# Pope John Paul I dies in his sleep

By DENNIS REDMONT

VATICAN CITY (AP) — Pope John Paul I, the humble "little man" elect-ed pontiff of the Roman Catholic Church just 34 days ago, died of a heart attack during the night, the Vatican announced today. The 65year-old pope's reign was one of the briefest in history but his warmth and good humor had nonetheless endeared him to millions.

An official Vatican announcement said John Paul, who had a history of health problems, died at about 11 p.m. Thursday (5 p.m. EDT) while reading the 15th-century book of meditations

"The Imitation of Christ." In death he still had his usual smile,

said a senior cardinal.

The body was discovered this morning at about 5:30 by his private secretary, the Rev. John Magee of Ireland, who went to the bedroom after noticing the pontiff was not in his private chapel at the usual time, the announcement said. The bed light

A doctor was immediately sum-moned, and he attributed death to "acute myocardial infarction." Monsignor Canisio Van Lierde, the pope's vicar for Vatican City, blessed the

us so suddenly," said Carlo Confalonieri, the 85-year-old dean of the College of Cardinals. "We are all with our eyes turned upward wondering about the inscrutable designs of

By noon, the body of the church's 263rd pontiff lay in state beneath a fresco of angels in the Vatican's Clementine Hall, just a few rooms away from the bedroom where he died. A stream of people, from cardi-nals and political leaders to foreign

tourists and housewives, filed past. The body lay on a velvet-draped bier, dressed in a white embroidered

ankle-length robe and a red chasuble, a white mitre on his head and a pastoral staff placed alongside the body. His hands, the fingernails blackened, were clasped together holding a rosary. His mouth was slightly open. Behind the bier stood a tall crucifix.

The bells of the churches of Rome tolled in unison at noon in mourning. Some faithful knelt in St. Peter's Square and prayed. Messages of condolence began flowing in almost immediately from around the world.

The Italian government declared na-

tional mourning.
In the north Italian mountain hamlet where the pope was born, the 30 villagers attending morning Mass burst into tears when the parish priest interrupted the service to announce

Confalonieri said in an interview: "He lay in his bed, with the face slightly reclined on the right, with his usual smile. I prayed, kissed his hand, then went to the papal chapel to say Mass."

Vatican sources said that before retiring to his bedroom Thursday night, John Paul learned about the fatal shooting of a Communist youth earlier that evening in a right-wing ambush in Rome. "They kill each other even among young people," he reportedly commented in what may

As it did after 80-year-old Pope Paul VI died on Aug. 6, also of a heart attack, the church machinery of papal succession immediately went into motion. The Vatican's secretary of state, French Cardinal Jean Villot, who takes over church leadership during the interim, ordered that the 112 cardinal-electors around the world travel back to Rome to prepare

for the selection of the 264th pope. Under church law, the conclave of cardinals must meet between the 15th and the 20th day after the pope's death. The Vatican said all cardinals

in Rome would meet Saturday morn-

The election of the little-known Car-dinal Albino Luciani of Venice as pope on Aug. 26 had surprised Vatican observers, who believed the likely choice was among a dozen more prominent cardinals. Speculation today about a successor to John Paul again centered on the same halfdozen Italians.

Vatican officials said Luciani met several criteria desired by the August conclave of cardinals — pastoral ex-perience, a simple style and little connection with the Vatican bureaucracy. The conclave, which elected him on its first day of voting, was one of the quickest of recent times.

These criteria could prevail again for the election of his successor. But the cardinals this time might also put new emphasis on health and relative youth. The youngest of the assumed front-runners is Cardinal Giovanni Benelli, 57, of Florence.

Though he reigned barely a month, Pope John Paul, son of a migrant worker, made a lasting impression with his self-effacing humor and

"I am a little man accustomed to little things and to silence," he once

"I never saw such eagerness in people as in the persons who listened to him," Cardinal Sebastiano Baggio, head of the Congregation for the Bish-ops, said today of John Paul.

"I think the hopes of the world, Catholics and others, have been shattered," said Monsignor Loyola O'Dougherty in Tucson, Ariz., in a reaction typical of many. "All of us looked forward to several years of action and inspiration from the

First lady Rosalynn Carter, in Miami, issued a statement saying Pope John Paul's "warmth, his open-ness and his love" had won him the

Fair with warm afternoons and mild nights through Saturday. Details on Page 2A.

J.D. Shannon, manager of Howard McCarroll Lumber Co., said the strike could start to have an effect on his business fairly quickly. The company has five carloads of lumber due this week and another 11 cars due next week, he said.

"We could start running short of some lengths fairly soon, and it could really hurt us if it lasts two to three weeks," he said. Like most businesses, he will start

trying to route as much material by truck as possible during the strike. He noted, however, that shipping anything across several states -

most of his lumber comes from Washington and Oregon — by truck costs a

"We can't do anything but try to

ride it out," he said. Although most new cars are shipped by rail to major points, area car dealers are not too worried about the prospects of the strike.

The 1979 autos have been arriving for the past month, according to Bob Christensen, truck and fleet manager for Frank See Chevrolet. Unless the strike lasted several weeks, he said,

with

bush that's native to nothern Mexico. Sultemeier is a range specialist for the Texas Agriculture Extension Ser-

The two-foot-tall guayule, which is cropping up around Fort Stockton, produces a liquid latex but has a drawback which demands patience: It can be harvested only once in four years. By weight, it's 15 percent rub-

Anyway, should the grayish-green plant impress academic, political, agricultural and marketing-and-busi-ness circles, maybe it'll make a hit with the consumer. At least, the U.S. will have a chance, remote perhaps, of being relatively independent in genuine rubber production.

The sperm whale, too, ought to have high hopes of being left alone to be free in the wilds of the oceans. Con-

servationist and protectionist groups are rooting for the giant "cachalot." ("Remember Moby-Dick!").

Successful production of the jojoba plant may play a major role in the "Save-the-Whale" movement. This plant, which now is growing in Cali-fornia and Arizona, yields an oil similar to that of the sperm whale oil. It withstands high pressure and heat and is more economic to produce than taking oil from the slaughtered mammal of the seas. With more than a little luck, the whales may survive.

Jojoba, too, may be a West Texas

There may be far more natural resources in West Texas other than people, petroleum, cattle, minerals industry. The era of the exotic plants may be arriving.

## Navy squadron fears hex

By ANDREW SCHNEIDER

BRUNSWICK, Maine (AP) - The Navy fliers who patrol the waters of the Atlantic out of Brunswick Naval Air Station are scared. They think

their base may be jinxed In the past nine months, 28 colleagues have died in three separate, puzzling crashes of the propeller-driven P-3 Orion — a top-secret,

submarine-hunting aircraft.

"There's a feeling that the wing has been hexed, jinxed or is under some supernatural spell, and it's almost impossible to fight because we don't know why our planes have crashed," says Rear Adm. Ralph Hedges, commander of all P-3s on the Atlantic Coast.

A list of the most recent Brunswick crashes:

-Dec. 11, 1977. An Orion hits a fog-shrouded mountain in the Canary Islands, killing 13.

-April 26, 1978. An Orion goes down in waters off the Azores, killing

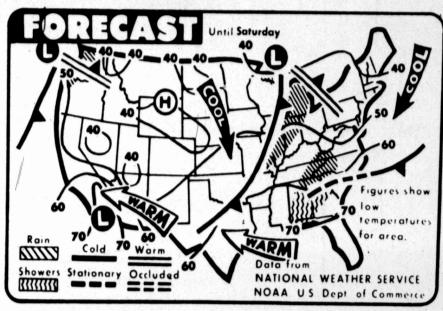

-Sept. 22, 1978. An Orion explodes over Poland, Maine, killing eight. "We have no choice but to list the cause of (two of the) accidents as undetermined," says Lt. Cmdr. Stewart Hopewell, safety officer for the Brunswick wing. "There were no eyewitnesses, no emergency communi-

cations and the sparse wreckage we recovered told us very little."

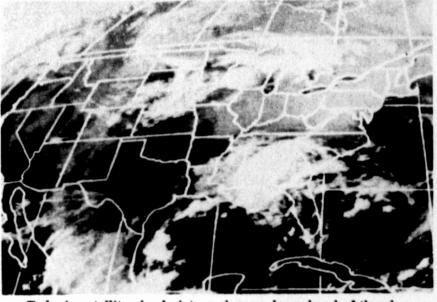

Adds Hedges, "The mystery that still shrouds the two earlier crashes resurfaced immediately when the third plane went down. If we can

### **WEATHER SUMMARY**

Cool weather is expected in the forecast period from today until Saturday morning, for most of the country west of Mississippi. Warm weather will continue in the Southwest and southern California. Temperatures in the East are expected to be seasonably mild except for the northeast where cool weather is forecast. Rain is forecast from southern Missouri to the Great Lakes and showers and rain are forecast from the eastern Gulf to the Ohio Valley. (AP Laserphoto Map)

Today's satellite cloud picture shows a loose band of thunderstorms lying just off the Gulf Coast from Texas to the Florida panhandle where they merge with a cloud shield covering much of the South east of Louisiana. Clouds blanket portions of the Plains from Colorado and Wyoming eastward to Wisconsin. (AP Laser-

### Mystery benefactor presents

school system with \$10,000

CLEVELAND (AP) - A mystery benefactor, who is said to have a particular concern for the problems of urban schools, has presented Cleveland's dollar-starved school system with \$10,000.

The donor was identified only as "the Richardson family," and a lawyer told the school board Thursday night that a similar presentation would be made in New York on Wednesday.

Thomas D. H. Barnett, a Richmond, Va., lawyer, said he did not know where his client lives, but that the family had a background in education and chose Cleveland because of news accounts of its troubles.

"He's never been to Cleveland, and he never intends to be here, probably," Barnett said, describing his cli-

He told the school board that there are no restrictions on the use of the cash, which was in the form of a bank check drawn on the Capital Savings & Loan Association in Richmond.

"It's real," said one board member

as he examined the check.

Barnett told the school board that if more taxpayers were concerned and reached down into their pockets to pay more than their current share of education costs, Cleveland would not be in its current financial crisis.

The school district is in the midst of massive budget cuts and layoffs in trying to find funds to settle a threeweek-old strike and balance its

### Charges no concern when thieves sought

MARIETTA, Ga. (AP) - Burglars who steal marijuana because they think nobody will report it have never met William Tucker.

Tucker did nothing the first time his marijuana supply was stolen from his apartment. But the second time, he reported the theft to police, even though he was charged with possession of marijuana.

## Catholics stunned by pope's death

By The Associated Press

Roman Catholics around the United States, stunned by the sudden passing of "a beautiful and good man," expressed shock and sadness at the death today of Pope John Paul I.

"It was a terrible shock to hear of the death of the Holy Father," said Cardinal John Carberry, archbishop of St. Louis.

The White House said President Carter would comment later today.

Cardinal Terence Cooke of New York, attending a meeting in San Francisco, characterized the pope as a "humble, loving and pastoral lead-

"He offered to all of us the smiling, hope-filled presence of a man chosen to guide us in living the message of love and service that is the good news of Jesus Christ," said Cooke. "Our hearts go out in sympathy to our brothers and sisters all over the world.

Cooke was to celebrate a mass today at St. Mary's Cathedral with San Francisco Archbishop John Quinn, president of the National Conference of Catholic Bishops

Quinn recalled the day in Rome barely five weeks ago when John Paul was named pope: "As he stood on the balcony of St. Peter's in the darkness of that August evening, his warm smile and simple, confident optimism lit a new hope and brightened the expectation of the church and the whole world."

That moment was also remembered by Cardinal John Cody, Archbishop of Chicago.

'Just a short month ago, millions of people scattered across the globe shared the joyous announcement, 'We have a Pope.' And today people throughout the world, even those who knew him only by newspaper report or radio or television are saddened,'

Cody said.
"We pray fervently for the blessed soul of Pope John Paul I, whose pontificate was so full of promise," said Cardinal Humberto Medeiros, Archbishop of Boston.

Spokesmen for the six other U.S. cardinals said comment would be made later today.

Archbishop Thomas Donellan of the Atlanta Diocese, reached in Rome where he is studying with 40 American bishops, said the group was "in total shock."

The bishops had an audience with John Paul last week, and Donellan called it "one of the greatest experiences of our lives.

"He was warm and friendly and there is just total shock here, as if an old and dear friend has gone," Donel-

John Paul's death came as a particularly harsh blow to some because he had appeared to be in such robust

A New Jersey parish priest expressed disbelief upon being awakened with news of the pope's death. "I don't believe you now," said the Rev. Tad Stasik of St. Benedict's Church in Newark.

"It's sad, unbelievable, because I saw him yesterday on television and he is - he was - a healthy man,"

"It certainly is most sudden and shocking," said Bishop James Nie-dergeses of Nashville this morning. "I can hardly believe I'm awake. We are profoundly shocked at the sad

"It just seemed to be so unbelievable because we had no indictions of any bad health — a complete surprise. I can't recall any pope that had such a short reign," Neidergeses

John Paul, 65, died of a heart attack in his sleep. His 34-day reign as the 263rd pope was one of the briefest in the 2,000-year history of the Roman Catholic Church.

After his selection in one of the shortest conclaves ever, relatives said in interviews that his health had always been delicate and that he had been treated twice at a sanatorium for a lung condition.

Monsignor Loyola O'Dougherty, vicar general of the Diocese of Tucson, Ariz., said he was "flabbergast-

"I think the hopes of the world, Catholics and others, have been shattered," said O'Dougherty. "I'm sure it's going to stun every Catholic, this event. This struck me so forcefully because he seemed to be in such remarkably good health. All of us looked forward to several years of action and inspiration from the

Bishop James Rausch, bishop of the Diocese of Phoenix, said he spoke with 10 other church officials shortly after learning of John Paul's death and all were "struck and dumbfounded by the news.'

"I join all Catholics throughout the world in expressing the sadness and grief at the death of a beautiful and good man," said Rausch. "The church had seemed to call for this wonderful man to lead us into the troubled waters of the future, but obviously God had other designs. One's response must be one of faith.'

New York Gov. Hugh Carey, who early last month attended the funeral of Pope Paul VI in Rome as part of the official U.S. delegation, said in Albany that John Paul had "brought a promise of new greatness to the papacy with his rare combination of grace and humility as well as innovation and tradition.

"I pray not only for the repose of his soul, but for the hope we find another with his great gifts," Carey said in a statement

Bernard Casserly, editor of the weekly newspaper of the Archdiocese of Minneapolis and St. Paul, said he was "still reeling with the shock of

"The new Pope had appeared to be following in the steps of Pope John XXIII in so many ways," Casserly said. "I just had a phone call from a woman who was crying who said she felt so close to the Holy Father."

Casserly said John Paul's short reign would have a lasting effect. "His stress on simplicity cannot be discarded by whoever follows hm. The next Pope, God willing, will be every bit as warm and human and gifted as this beautiful man."

### Trash troubles plague officials

(Continued from Page 1A) all residents to use the dump

-Searching for additional landfill space and exploring prospects of using caliche pits for disposal of construction materal.

City officials decided to implement the fee policy when they realized that the landfill site would not last its five-year expectancy period.

Prior to the dump fee, the general

public was putting 5,000 tons of the 9,000 tons of trash in the dump each month, while 4,000 tons was being disposed by the city's sanitation de-

partment, according to Akins. Since the new policy has been instituted, the general public is accounting for only 1,400 tons of the 6,200 tons of trash, while the remainder is being disposed by city trash pick-up crews. Akins said city residents might object to having to pay a dump tax

when they already have to pay for city trash pickup, but that this policy might seem the best way to alleviate the litter problem.

Commissioner Durward Wright proposed that members of city government and the county create a joint study group to review the alternatives. Named to the group were city Public Works Director Fred Baker. Commissioner Charlie Welch, City Councilman Carroll Thomas, county Road and Bridge Superintendent Albert Stewart and County Judge Blake

### Pope dies in sleep after serving for only 34 days

(Continued from Page 1A)

affection of people throughout the

"Possibly the burden was too much to bear for the new pope," said Vienna's Cardinal Franz Koenig on hearing the news

John Paul had undergone four operations - a relative said they were for his tonsils, to set a broken nose after a fall and twice for gallstones.

"His health has always caused concern," the relative, John Paul's 32year-old niece Pia Luciania, said in an interview last month. She said he entered a sanatorium twice for treatment of a "general lung condition." He also suffered from rheumatism, and shortly before he was elected as pope he spent several weeks at a seaside convent in Venice sunbathing

to alleviate the pain. His reign as supreme leader of the world's 700 million Roman Catholics was the shortest since that of Leo I, who died after 17 days as pope in 1605. Five other popes have reigned for less than one month. Stephen II had the shortest tenure, dying three days after his election in 752.

From the very beginning, John Paul brought a personal style of informality to the pontificate - speaking in the first person simgular "I," unusual for a pope, and eschewing the usual coronation and choosing instead a simple installation ceremony.

His anecdotal style was apparent at his last general audience Wednesday, when he called up a 5th-grade student and interviewed him in front of the 10,000 persons packing the hall.

'Do you always want to be in the 5th grade?" he asked the boy. "Yes," the youth replied.

don't have to change teachers." "Well, you are different from the pope," the pontiff remarked. "When I was in 4th grade, I worried about making it to the 5th and when in the

5th, about passing to the 6th.' John Paul took his papal name from his two predecessors, John XIII and Paul VI, symbolizing his hope of following in their footsteps as a humanitarian and a guardian of the faith.

At his election little was known of how John Paul would address the major issues facing the church. Those questions remain largely unanswered.

In his first major address Aug. 27, he appealed for a "new order" with greater justice, peace and sincere statement on a specific issue — divorce — he told a group of American bishops last week, "The indissolubility of Christian marriage is important.... We must proclaim it faithfully as part of God's word." Cardinal Luciani's view of himself

cooperation among peoples of the

world. In his only extended public

seemed crystallized in a "letter" to American author Mark Twain, part of a series of notes addressed to historical and literary figures.

'Some bishops resemble eagles who glide majestically to high levels," he wrote. "Others are nightingales who sing the praises of the Lord in a marvelous way. Others are poor wrens on the lowest bough of the ecclesiastical tree who only squeak, seeking to offer some small thought regarding the great themes. I belong to the final category.

During the 1962-65 Vatican Council, Luciani said it was difficult for him to change his frame of mind from precouncil church attitudes toward the more liberal teachings.

He was born in the mountain village of Forno di Canale, now called Canale Agordo, in northeastern Italy. His father, a socialist, was for many years a migrant worker in Switzerland. His mother was a peasant, 'strong and devout," as he once said. After entering the seminary at a young age, he returned home to work in the fields during summer vacations.

He was ordained a priest July 7, 1935, and graduated from Rome's Gregorian University. He returned to his native village to work in the local parish, then to a nearby town where he also taught religion in a vocational school.

For the next 10 years he was deputy director in the Belluno Seminary. In 1948, Luciani became one of the top aides of the bishop of Belluno and was put in charge of teaching religion. In that role, he worked to simplify catechism instruction for illiterate mountain people, an experience recounted in a book titled "Catechism in Crumbs."

### 6 astronauts to get medal

WASHINGTON (AP) - President Carter has named six astronauts to be the first to receive the Congressional Space Medal of Honor.

Carter will present the medals Oct. 1 to Neil A. Armstrong, Frank Borman, Charles Conrad, Jr., John H. Glenn Jr., Virgil I. Grissom (posthumous), and Alan B. Shepard Jr., during a visit to the Kennedy Space Center at Cape Canaveral, Fla.

### Clown's life of love and laughter nearing end

By CHARLES CHAMBERLAIN

CHICAGO (AP) — Laughter is the essence of life for Jack Thum, the light shining brightly at the end of a darkening tunnel.
"Six weeks ago I was having trou-

ble breathing and went to a hospital," said Thum, who has made people laugh as a clown for 22 of his 53 years. "The doctors said I had lung cancer and it's spread all through my chest. They put it on the line — I have a year or less to live.

"I don't want to go. I get too much happiness being a clown and making people laugh. I've visited 1,900 hospitals throughout the Midwest in my time. I still go to hospitals twice a week to try to bring smiles to sick kids. Now I have to go more often, for chemotherapy treatments," said

Thum loves kids so much he and his

wife, Shirley, have 11 at home. "Nine of them are teen-agers from broken homes that we've taken in with their parents' consent. Two others are grandchildren. Their mother, our only child, travels a lot in her job," said Thum. "We don't get any money taking care of them — our house is a house of love and laughter. Over the years we've taken care of 37 children. We scrape through some-how from what money I get from clown appearances. What's going to happen when I'm gone, I don't

"Jack isn't a circus clown," Mrs. Thum said. "He makes appearances at shopping centers, various openings of businesses, birthday parties and the like." She said her husband's income varies, but averages out at about \$400 to \$500 a week.

"I'm a very happy man. I love my work," said Thum. "I wear a big hat with all kinds of fake fruit on top. I have a big red nose. I have diamonds and hearts painted on my face. I wear great, big shoes. I'll go on being a clown until my last breath. I'll go out making them laugh. And I'll laugh at

### Red Brigade strikes twice in two days; Executive shot

MILAN, Italy (AP) — Red Brigades terrorists pumped six bullets into the legs of an Alfa Romeo executive today, then hung a poster with their red star symbol around his neck for good measure. It was their second strike in two days.

Police said Ippolito Bestonso, 66, was ambushed and shot by three youths as he approached his parked car to drive to work.

### \$4 million to go into Caribbean

WASHINGTON (AP) - The Agency for International Development says it will provide \$4 million over the next four years for agricultural and

health projects in the Caribbean.
AID said it has given \$625,000 to the
Caribbean Agriculture Research and Development Institute to help in a \$4.86 million agriculture research program to benefit small farmers in the eastern Caribbean.

Bestonso is chief of the mechanical division of the state-owned Alfa Romeo car-making plants at Arese,

Before fleeing in a car, the terrorists handcuffed the executive and hung a poster around his neck with the symbol of the Red Brigades, Italy's most feared urban guerrilla

group.
A few minutes later an anonymous caller told the Italian news agency ANSA, "We are the Red Brigades. One of our armed units this morning wounded Ippolito Bestonso, head of the mechanical division of Alfa Romeo. We will send you a leaflet."

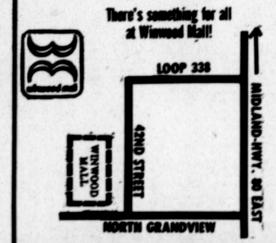

Red Brigades terrorists, who ab-ducted and killed former Premier Aldo Moro earlier this year, also killed a Lancia auto factory foreman in Turin Thursday.

The attack came on the eve of negotiations for renewal of several labor contracts in the auto industry. Italy's Interior Ministry feared the negotiations might trigger a new wave of political violence.

# The 'big bull' eyes real estate sales market

By JOHN CUNNIFF **AP Business Analyst** 

NEW YORK (AP) - Merrill Lynch, the big buil of securities, is planning to become a real estate agent, and things in that fragmented industry of small, local firms might never be the same.

"We want to lead the industry in change," said Dakin B. Ferris, the Merrill Lynch & Co. executive vice president to whom the newly created operation, Merrill Lynch Realty Associates, will report.

"The state of development in the residential real estate is comparable to the securities industry in the 1940," he said, referring to the many small firms that grew, merged, or sometimes disappeared.
"We believe we're headed toward that move in real estate."

Merrill Lynch's advantages are enormous in the real estate market which, though made up of local rather than national companies, is much larger than the securities industry. It already operates an employee relocation firm, a

mortgage insurance company, and an asset manage-ment concern, and announced a couple of weeks ago that is negotiating to buy a mortgage broker.
"This is the closing of the circle in real estate," said Ferris as he sat in his 47th floor office in lower Manhattan. "It fits very naturally into our concept of

being in total financial services. Merrill Lynch has been positioning itself for years,

observing the rising prices, the 67 percent home ownership rate, the constant geographical relocation of families — and the profit potential of it.

Securities? Profitable, especially to Merrill Lynch, the biggest factor in the industry. But few people consider there might be even greater profit

available in residential real estate. "We did an in-depth study last year and estimated that \$8.7 billion was paid in residential real estate brokerage commissions," said Ferris. "We think

that's conservative." That "conservative" figure, he continued, is several times larger than commissions in the total securities business, which last year amounted to about \$2.7

Perhaps aware that it might be called a bull in the china shop, "the thundering herd," as Merrill Lynch is colloquially called, will enter the residential market with a "significant" but not "great" step. "We will acquire several firms in the next six

months on a geographical basis," meaning, Ferris said, that Merrill Lynch will spread its activities rather than concentrate in a single area. In most cities, he explained, there are 2 to 5 relatively strong firms that account for a large proportion of the total brokerage. "These are the

quality firms," he said. "We're looking for quali-In its initial announcement Sept. 21, Merrill Lynch said it was already holding discussions about acquiring controlling interests in 10 such companies, al-

though it declined to name any of them. While "we have plans for developing these companies they will retain a local image," said Ferris. Doe & Co. would simply append: "A Merrill Lynch Realty Associate," and Doe would be a minority

The support, however, will be national, as it is with large motel or hotel operations, involving training, advanced management techniques, advertising and marketing. And an unmatchable referral system.

An account executive with Merrill Lynch Pierce Fenner & Smith, the securities division of Merrill Lynch & Co., handles between 300 and 500 accounts, and often will be aware of an impending move.

The relocation company, which handles the buying and selling of 10,000 to 12,000 houses a year for employees of corporations — it's clients are 290 of the country's 500 largest companies - may also refer. But in the grand strategic plan of total financial ervices, these referrals are neither one-dimensional

or one-way. Family Life Insurance, for example, can offer and receive referrals from several other companies in the Merrill Lynch group. The same with Realty Associates or the mortgage company or the assets management arm.

Incredibly — and while Ferris states "at this time, building is not part of our plan" — Merrill Lynch already operates a company that deals throughout the country in wood for housing and other construc-

The company, Merrill Lynch Wood Markets Inc., is a middleman between the individual source and wholesale lumberyards, supplying, trading and fin-ancing. Conceivably, it could be a tie-in to the housing package. Does Merrill Lynch expect regulatory or other obstructions?

No, said Ferris. "Our proportion will be only a small part of the total market."

Might management techniques, volume, national

recognition, and the ability to offer a total sale-mortgage-insurance-asset management package, lead to ower real estate commissions for sellers?

"I don't want to make that prognostication. We would be competitive," Ferris replied, but added: "Personally, I feel we would aim for it, but I don't feel we can define what commissions will be in the future. The business is competitive." (Rates generally are 6 percent to 7 percent of selling price.)

Regardless, Merrill Lynch will find money in residential brokerage. Housing prices have been rising at better than 10 percent a year and, as Ferris observes, "if prices go up 50 percent so do commis-

### Texas gets grant

WASHINGTON (AP) — Texas will receive more than \$2.5 million for wildlife restoration and hunter safety projects, Secretary of the Interior Cecil D. Andrus announced Thursday. More than \$70 million in federal funds for pro-

grams to aid hunters and fishermen was apportioned to the 50 states plus the governments of Puerto Rico, Guam, the Virgin Islnds and American Samoa for

Funds for fish restoration programs come from a 10 percent excise tax on fishing rods, reels, creels, artificial baits, lures and flies. Funds for wildlife restoration and hunter safety prorams come from an 11 percent excise tax on sporting arms and ammuniton, a 10 percent excise tax on pistols and revolvers and an 11 percent tax on certain archery equip-

Texas will receive more than \$2.2 million for wildlife restoration and \$219,000 for hunter safety programs. The \$2,509,000 total is the largest amount

going to a single state.

The Interior Department also released a preliminary apportionment for federal aid in fish restoration projects for fiscal year 1979. Texas is projected as receiving \$890,000.

### **DEATHS**

### Granville Glenn

BIG SPRING - Services for Granville Glenn, 73, of Big Spring will be at 2 p.m. Saturday in Nalley-Pickle Funeral Home.

Officiating will be Clint Higgenbotham, retired Church of Christ minister, and Royce Clay, pastor of 14th and Main Street Church of Christ, officiating. Burial will be in Mount Olive Memorial Park.

Glenn died Wednesday in a McKinney hospital after a lengthy illness. He was born Oct. 7, 1904, in Big Spring. He was married to Ilma Stewart May 18, 1926, in Haskell. He moved to Big Spring in 1929.

He worked for the Big Spring Herald as a printer 40 years before retiring in 1969. He was a member of the 14th and Main Street Church of

Survivors include his wife; a daughter, Doris Stevenson of Ardmore, Okla.; a brother, Walter Glenn of Tyler, and two granddaughters.

### Calvin Ryan

LEVELLAND - Services for Calvin "Bones" Ryan, 66, of Levelland, brother of W.W. "Jelly" Ryan of Andrews, will be at 4 p.m. Saturday in the George C. Price Funeral Home here. Burial will be in the City of Levelland Cemetery.

Ryan died Thursday in a Levelland hospital following a lengthy ill-

He was born in Oklahoma and had lived in Levelland since 1927.

He held memberships in the Veterans of Foreign Wars, the American Legion, and the Disabled American Veterans. He was a World War II veteran of the Army Air Corps. He was a retired pumper for AMOCO. He was a member of the First Baptist

Other survivors include two brothers and two sisters.

### James Horton

James F. "Jim" Horton, 71, of 3518 W. Michigan Ave., a former grocer and hardware store owner here, died Wednesday in a Midland hospital following an extended illness.

Services will be at 10 a.m. Saturday in Newnie W. Ellis Funeral Home with the Rev. Bob Netherland, pastor of Asbury United Methodist Church, officiating. Burial will be in Resthaven Memorial Park.

Horton was born Feb. 3, 1907, in Roxton, and spent his early life in Lamar County. He moved to Paris in 1943, and in 1947 he moved to Midland, where he established Horton Grocery Store. In the late 1950s, he started a hardware store, which he operated until 1974, when he sold the

Survivors include his wife, Mildred; two sons, James A. Horton and Mark Lee Horton, both of Midland: three daughters, Mrs. E Fletcher of Hobbs, N.M., Mrs. J.A. Null of Corinth, Miss., and Mrs. Maydelle Winkler of Midland; a brother, Jack Horton of Midland, and 10 grandchildren.

Pallbearers will be Marion Nix, C.W. Lawrence, Tom Nix, Rubin Williams, Charles Lynch and George

### Midland index holding ground

Midland's Economic Index for the month of August remained virtually the same - 116.33 - as July's

The index, prepared by the First National Bank of Midland Economic Development Department, was up 15.8 percent over the same time a year ago. Bank deposits were up \$2.6 million over July. Banks reported deposits totaling \$725,471,000 in August, \$722,835,000 in July, and \$619,081,000 in August 1977.

permits were down, with only \$4,700,960 reported for August 1978. July 1978 had \$7,349,096 in building permits, while August 1977 had \$11,327,281.

Countywide gross sales increased 28.8 percent in the first quarter of 1978, according to the report. The amount was \$239,594,982, which is \$53,-564,957 over the first quarter of 1977.

Retail sales figures in Midland during the first quarter of the year also showed a marked increase. Combining apparel, automotive, building materials, drugstore, eating and drinking, food, furniture, general merchandise and other miscellaneous items, the figure came to \$131,864,000 compared to \$113,464,000 a year ago.

scarones," or confetti eggs, to sell at St. Ann's Family Fair

CLEVELAND (AP) -A budget calling for trict which has 100,000 'massive and drastic pupils. cuts" affecting 1,000 people has been drawn up by the strike-plagued, deficit-ridden Cleveland school board. John E. Gallagher Jr.,

the president of the school board, said the panel would meet today to act on the measure to trim \$14 million from the current spending plan, in addition to \$13 million already adopted over the past 12 months

An attempt to pass the revised budget failed Thursday night when either laid off, demoted computer problems de- or transferred under the layed attempts to certify new spending plan. Apbudget to \$167.3 million, \$9 million below last minated, most of them year's budget, according among the ranks of nonto Gallagher.

The school board hopes the new spending plan will convince state officials to lift spending restrictions on Ohio's largest public school system so that a settlement can be negotiated to end a 23-day-old strike by 10,-000 teachers and non-academic employees.

**UPTON AREA** 

Holliday Drilling Co. of Midland No. 1 Neal has been staked as an 8,600foot test in the Spraberry Trend Area field of Upton County, four miles north of Rankin.

The location is 1,320 feet from north and west lines of section 8, block A, EL&RR survey.

C. F. Lawrence & Associates, Inc., of Midland No. 1-A Bean has been completed from the San Andres to reopen the Betty (Grayburg) field of Crockett County, 12 miles north of

Operator reported a 240-hour pumping potential of 60 barrels of 29gravity oil, no water, through perforations from 1,299 to 1,305 feet. The pay was acidized with 2,000 gal-

Total depth is 1,430 feet and 5.5-inch casing is set at 1,362 feet. The plugged back depth is 1,335 feet.

The San Andres was topped at 1,284 feet on ground elevation of 2,454 feet. Other tops include the Yates at the Queen at 960 feet and the Grayburg at 1,090 feet.

Location is 2,110 feet from south and 1,980 feet from east lines of section 27, block UV, GC&SF survey.

ANDREWS TEST

BTA Oil Producers of Midland No. 1 7890 JV-P Andrews will be drilled as a location southeast offset to production in the five-well Block 6 (Devonian) field of Andrews County, 20 miles northeast of Andrews.

The 12,550-foot gtest is 560 feet from north and 2,080 feet from west lines of section 35, block 6, University

MARTIN TEST

RK Petroleum Corp. of Midland No. 2 Texas Land and Mortgage Co. is an 11,800-foot test one mile southwest of the RK (Devonian) field in Martin County. It is 760 from south and 660 from west lines of section 7, block 37, T-2-N, T&P survey.

### Oil price hike talked

OLSO, Norway (AP) - Saudi Arabia's deputy oil minister said today a 5 percet increase in world oil prices at the end of this year would be "reasonable" and that the global economy could not take a bigger one-shot

Abdul Hadi Taher, who is also head

### **Explosion** fatal to one

HOUSTON (AP) - One man is dead and another in poor condition at Ben Taub Hospital after a 10,000-gallon tank used for storing alcohol compounds exploded at a southside chemical plant.

Three men were injured in the accident Thursday, but only Thomas Johnson, 21, required hospitalization. The dead man was identified as Mike Holley, 31, a pipefitter's helper

from Pasadena. The manager of the Magna Corp. plant, Tom Dowse, said the accident apparently was caused when some vapor in the tank was ignited while the men were welding on handrails

and catwalks above it. He said the top of the tank was blown off. Dowse said the area had been checked prior to the welding

of Saudi Arabia's state-owned Petromin oil company, was here to participate in a three-day seminar on Scandinavian-Arab oil cooperation. Because of its North Sea oil deposits, Norway has become a major petrole-

um producer. Ministers of the 13-nation Organization of Petroleum Exporting Countries, who at a June meeting continued a freeze on crude oil prices, will meet again in December to set prices for 1979. They have agreed that prices must be raised.

Taher told Norwegian reporters: 'All the talk and speculations here about a major price increase in December are unrealistic because the world economy and the world market cannot absorb a too-high price increase.

"A 5 percent price increase in December would be reasonable. Such a moderate price increase could be followed up later with more frequent increases in the range of some 2 to 3 percent the next few years."

Price "hawks" within OPEC are expected to push for a bigger increase at the December meeting. But the Saudis, as the biggest producers within OPEC, are the most powerful voice within the oil cartel.

Tayeh Abdul Karim, oil minister of price-hawk Iraq, acknowledged in an nterview with the Oslo newspaper Dagbladet that the Arab countries have different opinions about the size of a price increase.

'However, for the industrialized world the price of oil is not the most important factor," he added. "What is important is the availability of oil. In such a context the situation now is about the same as it was before the price increase in 1973."

He was referring to the massive price increases at the time of the Arab oil embargo of late 1973.

### **Policies** cited

HOUSTON (AP) — The general production manager for Superior Oil Co. said a disagreement over management policies of Alex Massad, former executive vice president for exploration and production at Mobil Oil Corp., caused him to leave Mobil

for Superior.

Mobil has filed a civil lawsuit against Superior claiming it pirated away 39 Mobil employ-ees and obtained trade secrets from them.

E.J. "Pete" Dickinson also testified Thursday he left Mobil because it looked like he was going to have take an overseas assignment to advance, and he was not prepared to do that.

Howard B. Keck, chief execu-tive officer and board chairman of Superior, testified earlier in the week that several Superior employees who once worked for Mobil complained of morale problems at their former com-

District Judge Arthur Lesher hearing the case in which Mobil is asking that Superior be stopped from pirating Mobil employees and that it be prevented from taking any profit from two offshore tracts in the Gulf of

Superior won the rights to the tracts in a bid-sale last year. Mobil was edged out in the sale, and it claims in the suit that Superior used knowledge from the former Mobil employees in preparing its bid.

# Resurrection attempts due on defeated issues

By TOM RAUM

FRIDAY, SEPT. 20, 1978

WASHINGTON (AP) - There's renewed talk in Congress about higher taxes on large luxury cars and lower taxes for people who upgrade the insulation in their homes.

Those and some other tax portions of President Carter's energy program, once given up for dead, may be resurrected in the wake of several important legislative energy victories for the White House.

House-Senate negotiators were to meet today to see what parts of the energy tax-and-incentive package they can salvage.

Carter's unpopular proposal to raise U.S. oil prices to world-market levels through a crude oil tax was not expected to be among them.

But two other taxes - on fuel-inefficient autos and on industrial use of oil and natural gas - are given a good chance of being revived, as are the proposed energy-conservation tax

The conference committee, which hasn't held a negotiating session since last December, was reconvened by leaders after other parts of Carter's long-stalled energy program were put back on the legislative track this

On Wednesday, the Senate passed the crucial natural-gas deregulation bill. Then late Thursday, House-Senate conferees resolved their last remaining dispute over non-tax aspects of the energy package.

### CIA data discloses no more super fields

By HALL DAILY

SANTA MONICA, Calif. (AP) -Future exploration will yield few "super-giant" oil fields and the world will have to rely on increasing the recovery rates from known deposits for more than half of its needs, a CIA-financed report says.

"We'll get more oil out of fields that we know are there than we will out of future discoveries," said Rand Corp. researcher Ricjard Nehring, author of the study.

The Rand think tank report released Thursday estimates a 30-to 45-year supply of petroleum remains if world consumption continues to rise at past rates. There is now about a 60-to 90-year supply of petroleum, at current consumption rates, the study

"One of the problems in the current energy debate," Nehring said in an interview, "is public skepticism about how much oil is out there and with people playing games with sta-

The report, he said, "is useful for identifying the patterns of world oil distribution, and it's useful in the CIA's work, too, trying to look down

the line 20 to 25 years."

Nehring said 75 percent to 85 percent of the world's future oil needs will come from increased recovery from known fields. More than half that oil is contained in super-giant (5 billion barrels or more) and giant (500 million barrels or more) fields, he

The prospect of a doubling or tripling of oil resources "is out of the question," Nehring said. This is because most of the super-giants and giants are concentrated in about two dozen sedimentary basins which have been looked over pretty well, and because the number of discoveries of fields of that size has dropped," he said.

### Re-entries announced

B&C Operators, A Partnership, Odessa, plans to re-enter for wildcat tests in two Crockett County priojects, 15 miles northwest of Ozona.

No. 1-BQ University, opener of the Massie (San Andres) field will plug back to 2,700 feet. Location is 1,980 feet from south and 1,650 feet from east lines of section 21, block 31, University Lands survey. It originally was drilled by Cities Service to 8,802

No. 1-31-36 University, former 7900 gas well four miles east of the Howard draw (Grayburg) field, also will be tested above 2,700 feet. It is 1,980 feet from north and 660 feet from west lines of section 36, block 31, University Lands survey. It is a former Southland Royalty well.

### China line completed

TOKYO (AP) - China's first northsouth oil pipeline has been completed between Linyi, in Shantung, and Nanking, the official Hsinhua new agency reports. It is more than 600 miles long.

The line carries crude oil from the Shengli field in northern China. Tankers take the crude from Nanking down the Yangtze River to Shanghai, Chekiang and Wuhan.

He said such reliance on known reserves probably will create "a gradual upward pressure on prices." Future discoveries, according to

ments, from fields with lower well productivity, from smaller fields or from the application of secondary and enhanced recovery," he said. Nehring, a political-economics ex-

pert who specializes in petroleum geology, cited seven areas with the highest potential for future discoveries - the Mideast, Mexico, Alaska, Venezuela, the North Sea, Siberia

supply falls in the same range as other studies of the world petroleum

supply.

He estimated that between 1,700 and 2,300 billion barrels exist worldwide in recoverable crude oil, excluding "hundreds of billions of barrels" that might be tapped from heavy oil (tar) sands and from oil shale deposits. He said these reserves should last 60 to 90 years at current world energy

since then can still claim them.

than 15 m.p.g. and would rise to \$3,850 by 1985 on cars getting less than 12.5 miles per gallon. In a related field, the conferees meeting Thursday night on non-tax portions of the energy package

The "gas-guzzler" tax would begin at \$200 for 1980-models getting less

agreed to double the existing penalty on automakers who can't meet specified fuel-economy levels already on the books. Current models must average 18 m.p.g., a level that rises to 27.5 m.p.g. by 1985. This figure applies to the

average gas-mileage of all the cars one manufacturer produces — allow-ing it to keep producing big heavy cars as long as they're offset by an appropriate number of small, fuel-ef-

### Spraberry wells final

Spraberry Trend Area wells have been completed in Midland and Reagan counties.

Parker & Parsley, Inc., of Midland No. 1-C Golladay was potentialed in Midland County, 10 miles southeast of Midland, for a daily pumping poten-tial of 55 barrels of 40-gravity oil and 85 barrels of water, through perforations from 7,381 to 8,983 feet after 4,500 gallons of acid and 160,000 gallons of fracture fluid

Total depth is 9,100 feet and 4.5-inch casing is set on bottom. The plugged

back depth is 9,043 feet. Location is 990 feet from south and 1,200 feet from east lines of section 55,

block 37, T-2-S, J.TL. Veazey survey.

University is a new oiler in the Reagan County portion of the field.

On 24-hour potential test it pumped 47 barrels of oil and 138 barrels of water, through perforations opposite the Dean from 7,537 to 7,685 feet, perforations opposite the Jo Mill from 6,997 to 7,109 feet and the upper Spra-berry from 6,138 to 6,257 feet. Each zone was acidized with 1,000 gallons and fractured with 42,000 gallons.

Location is 1,320 feet from north and west lines of section 4, block 9, University Lands survey and 10 miles northwest of Big Lake.

Total depth is 7,775 feet. The casing point and gravity were not reported. Gas flowed at the rate of 49,000 cubic feet per day during the Saxon Oil Co. of Midland No. 2-4
