Some Mennonite immigrants may get jobs in Basin

By PATSY GORDON Staff Writer

SEMINOLE - Though today is the deadline set for 550 Mennonites living southwest of here to obtain permanent resident status or be deported, it's beginning to look like they may be able to stay in the U.S., after all.

But they probably will lose the land they purchased but cannot make the payment due Feb. 15.

Clark has been working with the **Industrial Development Department** of the Odessa Chamber of Commerce to help the Mennonites find jobs that would allow them to receive certification through the U.S. Labor Department.

He said a meeting could be held "later this week with industrialists in Odessa," he said.

Clark, who stressed he is neither attorney for nor leader of the Mennonites, has been asked by the department to find out exactly how many and what kind of skilled laborers are available among the Mennonites.

He feels it is "an encouraging bit of news" that U.S. Senator Lloyd Bentsen has intervened on behalf of the Mennonites.

Bentsen announced Wednesday he will act to prevent the deportation of the immigrants from Canada and Mexico.

BENTSEN ADVISED Commission-

er Leonel Castillo of the U.S. Immigration and Naturalization Service of his intention to introduce legislation granting permanent resident status to

members of the community. In the last Congress, Bentsen cosponsored similar legislation with former Sen. James Eastland (D-Miss.) The legislation died when the present Congress adjourned and, unless a new bill is introduced, INS has indicated that it will move to deport the Mennonites.

The INS does not take action in situations such as this when legislation is pending.

"My effort is to seek remedy for those covered under the original legislation who still desire permanent resident status," Bentsen said in a letter to Castillo.

"I would appreciate your assistance in surveying and identifying those individuals and families affected by this action. Additionally, I solicit your aid in delaying any voluntary departure or deportation proceedings against any member of this group until the list is made available to me," Bentsen said.

THE EXTENSION was requested to allow time for the Mennonites to find a solution to the problem of obtaining legal status through skilled occupations.

Though a wire service story Wednesday said "all but 10 or 12 of the 125 family heads and single adults had located jobs by Tuesday night," Peter Bergen, president of the Old **Colony Mennonite Church's corporate** board, said Wednesday night the report was not true.

"That doesn't make sense. Seminole doesn't have that many skilled jobs available. The jobs they do have" would not meet the labor department's rules, said Bergen.

To qualify, wages from the jobs the Mennonites find must meet U.S. minimum wage standards, laws and the employment must be something for which American citizens either aren't available to do or won't do.

Bergen, who is the only legal resident among the immigrants, said he lost his life savings of \$75,000 in the move from Canada.

But he managed to obtain legal status for himself by investing \$40,000 in his property, one way to do so under immigration laws, after seeing the trouble his people had in obtaining permanent status.

HE CAME AFTER the rest of the group because he stayed to fulfill his contract with a tobacco company.

He said he feels good and glad about Bentsen's intervention. "I hope next year will be a better year.

"I hope my people will not rely on the Seminole people and will take

U.S. considers gas sales ban

WASHINGTON (AP) - Government officials, faced with continuing shortages of Iranian crude oil, are considering a ban on Sunday gasoline sales and a variety of other measures reminiscent of the 1973-74 Arab oil embargo

Energy Secretary James R. Schlesinger said Wednesday the Carter administration will decide by April 1 whether to impose mandatory con-servation measures. But he said such actions would not be needed if the public voluntarily saves fuel.

Among the mandatory measures that might be taken are allocating. gasoline from refineries to distributors and suspending evening and Sunday sales, government officials said.

Also under consideration is limiting motorists' purchases to alternate days.

Direct rationing has been ruled out, officials said.

So far, Schlesinger said, "the position of the U.S. has not been dramatically affected" by the upheaval in

at least several weeks. It would take six months for the country's production to return to acceptable levels.

In a related development, Exxon Corp. announced Wednesday it is reducing supplies of crude oil to customers by 10 percent. And Standard Oil Co, of California asked the Energy Department for permission to limit, to last year's level, the amount of Chevron gasoline it sells to dealers. Both companies attributed their action primarily to the situation in Iran.

Last week, Texaco said it would hold its supplies this month to 1978 levels.

On the possibility of mandatory conservation measures, B. Jack Werre, a spokesman for Chevron U.S.A. Inc., said, "As of right now, we don't see it." If the company is permitted to limit its allocation levels, independent retailers will have to decide what measures to take to deal with the reduced supplies, he said.

Tom Walker, a spokesman for Gulf

Teng Hsiao-ping and Vice President Walter Mondale, right, toast during a Washington

Advisor Zbigniew Brzezinski, right, and Secretary of State Cyrus Vance, center, join in.

Teng departs for tour of U.S.

Vice Premier Teng Hsiao-ping began his tour of American business and technical facilities today, arriving on a frigid day for a visit to an automobile plant and a luncheon with businessmen.

En route, spokesmen for the Chinese and American governments issued a joint press communique in which the countries "reaffirmed that they are opposed to efforts by any country or group of countries to establish hegemony or domination over others.

The communique called the talks between Teng and President Carter 'cordial, constructive and fruitful." He noted that he had been told that

MARIETTA, Ga. (AP) — Chinese "Atlanta is a garden city where flow-rice Premier Teng Hsiao-ping began ers are in bloom everywhere." But with temperatures hovering around 20 and a stiff wind, no spring flowers. were in evidence.

> Teng said in his prepared statement that Atlanta "is a major commercial and communications center in the South. The speed of its economic development and its achievements in urban construction are well known I am sure that we will learn a lot from you.

> Teng left Washington after three days of high diplomacy to see another side of America. His departure was muted but proper. Secretary of State Cyrus R. Vance rode with the Chinese vice premier from his guest quarters at Blair House to a presidential helicopter waiting on the Mall between the Washington Monument and the Lincoln Memorial.

The communique issued by the United States and China noted the two sides' "differing perspectives" on some international areas. But it repeated the language often used by the Chinese to indicate mistrust of, and opposition to, the Soviet Union. The two countries "reaffirmed that they are opposed to efforts by any country or group of countires to establish hegemony or domination over others."

That was the same language as was used in the communique issued when establishment of diplomatic relations was announced on Dec. 15.

Chinese diplomats made strong efforts in recent years to get other countries to issue statements or sign treaties containing clauses opposing hegemony," which is the word they always use to describe what they see as Soviet expansionism.

Teng's Atlanta visit marked the start of a cross-country tour as central to the Chinese leader's state visit

> **Related** stories and photo, Page 12A

as his talks with Carter and key members of Congress.

There will be a bit of barbecue in Texas on Saturday, but Teng won't be spending a lot of time with the ordinary people the Communist leader would call the proletariat.

Instead, he will be seeing captains of industry, space officials and newspaper publishers on his trip to Atlanta, Houston and Seattle

He will tour plants that turn out Ford autos, oil-drilling equipment and jumbo jetliners before leaving for home Monday morning.

He will be sizing up American assembly lines for adaptation to Chinese needs. And he and his aides will be arranging the guidelines of business deals worth millions of dollars.

"The Chinese intend to pay for everything they buy," said a U.S. official. Two-way trade - at a record \$1

of the United States, including a visit to

Houston. (AP Laserphoto)

billion in 1978 - is expected to spurt to an estimated \$1.6 billion and perhaps even beyond as a result of Teng's tour, say U.S. officials.

Among Teng's scheduled luncheon guests in Atlanta were Henry Ford II, chairman of the Ford Motor Co., and J. Paul Austin, chairman of the Coca-Cola Co., which has just acquired at least a temporary monopoly on softdrink sales in China.

In advance of Teng's arrival in Atlanta, Meldrim Thomson Jr., national chairman of The Conservative Caucus, called for a boycott of Coca-Cola products. Thomson, a former governor of New Hampshire, was joined by Rep. Larry McDonald, D-Ga., and about 15 other persons in a demonstration in front of Coca-Cola's international headquarters.

Thomson said of Coca-Cola, "For patriotic Americans, this drink should in the future be known as Teng's soda, and avoided as good Christians would shun moral poison.

Coca-Cola spokesman John White refused to comment on the allegation.

Teng was certain to run into other demonstrations along the way, from supporters of Taiwan as well as Communists who find him too undoctrinaire for their tastes.

Iran that forced the shah to leave that country. The virtual shutoff of oil exports from Iran "is just beginning to bind now," he said.

The United States normally gets about 5 percent of its crude oil from Iran.

Other oil producing countries, most notably Saudi Arabia, have made up for much of the Iranian loss. But there have been reports the Saudis would produce an average of only 9.5 million barrels a day in the first four months of 1979. The normal daily average is nearly 10.5 million barrels.

Schlesinger said he had seen nothing from Iran that would indicate a return to normality is imminent.

The most optimistic estimates say production in Iran will not resume for Oil Corp., said most of the company' stations are independent. "We can't < say, 'You've got to close your station at six o'clock.' The government, on the other hand, can say that. Hopefully, we won't get to that. We're hoping the (Iranian) situation can resolve itself."

"I have been saying this would happen for a long time," said John P. Morgan Jr., vice president of the Greater Washington-Maryland Service Station Association. "I know we could conserve gas use as a nation. We did that type of conserving with the meat situation and coffee scare." He said some Shell Oil Co. dealers in his area had to close for a week last month until they received their February supplies.

Plans revived for prison in South or West Texas

AUSTIN - Plans to build a new state prison farm in South or West Texas have been revived with Wednesday's tentative approval of legislation that would allow the Texas Department of Corrections to sell or exchange land it owns in Fort Bend County for property elsewhere in the state.

The Senate State Affairs Committee passed Senate Bill 245, sending it to the entire Senate for a vote.

The legislation, sponsored by committee chairman Bill Moore of Bryan, would remove legal obstacles to the sale or exchange of the TDC's valuable Blue Ridge Farm land for a new prison site.

A similar proposal introduced during last year's special session hit a snag when former Attorney General John Hill ruled a 1955 law prohibited acquisition of the land if it was outside a 75-mile radius of Huntsville.

But the new legislation strikes that requirement, along with a provision requiring an approval board composed of the governor, land office commissioner and chairman of the Texas Board of Corrections to have secured an option on a replacement for the property before it actually is exchanged.

Moore said prison officials are trying to locate the new property in South or West Texas, where the long growing season would be ideal to support vegetable farming for the prison system.

But Charles Sullivan, executive director of prison reform lobby CURE (Citizens United for the Rehabilitation of Errants), said the TDC should buy the Harris County Rehabilitation Center and use it for work-release programs, instead of acquiring more farm property.

'That's not the question here," Moore countered.

"They want a place to grow vegetables, not warehouse prisoners."

Area officials favor regional pathologist

By MARK VOGLER Staff Writer

While officials in most area counties are concerned about a shortage of doctors these days, prosecutors throughout the Permian Basin share their own medical problem - they can't always find willing and able pathologists to conduct autopsies.

In most cases, it boils down to a matter of inconvenience. Time and money may be wasted for lack of someone available to do an autopsy on an immediate basis.

Prosecutors may have to go to outof-town pathologists if there aren't any available locally.

gets done later "an a district attor-

ney would wish, it's not particularly crucial to the average criminal investigation.

But there are cases in which a forensic pathologist is needed to dispel any doubt about cause of death, a factor which could be used by a defense attorney defending a client charged in the death.

That is the nightmare which often confronts the prosecutor.

sic pathologist who would be available to the counties.

In the minds of Ector County law And though an autopsy occasionally enforcement officials, the "nightmare" did occur last year.

For several months, the commissioners court had pushed the concept of a regional pathologist, predicting that the day would come when a lack of one would catch Ector County in a bind.

IRONICALLY, ALMOST on the heels of the commissioners court debate, 27-year-old Larry Lozano died in Ector County Jail.

"The main, significant element in the Lozano case is that we didn't have a competent pathologist here," said Ector District Attorney John Green. "I think it was wrong for statements to be made early that the man committed suicide. But I do think that, had we had someone specially trained, the cause of death would

have been resolved in a matter of four zano case remains unresolved after a or five days. Not having one is what made the Lozano case get blown all out of proportion."

An Odessa pathologist, who was involved in a controversy over autopsies with the Ector County commissioners court, intially said that Lozano succumbed to a cerebral hemorrhage, apparently caused by a sharp blow to the back of the head.

Subsequently, a pathologist hired by the family concluded the cause of death was homicide. And the celebrated Houston pathologist, Dr. Joseph Jachimczyk, was called into the case by Green to conduct a third autopsy. Jachimczyk said the death was probably accidental.

Despite the three autopsies, the Lo-

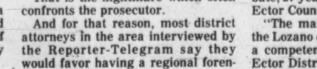

»year and is still under investigation by the U.S. Justice Department in Washington, D.C.

IT IS SITUATIONS like the Lozano case which cause most of the prosecutors to worry

Rick Hamby of Big Spring, who as district attorney represents Howard, Glasscock and Martin Counties, said he would feel much more comfortable if the region chose to retain a forensic pathologist.

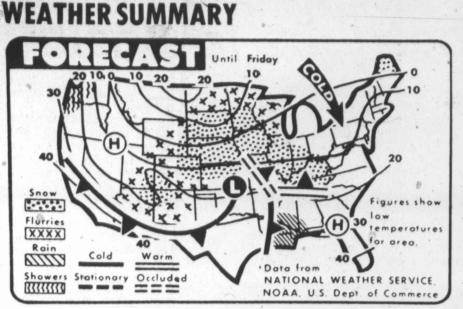

"I think it would be a great aid to prosecution from all angles. Nothing bad can be said about it," Hamby said

Iranians welcome Khomeini

THE MIDLAND REPORTER-TELEGRAM, THURS., FEB. 1, 1979

By ROBERT H. REID

TEHRAN, Iran (AP) - Ayatullah Ruhollah Khomeini returned home to a wildly enthusiastic welcome today and declared his revolution to overthrow Shah Mohammad Reza Pahlavi and install an Islamic republic will not be complete until U.S. influence is expelled from Iran.

Railing against "despotism and colonialism" that he said has perverted Irahian culture, the bearded, Shiite Moslem patriarch said the shah "has made the army follow the orders of another country," and his movement will be successful only "when the roots of colonialism are pulled out." He did not mention the United States by name, but there was no doubt what country he was talking about

Khomeini's chartered Air France jumbo jet from Paris circled three times and landed at 9 a.m. as a million jubilant followers lined the 11-mile route he took from the airport to the capital's largest cemetery. Some 50,000 "Islamic police" maintained order all along the route, and more than 100,000 supporters jammed the cemetery.

Shouts of "God is great" and "Welcome Khomeini" greeted the ayatullah, in exile for more than 14 years, as he rode through the throng in the back of a blue Mercedes. Occasionally, the chauffeur accelerated to force the car through the swarming crowd

Near Tehran University, where more than 40 persons have been killed in the past week in clashes between Khomeini's supporters and the army, a banner read: "When evil goes out, the angel comes in.

A selected crowd of 1,000 was admitted to the airport terminal to greet the 78-year-old religious leader. A crush of shoving, shouting mullahs, or Moslem priests; reporters and others mobbed him at the entrance to the réception lounge; one mullah tried to climb over the backs of reporters, and other mullahs shouted for quiet and chanted from the Koran, the Moslem holy book, to restore order.

"We are succeeding, but this is only the first stage," Khomeini told the welcoming crowd in a loud, firm voice.

He accused forces he did not identify of trying to restore the shah to ditch power but declared: "The imperialist shah regime is all in the past and cannot be brought back again. Our success is the result of the unity of all the people in this country. They all follow one word (Islam) and even the religious minorities are united with Islam."

"They say it never rains in Southern California," a once-popular song says - but it does snow. By way of proof, this row of icicles decorates a through on Tuesday. (AP Laserphoto)

Rare snowfall, tornadoes stun California residents

LOS ANGELES (AP) - Rain, tor-

nadoes and golf ball-size hail whipped and battered Southern California, damaging homes and businesses and paralyzing several communities, while a rare snowfall accumulation stunned residents of others.

Elsewhere, new snow has muffled at least a half-dozen states in the East and the West and bitterly cold temperatures were reported in the Northern Plains

In San Diego, where more than 21/2 inches of rain fell, dozens of persons were rescued from their flooded homes and stranded cars. Nearby National City recorded 4.82 inches of rain in a 24-hour period.

San Diego police were searching today for a man who was swept away by floodwaters Wednesday as he attempted to clear a storm drain near his home. Mexican authorities said a Tijuana woman drowned when she fell into a rain-swollen drainage

Interstate 5, the main artery linking Northern and Southern California, was blocked by snow north of Los Angeles for the second straight day and avalanches were reported in the

trapping at least two people for hours Wednesday

Palm Springs was virtually isolated with roads hidden under as much as 2 feet of snow, the first snow to fall in five years and the first on the ground since 1949.

Hundreds who fled the bad weather lined up at Palm Springs Airport for tickets, but all flights were cancelled.

In Baja, telephone communications, power and roads were cut in several areas and a number of families were evacuated as heavy rains battered Baja California, Mexican officials say

conditions that have persisted for marck, N.D., and Sioux Falls, S.D., to many weeks in the Pacific Ocean, 61 at Key West, Fla.

Warmer weather in store for Basin, forecaster says

The Permian Basin should be in for ed.

few days, with daytime temperatures airport was 38 degrees. The record expected to reach into the 60s Friday, according to the National Weather Service at Midland Regional Airport. Partly cloudy skies are expected, with tonight's low to be in the middle 30s. Winds from the southwest, diminishing to 5 to 10 mph, are predict-

Extended forecasts Saturday through Monday

West Texas: Considerable cloudiness Saturday with a chance of snow north mixed with rain south plains and scattered showers extreme southwest. Decreasing cloudiness Sunday becoming partly cloudy and not as cold Monday. Highs 30s north to 40s and 50s south warming to 40s north and 50s and 60s south by Monday. Lows 5 to 15 north to mostly 20s south warming to teens north 20 and 30s south by Monday.

Highs near 50 north to near 70 extreme south. Lows lowe 20s north and mountains to upper 30s extreme west Highs Friday mid 40s north to lower 70s south. North Texas: Increasing cloudiness and warmer toda and tonight. Mostly cloudy and warmer Friday. Highs 39 to 45. Lows 27 to 34. High Friday 48 to 57.

South Texas: Increasing cloudiness east today, mostly cloudy rest of south Texas. Continued cool today-with a slight chance of light rain or drizzle mainly lower coast and Lower Rio Grande Valley. Mostly cloudy and not so cold tonight with a chance of light rain or drizzle mainly from the lower Valley and along the coast into the coastal plains. Decreasing cloudiness west, mostly cloudy east Friday with light rain or drizzle ending from the west. Highs 40s and 50s to 60s lower coast and Valley. Lows 30s and 40s to 50s lower coast and Valley. Highs Friday mostly 60s and 70s.

Port Arthur to Port O'Connor: East and northeast winds 10 to 15 knots today, east and southeast 15 to 20 knots tonight, south and southeast 15 to 25 knots Friday becoming north and northwest 20 to 25 knots and gusty late Friday afternoon or early evening. Seas 4 to 6 feet. Occasional rain or drizzle tonight and Friday, widely scattered thundershowers possible.

Port O'Connor to Brownsville: East and northeast winds 15 to 20 knots.today, east and southeast 15 to 25 knots tonight, south and southeast 15 to 25 knots and gusty Friday becoming north and northwest 15 to 25 knots and gusty late Friday afternoon or early evening. Seas 5 to 7 feet. Occasional light rain or drizzle through

The crowd surged forward shouting "Allah Akhbar!" (God is Great) as the ayatullah finished his statement, pushing him against a stairway, and aides had to shield him until the crush was pushed back.

The government television service showed about 20 minutes of Khomeini's arrival and then announced it was shutting down "because of technical difficulties." The station went off the air with a picture of the shah and the national anthem.

Aides told reporters aboard the Boeing jetliner that brought Khomeini home that he probably will announce a provisional government to replace Prime Minister Shahpour Bakhtiar and his cabinet in a few

Angeles National Forest.

A tornado caused \$1 million damage to two Universal City Studios movie sets depicting New York City

and a Chinatown "It looks like a war zone out here," said studio spokesman Peter Em-

mett. In Orange County, tornadoes accompanied by one-inch hailstones broke windows, lifted roofs off houses, overturned cars and tossed 300-pound trash bins about the streets.

Twisters that roared-through Anaheim and Santa Ana uprooted trees, flipped cars and caused damage to several businesses, police said.

A ranger at Huntington State Beach reported three-inch drifts of hail in some spots.

high temperature for Jan. 31 is 80 degrees set in 1963.

The overnight low was 20 degrees. The record low temperature for today is -1 degree set in 1951.

Most area towns reported partly cloudy and cold weather early today.

'Paying the piper' isn't always easy

SAN ANGELO (AP) - A San Angelo resident says he's running into frustration trying to pay for some clothes he purchased more than a half-century ago in Indianapolis.

Paul Miller said he purchased a suit on credit at "the Union Store" in Indianapolis in the early 1920s. But, Miller, who now lives in this West Texas town, said he was unexpectedly laid off his job about a week later and left without paying for the suit when he was unable to find work. Now, Miller wants to pay the debt. However, the store apparently went

out of business around 1930. Miller wrote to the Indiananapolis Better Business Bureau asking how he can pay what he feels is a legal debt.

"I was ashamed for not taking care of it (the debt) sooner," Miller is reported to have told the Indianapolis News in a telephone interview. I'd been ashamed of it all my life and I didn't know what to do about it.

I just got the urge to find out something to pay a just debt," he told the News.

Janet Atkinson, president of the Indianapolis BBB, said she wrote to Miller stating her office knew nothing about the store and does not know how he can pay off the debt.

"About the only thing he can do, if he really wants to go to the trouble is hunt down the former owners and make a payment to them if they're still alive," she said.

Mrs. Atkinson said the debt was probably written off many years ago and she doubts Miller has a legal obligation to pay.

Mennonites won't be able to make land payments

(Continued from Page 1A)

proper steps to have their papers by next year.'

Since Bergen has his papers, he will remain a farmer in Seminole. "I hope to buy more land in the Seminole area

His brother, Ben Bergen, is working in a Seminole gin as a maintenance man. He had to give up on farming because the land was not productive enough to make a lving.

Only five families remain on the land, now. Almost 200 Mennonite families pooled their savings to pay the \$425,000 down payment two years ago when they came to Seminole. Only 40 were willing to help when the first payment came due February 1978, Peter Bergen said.

Now he says there is no way the 1979 payment can be made before foreclosure.

OTHER MEMBERS of the community also will give up on their dream that failed and split the sect into pieces.

-Peter Bergen's brother-in-law is thinking of going to Brownfield or Odessa," where he has located employers "to sponsor him."

Peter Bergen is very thankful for the support given the Mennonites, both locally and nationwide. "The

news media helped a lot," he said. Dennis Nix, who said he didn't have the land up for sale until he was approached by the real estate agents, has "no objections to the Mennonites. gave them every opportunity in the world and extended the \$80,000 still due from last year for three years. It's just business."

The payment due Feb. 15 by the Mennonites amounts to about \$230,-

Nix, Clark said, is "a super nice man. It was strictly a business deal. which represented a major portion of the family's assets."

From a technical standpoint, a forensic pathologist would serve a prosecutor's needs much better and 'speak with a little more authority" in discussing matters such as powder burns, bullet trajectory and other

Pope's command of language, style impress Latin Americans

By RICHARD BOUDREAUX

BUENOS AIRES, Argentina (AP) - Pope John Paul II impressed Latin Americans with his magnetism, stamina, straightforward pastoral style and command of Spanish, and both conservatives and progressives found much to their liking in his pronouncements."

The pontiff's six-day visit to the Dominican Republic and Mexico "was like an earth tremor of faith in all Latin America," said Archbishop Emilio Tagle Covarrubias of Valparaiso, Chile. "We have heard very beautiful declarations, of great clarity and comprehension, in perfect Spanish. John Paul II is a true pastor."

The pope flew home to Italy Wednesday night, stopping for two hours after midnight to speak to a crowd of 10,000 that waited six hours for him in a stadium in Nassau, the capital of the Bahamas. As his plane flew over Cuba, he sent the customary greeting to President Fidel Castro, extending his "most fervent wishes for prosperity for this beloved nation whose noble virtues. I most sincerely appreciate."

Latin American religious leaders and commentators generally mea-

sured the pontiff by the content of his messages to the conference of Latin American bishops in Puebla, Mexico, in which he warned priests and nuns against political action, and to crowds of peasants and workers for whom he said the church should seek land for them to cultivate, more food, education and a fair return for their labors.

Newspaper headlines reflected the acceptance accorded the pope's message by both progressives and conservatives. On the same day in Caracas, Venezuela, the front-page headline in El Nacional, a liberal newspaper, said, "Pope John Paul II: the Church Supports the Cause of the Humble," while the conservative El Universal declared, "Pope says Christ was not a subversive or a revolutionary."

Monsignor Rene Paredes, a spokesman for the archdiocese in Lima, Peru, said the pope's personality and ideological middle ground made him "a symbol of unity for Latin America" after a decade of bitter struggle over the bishops' historic commitment to social activism made at their last conference in Medellin, Colombia. in 1968

Liberals said they were satisfied with the pontiff's endorsement of ef-

hunger, poverty and unfair land distribution. "His message is that the church must be the conscience of the people and criticize governments that don't

forts to end abuses of human rights,

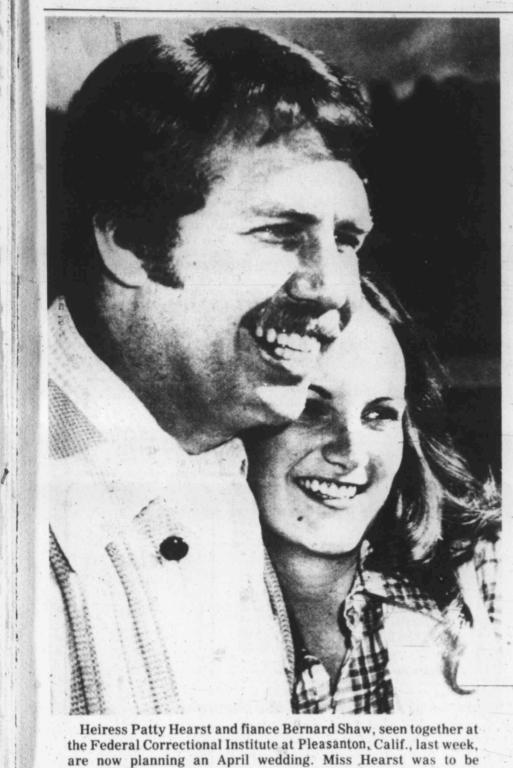

respect the people's basic needs and rights," said the Rev. Harvey Ballance of San Isidro, Argentina. 'There is nothing retrograde about this, because it is far more progressive than what the church is doing in Argentina."

But some liberals worried that the pope's rejection of Christ as a revolutionary and his vision of the Roman Catholic Church as an essentially spiritual, apolitical institution would inhibit Catholics from taking militant positions on social and political questions.

"The church has been a powerful force that military dictatorships have to reckon with," said a member of Argentina's disbanded Third World Priest movement, who asked not to be identified. "We fear that now many Latin American governments will invoke the pope's words at Puebla to justify supressing protests by Catholic groups.

Such sentiment has already surfaced in government newspapers in Chile, Argentina and Uruguay.

be a big plus. To me, the issue isn't so much as saving money as it is improving the tools of law enforcement in the whole area," Martin said. "There are just not many pathologists available. For the most part, Midland County is well served. But it would be good to have somebody who is specially trained. In the crucial

chemical plant on the Army's Redstone Arsenal property. The plant, closed and dismantled in 1970 for health reasons, had manufactured most of the world's supply of the pesticide since 1947.

The Army is just now beginning efforts to clean up more than 4,200 tons of DDT deposits on the property, TVA officials said. Brooks said removing them could cost as much as \$50 million.

The mayor charged that the cleanup would have begun earlier if Triana. residents were middle-class whites poor rural blacks nstead of

THE MIDLAND REPORTER-TELEGRAM. THURS., FEB. 1, 1979

Patty's five-year 'odyssey' ends

By JACK SCHREIBMAN

PLEASANTON, Calif. (AP) - A smilling Patricia Hearst walked out of prison into bright sunshine this morning, a free woman after a five-year odyssey of kidnap, crime and punishment.

Miss Hearst, holding her commutation papers high over her head, was met at the prison by attorney George Martinez and her fiance, police officer Bernard Shaw, while a strengthened security force patrolled the area and a California Highway Patrol helicopter hovered overhead.

As she walked through the entry area, she kissed Shaw on the left cheek.

"This is quite a difference from last time, and thank you all," she told reporters who gathered at the gates, apparently meaning the day she arrived at the prison last May. On that day about 100 reporters crowded around and she rushed into prison, refusing to talk.

Her release from the prison about 30 miles southeast of San Francisco across San Francisco Bay was televised locally.

"I want to thank my parents, my sisters and George and Bernie and all the people on the committee," Miss Hearst said, smiling broadly as the sun rose behind her. She was referring to a group formed to pressure President Carter to commute her sentence for bank robbery.

Shaw had been quoted Wednesday as saying his fiancee might wear a bulletproof vest when she left prison, but she did not, and Shaw said today he had been joking

She was dressed in pale blue slacks, a navy blue parka, brown leather platform shoes and wore a gold band on her left hand

In her left hand she carried what she called her "clemency blanket," a flowered afghan that she crocheted and embroidered while at Pleasanton, hoping to be released before she finished it. It was completed before Christmas of 1978.

At one point she paused, turned to her attorney's wife, Ingrid Martinez, and took from her a beige sheet of heavy paper which she waved in her left hand toward a crowd of about 150 reporters, saying, "There it is, the commutation!

Asked if she planned to do any writing, she said, "I'm going to have

She told reporters she was going on a trip, but would not say where or when. Then she climbed into the back seat of a station wagon between Martinez and Shaw and drove away. In front were two bodyguards and Mrs. Martinez

to.

"I'm going to have breakfast with my family and friends and I'm going to go there now," she said before her departure.

In Hillsborough, about 40 miles away, her parents, four sisters and friends planned a champagne brunch to celebrate to celebrate her homecoming.

The family's last reunion outside the prison was last May 15, when Miss Hearst was sent to Pleasanton after unsuccessful appeals of her bank robbery conviction.

Her release was three days before the fifth anniversary of her kidnapping by the Symbionese Liberation Army, and three days after President Carter commuted her seven-year sentence for joining the SLA in a San Francisco bank robbery

Miss Hearst, who marks her 25th birthday Feb. 20, served a total of 23 months behind bars.

William and Emily Harris are serving 10-year-to-life sentences for the kidnap. Under terms of their plea bargain, they are not eligible for release until 1983, after eight years in prison.

Harris, in a taped interview aired this morning on ABC-TV's Good Morning America, said he was not bitter about Miss Hearst's early release.

"There's no possible way I could feel bad that someone gets released from prison...no matter who it is," he said.

... I don't feel any bitterness about her getting out at all... and I'm sure she probably feels the same way, that it'd be nice if everyone would just stop focusing on it.

Martinez said she sent her personal belongings home Wednesday in three cardboard boxes.

Shaw said the couple would soon begin planning an April wedding that probably will take place in a chapel on a military base. He said the military base wedding was planned for security reasons.

Miss Hearst will remain under Justice Department supervision for one year - barred from possessing weapons, associating with known criminals or leaving the country without the attorney general's approval.

during a \$10,000 SLA bank robbery in San Francisco. .

Sought by the FBI, she went underground. Her flight ended with her arrest in San Francisco on Sept. 15, 1975.

She was convicted of armed robbery after a trial in which she told of being locked in a closet, raped and threatened. She took the Fifth Amendment 42 times

Appeals that reached the U.S. Supreme Court failed, and after eight months of freedom on \$1 million bail, she was returned to prison.

The TVA said it asked for a ban on nounced Wednesday that DDT found fishing in the area but the FDA, the **Environmental Protection Agency** in catfish taken from freezers of Triana residents was 50 times the and Alabama health officials have level the Food and Drug Administrabeen reluctant to issue such an order. Foster had asked for the new TVA

'We've gotten some criticism from Alabama officials and other federal agencies for bringing the problem to the public's attention," Brooks said. "Commercial fish distributors have blamed our report for hurting their business.

Instead of a ban, signs are posted along Huntsville Spring Branch, where the DDT was discharged, and Indian Creek, warning that eating the fish might be hazardous to health.

"If they put a ban on fishing, what are we going to eat?" asked Foster. He said residents are afraid to eat the fish, but have no choice.

Her release follows months of work by her family and others to win her freedom. She would have been eligible for parole in July.

Miss Hearst was a student at the University of California when she was abducted by the SLA on Feb. 4, 1974. Three days later, her parents received a tape saving she was a "prisoner of war."

Then the SLA told Miss Hearst's father, Randolph, president of the San Francisco Examiner, to provide \$70 worth of food for each needy California resident. The giveaway plan he came up with totaled \$2 million, but did not trigger his daughter's release.

In early April, Miss Hearst said in a recording that she had been offered freedom, but decided to "stay and fight." Days later, she was photographed

DEATHS Annie Beck Jack Cunningham

BIG SPRING — Services for Jack Cunningham, 72, of Big Spring were to be at 3:30 p.m. today in Nalley-Pickle Funeral Home here. Burial was to be in Trinity Memorial Park. Cunningham died Tuesday in a Big

Spring hospital. He was born Sept. 12, 1906, in Dekalb. He was married to Opel Randolph Nov. 2, 1924, in Dekalb. They moved to Big Spring in 1951. He was a carpenter and had retired in 1978.

Survivors include his wife; a daughter, Mona Shaver of Dallas; three brothers, Buster Cunningham of Dekalb, Johnny Cunningham of Odessa and Billy Crew Cunningham of Pasadena; a sister, Mrs. T.C. (Grace) Randolph of Lubbock, three grandchildren and two great-grandchildren.

Tom Spinks

KERMIT - Services for Tom G. Spinks, 73, of the Greenwood Community near Midland will be at 4 p.m. Friday in Cooper Funeral Home in. Kermit. Burial will be in Kermit Cemetery with Masonic graveside rites.

Spinks died Tuesday in an Odessa hospital.

He was born April 2, 1905, in Coolidge. He was a retired construction worker. He was a member of the Methodist Church and the Kermit Masonic Lodge No. 1258. He had lived in Greenwood five years, moving there from Kermit, where he had lived 38 years. He was married to Molly Thomson May 14, 1928, in Midland

Survivors include his wife; two sons, Thomas P. Spinks of San Angelo and Rick Spinks of Corpus Christi; two daughters, Neva J. Cooper of Midland and Martha K. Spinks of Lawton, Okla.; six brothers, George Spinks of Fort Worth, Gilbert Spinks of Odessa, Joe Spinks of Big Spring, Jay Spinks of Kermit, Jessie Spinks of Dallas and Guy Spinks of Stanton; five sisters, Almedia Gregg of Abilene, Nannie Hedrick of Stanton, Mozelle McClusky, Lou Hipps and Mildred Frazier, all of Midland, 13 grandchildren and seven greatgrandchildren.

Ida Henderson

Ida Viola Henderson, 94, of Fresno, Calif., died Tuesday in Fresno.

Services will be at 2 p.m. Saturday in Newnie W. Ellis Funeral Home with burial in Resthaven Memorial Park.

Mrs. Henderson was born Sept. 23, 1884, in Tennessee. She came to Texas with her family in 1889 and was raised in Maypearl. She was married to A.D. Henderson Sept. 19, 1903. He died in Midland in June 1960. She had lived in California for 25 years.

HOUSTON - Services for Annie Lee Beck, 77, of Houston, mother of H.V. Beck of Midland, were to be at 3 p.m. today in South Park Funeral Home with the Rev. M.T. Jenkins, pastor of the Broadway Temple Baptist Church, officiating. Burial was to be in South Memorial Park.

She died Sunday. She was born Jan. 18, 1902, in Nolan and had lived in San Angelo before moving to Houston.

Other survivors include three sons, two daughters, a brother, a sister, 13 grandchildren and three great-grandchildren

Roy Smith Sr.

IOWA PARK - Services for Roy Cecil Smith Sr., 65, of Holliday, brother of Ed Lawson of Stanton, were held Wednesday in First Baptist Church of Holliday with the Rev. Lloyd Riddles, pastor, officiating.

Burial was in Highland Cemetery here directed by Tanner-Aulds Funeral Home.

Smith died Monday in a Wichita Falls hospital.

He was born May 10, 1913, in Harrold and had lived in Holliday 24 years. He was a member of First Baptist Church. He was an oil field pumper for Feldman Oil Co.

Other survivors include his wife, four daughters, two sons, four brothers, seven grandchildren and a greatgrandchild.

Lela M. Swart

CISCO - Services for Lela M. Swart, 67, of Cisco, sister of Durett Slatton of Lamesa, were held Wednesday in First United Methodist Church here with the Rev. Jerden Davis, pastor, officiating, assisted by the Rev. Art Anderson of First United Methodist Church of Eastland

Burial was in in Oakwood Cemetery directed by Cisco Funeral Home.

Mrs. Swart died Monday.

She was born Feb. 14, 1911, in Scranton, near Cisco. She was a telephone operator 36 years before retiring in 1973. She was married to R.O. Swart in July 1950 in Ranger and had lived in Eastland County all her life. She was a member of First United Methodist Church.

Other survivors include her husband, a stepdaughter, two brothers, million Americans and four sisters, two grandchildren and a have direct medical great-grandchild. costs of \$17 biilion a great-grandchild.

Author speaks on 'windmill city'

J. Evetts Haley, who came to the housed in the Nita Stewart Haley "cowtown of Midland" with his parents as a small child in 1906, was the speaker Wednesday noon at the meeting of the Downtown Lions Club in the Midland Hilton. Haley, who now resides at Canyon,

is one of the West's best-known cowmen, authors, historians and educators. He was introduced by Lester Van Pelt Jr. Haley said the Midland of 1906 was

known as the "windmill city. He said he grew up among the old-

timers who settled this region, lauding then as great, courageous, dedicated pioneers who placed the foundation for a great city and region. "They rightly deserve to have their history recorded and preserved for

posterity," the speaker said. He recalled that life wasn't easy in those yesteryears, but that the pioneer men and women had the

spirit, faith and determination to move more troops survive the perils of that day and age. He said they were an inspiration to him as a lad growing up here.

Haley displayed a number of original books on the history of the cattle country, which are included inhis valuable collection which is

Memorial Library and the J. Evetts Haley History Center here. He established the library and history center here a few years ago. He said that historical books which have validity and substance always will advance in price with age, while those lacking those qualities soon will

be forgotten. He said he established the library and history center for the use of students of history and for the reading pleasure of the public. He invited the support of the public in both facilities. Haley told one story after another about early-day Midland ranchers and other residents, much to the delight of his audience. Some of his boyhood experiences also were recalled.

Haley described the importanceand power of the traditions of yesteryears as recorded in history.

"It is essential that we return to those traditions of independence. integrity and courage which made this country great," Haley concluded.

Cancer risk drops

BOSTON (AP) - The risk of uterine cancer is high while menopausal women take estrogen, but drops dramatically within six months of the time they stop taking the hormone, researchers report.

"In the face of the very high risk that long-term users run - about 1 to 3 percent per year - it should be very reassuring to learn that this risk can be reversed so quickly," said Dr. Hershel Jick, who directed a Boston University study.

The report showed middle-aged women who use estrogen are 20 times more likely than nonusers to develop cancer of the uterine lining. But six months after they stop using the drug, the risk declines to almost the same level as for non-users.

a report on the research was published in today's edition of the New England Journal of Medicine.

The researchers based their conclusions on an analysis of the health records of women between the ages of 50 and 64 who were enrolled in the Group Health Cooperative of Puget Sound in Seattle.

After the first reports were published in early 1976 linking estrogen with cancer, the number of women in the health program taking the drugs fell by two-thirds. The doctors found that six months later, the number of new cases of uterine cancer also declined by about twothirds.

How old are spices? A myth circulated by the Assyrians long before Christ claimed one spice predated the world itself. It was said the ancient Gods were quaffing sesame seed wine at a gathering when they decided to create the earth.

Archeologists say the traffic in spices dates back to before recorded history. They estimate that by 50,000 B.C., primitive man had discovered aromatic plants that made his food taste better.

As far as we know, spices were first exploited for profit in the Orient. Along the ancient trade routes went caravans of thousands of camels bearing these "jewels of the tongue." So sought-after were spices that they touched off more than one war. Columbus discovered the New World during a search for the Spice Islands.

For centuries, the Arabs controlled the spice trade, enriching the merchants of Venice. But they carefully withheld any clues as to the source of these precious seasonings.

Whether they came by land or sea, most of the spice caravans passed through Cairo, Egypt. From there spices were shipped to Alexandria, where they were bought by Venetians and Genoese and shipped to Europe.

Since they controlled the spice trade, the Arabs also controlled the prices, and they made the Western world pay dearly. During the Middle Ages, a pound of ginger was worth a sheep and cloves cost the equivalent of \$20 a pound. In view of the role the Arabs and Asians played in the history of spice, it seems fitting that a flavorful chicken dish enjoyed today should be seasoned with turmeric from India and sesame seeds which originated in the East Indies.

Here's the recipe.

1 small onion, minced

clove garlic, minced

1 tablespoon salad oil

3-pound chicken, cut into eighths

1 can (16 ounces) chick

peas

1 tomato, diced

1 tablespoon lemon ju ice

1 teaspoon salt

1/2 teaspoon ground furmeric

1/4 teaspoon black pepper

1 tablespoon sesam e seeds

In large skillet heat oil. Add chicken, a few pieces at a time, brown about 5 minutes each side, and remove from skillet. Add onion and garlic to skillet, sa ute 2 minutes. Stir in chick peas, tornato, lemon juice, salt, turmeric, black pepper and the chicken. Bring to boiling point. Reduce heat and sim mer 45 minutes till chicken is fork-tender, stirring occasionally. Serve, sprinkled with sesame seeds. Good with chilled rose wine.

Year of the Rose to be symbolic of love, peace, and friendship

By EARL ARONSON **AP** Newsfeatures

This is 1979, the Year of the Rose, for millions of Americans who love roses, and especially for Joseph and Diane Ferrelli of Winston-Salem, N.C.

Come spring in North Carolina, two yellow rose bushes will arrive at the Ferrelli home to be planted in memory of their lovely daughter, Allegra, whose love of roses became known to her parents only a few days before she died.

Joseph Ferrelli Jr. read about the Year of the Rose in our Weeders Guide column and wrote to us:

It has been exactly two years now that I have had an interest in roses, particularly yellow roses.

"On the morning of Nov. 5, 1976, our 14-year-old daughter, a gold-medal swimmer and a high-school cheerleader, was stricken with an arterial venous malformation. She lapsed into a coma within four minutes and died eight days later.

"She had been hospitalized for four days, before we discovered, through the mother of one of her friends, that our daughter's favorite flower was the yellow rose. As close as we were with our daughter, we never knew of her love for roses until she could no longer hear or speak to us.

Since her death, the yellow rose has crept (or bloomed) in our lives countless times - from a single rose on an only bush I had planted in my daughter's memory - to a total stranger handing my wife a longstemmed yellov/ rose on the streets of Rome, Italy, on New Year's Eve.

"May the 'Year of the Rose' be a huge success, and as comforting to others as it has been to us."

The Year of the Rose, dedicated to Love-Friendship-Peace, is sponsored by the nation's leading horticultural, florist, nursery, garden and rose and landscape groups. When we told George Rose of the All-America Rose Selections about the Ferrellis he immediately contacted rose growers and hybridists Ollie and Verona Weeks of Ontario, Calif., who promptly offered to supply two yellow rose bushes

BV ABIGAIL VAN BUREN

DEAR ABBY: MISERABLE IN OHIO was miserable with good reason. He had struck a 12-yearold boy on a bicycle and wrote to express his anguish as he waited six hours for the lad to come out of surgery

DEAR ABBY

He said: "I wasn't going very fast, but it was night and the poor kid was wearing dark clothes and there wasn't a light anywhere on his bike. I didn't even see him until I hit him. I was told that his chances for survival were slim. You can't help me-or the boybut if you print this, maybe parents will see it and make sure their kids have the proper lights on their bikes so accidents like this can be avoided.

Abby, you are to be commended for printing that letter, but I submit this as a follow up:

"Dear Miserable:

Since your letter appeared in my column last October, hundreds more pedestrians and bicyclists have been struck and killed or injured by motoristsmostly at night because the drivers couldn't see them in time to stop.

This is senseless and needless because there are many reflective materials on the market today to make people more visible at night.

Sew-on trim for clothing, or entire garments made of fabric that glows in the dark are available at many retail stores. If you can't find them where you shop, ask for them. Insistent consumer demand can help make this life-saving feature easily available to all who need it .- J.K.G. in St. Paul

DEAR J. K. G.: Thanks for an illuminating letter. DEAR ABBY: I went shopping for a dress but

couldn't find anything I wanted to buy. I told my friend about it, and she said, "Oh, when

you get our age, nobody looks at you or cares how you look anyway.

Abby, is that the way most people feel about us old folks? We are both in our 70s, but I always notice how people are dressed regardless of how old they are.

Maybe I'm just an old fool to feel as I do, and should quit caring how I look. I'd like your opinion .--GRACE

DEAR GRACE: Your friend can speak only for herself. She certainly doesn't speak for any of the older folks I know.

HOROSCOPE

By CARROLL RIGHTER

(Fri., Feb. 2) GENERAL TENDENCIES: A day and evening for you to enjoy yourself at recreations that you have recently become acquainted with. Personal worries can be removed by clear thinking and positive action.

ARIES (Mar. 21 to Apr. 19) The planets are favorable for some new beginning that will bring much better conditions around you. Keep active for best results.

TAURUS (Apr. 20 to May 20) Use your intuition if unexpected problems come up today. Maintain a cheerful manner in your dealings. with others

GEMINI (May 21 to June 21) Contact good allies and plan to have more accord and success in the future. Work and play at a measured pace for best results.

MOON CHILDREN (June 22 to July 21) Be sure to handle a monetary matter early in the day so you will have time for recreation later

LEO (July 22 to Aug. 21) You are eager to advance in your line of endeavor, and can do so, if you put on your thinking cap. Think constructively

VIRGO (Aug. 22 to Sept. 22) Make sure you carry through with promises you have made and gain the goodwill of others. Be more frugal

LIBRA (Sept. 23 to Oct. 22) Others could be quite demanding now and so could you, but this leads to more activity, which is good. Strive for happiness. SCORPIO (Oct. 23 to Nov. 21) You have to get an early start if you

want to complete all those tasks ahead of you. Take treatments to ild up your vitality

SAGITTARIUS (Nov. 22 to Dec. 21) Delve into work that must be one early in the day so you will have time for recreation later.

Show others you have wisdom. CAPRICORN (Dec. 22 to Jan. 20) Make better arrangements at home with family members and have greater harmony there. Make plans for the future.

AQUARIUS (Jan. 21 to Feb. 19) Personal worries can be removed now by clear thinking and positive action. Follow your hunches which are accurate now.

PISCES (Feb. 20 to Mar. 20) Try to help less fortunate persons in their needs and show that you are a humanitarian. Use extreme care in motion.

Treasury Bonds

By JOHN CUNNIFF AP Business Analyst

NEW YORK (AP) - The most effective way to produce jobs is to invent them, said the gentleman. He wasn't being superficial. Jobs can be invented, he said. Productive jobs, not federal make-work projects

Such as the electric light bulb which, he noted, developed into an industry that since 1879 has provided work for scores of millions of people in dozens of industries relying upon electric power.

Or the airplane, which gave rise to millions of jobs in engineering, construction, piloting, traffic control, maintenance and the like, or the analytical engine, which developed into today's digital computer.

With nagging unemployment and nagging productivity growth two of the country's biggest problems, invention will be acclaimed, celebrated and honored this year in dozens of pageants, fairs, exhibits and the like.

President Carter proclaimed Edison's birthday, Feb. 11 (1847), as National Inventors' Day. Fort Myers, Fla., his winter home, began a two-week pageant today. Centennial of Light events, recalling the light bulb's invention on Oct. 21, 1879, are scheduled throughout the year.

It's as if to invoke the spirit of the Edisons, Wrights, Bells, Fords, Marconis (radio-telegraph), Goddards (rocketry) and other productive tinkerers who launched the industrial world of the 20th century.

The question on many a mind, however, is whether ceremony is enough. Sociologists claim the spirit is gone, conquered by big business and big government. Critics of education say it too stifles curiosity.

You'll get an argument on such claims. In the past three decades or so, you are reminded, we've split the atom, broke the sound barrier, conquered polio, explored space, developed instant photography, perfected the computer, made TV a household fixture. What's different today, say scientists, is that invention is often so complex and costly it may require the efforts of many individuals, disciplines, and laboratories - as well as business and government.

' Jim Cook, president of the Thomas Alva Edison Foundation, Southfield, Mich., isn't so sure. He feels that our attitudes toward education, formal and in the home, do indeed tend to discourage investigation.

"The first thing a kid learns is that the best way to get spanked is to investigate," said Cook, a pscyhologist and former General Motors researcher. "It gets him into trouble. He receives a subtle message.

Later, in school, Cook feels some science teachers promote a mystique about their discipline. They deliver another message: physics and chemistry are difficult. Most kids believe they are, he states.

What should be fun, what should arouse the youngster's curiosity, he suggests, is presented as something sterile and difficult. "There's no reason why it shouldn't be fun," he says. "Science is human."

In Cook's view, we should seek to have children experiment for themselves, even if it sometimes neans taking rísks, even if it means breaking

something. Edison did too.

Cook feels also that, the tax structure being what it is, the incentive to invent and develop a product might not be what it was. But he seems to concentrate on the negative educational approach. "I am alarmed, and I hope all of you are," he said in a recent address, "that in over half of this

country's schools not even a basic course in physics is offered."

think?-E.T

early teens.

year-old daughter wears her high- a teen-ager who smokes. They want heeled shoes, she seems to be walking on stilts. I can't believe that this isn't harmful. Am I concerned about a problem that doesn't exist?-Mrs. RK

Dear Dr. Solomon: When my 17- smokes, my father smokes, and I am me to give it up. I said it is worse for

them than it is for me. What do you

Dear E.T.: It is bad for men,

women and teen-agers. Almost a

million teen-agers take up smoking

every year. Friends are a big in-

fluence on teen-agers. But so are

parents. Among teen-agers who

smoke, the highest percentage have

parents who smoke, too. Girls tend to

follow their mother's smoking

behavior and disregard their father's.

The percentage of teen-age girls who

smoke is now almost as high as boys.

The sharpest increases are in the

Smoking rates for both men and

women began to drop in the late 1960s

and early 1970s. But almost every

study shows that women smokers find

One of the fears of women is that

they will gain weight if they quit

smoking. But gaining weight is not

inevitable with quitting smoking.

There is no overall correlation bet-

it harder to quit than men do.

Dear Mrs. R.L.: Unfortunately, there is reason to be concerned. Dr. Vert Mooney, professor and chairman of orthopedic surgery at The University of Texas Southwestern Medical School, says that the incidence of foot problems increases with the height of women's heels. He notes that women undergo 40 times more bunion surgery than men as a result of the irrational shoes they wear, and points out that foot surgery can never make feet normal again The emphasis should be on preventing foot problems, but current narrowtoed high-heeled fashions seem to disregard the human anatomy.

Every time a woman wearing high heels takes a step, her weight is shifted onto the ball of her foot. If the shoes are worn for long periods of time, bones and soft tissues may bend, resulting in deformities.

One of the more common and most painful foot disorders is Morton's neuroma, an abnormal growth of the noclule of nerves lying between the toe bones. When the bones are crushed together by tight shoes, the nodule may become irritable and swollen, thus producing pain. High heels may also be a source of pain in the ankles. knees and back.

The moral is: Woman should use their heads when it comes to their

Dear Dr. Solomon: My mother

ween the two. In fact, in a national survey, one out of four ex-smokers actually lost weight. Smoking is a double hazard for women-for them and for any children they bear. Cigarette smoke in the mother's bloodstream alters the heart rate, blood pressure, oxygen supply and acid balance of the unborn

infant. A pregnant woman who smokes two packs a day blocks off the equivalent of 40 percent of the oxygen supply to the fetus. Pregnant women who smoke have more stillbirths, spontaneous abortions and low-weight

babies than do nonsmoking mothers.

No. 2 C.R. rumor was if the train was late, the Lopez, 990 feet from railroad paid customers one dollar for east lines of section 18, north and 2,283 feet from each minute it was overdue," he

Davis had his first model set at age 8, began collecting in earnest in 1948, and things picked up steam from there. The train collection grew to the thousand or more, which now line the walls of a room at his home here.

Along the way, Davis and 54 other charter members founded the Train Collectors Association, which now lists 11,000 members.

Although he concentrates on American trains, his collection includes models from India, Spain, France, Italy, Switzerland and Germany. He lost out on one train shipped from Italy when it went down with the ill-fated ocean liner Andrea Dorea. Davis is disenchanted with modern American passenger trains.

"It's almost revolting to have to ride on a train in this country," he says. "It's pitiful. Such beautiful trains in other parts of the world and ours stink, They're dirty and the food is awful."

His heart belongs to another era, when steam drove great locomotives and their whistles haunted the night. "Young people will never know the romance of the old steam engine," he says.

THE MIDLAND REPORTER-TELEGRAM, THURS., FEB. 1, 1979

Pacesetting year predicted for oil

HOUSTON — A pacesetting year for the oil industry can be expected according to World Oil's 1979 appraisal of drilling activity in the United States.

Some all-time high records were set during the 1978 U.S. drilling season.

The Houston-based publication expectes 1979 to establish some new highs in activity, despite some mitigating factors that have reduced the active rig count in recent months.

World Oil's forecast this year is for the drilling of 52,288 wells and 256.1 million feet of hole-up 4.7 percent and 5.2 percent respectively over 1978 totals.

In 1978, 243.4 million feet of hole and 49,931 wells were drilled. This footage total set a new high, surpassing the previous record year, 1956, Oby 8 million feet.

Other significant achievements of 1978 include the most wells and most wildcats drilled since 1959, and the most gas wells evder drilled. By any measure, it was an exceptional year, the magazine said.

Breaking U.S. figures down further, 18,596 producing wells are forecast for the year. That is up 4.77 percent from last year's total. This will be the largest number of oil wells drilled since 1964 when 19,904 were counted in the United States, World Oil said.

Producing gas wells for 1979 will total 11,628, up 4.1 percent. If this forecast is attained, 1979 will surpass 1978's gas well record by 459 wells.

Wildcats are expected to increase too, up 5 percent to 12,735 tests. Wildcats will account for one-quarter of the toal 1979 U.S. drilling program. Holding its status as the state with the most wells drilled is Texas. In fact, combining well counts of the four Railroad Commission districts in Texas with the largest drilling activity equals a figure greater than any other state in the union.

A 17,250-well count is expected for Texas this year, up 4.1 percent or 684 wells, from the 16,566 total in 1978. Of that count, 16,909 will be onshore wells

North Central Texas will average the largest number of holes in the state with 3,211, up 3.2 percent from 1978. North Texas will come in second at 2,233 wells, compared to 2,161 last year. The principal active onshore areas in Texas include the Permian Basin in West Texas, the Cotton Valley play in East Texas, the chalk trend of the south central area and the Gulf Coast. Offshore, Texas activityshould increase 17.6 percent to 341 wells

Worldwide drilling outside the U.S. and Canada should reach 6,0563 wells this year, the magazine said, a 4 percent increase from last year's 5,-831 count.

Activity in Canada will continue to set records because operators believe the federal and provincial government will increase the amount of gas' permitted to enter the U.S. and will also raise oil prices by \$2 per barrel by this year.

Setbacks in Argentina and Brazil will not halt the South American drilling boom. About 2,133 wells will be drilled.

Runnels on program

Congressman Harold Runnels of New Mexico will introduce U.S. Sen. Harrison H. S.chmitt, the speaker for the Permian Basin Petroleum Museum's Hall of Fame Dinner Feb. 15 in the Midland Hilton

Congressm an Runnels, whose home is in Lovington, is a native Texan but has live in New Mexico for many years.

He was elected to Congress in 1970 and currently is a member of the Armed Services, and Interior and Insular Affair's committees.

The invitation to Senator Schmitt was extendeed through Runnels, and it was largely through his intercession that the se nator accepted, Maurice R. Bullock, a museum officer, said. The Hall of Fame Dinner is sche-

duled for 7:30 p.m.

House committee stalls superport money bill

By LEE JONES

AUSTIN, Texas (AP) - The House Appropriations Committee, apparently having qualms over the long-debated "superport" concept, has stalled a \$2.5 million emergency money bill for the Texas Deepwater Port Authority.

Lawmakers, meanwhile, prepared to end their week today and head home. Legislative action continued to

ENERGY

OIL & GAS

potential.

Former Congressman Bob Casey, chairman of the authority, along with his financial and engineering experts, said the appropriation would merely be a loan, to be repaid from initial bond proceeds.

The Legislature appropriated \$500,-000 to the authority after oil companies dropped their plan to build the superport privately and the state took over the project.

"If you come in and say, 'We are not going to give you another dime beyond that \$500,000,' I am through. I've

put in my time. If the Texas Legislature is not for this project, I'm not either," Casey said, pounding the witness table for emphasis.

Sen. A.R. Schwartz, D-Galveston, said \$2.5 million would "carry the authority until the time it becomes self-supporting" and would cover expenses involved in completing its application for a federal license.

Schwartz, sponsor of the Senate bill, said a deepwater port is "10 times safer" than "lightering" oil from super tankers to sh8ore with smaller vessels.

No. 1-5-C Todd is a south offset, 660 feet from south and 1,980 feet from west lines of section 5, block YZ, EL&RR survey.

12

ore lease

KNOXVILLE, Tenn. (AP) - Under fire from nuclear energy critics, the Tennessee Valley Authority hired three radiological health experts Wednesday to study all health aspects of its nuclear power program.

At the same time, TVA agreed to pay \$28.7 million to Kerr-McGee Nuclear Corp. for half interest in a mining lease covering 1,467 acres of uranium property in New Mexico.

TVA's board of directors approved a request from the agency's environmental office to hire the three radiological experts to review all of TVA's nuclear operations from the mining of uranium to the storage and disposal of used fuel.

Awarded the \$300-a-day consulting contracts were Dr. Karl Z. Morgan, a nuclear engineering professor at Georgia Tech, Dr. Leonard A. Sagan of Palo Alto, Calif., and Dr. Harald H. Rossi of New York.

TVA Chairman S. David Freeman said the three men represent a wide range of views on nuclear power.

Sagan is program manager for health effects and biomedical studies of the utility industry's Electric Power Research Institute. Morgan, a former director of the health physics division at Oak Ridge National Laboratory, has been associated with nuclear critics.

The consulting contracts are limited to a maximum of 50 days per year for each man. Freeman, meanwhile, said a \$2 million study begun in December on whether to store used nuclear fuel at plant sites or at central facilities will be completed by summer

TVA Power Manager Hugh Parris said the Kerr-McGee deal is expected to yield TVA about five million pounds of uranium at a price of \$37 to \$38 per pound.

That compares with a market price of more than \$50 per pound that TVA is paying for some of its uranium deliveries in 1980. The governmentowned utility estimates it will use seven million tons of uranium a year when all seven of its nuclear plants are operating in the 1980s.

TVA also awarded a \$77.5 million contract to Amoco Oil Co. for 200 million gallons of fuel oil for its oilfired turbine generators. Purchasing Director Rex Williams said a lower bid from Exxon Corp. was rejected because Exxon would not agree to meeting the delivery schedules TVA wanted.

The routine purchase awards made Wednesday totaled \$107 million, approaching the amount TVA has spent on its embattled Tellico Dam project since 1966.

The U.S. Supreme Court last summer ordered a halt of work on the TVA dam project, located about 30 miles southwest of Knoxville. The court ruled that closing the gates of the nearly complete dam would threaten the Little Tennessee River habitat of a tiny fish, the snail darter. The Little Tennessee is the only known natural habitat of the snail darter, protected by federal law as an endangered species.

tests as a wildcat.

The project is No. 1 Continental-Allison Ranch, 31 miles south and slightly east of Fort Stockton and 2,180 feet from south and 1,320 feet from east lines of secton 20, block 2, H&TC survey.

It originally was drilled by Continental Oil Co. as No. 1-20-2 J. E. Allison and plugged in December 1974.

Adjustment bill in mill

AUSTIN, Texas (AP) - Rep. Betty Denton, D-Waco, introduced a bill today she said would stop gas companies and electric utilities from automatically charging Texas consumers for fuel adjustment charges.

"Utilities faced with legitimate increased fuel prices would be required to renegotiate their rate contracts to recover higher costs," she said in a statement. "All such increases would have to be approved by the Public Utilities Commission and other rateapproving bodiess."

She said the automatic fuel adjustment charges "have simply handed utilities a blank check.

Under the Denton bill, any utility failing to comply with the provisions of the proposed legislation would be required to rebate all collected fuel adjustment charges to its customers.

Coast plant plan halted

NORFOLK, Va. (AP) - Brown & Root Inc. has stunned the Eastern Shore by announcing it will not build the offshore oil equipment fabrication complex in Cape Charles it has been fighting for the past five years.

announcement Wednesday.

was more "purely for business reasons" by the board of directors in the firm's Houston headquarters Monday

The action came five years after the company announced it had bought 2,000 acres south of Cape Charles for \$5 million for the facility.

Much of that time the company has spent in lawsuits brought by Northampton County landowners charging that the zoning change allowing the company to build the plant was illegal. The company had won the first round and the landowners were in the

process of considering an appeal. J.T. Holland, chairman of the Northampton County Board of Supervisors said the announcement came as a complete shock.

'Northampton County is in sad shape," Holland said. "I feel that it is great loss to the people of the Eastern Shore and hope that sometime in the future Brown & Root will see their way to locate here.
