els said they Texas festithe original

WASHINGTON (AP) — Although the_Department of Energy has promised not to locate a nuclear waste disposal facility in Texas without the state's "concurrence," the federal government still has the final word concerning such controversial sites. In an Oct. 10 letter to Texas Attorney General John Hill, DOE Secretary James Schlesinger said:

"I want to assure you it is the department's view that any proposal to locate a nuclear waste geological disposal facility within the state of Texas will occur only following extensive consultation with the state and that any such facility would be constructed only with the concurrence of the state. At the present time, we do not know of a specific proposal for the state of Texas. If in the future a definite facility proposal emerges, it would be appropriate to discuss concurrence procedures."

Hill has interpreted the letter as one granting Texas the power to veto such nuclear waste sites. Two such sites are currently under consideration in the panhandle county of Randall and in Anderson County in East Texas.

"But we didn't use those words...we never use those words, 'veto power,'" explained DOE spokesman Al Alibrando. "Some lawyers, I guess, contend that the government cannot surrender that perogative of imminent domain, if you will...but it's pretty clear that we aren't going to build

anything without the concurrence of the state."

By "the state," added Alibrando, DOE is referring to the governor and the legislature.

Hill had written Schlesinger on August 29, requesting formal assurances that "DOE will afford Texas a right of veto over any decision to dispose of nuclear wastes in Texas or to transport them through the state."

In his answer, Schlesinger carefully refrained from using the word "veto" in answering Hill's request with but one exception.

"We do not believe that specific legislation to ensure state veto authority is necessary. We feel that such legislation would be too rigid to permit the flexibility required to deal with the specific concerns of the individual states in this very important matter."

As to the transportation of nuclear wastes though Texas, Schlesinger said: "We do not believe that probibition by individual states...Is justified or desirable...Uncoordinated local action can even be counter roductive from a safety viewpoint, as when traffic diverted by the requirements of one jurisdiction enter another less well suited to handle it.

"A proposal to severly restrict transportation in interstate commercedoes not readily lend itself to a final decision by a single state or local jurisdiction since that decision may equally impact other jurisdictions and lead to a proliferation of local

mian Basin.

You see spacious plains, variously covered by or dotted with bush, cash crops, cattle and pastureland, oilfield pumping jacks, fenced-off ranges, open and cloudy skies and, out in nowhere, buildings, which flat-land people not used to towering edifices call "skyscrapers." In West Texas, a building which zooms beyond two stories once in a blue moon may get nudged by clouds and, in a broad interpretation, is vainly trying to scrape the sky. And the sky is' a mighty big space, which has a beginning and an end very much subject to intepretation. You can stop at just about any spot in the wilds of the West and, letting your mind turn to fancies, can make the desolate appealing.

Adult adoption case back to court

ATLANTA (AP) — The case of a woman who wants to adopt an ailing older friend is going back to superior court for a hearing on whether an adult can become the "parent" of an older person.

The Georgia Court of Appeals, in a ruling Tuesday, sent the case back to the Douglas County court, where Judge Arthur Fletcher had dismissed the adoption request without a hearing. The appeals court said the lower court had to consider the request of the woman's lawyer, Ronald SanFilippo. The higher court, however, declined to address the question of adoption. degenerative spinal cord ailment. SanFilippo said the appeal was filed after Fletcher wrote a letter saying that because of the women's ages, the natural parent-child relationship could not exist.

Fletcher said he considers the case "an unusual situation because they never asked me for a hearing," but "Ms. Chambers and Miss Davis have been friends for a long period of time," SanFilippo said. "Miss Davis has been ill, and Ms. Chambers has been taking care of her for the last seven years.

"She has been providing the essentials and they've developed a very close relationship. They want to forwomen with other benefits, including inheritance rights and tax advantages.

Ms. Chambers wants her inheritance benefits to go to Miss Davis so "Miss Davis can be cared for the rest of her life in case something should happen to her (Ms. Chambers)," San-Filippo said.

"In our appeal we basically asked two questions — whether or not a judge can summarily dismiss a request for adoption without a hearing and whether a person can adopt an older person," SanFilippo said Wednesday.

No hearing date has been set. San-Filippo said if the adoption is still disallowed after the hearing, he would file another appeal.

The attorney said he has been unable to find another case in which a person sought to adopt an older person.

The case involves Norma Chambers, 47, of Douglasville, Ga., who wants to adopt Harriett Jeanine Davis, 48. SanFilippo said Mrs. Davis is suffering from diabetes and partial blindness because of the disease and a

Ms. Chambers said the publicity connected with her case upsets her. "I didn't intend it to be a federal case," she said. "When we started this thing, we thought it would be very simple."

Carter's neutron bomb decision no Soviet surprise, Powell says

WASHINGTON (AP) — President Carter's decision to produce and store crucial elements of the controversial neutron weapon shouldn't surprise the Soviet Union or upset strategicarms talks, presidential press secretary Jody Powell says.

He said Carter is reserving judgment about whether to assemble the nuclear devices or send them to Europe as a defense against Warsaw Pact tank forces, which greatly outnumber NATO's armored forces. Powell announced the decision

Wednesday. He said the step toward production of the neutron weapons flows naturally from Carter's announcement last April that he would defer production of the neutron warheads.

Carter said then he would modernize the Lance missile and eight-inch howitzer to accomodate either the new neutron devices or updated versions of the conventional nuclear warheads they now carry.

Carter said at that time the ultimate decision on whether to produce

and deploy neutron warheads would depend on whether the Soviet Union showed restraint in its strategic and conventional arms.

Asked about possible Soviet reaction to Wednesday's announcment, Powell said, "I don't know how they're going to feel. I would assume it would come as no surprise."

"You don't think this will have any effect on the strategic arms limitation talks?" Powell was asked.

"No," he replied.

U.S. arms control negotiator Paul Warnke said later that Carter's decision had nothing to do with the U.S.-Soviet arms talks. He said the SALT talks deal with strategic weapons only while the neutron warhead is a tactical battlefield weapon.

Warnke commented a few hours before leaving for Moscow for this weekend's resumption of the SALT negotiations.

On the prospects of the Moscow talks being the final step in reaching agreement, Warnke said, "We have solved the most complex problems. It

is now a question of how stubborn both sides will be about the fistful of problems left."

In the Netherlands, the Dutch government issued a communique expressing "concern" with Carter's decision on the neutron weapon. It said the Dutch government "is of the opinion that deployment of this weapon must be prevented by introducing it into the process of the Strategic Arms Limitations Treaty negotiations."

Powell said, "The elements needed to produce an assembled warhead will be kept here in the United States." But, he added, the actual assembly "will take much less time once the elements are in existence." Asked why Carter had decided to go

ahead now with the components' production, Powell said, "We're simply ready to proceed now." White House officials noted that the federal government began a new fis-

cal year Oct. 1, and said the timing of (Continued on Page 2A)

Permian Oil Show not public yet but opening crowd sets record

ODESSA—The general public must wait until Friday to to converge on the Permian Basin Oil Show grounds, but it looked like everyone in the world was there Wednesday—opening day for oil industry personnel.

In fact, it was the largest opening day crowd in the shows history as 159,996 persons walked through the turnstiles into a maze of exhibits, Eddie Durrett of Odessa, a vice president of the show and the man in charge of the visitor head count, said.

"We are absolutely elated," Larry H. Byrd of Midland, president of the show, said even before the final firstday count was in.

And, Jay Alvey, executive director of the show, said "It not only is a record-setting first day, the crowd was twice as big today as it was last year on opening day when an all-time four-day attendance record was set. The job of registering the thousands

and thousands of visitors from the oil industry and allied industries was the duty of the Registration Committee headed by Cecil Smith of Midland.

"I never saw anything like it," Smith said. "We had 12 registration lines going at once and each one reached almost to the street." Members of the board of directors and the Desk & Derrick Clubs of Midland and Odessa helped with the registration.

"By nine thirty almost every parking place within blocks were taken," Alvey said. The gates opened at 10 a.

The schedule today follows the opening day slate. The show grounds are open only to oil industry personnel and allied industry personnel and their families. The show day will end at 8 p. m.

Friday, things get rolling for the general public. A gigantic parade, featuring bands and other marching units and hundreds of floats will start moving in downtown Odessa at 11 a.m.

The formal opening of the show for the public will be at 1 p. m. at the entrance to the Ector County Coliseum Complex show grounds.

Byrd will introduce Frank N. Ikard, president of the American Petroleum Institute since 1963, who is the honoree for this year's show. It has been a tradition for the last several shows to honor a person who has made outstanding contributions to the oil industry. Ikard symbolizes the oil industry's constant battle against government regulations and interference while trying to meet the nation's demands for energy, Byrd said.

The show grounds will close at 8 p. m. Friday. The gates will be reopened for the general public at 10 a. m. Saturday.

One of the final events will be a barbecue served by the Odessa Chuck Wagon Gang. This event begins at A5 p. m. and tickets can be purchased at the show grounds.

The four-day show will close at 8 p. m. Friday.

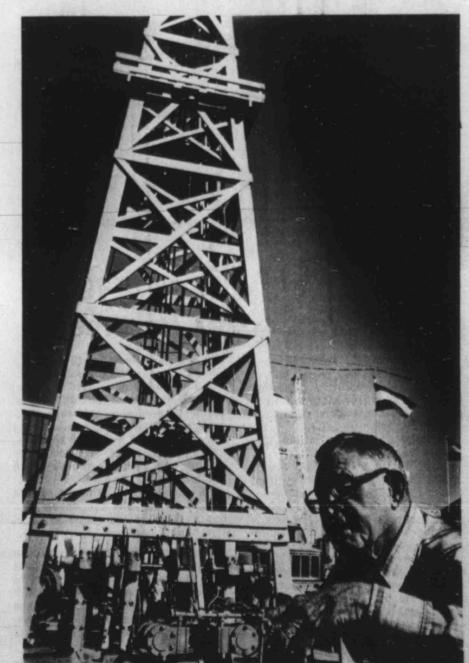

There's not a place on earth, from z the Arctic to the Antarctic, which the imaginations of a hearty crier cannot turn into a haven for tourists and travelers.

The landscape may be as outwardly bleak as wintry Siberia, the sandduned Sierra Desert or mesquite- and sagebrush-speckled West Texas. It may be as lush as some jungle rain forest.

The setting may be in a farmingranching area, in a small town where every street is Main Street, or in a teeming metropolis where no one should become bored. They do, though, and seek escape.

Imagine yourself a newcomer to Texas, this "state of contrast," and you're driving through the Trans-Pecos Region, which takes in the PerMore often than not with the right perspective, the "real world" is fascinating and certainly is not boring to the inquisitive mind.

Or if your imagination needs fuel, stop by the local chamber of commerce, historical committee office, library, museum or travel bureau, and certainly you'll find much to hail about if you're so inclined.

More than 700 exhibits were ready to be displayed, explained and demonstrated to the Permian Basin Oil Show's first-day crowd of 159,966. Fred Johnson of Long Beach, Calif., takes a look at his one-inch to one-foot drilling rig. Johnson said the project took three years to complete and performs every function lifesized rigs do. Lions Club honors two firefighters

THE MIDLAND REPORTER-TELEGRAM, THURS., OCT. 19. 1978

Lt. David N. Fawks, 45, and Firefighter George O. Sosa, 26, received plaques honoring them as "Firefighters of the Year for 1978" during Wednesday's noon meeting of the Downtown Lions Club.

Fawks received the plaque and a check for \$100 from Downtown Lions Club President George Weis. Firemain Sosa was absent because of illness

Both men were responsible for the dramatic rescue of a child from a burning North Midland home. "You don't think about it much,"

said Fawks of the rescue.

In January of this year, Sosa and Fawks and others from the Midland Fire Department responded to the blaze, not knowing a child's life was in danger.

Both men arrived with the first units on the scene

Officials said both Sosa and Fawks. without regard for their own personal safety, entered the house in an attempt to rescue the child.

"We just had to get up there and help the best way we could," said Fawks.

"The smoke in there was so thick we couldn't hardly see. We didn't know anything about a child being in there when we got there.'

Upon being notified the child was in the house, Fawks entered an upstairs window by way of a ladder and started to search for the child. He was hampered by a collapsing wall and by the intense heat and smoke which had built up.

"All that heat and smoke goes up," he explained. "So we had to feel our way around.'

Sosa entered the front door and went up the inside stairs. Lt. Fawks located the child, but became disoriented by the thick smoke.

Sosa entered the same room as Fawks and took the child from the exhausted fireman.

Both firefighters then left the house, taking the child to a waiting team of emergency technicians.

Fawks recalled the heat was so intense that it scorched the hair on the back of Sosa's head.

The heat also made Fawks' breathing apparatus too hot to hold by hand when he came out of the blazing structure.

"When Sosa came up, I handed him the child and we went downstairs fast," he said.

Fawks has 17 years service with the department.

He was born in Cleburne and moved to Midland in 1948. He served in the U.S. Army two years in the Korean

Candidates for senate, railroad commission heat up attacks

By The Associated Press

Senate and railroad commission candidates turned up the heat in their campaigns Wednesday, while attorney general and governor hopefuls continued some spirited stumping. Democratic Senate candidate Bob Krueger unveiled his new endorsement by Gov. Dolph Briscoe, then

took a shot at Sen. John Tower's temper. Republican Tower, who will try to fend off Krueger Nov. 7, refused to

shake his opponent's hand in Houston Tuesday, a moved Krueger labeled "a fit of temper.

"Is this the kind of man you want making major decisions for the nation?" Krueger asked in a news release.

cused instead on the commission's Midland office. Midland oilman Jim Lacy will try to unseat Poerner in

November. Poerner said the Midland office has had a lax attitude in enforcement of pollution regulation governing oil companies.

"The situation is going to be corrected, or else there is going to be an attitude change of some kind," Poerner said. "It's (West Texas) the only place in Texas that's giving us trouble, and that doesn't have to be tolerated."

Krueger will join up with Democratic gubernatorial candidate John Hill for a helicopter campaign tour this weekend, and Hill reiterated that

he'll veto any new tax bill if he is elected governor.

Hill's Republican opponent, Bill Clements, unveiled support from a 55-member committee of elected county officials and the Tyler Courier-Times-Telegraph.

Over in the attorney general scrap, **Republican Jim Baker told Houston** voters his Democratic opponent, Mark White, is a "big spender. Like a typical bureaucrat, my opponent took office and went on a spending binge with the taxpayers' money.'

White is a former secretary of state Absentee voting for the Nov. 7 gen-

eral election started Wednesday and will end Nov. 3.

Sulfuric acid leaks getting giant Alka Seltzer treatment

MADISONVILLE, Tenn. (AP) -Civil Defense workers poured tons of lime into pools of sulfuric acid leaking from derailed railroad tank cars in an effort to reduce chemical fumes rising into the air.

They're making a great big Alka Seltzer," one official said.

Many of this East Tennessee town's 3,800 residents remained away from home Wednesday night.

They were evacuated when a cloud about three-quarters of a mile long, a quarter-mile wide and a half-mile high spewed out of two tankers that ruptured when a Louisville and Nashville Railroad train derailed Wednesday afternoon. No one was injured in the derailment.

Officials, who toured the city and explained the danger, said it was impossible to determine exactly how many people left their homes. Some, they said, left for homes of friends and relatives instead of the evacuation centers set up in schools and National Guard armories

L&N crews were to begin cleanup operations early today and officials said evacuees probably could begin returning home later today.

nights.

remain warm

As the calendar moves into late October, Indian summer continues with warm afternoons and cool

The weatherman said the fair fall weather should continue at least through Friday.

High Friday should be in the low 80s, according to the National Weather Service at Midland Regional Airport. The high for Wednesday was 79 degrees. Record for that date is 90 degrees set in 1936.

The mercury should dip into the upper 40s tonight, about the same as today's low temperature of 46 degrees. This still is not as cool as the record low of 36 degrees set in 1966. Winds should be variable at 5 to 10 mph tonight, the weatherman said.

Liquor store again robbed

A Midland liquor store was held up for at least the third time in two years Wednesday night, according to Mid-

land Police Department officers. Lt. Earl Luckey said that police arrived at the B&B Liquor Store, 612 N. Big Spring St., shortly after 7:30 p.m. in response to an armed robbery report.

Police said a man took an undetermined amount of cash from the register during the hold-up.

Police are looking for a man last seen running east down Louisiana Avenue displaying a pistol, according to authorities.

No one was reported injured, said Luckey.

The same liquor store was the scene of the death of store clerk Jackie Goodrum Burleigh, 45, of 500 N. Colorado Street on the night of Aug. 4, Mrs. Burleigh was stabbed to death

during an armed robbery.

Tower said Wednesday night that his was a deliberate snub. He also said Krueger's comment that "he has 'always been for right to work' just won't hold water."

The railroad commission battle got into the headlines as appointee John Poerner ignored his opponent and fo-

Carter's move 'no surprise'

the neutron decision was influenced by the budget cycle.

The neutron warheads produce twice the deadly radiation of a conventional nuclear bomb but less than one-tenth as much explosive power. The idea is to kill attacking enemy tank crews without causing widespread destruction of buildings in populated areas along an invasion route, the most likely of which would be through West Germany.

The Soviet Union, which isn't believed to posess a neutron weapon of its own, has made the U.S. development of the warhead the target of a worldwide propaganda campaign. Critics say the weapon would make

nuclear war more likely, on the theory that its reduced blast and shock effects would make its use more tempting.

The Carter administration argues that the weapon is a more effective deterrent against conventional attack, and that it could not be used without authorization from the president.

Launch options being considered

WASHINGTON (AP) - Intercontinental missiles lauched from huge underwater platforms off the American coast are among the options being considered by the United States as an alternative to land-based launching systems, a Pentagon spokesman has confirmed.

Long-range missiles are now housed in underground silos at stationary locations and the Defense Department is looking for ways to make them less susceptible to attack.

platforms as a way to achieve more protection for the missiles was raised Wednesday in a CBS News report.

"The Defense Department is study ing seven or eight alternatives for the silo-basing concept," said a Pentagon spokesman, who asked not to be named

He said "serious developmental work is being done" on two approaches: mobile land-based launch sites and a system in which trenches would allow missiles to be moved from silo to silo, making it difficult for an enemy to know which ones were empty and which ones housed a missile

Smaller scale nuclear waste disposal tests recommended

WASHINGTON (AP) - A government study group today tentatively recommended developing a mediumsized burial vault for highly radioactive nuclear wastes to gain experience before starting large-scale waste disposal.

John M. Deutsch, director of the Energy Department's Office of Energy Research, told reporters such an intermediate facility, to store from 100 to 1000 spent nuclear fuel assemblies or cannisters, could be operating by 1986

The leading candidate for the facility is a site near Carlsbad, N.M., but the state has not been enthusiastic about the idea and Energy Secretary James R. Schlesinger has assured both New Mexico and Texas that nuclear waste disposal sites would not be established there without their "concurrence," Deutsch said.

The group's tentative recommendations were included in a draft report that will be reviewed after a 30-day period for public comment. Then the group will prepare and send to President Carter its conclusions and recommendations

Some 71 nuclear powerplants now operate in the United States and 135 more are under construction or planned.

Radioactive wastes far greater than those from civilian powerplants have already been generated by military reactors and weapons production

Subpoena of GE's report approved by NRC board

TULSA, Okla. (AP) - The Nuclear **Regulatory** Commission's Atomic Safety and Licensing Board Wednesday approved issuance of a subpoena in an effort to obtain a confidential General Electric report concerning its nuclear technologies.

The 1,000-page Reed Report has been sought by opponents of Public Service Co. of Oklahoma's Black Fox nuclear plant.

GE will provide two boiling water reactors for the plant, proposed near Inola in northeastern Oklahoma.

The federal licensing board is conducting hearings here to determine if Public Service will be given permis-sion to construct the \$2 billion plant. Citizens Action for Safe Energy is a legal intervenor in the Black Fox hearings. Attorneys for the group,

known as CASE, have said the report includes references to some 27 safetyrelated items concerning the GE reactors

GE officials have maintained the report is confidential, and that disclosure of the report would damage its competitive position in the nuclear ndustry

Sheldon Wofe, licensing board , chairman, signed a subpoena to be

While temporary storage is filling up, the United States still lacks facilities or even plans for permanent, safe disposal of wastes that will remain dangerously radioactive for thousands of years.

The draft concluded the wastes can be buried with very little chance of radioactivity escaping into the environment.

Wording of DOE stance argued

(Continued from Page 1A)

prohibitions featuring inconsistent local rules, interference with the Department of Transportation's transportation safety programs, and unpredictable economic and safety consequences," added Schlesinger.

The DOE handled a similar situation in New Mexico in the same manner, promising to work with the state in locating possible nuclear waste disposal sites but standing firm on the question of transporting the material across the state.

The New Mexico state legislature failed to pass a bill that would have placed a referendum on the November ballot concerning New Mexican's right to veto a proposed nuclear waste disposal site near Carlsbad and about 25 miles from the Texas-New Mexico border.

served upon the appropriate GE cor-

Attorneys at the Black Fox hearings said GE is expected to respond with a motion to quash the subpoena, which would result in arguments by both sides and a second licensing board decision.

SEATTLE (AP) - President Carter has to work as hard as he does because he's not qualified for his job, says columnist Jack Anderson.

"He works harder than any president we've ever had," Anderson said in a lecture Tuesday

"He needs to, though, because he's had so little experience. He may be qualified by the end of his term, but he is not yet."

The nationally syndicated columnist said no experienced president would have become involved in the summit meeting at Camp David involving Egyptian President Anwar Sadat and Israeli Prime Minister Menachim Begin.

"But that born-again Christian did it - and it worked," Anderson said.

NEW YORK (AP) - Former President Gerald Ford's reputation as a "bumbler" played a major role in his defeat in the 1976 election, says Ford's former press secretary, Ron Nessen

"Ridicule is one of the most damaging weapons you can use to tear down a politician," Nessen said Wednesday at a luncheon publicizing a book about his experiences in the White House.

In the book, "It Sure Looks Different from the Inside," the former NBC television reporter also blames the Nixon pardon for the election outcome and says the White House "underestimated the impact of Southern pride" during the campaign.

Nessen discussed Betty Ford's candor in his book, saying it "fit the times." He also said the first lady was protective of her husband hen attractive women were around.

SPRINGFIELD, Ill. (AP) - A federal judge has

barred school officials from punishing two Illinois

high school students who are boycotting coed gym

The students, a boy and a girl who are members of the United Pentecostal Church International, con-tend they are being forced by local, state and federal officials to mingle in gym class with members of the opposite sex, who they say are immodestly

They say such mingling violates their church's teachings and that forcing them to participate in such classes violates their constitutional rights. U.S. District Judge J. Waldo Ackerman issued a

preliminary injuction Wednesday barring officials in

two central Illinois school districts from punishing

the two students, saying the ban will last until a final decision is reached in their case.

The suit was filed Oct. 3 by the Rev. Wesley Ates of Bloomington on behalf of his son, Trent, a 16-year-old

junior at Bloomington High School, and by William

Moody, of nearby Normal, on behalf of his daughter,

THE MIDLAND REPORTER-TELEGRAM, THURS., OCT. 18, 1978

Botha tells election compromise

PRETORIA, South Africa (AP) - Prime Minister Pieter W. Botha announced a compromise today under which South Africa will proceed with its own elections in South-West Africa while resuming fullscale negotiations for U.N.-supervised elections in the territory next year.

Botha issued a joint statement approved by his government and Western foreign ministers, including Secretary of State Cyrus R. Vance, who had spent three days in secret negotiations on South-West Africa's transition to independence and black-majority rule.

Botha stopped short of full acceptance of the U.N. plan. But he said he would use his "best efforts" to persuade local leaders elected in December to go ahead with the later elections.

The Western powers, for their part, said they would urge special U.N. representative Martti Ahtisaari "to immediately resume discussions" with South African Administrator-General Marthinus Steyn within the framework of the Security Council resolutions calling for an internationally acceptable independence in the long-disputed territory. The United States, Britain, France, West Ger-

many, France and Canada made clear in the joint statement they would regard the December election as "null and void."

South Africa said the December poll "must be seen as an internal process to elect leaders.

Answering questions at a news conference later. Botha indicated the leaders chosen in the poll would be used as a counterbalance to U.N. recognition of the black militant South-West Africa People's Organization as the "sole legitimate representative" of the Namibian people."

The December election is virtually certain to provide a heavy majority for the South Africanbacked Democratic Turnhalle Alliance, since neither SWAPO nor the moderate Namibia National Alliance are participating.

The joint statement basically represents South Africa's acceptance of the "two-election" compromise frequently suggested during the three days of highly secret talks by Western diplomats.

Although South Africa has yet to give its irrevocable approval to the U.N. plan, it should have little trouble persuading the Democratic Turnhalle Alliance to urge its acceptance in December.

Vance and the other Western diplomats left Pretoria Wednesday

Vance stopped briefly in Khartoum to talk with Sudanese President Gaafar Mohamed Nimeiri and arrived today in Geneva. He was meeting today and Friday with the U.S. delegation negotiating a new nuclear arms limitation treaty with the Russians and on Saturday goes to Moscow for another round of those negotiations with Soviet Foreign Minister Andrei A. Gromyko.

Vance and the other foreign ministers left compromise proposals they hoped would persuade Botha and his conservative cabinet to accept the United Nations plan for an internationally-supervised transition to independence in mineral-rich South-West Africa, also called Namibia.

"The litmus test to apply to any decision of the on Friday.

Improved air safety measures requested

WASHINGTON (AP) - Federal safety investigators have recommended improving the air traffic control system at San Diego's Lindbergh Airport, though they concede such changes might not have prevented last month's air crash that killed 144

South African government will be the extent to which South African interim administration and the U.N.they are prepared to commit themselves to a U.N.supervised election ... That is the only election we are interested in," British Foreign Secretary David Owen told reporters.

He and the other ministers would not divulge specifics of their other proposals but said they were within the limits of their previous independence plan approved by the Security Council last month. It called for a U.N. supervisory force of up to 7,500 men, a seven-month transition period, a joint U.N.- rate.

supervised election for a constituent assembly.

Informed sources said earlier the ministers offered to reduce the U.N. force to about 4,000 men, with most of them to come from Canada and Britain instead from black African nations sympathetic to SWAPO.

Vance said Botha was offered a personal invitation from President Carter to visit Washington if the negotiations take a positive turn. He did not elabo-

Syrian forces replaced by Saudi Arabians, Sudanese

BEIRUT, Lebanon (AP) - Saudi Arabian and Sudanese troops prepared today to replace Syrian forces in flashpoints around Beirut's Christian sector as part of a plan to ward off further Syrian-Christian fighting.

Officials said the redeployment was the first step in a security plan worked out by Lebanese President Elias Sarkis to consolidate a 13-day-old ceasefire between the Syrians and Christian militias.

The plan was endorsed at a weekend meeting south of Beirut by Syria, Saudi Arabia and other Arab nations contributing troops or funds to the Syriandominated Arab Deterrent Force in Lebanon

Saudi Arabia has 2,000 men, Sudan 800 and Syria more than 26,000 in the force, which is supposed to enforce the armistice that ended the Lebanese civil war in 1976.

Saudi armored cars waited at three locations in Beirut's Moslem sector, ready to cross the dividing "green line" as liaison officers checked deployment routes.

The Christian command announced it ordered its militiamen to observe the cease-fire strictly during the redeployment, which was expected to take 48 hours. But occasional gunfire was heard in the heart of the Christian enclave in the residential guarter of Ashrafieh and at the Qarantina Bridge where the Syrians have been blockading the Christian supply route from the hinterland north of the city to East Beirut.

The shooting did not prevent hard-pressed Christian inhabitants from surging to the streets to shop and line up for water.

Both sectors of the capital still were without public water as a result of the recent 10-days Syrian attack in which 1,200 Lebanese were reported killed. Electricity was rationed, but business started to pick up after announcement of the results of the Arab conference.

Sources at the headquarters of the Christian Phalange Party in the Ashrafieh district said they expected the Saudis and Sudanese to take over the Qarantina Bridge and the 25-story Rizk Tower

Keep Blake

Your County Judge

Pd. for and authorized by Committee To Keep Blake Hansen Co Ronald G. Tefteller, Treasurer, P.O. Box 5065, Midland, Texas

A spokesman for the Arab Deterrent Force told reporters the Syrians would maintain other positions in the Christian enclave and would reinforce hilltop posts the Christian part of the city.

Beirut's Christian radio station, the Voice of Lebanon, said 10,000 of the 26,000 Syrian troops in Lebanon would be withdrawn from the country, but there was no confirmation.

The broadcast said the departing Syrians would be replaced by 5,000 new troops from Jordan, 3,500 from Saudi Arabia and 1,500 from the United Arab Emirates

Saudi Arabia now has 2,000 troops with the Arab force, the U.A.E. has 600 and Sudan has 800. The 800 Sudanese have been scheduled to leave at the end of the month, but their inclusion in the redeployment plan indicated they were staying.

Syria's troops intervened in the Lebanese civil war in 1976 to save the Christians from defeat and prevent the establishment of a radical government of Lebanese Moslems and Palestinians on Svria's doorstep.

The Syrians stayed on in the Arab Deterrent Force to police the civil-war armistice along with token forces from other Arab governments. But the Christians refused Syrian orders to disarm their militias and put their areas under Syrian control because the Syrians did not disarm the Moslems or the Palestinians

persons near there.

In that Sept. 25 incident, a Pacific Southwest Airlines jetliner collided with a single-engine private plane. The death toll was the largest in North American aviation history.

The National Transportation Safety Board recommended Wednesday that more instrument help be provided planes making visual flight reference approaches to the airport.

Current procedures provide radar sequencing and separation of planes for the pilots, but only when controllers' workloads permit. The recommended changes would give pilots that same service plus additional traffic-separation information, and it would not be based on a workload basis.

Board spokesman Brad Dunbar said additional equipment probably will be required if the Federal Aviation Administration orders the recommendations put into effect at Lindbergh.

The improvements "may not have prevented the midair collision...since visual separation is still being used in all terminal areas," wrote board chairman James B. King. But he added that the board felt the changes "would lessen the possibility of a midair collision and would be a logical first step toward equalizing the air traffic control services available to all users of air space in the San Diego terminal area."

Soviets find solution

An intriguing dispatch from Moscow reports the Russians are planning to heat homes with steam from nuclear reactors in plants located relatively close to their cities.

Their technologists say they have found an "engineering solution" to what is considered the greatest potential danger in nuclear plants - a loss-of-coolant accident and reactor meltdown with a disastrous release of radioactive material into the atmosphere.

Further, the Ruasians see no problem in disposing of radioactive waste from their growing number of nuclear power plants and the steam-heating plants soon to be built. They will concentrate it into a glass-like substance and bury it in salt deposits or abandoned coal mines in remote areas.

Considering the endless debate in America about nuclear safety, this makes us wonder. Do the Russians know something that we don't? Or have they just decided to live dangerously?

Probably the answer lies somewhere in between. The fact that the new nuclear steam plants will not have the heavy concrete containment domes characteristic of this nation's own nuclear plants does suggest a technological innovation. As for safety. Soviet standards are presumed to be lower than ours. American astronauts, for instance, have hinted they would not like to risk their necks in a spacecraft as primitive as the Soviet's Soyuz. What the latest development in the Soviet nuclear program does tell us is that the Russians have looked at the risks in harnessing nuclear energy and concluded to move ahead at a faster pace than most countries in the West. And the news comes at a time when the argument over safety of nuclear plants in the United States may take a new turn. An independent panel of scientists has just completed a reassessment of the "Rasmussen Report," a study completed in 1974 under Dr. Norman C. Rasmussen which sought to calculate the chances of a nuclear accident with highly fatal consequences. The report's conclusion that the odds against it are astronomical has been the basis for defending the nuclear option through many recent battles.

The reassessment which began 13 months ago under Dr. Harold W. Lewis of the University of California at Santa Barbara supports many aspects of the Rasmussen Report, but finds fault with others. The anti-nuclear lobby is sure to seize on it. Among other things, it questions the way the Rasmussen Report applies the laws of probability to reach its comforting conclusion. According to the Lewis team, the possibility of error in these calculations has been greatly understated."

Physicists, mathematicians and others with nuclear expertise now will debate whether the Lewis study calls for any change in nuclear policy.

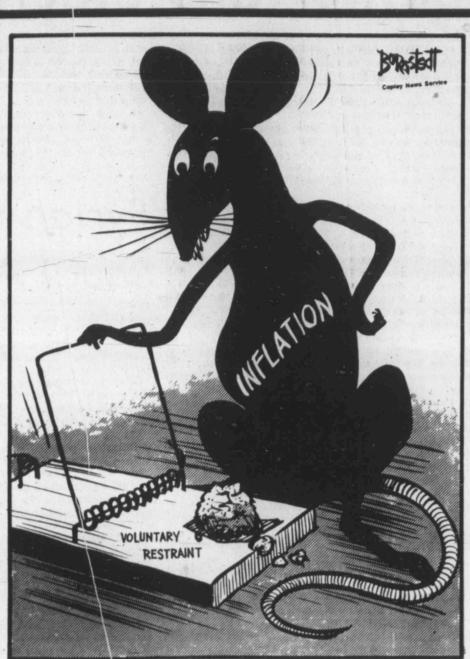

The comments of Dr. Lewis, however, are most significant. He says nothing has turned up to change his own conviction that nuclear power is here to stay.

Power plant safety, he says, is the "least worrisome" of the issues.

What should concern us more, in his view, is the need to control international proliferation of nuclear materials which could be used to make bombs, and the tardiness in setting up a system for permanent disposal of nuclear waste in the United States.

The Lewis study may cast a new light on the risk-factors that go with nuclear energy, but it does not affect another risk - that fossil fuels may run out before there are reliable energy sources to take their place.

The Russians believe their

"THAT's not gonna stop me-!"

ART BUCHWALD Defectors need love too, but let's be reasonable

WASHINGTON - As the conscience of America, I have been giving a lot of time and thought to recent events surrounding the Soviet defector Arkady Shevchenko and his paramour Judy Chavez.

While all the facts in the case have not been disclosed (we have to wait for Judy's and Arkady's books to get the rest of them), this much is agreed upon by everybody.

Shevchenko had a high position in the U.N. when he came over to our side. He met, or was given, as a reward, Miss Chavez who worked for an "escort" service in Washington. He paid Miss Chavez \$500 a night for her friendship, and spent between \$35,000 and \$40,000 on her for gifts and a trip to the Virgin Islands. He was known in the CIA as "the spy who was never cold.

The facts that are in dispute are whether Mr. Shavchenko paid for Miss Chavez' services out of his own pocket or whether they were paid for by the CIA to keep him happy and talking. If Arkady spent his own money, he was taken advantage of for being a foreigner. But if the CIA paid for the undercover operation, then the taxpayers have a right to ask some questions.

The first is: Why on earth was the CIA paying Miss Chavez \$500 a night when the going rate in the intelligence business for this sort of thing is \$100? If Arkady was paying for it, why didn't someone in the FBI or CIA warn him that he was being over-

charged for Miss Chavez' nightly companionship?

If the CIA is footing the bill, as Miss Chavez claims, it means there is a serious lack of cost control in the agency when it comes to providing escorts for Soviet defectors.

No loyal American would take issue with the fact that a high-ranking Soviet official, who wants to come over, should get anything he wants from the CIA in exchange for intelligence socrets

But when you start paying outrageous prices for close encounters of this kind, you are not only contributing, as President Carter said at his press conference, to inflation but you are setting a precedent for other Soviet defectors, which the United States can ill afford.

The next defector will also expect a \$500-a-night female companion, and if she is paid less he will feel that the CIA is not treating him with the same respect they did Arkady. How many "escorts" can our intelligence agency supply at these rates before it starts shortchanging our other spy operations?

Even if the CIA can afford it, other friendly intelligence organizations are furious about the publicity given to the Shevchencko-Chavez affairs.

"We've never paid our girls more than \$50 a night," a French intelligence agent told me. "This puts wery Western intelligence agency on the spot. The CIA has made the price of sex so high, we may not be able to use it any more as the ultimate weap-

alleged:

An Israeli agent thought Arkady was a KGB plant. "What better way to break the CIA budget than to have a defector demand a woman with expensive tastes, a yen for beautiful cars and a desire to make love in beautiful resorts. We could have put up a spy satellite for what it cost the Americans to keep Arkady talking."

Because of all the publicity, the CIA must now give Shevchenko a new cover and move him to a safer city than Washington. I suggest Cleveland. It is not only a nice place to live, but the going rate there for an "escort" is \$35 a night including taxi fare. Making Arkady live in Cleveland while they debrief him would certainly save the CIA a lot of money.

WASHINGTON MERRY-GO-ROUND

Navy ships said in sad shape

And in secret testimony before Murphy's committee, Assistant Secretary of the Navy for Installation and Logistics Everett Pyatt, admitted frankly that the reserve fleet is "a disaster.

According to the secret report to Murphy, "A review of the fleet available and a summary of the opinion of those knowledgeable in high command makes it clear that the effectiveness of our military is limited to brushfire wars." The report concludes starkly: "We don't have the ships. At the same time, the report notes ominously, "the Soviet Union is, and has been, actively engaged in a major surface fleet modernization program." Yet the U.S. Navy's "state of the art in search and destroy on the high seas" has not advanced since 1945. Incredibly, the report says, "at present U.S. fleet modernization programs are being curtailed."

Pentagon experts seem to be at a loss as to what to do about the situation. When congressional investigators asked how many ships would be needed to defend our shores in an emergency, one knowledgeable source replied disgustedly, "No one in this government knows."

Meanwhile, Commerce Department experts insist that the Navy's reserve fleet could be put in combatready condition for about \$400,000 for each ship. The secret report disputes this figure, putting the cost for modernizing the reserve fleet at \$2.5 million per ship.

nuclear steam plants will achieve a 30 percent reduction in the consumption of oil, gas and coal to heat homes and buildings. Obviously they looked at their fuel inventory, weighed all the risks, and came down on the side of the nuclear option.

The United States also must do some serious thinking along this line, particularly in the face of a possible doubling of the price of oil produced and sold by the Organization of Petroleum Exporting Countries, as suggested by Iraqi Oil Minister Tayeh Abdul last Sunday.

BIBLE VERSE

command of the seas.

Almost all the reserve ships would need extensive, and expensive, overhauling to be ready for use in an emergency. Virtually every military official interviewed by the congressional investigators who prepared the eyes-only study agreed. that in the event of a major conflict in Europe, the United States wouldn't even be able to provide adequate protection for supply convoys.

One high-ranking admiral confided that our ships "would have to leave port and ... make a run for it.' Another member of the top brass said, "The Joint Chiefs include the Ready Reserve Fleet in contingency plans, but It doesn't exist. It is marginal at best."

Worse still, the U.S. merchant marine fleet, which is supposed to serve as backup for the Navy in a crisis, is woefully small' It consists of a total of 842 ships, many of which are more than 20 years old.

In stark contrast, the Soviets have 2,517 merchant ships. A significant portion of the Soviet merchant fleet is less than 20 years old, and many of these vessels serve as spy ships, sources told our associate Jack Mitchell

Most disturbing of all is the fact that

Footnote: The secret report confirms our own findings about the Navy's ships, which we have published over the past nine years.

SUSPICIOUS SURVEY: Intelligence information about American student protestors could inadvertently wind up in the police files of the South African government. They would be gleaned from a seemingly innocent research project that was conducted last summer by Prof. Meyer Feldbert, a visiting South African professor at Northwestern University.

Protestors have already denounced some universities for owning sizable chunks of stock in U.S. corporations which in turn have millions invested in South Africa.

Feldberg decided to send questionnaires to 140 American colleges to determine "the nature and extent of student opposition to the South African government policy of separate development" and to investment by the universities in firms that are active in his country.

Feldberg asked such detailed questions as "Student petitions. Please elaborate." and "Student demonstrations. Please elaborate."

The study appears to be a legitimate research project that was undertaken in the name of academic scholarship, and Feldberg insists he has no affiliation with the South African government. But the professor acknowledged to us that the white regime "is very interested in the data I collect."

Some critics of apartheid, therefore, fear the research results could wind up in South African police dossiers. They object to the fact that Northwestern is indirectly subsidizing Feldberg's work by providing him with office space and paying his visiting professor's salary.

It should be noted, however, that Feldberg is considered a liberal on racial matters by South African standards. A university spokesman told us the professor was "not in favor of apartheid." All faculty members, added the spokesman, are expected to do research.

Mark Russell says

The United States is funding a portion of a United Nations-sponsored movie praising the virtues of the PLO. Why not take the money out of the Ku Klux Klan Cultural Endowment?

Proceeds from the movie will go toward the PLO's School Bus Demolition Fund.

Apparently the PLO movie is quite realistic, especially the part where the cast holds the director hostage.

We can expect other films planned by the United Nations, including one called "The Shah - Fun Guy."

The Country Parson by Frank Clark

"One of the most redeeming things about most people is that they want to be better than

WASHINGTON — A question has been raised as to whether great numbers of "experienced" teachers are quitting in advance of retirement age. There's no question that many senior souls who have toiled 20 or more years in the classroom are disgusted with the way public schools are operating

The current issue of the Council for Basic Education Bulletin, an admirable, old-fashioned maverick in the education business, says there is enough demoralization of experienced teachers to cause "sensible concern." Since I would rather read about "sensible concern" than about situations reaching "crisis proportions," which too often, turn out to be instances of crying "wolf," I read

NICK THIMMESCH

in the U.S. these days.

So here is Haven Knecht, of Allentown, Pa., leaving teaching after 20 years, "mostly because of the discipline problem This year, as the kids say, was 'the pits.'" Gross insubordination by students, physical attacks and pushy parents made him quit early. Knecht was dismayed that his principal didn't back him up after an angry parent declared that Knecht, a chemistry teacher, had no right to criticize his daughter's grammar.

Then there is Lynn Boros, a teacher in Dade County, Fla., who is frustrated with incompetent fellow teachers. She described one intern "as the dumbest person I have ever worked with ... This girl could not even call out the spelling words because she couldn't pronounce them correctly." The girl was hired, and Boros pre-sumably left."

Viv Johns of Texas quit after 26 years for a batch of reasons. She

despises a "conglomerate of administrators" generating paperwork for teachers. She didn't like the pay, seeing teachers blamed for everything, and the "permissive age" where ... anything goes. Do your own thing. Life's a ripoff anyhow ...

Jimmy A. Shugart left after seven years teaching in Henrico County, Va., because of top-heavy administration. He said:

"Today, school systems are filled with supervisors, administrators, therapists, guidance counselors, psychologists, resource personnel, directors, assistants, and coordinators. They make numerous situdies, attend hundreds of staff meetings and seminars, generate tomes of detailed regulations and produce mountains of memos, letters and forms - in short, they behave like bureaucrats everywhere. Very little of this activity has a direct impact on what happens in the classroom...

It is difficult to determine whether more senior teachers are quitting, or just complaining. But a study done for the National Education Assn., a large labor union, claims that experienced teachers are leaving in record numbers. The study says that in 1961, some 28 percent of all teachers had 20 or more years experience, and that in 1976, it was down to 14 percent.

It could be, however, that a disproportionately large number of youngerteachers came in during the late 50s and early 60s to accommodate the postwar baby boom. The study also says that the average age of teachers was 41 in 1961, and now is 33.

John Ryor, NEA's president, calls the exodus of senior teachers "deplorable" and laments this great loss of "maturity and wisdom" in American education. Naturally, the NEA study is laced with all manner of statistics telling how unhappy teachers are, but no material suggesting it might just be the relativist philosophy NEA pushes which contributes to the ennui in American education. Tsk, tsk.

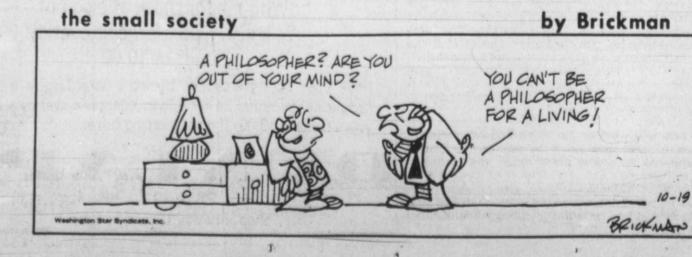

The NEA claims, with justification, that many penny-pinching school boards won't hire older teachers who move into their districts and also tries to push their own higher-salaried older teachers into early retirement, in order to hire younger replacements at lower pay.

Now public teachers in public schools aren't all in shell-shocked condition. When something's working, it's rare for the media, including an opinionated fellow like me, to write it big or broadcast it loud. but there's enough trouble in public education that a liberal like Sen. William Proxmire of Wisconsin voted against the \$50 billion education bill this year, and said: "We must not continue to blindly, thoughtlessly pour money into programs and approaches that simply aren't working.

And Dr. Onaleee McGraw, a scholarly defender of parental rights in education, notes: "Because education is a family thing, parents have been busy hiring tutors, policing halls as aids to reduce violence, drugs and vandalism, working at second jobs to place children in private schools, and analyzing textbooks to try and teach at home what is lacking or attacked in school.

Dr. McGraw, a graduate of Georgetown University, shows "sensible concern" in "Family Choice in Education: The New Imperative," a monograph obtainable at The Heritage Foundation, 513 "C" Street, N.E., Wash., D.C., 20002. I dislike listing addresses, but how else to get a copy?

Back to the question of departing senior teachers. Much as the Council for Basic Education welcomes the self-pruning of overstaffed public education, it isn't happy with a pruning which "takes some of the strong and healthy limbs, teachers of proven competence or bright promise." That concern seems sensible

Pope may replace some Vatican chiefs

VATICAN CITY (AP) - Reports are circulating that Pope John Paul II may replace some of the Vatican department chiefs he inherited from Paul VI and John Paul I.

Vatican sources said the 58-year-old Polish pope is expected to make his decision before his open-air, inaugural Mass in St. Peter's Square Sun-

One change expected is the replacement of French Cardinal Jean Villot, the Vatican's secretary of state for the last nine years, by an Italian.

The secretary of state is the pope's chief collaborator, and an Italian in the post should make it easier for the first non-Italian pope in 455 years to deal with the predominantly Italian Curia, the central bureaucracy of the Roman Catholic Church.

An Italian secretary of state should also improve the pope's comprehension of Italian politics, in which the church is a powerful factor.

Another department chief believed in line for replacement is ailing Cardinal John Wright, the highest-ranking American in the Vatican, who has headed the Congregation for the Clergy for almost nine years.

Wright, a 69-year-old Massachusetts man who was archbishop of Pittsburgh, Pa., for 10 years, and had major eye surgery in Boston during the summer.

Villot, Wright and all other ranking Curia officials automatically lost their Vatican jobs upon the death of Pope Paul. Pope John Paul I reinstat-

the Rev. John Long of the Vatican Secretariat of Christian Unity. The Vatican announced the inaugural Mass would be held at 10 a.m. Sunday - 5 a.m. EDT - on the wide marble steps of St. Peter's Basilica, carrying on a tradition established by

ed all of them two days after his election on Aug.26, but his namelake

"seems to be thinking it out before he

comes out with his nominations," said

Pope Paul VI 15 years ago. St. Peter's

Square can hold 200,000 people, while

only 30,000 can crowd into the basili-

Meanwhile, Rome newspapers began publishing reports of what went on in the secret conclave last weekend that elected Cardinal Karol Wojtyla. They said German cardinals sponsored his candidacy after the Italian cardinals could not agree on one of themselves.

Milan's Il Giorno and Turin's La Stampa said the leading Italian candidates were Giuseppe Siri, the 72year-old conservative archbishop of Genoa, and 57-year-old Giovanni Ben-

elli, the moderately progressive archbishop of Florence who was Pope Paul's right-hand man.

PAGE 9A

La Stampa said they cancelled each other out, and the Italians tried without success to agree on Pericle Felici of the Vatican Curia, Ugo Poletti of Rome, Corrado Ursi of Naples and Giovanni Colombo of Milan.

"There are those who say that some foreign cardinals told the Italians, 'With your division, you don't deserve the papacy," the Turin paper report-

Hospital trustees OK new staff position

Midland Memorial Hospital trustees Wednesday approved the addition of a new staff position and heard a report on hospital construction progress.

At their regular meeting, the trustees approved hiring an assistant administrator for finance at a salary of \$30,000 per year. The position is to be added to the hospital staff this year.

The new assistant is expected to help implement a proposed computer accounting system the hospital will be using soon. Bids are being accepted on the computer equipment now, and trustees expect to award the bids at the January meeting.

"In any operation this size there is room for added ecomonies and added control," Finance Committee Chairman John M. Grimland told the board

The new assistant administrator's expertise in computer accounting could be expected to save the districtmore money than his salary costs, Grimland said.

The position already has been offered to an applicant, and trustees are waiting for his reply, according to Wayne Ulrich, administrator of the hospital.

Trustees also were told that the move-in date for the new north wing of the hospital has been moved from October to mid-December because of delays in shipment of equipment.

Trustees still expect the entire building and renovation project to be complete by January, 1980.

Trustees also heard a report by Ulrich on the operation of the hospital's emergency room last Saturday nigh

During the night, four young girls were brought in with severe burns from an fire in their home. The four patients and three adults were transported to San Antonio for special treatment on Air Force planes after an Army team of specialists had seen them at Midland Memorial.

Transporation of the army crews from the airport and the patients to the waiting aircraft took coordination of police, all three city ambulances and hospital personnel, Ulrich noted. Head of the army team said the movement to and from Midland Memorial was one of the best organized efforts he had seen, Ulrich said.

While coordinating the treatment of the girls, emergency room personnel handled an acute heart attack patient, several cuts and bruises, a case of severe emotional distress, DWI cases and regular emergency room traffic without undue delay, the administrator said.

"You never know what your organization is capable of until it's put under pressure," Ulrich said. "I'm pleased to know that we met the test Saturday night.

Dollar rallies following improvement on market

LONDON (AP) - The U.S. dollar rallied slightly during early trading on European foreign exchanges Today following a slight improvement on the Tokyo market. The price of gold dropped 75 cents an ounce in Zurich

Early dollar rates in Europe were:

HOME IMPROVEMENT SUPERMART

Frankfurt - 1.8410 West German marks, up from 1.8392 at the close of trading Wednesday. Zurich - 1.5120 Swiss francs, up from 1.50775.

DEATHS **Clarence Ham**

BIG LAKE — Services for Clarence Earl Ham, 80, of Big Lake were to be at 2 p.m. today in the First Baptist Church in Big Lake. Burial was to be in Stiles Cemetery directed by Robert **Massie Funeral Home**

Ham died Tuesday in San Angelo. He was born Feb. 26, 1898, in Palo Pinto County. He was a member of First Baptist Church. He was a member of the Masonic Lodge of Big Lake. He had lived since 1924 on a ranch west of Stiles, where he raised sheep and cattle.

Survivors include his wife, Alice Ham; a son, Jack Ham of Big Lake; a daughter, Earlene Ham of San Diego, Calif.; a brother, Howard Ham; a sister, Mrs. Royce (Eddie) Satterfield of San Angelo, three grandchildren and a great-grandchild.

Reedy Wortham

WHITEWRIGHT - Services for Reedy R. Wortham, 68, of Tom Bean, father of Jane Walker of Midland, were Monday in Earnharts Funeral Home here.

Burial was in the Vittietoe Cemetery in Tom Bean.

Wortham died Monday in a Denison hospital following a short illness.

He was born Oct. 15, 1910, and was the son of the late R.H. and Pearl Wortham of Tom Bean.

He was married to Opal Bellows in Kentucky Town Oct. 17, 1928. Wortham was manager of R.L. Stewart Farm Enterprises of Lubbock 29 years before retiring: He returned to Tom Bean six years ago.

Survivors include his wife; a brother, John R. Wortham of Tom Bean; three sisters, Mrs. Ben Vincent and Mrs. Bernie Coker, both of Sherman, and Mrs. J.D. Evans of Dallas, and three grandchildren.

Ernest Warren

GROVES - Ernest S. Warren Sr., 83, of Groves, father of Judy Carr of Midland, died early today in a Nederland hospital following an illness.

Services will be at 4 p.m. Friday in Levingston Funeral Home in Groves. **Burial will be in Greenlawn Memorial** Park here.

Warren was born June 10, 1895, in Orange. He was married to O'De

McCorkle. Warren was a retired salesman for Sears, Roebuck & Co. in Port Arthur. He had lived in Groves the past 30 years.

Other survivors include his wife, a daughter, a son, a sister, nine grandchildren and seven great-grandchildren.

Joseph Lashley

Joseph J. Lashlev, 38, of 2512 W. Hicks Ave. died of an apparent heart attack Tuesday afternoon in a Midland hospital.

Services will be at 2 p.m. Friday in Kelview Heights Baptist Church with the Rev. Frank Johnson officiating. Burial will be in Fairview Cemetery directed by Thomas Funeral Hiome

He was born on Dec. 25, 1939, in Stokesdale, N.C., and moved to Midland from there 14 years ago. Lashley was employed as a pumper for the John L. Cox Pumping Service of Midland. He was a member of the Kelview Baptist Church.

Survivors include his wife, Bonnie Mary Lashley; a son, Joseph W. Lashley of Midland; a brother, Tommy Lashley of Stokesdale, N.C., and his mother, Mrs. William Lashley of Stokesdale, N.C.

Jennifer Banta

Jennifer Jay Banta, infant daughter of Mr. and Mrs. Douglas Banta of 2600 B Mariana St., died Monday in a Midland hospital at the age of 9 days.

Graveside services were held Wednesday in Fairview Cemetery directed by Thomas Funeral Home.

Survivors include her parents and her grandmothers, Rubey Sunhurst of Pocatello, Idaho, and Darlene Banta of Midland.

Richard Peters

Services for Richard F. Peters, 67, 1602 N. J St. were Tuesday in the First Presbyterian Church. Burial was in Resthaven Memorial Park directed by Newnie W. Ellis Funeral Home.

Peters died Sunday while playing golf at Midland Country Club.

Pallbearers were Alfred Miller of Houston, Hugh Gilmore, Russell Yost, Ray Gardner, Jack D. Brown, Rice Forman and Jim Montgomery.

Rhodesian forces attack guerrilla headquarters

SALISBURY, Rhodesia (AP) -Rhodesian forces attacked guerrilla leader Joshua Nkomo's military headquarters 12 miles north of the Zambian capital of Lusaka today

terrorist operations ... are planned and have been launched against Rhodesia.

It said the troops were returning to their bases from the raid some 90

Carter hopes treaty to bind Israel, Egypt

CAIRO, Egypt (AP) - Diplomats report the Carter administration plans to get Egypt and Israel involved in joint economic projects funded by the United States as soon as they have signed a peace treaty.

The sources said administration officials plan to lose no time in getting the two countries working together in a relationship that will cement the treaty, but they are having trouble coming up with enough ideas to match the amount of spending envisaged.

The diplomats, who are Western and refused to be quoted by name, said there was favorable sentiment in Congress to increase U.S. aid to

of Migrant Affairs.

chief of programs.

Indicted justice will be on November ballot

LAMESA - The name of an indicted Dawson County peace justice will be on the ballot for the November election

Attorneys for Peace Justice Richard Nelson were granted a motion for continuance earlier this week. The trial date had been set for Oct. 23, but it will be at least Nov. 27, the next trial date, before the case is heard.

Nelson was indicted by a Dawson County grand jury in July on charges of misapplication of public funds and three counts of burglary. He was suspended from office by the Texas **Commission on Judicial Conduct** pending the disposition of the case.

Nelson won the Democratic Party's nomination in the May primary. Five Dawson County residents have filed as write-in candidates to run against him.

Willis Gresham and William E. Fulbright, attorneys for Nelson, argued in their court brief the law firm would be hard-pressed to interview some 80 witnesses "spread all over the state of Texas and as far away as Wisconsin" if the trial were held as scheduled.

The motion also stated that the late dateof receipt of the list of witnesses would deny the defendant effective counsel and effective cross examination.

miles inside Zambia but gave no other details. The Zambian government said

Rhodesian warplanes began bombing the guerrilla camp at 8:30 a.m., and Zambian troops and ambulances were rushed to the site. Casualties were believed to be heavy, a dispatch from Lusaka said. It reported the bombing was felt in the shantytowns surrounding Lusaka, some of which were damaged by the impact of the explosions.

The road to the camp was reported crowded with vehicles taking dead and wounded to Lusaka's University Teaching Hospital.

There was no immediate comment from Zambian President Kenneth Kaunda, who earlier this month reopened the Zambian-Rhodesian border so imports could travel from South Africa and Mozambique across Rgodesia to his land-locked country.

The attack was the third major raid into Zambia which Rhodesian forces have admitted since Nkomo's and Mugabe's two guerrilla forces began their war against white rule six years ago. More than 10 cross-border attacks have been made against Mugabe's guerrilla forces in base camps in Mozambique, to the east of Rhodesia

Zambia is on Rhodesia's northwest border.

On Wednesday, the Rhodesian mili-tary announced their second major attack within four weeks against the bases in Mozambique. Rhodesian troops were still fighting in Mozambique today, military sources said, but there has been no report of what they have achieved.

Nkomo is believed to have up to 10,000 guerrillas in camps in Zambia and Angola, while Mugabe has some 15,000 in Mozambique and 8,000 more operating inside Rhodesia

The Zambian raid came on the eve of talks in Washington between U.S. and British officials and Rhodesian Prime Minister Ian Smith

Pecan plantation turns testimony in Stacy Reservoir hearing to 'nuts'

Austin Bureau

AUSTIN - Testimony in the Stacy Reservoir hearing turned to "nuts" Wednesday, as an attorney for a pecan plantation sought assurances that the proposed dam, particularly in times of drought, would not hold back Colorado River water for irrigation purposes

The plantation, Leonard Farms, holds a Texas Water Commission irrigation permit and covers 2,600 acres about 100 miles downstream from the proposed reservoir in Central Texas.

The Colorado River Municipal Water District, which supplies lake water to Midland and other West Texas towns and cities, is seeking a TWC permit to construct the reservoir on the river, in the Stacy area, in Runnels, Concho, Coleman and

McCulloch counties.

Alex Pope, a Fort Worth attorney representing the plantation, said Leonard Farms is concerned that. during a drought water might not be released by Stacy in sufficient volume to satisfy downstream prior water rights.

During a critical drought, no water other than five cubic feet per second would be released, he suggested in cross-examining CRMWD consulting engineer Bob Gooch.

However, Gooch said records do not indicate a drought of the magnitude Pope proposed would occur. "I don't think the situation you're

proposing has any relationship to what's going to happen," Gooch said. Gooch said downstream prior rights, such as those of Leonard Farms, would be protected.

microwave oven that is in abuse. good condition to begin with and that is maintained and used properly is safe for home use.

The FDA's Bureau of Radiologic Health has done tests with rabbits and found that low-level microwave oven radiation does not cause cataracts in them. The rabbits are used for testing because their eye is similar to the human one in size.

In a recent study, rabbits were exposed to radiation from an oven leaking at 10-12 milliwatts per square centimeter for one hour a day over a period of 12 weeks. At the end of the experiment, their eyes were as clear of cataracts as at the start.

The lowest exposure level found to cause cataracts is 180 milliwatts per square centimeter at the rate of 1 hour a day for 20 consecutive days. But FDA standards for microwave ovens limit leakage radiation to 1 milliwatt per square centimeter at the time of purchase and to 5 milliwatts over the lifetime of the oven. And of course nobody sits in front of a microwave oven for an hour a day.

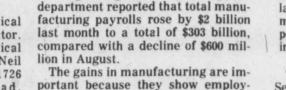

To avoid any accidents with microwave ovens, the FDA has some advice to offer. Check a new oven for any shipping Never use

ment said Wednsday.

portant because they show employment and production are strong in the backbone industrial sector of the economy. The September gains were strongest in transportation equipment, non-electrical machinery and fabricated metals industries.

The department said higher aver-age hourly earnings accounted for most of the paryoll increases.

Personal incomes climb sharply

When income is increasing, it means Americans have more money to spend. However, the over-all gains in income this year appear to be lagging behind the rate of inflation in most months, so that the buying power of many Americans is shrinking, even though dollar income is up.

The increase in personal income for September was only slightly less than the August gain of \$8.5 billion, but was below the more substantial monthly increases in income earlier in the summer.

The department said total personal income stood at an annual rate of

\$1,735.6 billion in September. Personal income is income from all sources, including wages, dividends, rents, farm income and goverment transfer payments.

The department said wages and

Bloomers cost him \$43,000

FORT LANGLEY. British Columbia (AP) - Jim Anderson flew in from Texas, went on a \$3,000 shopping spree and ended up with a pair of used underwear.

Not just any used underwear, of course - the bloomers he bought were once worn by Queen Victoria.

Anderson outbid two others at an auction Tuesday night and, as a result, the bloomers which once warmed a royal bottom will soon be hanging behind the bar in his English-style pub in Houston.

The bloomers had been obtained for Village Auction Sales by David Gray, an agent for the company in Liverpool. He said the authenticity of the bloomers had been certified by Bonham's Montpelier Galleries, dealers in antiques.

"In all fairness, they probably weren't worn more than once," he said. "She gave her underwear to her maidservants.

The bloomers Anderson bought probably date back to the latter part of the 19th century and were worn late in the Queen's reign when she had put on extra weight - a change indicated by the size of the bloomers.

Texas Instruments is looking for people to work as electronic assemblers from now until mid-December. The job is temporary. The rewards can be lasting.

For instance, you'll learn about how a growing new company in your community builds great products such as electronic calculators and digital watches. And you can come back again next year.

TI lets you know your work is important. The pay is good, and there is a choice of shifts available. You'll discover that the products you are making are helping make life easier for people all over the world.

If you're a housewife, student, or anyone who wants to earn extra cash for the holidays, apply now. Come to the TI Employment Center at the Midland-Odessa Air Terminal.

8 a.m. 'til 8 p.m. Monday through Friday and 8 'til noon on Saturday.

Annual regional exhibit now on view at Midland College

Midland Arts Association's annual fall regional exhibition has opened at Midland College, to continue on view through Oct. 28.

The exhibition in the McCormick Gallery of the Fine Arts Building at MC is open to the public at no charge between 8 a.m. and 5 p.m. weekdavs.

Artists and craftspeople from a wide area, includ-ing those from Lubbock, Odessa, Big Spring, Colorado City, Abilene, San Angelo, Hobbs, N.M., and elsewhere are represented with entries in the popular show

Inall, some 460 entries were received for this year's show, said Norma Helm, Midland Arts Association president and general chairman of the exhibition.

Anne Livet, former curator of the Fort Worth Art Museum, adjudicated the current show and recommended cash awards totaling \$2,000 to winning artists and artisans.

There were no first, second and third prizes in the various categories in the show. Rather, there were 10 cash awards of \$100 each, eight awards

ODESSA - Permian Playhouse's second production of the new season, "The Mousetrap," will open Friday night.

Opening night curtain will be at 9 p.m. in place of the regular 8 p.m. to help alleviate traffic congestion as a result of the Permian Basin Oil Show under way this weekend.

The oil show closes at 8 o'clock nightly and the later curtain time will enable theater-goers to find ample parking space around the theater at 310 W. 42nd St., adjacent to the Ector County Coliseum grounds.

The second performance of "The Mousetrap" on Saturday night also will have a 9 o'clock curtain. Additional presentations of the mystery drama by the late Agatha Christie on Oct. 27 and 28 and Nov. 3 and 4 will have 8 p.m. curtains.

"The Mousetrap," now regarded as a theater classic, has been running more than 25 years in London's West End. The Permian Playhouse production has been staged and directed by Michael Madach, new managing director of the Playhouse, Odessa's community theater.

San Angelo Symphony starts season Saturday

SAN ANGELO - The San Angelo Symphony Orchestra opens its new season with a concert at 8 p.m. Saturday in City Auditorium.

The program will mark the first public appearance of Gene Smith as resident conductor of the orchestra. The San Angelo Symphony recently withdrew from an alliance with the Abilene Philharmonic in which both ensembles were conducted by George Yeager, with the instrumentalists of the two ensembles presenting pairs of programs in the cities.

Programmed for the Saturday concert here is Beethoven's "Prometheus" Overture, Op.43, as well as contemporary American composer Howard Hanson's Symphony No. 2, Op. 30, and the overture to Rossini's opera buffa, "The Italians in Algiers." Rounding out the program will be "Four Scottish Dances" by British composer Malcolm Arnold and a medley from the famous rock opera, "Jesus Christ Superstar," by Andrew Lloyd Webber and Tim Rice.

Season subscriptions for the San Angelo Symphony's four-concert season are priced \$15 for adults, \$10 for students and will be available for purchase at the auditorium box office Saturday

OPEN MON. THRU SAT.

through Saturday at SACT's Lake Nasworthy Playhouse here. Reservations for performances at 8 p.m. today, Friday and Saturday may be made by telephoning the box office, 949-3044.

Single tickets are priced \$4 for adults, \$2 for students. SACT season memberships also are available for purchase, priced \$30 for couples and family groups, \$15 for single adults.

"Accommodations," staged and directed by SACT resident director Carol Price, features Jill Doss, Ed Boring, Ange Dickson and Carlton Smith Jr. The farce is described as "a light look at love and marriage.

Artists and craftsmen to meet at Colorado City for roundup

COLORADO CITY - Artists and craftsmen from all over West Texas, Oklahoma and New Mexico are expected to set up booths and displays of their works for the Sixth Annual Colorado City Railhead Arts and Crafts Roundup Oct. 28-29.

The event, so named in recognition of the city's status as a railhead for West Texas in the 1880s, will be held in and around the Mitchell County Fairgorunds off West Highway 80, said officials.

Many of the participating artists and craftsmen attending have donatdrawings throughout the day. Everyone attending is asked to register in order to be elgible for the drawings.

In conjunction with the event, the restored Colorado City Opera House will present a melodrama entitled, "Lady Audley's Secret or Death in Lime Tree Walk, slated to start at 8 p.m. Thursday through Saturday nights. Tickets will be available at the **Opera** House.

Live music featuring local fiddlers and pickers will fill the air Saturday, and the Do-Si-Do Square Dance Club

THE MIDLAND REPORTER-TELEGRAM, THURS.. OCT. 19, 1978

Documentary shows decline of individual

By JOSEPH GELMIS Newsday

NEW YORK - "Network," shown recently on television, served a useful function as a fictional primer on the Anything Goes philosophy of the international conglomerate-owned subsidiary whose management must produce additional profits each year or be replaced.

A new, 45-minute documentary produced by California Newsreel offers a valuable and illuminating account of the growth of such conglomerates and their influence in global affairs. Titled "Controlling Interest: The World of the Multinational Corporation," the

film's premise is that as conglomerates take over individual companies, responsibility for the welfare of workers and society in general as well as to the laws of communities and even nations decreases. Thus, the film concludes, the rise of the multinational corporation has made the individual more powerless than ever.

Item: Ingersoll Rand, identified as a \$2 billion-a-year international conglomerate, bought a thriving old tool plant in Greenfield, Mass. Soon, the company demanded pay cuts and that the town build a new plant, threatening to move the operation to South Carolina for cheap labor if the de-

mands weren't met. "We've been reduced to bidding against each other,' says a local labor leader in the film. as the union votes to take the cut. "We're defenseless," he says, against absentee owners "who have no loyalties except to making money . . . and have as their allies political powerbrokers who put down revolt abroad to make the world safe for the multin-

ational corporations."

Item: The film shows footage of Brazil's military takeover in 1964 and the subsequent encouragement of foreign investment with the promise of stability. The film claims the military rule has led to Brazil getting more foreign-controlled industrialization than any other South American nation

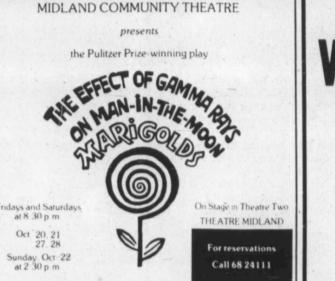

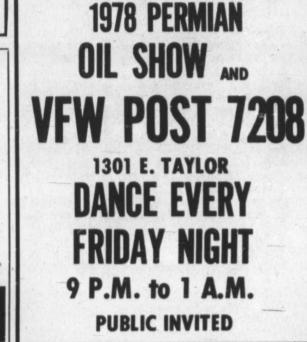

ODESSA — The Odessa Civic Concert Association opens its new season tonight in Bonham Junior High School auditorium.

The opening event will feature actor-singer Tom Taylor in a one-man show as Woody Guthrie. Program time is 8 p.m.

Guthrie, one of America's most famous and bestloved balladeers and songwriters, will be portrayed by Taylor with the aid of various musical instruments and simple props and costumes. Senior citizens of Odessa will be guests of Odessa

Civic Concert Assocition at the concert. Members of Midland's Community Concerts Association also may attend the program free of charge under the reciprocal attendance arrangement between the concert organizations of the two cities.

returned a trump to the king. West couldn't think of a reason for refusing

the trick so he took the ace of trumps. West returned a heart, and South ruffed. Declarer cashed the ace of diamonds, ruffed a diamond in dummy and led a trump to his hand. Since this drew East's remaining trump, South could safely ruff another diamond in dummy.

Declarer got back with a club, drew the last trump and ran the rest with with good diamonds and the ace of clubs.

DEFEATS SLAM

West should refuse to win the first trump trick. If declarer leads a second trump, West would win and return a third trump, limiting South to one diamond ruff in dummy. If declarer abandoned trumps after the first round in order to ruff two diamonds in dummy, East would

overruff with the nine of spades. There may be other advantages in refusing the first trump trick, but you needn't work them out. Unless you see a reason to win the first trump trick play low and go on from there.

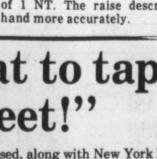

DAILY QUESTION Partner opens with one diamond, and the next player passes. You hold: S-A64; H-876; D-Q983; C-864. What do you say?

ANSWER: Bid two diamonds. Your 6-point hand is worth some response of 1 NT. The raise describes your hand more accurately.

It's a treat to tap your feet!"

As a New York Life Agent I'm pleased, along with New York Life and its 11,000 representatives across the country, to bring you the New York Philharmonic Young People's Concert-October 22 on CBS—TV. Conduc-ted by Gunther Schuller and hosted by Beverly Sills, the concert explores how the world's music is influenced by people's basic desire to move to rhythm. It's great fun and masterpiece performance. I hope you enjoy the concert. And it there's anything I can do for you in helping to provide for your family's financial security, please call me.

Wildcats, discoveries included in NM activity

McClellan Oil Corp., of Roswell reported plans to re-enter a 7,618-foot wildcat failure in Eddy County, seven miles south of Hope, and cleanout to 4,500 feet for completion attempt in the Abo.

The project, No. 1-AR State, origi-nally was drilled by Sunray DX Oil Co. and plugged in 1964.

The location is 1,980 feet from north and west lines of section 31-18s-23e and 3.5 miles northwest of 4,496-foot Abo gas production in an unnamed field

NO. 1 RAYNOUX

Mountain States Petroleum Corp. of Roswell, N. M., also will re-enter a wildcat failure in Eddy County.

It is the former Texas Oil & Gas Corp. No. 1 Raynoux which was plugged at 11,542 feet in 1977.

Mountain States will drillout to 6,-000 feet for completion attempt in the Bone Spring zone.

The location is 1,980 feet from south and west lines of section 19-21s-27e and one mile northeast of 11,180-foot Morrow gas producton in an unnamed field. There is no nearby Bone Spring production.

HNG WILDCAT

HNG Oil Co. of Midland announced location for a 12,400-foot Morrow wildcat in Eddy County, four miles north of White City.

It is No. 1-10 South Horseshoe Bend. 957 feet from north and 1,980 feet from west lines of section 10-24s-25e. It is one and three-quarters miles south of 10,800-foot Morrow gas production in the Horseshoe Bend field.

NO. 2 BIG CHIEF

J. C. Barnes Oil Co. of Midland No. 2 Big Chief Communitized is to be drilled as a 12,750-foot project 3/4 mile south of the same operator's No. 1 Big Chief, recently completed Morrow gas discovery in Eddy County.

The project is 660 feet from south and 1,980 feet from west lines of section 22-22s-28e. The No. 1 Big Chief was completed for a calculated, absolute open flow potential of 1,310,000 cubic feet of gas per day; through perforations from 12,150 to 12, 671

EDDY STRIKE

Beard Oil Co. of Oklahoma City No. 1 Hanlad has been completed as an abo gas discovery in Eddy County, 10 miles west of Artesia.

Operator reported a calculted, absolute open flow potential of 1,125,000 cubic feet of gas per day, with shut-in welhead pressure of 1,550 pounds, through perforations from 4,670 to 4,716 feet.

The project also was dually comleted from the Atoka as a confirmation to an unnamed discovery.

From the Atoka, it finaled for a calculted, absolute open flow potential of 1,635,000 cubic feet of gas per day, with shut-in wellhead pressure of 1,712 pounds.

YATES WELL

Dallas McCasland of Eunice, N. M. No. 4-F Federal has been completed in an undesignated Yates-Seven Rivers area of Lea County, seven miles south of Jal.

The well finaled for a daily pumping potential of 8 barrels of oil and 18 barrels of water, through perforations opposite the Yates from 2,999 to 3,116 feet.

Gravity of the oil is 34 degrees and the gas-oil ratio is 34-1.

The total depth is 3,160 feet and 5.5-inch casing is set at 3,154 feet.

The pay section was acidized with 2,500 gallons and fractured with 40,000 gallons.

Location is 1,838 feet from south and 2,122 feet from east lines of section 29-26s-37e.

HNG GAS WELL

HNG Oil Co. of Midland No. 1-34 Shoe Bar Ranch Unit has been completed from the Morrow in the Shoe Bar (Morrow) area of Lea County, N. M

The well, one location north of the Morrow discovery, was finaled for a daily flow of 333,000 cubic feet of gas per day, through a 15/64-inch choke and perforations from 12,456 to 12,479 feet after 2,000 gallons of acid. The gas-liquid ratio is 83-1, with

gravity of the liquid 53 degrees. Total depth is 13,011 feet and 5.5-

inch pipe was landed at 13,011 feet. The plugged back depth is 12,919 feet.

Location is 990 feet from south and 1.980 feet from west lines of section 34-16s-35e, and seven miles southwest of Lovington.

MORROW WELL

Harvey E. Yagtes Co. of Roswell No. 2-21 Mobil-State has been completed in the extreme southeast edge of the Carlsbad, South (Morrow) field of Eddy County.

It was finaled for a daily flow of 725,000 cubic feet of gas per day, through a 3/4-inch choke and perforations from 12,200 to 12,230 feet.

The pay was acidized with 5,000 gallons.

Total depth is12,297 feet and the plugged back depth is 12,245 feet. Location is 1,980 feet form south and west lines of section 21-23s-27e and four miles south of Otis.

WOLFCAMP STRIKE

Yates Petroleum Corp. No. 5-AB Federal has been completed as a Wolfcamp gas discovery in Eddy County, six miles west of Dayton. The well, in an undesignated area,

was completed from the Wolfcamp for a daily flow of 420,000 cubic feet of gas, through a 1/2-inch choke and perforations from 6,528 to 6,568 feet. The pay was acidized with 5,800 gallons.

The following tops were reported on ground level elevation of 3,561 feet: San Andres 760 feet, Glorieta 2,104, Abo 4,162, Wolfcamp 5,666, lower Canyon 7,487, Strawn 7,996, Atoka 8,364, Morrow 8,625, and Chester 8,792 feet. Total depth is 8,894 feet and plugged back depth is 6,587 feet.

The reported agreement grew out of

.

ENERGY OIL & GAS

quiet negotiations involving U.S., Israeli and Egyptian officials as well as representatives from at least two American oil companies during the Camp David summit conference last month.

Details of the accord are still being negotiated by all parties during the current talks at Blair House. The Israelis are known to be seeking a guaranteed source of Arab oil supplies and are pressing the Egyptians for preferential terms.

Egypt wants to regain it territories in the Sinai as early as possible in part to press the development of oil resourcs there. More than 20 foreign companies are now drilling for oil in

Egypt. Complicating the Sinai oil negotiations is the claim by Standard Oil of Indiana (Amoco) and Superior Oil Company of Houston to the same fields in the Sinai. Egypt gave concessions to Amoco in the early 1970s and Israel subsequently issued concessions to a Panamanian-registered company called Neptune for part of the same area. Neptune is effectivly controlled by Superior and a Texas independent oilman, Richard McRief.

The Neptune field is now producing between 10,000 and 20,000 barrels a day from the Alma oil field, as it is known. The oil is refined at Israel's Haifa refinery. Amoco is operated at a number of locations in Egypt, in-

Explorer sites staked

Mewbourne Oil Co. of Tyler announced location for a wildcat operation in Pecos County, two miles northeast of Sheffield.

It is No. 1-A Noelke and it is scheduled on an 8,100-foot contract.

The location is 1,800 feet from north and 467 feet from west lines of section 4, block 193, TMRR survey. The site is theast of de burger oil production in the Thigpin, South field.

cluding adjoining territory in the Sinai, with a production of 130,000 barrels a day.

Egypt is barely in the ranks of the major exporters and seems unlikely to achieve its 1-million-barrel-a-day 1980 export goal. Since the 1973 war, both the Egyptians and Israelis have been encouraging foreign, and in particular American, oil companies to enter into concession agreements to explore and produce oil in the Sinai region, particularly offshore.

Israel is almost wholly dependent on oil imports. Only two percent of its supply comes from wells inside its pre-1967 borders.

A secret addendum to the 1974 Sinai II agreement negotiated by then-Secretary of State Henry A. Kissiner committed the United States to guaranteeing Israel's oil needs in the event it was cut off from normal supplies. Most of Israel's imports come from Iran, and smaller amounts from Mexico.

As recently as 1972, however, Israel was producing about 80,000 barrels a day from the Abu Rudais fields it occupied in the Sinai after the 1967 war. These fields were subsequently returned to Egypt after the 1974 withdrawals.

In 1976 Israel signed an agreement with Neptune, which has since found oil inside the Sinai territory still occupied by Israel.

The Egyptians have claimed that the Neptune concession area granted by Israel occupies some, if not all, of an area already given in concession to Amoco.

During the fall of 1976, Israeli gunboats attacked buoy markers placed by Amoco in the Gulf of Suez to delineate potential drilling areas.

Kissinger, after meeting with Amoco officials, sent Israel a warning from the Ford administration that Washington regarded the gunboat attacks as provocative.

Amoco and the Superior Oil officials who control Neptune have yet to come to a firm agreement on the disputed Sinai oil concessions.

Last January Egyptian Premier Mamdouh Salem said that the Egyptians would ask Israel for \$2.1 billion in compensation for oil extracted from the Sinai fields during the eight years of Israeli occupation.

In recent months, and since the Camp David talks, however, Egyptian and Israeli officials have made no public statements regarding the Sinai oil dispute.

Wolfcamp well finals

American Trading & Production Co. of Midland has completed its No. 1-20 Ophal-State in the Gomez (Wolfcamp) field of Pecos County.

It is a re-entry project, having been drilled by Forest Oil Corp. and plugged at 18,815 feet in 1971.

American Trading finaled the well through perforations from 11,289 to 11,959 feet for a calculated, absolute open flow potential of 400,000 cubic

feet of gas per day. Hole is plugged back to 12,179 feet and 5/5-inch casing is set at 12,425 feet.

The location is 1,980 feet from south and 1,320 feet from east lines of section 20, block OW, TCRR survey and 14 miles northwest of Fort Stockton. The closest other Wolfcamp production is two and three-eighths miles to

Geologists set meeting

Frank W. Daugherty will be the speaker for the Tuesday noon meeting of the West Texas Geological Society in the Midland Hilton.

The meeting will get underway at 11:30 a. m. Reservations should be made by 5 p. m. Friday by contacting the West Texas Geological Society office in Midland.

Daugherty will talk on "The 1978 Field Trip to the Big Bend of Texas: A Geological Summary."

The speaker is a graduagte of Sul Ross University. He earned an M.A. degree in Geology at The University of Texas at Austin and a Ph.D degree in geology from the same university.

He was a geologist with Dow Chemical from 1962 to 1963 when he became a professor of geology at West Texas State University. He became a partner in D&F Minerals in 1971.

Daugherty is a feldlow of the Geological Society of America and is a member of the Geochemical Society, the AIME, the West Texas Geological Society and the Zanhandle Geological Society.

UNDESIGNATED AREA

The Eastland Oil Co. reported potential test for its No. 1-M H. G. Faulk, new Delaware producer in an undesignated area of Eddy County. Operator reported a daily pumping potential of 16 barrels of 42.5-gravity oil and 12 barrels of water, from open hole at 2,491, where 4.5-inch casing is set, and total depth of 2,504

feet. The pay was acidized with 2,700 gallons and fractured with 2,500 gallons. Location is 990 feet from south and

330 feet from west lines of section 32-22s-28e and seven miles southeast of Carlsbad.

It is a southeast offset to the Delaware discovery.

STEPOUT FINALS

Bill J. Graham of Midland No. 1 Williams has been completed 1/2 miles souteast of Queen gas production in an undesignated area of Chaves County, N. M.

From the Queen open hole at 2,650 feet, where 5.5-inch casing is set, and total depth of 2,773 feet, the well finaled as a shut-in gas well. The potential has not been reported. Location is 1,980 feet from south and 1,730 feet from west lines of section 3-13s-31e and 12 miles southwest of Caprock.

CHISUM WELL

Plains Radio Broadcasting of Amarillo No. 5-B-16 L. E. Ranch is a new well in the Chisum, East (San Andres) field of Chaves County,. It completed for a 24-hour pumping potential of 28 barrels of oil, through

perforations from 2,184 to 2,231 feet. The gravity and gas-oil ratio have not been learned.

Location is 330 feet from north and 1,650 feet from east lines of section 16-11s-28e and 25 miles east of Roswell.

Total depth is 2,259 feet and 4.5-inch pipe was landed on bottom.

The plugged back depth is 2,251 feet.

SECOND WELL

The same operator completed No. 5-I-9 L. E. Ranch in the Chisum, East (San Andres) field for a daily pumping potential of 23 barrels of oil and nine barrels of water, through perforations from 2,204 to 2,270 feet. Gas-oil ratio and gravity have not been learned.

Total depth is 2,298 feet and 4/5-inch casing was set on bottom.

Location is 2,310 feet from south and 330 feet from east lines of section 9-11s-28e and 25 miles east of Roswell.

a 5,600-foot wildcat in Yoakum county, 4.5 miles northeast of Plains. Plains.

G. W. Brock, Inc., of Midland No. 1

Palmer-Fitzgeral has been staked as

The drillsite is 1,980 feet from north and east lines o section 375, block D, John H. Gibson survey. Ground elevation is 3,657 feet.

The location is two miles southeast of the Spivey field.

BORDEN TESTER

Texland, Reetor & Schumacher of Fort Worth will drill a 9,000-foot wildcat in Borden County, eight miles south of Gail. It is No. 2 Amoco-Long, 2,080 feet

from south and 1,880 feet from east lines of section 29, block 30, T-4-S, T&P survey. There is no production in the immediate area.

TERRELL WILDCAT

The Superior Oil Co., operating from Conroe, announced location for a 3,000-foot wildcat in Terrell County. 20 miles north of Sanderson. The explorer is No. 3 Sid Harkins, 1,246 feet southwest of an active wildcat and 1,500 feet southwest of a 22,-

418-foot dry hole. The drillsite is 3,300 feet from north and 2,550 feet from east lines of Robert Belcher survey No. 13, abstract 2196 and in Block 602.

RUNNELS TRY

E. B. Fletcher of Dallas spotted a 3.900-foot wildcat in Runnels County. 1/2 mile southeast of Wingate.

It is No. 1 Grace Smith, 7,178 feet from northwest and 3,135 feet from southwest lines of L. Forsythe survey No. 450. It is in the depleted Sanford (Fry sand and Gardner) field. ECTOR EXPLORER

John H. Hendrix Corp. No. 1-41 J. L. Johnson is a Grayburg wildcat operation in the Donnelly (San Andres) field of Ector County.

A re-entry project, it originally was drilled by Forest Oil Corp. as No. 1 J. L. Johnson and plugged at 9,500 feet in

1974. Hendrix will cleanout to 4,350 feet

for tests of the Grayburg. Location is 760 feet from south and 660 feet from west lines of section 41, block 43, T-1-S, T&P survey.

Discovery potential

Amoco Production Co. No. 1-17 Deledyne has been completed as a Morrow gas discovery in Eddy County,N. M., five miles northeast of Lov-

Operator reported a potential of 3,-200.000 cubic feet of gas per day, through a 29/64-inch choke and through through perforations from 12,5234 to 12,552 feet.

Total depth is 13,352 feet. The discovery is three miles northeast of an undesignated Atoka gas strike and 2.5 miles northwest of the opener of the Laguna Grande (Morrow gas) pool. Location is 660 feet from south and 1,980 feet from west lines of section 17-23s-29e.

FISHER WILDCAT

Dixon Drilling Co. of Abilene No. 1 Fannie H. Johnston has been spotted as a 5,850-foot Ellenburger wildcat in Fisher County, eight miles southeast of Longworth.

Location is 2,780 feet from north and 1,980 feet from west lines of section 23 block 20, T&P survey. It is 5/8 mile southwest of depleted Ellenburger production and 5/8 mile south of depleted Canyon production in the Eskota, West area. The site also is 3/4 mile east of the Neill, South (Odomlime) pool.

MCCULLOCH TESTS

Five B's Oil Co. of Graham staked its No. Hays as a 2,800-foot wildcat in McCulloch County, three miles southeast of Doole.

The drillsite is 1,967 feet from south and 467 feet from east lines of sectidon 45. H&TC survey and one mile northeast of a 2,000-foot failure.

RThe location also is two and fiveeighths miles southwest of the Walker-Grant (Strawn gas) field.

FIELD PROJECTS

Michael D. Lillis of Lubbock spotted a pair of stepouts to a northwest extension area of the Hall (Strawn gas) pool of McCulloch County, 10 miles north of Brady.

No. 1 Ronnie Gassiot is 7/8 mile northeast of the opener of the Byrd (Strawn oil) pool and 467 feet from north and 330 feet from west lines of F. Roccius survey No. 586. No. 3 T. C. Gassiot is 3/4 mile

northeast of Strawn gas production and 2,410 feet from southand 330 feet from east lines of section 153, H&TC survey.

The projects will be drilled to 900 feet.

RUNNELS STRIKE

W. W. West of Midland No. 3 J. L. Hoppe has been potentialed as a King sand discovery in Runnells County, six miles west of Winters.

The operator reported a daily potential of 38 barrels of 42.4-gravity oil, with a gas-oil ratio of 169-1, pumping through perforations from 2,889 to 2,892 feet. Completion was natural.-

Location is 1,000 feet from south and west lines of section 69, block 63, HT&B survey.

Total depth is 4,771 feet and 5.5-inch casing is set at 3,612 feet. The plugged back depth is 3,766 feet.

The King sand was topped at 2,886 fect, waiting on completion unit. feet on ground elevation of 1,940 feet. Other tops include the Saddle Creek GLASSCOCK COUNTY John L. Cox No. 4-B Wrage-Hen-drickson, drilling 6,150 feet. lime at 2,519 feet; Home Creek lime at 3,429 feet and the Overall sand at 3,492 HOCKLEY COUNTY HOCKLEY COUNTY Amoco No. 16-A Alex Slaughter, td 10.144 feet, perforations 9,963-9,994 feet, acidized with 30,000 gallons, swabbed 14 hours, recovered 234 bar-rels water, set reciainer at 9,825 feet, squeezedd with 200 sacks, perforated 9,884-9,890 feet, acidized with 2,000 gallons, drilled on retainer at 9,800 feet, squeezed with 150 sacks, per-forated 9,099-9,161 feet, acidized with 3,000 gallons, testing. feet.

The wellsite is 3,000 feet south of King sand production in the Fennell multipay field, but separated from it by a 3,000-foot failure.

West suggested new field names of Winters, Northwest, LRH or JLH fields.

Veto totals reveal

president, Congress

agreed rather well

THE MIDLAND REPORTER-TELEGRAM, THURS., OCT. 19, 1978

By FRANK CORMIER

WASHINGTON (AP) - As President Carter marked the end of the 1978 congressional session with a series of vetoes and veto threats, aides produced figures that suggest he really gets along rather well with the Democratic-controlled Congress.

In his 31 months in the White House, Carter has resorted to the veto six times. By recent historical standards, that's not very many. White House researchers came up

with the following figures for other recent presidents:

John F. Kennedy, 21 vetoes in three years; Lyndon B. Johnson, 30 in five years; Richard M. Nixon, 43 in five years, and Gerald R. Ford, 66 in three years.

By any standard, Republican Ford emerges as King of the Veto. Of course, he wrestled with a Congress controlled by the opposition party, as did Nixon.

If you use the White House figures to average each man's vetoes per year, you find Ford tops at 22, followed by Nixon at eight, Kennedy at seven and Johnson at six.

Who can say Carter doesn't get along with Congress, aides argue, when he has averaged a mere three vetoes per year?

Some bills, you can bet, will never get vetoed. They are the ones naming federal facilities for retiring or former members of Congress. Just last week, for example, Carter signed legislation designating:

-The Roman L. Hruska Meat Animal Research Center in Nebraska, named for that state's former Republican senator who did not seek reelection in 1976.

-The Carl Hayden Bee Research Center in Tucson. Hayden, who died in 1972, represented Arizona in the House, then in the Senate from statehood in 1912 until his retirement in

-The W. R. "Bob" Poage Pecan Field Station at Brownwood, Texas, in the district of a retiring House Democrat.

Carter, who has campaigned for the elimination of unnecessary boards, commissions and agencies, must wonder sometimes about the panels to

which he must nominate members. Recently, for instance, Carter signed a document formally nominating Army Col. John M. Adsit to be a member of the California Debris **Commission**

The "United States Government Manual" gives no clues to the nature of this organization. It simply lists an address and phone number in Sacramento, Calif.

Sam Donaldson, White House correspondent for ABC News, has been jousting with the president's mother, Miss Lillian, for more than two years.

All in good fun. When Miss Lillian showed up for a recent news conference, he challenged her with, "Have you got a press pass?'

Unruffled, she retorted, "If you can get one I know I can."

When Lew Wasserman, entertainment magnate and contributor to Democratic candidates; followed them back from Camp David, Md., without passengers last week, it was a different story.

The bodyguard-drivers, knowing that a U.S. Park Police cruiser would be making a high-speed run over the same route, fell in behind the cruiser and sailed down Interstate 270 at about 70 miles an hour, with the cruiser flashing red warning lights whenever traffic intervened.

A Secret Service spokesman said the drivers simply "wanted to get home to momma.

It's a King-Size store ... your answer to more exciting savings!
