# Crack Chinese troops advancing in Vietnam

BANGKOK, Thailand (AP) -Three divisions of China's best troops were moving into position along the Vietnamese coast today for a lightning attack aimed at cutting off supply lines to Vietnamese units defending the Lang Son border region, intelligence sources in Bangkok said.

**METRO EDITION** 

In Peking, an official Chinese source said China hopes to pull its. invasion force out of Vietnam in a few days, Japan's Kyodo news service reported from the Chinese capital. But he reportedly said that if regular Vietnamese army troops join the fighting, it might be prolonged.

The sources here said the Chinese themselves apparently were readying for an all-out attack against regular Vietnamese troops brought up to the Lang Son area, 75 miles northeast of These sources said Peking is then

expected to withdraw most of its forces from Vietnam, possibly within three or four days.

Vietnam's Radio Hanoi reported heavy fighting Tuesday, fourth day of the border war, in an area between Lang Son, the major town in the northeast frontier area, and the border village of Dong Dang, seven miles to the north. The broadcast said Vietnamese forces "put a company of Chinese troops out of action, destroyed five tanks, and captured all the enemies' weapons."

Radio Hanoi also said a Chinese division Tuesday attacked in an area closer to the coast, around the villages of Than Phung, Po Hen and Cao Ba Lanh, but Vietnamese forces "trounced three battalions and wiped

out 700 Chinese aggressors." The Vietnamese "put out of action" 3,000 Chinese in the fighting Tuesday in Vietnam's northeast corner, the broadcast said.

At the western end of the front Tuesday, the Chinese captured Lao Cai, northwest Vietnam's major communications and railway center on the Red River, the Soviet news agency Tass reported from Hanoi.

The invaders were said to be 10 to 12 miles inside Vietnamese territory at some points. They, too, claimed to have inflicted thousands of casual-

Vietnamese militia units have had to bear most of the defense burden since the Chinese invaded last Saturday, but it was reported that Vietnamese regular army units were sent to the Bang Son front Tuesday.

This morning, three divisions of

elite Chinese troops backed by heavy tanks were moving into Quang Ninh Province with the objective of swinging in behind the Vietnamese units at Lang Son and Dong Dang and severing their highway lifelines to the south, the intelligence sources said.

The sources said the expected attack around Lang Son will probably be the final blow of the Chinese invasion, which Peking said it launched to "teach a lesson" to the Vietnamese. By next weekend, the Chinese may be pulling out main elements of their army out, while leaving some troops to hold parts of the central provinces of Ha Tuyen and Cao Bang for future negotiations with Vietnam, the sources said.

"Several thousand men of regular and regional units with heavy arms are advancing toward Chinese positions in the Lang Son area," Kazuhisa Ikawa of the Tokyo newspaper Asahi wrote from the northeastern front.

Ikawa said Vietnamese trucks were hauling 105mm guns from Dong Mo, 37 miles from the frontier, and that vehicles carrying troops, weapons, ammunition and fuel streamed northward on the main road to the border, while columns of refugees poured

Midlanders opposed to Plan O, a proposal to consolidate the city's two high schools, help pack the school board room Tuesday. Sign-holder Kathleen Stewart makes her protest visible. The plan wasn't on the agenda, and Trustee Johnny Warren announced that it will be discussed March 6. (Staff Photo by Bruce Partain)

## No easy energy solution, says oil policy expert

"Many of you wishful thinkers have been led to believe we will have energy self-sufficiency by 1985. I predict that at the current rate of energy demand growth, the U.S. will have a severe recession brought about by the lack of domestic energy by 1985. In fact, there will be an energy shortage that will make your hair curl."

HE SAID HE COULD make that prediction because of the short-sightdness and lethargy of of Congress on energy matters.

'Sometimes it seems that this country's politicians and environmentalists are linked together in a plot to bring American to eventual disaster by making domestic energy expansion impossible," he reasoned.

He said almost everyone in this country, with the exception of one group, finally became aware of the energy crisis in October 1973 when the oil embargo was imposed by OPEC

"That one group is your U.S. Congress. Do you know that your Congress has not put an extra drop of energy into your supply tanks since that date? None of the legislation it has passed helped to improve our domestic energy situtation. In fact, many of the new regulations have decreased the supply.

McKetta said our energy supply is in trouble because we cannot meet the fantastic energy demands through the year 2000 without yearly increasing the energy imported from

# Plan O discussion slated for meeting on March 6

By LINDA HILL

About 75 persons packed Midland's school board room and overflowed into the hall Tuesday afternoon, but many of them apparently were drawn by questions about school band classes rather than the controversial

A citizens group had urged Midlanders to appear at the board meeting to express opposition to Plan O, which would consolidate the city's two high schools - despite assurances from officials the plan would not be a topic for discussion at Tuesday's meeting

In preliminary remarks, board President Johnny Warren said trustees will hear a report on the possibility of such a plan at their March 6 meeting in the Sam Houston Elementary School cafeteria. After the board hears from the

administration at that meeting, said Warren, the public will have a chance to question school officials. We as a board do not know the full

details of that plan. The last time this was discussed was four years ago,' Warren said, adding that there may be new elements to this year's version of the consolidation proposal.

WARREN URGED THE community to "at least listen to the plan before you make your final deci-sion...There's no way you can possibly know what the administration is going to do when we (the trustees) don't know the full details.'

He said the board will delay any decision on the matter until its second meeting in March, tentatively scheduled for March 22.

"This board needs to make a decision at the earliest possible date," he said, for the benefit of morale of teachers, students and parents in light of what he called "the uncertainty that is surrounding this because of rumor and innuendo."

Prefacing his remarks, Warren said he believed the crowded room to around now much physical activity is

be the result of reports Plan O would be discussed. However, after Warren's remarks,

few left their positions. Though the tenor of the crowd indicated many had come for that reason. the majority of spectators stayed and reacted vigorously to administration reports on the secondary mathematics program and questions concerning the status of band classes.

BAND PARENTS WON one point with the trustees, but lost another, at least temporarily.

"We as a board do not know the full details of (the) plan. The last time this was discussed was four years ago."

The board voted to allow substitution of band for physical education in grades nine through 12.

The action followed a request from several band parents, and a school administration recommendation, that the substitution be allowed in the

The effect of the substitution would be to allow two electives instead of one in the eighth and ninth grades.

Opposition to the proposal for eighth grade came from two junior high school speech and drama teachers, speaking for their programs and for physical education teachers.

Linda Salt, speech and drama teacher at San Jacinto Junior High School, told board members the 'drawing card' of an extra elective at the eighth grade level would funnel seventh grade students into the band, rather than other programs such as

Therefore, speech teachers would get only eighth grade "novices," she

Much of the discussion revolved

involved in band versus physical edu-

SAID ONE PARENT about his own school physical education experience: "I always got more exercise taking a shower and getting dressed than I did playing."

Others expressed concern that the band marches, at the junior high school level, something less than half

Bill Cormack, school district coordinator in charge of band activities, told trustees Midland is the only school district in the area which does not allow the substitution from the eighth grade, the earliest grade for which the state will allow the switch.

'Some places do it in the seventh grade and just don't tell anybody," said Cormack.

The motion to allow substituting band for P.E. in high school came from Trustee Ann Page, who had revised her motion twice during the long discussion.

Mrs. Page said she wanted to keep all elective programs on an equal footing at the junior high school level, but said ninth grade is considered part of high school for all other purposes and should be included in the

### Shop satisfies craving for tobacco since 1770

LANCASTER, Pa. (AP) -Some of DeMuth's customers sniffed, some puffed and others chewed

The DeMuth Tobacco Shop has been in business since 1770, satisfying the tobacco cravings of nearly seven generations of Americans

A few left their names in the history books, but the vast majority - the common folk of this agricultural section of southeastern Pennsylvania - left little more than tombstones.

According to legend, De-Muth's sold snuff to two colonial conspirators — the dashing British Maj. John Andre and America's most infamous traitor, Benedict Arnold.

The two joined in a plot to turn over the fort at West Point, N.Y., to the Redcoats. Andre was caught and hanged, and Arnold, who commanded colonial troops at Philadelphia, went to New York, joined the British army and evenually wound up in Britain.

Later, President James Buchanan bought Rappee pipe tobacco at the historic store.

The same family has run the store in the same location for 209 years

And Dorothea DeMuth intends to keep it that way. When her husband died last December, she received offers from folks all over the country who wanted to buy her business.

But the 80-year-old woman decided to keep it in the family. She has four grandsons

Craddick bill

passed by House

"I just couldn't see breaking up the historic atmosphere here," she said. "I guess what I wanted to avoid more than anything else was the development of a newsstand-type of operation. We've been a straight tobacco store for over 200 years and I'd like to see it stay that

Christopher DeMuth started the business in 1770, making snuff and cigars. As the business passed on to eight successive members of the family, the shop added chewing tobaccos and pipe blends to keep pace with changing times.

Today, the store no longer sells cigars or snuff under its own label, but it has kept its three types of chewing tobacco

The store's interior was last remodeled in 1917, when workmen used dark mahogany to panel walls and construct display cases. DeMuth's original sign — a hand carved, 3-foot statue of a colonial man holding an empty snuff box - remains intact, perched on a showcase.

Mrs. DeMuth employs three salesmen for day-to-day operations, but she visits the shop briefly every day to see how things are going.

She believes the shop will help her fight off loneliness. Her husband, Christopher, who was named after the founder, ran the business from 1937 until his

"I'm an active person who likes to keep busy," she said.

#### Hooded mystery men enter Lee Chagra case

EL PASO, Texas (AP) - The shroud of mystery that has permeated the investigation into interstate racketeering, prostitution and drug peddling in this border city descended upon a grand jury Tuesday in the form of two black-hooded "mystery men."

The men's identities were protected to ensure their safety, according to U.S. Attorney Jamie Boyd, who said a number of witnesses in the probe have expressed fears for their safety.

The witnesses, one in white shoes, black pants and a trench coat, the other wearing scuffed brown shoes, brown pants and a black trench coat, were escorted into the courthouse under extremely heavy guard Tuesday, and were whisked away immediately after their testimony.

Besides the interstate transportation of drugs and prostitutes, federal grand jurors are investigating the attempted assassination of assistant U.S. Attorney James Kerr in San Antonio; alleged gambling operations and the disappearance of thousands of dollars from the office of slain El Paso lawyer Lee

Others called to testify before the panel Tuesday were bail bondsman Vic Apodaca Jr., a close friend of Chagra'; Edward A. Abraham, brother of attorney Sid Abraham; Steve Michael Fueston, a management consultant for a local nightclub; a woman identified only as Terri Warner; and a postal inspec-

Boyd said earlier the probe could last a year and that he may call as many as 200 witnesses. Information gathered during the jury's two-day session last week resulted in the arrest of two members of the Bandidos motorcycle gang and

their two women companions on narcotics charges. Also ordered to testify last week was Joe Chagra, the brother of the slain attorney. The FBI said its investigation of the missing

## Wounded U.S. Marine held in Iran

TEHRAN, Iran (AP) - Iranian authorities are holding the 22-year-old U.S. Marine guard wounded in the attack last week on the American Embassy and plan to try him on charges of "firing at Iranians" during the attack, Deputy Prime Minister Amir Entezam announced today.

Entezam's brief statement did not say when Sgt. Ken Kraus of Lansdale, Pa., might be brought to trial, what sentence he might get if convicted, where he was being held or what condition he was in.

Kraus received a slight head wound during the attack last Wednesday, was treated at a hospital near the embassy and was taken from the

hospital by guerrillas. U.S. Embassy spokesman Jack Schellenberger maintained last week that Kraus and all other embassy personnel had been accounted for. But on Tuesday he admitted the Marine was missing and the embassy was trying to get information about him from Prime Minister Mehdi Bazargan's provisional government and Ayatollah Ruhollah Khomeini's secuparallel government.

Schellenberger indicated that the embassy believed Kraus was being held by leftist guerrillas who heed Khomeini's orders only when it suits them. But Entezam's announcement today was taken to mean that Khomeini guerrillas took the young man from the hospital.

The attack on the embassy was launched by scores of leftist gunmen who Bazargan's government claimed were trying to discredit the Khomeini movement. An Iranian employee of the embassy was killed, another Marine was slightly wounded but was not sent to a hospital, five Iranians apparently among the attackers were reported wounded, and Ambassador William Sullivan and 101 other Americans were held prisoner for 31/2 hours until Bazargan's government freed them.

Kraus said in a telephone interview after he was hospitalized that he was knocked to the floor and shot after he surrendered to the guerrillas in the embassy kitchen. A doctor at the hospital said a metal fragment lodged in his forehead, but the wound was not

In Lansdale, a sister of the Marine, Iris Israel, said the family was in touch with the Marine Corps, the State Department and Sen. H. J. Heinz, R-Pa., but "they really don't know anything.'

"We were told he would be one of the first persons evacuated, and we find out six days later he never even left," Mrs. Israel said. "It's like holding an ice cube for a long time. First it's cold and then it's numbing. We've been holding that ice cube for a week now and we're numb.

"My mother's very shaky. He's her only son. My father is dead so he's the only guy in the family."

The U.S. government has evacuated more than 3,000 Americans from Iran since the attack on the embas-

## Leftist guerrillas back down from direct confrontation

TEHRAN, Iran (AP) - An Iranian Marxist guerrilla organization today backed off from a direct confrontation with Ayatollah Ruhollah Khomeini, canceling a march through the capital that had been banned by the

religious leader. In the place of the march, scheduled for Thursday, the Marxist People's Fedayeen invited "all our countrymen" to participate in a rally at Tehran's university on Friday, the Moslem sabbath.

In its call for the march, the Fedayeen had urged moderates and leftists alike to participate if they were 'concerned that the blood of the martyrs will have been spilled in vain and the achievements of the revolution

The Fedayeen have been angered by their exclusion from Khomeini's provisional government although hundreds of their members fought and died to topple of Shah Mohammad Reza Pahlavi.

But in a statement today, the Fedayeen said they have decided to replace the march with a rally in response to "repeated demands from workers and educators and students" who feared the march "could halt the smoothness of current affairs" in

Khomeini had responded to the proposed march by banning it and then announcing that the "organizers are not Moslems and they are at war with the philosophical beliefs of Islam. People of all social strata should not cooperate with them.

"It is also said that these people have anti-Islamic tendencies. They intend to come to my house. I will not permit these opportunists to come to

Medhi Bazargan, prime minister of the provisional government, has promised that the Communists and all other parties will be allowed to operate freely under the new constitu-

A major fear among many Iranians is that the growing differences be-

tween the Ayatollah's supporters and the leftists will spill over into fight-

During the revolution, numerous army bases were looted of their arms and leftists have not responded to appeals by Khomeini to hand them back. And the Fedayeen have established their own military headquarters and training center at Tehran University.

Unless the two sides are able to reach some sort of compromise observers believe they will inevitably face a test of strength that will result in open warfare.

The National Front, an ineffective opposition to the shah until it joined Khomeini's movement last year. made a peace overture to the leftists Tuesday with an open letter urging

that the Fedayeen and other leftists be given a bigger role in the new regime. The Front has been given

some cabinet posts. Meanwhile, there were no new reports of fighting.

Radio Tehran reported that a government representative had been sent to Mahabad, in northwest Iran on the border between the provinces of Azerbaijan and Kurdistan, to "settle local disputes." Apparently there had been considerable resistance there to the new regime since the government radio reported Tuesday that the local barracks had "fallen to the revolutionary forces."

A navy spokesman denied reports of clashes between airmen and sailors in southern ports.

## Silk or Silk 'n Hand? The choice is a private matter between you and your budget!

You can spend a great deal of money on lovely silk panties and a great deal of time keeping them that way. Or you can spend just a little of each on Silk 'n Hand. They're made of machine washable nylon satin tricot in white and lovely lingerie colors that look as lustrous as silk, but cost about the same as ordinary underfashions. They're lined with a cotton shield for extra comfort. But suit yourself, if you have time and money to spare, buy silk, but if you're as busy as we think you are, try Silk 'n Hand. Tailored briefs, 5-10, hiphuggers and bikinis, 5-7, lace trimmed, 5-7.

## Zimbabwe ruins: The mystery, history of Rhodesia

By MAUREEN JOHNSON

ZIMBABWE RUINS, Rhodesia (AP) - Awesome, mysterious and now eerily deserted of tourists, these rambling granite ruins for decades have puzzled archeologists and symbolized for blacks a sense of national-

During six years of warfare that has crippled Rhodesia's tourist trade, the ruins have thrown up a new mystery - they are the only major tourist spot that has not come under attack by black nationalist guerrillas. Elsewhere in Rhodesia, hotels have been attacked and some have even closed. However, even here few people are

prepared to take chances. The war, launched initially to oust

white-minority rule, has driven away all but a handful of sightseers from the ruins.

In the past four years Rhodesia's earnings from tourism have slumped from about \$40 million a year to an estimated \$14 million last year.

In 1972, just before the war began, Rhodesia recorded 340,000 foreign tourists. Last year, just 89,000 came many of them former Rhodesians or South Africans visiting relatives.

The number of foreign tourists killed — eight — has been relatively small. The biggest single blow was the shooting down by guerrillas last September of a Rhodesia airliner returning from the northwest Kariba tourist resort. Most of the 48 persons killed were Rhodesian whites.

Some of the tiny group of whites and blacks still keeping open two tourist hotels at the ruins, 190 miles southeast of the capital, Salisbury, believe guerrillas will never attack here because of the ruins' nationalistic signif-

Others take a more pragmatic view - the guerrillas don't attack because there is a battle training camp for Rhodesian army recruits within two miles of the ruins.

The ruins will give their name officially to this country within 90 days after it comes under a guerrilla-opposed mainly black government. As a compromise between whites and blacks in the current transition administration, the country will be called Zimbabwe Rhodesia.

SPECIALS THURSDAY THRU SATURDAY

BUDGET HELPING FOOD VALUES

Most blacks — whether guerrillas or Rhodesian government officials have long referred to it simply as Zimbabwe.

There are two archeological theories on the origins of the Zimbabwe ruins - that it was a flourishing 13th-15th century city built in the heart of Africa by Arab gold and slave traders, or that it was a kingdom built by blacks.

Many Rhodesian blacks prefer the second theory, whites the first. On a more parochial level, controversy goes on here. British-born Bob

Baxter, who owns the two hotels snack bar and store next to the ruins - a national monument - believes he is sitting on a potential goldmine. Baxter says the war will wind down

after April's universal suffrage elections, foreign tourists will return and local blacks will flock to "what they see as their cultural heritage."

Nearby, the area's only other commercial operators, Viv and Carol Bristow, are closing their 4,500-acre game park. They are sending lions, cheetahs and elephants to South Africa or a park near Salisbury, and they plan to leave their remote home, overlooking the ruins.

The Bristows first developed the park mainly for film locations but in pre-war days it had 80,000 tourists visiting annually.

The last major film, "The Slave Traders," starring Britt Ekland and Trevor Howard, was made there two years ago.

Since then, the Bristows have lost contracts for three films.

En

les

"The stars, the crew, the tourists, nobody will come here anymore," says Bristow, now mainly on part-

time army duty. Says his wife: "I don't blame them. As Rhodesians we are used to it. But you can't expect other people to put up with it. And as long as there is the slightest chance of getting killed peo-

ple won't come.' Meanwhile, Baxter is going deeper into the red financially. He works on his account books with a pistol strapped to his waist and an automat-

ic rifle propped against the desk. "But I'm sure things are going to come right and by next year this place could be worth a million."

#### By DONALD M. ROTHBERG

WASHINGTON (AP) — Historians of the United States Senate and of the English language may wonder someday about Miss Annie Lee.

Miss Annie Lee taught English to

Many years later, when her student was a Republican senator from North Carolina, he recalled his teacher. It was during debate on proposals to

change the Senate rules. Helms offered what he called "three or four stylistic amendments."

"When I was in high school, oh, she was death on split infinitives and things of that sort," said Helms. "I guess it is in memory of Miss Annie that I offer these stylistic amend-

ments." One of his stylistic changes would substitute "if for whatsoever reason"

for "if for any reason."

"I said at the outset it was purely

"I am at a loss to understand the reason for the word change," said

banes, D-Md., to his feet.

stylistic," said Helms. "... There is a possibility that it is a distinction without any difference.' Asked by Sarbanes if he saw any

difference between "any" and "whatsoever," Helms said "whatsoever" is "a little broader." "I guess we had different English teachers," said Sarbanes, "because, I

must say, the phraseology 'for what-soever reason' would have sent my English teacher up the wall. What was the name of that English teacher of the senator's?"

"The senator will restrain himself from saying anything critical about

#### **WEATHER SUMMARY**

Snow and snow flurries are expected today through Thursday morning for the Southwest, western and northern Plains. Rain is forecast for the Midwest, showers are forecast for the eastern Gulf. Temperatures will be cold from the north Pacific Coast into the northern Plains, with seasonable temperatures likely elsewhere. (AP Laserphoto Map)

Considerable cloudiness extends from the northern Rockies southwestward to the West Coast and from the Great Lakes region and the upper Mississippi Valley southward across the Southeast. Also visible in today's satellite cloud picture, recorded about 3 a.m., are high and middle level clouds over most of the Southwest and Northeast. (AP Laserphoto)

The weather elsewhere

#### Texas area forecasts

West Texas: Partly cloudy through Wednesday with arm afternoons. Widely scattered showers southwest his afternoon and tonight and Panhandle tonight and arly Wednesday. Highs from near 60 Panhandle to the opper 70s lower elevations of the Big Bend. Lows upper

North Texas: Mostly cloudy and warm. Chance of sundershowers east Thursday. Highs 65 to 75. Lows 48 to

South Texas: Partly cloudy and warmer. Increasing cloudiness and mild tonight with widely scattered showers or thundershowers mainly Southeast Texas, some possibly heavy. Mostly cloudy, warm and humid Thursday with scattered showers or thundershowers. A few thunderstorms possible. Highs mostly in the 70s to near 80 along the lower coast and Lower Rio Grande Valley. Lows mostly in the 50s to 60s along the immediate coast and Lower Rio Grande Valley.

## Midland Junior Achievement company places at trade fair

A Midland Junior Achievement company placed third when eight of the Tall City companies participated in the JA Trade Fair recently in Hobbs, N.M.

Hobbs placed first in the meet. Ghetto-K of Midland took third place with Norvecho placing fourth and Go-

In overall sales, Hobbs had the highest. But Norvecho was next, followed by Ghetto-K. Other companies participating included Mudco, Cadellco, Jabco, Classique and Ambition.

Winning cash awards were Stacey Hall, Mona Pitchford and Army

The Midland companies are preparing for a trade fair set for March 3 in Dellwood Mall. Members have been told their booths must look different than last year.

Judges will select winners for free

enterprise display and for company information display.

Recent Dale Carnegie awards were announced. Selected as having the

best speech were Paul Philpy and Cindy Yonts. The most improved were Cheryl Dial, Janail Williams and Vickie Mizzles. Recognized for their achievement were David Printz, Kris Stump and Avis Fisk.

This class is being offered to JA members on a scholarship basis. It was also announced that the Mid-

land Achiever's Association raised \$160 for UNICEF during the 1978 Halloween season. MAA consists of representatives from each JA compa-

Edward Hagan, division manager of Chevron, U.S.A., spoke recently to the JA clubs on the topic of competi-tion. He emphasized that more competition is present in the U.S. than in foreign countries. The oil industry competition has given the U.S. cheap energy, he said, causing a high stan-

dard of living. Hagan is a vice president on the board of directors for Junior Achievement. He also is chairman of the scholarship and awards committee.

## Taiwan legislation uncertain

WASHINGTON (AP) - Two senior members of the Senate Foreign Relations Committee have agreed on legislation designed to insure Taiwan's security, congressional sources say.

But the legislation, which the sources said is stronger than what President Carter has indicated he would approve, faces uncertain prospects in the committee.

It was not clear how many committee members would vote for the bill, the precise language of which could not be learned. Panel members have split several times over Taiwan.

Sen. Frank Church, D-Idaho, the committee chairman, and Sen. Jacob Javits of New York, the panel's senior Republican, agreed on wording of a Taiwan security amendment Tuesday, said the sources, who asked not to be identified.

After several postponements, caused by a Washington snowstorm and the committee splits, the panel was scheduled to consider Taiwan security bills today.

At issue is whether Congress should approve an explicit pledge of United States aid for Taiwan if the island is threatened economically or militarily

In negotiating the agreement to recognize China, the United States did not insist that Peking promise never to use force to reunify Taiwan with the mainland, U.S. officials have acknowledged.

In the House, meanwhile, Rep. Clement Zablocki, D-Wis., has pre-pared a draft Taiwan bill which has won agreement from influential members of the Foreign Affairs Committee consulted before the measure was written, sources said.

Zablocki, the committee chairman, urged the panel to vote for a Taiwan bill which declares that an attack on Taiwan "would be a threat to the peace and stability of the Western Pacific area and of grave concern to the United States.' A congressional source said that

unlike the Senate version, the Zablocki bill would be acceptable to President Carter, who has said he would veto any Taiwan legislation which jeopardizes the new relationship with

Zablocki's bill includes no implied or explicit pledge that the United States would respond with military force if Taiwan were threatened.

#### Odessa man hospitalized

ODESSA - An Odessa man who received a gunshot wound in the chest Monday afternoon was listed in stable condition in Medical Center Hospital here today, said a hospital spokes-

Bill S. Harris, 36, received the wound late Monday afternoon, according to Odessa police.

Officers responding to a call said they found Harris sitting in a chair in the kitchen of a residence in the 3300 block of North Jackson about 5:20 p.m. Monday.

Harris was bleeding from a small hole in the right side of his chest, according to police reports.

## Trend may close month

The latter days of February may be marked by a warming trend, just like the early days were nipped by cold and snow, if the current sunny and breezy streak continues.

The outlook for Thursday is for temperatures in the mid-60s and partly cloudy skies.

Tuesday's high was 70 degrees, said a weatherman at the National Weather Service at Midland Regional Airport, and helped form the trend.

Today's overnight low was 42 degrees. And the mercury tonight should be in the mid-40s.

Winds were to decrease to 10 to 15 mph by tonight. Sunset today will be at 6:40 p.m. Sunrise Thursday will be at 7:25

The record high temperature reading for a Feb. 20 is 80 degrees in 1972. The record low for a Feb. 21 is 16 degrees in 1939

Dense fog reduced visibility across a vast area of Texas early today as a weak Pacifc cool front began dissi-

Early today, the front was along a line from near Wichita Falls to near Del Rio, but had exerted little influence on the Texas weather scene. In some areas, the fog reduced visi-

bility to only a few feet. The fog was being blamed, at least partially, for a private plane crash at Dallas in which four persons died. Most of the fog was in the eastern half of the state. Skies were mostly

cloudy around the state and forecasts called for the possibility of some shower activity in the mountains. Highs were to be mainly in the 60s and 70s with extremes ranging from

near 60 in the Panhandle to near 80 along the lower coast. Early morning temperatures ranged from the 30s in Northwest Texas to the 60s along the coast. Extremes ranged from 35 at Amarillo

to 63 at McAllen. Some early morning temperatures included 39 at Wichita Falls, 50 at Texarkana and Dallas-Fort Worth, 42 at Austin, 59 at Lufkin, 58 at Houston, 61 at Corpus Christi, 40 at Del Rio and San Angelo, 45 at El Paso and 36 at

Discussing energy matters Tuesday night in Midland are, from left, Steve Scott, chairman of the Permian Basin Section of the Society of Petro-

leum Engineers; Ken Osborne, Dr. John McKetta of Austin, and George Slaughter. (Staff Photo by Brian Hendershot).

## McKetta views energy problems as 'impossible' task for U.S.

(Continued from Page 1A)

outside the United States. "Today, more than 50 percent of the oil used in the U.S.A. is imported."

In 1977 the U.S. paid other countries \$47 billion for oil and natural gas, McKetta said. "This sickening increasing dependence on imported oil will mean only greater risks of another embargo, and more intimidation in the conduct of foreign policy, which jeopardizes our entire nation.

"HOW IN THE WORLD could the wealthiest and most powerful nation on earth allow itself to be boxed into a corner like this? The reasons include the senseless, inflexible governmental regulations and the extreme demands of the environmentalists. We now have so many roadblocks to

expanded production that the energy industry is practically inert because of governmental laws and red tape.

The speaker said that the development of other forms of energy - coal, nuclear, geothermal and others is at such a slow pace that we can not expect much help in that area by the year 2000. "The companies trying to use coal

are having troubles. While one branch of the government is starting to order more plants to use coal, other branches have taken action that will eliminate a million tons from the

"In the midst of this tremendous energy crisis it is difficult to believe

## No Plan O discussion at school board meeting

(Continued from Page 1A) high school policy.

TRUSTEE MARSHALL McCREA was the only trustee voting against the idea, because, he said, he opposes substitution at any level.

Warren did not cast a vote on the "This is such a complicated prob-

lem I still don't have a grasp on it," he said shortly before the vote. "Look, I'm not about to get the band parents down on me. I've got half the

town mad at me now," said Warren a little earlier in the discussion. The trustees tabled a proposal to include band grades in grade point

averages.

Mr. and Mrs. E. Dale McCarter argued vigorously that the grades should be included for purposes of determining class ranking and honor student status. And, said the McCarters, parents and band students before now have not realized that the grades weren't being count-

School administrators said band, choir, physical education and athletics all count as credits toward graduation without being included in grade point averages.

But, proponents of the policy change pointed out, physical education and athletics carry E, S or U

grades, rather than the tradition-

may loan money

to allow the credit on grade point averages "if we could see criteria that would put it on a level with academics," including grade "curves.

A motion from Trustee James Ramsoure to allow the grade point credit for grades 11 and 12 died for lack of a second, after Trustee David Grimes called on board members to

We don't want to dilute any academic program," said Grimes, pointing out that a large segment of the community is calling for more emphasis on "basics."

al and asked administrators to compile information about the impact it would have on other programs and on students' chances for college admis-

directors would "be delighted" with the policy change if, and only if, the district would continue to allow them to give almost all students A's.

'Primarily, the band grade reflects the effort, the devotion of the Mrs. Page said she would be willing

'go a little slower on this."

The board voted to table the propos-

### Mennonites in Oklahoma trying to keep farm land

BOLEY, Okla. (AP) - Twelve "The real estate agent misled us," Mennonite families who came here George Plett, who farms 150 acres from Mexico two years ago just hope about two miles from Boley, says. now they can hold on to their farm In order to gain permanent status,

one must be the major stockholder in The problem isn't money or accepat least a \$40,000 business or agricultance by neighbors. It is because they ture project, according to James came here illegally after being Woods, director of the Oklahoma Demisled, they say, by a real estate partment of Immigration and Naturalization. Because the Mennonites bought their land in a group - each **Basin** investors getting a share based on his investment - they do not qualify.

> A bill in Congress which would have given them permanent status died Feb. 1 and it appeared they would be deported. That was extended however, when Sen. Lloyd Bengston, D-Texas, wrote immigration of ficials he would introduce another

"If it's God's will, there will be a way," Henry Dueck, another of the farmers, said.

The Mennonites here originally moved from Canada to Mexico because they could not have their own schools. Then it appeared the Mexican government might take their new land so they came to Oklahoma.

Now they still face deportation unless Congress acts to save them.

that the coal consumption in the United States today is lower than it was 30 years ago," McKetta said.

The UT professor said that in the field of nuclear energy the story is again a sad one. "This country was the pioneer in the development of nuclear power. Yet today we require up to 13 years to build a nuclear power plant in the United States, while it takes only 4½ years in Europe or Japan. Why? Again, because of excessive governmental regulations."

REPEATING HIS CONTENTION it is impossible for the U.S. to become energy self-sufficient, McKetta said 'we are continously being promised much energy from alternate sources such as solar, geothermal, wind, waves, rubbing stones and other sources. We all pray this would be the case, but I am sorry to advise yout

that you cannot be so complacent" "The most likely alternate on the ly encouraged by the government, we could produce 20 trillion watts of electricty from geothermal sources by 1985. That is an enormous amount of energy-equivalent to 20 large nuclear power plants. But this fabulous number is equivalent to only 320,000

barrels of oil per day. 'This really sobers you when you know that by 1985 the amount of solar energy will be only one-ninth that of

geothermal." In order to meet the tremendous energy demand from a self-sufficient energy base by the year 2000, McKet-

ta said the U.S. would have to: - Find 10 more Prudhoe Bays or four more states of Texas and produce them to capacity.

- Ban all new cars larger than 40 horsepower, so that by 1985 half the cars on the road would be that size.

- FORCE A 20 PERCENT improvement in building heating sys-- Force a 15 percent improvement

in energy efficiency by industry. Force a 15 percent improvement in the efficiency of converting to elec-

tricsl power.

Totally develop all offshore oil and gas reserves on the Outer Continental Shelves of both the east and west coats.

- Increase coal production by a factor of 3.

- Convert all of California Montana and Idaho to geothermal steam electric power, which would be like building 110 Hoover Dams at a cost of approximately \$40 billion.

- Double the present rate of hydroelectric power generation, and 80 percent of the potential sites are located in parks, wildnerness areas and scenic areas.

- Produce 2 million barrels per day of shale oil by the year 2000.

- And, add one conventional atomic power plant every two weeks from now to the year 2000.

"So you see, you can expect to be living with an energy problem the rest of your life. "I see no way to get out of this horrible mess before the year 2000. We can alleviate this shortage slightly, but only if we establish and effective national energy policy now," the speaker concluded.

Some of McKetta's positions at UT have included chairman of the Engineering Department, dean of engineering and executive vice chancellor of the entire University of Texas Sys-

In 1962, he was the national president of the American Institute of Chemical Engineers.

In 1975, McKetta won the National Service to Society Award for his tremendous efforts in informing the public on the topics of energy and sensible environmental balance.

BIG SPRING - Services for Callie M. Dyer, 92, of Ackerly were to be at 11 a.m. today in Nalley-Pickle Funeral Home with burial in Fairview Cem-

etery at Ackerly.
Mrs. Dyer died Moday in a Big Spring hospital after a long illness. She was born April 2, 1886, in Joplin. She was married to M.E. Dyer Nov. 6, 1904, in Joplin. They came to the Ackerly area in December 1923. He died Oct. 25, 1972. Mrs. Dyer was a

Survivors include a son, M.E. Dyer Jr. of Ackerly; five daughters, Grace Martin of Weatherford, Cordie Oaks and Mrs. J.C. (Inez) Bearden, both of Ackerly, Mrs. Floyd (Beatrice) Horne of Bakersfield, Calif., and Mrs. Melvin (Kay) Brown of Seminole, 16 grandchildren, 38 great-grandchildren and 15 great-great-grandchil-

#### Miss Stephenson

Graveside services for Norma C. Stephenson, 58, of 1011 W. College Ave., were to be at 2 p.m. today in Resthaven Memorial Park directed by Newnie W. Ellis Funeral Home. Officiating was to be the Rev. J.B. Stewart of the First United Methodist

Miss Stephenson died Monday in a Lubbock hospital after a lengthy ill-

She was born March 7, 1920, in Sipes Spring. She spent her early life in Breckenridge and attended schools there. She then moved to Midland and lived here alternately until returning here permanently in the 1950s. Miss Stephenson had worked for Texaco and Humble oil companies. Recently, she had been employed with Roberta M. Reagan Estate in the First National Bank Building.

Survivors include a sister, Mrs. Donald J. Alderman of Commanche; an aunt, Era H. Conner of Midland, and a cousin, Ellis J. Conner of Mid-

#### Walter Taylor

BIG SPRING — Graveside services for Walter Ray Taylor, 77, of Big Spring were to be at 2 p.m. today in Ira Cemetery with the Rev. June Middlebrooks of the Ira Church of God officiating.

Taylor, a veteran of World War I, died Monday in a nursing home

Born March 6, 1901, in Roberta, Okla., Taylor was married to Mabel Lewis on Sept. 10, 1921, in Snyder.

He was a retired millright in the construction industry. Taylor was a member of Masonic Lodge No. 705, Oak Cliff, Dallas.

He is survived by his wife; a son, R.K. Taylor of Big Spring; three sisters, Jewel Dixon of Tampico, Fla., Inez O'Brian of Melba, Idaho, and Ninva Conger of San Francisco, Calif.; two brothers, Henry Taylor of Houston and Roy Taylor of San Jose, Calif., two grandchildren and three great-grandchildren.

#### Marie Myers

LEVELLAND - Marie Myers, 71. of Sundown, mother of Mrs. Sam (Delorise) Rhodes of Midland, died Tuesday in a Levelland hospital after a brief illness.

Services were to be at 2:30 p.m. today in Price Funeral Home with the Rev. Gene Louder, pastor of First United Methodist Church, officiating. Burial was to be in Sundown Ceme-

Mrs. Myers was born Dec. 23, 1907, in Stuart, Neb. She moved from Sundown to Coleman in 1946. She was active in First United Methodist Church in Sundown. She was a member of the Sundown Home Demonstration Club. She was married to Elvin "Cotton" Myers June 8, 1940, in Reserve, N.M.

Other survivors include her husband, a son, a sister, four grandchildren and a great-grandchild.

#### Joe Pollard

WICHITA FALLS - Joe D. Pollard III, 35, of Wichita Falls, brother of Midland Reporter-Telegram staff writer Susan Toth, died Monday in a Wichita Falls hospital after a brief illness.

Services were Tuesday in Our Redeemer Lutheran Church with the Rev. Alfred Scholz of Pasadena officiating. Burial was in Crestview Cemetery.

Pollard was born June 21, 1943, in Nacona. He was a route salesman for Tom's Peanut Co.

Other survivors include his wife, two daughters, two sons, his mother

in Odessa. He was born July 11, 1909, in New

Castle. He had lived in Hobbs for 40 years where he worked for the city. He retired in 1970 and moved to Logan. He was a member of the First Baptist Church.

Survivors include his wife, Opal; two sons, J.W. Clifton of Odessa and Donnie Clifton of Murfreesboro, Tenn.; a sister, Mrs. J.D. Stamps of Littlefield, and eight grandchildren.

#### 'L.B.' Baca

FAYETTEVILLE - Services for cates, said Mysak. Ludwig "L.B." Baca, 80, of San Angelo, grandfather of James Willhite of Midland, will be at 10 a.m. Thursday in St. John's Catholic Church at Fayetteville. Burial will be in City Cemetery directed by Johnson's Funeral Home.

Baca died Moday in a San Angelo hospital after a brief illness.

He was born Aug. 19, 1898. He was the son of Professor Frank J. Baca Sr., who organized the Baca Band and Orchestra in 1892. He was married to Myrtle Frenzel April 2, 1918, in

#### Mrs. H.C. Enger

BIG SPRING - Mrs. H.C. "Billie" Enger, 55, of Big Spring and formerly of Midland, died Tuesday in a Big Spring hospital after a short illness. Services will be at 10 a.m. Thursday in Nalley-Pickle Funeral Home with

burial in Trinity Memorial Park. Mrs. Enger was born July 20, 1923, in Lawton, Okla. She was married to H.C. Enger Dec. 23, 1944, in San Angelo. They came to Big Spring 12

#### years ago from Midland. She was employed by Mountain View Lodge.

She was a Presbyterian. Survivors include her husband; a son, Ron D. Enger of Big Spring; a daughter, Beverly Brown of Alaska; her parents, Mr. and Mrs. C.E. George of Menard; a sister, Mrs. Roy McMinn of Burkburnett, a brother, Charles George of Artesia, N.M., and a granddaughter.

#### Bank robbers encounter 'army'

DALLAS (AP) - Three would-be bank robbers ran into a virtual oneman army here when they encountered a 75-year-old bank guard while attempting to rob the Buckner State

When it was all over, one bank robber had been wounded, another was arrested without incident and the third was nowhere to be found.

The guard, Hubert Hiter, a former Detroit police officer, confronted the youths inside the bank after they announced the robbery, said police spokesman Bob Shaw.

Witnesses said one of the gunmen grabbed Hiter and began shouting 'Shoot him, shoot him.

Hiter was struck about the head in a struggle and one robber was shot in the arm by the guard, Shaw said. Mrs. Glen Winchester, a customer

in the bank at the time of the robbery, described Hiter's actions as "absolutely magnificent.'

"Even though he was knocked around pretty bad, he got out his gua and got off some shots. He was hit on the head with a gun butt and there was blood running all down his head," Mrs. Winchester said.

The other gunmen two fled by car.

## High court to hear Dallas case

WASHINGTON (AP) - The Supreme Court today agreed to hear arguments by Dallas school officials who want to derail a move to racially balance the nation's eighth largest school district.

The justices voted to review the school district's appeal aimed at overturning a federal appeals court ruling that could lead to widespread student busing in Dallas.

Dallas schools have been involved in desegregation efforts since 1955, but the lawsuit sparking today's action was first filed in 1970 by the parents of black and Mexican-American students.

After prolonged legal proceedings, U.S. District Judge William Taylor Jr. in March 1976 ordered enforcement of a racial desegregation plan suggested by the Dallas Alliance Task Force on Education.

Hardberger said a condition of when the incident took place.

SAN ANTONIO — Rape charges against former Midland County Sher- the fine and court costs within 30

Under it, the school district's 140,-000 students and 183 schools would be divided into six subdistricts. Five of those subdistricts would have to reflect the same racial makeup, within percent, of the entire school dis-

As of 1975, those percentages were 41 percent white, 45 percent black and 14 percent Mexican-American. School officials say the white school population now has dropped to 35 percent.

Taylor's plan, school officials estimated, would make necessary the busing of some 20,000 students at an annual cost of \$5.8 million.

Minority parents and the Dallas branch of the National Association for the Advancement of Colored People objected to Taylor's plan because one subdistrict - East Oak Cliff, where 27,500 students would attend 16 schools - would remain virtually all-

charge was dismissed because there

Also, 50 schools in the other five subdistricts would remain essentially one-race schools, the NACCP noted. Last April, the 5th U.S. Circuit Court of Appeals ordered Taylor to restudy the Dallas case and come up

with a new student assignment plan.

The appeals court told Taylor that his desegregation order would have to "justify the maintenance of any onerace schools that may be part of that

If such schools could not be justified, they should be abolished, the appeals court ruled.

Dallas school officials appealed the 5th Circuit ruling.

#### Odessa man plans bond hike appeal

An Odessa man plans to appeal an increase in his bond ordered Tuesday in Midland by U.S. District Judge John H. Wood Jr.

Wood increased bond for Byron F. Patterson, convicted last week of violating income tax laws, from \$5,000 to \$10,000. But the judge allowed the extra \$5,000 to go unsecured, so Patterson can remain free without pay-

ing additional money. Patterson, however, said Tuesday he believes he is entitled to a personal recognizance bond and will appeal to the U.S. Fifth Circuit Court of Appeals for a bond reduction.

The bond is to remain in effect pending sentencing and appeal.

Patterson, who is representing himself, Tuesday filed several motions to lay the groundwork for his

## U.S. must try harder

opening up for trade with mainland China, it is more important for the United States to settle the problems afflicting its trade with the rest of the world.

JAMES N. ALLISON (1902-1975)

The opportunity comes up this spring when the results of the "Tokyo Round" of international trade negotiations are presented to Congress.

Four years of highly technical negotiations involving 100 countries have gone into agreements now almost ready for signing.

They amount to a new charter or series of codes to govern world trade. The need for rules to assure free trade and fair trade among nations is obvious enough, but the Carter administration will need all the help it can get for passage of federal legislation required to put some of the agreements into effect.

The problem with trade legislation, besides understanding its arcane economics and vocabulary, is that so many members of Congress look only on one side of the street when they approach the subject. They want to know what a trade bill is going to do to protect jobs and businesses in their home state from foreign competition. They are less likely to think about what the same bill will do to keep foreign markets open for American products.

Those markets are absorbing one-sixth of everything we grow, manufacture or mine in this country, which speaks for itself in terms of the jobs and volume of business dependent on our exports. This must be kept in mind when the new trade agreements are attacked, as they certainly will be, for not going far enough to satisfy those American industries, such as steel and textiles, which have been suffering the most from foreign competition they regard as unfair.

Fairness is what Robert Strauss, the president's chief trade negotiator, thinks has been achieved in the new agreements. They tighten up the rules aimed at preventing "dumping" of products on export market at an artificially low price, and would set up a sort of world trade court - something missing now - to settle grievances.

Nevertheless, Mr. Strauss must buck a tide of protectionism in Congress. Americans can hope for

Granted all the possibilities a trade debate which is more enlightened than emotional, one which separates fact from myth in analyzing why imports have made such inroads into markets once dominated by our domestic

Complaining about "dumping," or that imports are priced low because of "cheap foreign labor," is not enough. How much of the problem is of our own making - a lapse in the productive efficiency and aggressive marketing which once was an American distinction?

The Volkswagen, for instance, was designed, built and marketed by Germans with a living standard similar to ours. It was not "dumped" on our market, but succeeded here largely because Detroit slept through an automotive revolution.

Why is Japan now dominating a new growth industry television recorders for the home? Americans are famous for innovative technology which creates new products, or at least they were.

The new trade agreements are essential to sustain a policy of free trade. The United States, as the world's largest trading nation, has the most to lose in the long run if protectionism in Congress shoots them down and retaliatory trade barriers begin to rise around the world.

If foreign competition is relegating some of our onceleading industries to a status of No. 2, a familiar advertising slogan offers some advice: Try harder.

#### THE BIBLE **CAN YOU QUOTE IT?**

By LAVINA ROSS FOWLER AND ELIZABETH ROSS WIERSEMA

1. Many phrases are credited to the Bible, by people who never read it. 'Man proposes, but God disposes" was written by Thomas A. Kempis sometime between 1380 and 1471 in his "Imitation of Christ." Proverbs 16:9 gives one with a similar meaning. "A man's heart deviseth his way: but the Lord directeth -

What is unusual about Psalm

3. What goup of men were convicted by their own guilt? John 8:9

4. What controversy ended by Jesus saying, "Before Abraham was, I am."? John 8:58 5. How does Leviticus instruct peo-

ple to donate their own thanksgiving offerings? Lev. 22:29 Four correct...excellent. Three cor-

rect...good.

SHALL WE CHARACTERIZE THE TALKS AS FRANK AND HELPFUR?"

## Here's fun thing to do when 'stuck' in airport

WASHINGTON - You're stuck in the airport and your plane has been delayed, and they're trying to clear the runway of snow, and there are no motel rooms available within the area, and you've been to the airline counter six times and the magazine counter four times, and you've looked at every souvenir they sell, and you've had it with the Moonies and their smelly carnations, and you've run out of quarters for the pinball machines on the balcony. What do you

ART BUCHWALD

I discovered the other day one of the fun things to do is to listen in on other people's telephone calls. Most telephones at airports are located 12 inches from each other and there is no problem pretending you're on the phone when in fact you're eavesdropping on the person next to you.

Here are some of the better conversations I heard while I was killing time at National Airport during the last snowstorm.

"Hello, honey. I'm stuck in Washington and won't get home tonight. Honest to pete, the planes aren't flying...I'm not lying. What do you mean I sound happy? Why should I be happy because I can't get home tonight? I'm not with anybody...I'm by myself. Why do you always keep bringing up O'Hare Airport and the

stewardess every time I get stuck? That was two years ago...I haven't seen her since. Do we have to go through this again? We were just lonely and had dinner and a few drinks together. I don't care what nosy Margie told you we were doing. So she saw us go up in the elevator together at the O'Hare Hilton. Is that a crime? How were we supposed to get to our rooms? Margie's a well poisoner. Look, I wouldn't have called if I thought you were going to make a federal case out of it.

"I have no idea what I'm going to do now. I may have to sleep at the airport...Yes, by myself on the floor. Unless we can figure out some kind of orgy at the Eastern Airlines shuttle gate. There is no music in the background...that's a loudspeaker announcing that all planes to Atlanta have been canceled. Maybe I'll get out tomorrow morning. Think what you want to...Just because it isn't snowing in Rochester doesn't mean it isn't snowing here. GOODBYE."

The man on my right was reading from a notebook. "Charley, I'm not going to get there for the meeting tomorrow morning. Tell Griswold the Navy has changed the specs on the GX-156 and they want the AJ-30s pointing toward the stern instead of the bow. I told them it would cost an extra seven mil and they said they didn't care because it would still be cheaper now than when the GX got off the drawing boards. Also inform Wilson that we have to make modifications on the cycli-calibers under the anti-radar booms. I told them that would cost another 10 mil, but no one batted an eye. And slip Mac a note that Capt. Ringding, who gave us the contract, was passed over and is retiring next month and wants the job we promised him. I know he can't read a blueprint, but he may be helpful to us when we have to break the news to the Navy about the 60 mil overrun.

I walked a few telephones down. A lady was shouting into the phone. "Paul, I won't be home. There's hamburger in the freezer and canned peas in the closet or baked beans - whichever you want. Look, don't get mad at me. I don't care what the kids are doing. I'm tired and I had a rough day and the people I was supposed to meet couldn't get into town so they postponed the meeting to next week and I'm going to have to come back. Well, take them all to a Burger King if you don't want to cook. I couldn't care less if they eat or not. All you can do is nag, nag, nag. You should have thought about it before you let me accept my commission as an adviser to 'The Year of the Child."

The last call I heard before I went back to the magazine stand to take another look at Playboy was being made by a man with a big grin on his face. "Honey, you're not going to believe this. The airport is closed and I'm stuck here overnight. I'll be over as soon as I can find a taxi."

## Big Alaskan land fraud looms

**WASHINGTON MERRY-GO-ROUND** 

By JACK ANDERSON

WASHINGTON - Hollywood to the contrary, tracking down scandals in Washington is not just a case of cocking an ear at the right party, meeting an informant in an apartment garage or taking a phone call from a disgruntled government

We recently assigned our associate Hal Bernton to a month-long investigation of what may prove to be the biggest attempted public-lands swindle in the 20th century. He crossed Afognak Island, Alaska, in a tiny Cessna, his bush pilot swooping down for close-up looks at phantom native villages - settlements that existed only on paper and were the basis for the suspected land fraud.

The evidence Bernton gathered convinced us - as investigators for the Justice and Interior Departments had also concluded - that not only the federal government, but native American corporations in Alaska are being ripped off in a land-grab scheme that could dwarf Teapot Dome in acreage and potential profit.

To make matters worse, internal Interior Department documents reveal that the Bureau of Indian Affairs (BIA) ignored the fraud scheme. A federal grand jury indictment came to nothing when a strange affidavit by an Indian Affairs lawyer "knocked the bottom out of the case," according to Justice Department sources.

The background of the great Alaska land grab goes back to 1971, when Congress passed the Alaskan Native Claims Settlement Act. Under its terms, the state's Eskimos, Indians and Aleuts will eventually receive some \$962 million in federal and state

funds and take title to some 40 million acres of federal land in Alaska.

Title to the land is deeded over to a dozen regional native corporations and more than 200 village corporations. Individual natives are stockholders in the corporations and share in the profits from sale or exploitation of the land

Most of the native corporations are doing a good job with heavy responsibilities laid on them by the claims act. But federal investigators are convinced that one of these corporations, Koniag Inc., with headquarters in Kodiak, has attempted fraudulently to obtain more than 600,000 acres of valuable land it is not entitled to. An FBI investigation into Koniag's affairs led to the grand jury indictment that was eventually shot down by the BIA affidavit.

government investigators, is fairly simple. It consists of creating phantom villages and setting up village corporations to claim land under the 1971 act.

Congress explicitly stated that a village must have had at least 13 permanent native American residents in 1970 to qualify for a land grant. But seven out of the 16 villages sponsored by Koniag clearly failed to meet even this modest requirement, according to federal investigators.

Interior Department sources report that village enrollments, now in the possession of the Bureau of Indian Affairs, are filled with names of natives who had never even visited

One Koniag "village" called Litnik was inspected from the air by our reporter. He circled the area several

times and photographed the only existing structures - four big red bunkhouses used as a summer retreat by military personnel. He found no evidence that 13 natives had ever occupied the site. Yet Litnik's village corporation was certified by the BIA as eligible for 69,120 acres of land.

The FBI investigated another Koniag village, Port Williams. The only signs of life were a small fish cannery operated by Washington Fish and Oyster Co., plus a handful of residences connected with the cannery. The native Americans claimed as residents were scattered all across the United States, and FBI sources told us that 90 percent of the residence affidavits were phony. Yet Port Williams, too, was certified by the BIA as eligible for 69,120 acres.

In fact, all of Koniag's villages were initially okayed for land by the Bureau of Indian Affairs. According to a former BIA attorney, now with the Interior Department, it was felt that reasonable doubts should be resolved in favor of the claimants.

SOMETHING THEY SAID? At the end of each academic year at the Navy's huge medical center in Bethesda, Md., the big splash is a hail-and-farewell party for arriving and departing hospital interns. And the highlight of the party is a raucous skit, likened by one participant to the kind of stuff that goes on at a fraternity house blowout.

Well, the combination of mordant medical humor and earthy seagoing expressions in last year's skit was enough to make a sailor blush. Unfortunately, the sailor in question was a rear admiral, J.T. Horgan. He fired off a memo that said, "it is

my decision that there will be no repetition of such an event at this Command. What got the admiral's goat

remains a mystery. He refused to speak to our reporter Jill Hendrickson, and suggested she put her questions in writing. His written response gave no clue, either.

**NICK THIMMESCH** 

## Iran, Afghanistan: Decline of American will, power

Nick

Thimmesch

WASHINGTON - There is much fretting in the capital over what looks like U.S. weakness in Iran, in Afghanistan, indeed, perhaps across the en-tire globe. Many thoughtful souls here are dismayed, even disgusted, over recent events which humiliated our Flag and make us appear like a feeble

Americans, hands over heads in surrender, are herded like criminals in the U.S. embassy in Iran. Our brave ambassador is killed in Afghanistan. There is trembling in the Persian Gulf, which supplies bourgeois America with oil to propel our sanctified cars, make our homes comfortable and fuel the factories disgorging the enterprise system's goodies.

The quick impulse is to blame all this on the President. Because of his low-key, casual, almost Rotarian manner, it seemed he was saying to the shah, "I hope you make it." Then, with the shah gone, tendering a good wish to Bakhtiar — "Hang in there." And with the triumph of Ayatollah Khomaini, a friendly, "Hi!"

Revolution and violence rage on, much like that people suffered in France when fresh Jacobins rounded up yesterday's revolutionaries as reactionaries, and in 1917 in Russia when the Bolsheviks overwhelmed Kerensky's Menshevik revolution. If one counts prime ministers in Iran, that chaotic country is on its second Kerensky already.

Jimmy Carter is only symptomatic of the power vaccum in parts of the world which allow violent revolutionaries and religious fanatics (there is an authentic Islamic renaissance stretching from North Africa to the Philippines) to rampage and work

Carter is now denounced for doing nothing where his immediate predecessors were denounced and hated for doing something. Carter is almost in a no-win situation

Some would assign our current fecklessness to the American failure in Vietnam and the sapping of presidential power in the aftermath of Watergate and Nixon's resignation. Certainly, our lack of soul and foresight in these tragic events diminished our strength and damaged our ability to affect what goes on in the world. The nuclear parity the Soviets enjoy plus their superiority in conventional forces are also heavy fac-

But a longer look over the years going back to 1945 when the U.S. was unquestionably the world's mightiest nation, the sole nuclear power, shows some brilliant, admirable successes. and likewise, some failures in nerve.

President Harry S Truman's gutsy confrontation with Communist imperalism in Greece, Turkey and Europe in the late '40s served America well. The cruel Berlin blockade of 1948-49 was stopped only one month after the West showed it meant business by forming NATO.

Only one year after American forces left Korea, the Communist invaded the South, and again, a courageous, lightning strike by Truman saved that nation. The day after Iraq fell to revolution-

aries in 1958, causing tremors across the Arab world, President Eisenhower sent 12,000 Marines ashore in Lebanon, without one American injury or death, and assured that country's peace for 19 years.
But timidity had its day, too. The

U.S. did nothing to help Hungary's Freedom Fighters in 1956, and at the same time, the British and French showed in the Suez Crisis they had lost heart for world leadership roles. President Kennedy fouled the Bay

of Pigs invasion, but was manful during the Cuban missile crisis. Then after Khrushchev stared him down in Vienna in June, 1961, it was only weeks before the Communists began building the infamous Berlin Wall.

There was no immediate opposition from the West to this barbarous wall, though later it was revealed that the German Communist police guarding this despicable project were without ammunition. Despite later showdowns between Communist and American tanks, and "Ich Bin Eine Berliner!" public relations, the West acquiesced in Berlin. It remains a sad

We crushed the Tet offensive in Vietnam in 1968, and the Viet Cong as well. But antiwar protestors at home nullified that victory. Hanoi's negotiator, Leo Duc Tho, could scoff and rebuff Dr. Herny A. Kissinger's arguments by saying that American pro-testors could get North Vietnam what it wanted. President Nixon, one eye on populaity polls and one on U.S. prestige, announced total troop with-drawals long before "peace was at

Rod, Sherry Steiger

### Names in the news

LOS ANGELES (AP) - The estranged wife of Rod Steiger has filed suit seeking a \$2.5 million settlement from the actor in a suit similar to one filed against Lee Marvin by his former live-in lover Michelle Triola

Marvin Mitchelson, attorney for Miss Marvin's suit to obtain half the assets Marvin accumulated while they lived together, filed the suit Tuesday

Sherry Steiger, 41, seeks to overturn a pre-nuptial agreement with Steiger that prevents her from recovering property accumulated in their nine-year relationship. The Steigers lived together four years prior to their 1973 marriage. A divorce hearing is scheduled for April.

ATLANTA (AP) - President Carter smiled when he saw his smiling portrait. He likes it, he says, because it's not all teeth.

The portrait, painted by artist Robert Templeton of Woodbury, Conn., was unveiled Tuesday at the state Capitol.

Carter, often characterized by his toothy smile, praised the portrait, commissioned to hang in the state Senate where he served from 1963 to 1967. Private donations paid the \$4,500 cost of the painting, which shows Carter seated at a desk 'You don't know how nice it is to see a portrait of you that isn't 80

percent teeth," Carter commented.

MOSCOW (AP) - Soviet Premier Alexei Kosygin is 75 today, still a step away from the top Kremlin job but apparently not yet ready to

Rumors circulating in the early 1970s that he soon would retire have subsided with Politburo circumvention of a rule that would have forced Dissident physicist Andrei Sakharov has called him the "most intelli-

gent and toughest" man in the leadership, and educated Russians see him as the man who manages the seemingly unmanageable economy: Kosygin was 13 when the Russian Revolution broke out in his home city of Leningrad. He joined the Red Army at 15, trained as an engineer, ran a

textile mill and became mayor of Leningrad in his climb to power. His former mentor, the late Premier Nikita Kruschev, said in his memoirs that he "simply can't explain" how Kosygin survived the Stalinist purges of the 1940s.

## Church leaders wary of new administration

AUSTIN, Texas (AP) - A statewide Presbyterian leader has told Gov. Bill Clements some church leaders fear his administration will serve only the rich and powerful.

The Rev. William Fogleman of Denton was assigned Tuesday to give the response after Clements addressed the 10th annual assembly of the Texas Conference of Churches.

Fogleman is general presbyter (chief executive officer) of the statewide Synod of the Red River, Presbyterian Church of the United States.

Clements told the assembly he believed the church should stay out of political affairs although it does have a social mission.

"No government can succeed outside of God's grace, yet I have strong feelings that the place of the church is not in politics," Clements said.

Fogleman replied: "We tend to hear phrases like that to mean politics will worship whatever god it will, and the church should mind its benign

# Drug company to toast products that launched 100-year success

CHATTANOOGA, Tenn. (AP) — A Chattanooga drug company celebrates its first hundred years today with a toast to the future — and perhaps at least a nostalgic look at its colorful past.

The company is Chattem Inc., a company with dozens of nationally advertised products and four divisions which is aggressively marching toward more acquisitions to further expand its line.

But for nearly 50 years, the company relied on two products which became staples in southern medicine chests — Black Draught laxative and Wine of Cardui, a tonic for women's

## Paper workers approve contract

PORTLAND, Ore. (AP) — Workers at seven Crown Zellerbach Corp. paper mills in Oregon, Washington and California approved a new contract Tuesday night, improving chances for settlement soon of the nation's longest pulp and paper strike.

Of 3,828 workers voting, about 70 percent approved a new pact, said Bob Cochrane, president of Local 5 of the Association of Western Pulp and Paper Workers.

With the contract ratified, the num-

ber of striking workers is cut in half, and observers feel other AWPPW locals might follow the Crown Zellerbach workers' lead.

The Crown Zellerbach workers struck the plants last August after a prior contract expired. The plants are located at Port Townsend, Port Angeles and Camas in Washington; West Linn and Lebanon in Oregon; and Antioch and Los Angeles in California.

menstrual problems.

"There will be just one toast at our anniversary banquet," Chattem's president, Alex Guerry, said Tuesday. "And that ... will be to our second century."

Guerry is the fifth successive member of his family to head the company which was founded as the Chattanooga Medicine Co. on Feb. 21, 1879, by four Chattanooga businessmen to peddle Thedford's Black Draught Laxative which they purchased from the Dr. A.Q. Simmons Liver Medicine Co., whose founder, Dr. A.Q. Simmons, had developed it in 1840.

Black Draught and Cardui are still around. Guerry won't reveal present sales of Black Draught but said they were well over a million dollars.

product," Guerry said, pointing out that despite today's tightened U.S. Food and Drug Administration standards the company still sells the same basic product and "we still make the same claims for it."

Chattem has grown from its first year's annual sales of \$35,488 to nearly \$55 million in the fiscal year ending in June 1978.

Its product line has been expanded to include hundreds of nationally advertised items such as Pamprin, Shy feminine syringes, Mudd complexion cream, Sun-In hair lighteners and Corn Silk cosmetics. Additionally, the company acquired the DePree Co., of Holland, Mich., in 1968 and its line of beauty and health care items. In 1970 it added Petrochemicals Co. Inc., a maker of specialty chemicals based in Fort Worth, Texas.

In the past 10 years, Guerry has acquired 11 companies or product lines in his product diversification campaign.

campaign.

He was reluctant to talk about spe-

cifics of future acquistion plans.

# Woman seeks punitive damages after two sex-change procedures SAN FRANCISCO (AP) - A patients are so numerous that it is not December of that year, the state

SAN FRANCISCO (AP) — A woman who says a sex-change operation left her virtually neuter, neither man nor woman, is asking \$7 million in damages from her physician, whose California medical license was later revoked.

Jury selection was to begin today in a suit by Julie Phillips, who has accused John Brown of medical improprieties in connection with two operations to change her from a man to a woman.

"I don't know where I belong," Ms. Phillips told a reporter Tuesday. "I don't belong in the gay life. I don't belong in the straight life.... It isn't the money, I want peace of mind."

Attorney Melvin Belli, one of the country's foremost medical malpractice lawyers, says he is asking \$5 million in punitive damages and \$2 million in general damages against Brown and his "agent," James Spence. Belli claims Spence falsely represented himself as a doctor.

Neither defendant was available for

comment.

The suit said Ms. Phillips was treated in December 1973 and January 1974 for breast implantations

and the alteration of her male geni-

tals "so that she would have fully

functioning female genitalia."
The suit accuses Brown of violating medical standards, using Spence as a medical assistant, employing his patients as medical assistants and, among other charges, performing sex-change operations "on demand" and without psychological evaluations.

Ms. Phillips claims Brown charged her \$5,000 and once used her to assist in a nose-reconstruction operation on another patient.

The suit said Brown conducted the sex-change operation in two stages, "thus submitting the patient to a castration, with a lapse of several weeks between that operation and the second one, in which a vagina was created."

The suit alleged that "the purpose of performing this two-stage procedure was not to benefit the patient but solely to defraud insurance companies that would not pay for sex-change operations."

As a result of the operations, the suit claimed, Miss Phillips "has suffered and will suffer profound and permanent physical and psychological injuries and damages and irreparable injury" to her relationship with John Phillips, the man she calls her husband.

"Dr. Brown's acts of wanton and reckless disregard of the safety of his

patients are so numerous that it is not possible to set them out in this complaint," the suit charged.

At the time of her operations, Ms. Phillips said, she was living with a man and capable of experiencing pleasure from both heterosexual and homosexual acts.

She filed her suit in July 1977. In

December of that year, 'the state Board of Medical Quality Assurance proposed Brown's license be revoked after finding him guilty of gross negligence in the cases of Ms. Phillips and three other individuals. Administrative Law Judge Paul Doyle signed the revocation order which is still in force, the board confirmed Tuesday.

# Kennedy defends Carter's efforts to conclude SALT II

WASHINGTON (AP) — Sen. Edward M. Kennedy, a recent critic of President Carter's budget priorities, is defending Carter's efforts to conclude a SALT II pact with the Soviet Union.

In a speech Tuesday to the Arms Control Association, Kennedy, D-Mass., said the president is correct in saying that a Senate failure to ratify SALT II would make the world a more dangerous place in which to live.

Carter said Tuesday in an Atlanta speech that work on the treaty is nearly complete. And he emphasized that the turmoil in Iran and Southeast Asia will not stand in the way of agreement on the pact.

"It is in our national interest to pursue it (the treaty) even as we continue competition with the Soviet Union elsewhere in the world," Carter said. Also, he strongly rejected demands by conservatives for a foreign policy linking progress on arms negotiations with the Soviet Union's conduct around the world.

Senate Republican leader Howard H. Baker, a likely presidential contender, has said he is determined to make the arms pact a subject for a searching partisan debate in the Senate.

Baker told a recent meeting of Republicans officeholders that the era of bipartisanship in foreign policy is outdated and should no longer prevail.

Partisan voices, Kennedy said, falsely portray SALT II as part of a general strategic retreat by the United States.

"Full of sound and fury, they un-

dermine our national security by advocating a nuclear arms race instead of nuclear arms control with the Soviet Union," he said.

"These partisan voices do our na-

tion a grave disservice," he said.
"They exaggerate the real problems which we face and they fail to offer adequate alternatives.

"They sell America short. They do not give the nation credit for our political, economic and military strengths. They minimize or ignore the weaknesses of our adversaries," Kennedy said.

Trying to make SALT ratification a partisan issue ignores the fact that the groundwork for the current treaty was laid in the Republican administrations of former presidents Richard M. Nixon and Gerald R. Ford, the senator added.

Kennedy's endorsement of SALT

Kennedy's endorsement of SALT came after widely publicized disagreements with the president over whether defense or domestic needs should receive top priority in Carter's proposed budget for fiscal 1980.

# Ship to be sold for scrap

HONG KONG (AP) — The American container ship Mayaguez, which the Cambodian Communists seized in 1975, will be auctioned for scrap, its owners said today.

Sea-Land Orient Ltd. said the 10,-

485-ton ship, built in 1945, is "too old to be efficient."

A spokesman said no date has been set for the auction but all scrap

dealers in Asia will be welcome to bid. The Mayaguez arrived from Singapore Monday night.

The ship was seized in Cambodian waters by the Khmer Rouge on May 12, 1975, several weeks after the Communists captured Phnom Penh, and was released a few days later after U.S. Marines landed on Cambodia's Tang Island to rescue the crew and free the ship.

Fifteen Americans were killed in the landing, and 23 died in a helicopter crash en route to take part in the operation.

Individual
Retirement Accounts
at First Savings are
the sure way to build
for a secure retirement

for a secure retirement, and get a tax break at the same time.

If you're working for a company that does not have a retirement plan and you feel unprotected, then an Individual Retirement Account (IRA) at First Savings is the thing for you.

With an IRA, you save for the future at the impressive current interest rate of 8% (effective annual yield 8.33%). Deduct whatever you save - up to \$1500 - from you gross income, and defer every penny in taxes on your IRA until you withdraw it, normally after retiring. Then, you'll probably have less income and possibly be in a lower tax bracket.

(NOTE: There are severe penalties for withdrawals before age 591/2.)

Here's an example of what an IRA can do for you. If you start an IRA at age 30, and deposit the maximum of \$1500 per year until age 65, at the current interest rate, your IRA will be worth over \$300,000. That's a tidy sum to start retirement, if you want to retire that young. By the way, your IRA is in addition to standard Social Security benefits. But remember, the deadline for starting or adding to your IRA is the date your taxes are due.

So stop by either First Savings office . . . downtown at 500 West Wall or San Miguel Square . . . , and let the "FISCAL FITNESS PEOPLE" show you the sure way to save for retirement. It's getting later than you think . . .

## Saddle sores for eyesores

By HUGH A. MULLIGAN **AP Special Correspondent** 

NEW YORK (AP) - Friends congratulated engineer Henry Hornbostel when the Queensboro Bridge across New York's East River opened

"It's a goddam boiler shop," lamented the bridge builder, conceding the ugliness of the black steel cantilever structure that still darkens the sky outside the U.N. Building.

History should honor the forgotten Hornbostel for his candor.

Did the architects who designed those atrocious highrise Harvard dormitories that destroyed that lovely skyline along the Charles River in Cambridge, Mass., similarly admit the aesthetic blight they had perpe-

ANYHOW, horse whipping as a prime time entertainment for the masses should have been re-introduced in Harvard Square to handle

the problem as soon as the plans were unveiled

All of which leads to the thought that it may not be too late to save the nation's capital and Pierre L'Enfant's master plan, drawn up in 1791, from the high rise horrors rising from the drawing boards of commercial developers in Rosslyn, Va., just across the Potomac.

This tacky suburb of filling stations, motels and a gorgeous view of Washington, D.C., is planning to assault the public patience and sensitivity with 300-foot-high glass monstrosities that would overwhelm one of the most pleasing skylines anywhere in the world, a national visual treasure that belongs to all of us.

PERHAPS a horse whipping on Washington's birthday in front of the Washington Monument using one of George's authentic horsewhips from the carriage house at Mount Vernon might instill a little patriotism into the hearts or wherever of those who would desecrate the beauty of the city named for our first president. At least the resulting saddle sores might coax them to reappraise, from a stand-up position at their drawing boards, the eyesores that will be inflicted on generations of high school graduating classes and other tourists yet un-

bused into the nation's capital. It's a pity that such a threat should hang over a city with such architectural treasures as the Lincoln and Jefferson memorials, the impressive domed Capitol, the exquisite residence of the Carter family on Pennsylvania Avenue, etc., and so recently graced with the startling beauty of I.M. Pei's East Building of the National Gallery.

Sadly, much of downtown Washington's commercial development has been marred by gruesome glass office buildings and hotels, packed tightly together along the broad avenues and into the tinier side streets, but at least restraint in height has been maintained. The red tiled roofs of the old government buildings still command

ONE WONDERS why so much of America's architecture is so determinedly ugly.

A few weeks ago I had occasion to travel in Mexico and everywhere was impressed with the gaiety, the gran-deur, the daring use of color and design in their architecture. Even their high rise structures show an imaginative use of available space, especially in the knife-edge sharp glass buildings that thrust a bold triangle into the corners of Mexico City's broad diagonal boulevards, which were laid out in conscious imi-

tation of Paris. Harvard, America's oldest and once its loveliest college, is dismal, dingy and cluttered beyond redemp-

The National University of Mexico, the oldest in the Western Hemisphere, is a fantasia of striking mosiacs, colorful murals, futuristic glass and concrete designs that give the Faculty of Architecture its deserved world wide pre-eminence.

But the effect is not that of a headlong stampede into the future, a wild attempt at being different just for the sake of being shocking rather than harmonious and pleasing. Mexico's architects do not seem to be afraid of the past; in fact they often embrace it with as much ingenuity as they pursue the modern and the futuristic.

THE GRAND Hotel Ciudad de Mexico, on the cathedral square in Mexico City, has been built within the shell of an old department store, using the same beautiful Tiffany glass skylights and old wrought-iron elevator cages to enhance the striking lobby.

One of the country's medical schools near Oaxaca is an unabashed re-creation on a grander scale of Tara, Scarlet O'Hara's plantation, because the architect was an unabashed admirer of "Gone with The Wind."

In the new church on Isla de Mujeres, the island of women, off the Yucatan Peninsula, the sculptor has done the 14 stations of the cross by depicting only Christ's hands on the path to Calvary: hands bound in ropes at his sentencing, holding the cross, embracing his mother, stretched out to receive the nails, etc. The effect is overpowering.

CANCUN, the new resort picked by a computer, features an ultra-modern luxury hotel, the Camino Real, rising on the same angle of declination as El Castillo, the great pyramid in the Mayan ruins at Chichen-Itza, and a new shopping center, El Parian, designed in the shape of a bullfight arena.

What is boldly new in Mexican architecture seldom seems to intrude on the old: the baroque old Spanish churches, the exquisite delicately carved Mayan, Aztec and Zapotec ruins, the lush parks and many monuments. It seems fitting somehow that Paseo de La Reforma, Mexico City's wide main street of startlingly modern hotels and office buildings, was laid out by the beautiful Empress Carlotta so she could have an unobstructed view of her husband, the Emperor Maximilian von Hapsburg, riding home from the palace in his famous black carriage.

## Cohabitation now faces court test in Illinois

By WAYNE SLATER

ROCK ISLAND, III. (AP) - When actor Lee lover, legal observers predicted the decision precedent for cohabiting couples. But some aren't waiting for the outcome.

Last month, Barbara Pulley filed a property state ERA as his legal settlement suit against William Gehlken, with whom she lived for seven years until last spring. She is seeking a settlement exactly as if they

had been married. Miss Pulley's action, filed in Rock Island Circuit Court, was modeled after the Marvin suit in California and is apparently the first of its kind in Illinois since the Marvin trial began.

"It's an explosive issue and emotions run high on both sides," said Douglas Scovil, Miss Pulley's lawyer. "What we're asking basically is that she be given a just and fair share of the proper-ty, profits and earnings or, in the alternative, that the court divide the entire joint tenancy

property." Naomi Ross, state president of the National Organization for Women, said Monday she is interested in the outcome of the suit because of what it could mean for other women, not just celebrities, who contribute to a relationship but lose when the couple splits

Rights Amendment) that relationship," Scovil would grant equal distri- said. Marvin was sued for sup- bution of property in a port by his former live-in marriage situation, but ing together in April what it would mean to 1971, court records show,

## Faces of Sante Bario

By DOLORES BARCLAY

He was the Lon Chaney of intrigue, an agent who changed disguises - indeed, his whole character to crack a case.

Sante Alesandro Bario, skilled drug agent, old world charmer, gourmet cook, gardener. A trusted colleague to fellow agents. A delight to friends and family. A man of many faces.

But now, as Bario lies in a coma with massive brain damage at Santa Rosa Hospital in San Antonio, Texas, a final face is etched. It seems to pose a question. Is this man a victim? Or a corrupt offi-

For after all the awards and danger, the 42-yearold former agent of the federal Drug Enforcement Administration was indicted last October, while assigned to Mexico, on a charge of accepting a \$9,000 bribe from an informant in a cocaine case.

Then, on Dec. 16, after eating a peanut butter sandwich while in a San Antonio jail, Bario began to choke and went into extreme convulsions with his back arched and head thrown back.

A hospital urine test found spots technicians said were strychnine. Later tests by a medical examiner did not find the poison. The circumstances raised questions: Was Bario

poisoned? Could it have something to do with his cocaine investigations? His indictment? Past cases involving organized crime? There are no ready "Judging from the awards he received, he had a

remarkable career," said Gerald Goldstein, Bario's attorney. "By the time I saw him, he was unwrought.

'He was obviously afraid of being in jail because think he was afraid of his own agency. He also had expressed some concern about Mexican authorities because he felt he had put his neck out on a limb investigating corruption among high Mexican authorities.'

After collapsing in jail, Bario stopped breathing so long that he suffered massive brain damage, says Dr. Donald H. Perez, his physician.

The cause of this respiratory arrest "remains to be investigated," Perez said. "The police who brought him in said he had been poisoned. Some lab reports show spots in the urine that could be strychnine." But medical examiner Ruben Santos says what the

technicians saw were traces of a drug his psychiatrist prescribed that reacted with medication given to revive Bario. "We are 100 percent sure that the man was only showing a reaction of Elavil with prescribed emergency medication and was not poisoned," Santos said.

Perez said a Houston lab will now re-test Bario's specimens.

It is unlikely Bario will ever face a trial or tell what he knows. His prognosis is poor, or as Dr. Perez puts it: "He's vegetating." 'Surely, someone with his background would have

enemies in several places," says Joanne Bario, the agent's wife. "I know there are a lot of people who would like to

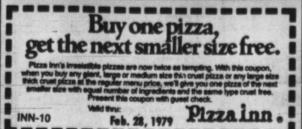

see him out of the way so he couldn't testify," adds Patricia Bario, his ex-wife, antassociate White House press secretary. "Considering the work he was in, I don't think it was unnatural. Bario had a flair for playing a role, and easily infiltrated organized crime and drug rackets. A

native of Italy, he masqueraded as a cabaret owner to help recover 100 kilograms of heroin in a 1972 French case, and at one point had to leap from a ship in Marseilles. He had worked undercover for the IRS and the Knapp Commission, which investigated official corruption in New York City, and had been a decorated officer in the Carabinieri, Italy's national

He joined the DEA 14 years ago and received several commendations, including a presidential achievement award from Richard Nixon. He was promoted in 1977 to the Mexico City office.

"He was to do administrative work only. But Claude Picault entered the picture. He only spoke French so my husband was given his case," said the current Mrs. Bario. "The DEA knew this informant

# Inn-triguing Offer.

, had to be handled carefully. He was a ... con man who dealt both sides.

"My husband was doing three or four jobs at once. It would be understandable if he made a misjudgment," Mrs. Bario said.

"He had lost a lot of weight and had aged tremendously ... He was extremely upset and pretty much destroyed when he was arrested.

'He made a statement to one of the DEA agents that he didn't understand how, knowing his background, they could turn on him when they knew the informant was corrupt."

The indictment says Bario allowed Picault to keep and sell one-third of 15 kilograms of cocaine which Bario was to seize in Mexico City and that later in Chicago, Bario was given \$4,000 from the sale. It says Picault - wired for sound by the DEA - agreed to meet in San Antonio to pay Bario more. They met and Bario was arrested

"The allegations against Bario are not false. Our internal security office would not make recommendations if not carefully studied," said Peter Bensinger, administrator of the DEA. "It doesn't mean that we don't care or aren't interested in his well being. We are. But your duty has to come first in upholding the law.'

Attorney Goldstein does not think his client was framed, but he notes it was not uncommon to allow informants to transfer drugs between countries - as Bario allegedly allowed Picault to do. Says the first Mrs. Bario: "He had had many

opportunities to take money and certainly more than that. He would have been eligible to retire in eight years and there's no way in the world he would have jeopardized that."

Bario, a lover of Verdi operas, also had a taste for expensive clothes. But, says his first wife, most of his salary was sent to Italy to his parents and seven brothers and sisters.

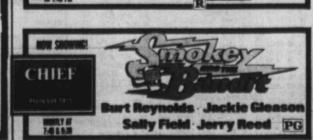

He spent a great deal of time with his children, Pat Bario said. "He'd tease the babies and come into the room doing a little jig. When Sante walked into a room, everyone's eyes lit up."

## Correct address asked on letters

"mailing address" will assure a letter's delivery, said Midland Postmaster D.E. Holster.

The address found in the telephone book is often not the correct mailing address for postal customers. This is especially true with rural route customers whose address should include the rural route number and the box number, Holster said.

"Addresses such as County Road 1233 becomesca puzzle to rural letter carriers unless the carrier happens to remember the name and box number of that customer and where it is postmaster said.

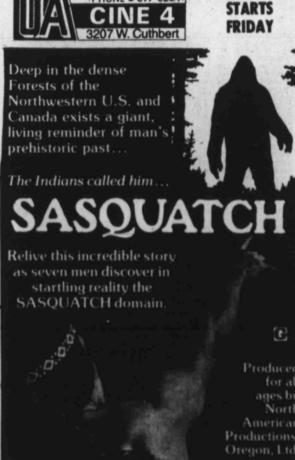

Holster noted that Midland has five rural routes and two Star routes delivering to the farms and

Using the correct ranches in Midland County. Unless the mailing address is correct, the piece of mail will be delayed or even returned to the sender.

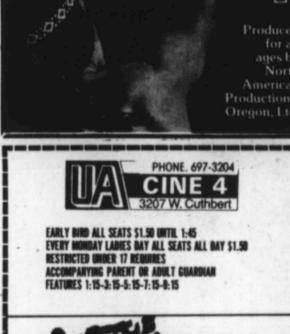

> Mail addressed to postal customers living within the city limits on a city letter route is often delayed or returned to the sender when using a street address when the postal customer has rented a post office box and has instructed the post office not to leave mail at their residence.

Livestock

DES MOINES, lowa (AP) — Central US ariot beef report - f.o.b. Omaha basis includes the major production areas in the didwest and Texas-Oklahoma Panhandle) Midwest and Texas-Oklahoma Panhandle) as of 11: 15 a.m.

Compared to Friday's 4: 30 report: Steer and helfer beef not established early. Load canner-& cutter-cow beef steady. Trading slow; demand mod-crate to light especially into East Coast areas where adverse weather hampered weekend retail movement. Sales reported on two loads of carcass beef.

Steer beef: One load choice 4 600-900 lbs M 25.

AMABILLO, Texas (AP) — Trade opened fairly active throughout the Panhandle area early Tuesday. Slaughter steers 25-36 higher, heifers 50-75 higher but

hardly enough heifers soid for price trend. Most feedlots reported fairly good interest from most buying sources. Sales on 8400 slaughter steers and 600 heifers. All live cattle prices based on net weights f.o.b. the feedlot after 4 percent shrink.

Slaughter steers: Good and mostly choice, 70-80 percent choice, 2-3 1000-1173 lbs 63.50-66.50, around 2500 head included at 66.50, mixed good and choice 2-3 1025-1150 lbs 63.00-65.50. Slaughter heifers: Couple loads choice 2-3 825 lbs 65.00, mixed good and choice 2-3 836-973 lbs 63.00-64.00.

FORT WORTH, Texas (AP) — Cattle and calves: 200; not enough cattle on hand to test trends in a mostly clean up type trade.

Hogs: 200; barrows and glits .50 lower. US 1-2 200-230 lbs. 52.06-52.50; US 2-3 200-270 lbs. 51.50-52.00.

Sows: Steady. US J-3 300-600 lbs. 46.00.

Boars: 300-650 lbs. 36.00-38.00; 150-270 lbs. 40.00.

SAN ANTONIO, Texas (AP) - Cattle and calves: 400; not enough any one class on offer to fully test trade, represented and carves to full test trade, represented classes firm.

Slaughter cows: Utility 2-3 52.25-56.25, few head cutter 1-2 50.50-53.75.

Slaughter buils: Yield grade 1-2 1000-1300 lbs. 63.75-66.25.

Feeder steers and buils: Few good and choice 400-450 lbs. 98.25-100.00, lot 300 lbs. 114.00. Few 600-650 lbs 78.50-62.50. Good 300-400 lbs. 91.00-101.00, few 210-290 lbs. 110.00-125.00; 625-500 lbs. 80.00-91.00; 500-600 lbs. 78.50-88.00, mostly 80.25-86.00.

Feeder heifers: Few good and choice 225-425 lbs. 82.25-90.00. Good 300-400 lbs. 80.25-86.00, few 250-300 lbs. 85.50-88.00; 400-500 lbs. 78.25-80.50, few 550-650 lbs. 66.75-74.00.

Hogs: 100; not enough on offer to test trade.

Corn No.2 yellow: export 2.77 ½-2.78 ½, rail domestic 2.97 ½-3.02 ½, truck domestic 2.85-2.90.

CHICAGO (AP) — Wheat No 2 hard red winter 3.47n Wednesday; No 2 soft red winter 3.82n. Corn No 2 yellow 2.39½n (hopper) 2.32½n (box). Oats No 2 heavy 1.44n. Soybeans No 1 yellow 7.33n. No 2 yellow corn Friday was quoted at 2.39½n (hopper) 2.32½n (box).

## **Action-reaction** sequence evolves in many sectors

By JOHN CUNNIFF **AP Business Analyst** 

NEW YORK (AP) - When assumptions and activities become routine and accepted, they will soon be attacked as being counterproductive or ineffective. You can almost bet on it. It might even be a law.

It leads to sudden reversals of behavior: to tax rebellion as an antidote to government spending, to regulation in reaction to free market abuse, to free instead of state-run enterprise in some of the socia-

But in less important or lesser known ways, it occurs all the time in predictable sequence.

The Sunbelt, esteemed for livability, is becoming subject to adverse articles. Big cities, from which people fled, are said to be chic. The big supermarkets are seeding the rebirth of mom and pop And on even lesser matters, the action-reaction

sequence evolves. Have you heard the latest on business travel, which so often is pictured in advertisements as restful, glamorous, luxurious, product-Don't believe it uncritically. "Executives are paying for it with heart attacks," says Richard Lewis,

publisher of a new travel letter for corporate executives. It's gotten a lot tougher of late, he claims. Lewis cited a study of 1,000 heart attack vicitms by Dr. Meyer Friedman, in which it was found that 25

percent of victims reported their illness occurred during a trip or immediately before or after. Lewis describes a lifestyle that is grimly different from that depicted by the airlines, Chambers of Commerce and hotels. In an article in The Travel Letter for Corporate Executives, he writes:

'The pace of business gets faster; more executives are insecure and pushing themselves; airplanes are crammed with tourists flying on cut-rate tickets, and, for U.S. travelers, the much-touted special class for full-fare businessmen is a fiasco."

Beware of jogging too — it might ruin your life. It can be addictive, it is said, destroying one's interpersonal relationships, and leading to a loss of

interest even in one's family and work.

James Fixx and other authors who helped advance the jogging phenomenon, tended to stress the physical and spiritual values of running, such as the joy of health, the appreciation of life. But, says William Morgan, a psychologist, many

runners develop a dependence that is psychologically similar to a heroin addict's need for a fix. They persist, he says, despite devastating effects.

In fact, says Morgan in an article in the magazine
Physician and Sportsmedicine, even pain doesn't

stop the addict. Such runners, he claims, often try to run through pain or take drugs to alleviate it. They also run through their families and work, giving them far lower priorities in their lives. He quotes one unidentified runner as saying "The heck with promotions; I achieve on the road.

The reaction syndrome can be found continuously in various aspects of corporate philosophy.

For example, the rather recent demand for naming outsiders to corporate boards, supposedly to help

the company keep in touch with the community, has already let to the reaction that insiders are better.

The claim is that insiders, such as company executives, know the business best. Isn't it the job of a company to make money for its shareholders? Insiders, so goes the reaction, know best how to do. business community are of far greater depth and substance. They are, in fact, of such magnitude that even business people have trouble accepting their

## More inflation ahead, says poll

By WILLIAM GLASGALL

NEW YORK (AP) - Americans whose pre-tax incomes total \$30,000 a year or more overwhelmingly believe inflation is not about to go away, says a nationwide survey.

Although this group of "affluent" households represents just 9 percent of the nation's 78 million households, the mood and spending patterns of these Americans are of obvious interest to the group of banks, insurance and credit card companies, retailers and investment firms who sponsored the \$1.5 million study.

The survey was conducted last spring by SRI International, a non-profit Menlo Park, Calif., re-search firm, and was released this month. SRI would not disclose the names of the survey's sponsors. SRI said its poll of 2,400 households showed that 85

percent of the men and 87 percent of the women questioned believe "a high rate of inflation will be with us for a long time to come." The respondents split when asked if they believe

they will be able to maintain their current standards of living five years from now despite inflation. But most indicated they don't think the government will bail them out if they fall on hard times. Thirty-four percent of the men and 28 percent of

the women agreed their living standards won't go down even if inflation continues, the SRI report But more than one-third of those polled said they

doubt if they can keep up with spiraling costs, and more than two-thirds disagreed when asked if they thought "if I don't manage to save now, the government isn't going to let me starve later."

According to the Federal Home Loan Bank Board, new home prices have risen 22 percent over the past

year to \$70,900. The gain outdistanced last year's 9 percent increase in the cost of living, and just over two-thirds of those polled by SRI said they believed "it is hard to beat investments in real estate" as an inflation hedge.

## Livestock auction report

Activities at the Southwestern Livestock Auction in Midland Tuesday saw a total of 574 head of cattle pass through the auction. The market was \$1 to \$2 higher on all classes of feeder cattle.

Packer cows and bulls were steady with last week.

Bred cows were steady. Auction prices were:

Steers.....600-700.....\$75 to \$78 .....500-600.....\$78 to \$84 .....400-500.....\$90 to \$95 .....300-400.....\$100 to \$105 .under 300.....\$105 to \$135 Heifers....600-700.....\$62 to \$66 ....500-600.....\$66 to \$68.50 ....400-500.....\$77 to \$82.50 ....300-400.....\$85 to \$88 .under 300.....\$88 to \$98 Cows Utility.....\$58 to \$61 Canner and Cutter....\$48.50 to \$51 Bulls Yield Gr. 1&2...\$66 to \$68.50 Bred Cows ..... \$500 to \$630

## Guess which finesse likely will succeed

By ALFRED SHEINWOLD Life is easy when you have only one chance. Life at the bridge table may be more difficult: You may have to guess which finesse will succeed.

OAQ3 North East South Pass Pass Pass 4 4 Pass All Pass Opening lead - ♥ K

West took two hearts and led a trump. South drew trumps and led the jack of clubs, losing to the king. East

How could South guess that both finesses would lose, and what he could

Since West passed as dealer and then showed up with the ace-king of heart, he could not have both missing kings. Sough need not guess if East holds at least one king.

South draws trumps with the king and ace and then leads a low club from dummy.

MUST TAKE KING East must take the king or lose the club trick. South can then cash the jack of clubs and discard two diamonds on dummy's ace and queen If West has the king of clubs South

gets only one discard on dummy's clubs, but then East must have the king of diamonds and the diamond finesse will surely work. DAILY QUESTION Partner opens with one heart, and

the next player passes. You hold: S-5; H-10952; D-9842; C-K1094. What do you say?
ANSWER: Bid two hearts. With three points in high cards and three points for the singleton you have just enough for the raise. If partner had opened with one spade you would

## Western-style carnival at Vegas

By PATRICK ARNOLD

LAS VEGAS, Nev. (AP) - Residents of this glittering resort community have at their fingertips one of the widest and most sophisticated selections of recreation and entertainment of any city in the country. For one week each year, however, they get a glimpse of the rowdy and brawling

The Elks club-sponsored Helldorado, which this year runs eight days, is an old-time celebration put on for the past 44 years by Las Vegas residents for Las Vegas residents. Tourists are

welcome, but there's never been a real effort made to attract them.

The event, scheduled this year from May 19-27, includes a parade down the Strip, one of the top rodeos in the country, a Western-style barbecue, a massive carnival midway and a host of other often boisterous events.

Ed Branch, the Elks' full-time Helldorado coordinator, expects anywhere from 150,000 to 200,000 persons - the great majority of them Las Vegas residents — to attend at least one of the events.

"They started this way back when the town was very small, probably no

more than 10,000 people," Branch our show," he said. "We did not have the big corporations as hotel owners so there was local participation from the casinos and hotels because they wanted

the local people to be customers." As Las Vegas grew, Branch said, the celebration became even more successful and drew more residents because "90 percent of the population are from somewhere else and are not familiar with the old Western traditions and the things that they used to

"I'd say that the average tourist who comes here probably never sees

This year, for the first time, the traditional Helldorado parade will be held on the Strip because local merchants don't want the parade on Fremont Street, the heart of the downtown Casino Center.

And with that move, the event may attract national attention.

Branch said two television networks had expressed interest in coverage of the parade if it was held on the Strip and there was "a very good possibility of having national television coverage."

## Field area work reported in Basin

The Emperor field of Winkler County has gained its second upper Wolfcamp oil producer with the reclassification of Exxon Corp. No. 1-D Eugen-

ia E. Brown, former gas producer.
As an oil well, it finaled for a daily potential of 30 barrels of oil and two barrels of water. with a gas-oil ratio of 3,000-1, through a 5/64-inch choke and perforations from 7,298 to 7,355

The location is 1,100 feet from north and 660 feet from west lines of section 24, block B-5, psl survey and six miles east of Wink. It is one location east of the other well.

#### GAS EXTENDER

Meadco Properties of Midland No. 1-19 Sugg has been completed to extend Wolfcamp gas production 1/2 mile northwest in the Ela Sugg field of Irion County, 16 miles northeast of Barnhart.

The new gasser finaled for a calculated, absolute open flow potential of 3,091,000 cubic feet of gas per day, with a gas-liquid ratio of 65,232-1.

Production is from pay behind casing perforations from 7,596 to 7,615 feet. The pay was acidized with 1,500 gallons and fractured with 40,000 gal-

Total depth is 8,500 feet and 4.5-inch casing is set at 7,890 feet.

The Ellenburger was topped at 8,-400 feet on ground elevation of 2,333

The wellsite is 884 feet from south and east lines of section 19, block 27, H&TC survey.

#### MIDLAND PROJECT

Mobil Oil Corp. No. 2004 Preston Spraberry Unit has been staked as a 7,700-foot project in the Spraberry Trend Area field of Midland County, 26 miles southeast of Midland.

The location is 1,980 feet from south and 660 feet from west lines of section 21, block 37, T-4-S, T&P survey.

#### **UPTON WELL**

Cola Petroleum, Inc., of Midland No. 1-37 Lula is a new well in the Calvin (Dean) field of Upton County, four miles south of Midkiff.

Opertor reported a daily pumping potential of 25 barrels of 41-gravity oil and 30 barrels of water, through perforations from 8,470 to 8,848 feet. The pay was acidized with 4,000 gallons and fractured with 130,000 gallons.

Wellsite is 1,960 feet from south and 800 feet from east lines of section 37, block 38, T-5-S, T&P survey.

#### MOBIL OILER

Mobil Oil Corp. No. 2902 Pegasus Spraberry Unit has been recompleted in the Pegasus multipay field of Rankin

Operator reported a daily potential of 21 barrels of 34.6-gravity oil, plus 63 barrels of water, through perforations opposite the Spraberry from 7,-664 to 8,062 feet after 7,500 gallons of acid and 100,000 gallons of fracture solution.

The gas-oil ratio is 424-1. Total depth is 13,130 feet.

The well is 660 feet from south and west lines of section 41, block 40, T-4-S, T&P survey.

#### SECOND WELL

The second well has been added to the Old Glory, Northeast (Strawn) field of Stonewall County, four miles northeast of Old Glory.

The new well is Fisher-Webb, Inc., of Abilene No. 1 B. B. Bowles. It finaled for a daily pumping potential of 126 barrels of 40-gravity oil and 15 barrels of water, through perfortions from 5,002 to 5,003 feet. Completion was natural.

A re-entry project, it originally was completed from the Bend Conglomerate to open that pay in the Old Glory, East field.

Location is 660 feet from north and east lines of section 2, BBB&C survey, abstract 872

The Judd sand of the Strawn was topped at 4,980 feet, the Caddo at 5,660 feet and the Mississippian at 4,510 feet. Kelly bushing elevation is 1,577

#### RE-ENTRY SET

Fisher-Webb, Inc., announced plans to re-enter a former Odom well in the ACR field of Coke County and attempt to complete it as the second Canyon producer in the ACR pool.

The project, No. 1 Malone, is bottomed at 7,112 feet. It will be plugged back to 5,900 feet. Location is 660 feet from north and

2,104 feet from east lines of section 322, block 1-A, H&TC survey. It is six miles southeast of Silver.

The location is 3/4 mile south of the other Canyon well.

#### **CRANE RE-ENRTRY**

Gulf Oil Corp. will re-enter a 6,116foot failure in Crane County and attempt to complete it as the fifth Wolfcamp gas well in the Sand Hills, West (Wolfcamp gas) field of Crane Coun-

The project, No. 8 W. N. Waddell and others, is 18 miles northwest of Crane and 663 feet from north and .980 feet from east lines of section 4, block B-27, psl survey. It is one location northwest of other Wolfcamp gas production.

**Dial Direct** TO PLACE CLASSIFIED Want Ads

Tests will be made above 5,890

#### THIRD WELL

The Seco (Strawn gas) pool of Sutton County has gained its third well. It is Robbins Petroleum Corp. of Longview No. 1-15 Meek Ranch, 35 miles southeast of Sonora.

Operator reported a calculated, absolute open flow potential of 350,000 cubic feet of gas per day, through perforations from 4,284 to 4,294 feet. Operator washed with 500 gallons of

mud acid. The well is 1980 feet from south and 1,950 feet from east lines of section 15, block 7, TW&NG survey and one and five-eighths miles southwest of other Strawn gas production.

#### SUTTON PROJECTS

William Perlman of Houston spotted a pair of Canyon gas projects in Sutton County, 18 miles south of Son-

The No. 2-4 Ada Cauthorn is 5/8 mile southwest of the Windsor (Canyon gas) field and 1,320 feet from south and west lines of section 4, CCSD&RGNG survey. Contract depth is 8,000 feet.

The project was staked by Perlman. in the Shurley Ranch (Canyon gas) field. It is 5.5 miles southeast of that

Perlman No. 1-18 Albert Ward and other is to be drilled one and 5/8 miles southeast of the Windsor field. Slated for a 7,500-foot bottom, it is 933 feet from north and 1,200 feet from east lines of section 18, CCSD&RGNG sur-

Perlman also staked this project in the Shurley Ranch (Canyon) field. It is 6.5 miles southeast of the pool.

#### CROCKETT GASSERS

Anderson Petroleum, Inc., of Ozona has filed potential tests on three more wells in the Ozona (Canyon gas) field of Crockett County, approximately 28 miles southwest of Ozona.

the operators No. 2-42-A Laura Hoover Estate, 5/8 mile south and slightly west of production, was finaled for a calculated absolute open flow potential of 11,600,000 cubic feet of gas per day, through perfortions from 6,594 to 6,722 feet. The pay was treated with 6,000 gallons of acid and fractured with 131,540 gallons.

Wellsite is 1,979 feet from north and 661 feet from west lines of sectidon 42. block MM, T&StL survey.

Anderson No. 1-14-G Elmer Hoover Hatton Estate, 1.5 miles west of other Canyon gas production, was completed for a calculated, absolute open flow potential of 1,265,000 cubic feet of gas per day, through perforations acidized with 4,500 gallons and fractured with 96,000 gallons.

Location is 700 feet from south and 1,200 feet from east lines of section 14, block MM, T&StL survey.

Anderson No. 1-13-I Elmer Hoover Hatton Estate, 3/8 mile west of other Canyon gas production, finaled for a calculated absolute open flow potential 1,115,000 cubic feet of gas per

Completion was through perforations from 6,842 to 7,020 feet after 3,000 gallons of acid and 96,000 gallons of fracture solution.

The wellsite is 1,250 feet from south and 661 feet from east lines of section 13, block MM, T&StL survey.

#### REAGAN WELL

Houston Oil & Minerals Corp. No. 8-17 Merchant Estate is a new well 12 miles northeast of Stiles in the Spraberry Trend Area of Reagan County.

It finaled for a daily flowing potential of 148 barrels of 41.1-gravity oil and 41 barrels of water, through an open choke and perforations from 7,-066 to 7,824 feet. The pay was acidized with 1,000 gallons and fractured with

70,000 gallons. Total depth is 7,950 feet and 4.5-inch casing is set at 7,911 feet. The plugged back depth is 7.910 feet.

Location is 1,200 feet from north and 700 feet from west lines of section 17, block A, L&SV survey.

#### TAMARACK OILER

Tamarack Petroleum Co. of Midland also completed a well in the Reagan County portion of the Spraberry Trend Area field.

Operator reported a 24-hour pumping potential of 91 barrels of 38-gravity oil and 102 barrels of water, through perforations from 6,499 to 8,054 feet.

The pay was acidized with 2,000 gallons and fractured with 40,000 gal-

Total depth is 8,180 feet and 4.5-inch casing is set on bottom.

Wellsite is 1,320 feet from south and east lines of section 47, block C, L&SV survey and six miles northwest of Stiles.

T. C. Meador of Eldorado No. 14 T. C. Meador has been completed in the Velrex (upper Canyon oil) pool of Schleicher County, 16 miles northwest of Eldorado

It finaled for a daily flowing poten-'tial of 55 barrels of oil and 26 barrels' of water, through a 1/4-inch choke and perforations from 6,654 to 6,-660 feet. Gravity of the oil is 41 degrees and the gas-oil ratio is 2,548-1. The pay section was treated with

1,100 gallons of acid and fractured with 29,500 gallons. Hole was drilled to 6,875 feet and 4.5-inch casing was cemented at total

The well is one location north of other upper Canyon oil production and 1.667 feet from south and 467 feet from east lines of section 1200, Geor-

getown Railroad survey. The No. 14 T. C. Meador is the ninth well in the field which also produces from the Henderson and upper Henderson zones of the Pennsylvanian.

## Line tie-in approved

AUSTIN, Texas (AP) - A proposal to allow Menard in West Central Texas to tie in with Lo-Vaca Gathering Co.'s pipeline system has been approved by the railroad commission.

Menard has been running short of natural gas since the city's gas supply became depleted just before the onset of winter.

"The city lacks a reliable source of gas," said commission examiner Michael George, "and its citizens have endured substantial hardship as a result."

A hearing scheduled for later this month was waived by Menard and Lo-Vaca in order to expedite a pipeline construction project proposed by Lo-Vaca.

Lo-Vaca plans to lay 4.92 miles of pipelines connecting the city's distribution system with Sun's local production facilities, George said.

The commission accepted George's recommendation Tuesday to authorize Lo-Vaca to buy up to 500,000 cubic feet of natural gas a day from Sun Gas Co.'s Menard County production to supply Menard.

George said Menard and Lo-Vaca already have agreed to gas rates.

George assured the commission that the gas supplies of Lo-Vaca's present customers will not be affected by the arrangements with Menard.

## Hearing set on royalty

AUSTIN, Texas (AP) - The School Land Board will hold a hearing April 3 on proposals to increase the state's royalty from oil and gas production on state lands.

"Texas leads the nation in income from oil and gas production on state lands, and the purpose of our hearing will be to maintain that ranking by making certain we're obtaining every possible dollar from this production," Land Commissioner Bob Armstrong said Tuesday.

"The federal government and several states have begun experimenting with various royalty and bonus policies to increase leasing revenue, just as we have. This hearing will give us a chance to take stock of what success these experiments have had and to determine whether we should adopt

any of these new approaches. Armstrong said the hearing will review not only royalty rates, which determine the state's share of mineral production on state lands, but also various bidding policies such as the terms of oil and gas leases; the minimum bonuses oil and gas companies must pay to obtain leases on state lands; bidding on high royalty rates, with fixed per-acre bonus; and bidding on high bonus and high royal-

The state's standard royalty was increased five years ago to 16% percent to the current 20 percent, and lease terms for all but offshore state lands were shortened from five to three years to encourage development on leased lands.

## Port funds approved

AUSTIN, Texas (AP) - The House Appropriations Committee has approved a bill allowing the Texas Deepwater Port Authority to spend up to \$2.5 million in its efforts to build a port for supertankers.

An 11-7 vote Tuesday sent a revised version of the Senate-passed bill (SB126) to the House floor.

The measure finances the authority through the time when - if everything falls into place - it issues the first of \$1.2 billion in bonds to construct the port.

First proceeds from the bonds would repay the state treasury for the emergency appropriation.

Plans call for the port to be built in

the Gulf of Mexico 26 miles south of Freeport. Bonds would be paid off with revenue received from oil companies using the port.

The committee's version of the bill appropriates the money in installments, starting with \$565,000 to carry the authority through Oct. 31, 1979. If the federal government offers the authority a license to construct the port, an additional \$200,000 could be spent after Nov. 1. Finally, if the governor approves issuance of the authority's construction bonds, \$1.6 million could be spent after Jan. 1, 1980.

Opponents say the state should not be in the business of raising investment money and building a port for use by oil companies.

A consortium of oil companies attempted to obtain a federal license but finally gave up the effort. Some blamed restrictions imposed by federal anti-trust laws.

## legislation into law last Nov. 9.

Wallace urges speedup

on pipeline to Midland

AUSTIN - Texas Railroad Commissioner Mack Wallace has urged President Carter to expedite the "languishing" California-to-West Texas crude oil pipeline project that would save American consumers a half-billion dollars a year in energy

Wallace, in a letter dated Feb. 19,

### **ENERGY** OIL & GAS

called on Carter to utilize "extraordinary authority" given him by Congress in the Public Utility Regulatory Policies Act to get the 1,000-plus-mile pipeline from Long Beach, Calif., to Midland on stream. Carter signed the

### Way cleared for drilling fishing area

BOSTON (AP) — A federal appeals court has cleared the way for oil and natural gas exploration in the bountiful fishing grounds of the North At-

The First Circuit Court of Appeals on Tuesday lifted an injunction granted more than a year ago on a request by the state of Massachusetts and the Conservation Law Foundation after the Interior Department announced plans to open bids for North Atlantic tracts

U.S. District Court Judge W. Arthur Garrity issued the injunction less than two weeks before the planned auction on Jan. 31, 1978, saying Interior Secretary Cecil Andrus had not taken "all steps reasonably possible" to protect the Georges Bank fishing ground.

Garrity said Andrus' decision to hold the auction before protective regulations were issued was "arbi-

trary and capricious." In lifting Garrity's injunction, the appeals court noted that Congress amended the Outer Continental Shelf Lands Act last year to give Andrus authority to draft strict regulations. The ruling said if Andrus failed to produce the regulations before the next auction, there would be time to seek another injunction.

It has been estimated the 1,140square-mile area could yield 150 million to 530 million barrels of oil and 1 trillion to 3.5 trillion cubic feet of natural gas.

Environmentalists and Massachusetts Attorney General Francis X. Bellotti favored continuing the injunction until regulations were in effect to protect the fishing industry

and coastline

Bellotti wants the oil industry to be required to pay for oil spill cleanup and to compensate fishermen whose gear is damaged by oil or drilling equipment. He said in a statement he will seek another injuncton if safeguards aren't in effect before bid-taking begins.

The Interior Department was closed Tuesday and could not be reached for comment, but in the past interior officials have estimated it would take about seven months be-

fore an auction could be held. Gov. Edward King, a strong advocate of offshore oil development and construction of a refinery in Massachusetts, said he was "delighted" with Tuesday's action, and hoped to EDDY COUNTY meet with Andrus next week to discuss plans for the auction.

Rhode Island Gov. J. Joseph Garrahy said the lease sales will have a favorable impact on his state's economy and he is "optimistic that the lease sales...can now go forward without any further delay.'

## Gas price hikes okayed

AUSTIN, Texas (AP) - Small natural gas rate increases were authorized Tuesday by the Texas Railroad Commission for outlying areas of Woodson, Throckmorton County, and FLOYD COUNTY for the environs of Graham, Young Exxon No. 1 Bundy-Federal, drilling

The new rate for Woodson, which affects two customers, would allow Alliance Gas Co. to increase it charges from \$15.58 to \$17.30 for 8.600 cubic feet monthly.

In Graham, the Community Public Service Co. will be able to increase its annual income by \$25,538 through a new schedule of rates affecting 396 residential, commercial and industrial customers.

## Southland buys properties

FORT WORTH - Southland Royalty Co., announced it has acquired oil and gas properties, primarily in Oklahoma and Texas, for \$14 million, with estimated proved reserves of 645,000 barrels of oil and 11.6 billion cubic feet of natural gas.

transactions from private compaines and individuals. Additionally, Southland announced it has completed arrangements to fi-

nance these and other recent major

The properties were acquired in two

acquisitions of producing oil and gas properties and to refinance outstanding bank indebtedness.

Recently, loan agreements were signed providing for a loan from a group of commercial banks for \$120 million and private placement of promissory notes with a group of nsurance companies for \$90 million. Both loans are unsecured senior debt

of the company. The bank loan provides for the commitment of \$120 million to be converted to a 10-year term loan.

The pipeline project, proposed by Standard Oil Co. (Ohio) and El Paso Natural Gas Co., involves the conversion to crude oil service and flow reversal of nearly 790 miles of existing gas pipelines operated by El Paso and Southern California Gas Co., plus construction of some 230 miles of new line. Cost of the project has been estimated at \$1 billion.

In operation, the west-to-east pipeline would allow the movement of some 500,000 barrels of Alaskan crude oil per day to points on the Gulf Coast and in the Midwest and East Coast, where necessary refining capacity exists, rather than the costly tankering and lightering transporting through the Panama Canal.

"Transmission by pipeline would save America consumers, based on \$3 per barrel added cost, about \$500 million per year in present energy costs," Wallace advised the Presi-

Wallace noted in his letter that the four-year-old project, "involves nothing more than the construction of some 230 miles of pipeline along with some relatively minor engineering to reverse an existing, but unneeded gas pipeline."

The Texas energy official cited "the paramount national interest" as cause for Carter to press for early completion of the Long Beach-Midland project, "and in so doing, provide a measure of relief to American consumers faced with inevitably increasing energy costs.'

Wallace charged the pipeline project has been obstructed by actions or inaction of several California officials and agencies.

"I note with relative amazement that the State of California is currently exploring the availability of federal monies for Mexico-California oil and gas lines," wrote Wallace. "One must conclude that California officials consider the environmental impacts of a line crossing the state much more serious than the impacts of a line that terminates in the state.

Wallace said he was further amazed by an "incredible accumulation" of more than 700-plus federal,

state and local permits pinned to the Actions by California and its agencies over the past three years as pertain to the pipeline project, Wal-

lace maintained, warrant inquiry by

the federal government to determine whether they constitute interference with interstate commerce. "As an official of the State of Texas, wherein something on the order of a quarter of a million miles of crude, gas, and product pipelines have been constructed for distribution of this nation's domestic energy supply," wrote Wallace, "I simply cannot view the construction of some 230 miles of

lines for the Long Beach-Midland project as an insurmountable task." Wallace referred the President to sections of the Public Utility Regulatory Policies Act which permit him to expedite construction and/or operation of the proposed pipeline, by waivers, as well as expedited procedures made within 30 days after the Nov. 9 date of the act.

### Ellenburger well finals

Empire Drilling Co. No. 2-346 Shannon Estate has been completed in the Shannon Ranch (Ellenburger) field of Scurry County.d

The second well, it is 5/8 mile north of the other producer. The daily pumping potential is 83 barrels of 36-gravity oil and 12 barrels

of water. Completion was through perfora-tions from 8,206 to 8,213 feet. Stimulation, if any, was not reported.

The well is 1,980 feet from south and east lines of section 346, block 97, H&TC survey and 12 miles northwest
