Pain, danger ignored; Stella strokes shoreward

By JOHN PLATERO

ABOARD THE IDLE DAY (AP) - Stella Taylor, stung by poisonous jellyfish and menaced by roving sharks, stroked doggedly toward Florida today in her second attempt to become the first person to swim from the Bahamas.

The 46-year-old veteran stunt swimmer was reported somewhere southeast of Miami early today and aides expressed hope she could reach land sometime this morning.

METRO EDITION

But conflicting reports made it difficult to judge how far she was from land. On Monday, a navigational error allowed her to swim off course and cost her about a half day's effort, crew members said.

Miss Taylor's crew said she was making progress toward the North Miami Beach area. She began her 100 mile-plus journey Sunday at 10:40 a.m. EDT from a tiny island south of Bimini.

Miss Taylor's lower body was rendered useless Monday night as fatigue and cramps took their toll. Her powerful arms kept her at a steady pace, sometimes helped by Gulf Stream cur-

It was her second try at the unprecedented Bahamas-to-Florida swim. She got within 12 miles of shore in August, only to have shifting currents push her hopelessly off course.

Miss Taylor, a chipper native of Britain who spent 41/2 years in a Buffalo, N.Y., convent, is not using a shark cage. Aides paddled alongside on surfboards,

but floodlights used to keep her in sight at night also attracted sharks.

A pack of six sharks appeared at about 8 p.m. Monday. Five of the sharks were chased away by her crew, but one persisted, swimming in and out of the illuminated area.

Miss Taylor finally left the water for several minutes until the shark left. Her crew used explosive "bang sticks" to scare

While out of the water, she developed a severe leg cramp.

Shortly before the sharks appeared, a Portuguese man-of-war wrapped its stinging tentacles around her, leaving her shrieking and writhing in pain. She left the water briefly for

medication. Exposure to salt water caused swelling of her mouth, tongue and face. Aide Joe Edwards said some skin was peeled off by exposure. She was shivering during the night and asked for warm ginger ale to drink.

Edwards said her usual 2 mph pace at times was pushed to

over 5 mph by the Gulf Stream current. Before she swam into the current Monday, she had lost many miles because her crew was using outmoded navigational equipment and couldn't keep a steady course toward

Although Miss Taylor had said before the swim she did not want to be told of her position, Edwards told her Monday there were "current problems."

She replied calmly, "I thought

Slide zone is watched

Geologists and disaster workers in this exclusive seaside community kept cautious watch today over a still-shaky neighborhood devastated by mysterious landslides that shoved, shattered and ripped apart at least two dozen hillside homes.

About seven acres of the residential area of Bluebird Canyon with its homes valued between \$150,000 and \$300,000 were ravaged by the slowmoving landslides that began shortly before 6 a.m. Monday.

Red Cross workers reported only a handful of injuries, most of them cuts and scratches, as residents clad in nightclothes fled down the hill in the foggy darkness. One woman suffered a broken shoulder.

The earth — and the houses, patios, trees and flowers it carried - continued moving in fits and starts through out the day and geologists warned that some movement might continue for several days. But they had no immediate explanation for the huge slide. There were no earthquakes, no

"We've got about 24 homes that we're considering completely destroyed," said Laguna Beach Police Lt. Al Olson. "It looks like damage at

this point is in excess of \$3 million." Olson said a half-dozen other homes were hanging precariously over crumbling cliffs and "they could go at any time." About 200 people were

evacuated from endangered homes. Residents who lived in the most heavily damaged area were not allowed in Monday to examine what remained of their homes. Authorities said they were concerned with possi-

ble health hazards posed by ruptured

sewers and with the possibility of further landslides. It was not known when the residents could return.

Several hundred yards of roadway were destroyed, telephone and power lines dangled and sparked from uprooted poles that tilted at crazy angles and water, sewage and gas lines were ripped apart leaving the fetid smell of natural gas hanging over the neighborhood. There was no

Two residential blocks dropped more than 30 feet below their normal level and the sliding earth tore out a half-mile-long chasm about 40 feet deep and at least as wide. Two shattered homes and pieces of another were smashed together on the chasm

Two rooms of one home tumbled into the crevasse, while the seconding jaggedly over the edge with beams, wires and pipes dangling. Several homes appeared almost un-

damaged, with cars still in the driveway and carefully tended trees and shrubs intact. But the homes were 30 or 40 feet lower and 25 feet downhill from where they once stood.

Many residents of the area reported loud crackling noises just as the earth began to give way.

"It was like a big pine fire - just crackling and popping all over the place," said resident Dave DeLo, 42. The victims, although visibly shaken, were surprisingly calm.

Jon Ross, a Red Cross supervisor. attributed the calm and the lack of serious injuries to the fact that the landslide "was slow moving and gradual," giving residents ample time to escape.

Delivery Service 682-5311 Want Ads 682-6222 Other Calls 682-5311 portant new factor in the election of his successor. It may affect the tradition that the pontiff should be over

"Health does count; this is a demanding position," said Cardinal Humberto Medeiros of Boston as he arrived for the funeral of the pope Wednesday and the conclave starting Oct. 14 to elect his successor.

Cardinal Franz Koenig of Vienna referred to the papacy as too trying a task and Cardinal Leo Suenens of Belgium called it a burden. John Paul, the morning after his election, characterized it as "a danger."

The last pope under 60 was Pius IX, who was 54 when elected in 1846. His reign lasted 32 years, the longest in history. Since then popes have ranged in age from Benedict XV, who was 60 when elected in 1914, to John XXIII, 77 at his coronation in 1958.

Both John Paul I and Paul VI, his immediate predecessor, were elected at 65, considered the ideal papal age. But Paul's reign lasted 15 years and ended after several years of slowly failing health.

John Paul succumbed to a sudden heart attack. He suffered from rheumatism, and a niece said he was "delicate," that he had to be careful about what he ate and "cold and heat." But he was not known to have had a history of heart trouble.

Vatican experts say the health factor may improve the chances of one younger cardinal among the papabili, or possible popes, 57-year-old Giovanni Benelli, the archbishop of Florence. But the emphasis is still on finding another "pastoral" pope like John Paul, one with grass roots in a diocese instead of a man whose career has been in the bureaucracy of the Vatican Curia and its diplomatic service. Benelli has been in Florence only a year after 13 years at the Vatican and 17 years in diplomatic posts.

Friday deadline set

Friday is the effective deadline to register to vote in the Nov. 7 general election.

According to law, the deadline for registering, or changing an address, is 30 days before the election, Oct. 8. But, since the Midland County courthouse will be closed Saturday and Sunday, Friday will be the last day to register in person, county officials said today.

Registration certificates received Monday morning and postmarked Saturday or Sunday also will be accepted, according to the voter registration office.

Midlanders wishing to register in person may go to the registration office in the basement of the Midland County Courthouse from 8 a.m. to 5 p.m.

An individual may register for himself, his spouse, his parents and his children. To register, a person needs to furnish his Social Security number and date and place of birth.

Though unannounced and unheralded, the famed Goodyear blimp glides over Midland Monday on what apparently is a continuing eastward trek across Texas. Reported to have been over El Paso Sunday, the giant helium-filled vehicle is viewed here through the "legs" of the Hodge Carillon Tower on the Midland College campus, near the northern edge of the city. The craft last was seen Monday morning still traveling eastward in the vicinity of Stanton. (Photo by H.A. Tuck)

Mild, sunny weather is expected for most of the country through Wednesday morning. Showers are expected in Florida, from the eastern Gulf to the lower Great Lakes and in the northern Plains. (AP Laserphoto Map)

Low clouds stretching from West Virginia northeastward through New England, frontal clouds extending from the Central Plains northeastward through the Great Lakes, and low and mid level clouds over parts of Montana and the Dakotas are seen in a satellite clouds photo recorded Moday afternoon. British Airways." The nationalized airline prefers to train its aviators from the ground up,

Since he likes flying so well, why postpone his flying career by studying the construction trade?

"Flying, as you know, is a pretty risky business," said Letchford.

He was talking more about health reasons, such as heart trouble or failing eyesight, that might wash him out of flying, rather than the potential "quick-stop" hazards of flying.

"If that (incapaciting illness or accident) happens, you've got to have something to fall back on," he explained. "That's my insurance poli-

Aside from that he reckons the building industry will be waiting for

him should he bail out of commercial flying.

'Construction...that's something that's going to be around certainly as long as I am.'

His father, a Royal Air Force pilot, was killed in a flying mishap about a decade ago.

Something different: While Letchford and his traveling-working buddy, Jonathan Somper, were over here (mostly in Midland), they altered their eating habits out of curiosity and, often times, necessity.

"We ate at a lot of hamburger joints, because it was different," he said. "Now, we're looking forward to good old English cooking.

For what it's worth: The surname Letchford, rather than meaning a craving for a ford, stands for a ford over the river Letch.

Webb County playing role in vote

By The Associated Press

A battle is on for the important South Texas vote between gubernatorial candidates Democrat John Hill and Republican Bill Clements as they argue over Hill's role in a 1975-76 Webb County grand jury probe into alleged corruption.

At a news conference Monday in Austin, Hill said published reports that he declined to investigate the Webb County allegations because he had "lots of friends in Laredo" were "totally false."

Hill called out Texas Ranger Ramiro Martinez, Laredo District Attorney Charles R. Borchers and Ray Bravenec, a member of Hill's organized crime task force, to reinforce his stand. All had played an active part in the grand jury probe which indicted and gave a probated sentence to one person.

Meanwhile, Clements released a statement which said, "It is a sad day for the citizens of Webb County and all of Texas when we learn that our interests come second to the political ambitions of any politician.

"John Hill apparently has violated the public trust and his own oath of office. His reported inaction in regard to the Webb County cover-up brings into serious question his integrity and his entire career in public office."

Clements charged Hill has "only selectively enforced the law and has used his office where it benefits him politically.

Hill told the Austin news conference the Webb County investigation was one of 20 investigations made by his department in all areas of the state.

'Under my leadership, the attorney general's office has participated in more local grand jury investigations of public corruption than any of my predecessors," he said. "More than 120 indictments have resulted."

In the state attorney general's race, Republican Jim Baker said Monday in Dallas that he was looking forward to a scheduled television debate with Democrat Mark White. Later in the day, Baker took part in a fund-raising event with tennis star Ilie Nastase. White was in Amarillo Monday and

Sen. John Tower, R-Texas, said Monday in a statement that former Congressman O.C. Fisher, a Democrat, had endorsed his re-election

campaign at a fund-raising dinner in Austin Sunday night. Tower's office said he grossed \$104,000 from the dinner, which was aimed at Democrats and independents.

Rep. Bob Krueger, the Democratic challenger to Tower, was on a Central Texas helicopter tour Monday with a noon stop in Marlin and ending up in

Deposits in Midland banks tally all-time high for third quarter

Midland bank deposits were at an all-time seasonal high of \$740,101,905 at the close of business last Friday, as the third quarter of the year came to a

The figure is up \$111,954,805 from the \$628,147,100 reported at the same date last year, and up \$13,717,234 from the \$726,384,671 recorded last June 30. It is down only \$1,341,324 from the alltime record high of \$741,443,229 cited last Dec. 31.

Statements of condition of the city's four banks - Commercial Bank & Trust Co., The First National Bank. The Midland National Bank and Western State Bank - were revealed today in line with the policy requiring reports to be issued automatically at the end of each quarter.

Loans and discounts of the banks

were at a record high at the end of September, totaling \$519,877,604, up \$94,558,593 from the \$425,319,011 shown a year previously, and up \$16,024,410 from the \$503,853,194 reported at midyear 1978. The June 30 figure was a record at that time.

The First National Bank reported deposits totaling \$455,458,023, compared with \$383,364,776 a year ago./ and \$450,570,748 last June 30.

The bank's loans and discounts were \$336,565,530, compared with \$266,074,691 at the end of the third quarter last year, and \$315,220,543 three months ago.

The Midland National Bank last weekend had deposits totaling \$211,045,026, compared with \$179,826,259 on Sept. 30, 1977, and \$202,313,056 last June 30.

Its loans and discounts amounted to \$131,990,717, compared with \$109,753,571 a year previously, and \$136,303,892 three months ago.

Commercial Bank reported deposits totaling \$56,695,353, compared with \$50,693,206 at the same date a year ago, and \$57,278,951 last June 30. The bank's loans and discounts

amounted to \$38,129,778, compared with \$37,737,288 last year at this time, and \$40,780,854 three months ago. Western State Bank revealed

deposits totaling \$16,903,503, compared with \$14,282,859 on Sept. 30. 1977, and \$16,221,916 last June 30.

Its loans and discounts totaled \$13,191,579, compared with \$11,753,461 a year ago, and \$11,547,905 three

Bar association honors veteran Midland attorney, civic leader

Hamilton E. McRae, veteran Midland attorney and civic leader, was honored Monday noon by the Midland County Bar Association at its meeting in the Midland Hilton.

The honors were bestowed as a result of McRae having reached, on June 14, 1978, "the coveted milestone of 50 years as a practicing attorney in Texas, 43 of which have been spent in Midland.

Highlighting the special program

Preliminary plat, zone change denied by panel

Too much "density" and the alley and street system were the reasons cited by the Planning and Zoning Commission Monday when the group turned down a zone change request and a preliminary plat.

The zone change request came from Paul Noel for the southeast corner of Neely Avenue and Tarlton Street. But that land is tied in with the area planned for development by William Hays of Hays Construction, the commission decided.

John Rose of 3312 Stanolind St. and Charles Love of 3313 Stanolind St., said the planned alleys would become thoroughfares "for the kids who don't want to observe the stop sign at Neely and Midkiff Road.' Another resident maintained the

family dwellings on five acres, while the average, he said, is 39. A final plat for Del Norte Estates Addition, one mile south of the city

development would have about 52

limits on Lamesa Road, was sent back to the City Council for a clarification on its intent for a right-of-

Keith Burger, one of the development's owners, said he would not dedicate a 30-foot right-of-way to the city. The-total land would amount to the size of a city block "and that's a lot of money. We are not in the city limits and the right-of-way has not been purchased north of us," he

Burger said he would be willing to sell the land to the city at a later date, but he will not give it to the city.

The commission also recommended for approval by the City Council of a zone change in the southeast corner of Andrews Highway and West Kansas Avenue, of a specific use permit for beer and wine at a delicatessen in the Imperial Shopping Center and of a zone change for offices at the corner of Texas Avenue and E Street.

A preliminary plat of Parkway South Addition to be located at the southwest corner of Lamesa Road and Gist also received the commission's approval.

Midland's need for policy on parks termed 'immediate'

(Continued from Page 1A) failed," he said.

'We're left with a plan that is basically unfunded. We're still trying to adhere to the philosophy of the plan without a budget."

The city Parks and Recreation Department has been allotted \$25,000 for this fiscal year to purchase park land.

But "we can't carry out the concept of the plan with our budget," Sikes claimed Monday. Sikes recommended the parks plan

be incorporated with the city master

Playa lakes investigated AUSTIN - Two chemists of the

state Department of Parks and Wildlife are investigating complaints of ground water contamination and possible threats to migratory birds caused by brine water and oil discharges into playa lakes in West Texas.

Jim Roberts of the department's Austin office said Monday that the investigation stemmed from a recent inspection of Whalen Lake in Andrews County and complaints reported by area residents.

Roberts and Ismael Nava of the Department's San Angelo office were conducting tests at the lake Thursday and they said they observed a substance in the water which appeared to be oil.

Roberts said he would have results of the test later this week. "The entire operation is beyond our jurisdiction. It's the Texas Railroad Commission that has authority over

brine water and oil discharges into these lakes," Roberts said. 'But we are very concerned about the migratory birds. If we see a problem relating to the birds, we will enlist the aid of the Railroad Commission to help correct the probplan to give the city planning department a direction to take when looking

at developers' plats. George Veloz, Planning and Zoning Commission member, asked how the school district manages to come up with land when it needs it.

Sikes said the school district purchases land sometimes as much as 20 years before it will be needed.

He added: "It's logical to combine a city park with school property. This could be one of our criteria for setting up park designations. Truitt, the commission's chairman,

said he had noticed about the middle of August there were no parks being developed in the northwestern section

"Developers are coming in with plans for huge tracts of land and no space for parks. If we don't have an ordinance to set aside park land in those areas in three months, it will be too late to get parks.

"I'm sure the City Council would want us to go away on this issue," Veloz said. "It takes money or a bond issue (to purchase park land).'

"You're right George," Sikes re-plied, "I'm sure they'd like for us to forget it (the ordinance). This is why there is a need for us (both commissions) to adopt a resolution of plan for the parks." If the ordinance is determined by

the city legal department to be illegal or not satisfactory to meet the commissions' needs, Sikes said, an alternative possibility is a process called mandatory dedication. This process involves requiring the

developer to donate a certain percentage of land he is asking to be subdi-"But you have to coordinate this to

get all the land in one area for a park," Sikes added It (mandatory dedication) is not a popular idea with developers and is Hilton.

not used extensively in Texas, he Along with the move to study the ordinance, the group decided to coor-, dinate all plans for future parks.

were remarks made by Reagan Legg, Tom Sealy, Boyd Laughlin and Judge Perry Pickett. L. Lloyd MacDonald, association president, presided. The resolution honoring McRae

expressed "our total esteem for him as a lawyer, citizen and friend and our appreciation for the many contributions he has made to our profession, to our city, to his fellowmen, and to us as his friends and fellow lawyers." It also extended congratulations, gratitude, admiration and best wishes for many more years of successful and productive practice of the law and continued leadership in the community and profession. McRae also was lauded for the

highest distinction brought to the profession by his universal recognition as "one of the most capable lawyers in this state and by his undisputed reputation as one of America's foremost authorities in the field of oil and gas law.' The resolution further lauded

McRae for his dedicated leadership practiced and demonstrated "as president of the School Board; trustee and board member of the Midland YMCA; director of the Museum of the Southwest and of the Permian Basin Petroleum Museum, Library and Hall of Fame; trustee of the Midland College Foundation; legal and

financial adviser to numerous charitable and civic organizations; president of the Midland Country Club; as an elder in the First Presbyterian Church; as trustee of Austin Presbyterian Theological Seminary and the Texas Presbyterian Foundation, and in many other capacities.

The association members also presented a memorial resolution honoring the memory of Attorney William L. Kerr of Midland, whose death occurred on July 19 of this year. The resolution said that William L.

Kerr was "one of the most able, eminent and distinguished lawyers of this state recognized throughout the nation as an effective and able advocate of the first order, as a learned scholar, and as a leader in the legal profession.

"We in West Texas and in Midland knew him as a formidable opponent, as an invaluable ally, and and as a trusted and loyal colleague and friend

"We feel especially fortunate to have lived in the time and place where Bill Kerr chose to spend the last 35 years of his life."

The resolution praised Mr. Kerr, a past president of the State Bar of Texas, on his personal qualities as a leader of his profession, as a churchman, as an elected official, and for his unselfish service to and leadership

Mild weather to continue in Basin through Wednesday

The cool and mild weather that has visited the Permian Basin since last weekend should continue through Wednesday, according to the weath-

erman. The National Weather Service at Midland Regional Airport forecasts cool weather with decreasing cloudiness tonight and fair skies on Wednesday. Tonight's low is expected to be in the lower 50s.

Wednesday's high is expected to be in the upper 70s. Winds tonight should be from the east at 5 to 10 mph.

Monday's high temperature recorded at the airport was 82 degrees. The record high for Oct. 2 is 97 degrees set in 1951.

The overnight low was 57 degrees. The record low temperature for today is 42 degrees set in 1961. Cool temperatures were reported

throughout the Permian Basin early today. Big Lake reported ground fog with some wind blowing. A touch of real autumn has moved

into Texas with a cold front that by dawn reached deep into the South Plains.

The front was moving south at a

Youth in custody in reported rape

A 16-year-old was in Midland County Jail today in connection with an alleged aggravated rape reported to Midland police shortly before 6:30 p.m. Monday, according to a police spokesman.

A 38-year-old woman told police she had been raped at her home in south Midland. According to police, the woman had been injured seriously and was in Midland Memorial Hospital today.

The youth was arrested shortly after 7 p.m. Monday at a south Midland residence.

Police said the youth was a friend of the woman's son.

County officials have scheduled an adjudication hearing to determine whether the 16-year-old allegedly involved should be tried as an adult or a juvenile.

By JIM SERVATIUS

R-T Managing Editor

Those ranged from Benjamin Hooks, executive director of the National Association for the Advancement of Colored People, to Peter MacDonald, chairman of the Navajo Tribal Council, to Howard Jarvis, author of California's Proposition 13, that widely-heralded product of the American "tax revolt" which is expected to result in lower taxes in California along with a lessoning of public, social and welfare services, none of which has really happened yet, according to opponents on the

...ONE OPPONENT who wasn't a member of the cast became one when, just as the Californian began to speak, he hurled a cream pie in Jarvis' face. We understand some Midlanders saw the incident here on

To the best of our knowledge it was no disgruntled editor (we ordinarily take pen, not pie, in hand on such occasions) but a young man, obviously out of his element and perhaps out of other things as well, who hurled the pastry. Also to our knowledge he was not apprehended, proof that most editors probably are more adept at editing than at catching fleeing pie

The shoe was on the other foot when it came to two other speakers. They let US have it. Both Hooks (for the NAACP) and MacDonald (speaking on behalf of our Indian brothers) said newspapers had done much to assist minority groups but not nearly enough. Their were challenging addresses which we did not take light-

We did take Edward Asner lightly. Ed, as most television fans know, was Lou Grant in the long-running Mary Tyler Moore Show and is now starring in his own show, "Lou Grant," this time playing a newspaper's city edi-

That, of course, was why he was there and he came through, telling us how much he admired the newspaper business and how he once had actually studied journalism. However, although Ed said his show has several advisors to help make it as realistic as possible, he failed to tell us how a big metropolitan newspaper can operate with the services of only two reporters, a photographer plus a copy editor. A lot of newpaper owners would probably like to find out the secret of that one.

But all in all Asner was as amiable in person as he usually is on the tube and, like the other speakers, he gave us a challenge to take home. Actually, it was a challenge to newspaper readers. They should be more concerned, he said, about press freedom since with the erosion of rights of the press it is the people who are the real

He was right, of course, and all the editorials that could be mustered probably wouldn't be as effective as an aroused public willing to take a stand whenever they see their newspapers coming under more and more government control. When that happens it means, plainly and simply, that THEY are too.

...PORTLAND, supposedly, is a city of rain, fog and mist - in other words, miserable weather personi fied. And we know that much of the time that is true. We're not as sure about the story that at one time Portland had more suicides per capita than any other metropolitan area, due, it was said, to the psychological effect weeks upon weeks of depressing, dreary weather can have on the human mind.

In a lighter vein, it's been said that Oregonians don't tan — they rust. And that it really doesn't rain all of the time — some days are just real cloudy. But we found the weather ideal, a switch from the eight days of drizzle and rain we left behind in Midland when we boarded the plane last Monday.

But that, too, seems behind us. We returned to a Tall City bristling with Indian Summer days and hinting of the fall weather to come.

It was good to get back.

Fighting in Beirut tapering off today

BEIRUT, Lebanon (AP) - Fighting between Syrian troops and Christian militiamen tapered off today, and police said 250 Lebanese had been killed and 502 wounded in Beirut since

Wednesday. The Syrians did not report their losses. Observers believed Christian claims of killing or wounding 400 Syrians were exaggerated.

A Christian radio station said the Christian sector of Beirut and the suburb of Hadath were without electricity and drinking water because the supply plants were wrecked by Syrian bombardment.

Sporadic exchanges of rockets and shellfire kept families in basement shelters in the Christian sector during the night. Traffic between the Christian and Moslem sectors remained paralyzed.

President Elias Sarkis, appearing worn and depressed in a TV broad-

the Israelis against the Palestinians in southern Lebanon.

After a weekend cease-fire that lasted 22 hours, the Syrians subjected East Beirut to the heaviest bombardment since the civil war as cover for a commando attack to rescue 50 Syrian soldiers trapped in a drugstore for

The bombardment ended at daybreak Monday, after the soldiers were rescued, but fighting continued at two bridges which the Syrians held on the northern side of the Christian quarter. The militiamen were trying to get control of the bridges to open up a supply route from the Christian areas to the north.

Police sources said 39 persons were killed Monday, 189 were wounded, 16 buildings were demolished and apartments set afire.

Exchange markets open with dollar down some

LONDON (AP) - The dollar opened slightly lower today on European foreign exchange markets. Gold was slightly up.

Here were the early morning quotes: Frankfurt - 1.9278 West German marks, com-

pared to 1.9320 Monday. Paris — 4.3310 French francs, compared to 4.33125

Zurich — 1.5900 Swiss francs, compared to 1.59325 Monday

Milan - 821.90 lire, compared to 823.05 Monday. In Tokyo, the dollar closed at 188.875 yen, down from 189.80 Monday.

In Zurich, gold was quoted at \$218.75 an ounce, compared with \$217.375 Monday night, while in London it was fixed at \$218.80 against \$217.25 Monday.

Cooling with cash can save money

By BERT P. STUDER Copley News Service

Everybody knows that investing a little money in insulation can save a lot of money in fuel bills - but coating your windows with gold or silver? Isn't that a bit much?

Not if you figure the cost over the life of the building, say researchers at California's Lawrence Berkeley Laboratory.

Their studies of the energy efficiency of windows plated with gold, silver and other metallic compounds indicate that such windows, now used in some office buildings, can either reflect or absorb as much as 90 percent of the heat and glare in summer as well as prevent the loss of substantial amounts of heat in winter.

In recent studies using computer models and instruments that measure the performance of thin coatings on glass, they also report that nearly transparent sheets of gold-coated glass, previously used to de-ice aircraft windshields and ski goggles, can also provide winter insulation.

"The energy savings from such coated windows would vary, however, on their location and the amount of heat or air conditioning used," pointed out Steven Selkowitz of the laboratory's windows and lighting program. "But over the lifetime of the

building, it should invariably pay off. "The question is whether the builder wants to invest in a more expensive energy-conserving glass," Selkowitz added. "Doing so would mean expensive air conditioners and heaters could be reduced in size and their annual operating costs could be

"Many architects are unwilling to do this, however, because of the high initial costs of coated glass plating."

Reflective glass costs \$4 to \$6 per square foot, compared to \$2 to \$3 a foot for clear glass. Reflective coatings can also, Selkowitz said, be applied to plastic films which then can be glued to glass, resulting in some cost savings.

The economics of conservation, however, are not the whole problem faced by the architect, Selkowitz said. Aside from the cost, he said, the architect must keep in mind comfort and appearance.

"In a new building," he said, "this is one of the most difficult decisions to make. The coating is permanent and many times permanent coatings are not the best solution."

Among possible compromises suggested by Selkowitz and his colleagues in the study would be reflective plastic sheets that could be rolled up and down to prevent heat loss from the window during the

winter or at night.

"The roll-up shades," he said, "are not different from the permanent coatings in reflective ability and. because they trap a small layer of air between window and shade, their insulating ability is even greater."

Such reflective films, the study showed, can bounce off nearly half of the sunlight, compared to only about eight percent by clear glass. The film also can prevent heat loss.

"Managed well," Selkowitz said, "windows can save large amounts of energy.'

SORORITY NEWS

ZETA TAU ALPHA ALUMNAE

The Zeta Tau Alpha Alumnae Association began the year with a salad luncheon in the home of Mrs. Bob

Yearbooks were distributed and three new members were welcomed. They are Marilyn Yates, Jan Carlson and Janis Harp.

Announced as a Zeta legacy was the new born daughter of Mr. and Mrs. Charles Seltzer.

New pledges announced were Sheryl Bailey, New Mexico State University; Kathanne Durham, Texas Christian University; Susie Gibson, Carla Gunnels, Bilinda McAnelly, Rhonda Mack and Robbie Parke. Texas Tech University; Jean Ann Lanier, West Texas State University, and Elizabeth Montgomery, The University of Texas-Austin.

Plans were discussed for the annual invitational candle coffee to be held from 10 a.m. to 2 p.m. Oct. 18 in the home of Pat Wettstein. EPSILON EPISLON CHAPTER, **BETA SIGMA PHI**

Katie Williams was hostess to a meeting in her home of the Epsilon Epsilon Chapter of Beta Sigma Phi.

Carolyn Hartzoge, president, an-nounced plans for the West Texas Area Convention to be held Oct. 13-15 in Abilene. It also was announced the chapter has received a three-star rating certificate from the sorority's international headquarters.

Jean Wilson, Myrtle Russell and Mrs. Hartzoge reported on their trip to Girlstown, U.S.A., to visit the girl sponsored by the chapter.

Plans were made to have a game party the third Thursday of each month for residents of Trinity Towers. Christmas gifts will be taken to the Big Spring State Hospital as a service project.

Woman's Club welcomes members with lunch, show

The Midland Woman's Club had a "Welcome Back" luncheon and style show in the Hogan Park clubhouse.

Models, who are active members and members of shareholding clubs, showed fall fashions from Skibell's and sportswear by Marshall Altman of San Francisco, Calif.

The models were Mrs. James Smith, Mrs. Thornton Hardie, Gloria Eng, Gloria McGavarn, Kathy Eudy, Edie Brasher, Allis Chapman and May Franklin.

Decorating the head tables at the luncheon were Madame Alexander dolls dressed in silk costumes.

Out-of-city guests were Mr. and Mrs. Charles Skibell of Lubbock, Altman and William Tilesman of San Francisco and Dorothy Stevenson of Lubbock.

DEAR ABBY

DID YOU EVER hear of bears playing cards?

Evidently Mrs. Paul King, Mrs. Gene Erwin and

Jane Johnson, left to right, found this at The Mary

Jane Shoppe in San Miguel Square, which will pro-

vide items for the 4th annual Needlepoint Gift

when teenagers can wed

By ABIGAIL VAN BUREN

DEAR ABBY: This is in reference to the 15-year-old girl who is begging her mother to let her get married: In some states, the decision to allow teenagers to marry does not lie with

the parents. For example, in the state of Washington, no child under the age of 17 may marry WITH OR WITHOUT parental consent without a court

permission. Kids between 17 and 18 require parental permission. After 18, they require only a witness. In one case, a 15-year-old girl was pregnant by a 17-year-old boy. Both his family and hers tried to get the judge to let them get married. At first he refused because he talked to the kids and didn't think they were sufficiently "sincere." Only after they attended several months of coun-

gave his consent. Another case: A 16-year-old girl asked for permission to get married because she was pregnant. The judge refused, saying that wasn't a good enough reason. The girl had her baby, waited until her 18th birthday, and then got married.

seling did the judge feel they were ready for marriage, after which he

Many parents feel it is their right to give or withhold permission, to marry, but the state of Washington says differently .- B. IN SNOHOMISH, WASH.

DEAR B.: At first I thought someone was giving me a "Snoho" job, but a call to a Washington lawyer confirmed your facts. Thanks for the

DEAR ABBY: I have a suggestion for people who would like to leave their worldly goods to favorite relatives and special friends.

DO NOT write; "I want Sister Diane to have the gold brooch I got from my Aunt Sophie." DO WRITE: "I want my sister Diane to have my 14 kt. gold brooch in the shape of an owl with diamond eyes." (If you have more than one gold brooch, no one may remember which one your Aunt Sophie gave you for your 16th birthday 55 years ago.)

Or, better still, if you don't have one of those instant cameras, borrow one and take a picture of every valuable item you own-and write the name of the person you want to have it on the back of the picture.

That way there will be no misunderstanding .- MRS. M. IN L. A.

DEAR MRS. M.: Good idea, but very few people are prepared to accept the fact that they can't take it with them—or indeed, that they are

Prevent flapping

To keep window awnings from flap-ping in the wind, sew small fish sinkers along the edge.

Washington State decides

even going! DEAR ABBY: Several years ago we wanted a third child. We joyously welcomed a 3-year-old child into our existing family. My husband, our social worker and I were certain the adoption would be a happy one. It

I still feel the pain of the six months that child was with us. So much had happened in her little life that the adjustment could not be made. At the time of our anguish, I read every book and article I could find about adoption. No one mentioned the pitfalls or even the possibility of an unsuccessful adoption—only the glowing accounts of the "happily-ever-after" successful

I have been tempted to publish the story of our failure, but I hesitate because I don't want to discourage others from adopting children who desperately need a loving home.

Showing to be held Oct. 18-10 in the the home of

Mrs. William Faudree at 2001 Winfield St. The

event is sponsored by the Kappa Delta Alumnae

Association and Mrs. King and Mrs. Erwin are

members of the group. (Staff Photo)

One of the most difficult things we had to deal with was a problem no one mentioned—the sexually abused child. As I write this I can still hear the child's screams as my loving husband tried to hold her. We finally understood when she told us in detail how "that bad man" had hurt her.

We had hoped that our patience, kindness and love would help.
Perhaps it did—but not enough.—

Copley News Service Patti and Brad say it was love at first sight - but they aren't quite sure about what has gone wrong between

By DR. LAURA SCHLESSINGER

CLOSER ENCOUNTERS

Love at first sight?

"The very first time I saw Brad I got this incredible emotional rush. I couldn't think of anything else except how I could get to meet him. I immediately began fantasizing about what it would be like if we got married," Patti reminisced.

"I thought she was beautiful, bubbly and very exciting. She appeared to be everything I had ever dreamed about having in a woman,"

Disappointments occur when expectations are not matched by reality; the larger the discrepancy between the two, the larger the disappointment. The overly idealized romantic notions of "falling" in love have resulted in many relationships rushing to a bitter, unhappy end as each feels cheated and betrayed by the other not turning out to be what

We all long to find someone who will be the ultimate in companionship: an intensely faithful friend, confidant, partner, lover, protector, nurturer.

It is, of course, questionable that any one person could U fulfill all of these roles, but even more unreasonable to believe that these abilities could appear spontaneously. Love at first sight is the easy an-

swer. You meet - and you both in-

stantly know all there is to understand aggressive nature.

> honest, accepting about our nature and needs, and becoming secure enough about ourselves to risk sharing this all with someone else. "Growing" in love with someone is very beautiful. It means exchanging unrealistic, idealized images of

both your real selves.

our assessments of others.

about the other, complete empathy. Unfortunately, this is a dream which cannot come true.

What is love at first sight? There are a number of components, such as sexual attraction, the need to have a someone, the romantic thrill of the situation and the apparent recognition of your "ideal" partner.

How do we learn what is our ideal partner? All too often what we describe is a composite of the perfect person, what our parents told us we should look for, what our friends find acceptable, what the media tell us we should want and have and perhaps some mistaken notions of who we are and what we need.

For example, Laurie became extremely irritated wth Lester when he didn't react in the same volatile manner she had in response to some unfair family matter. Yet, one of the reasons they got along so well together was because he was definitely more easygoing, calm and patient than she so that he was equipped to cope with her moods and massive battles were avoided.

But when Laurie was asked what kind of man would be perfect for her she responded by saying, "Someone who immediately rises to a situation, takes control, doesn't allow anyone to push him around, who will fight for his rights." What Laurie was missing was that there are many ways to accomplish these things, some of which are more clever than being overtly aggressive, and also that such an outright, forceful man would be a constant source of tension and combat, considering her own

Love is not something we "fall" into, it is something we "grow" into. And this growth process must begin long before we pair up with someone else. It begins with our gaining knowledge about ourselves, being

another for a realistic, appreciative acceptance of his or her qualities and building a safe emotional environment for the free expression of

We can probably never get completely away from all of the learned cues which attract us to each other initially, and that is a fun part of the excitement of life. But what we can do is be more practical and honest in our value systems and more tolerant in

Congress considers first censure vote in 50 years

By JAY PERKINS

WASHINGTON (AP) - The last time the House censured one of its members, it did so only because it could not find enough votes to expel

Now, more than 50 years later, it finds itself on the verge of a vote of censure for only the second time in the 20th century.

The House ethics committee recommended last Wednesday that the full House censure Rep. Edward R. Roybal, D-Calif., for his part in the South Korean influence buying scan-dal. The vote probably will be this

The committee found that there was sufficient evidence that Roybal failed to report a \$1,000 campaign contribution from South Korean rice dealer Tongsun Park, that he diverted the funds to his own use and that he lied in originally saying he received nothing from Park.

The committee also recommended that Rep. Charles H. Wilson, D-Calif., be reprimanded for his part in the affair. It found that he lied to the committee when he originally denied that he received about \$1,000 from Park after Wilson married a South Korean woman

Charges against two other members still are pending before the committee. Recommendations on those two are expected this week.

A reprimand is the weakest punishment the House can impose upon a member and consists basically of the House veting that the member violated its rules. A censure is more serious - expulsion from membership is the ultimate punishment - but censure also carries little weight on its own.

The basic difference between the two is that a member to be censured normally is led to the front of the chamber and forced to stand while the charges against him are read. A member does not have to be present during the reading of a reprimand.

However, by recent precedent, both charges can result in further punishment by House members. Rep. Robert L. F. Sikes, D-Fla., was reprimanded for financial misconduct in 1976 - the last House member to be so chastised. But the House Democratic Caucus later moved on its own to strip him of his seniority, an action that removed him as chairman of a power-

NEW YORK (AP) -

Take a drug and you'll be

smarter, live longer,

even change the sex of

your unborn child.

In another publicized attempt to discipline a member, the House voted in 1967 to exclude the late Democratic Rep. Adam Clayton Powell of New York for misuse of public funds. Powell was reinstated in 1969 and the Supreme Court ruled the exclusion had been unconstitutional.

There have been only 17 members of Congress and one delegate censured by the House and 13 of those occurred during the 11-year period from 1864 to 1875.

The last occurred in 1921 when Rep. Thomas L. Blanton, D-Tex., was censured for inserting "obscene language" into the Congressional Record. That censure occurred after a motion to expel him failed.

Many offenses with which the members were charged would barely raise eyebrows today. New York Rep. Fernando Wood, for example, was censured in 1868 for calling a bill "a monstrosity, a measure the most infamous of the many infamous acts of this infamous Congress.

And Rep. John Young Brown of Kentucky was censured in 1875 for in a burst of oratoric hyperbole describing an opponent as "one outlawed in his own home from respectable society ... who is such a prodigy of vice and meanness that to describe him would sicken imagination and exhaust invective.

Seven censures involved the use of unparliamentary language, two involved assault and conspiracy to assault another member, two involved utterance of treasonable language, two involved the use of obscene language, and five involved corrupt

The censure of Blanton, who was seen as a troublesome gadfly by the Republican leadership and an enemy by organized labor, came five days after he inserted a letter containing 'obscene language" - actually he abbreviated the obscene words - in the Congressional Record.

The letter involved a dispute between a Government Printing Office employee who did not agree with union rules and one who did.

The debate on Blanton contained some classic tidbits. Rep. Walter M. Chandler, R-N.Y., asked: "Was the gentleman not well aware that many thousands of the women could read them and would read them?"

And George S. Graham, R-Pa., defended Blanton by saying he was so

areas such as medicine,

transportation and man-

ufacturing. The survey is

conducted every three

is that the futuristic, sci-

The big news this year

intensely anti-labor that it was "his zeal that makes him a bigot."

Blanton defended himself by saying he inserted the letter only to point up 'the awful conditions existing in the printing office." He added that if he had the money, he would have reprinted the letter himself and mailed it to every man in the nation.

He said, however, that he would accept Congress' vote: "I am a man who never squawks when my adversaries' cold steel pierces my vitals. I shall take my medicine when you act today."

The decision to censure Blanton was a compromise. An earlier attempt to expel him failed for lack of a two thirds majority. The censure motion, passed on a vote of 293 to 0, had little effect on Blanton's career. He served from 1917 to 1929 before failing in a bid for the Senate and he came back in 1930 for six more years as House member.

If you're interested in what the letter actually contained, don't bother looking. The House expunged it from the Record and no copies exist in

large doses of amphetamines cause any permanent brain damage? We were talking about drugs the other day with some friends-not using them, mind youand there was quite a lot of feeling that warnings against them had been overdone, at least in some cases. A couple of people said amphetamines couldn't do any really permanent damage, but nobody seemed to have the answer to

this .- George R. Dear George: There have been some very convincing studies showing that amphetamines do in fact cause permanent damage if used heavily. I'm thinking especially of some reports from Dr. Calvin Rumbaugh, who used to be at the Los Angeles County-Univer-Medical Center and from trees, grasses and column.) who is now at Harvard.

He has found that the cumulative effect of amptamines causes narrowing and blockage of all blood vessels in the brain and some permanent damage. Dr. Rumbaugh noted this in patients brought in, often after an accident, who had a history of drug-taking. Animal studies have confirmed this, "Windows" set in the skull of laboratory rats have enabled researchers to see blood vessels close down following large doses of amphetamines. What Dr. Rumbaugh is

talking about is of course amphetamine abuse-not the use of carefully controlled amounts of amphetamine under a doc-tor's supervision for a specific medical purpose.

Pallbearers were to be Printus

Burkhart, C.E. McKenzie, Mike Stoltz, Rodney Satterwhite, Howell Kemps, Smith Ray and the Rev. Bob Porterfield.

Ollie Smith

BIG SPRING — Graveside services for Ollie Smith, 82, of Bartlesville, Okla., and formerly of Big Spring, will be at 2 p.m. Wednesday in Trinity Memorial Park under the direction of Nalley-Pickle Funeral Home here.

Mrs. Smith died Sunday night in Bartlesville

She was born Sept. 27, 1896, in Taylor County. She was married to John C. Smith Jan. 2, 1917, in Lamesa. He died Oct. 1, 1965.

She was a member of First Baptist Church of Big Spring and a past matron of the Order of Eastern Star Chapter 67 in Big Spring.

Survivors include a daughter, Fern Hurn of Bartlesville, and two grand-

Second defector's death launches investigation

LONDON (AP) - Scotland Yard is investigating the second death of a Bulgarian defector in three weeks. The first one died after he claimed he had been stabbed with a poison-tipped umbrella, and the second died in a fall down his stairs.

A third Bulgarian defector survived a poison-dart attack in Paris in August, and the Yard is evaluating the case of a fourth man claiming to be Bulgarian who flagged down a police car in London Monday and said he was being threatened.

The defectors all had made anticommunist broadcasts to their homeland. The two who died in London, Georgio Markov and Vladimir Simeonov, were close friends and worked for the British Broadcasting Corporation's Bulgarian-language

Simeonov's pajama-clad body was found in his south London home by another BBC employee sent to check on him after he failed to turn up for work Monday

Scotland Yard termed the death suspicious and said after an autopsy that the 30-year-old Simeonov died from asphyxia caused by inhaling blood from a fractured nose.

East took dummy's jack of clubs with the queen, and the spade return allowed West to cash two spade

tricks. West then led the ace of hearts and another heart for East to ruff.

East cashed the ace of clubs, giving West a chance to get rid of his last spade. Now East led a spade for West to ruff, and West led another heart for East to ruff.

By this time South was down to his five trumps, and a club lead promoted another trump trick for West.

NO USE FOR HIS HEAD South took only four tricks and suf-fered a penalty of 400 points. This should tell you which player had no real use for his head. Decide for yourself before you read on.

The criminal was West: He should have been delighted to double two

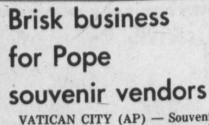

If the cards were well placed, West could expect to collect a substantial penalty. At the very worst, South would score 80 points below the line instead of only 40 points, and a paltry 50 points above the line. West had much to gain and very little to lose.

DAILY QUESTION As dealer you hold: S 9 7 6 4, H None, D J 7, C A Q 10 9 7 6 3. What do

ANSWER: Pass. Avoid making a shutout bid when you have an ace or good support for a major suit, and

Japanese broadcaster Hisanori Isomura delivers commentary about the U.S. space program from inside an engine on a Saturn 5 moon rocket on display at the Alabama Space and Rocket Center in Huntsville, Ala., recently. Isomura and a Japanese Broadcast Corp. camera crew were filming part of

an NHK special, "The Roots of the Space Age," in a city where Dr. Wernher von Braun led development of moon rockets and space stations. Isomura said Japanese interest in space exploration is strong, but that post-war feelings and laws limit the work that can be done. (AP Laserphoto)

VATICAN CITY (AP) - Souvenil vendors are doing a brisk business in postcards, portraits, key chains and other mementos of the late Pope John

Despite the rain, pilgrims and tourists milled around three stands set up Sunday in front of the newsstand near the Bernini Colonnade enclosing St. Peter's Square. Most of the buyers were women.

'Most of these things were made for the pope's inauguration cere-mony," said Giovanni Fortieri, 24, one of the seven vendors at the stands. "Fortunately, there was time (between his death Thursday night snd the public viewing of the body that began Sunday) to make extra prints of postcards and photo-

The colored postcards of Pope John Paul were the favorite item. There were four sizes, costing from 3 to 60 cents, and showed a total of nine poses of the pontiff, all of them smiling. Most buyers took three or four different cards.

Also for sale were stamped envelopes with a black and white profile photograph of the pope at 60 cents, color portraits in frames of gilt or carved wood at 60 cents to \$4.90, and gilt keys and thermometers with the pope's portrait.

Poster-size color photos sold for \$1.80, medallions and coins for 60 cents to \$1.20. Also available were copies of the Saturday edition of the Vatican newspaper L'Osservatore Romano announcing the pope's death of a heart attack.

'Roscoes' point to design trends

By The Associated Press

For sheer creativity, the movie Oscar can take a back seat to the Roscoe Award of the interior design world.

For John Elmo, this fall's annual product design awards program brought a double triumph. He became the first designer to win two Roscoes in the same year. In fact, he also won a third award by popular acclaim.

Elmo, president of South Bay Design Corp., was among more than 100 nominees in 27 categories competing for top honors.

He accepted his two Roscoes and a special certificate at the Eighth annual awards event presented recently by the Resources Council in New York

The council is a non-profit, national trade organization which encompasses the entire interior furnishings

Elmo's winners came in two categories. In wall coverings, the jury picked his Belgian Tringon Linen, featuring a vertical linen thread bonded to a designed wallpaper of wavy horizontal lines.

It comes in beige linen on beige ground and off-white linen on beige ground. This entry also won a special certificate in a separate judging.

Elmo's fabric winner entitled "Pindespil Burn-Out Casement," present a pattern of parallel lines in contrasting patches resembling an aerial photo of plowed fields. It is in upholstery and drapery fabric and wall covering and carpeting.

The Roscoe award symbol presented to each winner is a crystal prism, designed by Tiffany & Co.

For homemakers across the nation these awards raise the curtain on many innovations that will be seen in designer showrooms and department

Highlights include: "Il Colonnato," by Mario Bellini, which won the Roscoe for contemporary residential furniture.

It is a marble table supported by cylindrical legs described as translating the grace and grandeur of Roman FOR SALES ACTION IN A BURRY NOTHING WORKS LIKE A WANT AD FOR AN AD-VISOR Dial 682-6222

Employers get tax liability for tips

A recent change in the Social Security law that may have escaped the attention of some people provides additional Social Security tax liablility for employers whose employees receive part of their earnings in the form of cash tips.

Under the old law employers did not have to pay Social Security taxes on tips, only on the actual wages paid the employee. Since 1966, the employee has been required to pay social security tax on cash tips amounting to \$20 or more in a month from one employer, according to a Social Security Administration spokesman. The new law provides that an employer must pay

Social Security tax on amounts deemed to be earnings for purposes of meeting the requirements of the minimum wage law.

In many jobs where low wages are paid in expec-

Texans may not have to pay on food stamps

EL PASO - Texans participating in the food stamp program may no longer have to spend any of their money for the coupons.

The Texas Board of Human Resources recently voted in an Amarillo meeting to end the cash outlay requirement for the program.

Jerome Chapman, commissioner of the Texas Department of Human Resources, said he hopes the non-cash provision can become effective Dec. 1, or soon thereafter. It must be authorized from the U.S. Department of Agriculture which controls the food

stamp program. Eliminating the purchase requirement is one provision of the Food Stamp Act of 1977. Other provisions will be implemented next year, Chapman tation of substantial tips, the Internal Revenue Code allows such tips to be considered earnings for up to 50 percent of the minimum wage. Now these deemed amounts will also be considered earnings for Social Cash tips that total \$20 or more in a month from

one employer should be reported. The tips are

reported to the employer in writing by the 10th of the

month for the previous month. Employers may require reports more often. A penalty may be imposed for non-reporting of tips, as it is for the non-reporting of other earnings. The penalty is equal to one-half the Social Security contribution on the tips not reported, the spokesman

said. The penalty may be waived if the employee can show the failure to report was for some reasonable cause and not through neglect. The greater penalty for failure to report tips may come later, however, when a person begins to re-

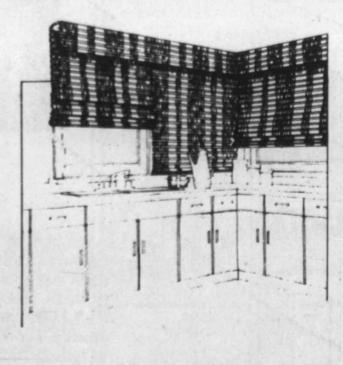

ceive social security benefits. Since the amount of the check is based on annual earnings over one's working career, a person may increase his or her benefits significantly by reporting

tips as earnings for social security purposes.

For those who fail to report, the gap between their social security benefits and their pre-retirement income is often much greater than it should be since the benefits do not reflect all of their pre-retirement earnings, the spokesman said..

More information can be obtained by contacting the Odessa Social Security Office located at 516 First National Bank Building. The phone number is 332-

The Los Angeles Times

SAN DIEGO — Coroner's officials Monday quietly made plans for a mass burial as it became more and more evident that many of the 144 victims of San Diego's air disaster may never be positively identified.

Those faced with the grim task of identifying the pieces of human bodies from the nation's worst air crash say that so far 84 persons have been positively identified.

Acting San Diego Coroner David Stark said he met Monday with funeral coordinator Sam Douglass, who is working with Pacific Southwest Airlines, to discuss arrangements for a mass funeral.

Stark said it will take place in the city or town where a majority of the unidentified victims lived.

"We have discussed the mass burial," Stark said, "but it is a little too early to talk about details. We are hoping for a high percentage of iden-

Since the fiery collision of the PSA 727 and a single-engined Cessna last Monday, volunteer dentists, FBI agents, coroners' deputies and others have worked to identify the victims.

National Transportation Safety Board investigators estimated the speed of the PSA jet at 310 miles an hour when it crashed into a neighborhood in northeast San diego.

Stark said that a single service for unidentified victims will probably be held. He said officials will first confer with various clergymen to determine

the nature of the service. In another development Monday, federal aviation officials released tapes of control-tower talk with the PSA pilot moments before last week's midair collision here. They said that there is nothing on them to indicate that the safety system failed.

Federal Aviation Administration spokesman W. Bruce Chambers

"The system, we think, is safe and the American public should fly it with

It is too early to know, he said, what went wrong. There was no startling information on the tapes that had not already been

described by an NTSB spokesman. But it was the first time the press and public were allowed to hear the actual words of the FAA tower crews at Miramar Approach Control and Lindbergh Field and that of the PSA

9: 01 and 55 seconds: "Tower, we're going down, this is

pilot who radioed in a calm voice at

And the equally calm voice of the Lindbergh Field controller:

"Okay. We'll call the equipment for The transmission tapes carried four

separate advisories to the PSA plane that there was other traffic in the

-At 8:59 a.m. and 28 seconds, Miramar Approach Control told the PSA pilot before he made his final approach to Lindbergh Field that he had traffic at "12 o'clock" - or straight ahead.

PSA's response was "roger." -Ten seconds later, Miramar notified PSA that there was "additional traffic at 12 o'clock three miles just north of the field northeastbound, a

PSA answered, "Okay."
—At 14 seconds past 9 a.m., Mira-

mar repeated its advisory that PSA had traffic at 12 o'clock three miles

To that, the PSA pilot responded, "Traffic in sight." It was that response that convinced

Miramar Approach Center personnel that no real emergency existed even though a sophisticated new alarm system sounded 17 seconds before the

Having been assured that the PSA ilot saw the other airplane, the Miramar personnel passed PSA 182 to the Lindbergh Field tower for monitoring during final approach and

-At 37 seconds past 9 a.m. - 14 seconds after assuming responsibility from Miramar, the Lindbergh Field

tower advised PSA that the Cessna was only a mile from it.

'Okay," replied the PSA pilot. "We had him there a minute ago.

And, a few seconds later: "Think he's passing off to our right." But by this time, with PSA in the hands of Lindbergh Field, the tapes

gave no indication that Miramar was aware of the PSA pilot's apparent loss of view of the Cessna. The tapes showed that the single-engine Cessna also was given an advisory by Miramar at 31 seconds past 9 a.m. as it headed from the Lindbergh Field area. The advisory was that the PSA plane was two miles behind him; "has you in sight," the Cessna was told.

"One One Golf Roger," said the Cessna pilot, giving his call letters and the acknowledgement.

That was about a minute before the

Other replies from the Cessna, which carried instructor Martin Kazy, 30, and instrument approach student David Lee Boswell, 36, were garbled and impossible to under-

Dramatically, at 9:01 and 47 seconds, about the time of the collision, Miramar again advised the Cesssna that there was a PSA in his vicinity, coming into Lindbergh Field. There was no answer.

Miramar tried again but there was

silence, broken only by the pre-recorded voice of a woman ticking off the time each 10 seconds.

As the dreadful realization came, there were other voices on the tapes - some of them those of other

"I just witnessed an airliner crashed, ah, just off of Lindbergh, said a Grumman pilot who sounded just a little more excited than the calm tower personnel.

"Boy, what blew up out there?"

asked the pilot of Western's Flight 476 coming into Lindbergh.

"Seven-twenty-seven (Boeing 727) went in," responded the tower."

"What happened?" "Seven twenty seven went in."
"Oh, God. Whose?"

And just after PSA Flight 182's pilot reported calmly, "We're going down," the pilot of another PSA plane asked "What airline?"

"I'm afraid it was your company," said the tower controller.

Midlander picked for post

A Midland man has been named to the support staff of the XV World Scout Jamboree to be held next summer near Neishaboor, Iran.

Serving with the U.S. contingent at the event, which is expected to draw up to 20,000 scouts and adult leaders from more than 100 countries, will be Bernold M. Hanson. He will serve as chairman of the BSA South Central regional participation.

Under the theme "Jamboree for Cultural Development," participants will spend a week to 10 days at Omar Khayyam Scout Camp, a high desert site at the foothills of Iran's northeast mountain range. The delegation from the Boy Scouts of America, expected to number about 2,000, will tour and visit with scout families in Europe before flying on to Iran.

The jamboree program will include a wide range of sports activities, cultural events, community development projects, exhibitions, handicrafts and scoutcraft demonstrations, opportunity to visit two nearby cmmunities and a variety of special campfire programs.

Deputies mistake handcuffs for gun, shoot soldier

GEORGETOWN, Texas (AP) -Sheriff Jim Boutwell says he plans to refer the shooting death of a Fort Hood soldier by deputies from a neighboring county to the district attorney for presentation to a grand

But Boutwell said in his opinion the shooting death early Sunday of Spec. 4 David Samuel Fullington, 21, of Algonquin, Ill., was clearly justified.

He said deputies who fired at him mistook the glint of a metallic object near his hand for a gun. The glint came from handcuffs placed on Fullington when he was arrested earlier

for drunken driving. Boutwell said Fullington, who stole a state police car and went on a wild joyride before he was killed at a roadblock just inside the Williamson

County-line, was endangering lives. He said the soldier must have been "on a spree" when he drove a stolen Department of Public Safety squad car across fences and over pastures, ramming one deputy's squad car and running several officers off the road. "He crossed the center stripe, charging cars head-on, both police and civilian. I really don't know what else they could have done," said Boutwell. "They did everything they could to stop him. We're just lucky that some innocent people weren't

Fullington was stopped for speeding and drunken driving on Texas 26 near Burnet about 2 a.m. in a car with three other soldiers. The DPS officer cuffed Fullington's hands behind his back, put him inside his squad car and went to search the other sol-

Boutwell said Fullington apparently sat on his hands and wiggled them under his legs so that his hands were in front, allowing him to drive off in the DPS car.

There appeared to be conflicting reports on the shooting when officers were questioned about it Sunday. Burnet County Sheriff Roy Hilliard said his deputies opened fire as Ful-

lington crashed through the roadblock, while a DPS spokesman said officers fired on him only after he raised a hand and they saw what they believed to be a gun.

"As near as we can determine, both events happened," Boutwell said.

"The officers did open fire on him in an attempt to stop the car" after it crashed through the roadblock, but apparently Fullington was not hit.

'There were numerous bullet holes in in the stolen police vehicle, and deputies shot out a tire or two," Boutwell said. The car made it through the roadblock, but swerved off the road and ran into a fence.

"When officers approached, he put the car in reverse, and attempted to back away," Boutwell said. "He was ordered to halt. At that time he raised his hands to the top of the steering wheel. The officers saw a glint, which they assumed to be weapon. As it turned out it was his handcuffs. Nevertheiess they fired at that time, and Fullington was killed by a single bul-

Youth declared dead second time in week

AUSTIN, Texas (AP) - For the second time in a week, 19-year-old Roger T. Ragland of Dripping Springs has been declared dead-the victim of an automobile crash.

A spokesman at Austin's Brackenridge Hospital said Ragland, who showed signs of life 12 hours after being declared dead following the accident last week, died at 6:35 p.m.

Ragland suffered massive head injuries in the accident last Wednesday and doctors at the hospital told his family Ragland was dead. He was put on a respirator after his family agreed to let doctors remove a kidney for a transplant.

Ragland's family, meanwhile, called a funeral home and the funeral home gave Ragland's death notice to

newspapers. But as doctors prepared last Thursday to remove Ragland's kidney, they noticed movement in his legs. An electro-encephalogram was performed to measure Ragland's brain acivity. A neurosurgeon called Ragland's family and informed them of

Following brain surgery, Ragland clung to life on an artificial life support machine. He remained in critical condition until his death Monday.

"The error that was made—the real tragedy-was that the family was told he was dead. It is a semantic thing. At that time, there was no question his injury was so severe that there was no hope for his recovery," said Dr. George Beathard late Monday.

Beathard, chairman of Brackenridge Hospital's organ donor committee, said the original determination of Ragland's death was made without the application of "brain death techniques.

Texas has no legal standard for declaring a person dead. Brain death, however, is a medically accepted def-

Dr. James Lindley had said Ragland had shown no brain activity when he was brought to the hospital. The shock over the latest death announcement Monday squelched the

possibility of another kidney trans-

plant, a member of the family said.

Go directly to Las Vegas on Continental. Collect 50% savings. Do not change planes.

Death Row overcrowded; Executions predicted

Texas' Death Row is getting so crowded with prisoners condemend to die that correction officials say they may have to open up a new wing of Death Row. "They're coming in hard and

quick" said Department of Corrections spokesman Ron Taylor. "At some point we're going to have to open up a third cell block to house all But at the same time Taylor predicted Monday that Texas will begin

carrying out executions next year for the first time in 14 years. Taylor said there are now 100 persons in state custody who have been sentenced to die, "plus probably another dozen in county jails who have

been sentenced but have not yet been transferred to us.' Taylor said some have been on Death Row for four years, and appeals are beginning to run out. Texas has not executed a prisoner since July 30, 1964, when convicted murder Joseph Johnson of Houston was electrocuted. The electric chair has been replaced by a method of execution yet

to be used — lethal injection. "It looks like there's a good possibility for an execution in 1979," Taylor said. "My guess is it will be late

spring or early summer." Texas houses its condemned prisoners in single-person cells in the Ellis Unit, about 18 miles north of here. If the trend continues, Ellis' Death Row stands to grow even more crowded before the executions start. Texas

juries sentenced 17 persons to death in 1974, but sent 24 convicted killers to death row last year. Houston juries alone have handed

down 12 death sentences so far this

year, including four in one week. A jury in nearby Wharton last month sent the only condemned woman in Texas to Death Row. Mary Lou Anderson of Lake Charles, La., was sentenced to die by an injected overdose of sodium pentothal for hir-

ing a killer to murder her parents so

she could collect their life insurance. Several women have been sentenced to death, but the only woman ever put to death was Chipita Rodriquez. She was hanged from a mesquite tree near Sinton in South Texas in 1863 for murdering a horse trader and stealing his gold.

Texas lawmakers wrote a new capital punishment law in 1973 to replace one declared unconstitutional the previous year. But prisoners have avoided death by continually appealing their cases. Now, legal experts in Austin say time is running out, especially for two condemned inmates, James Paul Burns and Jerry Lane

Burns, who was convicted of abducting, torturing and murdering an Odessa man in 1973, he is "pretty close to the end" of his legal battle, an

assistant attorney general said.

Jurek, who has been on death row even longer than Burns, was convicted of abducting and strangling Wendy Adams, 10, of Cuero, in August 1973.

We now have daily, direct service, so there's no more rushing from gate to gate to change planes. And with what you save flying Continental,

you can act like a big spender once you get there. Our Chickenfeed Fares start as low as \$96 round trip ‡, depending on when you fly. That's up to 50% off regular Coach fare, if you purchase your tickets in advance. And you still get up to 20% off with no advance purchase. So you can fly for as little as \$77 one way.

We bet you'll like our roomy 727 tri-jets, too. There's free stereo, space to stretch out and a

mood to enjoy all that great Las Vegas night life.

Seats are limited, so call your travel agent or Continental at 563-2100. Tell 'em you want to get in on our great new deal.

For cargo sales information, call Continental Jetfreight at 563-0664.

More, more, more!

One would think that governors of states would know better and make better corporate decisions on certain occasions. But once again they have failed the test.

JAMES N. ALLISON (1902-1975)

Boston was the site of the National Governors Conference this year, and there were those who thought the assembled governors perhaps would see an analogy between a famous tea party of 1773 and the Proposition 13 uprising of angry taxpayers in 1978. But such was not to be. They appeared just as wedded as ever to the easy politics of more, more,

The governors wound up calling for more federal aid to the states, and in the next breath demanded that the federal budget be balanced.

The grass-roots tax revolt and the increasing awareness that federal deficits are perpetuating inflation are two dominant facts of life for American politicians today. If the governors would put two and two together, they would realize that the federal government will never get out of the red if it starts bailing out state and local governments facing new limitations on their own taxing

California's Jerry Brown

showed up in Boston just long enough to warn that Proposition 13 is the wave of the future, but even after that the governors wouldn't even entertain the dreadful thought that some costly but politically popular programs should be dropped.

JAMES N. ALLISON JR. (1931-1978)

Their resolutions did not call on Washington to stop mandating programs for the states to carry out, which would be a credible response both to the tax revolt and the need for a balanced federal budget. Instead, they demanded that Washington send them more

But Boston's association with a tax rebellion in colonial times doesn't even impress one of the city's favorite sons, Sen. Edward M. Kennedy. He told the governors the present tax revolt isn't as serious as the need for the national health insurance plan he proposes, and he is convinced there are enough loose tax dollars around to cover the \$100 billion it would add to the federal budget.

That could be the way things look from Massachusetts these days, but it is hoped the condition isn't contagious. It is likely that some of their constituents upon brought back down to earth by some of their constituents upon

Kennedy's big goof

M. Kennedy, and for what's it relaxed policy on emigration, worth in terms of his future made that clear enough - to aspirations, he has flunked the standard test in Quiet Diplomacy.

The basic rule is just what the term implies - keep it quiet until the results are in the bag.

But Sen. Kennedy came home from Moscow and immediately called a news conference to announce that, thanks to his personal persuasion in a huddle with Leonid Brezhnev, the Soviet Union was going to grant exit visas to 18 Jewish families heretofore denied permission to emigrate.

Now, as most folks know, nothing annoys the Russians more than any suggestion that pressure from the outside can affect their internal affairs, especially their policy on Jewish emigration. Their bristling response to the Jackson-Vanik amendment, which attempted to use United

Again mentioning Sen. Edward States trade benefits as a lure to a everyone except Mr. Kennedy.

> Predictably, Pravda responded to the Kennedy news conference with a blast that did not conceal its target. American politicians are

mistaken, said the Communist party's official organ, if they think they can intrude into internal Soviet affairs by posing as "champions of human rights," on visits to Moscow.

Yes, Sen. Kennedy certainly is left with egg on his face, but the real victims of his goof may be those 18 "refusednik" families. Some of them have been waiting for years for a Kremlin decision on their fate.

It would not be surprising if they now have to wait even longer - if they get out at all. They have Sen. Kennedy to thank for the new problem now facing them.

WASHINGTON MERRY-GO-ROUND

High flying at U.S. expense

By JACK ANDERSON

WASHINGTON - The resounding public outcry over sky-high taxes, most dramatically voiced by California voters in their recent approval of Proposition 13, has failed to penetrate into some corners of the federal bureaucracy.

For many paper shufflers, a government job is a free ticket to the good life, a passport to see the world on federal travel vouchers - flying to sunny climes, staying at luxury hotels and dining in gourmet restaurants at the taxpayers' expense.

Like all Americans, these bureaucrats have an inalienable right to the pursuit of happiness. The difference is that they have come to feel they're entitled to pursue happiness at public expense. Each conference, mposium, speaking engagement, field trip, inspection or consultation becomes a welcome excuse to escape from the dull routine of the office and head for the airport.

The school supperintendents from all 50 states, for example, recently jetted off to South Padre Island, a resort off the coast of Texas, for an eight-day frolic with federal officials. one of two such junkets the educators

take each year. Not only were they reimbursed for travel and living expenses, but each superintendent was paid \$800 in "consulting fees." The Office of Education assured us that the conference - with its \$126,000 price tag was a no-nonsense academic gathering. The superintendents were paid their consulting fees for researching the topics that they discussed with federal officials and each other.

Some of the memos handed out to the visiting school administrators give quite a different impression, however. "Golfers wishing tee time or rides for this afternoon should come

to the information desk," one memo instructed the educators. "Fishing and boating are two sports you can enjoy right here on the island," gushed another memo, adding: 'Thirty fish - that was the catch of the boat carrying Dr. Robert Brunelle and Dr. Chad Chase on Saturday (sic) and Sunday's excursions into the deep

Other memos described the delights of a Mexican fiesta, a barbecue, a trip to the zoo, a tea party and the Texas International Fishing Tournament. One memo kept the supposedly hardworking conferees abreast of the tennis scores, noting that the men's singles crown remained safely in the (school) chiefs' corner."

Despite the solemn claim that the conference was strictly business, 32 officials brought their wives along. An additional 45 children — one aged 24 - traveled to South Padre to take advantage of the Gulf Coast's sun and

Excessive junketing by education bigwigs has stirred some misgivings in the upper echelon of the Health, Education and Welfare Department. Undersecretary Hale Champion warned in a confidential memo to Education Commissioner Ernest Boyer: The Office of Education is of prime concern ... because of recent meetings either held or scheduled in Las Vegas and Williamsburg. Would you please ask your people to keep an eye on it? Las Vegas, I might add needlessly, is tougher to explain than

Williamsburg.' HEW is not the only junket-prone agency in the federal wonderland. The National Aeronautics and Space Administration, charged with exploring the frontiers of outer space, seems almost equally concerned with propelling key members of Congress on sub-orbital flights around the

globe. These so-called "familiarization" trips are first-class all the way. No cramped spaceship quarters or powdered orange drink for the legislators and their aides. In 1974, for instance, then-Sen. Frank Moss, D-Utah, chairman of a space subcommittee, took giant steps for mankind that took him to Dallas, San Diego, Los Angeles, Honolulu and Australia. The taxpayers' tab for Moss and his colleagues that year was more than \$12,000.

The undisputed king of NASA's junketers, though, is Richard Malow, the lanky, bespectacled clerk of the House subcommittee that controls the agency's budget. He takes an annual jaunt to the West Coast with a \$50-aday expense account. In 1975 he managed to stop over at Las Vegas and Reno on the way. Malow explained that there were two government facilities at the Nevada gam bling resorts in need of first-hand

In 1976, Malow spent \$2,258 for a first-class trip to Europe. He discovered Paris, London and Amsterdam, explored the European Space Research Organization and touched down at the Farnsborough Air Show in Great Britain.

Last year, Malow limited his trajectory to the United States. dropping in on New Orleans, Tampa, Dallas, Las Vegas and Los Angeles. More recently, he flew to Vienna, Amsterdam, London, Paris and points in between. A NASA official told us that while

all the bills haven't come in yet, Malow's Grand Tour of the Continent will probably cost the taxpayers more

"I frankly think we don't travel enough," Malow told our associates Jim Grady and Tom Rosenstiel. "That's when you really find out what's happening in the field." He said he uncovers information that leads to investigations, but conceded that he rarely files written reports on his travels.

HEMISPHERE REPORT:

American dollar worries most Latin Americans

By WILLIAM GIANDONI Copley News Service

The dollar seems to interest Latin America more than the United States. Most Americans, apparently convinced that, as has been said, there are only two men in the world who really understand international monetary affairs and they don't agree, have never tackled the subject.

Not much of an attempt has been made to popularize the study of money in the United States. One effort, though, was the book, "The Currency Carousel," by Dr. Thomas G. Evans, from which comes the story about the disagreement of the world's only two monetary experts.

In Latin America, however, newspapers and magazines delve into the matter from all angles.

Quite often, as happened recently in Mexico City, the problems of the dollar, and what to do about them, make frontpage headlines.

"Latin America Attacks the Dollar as Monetary Standard," the capital city's major daily, Excelsior, proclaimed in big black letters.

Excelsior was a little more restrained in its story, on the meeting that the heads of most Latin American government central banks had held in the Pacific coast resort city of Acapulco.

The paper reported that the government bankers "coincided" in agreeing that "because of the instability of the world monetary system and the alarming fall of the dollar on international markets," a search for something better than a dollar standard is fully justified. That is neither new nor startling.

The quest has been going on for years, even before the link between the dollar and gold was broken in August 1971 and the dollar was devalued. "Paper-gold," more formally known as Special Drawing Rights, is one ongoing experiment being made by the International Monetary Fund, but it has not solved the problem. The Acapulco bankers' meeting did

serve as a reminder that even though most of the world's exchange rates have been "floating" for years now, the majority of the Latin American countries have chosen to try to maintain a fixed relationship between their monetary unit and the dollar.

It is not necessarily that they are pro-United States or pro-capitalist, but rather that for good business reasons they prefer that their peso or colon or sucre or balboa, or whatever their money may be called, have a fixed dollar value.

As far as Latin America is concerned, the dollar is the yardstick by which values are measured. That is the way it has been for decades and, whether they really like it or not, that is the way it will be as far ahead as they can see in the future.

Of course, Latin America, and the rest of the world for that matter, had much more confidence in the dollar when it was convertible into gold.

It was not that they wanted or even needed gold. After all gold is only good for hoarding or for speculation, out not for productive investment, as Mexico's National Foreign Trade Bank pointed out in its monthly magazine in an article on "The Crumbling of the International Monetary System."

Nevertheless, when the U.S. government decreed the inconvertibility of the dollar into gold and later devalued the dollar, the world monetary system "entered into a complete crisis," the Mexican government bank said.

Mexicans, as well as most other Latin Americans, could . have predicted that. They have had much, much more experience with

devalutation than the United States. Any one of the Latin nations could have told the United States that devaluation just does not get at the

root causes of a country's problems. In any case, by now it is clear that most of the other American republics would like to see a stable monetary system re-established with fixed dollar rates of exchange.

The first requirement for that, though, would be a sound dollar. That is why so many Latin Americans are concerned about the lack of concern the United States shows in the fluctuations of the dollar and their impact on the developing

THE BIBLE

nations of the world.

INSIDE REPORT:

Carter visit raised campaign funds, but little more

By ROWLAND EVANS AND ROBERT NOVAK

ASHEVILLE, N.C. - A jubilant Jimmy Carter swept into the Smokies of western North Carolina five days after concluding the Camp David summit to confront the difficulty of translating that personal triumph into help for embattled Democratic candi-On his Sept. 22 visit to Asheville, the

president was radiantly self-confident and his speeches reminiscent of their 1976 pre-convention form. But it is doubtful that Mr. Carter significantly helped the candidates he came to support. The feeling in North Caro-lina, before and after his visit, was that the president could generate extra campaign funds here — and little more. Presidents usually have found it

difficult to affect midterm elections. and Mr. Carter has a special problem. Desite his renewed popularity after-Camp David, embracing the presi-dent's liberal domestic program is risky business for Democratic candidates in an anti-tax, anti-government

North Carolina is especially important because of Sen. Jesse Helms, a rigidly conservative Republican targeted for defeat by the Democratic party's national hierarchy. National chairman John White has taken special interest in this Senate race, bracketing Helms with Strom Thurmond of South Carolina and John Tower of Texas as "radical right"

senators to be defeated.

One problem with White's strategy is that North Carolinians simply do not regard Helms as a "radical" six

years after he leaped from right-wing television commentator into the U.S. Senate. "Jesse is generally thought of as a fine, Christian gentleman even by people who don't agree with him," one prominent Democrat confided to

Novak

Another, bigger problem is his opponent: state insurance commissioner John Ingram, a plutocrat-baiting, Bible-quoting populist who upset Luther Hodges Jr. in the Democratic primary. The Democratic establishment's contempt for Ingram is typified by this private assessment by one Democratic politician close to Gov. Jim Hunt: "To be blunt, Ingram is

irresponsible and demogogic."
Ingram's money-starved campaign sounds more like the early 1930s and the late 1970s, with the candidate declaring "this fight against the special interests." He says nothing about inflation, refuses to take a position on tax limitation or the Kemp-Roth tax reduction bill and concentrates on blasting Helms as "the \$5 million man" because of his bountiful campaign war chest. To establishment Democrats, that will not unseat Jesse

The purpose of the president's visit

was to put a few coins in Ingram's empty treasury. President Carter and Gov. Hunt nudged their rich friends, appalled by Ingram, into buying \$550a-couple tickets to a steak dinner at the distinctly non-populist Biltmore Estate in Asheville. Added to the program was an airport rally for freshman Rep. Lamar Gudger, facing a tight re-election battle. Next came the customary bickering

between the White House and local politicians. The president's men de-manded that the Gudger rally be held at the airport instead of downtown Asheville, where a much bigger crowd would have gathered. They also insisted the president's speech include a proposal to make North-Carolina a "rural laboratory," which Democrats here correctly forecast would be lost in the hoopla.

Such trivia was eclipsed by the Camp David summit. Ingram became markedly more enthusiastic about the president, proclaiming: "This week we have seen the handiwork of (a) great president of the United States who is leading us out of moral depression." Hunt, a long-time Carter booster, believes Ingram should now tie his campaign to the

But Helms' blanket opposition to Carter legislation is so popular that Democrats have stopped calling him "Sen. No." Rep. Gudger's Republican opponent, Buncombe County board chairman Curtis Ratcliff, in a speech the day of the president's visit attacked Gudger's 70 percent pro-Carter voting record.

Hunt's proposed solution: identify with the budget-balancing, government-limiting Carter. The president made that course easier in Asheville

by reaffirming his pledge "to get government's nose out of the people's business." But like Ingram, he sidestepped the public's preoccupations by not mentioning inflation or tax reduction.

After forgetting to acknowledge Ingram at the airport rally, the president was lavish for him at the Biltmore Estate fund-raiser. "He (Ingram) may not be as sophisticated as some of you," Mr. Carter told the well-heeled, cocktail-sipping audience, "but neither am I." He then proceeded to draw some strained comparisons between Jimmy Carter and John Ingram.

But the president did not give Ingram's supporters what they wanted most: a frontal attack on Helms, Mr. Carter did not mention him. The general perception that Ingram trails for the Senate and Gudger could lose for Congress was left unchanged by the presidential visit. Evan after Camp David, midterm coattails are hard to

And Jesus said unto them, "Come ye after me, and I will make you to become fishers of men." - Mark

Work life agency ignored, killed

By JOHN CUNNIFF

NEW YORK (AP) - In the name of efficiency many areas of the federal bureaucracy might be laid to rest, but that which was buried this past weekend

hardly was the proper one.
So far as is known, the National Center for Productivity and Quality of Work Life didn't even will its vital organs to another agency.

All it left was its studies, and the warning it referred to constantly throughout its three-year life: Production efficiency, which helped build and support the American way of life, is deteriorating. Everyone piously acknowledges the dangers. In its

1978 report to the president, for example, the Council of Economic Advisers called it "one of the most significant economic problems of recent years.' But it's almost ignored. In its final report, the Center commented that "although this slowdown affects almost every major economic issue, policy-

makers have paid inadequate attention to it. Unforgiveable, you might conclude, when you consider that the issues policymakers sometimes build so large are mere anthills against the smoky volcano that the issue of lagging productivity really

Consider first, in the Center's final words to the president and Congress, what productivity increases have meant to the country:

"Americans, throughout history, have enjoyed a steadily rising standard of living. The economy has expanded, new jobs have been created, choices have been broadened, and rewards have increased. "The average American today consumes greater

amounts and varieties of goods and services, performs less backbreaking work, and has more leisure time than the generations before. "This better life was made possible by sustained

productivity improvement — a continuing ability to produce more in less time and with fewer re-

Now consider some of the things productivity increases could mean to the country right now:

A higher standard of living, economic growth, control of inflation, international competitiveness; funds for the environment, relief from poverty, support for the aged, more leisure and better health

And finally, think of what conceivably could hap-pen to the country if productivity fails to gain and perhaps actually declines:

Living standards would fall, taxes might rise prices would soar, jobs would decline, wages would become stagnant, and conceivably, the entire American way of life, including its institutions, might crumble.

As the final report states, "The concept of productivity is deceptively simple: It refers to productive efficiency." It measures output — goods and services — against input — labor, capital, materials.

When the same amount of input produces more goods or services in one instance than another, or when the same output can be produced with less nput, we say that productivity is higher or has

Overly simplified, it means that if we can bake a bigger pie for the price of a smaller one, everyone can enjoy a larger slice without cutting into his indor's portion.

George Kuper, the Center's executive director, isn't totally pessimistic. We can, he said, vigorously pursue a program that gives top priority to the

Involved would be an effort to enhance technological innovation, stimulate capital investment and human resources development, and encourage labor-business and business-government coopera-

But that was what the National Center was designed to set the stage for, and under Public Law 94-136, enacted in November 1975, the Center selfdestructed on September 30, 1978.

Meanwhile, prospects for productivity, whose growth began slowing in the late 1960s, are no better for the 1980s. The country still has no productivity policy. And the volcano smokes, as it did at Pom-

New pollution law set

AUSTIN - A change in permit procedures to construct new sources of air pollution became effective Monday, according to a spokesman with the Texas Air Control Board.

The rule change requires companies applying for a construction permit for a new source or modification of an existing source to publicize specific information regarding the proposed facility. The TACB adopted the change this past spring. The statement must run in two consecutive issues

of a newspaper having general circulation in the area in which the source is to be located. The statement also must appear in the public

notice section of the newspaper and elsewhere in the same issue as a notice measuring at least three by A public comment period of 30 days from the last

date of publication will allow interested citizens to submit written comments to the TACB concerning the permit application.

The spokesman said the new rule was adopted to broaden public participation in its permitting procedures and to inform the citizens when a new facility is constructed in their area.

Housing panel

to hear Hillcrest group

Activities at Hillcrest Manor will be outlined for members of the Housing Authority of Midland when they meet at 2 p.m. Wednesday. The panel will convene in the Council Chambers at City Hall.

The executive director will report on conditions found during the annual nspection of all apartments at Hillcrest Manor, and the panel should review conditions at the residence resulting from the recent rains.

Ruth Wenck is to give a report on the status of home rehabilitation through private contri-Midland Commission for Local Community Devel-

Shipments of farm gas should have protection says agriculture body

By DON KENDALL

WASHINGTON (AP) - Interstate shipments of natural gas for agricultural use "should be well protected" against interruptions by new legislation headed for final action in Congress this month, says the Agriculture Department.

The Senate approved a conference report on new natural gas legislation last week and the House is scheduled to vote on it on Oct. 12.

A background paper issued Monday by USDA says that the Natural Gas Policy Act has two major provisions of concern to farmers and agribuisnesses - Section 206(b) relating to "incremental pricing" and Section 401 about gas for "essential agricultural use" and natural gas curtailment policies.

The USDA background paper said that:

-The measure defines agricultural use as gas used for "agricultural production, natural fiber production, natural fiber processing, food processing, food quality maintenance, irrigation pumping, crop drying, or as a process fuel or feedstock in the production of fertilizer, agricultural chemicals, animal feed or food."

-Under the provision, the secretary of agriculture will certify to the secretary of energy and the Federal Energy Regulatory Commission the amount of natural gas needed for

High bidding may hit yield

HOUSTON (AP) - A California professor said Monday royalty bidding for federal offshore leases could curtail production of oil and natural

Dr. Elmer L. Dougherty of the University of Southern California said higher royalty bids can lead to lost recovery from federal leases.

He said such bids could prompt a decision by a lessee not to develop or produce a marginal discovery or could cause him to decide to shut in a production lease earlier than

Dougherty discussed royalty bidding as the Society of Petroleum Engineers opened its 53rd technical con-

Under royalty bidding, a prospective lessee offers the government a higher royalty than the 16.67 percent normally received through the traditional bonus bidding system under which most leases go to the company submitting the highest bonus bid.

The government turned to royalty bidding for some of its leases in hopes of attracing more small or independent companies for offshore explora-

Dougherty based his remarks on a study he and John Lohrenz of the U.S. Geological Survey made of royalty bidding.

He*said royalty, to an investor in oil and gas production, is an added cost of operation which, like all costs, increases the limited economic produc-

"This decreases the total recovery from the lease before the investor just 'quits' to avoid losing money," he

agricultural uses for "full food and fiber production.'

-Within 120 days of enactment of the measure, the secretary of energy "shall prescribe and make effective a rule on non-curtailment policy for interstate pipelines concerning the noncurtailment of natural gas for essential agricultural uses." The Federal **Energy Regulatory Commission will** implement the rule.

Further, the report said, the commission "in consultation with the secretary of agriculture" then will determine if alternative fuels are "economically practicable and reasonably available" to meet the certified needs of agricultural producers.

"If both criteria are met, the uses will not qualify for a curtailment priority," the USDA said. However, the commission, in deter-

mining "economically practicable" fuels "shall not include a requirement to switch to high cost alternatives" to natural gas, it said.

"For example, this should rule out forcing farmers to convert natural gas-powered irrigation pumps to any other energy source in the near future because alternative fuels are sharply higher priced," the report said.

As a further backstop, the "secretary of agriculture may intervene" in curtailment proceedings by the commission when it implements this section of the measure, it said.

On pricing, the legislation directs the commission within 12 months to "implement incremental pricing pass-through to industrial boiler facilities served by interstate pipelines.'

The bill "focuses the incremental cost of acquiring new supplies of natural gas to be billed to large industrial boiler facilities served by an interstate pipeline" until they reach the energy equivalent price of alternative fuels - generally, No. 2 fuel oil. As outlined in the USDA report, the

commission will place the incremental pricing pass-through for industrial boiler facilities served by the interestate gas pipelines within 12 months of the legislation's enactment.

Within 18 months of enactment, incremental pricing "is to be applied to other industrial facilities" served by interstate natural gas pipelines.

But the legislation also provides "interim exemption" from incremental pricing for any agricultural facility that uses natural gas, the report

"While not specifically identified, we would expect the secretary of agriculture would be consulted on determining agricultural uses to be exempt," the USDA report said.

Based on 1975 figures, agricultural uses accounted for only 6.4 percent of the natural gas consumed in the United States that year.

Gas rules eliminated

AUSTIN, Texas (AP) - The railroad commission voted Monday to eliminate special rules for gas fields in which all the wells have a daily natural flow of 200,000 cubic feet or less a day.

Director James Bouldin of the Oil and Gas Division said the amendment would exempt some 2,000 gas reservoirs with low capacity, which are tapped by one or two wells, from special field rules.

The commission said the amendment, with others, is expected to simplify regulation and reduce paperwork for producers, as well as the

Allowable decreases

AUSTIN, Texas (AP) - Texas' average calendar day oil allowable is 3,580,437 barrels, a decrease of 23,287 barrels a day from Sept. 15, the railroad commission reported Monday.

The commission said 181,425 wells are on allowable schedules, 494 fewer than on Sept. 15.

AUSTIN, Texas (AP) - The railroad commission Monday approved the application of Shell Oil Co. for a permit to conduct a lignite surface mining operation about two miles east of Rockdale in Milam County.

Shell's application covers a tract of more than 7,708 acres and "marks the company's entry into lignite mining operations," the commission said.

The application is for a five-year permit. A Shell spokesman testified that mining could start in 1981 at a production rate of one million tons a year, increasing to six million tons by

AUSTIN, Texas (AP) - The railroad commission Monday postponed from Oct. 10 to Nov. 6 a hearing on a dispute between Amoco Gas Co. and two of its affiliates and four Amoco natural gas customers.

The dispute is over the flow through of gas costs under a proposed settlement plan between Coastal States Gas Corp., Lo-Vaca Gathering Co.,

and Lo-Vaca's customers. The Amoco issue was severed from the Lo-Vaca settlement for a separate

The hearing involves affiliates Amoco Production Co. and Standard Oil of Indiana and customers Big 3 Industries, Inc.; Air Productsand Chemicals, Inc.; Chamption International; and Gulf Oil Corp.

Two dead in blast

DENVER (AP) - A series or thundering explosions at a Continental Oil Co. refinery early today killed at least two persons and injured nine others, police

There were unconfirmed reports at the scene of up to 30 injutries inside the refinery which stores bulk gasoline products. It is located in the northeast suburb of Commerce City.

The blasts rumbled throughout the Denver area and sent thick black smoke and bright orange fireballs shooting several hundred feet into the air. Residents reported broken windows and fragments of metal up to two miles from the scene.

An hour and a half after the first blast shook the city awake at 6:35 a.m., authorities began to evacuate the area immediately surrounding the plant. Authorities told the evacuees a chlorine storage tank had been blown up in the last in the series of blasts. Interstate 270 and Colorado 85 were closed to the pub-

In downtown Denver, a Conoco spokesman said the explosion had cut off telephone communications between the oil company's main offices and the refin-

Sale of oil technology challenged by senator

By LAWRENCE L.KNUTSON

WASHINGTON (AP) - Sen. Henry M. Jackson, D-Wash., today challenged a Defense Department review that led to approval of sales of advanced oil-drilling technology to the Soviet Union.

Jackson commented as the investigations subcommittee he heads opened an inquiry into the \$144 million sale by Dresser Industries of Dallas. He said there is evidence the Penta-

> ENERGY OIL & GAS

gon approved an export license for Dresser after receiving an expert opinion that the company's proposal to build a Russian plant to produce deep-well rock drilling bits could be of practical military benefit to the Soviet Union

"The information developed to date raises serious questions concerning the adequacy of the national security assessment which preceded the initial license approvals made by the government in general and the Defense-Department in particular," Jackson

fense Department was wrong in concluding that key elements of the oil

He said there is evidence the Dedrilling technology can be procured outside the United States.

He cited a Defense Department study by J. Fred Bucy, president of Texas Instruments, which concluded the technology is available elsewhere only in limited quantity and inferior

The Bucy report concluded that the tungsten carbide element of the manufacturing technology could easily be adapted to the production of armorpiercing projectiles. It said the computer-controlled electron beam welder is easily diverted to military use and is not available outside the United States without restrictions.

Charles W. Duncan, deputy secretary of defense, concluded in a memo

dated Aug. 26 that a reassessment of said in his prepared opening stateall factors showed "small risk" to military security from the transfer of any of the components of the drill bit

manufacturing system. However, Duncan did recommend that the Dresser Industries export license application be suspended pending a study of the potential of the

technology to increase Soviet oil re-President Carter has determined

the transaction should continue. The inquiry coincides with a growing concern in Congress and in the Carter administration over the worsening U.S. balance of trade position.

The administration said last week it intends to grant export license requests in most cases almost automatically. It said exceptions would be made in the case of nuclear technology or when national security clearly would be threatened.

Refinery fire extinguished

MISSISSAUGA, Ontario (AP) -About 1,000 persons were allowed to return to their homes after firefighters extinguished a huge oil-refinery fire that burned for 11 hours.

Twenty firemen waded through waist-deep spilled fuel oil to spray chemical foam into the center of the fire at a Texaco Canada refinery and tank farm Monday just west of Toronto. That put it out.

No one was hurt, and no damage

Texaco officials said the fire apparently started in a fuel-line pump beneath a storage tank containing 2 million gallons of fuel oil. Investigators said safety mechanisms failed, and fuel oil continued to be pumped through pipes connected to the burning storage tank.

The flames came with 300 feet of some homes and threatened 12 nearby storage tanks containing millions of gallors of petroleum products.

Explorers scheduled

Wildcat projects have been announced for Lubbock and Gaines

Completions mark drop

WASHINGTON-The number of successful oil wells drilled in the United States during the first half of this year declined 5.4 percent, while the number of dry holes increased 11.4

This was revealed in the American Petroleum Institute's Quarterly Review of Drilling Statistics, which showed that the number of oil wells reported to the API in the first two quarters of this year totalled 8,549 as compared to 9,036 during the same period last year. But dry holes increased from 6,889 to 7,671.

Successful natural gas wells showed 17.2 percent increase, rising from 5,068 to 5,940.

The decline in successful oil wells, and th rise in successful natural gas wells, coincided with a 20.9 percent increase in the total number of exploratory wells drilled for oil and natural gas. The total number of development wells drilled for oil and natural gas showed an increase of 1.2 percent. (Most exploratory wells are those drilled at some distance from known oil or natural gas fields, while development wells are drilled in or near such fields).

Total footage drilled during the first half of this year was 108,576,262 feet. as against 100,435,842 during the same period last year.
