africa. We were under no circumstances willing to do that, and therefore the more we went into the repeated problem of the allegations about oil from British companies reaching Rhodesia, the more we came to the conclusion that the best we could make of a bad job in this respect was to be in a position to say at least there was no oil from British oil companies reaching Rhodesia.'

## Lignite strip key to fight

ROCKDALE, Texas (AP) - A rich strip of lignite running from San Antonio to Texarkana is the key in Texas' fight to cope with mounting energy needs, Railroad Commissioner John Poerner said Tuesday.

Poerner also told a Rockdale civic club luncheron that Texas was lucky because the major lignite deposits are found in areas that are neither expecially good for farming nor covered by large rock formations.

"This band of lignite which runs through Rockdale will bring more major industry and more jobs to that elongated region," he said.

Poerner said the development of

Texas lignite mining increased from 15,000 tons per year in 1890 to 1.2 million tons annually in 1918 when use of oil and natural gas became the energy of the day. The revival of lignite output reached 16.9 million short tons in 1977.

"By 1984. Texas lignite production is forecast to exceed 70,000 short tons," he said.

Poerner pointed out that the Surface Mining Act of 1975, which is administered by the railroad commission, requires that all mined land be returned to a "substantially beneficial" condition

## Governors say victory will prove disastrous

HILTON HEAD ISLAND, S.C. (AP) - President Carter's energy chief has been told by two Southern gover-nors the administration's victory on natural gas price deregulation will prove "disastrous.

Gov. Edwin W. Edwards of Louisiana complained to Energy Secretary James R. Schlesinger Tuesday that the advise of experts from oil-produc-ing states has not been solicited and ignored when offered.

"You're imposing intolerable re-strictions on us," Edwards told Schlesinger. Their confrontation came during the Southern Governors' Confer-

"If you expect us (oil-producing states) to be your savior, why don't you listen to us?" Edwards said.

Schlesinger had just told the Dixie governors that Carter's energy bill will pump additional natural gas supplies into interstate commerce, reduce the U.S. dependence on foreign oil imports and improve the nation's ability to wield a firm hand in foreign policy matters.

Shortly after the energy secretary spoke. the U.S. Senate voted 59-39 against sending the multi-billion dollar compromise energy bill back to a House Senate conference committee.

Anticipating that favorable vote, Schlesinger said recommital would have had the effect of killing the bill and "continuing the 30-year war"

over natural gas price deregulation. Gov. Dolph Briscoe of Texas also predicted the administration's energy bill will prove a fluke as far as increasing natural gas supplies through incentives to producers to open new

Briscoe, less hostile than Edwards, told Schlesinger he hopes his predic-

## How votes cast

WASHINGTON (AP) - Here is the 59-39 roll call vote by which the Senate on Tuesday rejected an attempt to send the natural gas compromise back to committee for redrafting. A vote in favor was to resubmit the measure to committee

Democrats For (18) Abourezk, S.D.; Anderson, Minn.; Bayh, Ind.; Bentsen, Texas; Biden, Del.; Byrd, Harry, Va.; Haskell, Colo.; Hollings, S.C.; Humphrey, Minn.; Johnston, La.; Kennedy, Mass.; Long, La.; McGovern, S.D.) Metzenbaum, Ohio; Nelson/Wis.; Proxmire, Wis.; Rie-gle, Mich., Sarbanes, Md.;

## Another righigh reached

HOUSTON (AP) - An industry survey indicates domestic oil and gas drilling operations have moved to another 20-year high.

A weekly survey compiled by the Hughes Tool Co. indicates 2,349 rotary rigs were in use the week ending The new count is the highest since

2,356 active rigs were reported the week ending Dec. 22, 1958. The 2,349 total also marks the eighth time the industry has recorded a new 20-year high since early May. The previous high this year was 2,339 in the week ending Aug. 21.

tion turns out to be wrong. He promised to do his best to make the new energy legislation work, although he has little confidence that it will.

Schlesinger insisted there are "incentives" in the bill to encourage production of more natural gas. If they do not work, he said he will push for remedial legislation in two years. "None of us from gas-producing areas are aware of any incentives in

the bill," Gov. Edwards said. Even the authors are not proud of the energy legislation, he said.

"The best we can get is that it's the only bill in town," Edwards told Schlesinger. "That's a poor excuse for passing legislation.
Schlesinger conceded the bill is a

compromise that does not totally satisfy either proponents or opponents of price deregulation.

Schlesinger said the legislation "provides us with a way out" of a 30-year dilemma over natural gas pricing policies.

## Gas not hitting market

HOUSTON (AP) — A gas executive said Tuesday some natural gas is failing to find markets because of widespread conservation programs and industrial switching to alternate

Ernest T. Robinson, Texas Eastern Transmission Co. senior vice president, said conservation by all sectors of the gas market has reduced the

demands on all pipeline systems.
"Conservation by industry and the public consumer and phasing out of gas as boiler fuel in the industrial

market are making their impacts

felt," Robinson said. Speaking before the Gulf Coast Measurement Society, Robinson esti-mated conservation has reduced natural gas demand by 10 percent in

some areas and 30 percent in others. The situation, he added, has made a marked reduction in the gas requirements for the interstate market that is served by long-line transmission

systems. "Instead of supplying nearly onethird of the total energy requirements of the nation we now supply less than

### Field work announced

W. C. Blanks of midland announced location for a southeast offset to the discovery well of the Maroon Cliffs, South (Morrow) gas field of Eddy County, 20 miles northeast of Carls-

SHOE

DICK TRACY

IN THIS MUSTY LIBRARY? THE MOLD IS ALREADY STARTING TO GROW ON YOUR BOOKS...

I'M JUST ... DAZED. HIT THE GROUND KIND OF HARD.

REX MORGAN M.D.

'Good news, Mr. Parker. I located that rattle in your car!"

NOTATA

HE'S GOING TO BE OKAY, DICK.

HE'S FINE

HE'S ASKED

OH NO,HE

WILL COME

KILLED IN THAT

### CROSSWORD

ANSWER TO PREVIOUS PUZZLE

## U.S. spokesman answers critics of Savings Bonds

By JOHN CUNNIFF **AP Business Analyst** 

NEW YORK (AP) - Why should you buy U.S. Savings Bonds - or, in fact, save at all?

In view of a government-induced inflation rate that exceeds the return on savings bonds — 6 percent if held for at least five years, less if sold before then the question was asked here recently.

Prompting it was the realization that 10 percent inflation for five years, for instance, would reduce today's \$75 bond to pretax buying power of \$61.16 rather than the \$100 indicated by Uncle Sam. That costly possibility didn't seem to fit the tone of

Uncle Sam's recent promotional message that owning Savings Bonds was "no war of nerves" but "all peace of mind." While losing money and being taxed for it? While saving for retirement, as suggested by Uncle Sam,

and then finding there aren't nearly enough funds? While Sam's deficits fuel further inflation? Uncle Sam was upset by the criticism. His spokes

man, Jesse L. Adams, deputy director of the bonds division, didn't dispute the inflation facts, but he felt reasons remained for buying U.S. Savings Bonds. He was asked, therefore, to prepare a response, much of which is relayed without editorial com-

"Surveys indicate the three main reasons (for buying U.S. Savings Bonds) are: safety of the bond, interest rate and tax deferral, and it's good for the

"Savings Bonds, backed by the full faith and credit of the U.S. Government, are the ultimate in safety.

There are no defaults, and lost, stolen or destroyed bonds are replaced free by the government. "In addition, since Savings Bonds are immune

from market fluctuations, their value can never be ess than the amount paid for them.

"Savings Bonds pay 6 percent, compounded semi-annually, when held to their 5-year maturity. Six percent — in tandem with tax exemption and tax deferral features - can provide even higher effec-

"No state or local income taxes are ever due on the bonds, and federal income tax can be deferred until eash-in time or final maturity.

"The third reason - patriotism and the country's good - is also important. Buyers hold Savings Bonds, on the average, more than twice as long as marketable Treasury instruments, and this longevity reduces refinancing and related costs to the

"Also, because bonds are held so long, and by so many people, they provide needed stability to the debt repayment process.

"After 28 years with the Savings Bond program, I am convinced that another major reason why people buy bonds is their ease of purchase. Almost 40,000 banks or savings institutions sell them. In addition, 9.5 million Americans buy them at work through a payroll savings plan.

"The plan 'freezes' the saver into regular savings and provides for a painless kind of fiscal discipline. This is important, since surveys show that one out of four American families have no financial savings of any kind to tide them over rough times.

"This brings up the larger question of why save money at all in this era of high inflation? If not savings, how can people shelter their money for future use?"

Adams notes that some advisers suggest buying collectables, such as jewelry, books or antiques, but he observes that none of these is liquid, and that all of them require special knowledge and skills.

Others suggest certificates of deposit, real estate and stocks but, Adams observes, all these assume the existence of savings. And these savings, he

comments, might be provided by bonds.

"As for inflation, that eats holes in everyone's billfold, and affects all forms of savings and investments. Probably no form of liquid saving can 'keep up' with today's inflation.

"But not saving is not the answer!"

## Crabber prefers peace of waters

CANTON, N.J. (AP) - He doesn't work at his job

for the money Richard Finlaw, 31, is one of about a dozen crabbers along the Salem County coast of the Delaware Bay. He prefers the water, the quiet peacefulness and the independence.

"I've tried everything, and this is what I like," he said.

"I rode a tractor-trailer, I rode a bulldozer. I worked in a factory. None of them suited me. Out here, I'm my own boss." He lives in a county that hosts the largest organic

chemical complex in the nation. And the county will soon host one of the largest nuclear power complexes But Finlaw's job is guided by the cycles of the

wildlife of the marshes and the bay.

In the July through October crabbing season, Finlaw sets out for the bay every morning and is busy for six or seven hours a day. He steers the boat to the floats that mark each of his 150 pots, grabbing the line to each pot with a gaff, reeling in each pot from its bed some 20 feet below on the bay floor.

He shakes out the wriggling, clattering, white-bellied crabs into a sorting trough, throwing away the old bait and packing the fresh. Then he throws the pot back overboard for the next day's catch. After a morning of crabbing, Finlaw heads for his

"I work about 40 to 50 hours a week on the farm in addition to this (crabbing)," Finlaw said. But he doesn't do it just for the money

"Out here," he said, "it's just nice and quiet. Ain't nobody running by, hollering and blowing horns.'

Finlaw learned crabbing as a boy because his family has a history of working the sea.

"My father's father used to fish for shad and sturgeon. And his father, too, he was a bayman. He

loved the water.' Finlaw says there's more to crabbing than meets "A lot of people think all you got to do is put your

pots down in the water and the crabs crawl right in," he said. "But to make a good dollar, you've got to study your pots every day. If you see four in the end of a row with nothing, you've got to move them.

"It looks easy, but you've got to do a lot of brainwork. You have to have a map of the bay in your head," he said. Finlaw said a crabber did very well if he could clear \$100 a day.

"If I just make enough to keep my bills paid, pay for the kids, and have a little to eat, I'm well

## Save your opponent from 'lucky' play

By ALFRED SHEINWOLD

Our week-long series on hornswoggling an opponent into playing a low card continues with a hand that teaches a great moral lesson: Never to allow an opponent to make the right play by accident.

> South dealer North-South vulnerable

NORTH ♦732 ♥J4 ♦ J 10 6 ♣ K 9 8 4 2

EAST WEST ♠ K 10 6 **Q98** ØQ 108 ♥A9732 087432

> SOUTH ♠ A J 5 4 ♥K65 OAKQ ♣ A J 10

West North East 3 NT All Pass

Opening lead — ♥ 3

You play dummy's jack at the first trick in case West has led from the

ace-queen. But East produces the queen, and you must take the king of hearts at once.

Now you must bring in the clubs. If you lead the jack of clubs, West may believe it is always right to cover a jack with a queen. Such a play is often wrong, but in this case West could block the clubs if he played his queen on an early round of the suit.

#### MIGHT HATE HIMSELF

Since West might hate himself if he made the right play by accident, yu made the right play by accident, you second trick you lead the ten of clubs. The odds are overwhelming that the ten will win the trick if West has the

Having stolen this idea, you cash the ace of clubs and then lead to the king to take five club tricks and your contract.

#### **DAILY QUESTION**

Partner opens with one club, and the next player passes. You hold: S-732; H-J4; D-J106; C-K9842. What do you say?

Bid two clubs. This is a pretty horrible hand, but you do have good support for clubs even if partner has only three cards in the suit. Raise to two clubs and then retire from bidding.

## Wrecking yards, 'cut shops' add to commercial car theft profits

Editor's Note: This is the fourth of a five-part series on auto theft - the scope of the problem and its impact on the Permian Basin. Part Five will discuss what Midlanders and others can do to prevent car thefts.

By GUY SULLIVAN R-T Staff Writer

Where once the "joy rider" abandoned the stolen car at the curb and vanished, the steal-for-profit thief in Midland and elsewhere now parks in a "cut

shop" and the motor vehicle vanishes It's called commercial auto theft and it's costing Americans and Texans billions of dollars in lost

property each year. 'Cutting" has become a flourishing operation in the nation's multibillion per year vehicle theft business, according to officials with the National Auto-

mobile Theft Bureau. Authorities say this business is so profitable because of the increased cost of auto repairs, parts and labor, and the diminished ready availability of some replacement parts.

"Organized crime is involved in the stripping and

selling of stolen auto parts," said Darrell Joy of the San Marcos-based Texas Crime Prevention Insti-He said, "This has become more common in Texas in recent years. You take the average \$6,000 vehicle. Once it's stolen, the value decreases some. But

thieves strip and sell it part by part with the average seller making around \$24,000 per vehicle." He said there is some movement to regulate the private sale of auto parts by firms in big warehouse

"The law enforcement profession nationwide is pushing for federal regulations to monitor the sale of

auto parts," he said. In cutting and stripping operations, the major body parts of an automobile are sold to rebuilders or body repair shops because it is more profitable for an auto shop to replace a car door with one already assembled or a painted one, according to Texas

Wrecking yards and "cut shops" raided by law enforcement agencies in 1977 contained vehicles ranging from automobiles to new commercial semitractors valued at close to \$100,000 each.

In 1977, the National Automobile Theft Bureau participated with lawmen nationwide in investigating 288 auto theft ring cases. The results involved a total of 3,817 vehicles, worth an estimated \$18,577,-The Journal notes to do anything about my 000, which were recovered, according to officials.

One investigation of a St. Louis, Mo.-Beaumont, Dear F.K.: There has THC with other drugs really considered an Texas, ring resulted in the recovery of 69 late model In another similar case, lawmen and bureau in-

vestigators identified some 130 stolen autos and In addition, FBI personnel and Fort Worth lawmen

can be considered as a equipment in "Operation Westwind" during 1977. Authorities, posing as "fences," purchased more unacceptable, that better larger amount of a given it is beneficial to both than \$1.5 million worth of stolen property. A total of drugs are already drug to achieve a desired partners since you both 91 defendants were named in 181 indictments by the exercise at the same Tarrant County Grand Jury as a result of the

to direct research efforts been found that are ef- pound of fat, intercourse Commander Worth Seaman of the DPS' Motor fective in lowering high would have to take place Vehicle Theft Service said half of the vehicles stolen The marijuana blood pressure and lack 23 to 24 times a day! You in Texas are recovered within 48 hours, but an ingredient at issue is one or more side effects- have to be pretty estimated 25 percent are partially or totally stripped as a commercial venture for gain.

While mainly active in urban areas, according to Dear Dr. Solomon: I lawmen, commercial auto theft operations have know polio is bad, but been known to crop up in rural locations, also, they

However, in Texas, authorities indicate major

areas of concern include Houston and the Dallas-Fort Worth area plus San Antonio and the Mexican border as far as commercial theft goes

"There is evidence that organized crime is increasing its infiltration of the commercialized auto theft business," said C.C. Benson, manager of the National Automobile Theft Bureau's Southwestern Division in Dallas.

"I think this is true all over, especially in Texas. Theft rings represent a substantial portion of auto thefts, but not the majority. I'm saying that commercial organized auto theft is a substantial problem." Benson declared.

He represents a non-profit service supported by more than 500 insurance firms. Investigators with his outfit work closely with lawmen to control and eliminate auto thefts. Theirs, Benson admitted.

is a constant uphill battle. Of the estimated 50,000 vehicle thefts reported in Texas in 1977, he said each vehicle was worth an

average of \$2,500 "That's \$150 million annual gross value of stolen cars in a year's time in 1977. That's an estimate, but with recovery of 75 percent of these annually, you still wind up with a net loss of \$50 million worth of

property for last year," Benson said. Seaman said vehicle thefts have shot up by 9 percent this year over last year in Texas "mainly because of theft rings and the stealing of late model vehicles and stripping them for their parts." He said over a period of several years, law enforcement has become increasingly aware of the com-

mercial auto theft problem. Commercial vehicle thieves have two main forms of operation: steal a vehicle and resell it, or steal it

for disassembly. Seaman said disassembly is a proven factor. He cited as support of that contention the continued

decline in stolen vehicle recoveries "This deterioration has been evident for the last five years, and the ratio of late model vehicles in the unrecovered category is substantial," he said.

He said inspection of auto salvage yards and informant information indicate an abundance of front-end assemblies and tail sections are on hand. and are moving in and out of salvage yards daily. "Pickup trucks deserve special note because cabs are in demand as are the front-end assemblies," he

Through contacts with automobile salvage pool operaors, salvage buyers, body shops and wreck rebuilders, the DPS has consistently verified that:

- Large quantities of front-end assemblies and tail sections are being transported between metropolitan areas and via transcontinental shipments.

- Voice and teletype communications circuits used by groups of salvage dealers serve to advertise the need for certain parts. The order is then apparently filled through selective theft and disassembly, often even allowing for desired color and interior

- The "legitimate" dealer is being sold out and undersold due to the availability of stolen parts and because the price of the stolen merchandise undercuts the market for similar parts from wrecked

 Large trailers (built to carry four levels), lesser vehicles operating behind pickup trucks and rental equipment are transporting this type of merchandise from the east to the midwest and the southwest. Similar components also are being shipped from Texas to California

DPS investigators said in addition to information received from the larger brokers and suppliers, they receive daily individual tips on the detection of single sales by suspected violators.

Also, investigators said concerted efforts to search suspected salvage yards often yield evidence of cut up and presumably stolen vehicles.

Seaman cited several reasons for the continued "growth" of the disassembly problem.

The price of new replacement sheet metal parts has increased greatly, and the hourly shop labor price in auto rebuilding garages has reached \$12 to \$15 per hour or more," he explained.

He also said in order to move rapidly, minimize labor and improve on quality of reconstruction, rebuilders now place high priority on repairing front-end collision damage with a complete front-end

Also, he said, rear-end collision damage sometimes is repaired by replacing the entire body from the firewall back.

In the latter case, he said, rebuilders simply cut only across the floor in front of the seat and at the two windshield pillar posts

Seaman said the value of the sections to be used in such operations, especially in popular luxury car cases, is from \$500 to \$1,500 per unit depending on the make and model.

He said rapid increases in costs of new and used vehicles in recent years have made rebuilding "more feasible" and are reflected in the much increased value of salvage.

Seaman said another major problem is that once major components of sheet metal are removed from a stolen vehicle "they become just that, 'parts' which usually are not identifiable and can be sold without title or even a bill of sale in most jurisdic-

He emphasized three important facts about the commercial auto theft problem:

First, he said, informants indicate a street thief may receive from \$200 to \$400 "just to steal and deliver a vehicle.

Second, Seaman said, those who do the cutting and sell the first time to brokers and peddlers "will get about 50 percent of what the final consumer will

Third, only a few salvage buyers can be approached or even depended upon as informants. "Many complain, however, about being driven out

of business by illegal operators," said Seaman. "Most will not cooperate to set up a 'buy,' pleading fear of retaliation or a desire to not get involved, said the DPS commander.

Solutions to this problem which Seaman proposed include the following:

- Titles: Certificates of title, format and configuration, alter-proof paper, clearance with a state of origin before new title issued in second state (either surrender the title or clear by fast communication), and tighten control of certified copies of original titles

- Registration: Require vehicle operator to possess registration receipt.

Salvage title: Require all states to start the issuance of a salvage certificate in lieu of original title for vehicles sold as salvage. Adequate inspection and certification of all formery "salvage vehicles" before issuance of a "restored" title should be

- Out of state inspection: Physical inspection of every used vehicle before titling one state to an-

other - Licensing of dealers in the new, used and salvage businesses.

- Enforcement of uniform record keeping systems to adequately identify all purchases and sales by auto dealers.

 Vehicle identification number replacement: Required, he said, is a need for uniformity in the state administration of issuance of attachment of all replacement vehicle identification numbers.

BISMARCK, N.D.(AP) — For 16 years Jim Fields has tramped across America, earning his way in print shops and backrooms of more than 40 newspapers. Now, the 35-year-old Fields and his wife want to

find a place to settle down. So Fields quit his job as a night markup man for the Bismarck Tribune. He and his wife, Alice, secured their belongings, stowed the six-foot rubber raft atop their four wheel drive pickup, hooked up their 26-foot trailer and headed for the Pacific

"I simply want to find a job in an area that I think is beautiful and live out my life like anyone else." Fields says. "At one time I either liked a town or a newspaper, but I never found a place where I liked both. Now, I'm willing to concede the fact that no place is perfect. Now, I'm not as picky as I used to

Fields, who says he's still learning his craft, got into the printing business when he was 19, fresh from two years in the Navy. He landed a job in the art department with Price Bros. Lithographers in Bridgeton, N.J., doing color work and making labels for tin cans.

Soon he took a job with the Van Nuys Publishing Co., a large classified advertiser in California, and became a member of the International Typographi-

"Once I got into the Typographical Union, I got a traveling card. It introduces me to the next local union that I go to," he says. Since Fields got his card, he has criss-crossed

the opening of

THEATRE MIDLAND

September 7 · September 30, 1978

America, working for newspapers and print shops from New York to Los Angeles, with stops in Chicago, San Francisco, Denver, Miami, Philadelphia and points between.

"Normally I average about four months per job, with the shortest period being one day and the longest one year," Fields says. Travels also took Fields, who reads and speaks

fluent Spanish, to Bolivia, where he worked for six months on a newspaper there. "I don't have to make an application for a job. All I have to do is drop my traveling card with the local union and pick up my working card and go to work,"

During his travels, Fields never has known lean

"I've always been able to get a job when I've needed one," says Fields, who has experience in typesetting, ad makeup, newspaper page makeup, proofreading, and markup.

Fields looks at his travels as an educational

"The more I see of other people, the more I understand about myself. I've got a collge education through my worldly experience," says the junior high school dropout.

"A great majority of printers respect tramp printers because they've been in a great number of shops and have done a good number of different things," he
