Consumers lose ground

By MICHAEL DOAN

WASHINGTON (AP) - Consumers lost more ground to inflation in September as prices increased 0.8 percent, the Labor Department said

Prices of gasoline, housing and school tuition costs all climbed markedly. Food prices rose 0.5 percent after two months of stability, the department said.

The average worker's purchasing power dropped 0.3 percent during September, the fifth decline this year, the report said. That meant most workers' wage increases had been eaten up by inflation.

The September price increase would average out to about 10 percent a year if it continued for 12 months. The inflation rate for the first nine months of the year was 9.6 percent, the department said.

President Carter announced a new anti-inflation program Tuesday night,

with

but administration officials said it may take at least six months before it shows any results.

Officials say inflation should be somewhat more than 8 percent for the year, but they are hoping the new program will get it down eventually to no more than 6 to 6.5 percent.

Although food prices rose in September, the monthly report indicated that inflation is distributed over the entire economy.

The cost of owning a home jumped 1.3 percent and the price of rent went up 0.8 percent, both the biggest increases of the year.

Home purchase prices rose 1.6 percent and home mortgage costs rose rapidly: The cost of fuel oil and furniture went up, but the cost of home appliances and electricity declined. Gasoline prices rose 1.4 percent, while the cost of car repairs went up 0.9 percent and auto insurance

McCamey is urged to 'sparkle

By ED TODD R-T Staff Writer

McCAMEY - "Nothing is constant." Upton County Judge Peggy Garner said Thursday night in ur-gingMcCamey citizens to clean up their town and make it sparkle with

The townspeople constantly will have to work at bettering the commu-

nity, she said. Progress in years past will not

carry over into the years to come unless backed by work, the judge told more than 100 McCamey folks and out-of-town guests during the annual McCamey Chamber of Commerce "Let's go forward with pride," she

"If the...McCamey Chamber of Commerce would set goals and purposes for us to achieve," she said. then the townsfolks might break out with pride and spruce up this oilpatch town of approximately 3,000 "If' is a big word," she added Thurs-

day night. "We've limited the town we love by

our apathy, by our unconcern. We cast shadows...on McCamey," she

No shadows were cast minutes earlier, however, when the Rev. Weems S. Dykes was named McCamey's outstanding citizen of 1978.

After receiving the award from outgoing chamber president Wayne Greer, Dykes gave what he later described as his "shortest sermon"

> Roses are red. I give them to you. Thank you for your trust. And I love you, too.

Dykes, McCamey's poet laureate, is pastor of the town's Christian and Presbyterian churches and has authored two books of poetry, "A Cup of Thoughtfulness" and "My Cup of

By his own admission, Dykes is involved in many community

projects, undertakings and worthwhile movements. The spectrum covers "just about everything in town, just about," he said.
The outstanding citizen award

ceremony was brief. Afterward, Dean Bolen, incoming

chamber president, gave a longer but still brief acceptance speech.

"I have accepted the challenge of being the chamber president with the full expectation that I will have your cooperation...to promote our town to make McCamey more than just a town on the map...a town we can point to with pride...," Ms. Bolen said. "Let's go forward."

She is a graduate of McCamey High (Continued on Page 2A)

NEW YORK (AP) - The rabies death of an Idaho woman appears to be the second case in medical history in which a deadly virus has been transmitted through the most common of transplants - a new cornea.

Constance Wesselman, 37, of Boise, died Oct. 10, six weeks after receiving a cornea from Frederick Stone, 39, a Baker, Ore., forester. Doctors say Stone, who died Aug. 20, probably had

By Thursday, health officials had questioned some 200 persons who had

come in contact with either Stone or Mrs. Wesselman; 61 persons in Idaho and 10 in Oregon were receiving rabies vaccinations.

But eye surgeons emphasized Thursday it has not been proven that the Idaho woman's rabies was caused by the transplant, and said two cases of such death would be too rare for alarm.

"Would you say aspirin was a bad thing to take because some people have developed bleeding ulcers?" said Dr. Norman Stahl, whose New

Midland United Way extends city campaign

Midland's United Way campaign has been extended to Nov. 10, Campaign Chairman Tom Brown announced today.

"We made a mistake in thinking we could do this in four weeks, without taking into account the (Permian Basin) Oil Show. That took a good two weeks out of the schedule of a lot of

"It (the campaign) has taken six weeks in the past even without the Oil Show, so we're going to go ahead and give our workers that much more time," Brown said.

As of Thursday afternoon, a total of \$660,478, or 71 percent, had been pledged toward the 1979 goal of \$928,-686, Brown said during a progress

report meeting this morning.

The four-week general campaign was scheduled to end today. By the fourth week of the campaign last year, 85 percent of goal had been pledged, Brown continued. United Way of Midland helps fund

19 social service agencies in the Tall

City. Of the money collected each

year, about 46 percent is allocated for

various youth services, through such

agencies as Midland and Lee Youth Centers, Boy Scouts, Girl Scouts, Camp Fire Girls, Salvation Army, Boys' Club and three branches of the YMCA -- Alamo, Park Center and Washington. Casa de Amigos also has a tutoring program for youth.

About 25 percent of the United Way funds are allocated for family rehabilitation through such agencies as Family Services, Salvation Army and Council on Alcoholism. Two day care centers, La Florecita

Day Nursery and Community Day Nursery, receive about eight percent of United Way funds.

The other funding is divided as follows: three percent for recreational activities, five percent for health and physical rehabilitation and four percent for educational services - a large part of which is handled through agencies such as the American Red Cross, Planned Parenthood and the Tape Lending Lirary.

Only about five percent of the funds collected is allocated for campaign expenses and four percent for community organization and administration, said officials.

York City practice includes about a

dozen cornea transplants a year. The first case of a virus being transmitted in a cornea transplant was disclosed here three years ago by doctors at Columbia University.

They said a woman died of an obscure, slow-acting nerve virus known as Creutzfeldt-Jakob disease, apparently caught two years earlier when she received a cornea from a New York man who was later found to have died of the disease.

Eye surgeons acknowledged there is no practical way to spot rables or many other fatal viruses in a donated cornea if diseases go undetected in the donor.

The cornea, the outer lens of the eye, has become the most popular tissue for transplant because it is not rejected by the recipient's natural disease defenses, the way body organs are.

More than 10,000 corneas were transplanted in the United States last year, compared with 3,902 kidneys,

the second most common transplant. Eye banks, the brokers of the cornea business, check the donor's health history and test both the cor-nea and eyeball for disease. But tests cannot spot viruses like rabies which are too small to see with a microscope and do not show up on bacterial

"We are very careful to determine the cause of death. You wouldn't use a cornea from a patient that died of hepatitis, leukemia or malignant cancer," said Dr. John Harris, head of Ophthalmology at the University of Minnesota in Minneapolis. "Rather than take a chance, you just don't use

The same rule applies in organ transplants. Vernon Knight, chairman of Microbiology and Immunology at Baylor College of Medicine in Houston, said standard practice was to discard an organ from a donor who was even suspected of being sick.

Whalen stop order in force for 3 weeks

By MARK VOGLER R-T Staff Writer

AUSTIN - A forced shutdown of brine disposal operations at Whalen Lake in Andrews County, initiated Monday by a Texas Railroad Commission order, will last for at least three weeks, according to the commission's senior examiner, James B.

Spokesmen for three companies owning disposal facilities at the lake urged the Commission during a show cause hearing here Thursday to lift its ban on discharges into the lake, at least until the commission renders a decision on the renewal of discharge

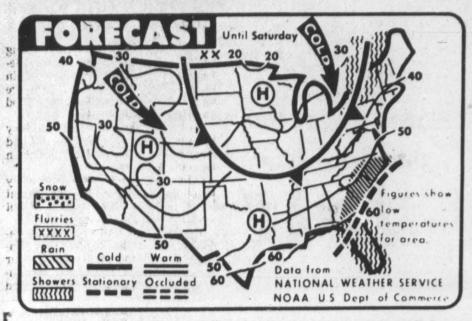

But Peden said that, under state law governing the posting of notices for administrative meetings, the earliest the commission could consider

the matter would be Nov. 13. Meanwhile, a Midland representative of a national wildlife group recommended the commission consider a permanent ban on all oil company discharges into playa lakes — or risk a major law suit in federal district

(Continued from Page 1A)

big, big money. It's a pretty lucrative thing to get into.'

By that he means "big, big" Las Vegas money. A million-dollar backgammon tournament will be played in the nation's roulette capital the first week in December.

And for a \$500 entry fee, you can take a chance of winning the high stake of \$190,000 or nothing at all. And you've got time to practice before endangering your amateur

status by winning a bundle and turning professional. Boadle merely is interested in play-

"We're just trying to get it kicked off," he said. He and some other backgammon players will hold the organizational meeting at 8 p.m. Tuesday in The Brass Nail pub-restaurant off U.S. Highway 87 South in Big Spring.

Players and would-be players are invited, he said. Boadle considers himself an advanced amateur.

"Backgammon is a fast game," he said. "There is so much variations that no two games are alike. It's very strategic play. It's the kind of game...you can hardly walk away

from...(when) you get to playing." The game is winning fans. And the way it's drawing players, backgammon in a couple of years will be pulling in more participants than bridge, he said.

Backgammon is a game of chance

"It's about 50-50," Boadle said. "No, I'll take that back. It's a little more skill than it is luck. Well, here's to you and backgam-

mon. Bottoms up. Here a bumper-sticker message worth talking about:

Brine disposal shutdown to last three weeks

(Continued from Page 1A)

Bird Rehabilitation Center, told the commission that reinstatement of discharge permits at Whalen Lake would trigger a law suit by the Washington, D.C.-based Defenders of Wild-

She added she considered Whalen Lake to be in good condition compared to other playa lakes in West Texas and said some other lake - and perhaps not Whalen Lake - may be the basis for legal action.

Officials for Whalen Corp. of Dallas, Phillips Petroleum Co. and Petroleum Corp. of Texas, Breckenridge, appealed to the commission for immediate reinstatement of their per-

The officials said Thursday even a short-term ban would have significant impact on oil production in the Permian Basin.

The lake serves some 525 producers capable of delivering more than 700,-000 barrels of oil per month in one of Texas' riches oil field areas.

Oil company officials said the shutdown already has forced truckers who haul brine to the disposal facilities out of work and may soon halt the operations of small producers who use the lake for brine disposal.

Representatives for Whalen Corp., the principal figure in the case, just after the noon break of the day-long session, appeared optimistic that they had demonstrated affirmative action in cleaning up pollution at Whalen

Arnold Darrow, president of Whalen Corp., a subsidiary of Triton Oil and Gas of Dallas, urged the commission to adopt interim standards for discharging oilfield brines into the lake, to conduct an in-depth study on the hazards of discharges and then to determine permanent limits of oil, grease and iron sulfides in waters released into the lake as well as other standards.

Darrow told the commission examiners he was astonished that the commission had shut down operations after the company had made what he termed major improvements in conditions at the lake, and particularly after Whalen Corp. was advised that it was "doing a good job."

Whalen's attorney Ivan Hafley introduced into evidence a recent letter from the commission to lake manager Merlin Handely which commended Handley for doing a good job in protecting the lake from pollution. However, Peden told Darrow that

the commission during last year's hearing had considered the operation "something less than perfect," and

said in the commission's opinion that no substantial improvements had been made by the company at the lake.

The examiner cited "inconsistencies" in the results of laboratory tests of water samples taken by the commission and Whalen Corp. on the The commission test results of

water affluent taken from skimming pits ranged from 187.1 parts per million (of petroleum material dumped into the lake) to 481 parts per million while Whalen's results were less than 1 part per million.

The commission considers 20 to 25 parts per million to be the acceptable level of oil waste discharges.

Darrow said company officials had questioned the validity of the test results, which had been compiled by an Odessa labratory.

"I doubt if our city water would meet that (less than one parts per million)," Peden quipped Thursday. Darrow and other oil company officials tried to focus on what they considered to be inconsistencies by the Railroad Commission.

Whalen Corp., up until Monday's permit suspension, was led to believe that it was doing an adequate job in disposal practices, he sid. Furthermore, there are no standard regulations governing discharges into playa lakes, said Darrow.

Peden said the commission would soon be holding statewide hearings to determine what standards are acceptable by the Railroad Commis-

"We feel very strongly that there is a definite need to have the concerned parties try to sit down and discuss recommendations for agreed limits of oil and grease discharges into the lake. In addition to that, a study needs to be made to determine permanent standards," Darrow said.

"I don't think anyone has any information to factually document what the hazard is (to migratory birds)."

The National Audubon Society, the commission, the Texas Department of Parks and Wildlife, the U.S. Interior Department and other concerned parties should work together in sponsoring an indepth environmental impact study of the effects of salt water disposal operations at the lake, Darrow recommended.

U.S. Interior Department agent Richard Endress and Ismael Nava of the Department of Parks and Wildlife, testified that current discharges endanger migratory waterfowl. They said they would welcome an environmental study.

The house will be open Saturday through Tuesday from 7 p.m. to closing. Admission will be 50¢ for children under 12 and 75¢ for adults. Proceeds will go to the Midland High School Choir. (Staff Photo)

Investigation probes pricing

WASHINGTON (AP) - A still-secret federal investigation says most of the nation's meat prices are set by a handful of big packers and market reporting services.

While the year-long effort by the Agriculture Department has not turned up any violations of federal law, department official Charles B. Jennings said a search for possible illegalities is continuing.

A report on the initial findings ordered kept secret by Agriculture Secretary Bob Bergland — found that prevailing wholesale beef prices are set daily on the basis of a relatively

small percentage of actual transactions by some of the nation's largest packing plants.

The report noted that widespread criticism of the way meat prices are set is based on the system's reliance on voluntary price reporting by packers, which "does not produce an accurate picture of the market."

Earlier this month, a congressional committee concluded after its own study that the Yellow Sheet - the largest of the reporting services - is potentially subject to manipulation by industry giants at the expense of farmers, small businesses and con-

Leaks dampen deputies' spirits

Midland County Sheriff Dallas Smith is hoping for a sunny Novem-

At least he'd like to see less rain than has been received in October

thus far. The sheriff hopes rains earlier this week which left 16 gallons of water in a plastic trash can in his office will be the last. This time, though, the sheriff managed to keep the rainwater from

soaking everything. The case of the leaky roof on the County Courthouse is an old story that has grown monotonous.

Mops and buckets to cope with wet floors following heavy rains have been a way of life for the Sheriff's Department for several years, according to Smith.

But the sheriff said he is convinced that County Commissioners will be able to solve the problem soon.

The leaks apparently are caused by defective material between the ceiling decking and the pre-fabricated

beams, said Smith, whose office seems to be the worst hit every time it rains in Midland. When the ceiling began to drip

Monday, county maintenance men decided to erect a special catch to drain the water into a 35-gallon plastic bucket. "It saved us from having to clean

up about 16 gallons of water off the floor the next day," said Smith.

"That's not enough to flood the floor with inches of standing water, but it's enough to become a nuisance. It warps cabinet doors and gets everything damp. The water usually gets all over paperwork if you're not prepared for it.

The leaky ceiling hasn't resulted in any serious water damage to the department in the two years Smith has been in office. But it does keep deputies on their toes, making sure that all equipment and paperwork are under cover.

Fair weather lurking ahead

Clear skies lie in wait for Midlanders who have a busy weekend planned, said the weatherman.

The forecast calls for fair weather with warmer afternoons through Saturday, according to the National Weather Service at Midland Regional Airport.

Tonight's low should be in the low 40s. The temperature should reach a high in the middle 70s Saturday.

A trace of rain was recorded in the last 24 hours by National Weather Service officials. That brings the total for this month to date to 2.51 inches. Total rainfall for the year to date is 14.82 inches. Thursday's high was 57 degrees.

The record high for Oct. 26 is 90 degrees set in 1950. The overnight low was 42 degrees. The record low for today is 33 degrees set in 1967. Winds are predicted to be light and

variable tonight. Area town weather watchers reported clear skies and cool temperatures early today.

A few area temperatures reported early today included 42 degrees in Andrews, 46 degrees in Stanton and Rankin and 40 degrees in Big Spring.

Edwin Benedict

COLEMAN - Graveside services for Edwin Benedict, 77, of 2406 Standolind St. in Midland, were held Monday afternoon in Pioneer Cemetery in Graham.

The Rev. Don Sebastia, minister of the First Presbyterian Church of Graham, officiated Burial was in Pioneer Cemetery

under the direction of Stevens Funeral Home of Coleman.

Benedict died Wednesday night in a

Coleman hospital following a brief illness.

Benedict maintained a ranch in Crosscut, near Coleman. He was born Oct. 1, 1901, in Ste-

phens County. Although he moved to Brown County 19 years ago, he graduated from Midland High School and lived a year in Midland County as a rancher.

Benedict married Nell Midkiff May 27, 1927, in Midland. He was a member of the Episcopal Church.

Survivors include his wife; a daughter, Mrs. Don Anderson of the home; a son, Allen Benedict of El Paso; two brothers, Norman Benedict of Roswell, N.M., and Prather Benedict of Austin; a grandaughter, Patrice Gordon of Fort Worth, three nieces and two nephews.

J.D. Owen

BURKBURNETT - Services for J.D. "Duke" Owen, 65, brother of Tyler Otwen of Midland, were Wednesday in Central Baptist Church with the Rev. Joe Cunningham and the Rev. Bill Stone officiating.

Burial was in Burkburnett Cemetery directed by Owens & Brumley Funeral Home. Owen died Monday in a Dallas hos-

pital He was born January 1913, in Edwardsville, Ala. He was a retired

with thymidine. Man arrested in rape

A 28-year-old man was arrested early today in connection with the alleged rape of a 19-year-old Midland woman about midnight Thursday, said Midland Police Department officers.

The man, who was staying at a Midland motel, was arrested at 12:50 a.m., said officers.

Authorities said the incident took place in a west Midland alley. The victim was beaten, dragged into the alley and raped at knifepoint, investigators said they were told.

Detective Sgt. Jerry Compton, Patrolmen Marc Noble and Les Hunter made the arrest.

Drug confuses

cancer cells WASHINGTON (AP) - A new drug

seems to confuse cancer cells, preventing them from reproducing in mice, doctors say. Human tests are under way with backing of the Food and Drug Administration.

An FDA spokesman said Thursday the agency has approved two limited licenses to test the drug, thymidine, in as many as 50 patients

Officials stressed that it is too early to tell how effective thymidine might be in humans. They said it is not

available for general use. The National Cancer Institute received one of the licenses and contracted with the Baltimore Cancer Research Center where three terminally ill patients are now being treated

Amendments favored

Nine proposed constitutional amendments will be before Texas voters in the Nov. 7 election and citizens should become familiar with them before going to the polls.

Constitutional amendments are tremendously important to Texas and Texans and citizens should be prepared to vote intelligently on them whenever they have the opportunity. All too often, voters simply skip the amendment issues completely rather than do their "homework" and vote their convictions. This isn't the prescribed procedure.

The amendments are listed at the top of the voting machine, so please don't overlook them.

It also is important to differentiate between the Tax Relief Amendment, which is unnumbered and at the top of the amendment list, and Amendment No. 1, which is in second place on the list. The others follow in order.

All of the proposed amendments, to our way of thinking, merit approval, and The Reporter-Telegram recommends same in the upcoming balloting.

The unnumbered "Tax Relief" amendment would provide "for tax relief for residential homesteads, elderly persons, disabled persons, and agricultural land; for personal property exemptions; for truth in taxation procedures, including citizen involvement; for a redefinition of the tax base; for limitations on state spending; and for restrictions on property tax administration."

The other amendments are numbered as follows on the ballot:

No. 1. Exempting certain products manufactured by handicapped persons from the requirement that purchasing by state agencies be done by competitive bidding.

No. 2. Authorizing political subdivisions to issue revenue bonds for industrial development, such as is done by many other states. Texas needs this in order to meet the competition. (This one will be discussed more in detail in a later editorial.)

No. 3. Authorizing cities and towns to issue tax increment bonds to finance redevelopment of blighted areas:

No. 4. Exempting solar or windpowered energy devices from

No. 5. Extending jurisdiction of justice of the peace courts by

increasing the \$200 limit now existing to \$500 in civil cases.

No. 6. Permitting the legislature to increase the number of justices on a court of civil appeals, and permitting a court of civil appeals to sit in sections and "requiring a concurrence of a majority of justices to decide a case." This amendment would apply only to the overcrowded courts of civil appeals.

No. 7. Abolishing the State Building Commission and the State Building Fund. The commission has completed its assignments and now exists in name only.

No. 8. Authorizing water districts to engage in fire-fighting activities and to issue bonds for that purpose.

Additional information on the amendments will be published between now and election day. Pro and con information on the proposals has been made available by the Texas State Chamber of Commerce, West Texas Chamber of Commerce, League of Women Voters and other organizations.

All of the amendments are important and all merit serious consideration. Again, The Reporter-Telegram recommends approval of all of them.

ple are those who never talk about anyone else.

IT HAPPENED HERE

- 30 YEARS AGO (Oct. 27, 1948): U.S. Rep. Ken Reagan of Midland, State Sen. H.L. Winfield of Fort Stockton and State Sen.-elect Hill Hudson of Pecos have advised the Midland Chamber of Commerce that they will attend its "Meet Your Representatives" luncheon Friday in the Hotel Scharbauer Ballroom.

CHARLEY REESE

The U.N.: World's great monument to hypocrisy

By CHARLEY REESE Sun Belt Syndicate

ORLANDO, Fla. - The world's greatest monument to hypocrism, the United Nations, observes its anniversary this month, marking 32 years of rancour, deceit, treachery, hombast, lies, war and theft.

A Congress of sensible Americans would vote us out of this Tower of Boobery but common sense and comcern for America's national interest are as rare as humility in recent

The United Nations evangelists are out on the fried chicken circuit prattling about its contributions to peace which in reality have been zip. They are silent about its contributions to death and destruction.

Most United Nations fans dun't even understand it. They think it was created to prevent war. Actually, if you read the charter, you can see that it was clearly intended to be a front for the World War II Allies and an instrument of war.

As a front for a victorious alliance of great powers, the United Nations might have worked in the same way the Congress of Vienna worked by successfully waging war against anyone who wished to upset the status

Unfortunately, the Alliance came apart. The Soviets never intended to remain an ally once Nazi Germany

press, Burger seems unable to stop

talking. At a luncheon meeting with

U.S. News and World Report

reporters and editors, for example,

the Chief Justice dengunced the

reporters who cover the Supreme

Court - some of the most distinguish

ed and experienced members of their

profession - as "a bunch of pip-

squeaks whose knowledge of history

began with Vietnam and ended with

Cambodia." This mindless insult was

At the same lunch, Burger, who

considers himself a connoisseur of

fine wines, spoke patronizingly of the

judges who make up the Judicial Con-

ference. When he had them out to his

home recently, he said, he served

them cheap jug wine because they

he considers beneath him socially or

intellectually is not restricted to the

press and fellow jurists. In one of a

few off-the-record meetings with

reporters who cover the court. Burger

betrayed a curiously aristocratic at-

titude toward the public. He implied

that the Supreme Court's activities

are really the business only of judges

Apparently, his only exposure to or-

dinary citizens occurs when

sightseers visit the Supreme Count

building during a session. Thus, he

regularly refers to the public as

were designed to improve relations

Wells sg

But m

A chec

The Arabs use it in their war minst Israel. The African dictators use it in their war against Rhodesia and South Africa. Britain and France use it to maintain their charade of being important. The communists use it in their war against the United States. Internationalists use it in their scheming for one world government and almost everyone uses it to fleecethe American taxpayer who foots 25 percent of the entire cost.

For our generous contributions to the United Nations we get spit and spies and the spectacle of buffoons from countries where the standard of living is so low that even New York City seems like paradise.

A friend of mine in the governs service once told of a coup in a two-bit. country. For days after the coup there was no government because the coup leaders were arguing over who could be president and who would get the real plum which was being ambassadur to the United Nations.

We might tolerate the United Nations as a bit of expensive comedy except that it is dangerous in a number of ways. It offers an excuse to wage war as in the Congo and Korea; it encourages war, as in the Middle East, by promising what it has no intention of doing.

The two-bit world is attempting to use it to fleece the industrial nations out of their wealth and the United Nations financial organizations cheat the American taxpayers by using their money to rebuild the countries the same taxpayers just spent a fortune destroying

The dream of peace via a world rument is just that, a dream. It will never be realized in the way starry-eyed surburban housewives are led to believe. World government will come, as it has in the past, only when one nation or cluster of nations is powerful enough to crush the others with military force.

In short, the United Nations is a danger to world peace, a threat to American independence, an unnecessary expense to the taxpayer, an insult to the concepts of justice and uman rights, a dangerous meddler in American foreign policy, a home for Antly Young, and an opiate for the mmies-but-goodies who actually believe its propaganda.

INSIDE REPORT:

Edmund Brown, Jimmy Carter: Delicate relationship

By ROWLAND EVANS AND ROBERT NOVAK

SAN DIEGO, Calif. - Gov. Edmund G. Brown demonstrated his current delicate relationship with Jimmy Carter when he telephoned the president Oct. 12 to inform him he was meeting in Tijuana the next day with Mexico's President Jose Lopez Portillo and intended to propose U.S.-Mexican cabinet-level discussions to resolve an impasse over Mexican natural gas.

President Carter's response was icy. Would the governor please not take any action that could interfere with U.S. policy? Brown shelved his proposal. Nevertheless, after meeting the Mexican president, he left no doubt that he feels Mr. Carter's policy toward Mexico is one of malignant ne-

That typifies Jerry Brown's mixture of contempt and caution in dealing with the President. Brown has solved the political problems that menaced him this year and may well score a substantial re-election victory strengthening his credentials for a 1980 challenge against Mr. Carter. Privately, he has little admiration for the president as a man or a public

But Brown and his closest advisers are realists who appreciate that Mr. Carter will be impregnable if he keeps his post-Camp David popularity. "Jerry is not about to make a quixotic move that will destroy him," one member of his inner circle told us. Consequently, Brown shields private contempt with public praise and, as in the Mexican episode, avoids direct confrontation.

Evans

Caution stems from appreciation of the Carter revival, not self-doubts by Brown. Rather, Brown has managed a political tour de force in not only catching up with the tax revolt but in generally solving problems of incumbency. Alone among the many Democratic governors elected in the Watergate year of 1974, Brown seems well ahead for re-election and conceivably could be the only one of the lot to

Novak

That is significantly attributable to the atrociously inept campaign run by Brown's Republican foe, state Atty. Gen. Evelle Younger. But Brown himself has evolved from merely charismatic candidate to master poli-

Brown's justly famed leap from foe to ardent supporter of tax-slashing Proposition 13 climaxed a series of adjustments. These began in early 1977 when Dow Chemical canceled a California plant, triggering a revulsion against the anti-business, antigrowth tone of the Brown administra-

He then began systematically mending fences on academic growth,

big government, law-and-order and agriculture. His campaign brochure takes credit for state spending limits and tough sentencing laws. "Jobs are going up, taxes are going down," he tells every rally. Brown has no time today for liberal

cumstances and personalities dic-

The post-Watergate era has become

one in which the judicial branch is ex-

ercising tremendous power. Its deci-

sions will affect the fundamental

rights of individuals and institutions

Unfortunately, both the tone of the

federal judiciary and the substance of

its decision-making are being

dominated by a chief justice who was

appointed by Richard Nixon - the on-

ly president ever forced from office -

and who shares many of his disgraced

benefactor's social and political

views. And our investigation of War-

ren Burger has disclosed that one of

his most strongly held Nixonian

biases is his detestation of the press.

The three branches of government

doctrine. Addressing the militantly liberal California Democratic Council (CDC). Brown delivered a 15-minute chamber of commerce booster speech. While the liberals looked on in utter amazement, Brown boasted about the state's rising corporate profits. The CDC has no place else to go, and Brown knows it. Brown's faintly disguised contempt for the liberals betrays his cavalier treatment of supporters and non-supporters alike that is his underlying weakness as a politician. His CDC performance concluded 24 hours of intermittent rudeness, beginning with a testimonial dinner for state AFL-CIO leader John Henning; in a self-congratulatory speech, Brown did not even mention Henning's name. On the next day, he outraged a national meeting of UPI editors by keeping them waiting for 11/4 hours.

But the editors who waited were rewarded with a taste of some of the nation's most innovative political thinking. While Proposition 13 obviously reacted to inflation and taxation, Brown told them, it also protested "runaway growth" and "very rapid change." It was, he added, a demand "to slow things down" - a quest for stability.

Thus, behind his current applause of growth, Brown still believes this is 'an era of limits." To sophisticated audiences such as the UPI editors, he talks about low growth being essential to reduced inflation. In private, he contends the government's appetite for regulation has overreached itself

WASHINGTON MERRY-GO-ROUND

mand, and no self-respecting reporter

On the other hand, when he feels

he's with "safe" members of the

tion's press.

peril of every citizen.

Chief Justice versus the press

Brown specifically feels President Carter blundered in approaching the energy problem with more, not less, regulation. Moreover, he doubts that Mr. Carter can fulfill what Brown now talks of as the Democratic party's historic mission: to stop infla-

that he can fulfill this mission better than Jimmy Carter. Furthermore the excitement he has generated this fall on the campaign trail has convinced his handlers that there is still the old Brown magic that bested Mr. Carter in seven out of seven 1976 primaries. The present Brown caution in confronting the president merely connotes respect for Mr. Carter's present popularity, which shall be measured very carefully from California in the coming weeks.

and contributes to inflation.

apparently is of the truly epic propertions nurtured by the man who appointed him. "There was a Ninomian attitude toward the press that Burger maintained," a former count employee told our reporters Tom Rosenstiel and David Ansley. There was a feeling, he said, that "they're There is no doubt by Jerry Brown out to get us.' Such an attitude can be self-

fulfilling, as Richard Nixon learned to his sorrow. Footnote: Burger's defenders insist that he is a dedicated and conscientious chief justice, and point to the number of procedural changes he has instituted to make reporters' coverage of the court's decisions easier. But this, too, was a stamfard tactic of the Nixon White House: See that the press is kept comfortable. and kept in the dark.

THE BIBLE CAN YOU QUOTE IT?

By LAVINA BOSS FOWLER AND ELIZABETH ROSS WIERSEMA

 The symbol of the cross dates back to paleolithic times. Its four points symbolic of four main winds which bring rain and the four elenents: earth, air, fire and water. An early tradition corresponds the Cross on which Jesus was crucified, with the "tree of life." What propie were the ones who used the cross as a means of punishment? Acts 28: 16-17 2. Where was the first garden locat-

d? Genesis 2:8 3. Tell the name of the first city as recorded in Genesis 4:17. 4. According to Psalm 104: 19, which

planet governs seasons?
5. What creature reminded Peter of a vow he had made? Matthew 26:75 Four correct...excellent. Three cor-

rect...good.

A check of local hospitals indicates the forced indoor togetherness may have contributed to a baby blizzard. But nowhere has the mini baby-

beam made more of an impression than at the obstetrics department of Deaconess Hospital where nine nurses are themselves pregnant.

CAMDEN, S.C. (AP) - Eleanor Wells says her Emie is "eating like a pig," and she's not too happy about

When she and a friend, Lucy Hines, bought Ernie, the pig was supposed to be a 7-year-old Yorkshire miniature which would never grow larger than

But Ernest Pigg - the piglet's formal name - is growing at an alarming rate. About two weeks after the women bought him, he was up to 10

Kershaw County's Clemson University extension agent, B.T. McIntosh, took one look at Ernie and told the women they had bought not a 7-yearold miniature but what would soon be a full-sized porker.

But if Ernie's pedigree isn't all its supposed to be his lively personality is more than making up for it.

According to Mrs. Wells, Ernie is the life of the party. He sings and can lap up a full can of beer in five minutes, she said.

Pintos reportedly involves in 13 fiery crashes

DETROIT (AP) - Thirteen Ford Pintos - more than double what might be expected from the number of Pintos on the road - were involved in fiery, fatal rear-end crashes in 1976 and 1977, federal figures show.

The figures are different than those Ford used to defend itself against charges about the Pinto and its gas tank near the rear bumper, and they show more rear-end crashes with fires and deaths than the Ford figures would indicate.

The new figures on such rear-end crashes were compiled from National Highway Traffic Safety Administration computer files at the request of The Associated Press.

They also show that two small cars with fuel tanks away from the rear bumper, the Toyota Corolla and Volkswagen Rabbit, were not involved in a single such fatal crash over the two years.

American Motors Corp.'s Gremlin had, like the Pinto, more rear-end, fire-accompanied fatal crashes than would be expected. But the low number of such accidents involving Gremlins - four - made the Gremlin results less conclusive.

Drawn from police reports, the statistics show the number of cars in which one or more fatalities occurred when the vehicles were struck from the rear and a fire occurred. They do not mean that the fires were serious, caused the deaths or stemmed from fuel tank leaks.

However, the figures were described by a University of Michigan authority as statistically significant and strong evidence that the controversial Pinto is more susceptible to serious fuel-fed fires than other cars.

Peter Cooley, author of a 1974 industry-sponsored study on the subject by the university's Highway Safety Research Institute, said that the new statistics also support the argument of many safety engineers that fuel tanks should go above or ahead of the rear axle.

At the same time, the data and other studies support the auto industry's contention that deaths caused by fuel-fed fires in auto crashes, while especially ugly and painful, are not frequent.

Fires of some sort - most of them minor - occur in about 1 percent of motor vehicle accidents, the Michigan study estimated. NHTSA agrees with the Michigan finding that 450-650 deaths a year are directly caused by fires in vehicle accidents, or 1 percent to 1.5 percent of the annual highway

The NHTSA figures say 1,444 cars had fires of some sort in fatal crashes in 1976 and 1977. Of those, 265 cars had been struck in the rear, meaning a greater likelihood that the fire stemmed from a fuel tank leak.

Fires in rear-enders are typically more serious than in other crashes. Severe frontal crashes, for instance, often result in minor fires under the hood that rarely cause deaths, Cooley says, but are still listed as fire-accompanied crashes.

NHTSA acknowledges that its statistics are plagued by uneven police reporting of accidents. But the accuracy is "reasonable" and the statistics are sound for comparing one car with another, said Nancy Stubbs of NHTSA's National Center for Statistics and Analysis.

Ford recalled about 1.5 million 1971-76 Pinto sedans in June after NHTSA crash tests showed the fuel system consistently leaked large amounts of fuel when struck from behind at moderate speeds.

NHTSA said the Pinto fuel tank's closeness to the rear bumper and the presence of four sharp bolts just ahead of it combined to make the tank especially puncture-prone when the car is hit from behind.

(Beginning with all 1977 model cars, improvements were made to meet new federal fuel-system safety requirements in rear-end collisions. The 1977, 1978 and 1979 Pintos are not under attack.)

A year ago, in response to a maga-

zine article, Ford cited NHTSA figures to show the car's involvement in fiery fatal crashes was just what it should be for the number of Pintos on the road.

However, those figures were based on all fiery fatal collisions, not just rear-enders. The figures compiled by the AP show the Pinto's involvement jumps sharply when rear-end crash

fatals are separated. In 1976 and 1977, when few of the newer Pintos were on the road, NHTSA data showed deaths in 33 Pintos in collisions accompanied by fire. That was some 2.3 percent of the 1,444 cars in such accidents, while Pintos represented 2.05 percent of all

passenger cars. In the typically more serious rearenders, Pinto involvement was 13 cars, or 4.9 percent of the 265 cars involved in such fatalities - more than twice what the Pinto's presence on the road would indicate.

Ford had no comment on the fig-

The Gremlin, also a subcompact, was represented proportionately in the number of all fire-accompanied fatal crashes. But in rear-enders, the four Gremlins involved were 1.5 percent of the 265 cars, while Gremlin made up 0.52 percent of all cars on the road. AMC quit making the Gremlin

No shoot-em-up scenes for these detectives

By LINDA DEUTSCH

HOLLYWOOD (AP) -It was a hot sultry night. The private eye cruised down a hill to the movie studio gate and quietly parked his car.

He looked over his shoulder, then at the beautiful woman beside him. There was no doubt. They were being followed.

A mystery story? Not

In this case, the detective knew the drivers behind him also were private eyes - all on the same case involving a movie star.

On this night, in a Universal Studios screening room, some 60 real-life detectives checked out actor Richard Dreyfuss skulking through the role of a modern gumshoe in

Mother of eight takes to campaign trail

By SUSAN RUTHERFORD R-T Lifestyle Writer

Susan Garrett Baker believes that campaigning for public office in Texas is like covering five geographic states. Her Midland visit qualified as her sixteenth swing through the state campaigning for husband Jim, who is running for Attorney General on the Republican ticket. Thus far she has logged over 7,000 miles in her full-

Mrs. Baker was the guest of Mr. and Mrs. Walter Walne, 5 Cambridge Court, at a coffee held in her honor.

Her husband is best suited for the office, she says, because "the office is a professional one and we need someone with a sound legal background. Jim has practiced law and managed a Houston firm for 18 years. Mark White, his opponent, has only practiced law for seven or eight years and has been Texas Secretary of State so that he hasn't practiced law at all for the last five years.

"Jim has a broad base and has been in Washington as President Ford's national campaign manager. He believes the person in the position will have to deal with Washington to defend the Texas state rights against the increasing encroachment of the federal government." Baker has served also as Undersecretary of Commerce in 1975 and 1976 and was appointed by Ford to a 5-year term on the Board of Trustees of the Woodrow

Wilson International Center for Scholars in the Smithsonian Institution

Mrs. Baker and her husband are the parents of eight children-a combination of his, hers and ours that she described as "happily explosive." Both other parents were deceased when the couple joined families five years ago. At that point they had three teenagers and three in the preteen years. "There was a lot of turmoil with all those teens not knowing where they stood," she said. "Family unity made up for the confusion and terf fights, however." The children now range in ages from 12 to 23 with the exception of the "ours," Mary Bonner Baker, who is 13-

"Before we started, Jim and I talked about the sacrifices we would have to make as a family. We decided that our eight children are the eight best reasons we have for becoming involved," she said. "I feel my responsibility is in helping Jim after the election as I do now.

"Jim Baker talks in specifics," said the native Texas who was born in Houston and raised on a ranch in Danbury. "He has written papers on his views on fighting crime, energy and consumer protection. He believes that one of the reasons the crime rate in Texas is one of the fastest growing in the country is because it breeds disrespect. Punishments are too lenient and too disparate."

Susan Baker, right, chats with guests, from left, Mrs. Kelly Bell and Mrs. James Butler, at a Midland coffee given in her honor. Mrs. Baker's

husband, Jim, is GOP candidate for Texas Attorney General. (Staff Photo)

Athlete's diets need more nutrition, less hokum

By JEANNETTE BRANIN Copley News Service

There is much that is delightfully amusing and much that is shameful, even appalling, in athletics today, said Dr. Nathan J. Smith, professor of sports medicine and pediatrics at the University of Washington in Seattle.

He described the "highperforming" athlete as energetic, competitive, intelligent, possessing a large share of leadership ability and a "delightful dimension of super-

In the 1936 Olympics, he said, the oarsmen of the University of Washington's Olympic gold medal crew wouldn't launder their warm-up clothes as long as they were winning. "They were undefeated for two years," Smith said.

"Bear Bryant must wear a ridiculous houndstooth hat or Alabama can't win a football game. And of course food, the pre-game superstitions of the athlete."

experienced several years ago by the New York Giants, when no one could get optimistic about the outcome of a coming game with the Washington

The Giants arrived late and had no time for dinner at the hotel. Once at the stadium, someone showed up with a large pot of Swedish meat balls and a bucket of noodles.

"This story gets told because the Giants went on to play inspired football, winning the game 48 to 6," Smith said. "It was no surprise that they arranged for a Swedish meat ball-noodle breakfast in every NFL city remaining on their schedule.'

However amusing these superstitions may be, Smith said they cannot be taken lightly when applied

"Our preferred advice to the athlete preparing for an important comfat, modest in its protein content, high in carbohydrate, avoiding bulky or very salty foods and taking in abundant fluids," he said.

"The traditional big steak dinner

doesn't meet these requirements very well. An important lesson we try to teach our athletes is that Saturday's game is played on Thursday and Friday's food intake; the pregame meal isn't the time to try to provide for all the energy needs of intense

competition.' The phenomenal increase in serious recreational exercise, seen during the past few years, was applauded by Smith as delaying the aging process, and for allowing for a healthy increase in food intake, offset by energy expenditure, which ensures an adequate supply of nutrients essential for good health.

However, Smith has no applause for the changes that have occurred in sports for children. "If overzealous adult athletes may be using themselves on occasion, the many abuses of our children in the rapidly growing should be recognized as a national

Smith said it is estimated that more than one-third of the persons in this nation between the ages of 8 and 24 are involved in some organized community-based sports program.

'These programs make no demands that the volunteer coaches or leaders, well-meaning as they may be, know anything about the sport, about child behavior or child development, or, most critically, the safe conduct of practice or games, first aid or sports medical concerns related to any of the hazards of participation.

'None of these community-based programs that I am familiar with even require a pre-participation health evaluation of the young

Smith said it is documented that the

high school athletic coach is often a highly effective nutrition educator.

"The fact that he or she teaches inappropriate and potentially dangerous misinformation has nothing to do with the fact that his teachings are, more often than not, effectively transmitted and enthusiastically implemented."

Eager athletes in their late teens and 20s want good nutritional advice. Smith said, and are particularly vulnerable to nutrition misinformation. "That misinformation can interfere with performance or be, frankly, dangerous," he said.

Parfait quick, easy, elegant

By CECILY BROWNSTONE AP Food Editor

If you are short on time but enjoy entertaining at dinner occasionally with a little style, consider serving parfaits for dessert. They may be assembled speedily and varied endlessly.

Parfaits - at least in the United States - consist of ice cream or sherlayered with a dessert zen strawberries, rasp. and topped with syrupsauce or some other sweet ingredient, fruit or liqueur. You can use what's at hand or what you want to buy.

Inexpensive parfait glasses, needed for the dessert, are sold in some variety stores. They're tall and narrow with short stems. They don't need to be crystal, just clear glass. It's the special shape of the glasses and their clarity that make their contents look so inviting.

You will also need spoons with long handles. Iced-tea spoons of silver or stainless steel are perfect if their handles are not in the form of sipping straws. We acquired our parfait spoons by collecting old-fashioned ice-cream-soda spoons, bought at junk shops, antique shows, garage sales and flea markets. They don't match, but we think that adds to their charm.

Here are some parfait combinations our guests have liked. You may want to try some of them, then invent your

Life of anthropologist romantic

By PAUL HENDRICKSON The Washington Post

WASHINGTON - He has a briefcase and a pipe and a tweedy coat. That seems all wrong. Richard Leakey senses the disappointment. Peo-ple are forever trying to make a romance of his work, he shrugs. They want khaki shorts and a Land Rover. "I should like to disabuse that."

Actually, Richard Leakey, whose work is puzzling out the secrets of man's origins, does pretty well in spite of himself in making it all sound romantic. Ask, for instance, for a picture of his fossil-hunting camp at Koobi Fora, on the banks of Lake Turkana in northern Kenya, and he will paint a fierce Impressionist canvas of yellow-green spiking grass and languid crocodiles and mountains baking under a brittle blue sky. At night the wind comes up, and it is cool.

"The camp is on a spit and so the lake is before and behind the camp," he says with a pleasant-sounding colo nial British accent. "The camp faces north so that one in fact gets the passage of the sun continually changing colors on the water. You can stand out there and in half an hour the lake will go from blue to green to brown to what is nearly a pewter gray.'

Leakey is 33. He is heir to the most famous genes in modern anthropology. Quick and polite, he conducts himself in that sure, almost sporty British way, tucking a parenthisis here, inserting a phrase like "the quote, women's lib, unquote, movement" there, begging of any claim to authority, yet by virture of his name and intellect and polish being one just the same.

He likes to hold doors and thank you quite a lot. He is tall and rangy. Brown hair licks down the back of his neck. He is a third generation Kenyan and is proud of it.

He's come to the States this time (he averages a couple of hops a year) to hold meetings on the museum he heads and to chat about his new book, "People of the Lake," written in conjunction with Roger Lewin, science editor of the New Scientist magazine in London

He likes America, he says. It's vital and it's one of the few countries where you can get something done. Arbitrary place, though: The cafe he's just stepped into, and out of, closes down from 11 to 11: 45 every day. "See

After stops in Chicago and Los Angeles, he will fly to Landon, then home to Nairobi. A few days after that Leakey will pilot his single-engine Cessna up to the fossill site. He's anxious to get back.

Can we pinpoint the specific time man became man?

"Somewhat of a semantic discussion, don't you think? I don't know anyone who's really certain when mankind became mankind - or even what it is. Certainly we know what we are — Homo sapiens.

Was the Garden of Eden in East Africa?

"I don't think there was one, do you? You do? Well, if you wish a Garden of Eden, you have to put in in Africa. But I do think it was a big garden. A big garden."

He says this smiling and leaning in a centimeter.

This isn't to suggest Leakey is not a serious, even intense, human being. In the past 10 years, on a combination of drive and what he calls dumb luck, he has moved himself to the forefront of modern cultural anthropology, making striking fossil discoveries, writing books, postulating new and unpopular theories (a chief one being that Homo Sapiens doesn't necessarily have aggression in his bones), threatening, some say, to eclipse even the sacrosanct reputation of the two people who raised him.

His father, Dr. Louis B. Leakey, pioneer in research of Homo habilis (handy man), an important link with that other hominid. Home erectus, died in 1972. But Mary Leakey, his tough, cigar-smoking widow, is still known to put in a full day on the sites. one of which is the Olduvai George on the Serengeti Plain in Tanzania, where she and her husband were digging for fossils as much as 40 years ago. Mother and son don't mix in their professional lives; never have. There was a time when father and son bare-

"If one wants to put it simply in those terms, it may have happened in some areas already, this eclipsing business," Leakey says cautiously, "but the work is different, too."

On one hand, it might seem the natural, happy way of things for a son following in his father's footsteps to eventually overtake him. Even if the father was the powerful, crotchety, charismatic Louis Leakey. In this case, the son happens to be unschooled in the profession, lacking any formal higher studies whatever.

Richard Leakey left the Nairobi public schools at 17 to set up a safari business (which became highly succesful). About the only thing he was sure of back then was that he wouldn't follow in his father's footsteps. "One felt a little intimidated," he says. From the time he was 6 months old, he and his brothers. Phillip and Jonathan, were being carted around on expeditions.

"I just wanted to get out - go away and look at animals. But it passed. The time came.

He sounds matured now in his attitude toward his parents. "In my own mind, nothing I do will ever cast a shadow on my father's accomplishments," he says at one point. At another, he says his mother, primarily an archeologist, is about the best in her field - though it's a new field now, with things like clinical lab analyses, and she's of the old school.

He pauses suddenly; his voice is kind. "You know, my parents worked at Olduvai Gorge from 1931 to 1959 without making an important discovery. I found fossils a couple years out. A lot of it is just luck."

Leakey seems inversely proud not to have academic initials tacked after his name. He likes saying he's learned it all on the job, that he's "mot am "ist" of anything." He suspects a few amthropologists still consider him a spoiled upstart; his rapport with most academics is fine. "I don't think I'm being patronized or tolerated." Im fact, they might all be envious. Last year he made the cover of Time and got 9,000 letters.

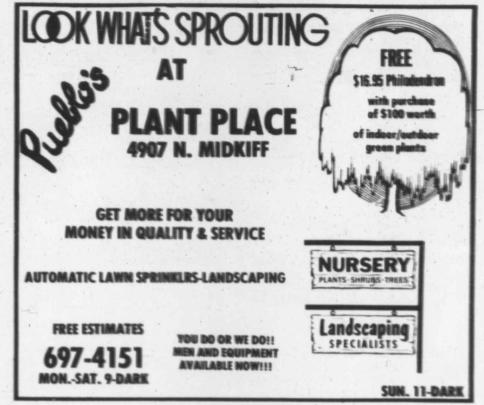

What is surprising about Richard Leakey is that he's only a part-time anthropologist. His real job is directing the National Museum of Kenya, a post he's held since 1968. This means he lives most of the time in Nairuhi and goes to work as a bureaucrat. Three hundred people work for him, he says. "Lots of brunches and that sort of thing

"My feeling is you can't have a research project like ours at Turkama without a solid financial base. Well, we've established that."

You'd rather do the other?

Through pipe smoke and with great measure: "Actually, I don't think I've done anything I haven't wanted to do for a long time.

Leakey is married to an anthropologist. Meave Leakey did her Ph.D. in Wales. The two have two children. There is another child by an earlier marriage, which ended in divorce.

When Kent Hance began work in the Texas Senate he did not sit on the sidelines like most freshman Senators. He sponsored Legislation to remove a State Supreme Court Judge from office following his indictment for perjury. He led the fight in the Senate trial to impeach a District Judge from Duval County for misconduct in office. This was the first such trial in more than 30 years, and was the first major effort to clean up corruption in Duval County. He sponsored measures to remove the Senate's top employee for questionable conduct.

Wherever Kent Hance found waste in government, he acted. He sponsored and passed into law "sunset legislation" that abolishes state agencies on a periodic basis unless they are re-established by the Legislature. This helps to keep agencies from getting out of hand, and to eliminate those that are no longer needed. He made welfare fraud or food stamp fraud a felony in Texas.

In his four-year term, Kent Hance never missed a day in the Senate's five sessions. regular and special. In four of those five sessions he didn't miss a vote. In the fifth, he had a 96% voting record.

In Congress, Kent Hance will continue this kind of representation where it is needed most . . . at the Federal level. Kent Hance has proved that when he sees evidence of corruption, waste or inefficiency in government he does not look the other way . . . HE ACTS. West Texas needs Kent Hance

Let's make sure the man we send to Congress is the man with qualifications we can measure-and count on ...!

> Authorized by the Kent Hance for Congress Committee, Mike Higgins, Treasurer. 1203 Metro Tower, 1220 Broadway, Lubbock, Texas 79401. A copy of our report is filed with the Federal Election Commission.

Laboratory checking pieces of gas pipeline

HOUSTON (AP) - A metallurgical laboratury is taking a look at pieces of the natural gas pipeline that exploded in a towering flame early Tuesday, killing at least five persons and injur-

Federal and state officials said Thursday the laboratory would be chosen later and a report could be ready by late next week.

Meanwhile, Einstonians who were beginning to forget Tuesday's disaster had the memory julied back to crystal clarity Thursday by reports of two more natural gas pipeline inci-

A gas pipeline fire near Channelview injured three Entex Inc. employees, and firefighters evacuated about 15 homes in a new southwest Houston subdivision when a 6-inch gas line was

WT areas gain tests

Northern Natural GAs Co. of Midland No. 1-15 Maddiox-Wilhanks will be drilled in the Hershey, West (Devonian-Montova) ffield area. The project is in Beeves County and if successful will extend the pool from Pecus County into Theeves.

The location for the 16,900-foot operattion is 1,787 feet from south and 1,845 feet from east lines of section 15. block 1. H&TC survey. It is 19 miles east of Balmorhea and one mile northeast of production.

The location is 5/8 mile northwest of the same operatur's No. 1-6 Herhensan, indicated second well in the

The field was discovered by Northern natural No. 1 illerhenson when it finaled for a calcualted, absolute open flow potential of 20.5 million cubic feet of gas per day, through perforations from 15,445 to 16,007 feet.

HOWARD PROJECT

Campana Petroleum Co. of Midland No. 3 Read has been staked as a south outpost to the Coahoma, North (Fusselman and Clear Furk) field in Howard County, fine miles northeast of Coahoma.

The project, slated for a 9,100-foot Ellenburger bottum, is 1,980 feet from south and west lines of section 28, block 30, T-1-N, T&P survey.

MITCHELL AREA

Tahue Oil & Cattle Co. of Midland No. 1 Silver Fox is a new project in the two-well McCabe (Pennsylvanian) field of Mitchell County, five miles north of Silvler.

The project is 1,380 feet from south and east lines of sectidion 5, block 12, HATC SHIVES.

It is one location south of Pennsylvanian proeuction and one mile northeast of the Jameson, North (Strawn) pool of Sterling County.

ruptured, apparently by construction equipment.

The three men were injured about 3:30 p.m. while making a service tap to a main gas line. Channelview Volunteer Fire Chief Duane Henry said the men apparently were in a hole welding the gas line with a torch. which ignited the gas...

Henry said firemen extinguished the 12-foot flame and Entex workers put a clamp on the gas line to stop the

Two of the men, who were not identified, were taken to Tidelands Hospital, where they were reported in good condition. The third, Charles W. Males of Houston, was reported in stable condition at Hermann Hospital.

Firemen of the Alief Volunteer Fire Department decided to evacuate the homes in the subdivision when the high pressure natural gas pipe was ruptured in case the gas fumes ignit-

The gas never caught fire, however, the leak was repaired after about 35 minutes, and the residents, who had left the area in their cars, were allowed to return.

Phillip Hogue, director of the National Transportation Department Safety Board, said the explosion of the 30-inch high-pressure natural gas transmission line that devastated a mobile home park may have been caused by a weakness in the steel pipe or a defective weld.

Mondale makes pitch

LUFKIN, Texas (AP) - Vice President Walter Mondale told a fund-raising rally Thursday night that Texas must show its independence as a great energy producer.

Speaking at a reception for Rep. Charles Wilson, D-Texas, Mondale said the nation is subject to intimidation when it becomes reliant on other countries for energy.

"For Americans, independence is everything," Mondale said.

He also said the country is "stronger than it has ever been" and will stay that way as long as the Democrats are in power.

"We have been in power some 20 months and have taken on difficult and complex issues," Mondale said. "Independence is what we're trying to accomplish."

Mondale also talked about education, calling it one of the best investments the country can make.

"Education improves the quality of democracy, strengthens the defense and is the basis of wealth and culture in the United States." Mondale said. New York Mayor Ed Koch also

Operators schedule West Texas wildcats

Inexco Oil Ca. of Hisuston has spotted location for a 10,200-foot Morrow wildcat in West Eithy County, N. M., 15 miles morthwest of White City.

The project is No. 1 Tequilla Unit, 1,980 feet from north and eeast lines of section 32-23s-23e

It is two miles east of the one-well Sitting Bull Falls (Morrow gas)

DELTA PROJECT

Delta Drilling Co. of Midland No. 1-18 Myra Tankersley is to be drilled as a 7,400-flot wildcat in Irion County,

nine miles southwest of Mertzon. The test is 674 feet from north and 701 feet from wes lines of section 18, BC&SF survey, abstract 1094.

The site is one and one-quarter miles southeast of the lune well in the Baker Ranch (Canyon oil) pool. It also is one and one-half miles southeast of Baker Banch (Canyon gas)

It also is 1/2 mile south of Cal (Canyon oil) pool production. Ground elevation is 2,493 feet.

North America Exploration Co. of Abilene announced location for a 3,- 150-foot wildcat in King County, 11 miles south of Guthrie.

Scheduled as No. 1-88 S. E. Niblo, it is 2.310 feet from north and 467 feet from east lines of section 88, block F, H&TC survey, one and one-eighth miles southeast of the Croton (Tannehill) pool and the same distance northwest of the Block F (Tannehill)

MARTIN WELL

BTA Oil Producers of Midland No. 10-B 7412 JV-S Mustang is a new well in the LaCaff (Wolfcamp) field of Martin County.

The new oiler is 20 miles southeast of Lenorah and was completed for a daily flowing potential of 205 barrels of 41.6-gravity oil, through an 18/64inch choke and perforations from 9,-763 to 9,882 feet. The pay section was treated with 250 gallons,.

The gas-oil ratio is 829-1. Total depth is 10,000 feet and 5/5inch casing is cemented at total depth. The plugged back depth is 9,922

Wellsite is 1,000 feet from north and 2,173 feet from east lines of section 2, block 7, University Lands survey.

World's tallest offshore platform now operating

NEW ORLEANS (AP) - Drillers on the world's tallest offshore oil platform, which stands on steel legs in water 1,025 feet deep, began digging for the big payoff today:

Shell Oil Ca., the operator for 15 companies sharing in the project, said the drilling bit was spudded into the sandy seabottum for the first of 62 oil and gas wells to be dug from the

It will take awhile before production pays off the \$800 million cost of the project, which Shell named Cognac - \$275 million for the platform

The first well will go down 14,000 feet and require about 33 days of work, if all goes well. Getting all wells drilled and into production will take

about three years.

A second drilling rig will be added to the platform in January.

By the end of 1909 the platform is expected to be sending 20,000 barrels of oil ashore through an underwater dine — plus a lot of gas.

By the time we finish with it, maximum production will be about 40,000 barrels a day," a spokesman

Action to the second second second

Anticipated minimum total production from the 22,500-acre lease would be 100 million barrels of oil and 500 trillion cubic feet of natural gas. The platform stands in the Gulf of

Mexico about 15 miles off the mouth of the Mississippi River's South Pass. It marks the frontier of offshore

platform technology - the deepest point offshore oil has been able to tap in the rich Gulf, where the best shallow areas have been drilled.

From seabottom to the tip top of the derrick it stands 15 feet taller than the 1,250-foot Empire State Building in New York City.

Built to withstand hurricanes, the decks include living quarters for a crew of about 100 men.

With Shell in Cognac are Amoco Production Co., Barber Oil, Continental Oil Co., Drillamex Inc., Florida Gas Exploration Co., General American Oil Co. of Texas, Getty Oil, Koch Industries, Murphy Oil, Ocean Oil & Gas, Ocean Production Co., The Offshore Co., Sonat Exploration Co. and Union Oil of California.

Costly hole abandoned

BRYAN, Texas (AP) -Amoco Production Co. announced Thursday the abandonment of a \$10 million wildcat oil and gas test in Burleson Coun-

The No. 1-A Texas A&M University test, a joint project with Getty Oil Co., failed to find commercially producible hydrocarbons after drilling to a total depth of 20,017 feet.

John W. Phenicie, Amoco vice president, said the test was drilled almost four times deeper at nearly 10 times the cost of the average well drilled in Texas last year. The test probed deep rock formations that have yielded oil and gas in other areas.

Phenicie attributed the high costs to unstable surface soil conditions, unusual casing problems, and operating in an environmentally sensitive agricultural research area.

Wildcat projects scheduled

Wildcat operations and field projects have been announced in.

scattered West Texas areas. Dan J. Harrison Jr. of Houston spotted locations for a pair of wildcats in Crockett County.

His No. 4 University is one location east of his No. 3-30-30 University Land, an active wildcat which has set 4.5-inch casing at total depth of 4,440

The new project is 660 feet from north and west lines of section 31, block 30, University Lands survey. It is to drill to 7,000 feet. The site is 16miles west of Ozona and in the vicinity of the University 30-22 (Fusselman 8350 gas) field.

Harrison No. 5 University is 1,980 feet from south and west lines of secrtion 31, block 30, University Lands survey and 5/8 mile southeast of No. 4. It also will be drilled to 7,000

STONEWALL WILDCAT

Roark, Hooker & Roark of Abilene No. 5 C. C. Cox and others is a new 6,000-foot wildcat in Stonewall County, eight miles northeast of Asper-

Scheduled for tests through the Mississippian, the project is 467 feet from north and east lines of J. B. Jones survey and 300 feet southwest of the Old Glory (Conglomerate)

CROSBY AREA

J. C. Stelzer of Post No. 1 M. T. Heinrich has been staked as a 4,300foot operation at thre southeast edge of the Ridge, South (Clear Fork) field of Crosby County, four miles south of

The location is 2,173 feet fromnorth and 467 feet from west lines of section 6, block 1, K. Aycock survey.

UPTON PROJECT Indian Wells Oil Co. of Ozona No. 1-21 University is to be drilled as a 7,700-foot project in Upton County,

eight miles east of Rankin. It is in the Flat Rock (Spraberry) 2,735 feet. area and 660 feet from south and east lines of section 21, block 3, University AB&M survey.

It is 3/4 mile northwest of produc-

STERLING TEST

HMH Operator of Midland No. 3 Sara Bade Estate is a new test in the Conger (Pennsylvanian) pool of Sterling County, 12 miles west of Sterling

Scheduled for an 8,000-foot bottom, it is 1,980 feet from south and 2,310 feet from west lines of section 16, block 22, H&TC survey.

SUTTON OUTPOST

William Perlman of Houston No. 1 Mack Cauthorn is to be drilled two and five-eighths miles south of a southeast extension area to the Shurley Ranch (Strawn and Canyon) gas field of Sutton Cunty. It also is 1.5 miles northeast of the Cauthorn Ranch (Strawn gas) pool and 17 miles southwet of Sonora.

Location for rthe 8,000-foot operation is 1,750 feet from south and 1,350 feet from west lines of section 109, block C, HE&WT survey. Ground elevation is 2,254 feet.

CROCKETT STEPOUT

Southland Royalty Co. of Midland spotted No. 1-36 Todd 1/2 mile northeast of proeuction in the Howard Dfraw (Grayburg-San Andres) field of Crockett County, 14 miles northwest of Ozona.

The 1,000-foot test is 660 feet from south and east lines of section 36, block WX, GC&SF survey. Drillsite elevation is 2,571 feet.

SCHLEICHER WELL

UV Industries, Inc., of Salt Lake City, Utah, No. 12 Mayer Ranch has been completed as the second well in the Mayer Ranch (Canyon gas) field of Schleicher County.

Three-quarters mile southwest of other production, it finaled for a calculted, absolute open flow potential of 2,800,000 cubic feet of gas per day, through perforations from 6,944 to 7,155 feet. The pay was fractured with 252,000 gallons.

Wellsite is 2,400 feet from northwest and 7,400 feet from the east lines of McMullen County School Land survey

It is 19 miles northwest of Sonora.

White House involved in technological export

By THOMAS O'TOOLE The Washington Post

WASHINGTON - The White House has decided to involve itself in the process that leads to approval or denial of technological export licenses to communist countries.

'This makes eminent sense to use and is something that is long overdue," said an aide to President Carter in explaining greater White House

> **ENERGY** OIL & GAS

involvement. "Too often, the White House got involved in these licenses after the alarm bells went off, when it was almost too late and a federal case was being made of it.'

The aide said he was referring to recent requests to export a Univac computer and Dresser Industries oil drilling equipment to the Soviet Union. The Univac license, which would have gone to the Soviet news agency Tass, was denied. The Dresser deal was approved.

The new White House role is spelled out in Presidential Review Memorandum 31, a summarized version of which is being circulated on Capitol Hill. The White House Office of Science and Technology Policy and the

Workover completes

Mobil Oil Corp. No. 1707 Pegaus SpraBERRY Unit has been potential in the Pegasus (Spraberry) pool of Upton County, 20 miles northwest of

A re-entry project, it finaled for a 24-hour pumping potential of 110 barrels of 34.88-graavity oil and 69 barrels of water, through perforations from 7,627 to 8,685 feet. Gas-oil ratio is

the pay section was acidized with 12,500 gallons and fractured with 151.-400 gallons.

Total depth is 10,389 feet in the Pennsylvanian and plugged back to 8,880 feet. The 5.5-inch liner is set at

Wellsite is 660 feet from south and 1,980 feet from east lines of section 36, block 41, T-4-S, T&P survey.

MENARD STRIKE

Terra Resources, Inc., No. 1 Clark-Pfluger (formerly Farmland Interna tional No. 1 Clark-Pfluger) has been completed as a Crosscut discovery in Menard County, 10 miles northwest of

Operator reported a calculated, absolugte open flow potential of 540,000 cubic feet of dry gas per day, through perforations from 2,521 to 2,530 feet. Completion was natural

Total depth is 2,824 feet and plugged back depth is 2,789 feet. Four and one-half-inch casing is cemented at 2,820 feet. The basal Gunsight was topped at

920 feet, the Canyon lime at 2,023 feet, the Crosscut sand at 2,510 feet, the Harkey at 2,653 feet and the Morris at

Location is 467 feet fromnorth and 2,106 feet fom east lines of section 7,

It is 67 feet east of Turner & Wheat and others No. 1 Clark-Pfluger, opener of the Menard, North (Strawn 2,-775) field.

nine miles north of Old Glory, td 6,139 feet.

National Security Council will act as "observers" in all export license requests by communist nations involving technology.

The memorandum points out that the communist bloc will continue to be treated unequally. Poland and Romania will get "more favorable" treatment and Hungary will be the recipient of "favorable discrimination," setting them apart fom the Soviet Union, Bulgaria, East Germany and Czechoslovokia.

On the other hand, PRM 31 calls for "an evenhanded policy with regard to

transfers of technnology to the Peoples Republic of China and the Soviet

Most of the requests for technological export licenses come from the Soviet Union, the White House aide said. Most are approved. Since the Dresser deal was approved by President Carter on Sept. 4, the aide said, "almost 50 lincenses have come up for approval" involving the sale of oil technology to the Soviet Union.

'They've all been much smaller than the Dresser deal," the aide said, "and they've all been approved."

Outposts, offset tester spotted in New Mexico

Outposts and offsets have been staked in Eddy, Lea and Roosevelt

counties in New Mexico. Hondo Oil & Gas Co. of Midland No. 1-O-CB State is to be drilled as an 11,300-foot operation in Eddy County 3/4 mile west of production in the

Winchester (Morrow) field. The drillsite is 660 feet from south and 1,980 feet from east lines of section 29-19s-28e and 15 miles north of Carlsbad.

It also is 1/2 mile south of production in the Millman, South (Morrow)

The drilling permit application re-

quested the project be in the Winches-Hondo Drilling Co. has the con-

CHAMPLIN TEST Champlin Petroleum Co. of Mid-

land No. 1-P O. J. Dowling has been staked as a northeast offset to production in the north side of the Carlsbad, East (Morrow) field.

Scheduled for a 12,000-foot bottom, it is 660 feet from south and 990 feet from east lines of section 26-21s-27e and six miles northeast of Carlsbad.

DEEP LEA TRY Continental Oil Co. will drill a 15,-900-foot project in the Brinninstool (Morrow) area of Lea County, 26

miles northwest of Jal. The project is one and one-half miles southwest of production and 1,980 feet from north and east lines of section 30-23s-33e. It will be operated as No. 1 Brinninstool.

ROOSEVELT AREA

Phillips Petroleum Co. announced location for an 8,000-foot project in Roosevelt County, nine miles south-

east of Elida. It is one location east of Fusselman production in the Peterson, South area and 2,055 feet from south and 1,980 feet fom east lines of section

Cotton

NEW YORK (AP) — Cotton futures No.2 were lower in midday dealings today.

The average price for strict low middling 11-16 inch spot cotton advanced 69 points to 65.93 cents a pound Wednesday for the ten leading markets, according to the New York Cotton Exchange.

Midday afternoon prices were 25 cents to \$1.10 a bale lower than the previous close. Dec 69.28, Mar 71.95, and May 73.20.

Carter's standards to continue inflation

NEW YORK (AP) - All Americans must make sacrifices, President Carter said Tuesday night, but some people will say he is doing whatever he can to avoid the sacrifices that austerity implies.

He shuns mandatory controls. He continues to abide a huge and inflationary budget deficit. He seems inclined to sign a tax cut. He tried soft persuasion before reluctantly accepting firm stan-

And the standards, on reflection, are likely to be considered less than harsh by both business and labor. They are in fact designed to continue inflation, although with a gradual lessening in severity. While the president referred to sacrifices, and said

'We must face a time of national austerity," his new wage-price standards give him away. He seeks a less painful remedy. Recession as a remedy is out. Critics, however, feel that despite his policy of tolerating moderate inflation as the price of avoiding

recession, the president might get both. And that he might also be forced into mandatory controls Economists generally foresee higher prices and lowered output in 1979, disagreeing mainly in degree. Inflation forecasts range from 6 percent to 9 percent, and output changes from below zero to plus 3.5

All such forecasts were made before the president's request for limitations of 7 percent on wages and 5.75 percent on prices, which he said could reduce inflation to 6 percent or 6.5 percent next

However, over the past year or more the administration has been notably more optimistic than nongovernment economists. It expected the 1978 inflation rate to be just over 6 percent. It may exceed

8 percent. Throughout the inflation siege, individuals have tried various survival tactics, few of them success-

ful. Pay raises, for example, were exceeded by higher prices, and real income therefore declined. Others went deeply into debt, not just for luxuries but for basics too. Obligations to repay installment credit now take between 15 percent and 16 percent of

disposable personal income, a record. The president's call for sacrifices, therefore, may have served merely to validate what many Americans already know is necessary, and which already

they have been practicing for many months. Business and financial leaders especially, but consumer and voter groups too, have been telling Washington that sacrifice began there, and that federal spending, a primary cause of inflation, had to

The president has recognized that demand, promising to cut the fiscal 1979 deficit to \$40 billion, but even in advance of his address many economists maintain it isn't enough, and blame it for inflation.

"Balance it now, not later," one former adviser commented, saying it was discouraging to see the president pointing his finger at others and not dealing more forcefully with the issue of the deficit.

But the president disagrees with that approach, which he believes could drop the country into a severe recession.

Quadruplet goes home

ST. LOUIS (AP) - The fourth Schwebach quadruplet, 15-week-old Bradley Francis, was home Thursday, after being released from Cardinal Glennon Memorial Hospital for Children.

Bradley, who weighs 4 pounds, 12 ounces, joined his three sisters on Wednesday. The girls, Jill Courtney, Laura Elizabeth and Angela Marie, were released from the hospital about a month ago.

The quadruplets were born three months prematurely on July 12 to Mr. and Mrs. Lynn Schwebach of Chesterfield, Mo.

Linda Schwebach said the couple's fifth child, 22-month-old Melissa, will go to Cardinal Glennon Tuesday for removal of a body cast she has worn to correct a hip problem.

"Pretty soon my life's going to get back to normal," Mrs. Schwebach said.

Mrs. Schwebach, who had taken fertility drugs, said the family plans to go home at Christmas to Dell Rapids, S.D., weather and pediatricians permit-
