

"Without the intensive effort by President Carter and the American people, we would have never reached a position" in which a treaty is within reach.

night and heading back for Cairo Saturday morning. The Israeli cabinet has already accepted compromise suggestions of-

settlement. "We'll stay as long as we have to," Powell said. Aboard the train, Carter offered no details of his talks but did say briefly

Thousands welcome President Carter in Egypt. (AP Laserphoto)

Israelis ponder peace proposals

'Everything now depends on Egyptian answer'

JERUSALEM (AP) - "Everything now depends on the Egyptian answer. Israel has done its part," Prime Min-ister Menachem Begin said today after briefing Israeli leaders on the U.S. compromise peace proposals. Begin met with his Cabinet for

three hours, then appeared before the Parliament's Foreign Affairs and Security Committee and the factions of his governing coalition.

Egypt has made its own counterproposals to the American ideas approved by Israel's Cabinet, but Begin said he did not expect to hear the Egyptian response until he meets privately with President Carter on Saturday night.

A positive answer, Begin said, would "pave the road to peace." But a negative response would be "Egypt's responsibility," he said.

Asked by reporters what would happen if Egypt's President Anwar Sadat rejects Carter's proposals, Begin said, "After a certain period, negotiations would resume. But why should we assume they will say no?"

Though Begin did not define what positive or negative responses would be in Israeli eyes, his comments indi-

cated that Egyptian demands for further changes could bring Carter's current peacemaking effort to at least a temporary halt.

Returning Thursday from his talks with Carter in Washington, Begin said, "whatever comes from Cairo, we will read. If we don't accept them, then we won't accept them.

Begin said it was "possible, but not sure" Carter would bring Sadat with him from Cairo. Such a move would signal virtual

completion of a treaty, but Begin said "there are still outstanding issues" even if Egypt agrees to the latest American proposals.

A bomb scare today sent Israeli explosives experts to the Baptist church in Jerusalem where Carter will pray during his weekend visit. But it was a false alarm.

Bystanders became suspicious when a man drove a small yellow car into the parking lot of the Jerusalem Baptist Congregation, locked it and hastily hailed a taxi. Fearing the car might hold a bomb, the bystanders called police.

Texans pay too much insurance, solons say

By LEE JONES

AUSTIN, Texas (AP) - Texans are paying as much as \$500 million a year too much for property and accident insurance, a group of state legislators

say. The reason, they said, is the State Insurance Board doesn't plug every relevant figure into its formulas for setting rates.

Rep. Bob Maloney, R-Dallas, and more than two dozen other House members introduced a bill Thursday they said would remedy the situation and cut insurance premiums.

It was the latest in a series of skirmishes between trial lawyers and insurance companies over who deserves the blame for a series of insurance crises.

"The 'Insurance Rate Relief and Reporting Act' is designed to save Texas insurance consumers an estimated \$300 million to \$500 million in property and casualty insurance premiums," Maloney said at a news conference.

Key provisions of the bill would: Base insurance rates on insur-

ance companies' actual expenses and losses in Texas. The State Insurance Board uses actual loss figures but only estimates expenses.

- Require the board to reduce total rates by the income insurance companies receive from investing policyholders' premiums.

The board says it considers investment income but only in testing whether the companies can make money under rates that allow only 2.5 percent of premiums for after-taxes profit.

- Require insurance companies to fully report their reserves, invest-ment income, expenses and losses to the board.

Maloney said allowing companies only their actual expenses - instead

of an estimate - would cut premiums for all types of property and accident insurance \$223 million.

He said the board allows companies 6 percent too much for expenses on auto coverage, 7 percent for homeowners and 6 percent for workers compensation.

Rep. Ron Coleman, D-El Paso, said insurance companies set aside a reserve each time a suit is filed and report the full amount set aside as a loss. This inflates the insurance board's statistics on losses and causes rates to rise unnecessarily, he said.

Coleman said, a company might reserve \$100,000 for a claim, then settle for \$10,000. Yet the full \$100,000 might be reported to the insurance board as a loss, he said.

Nobody knows for sure, he added. "That's what disclosure is all about, so we will know," said Rep. Luther Jones, D-El Paso.

Jones said the "conventional wisdom" is that all insurance problems - notably the product liability and medical malpractice crises - "can be traced to the legal system."

"This bill would generate information that would reveal if all or part of the problem can be traced to the insurance system," Jones said.

Maloney said the bill originally was designed by former Rep. Jim Nugent, a Kerrville lawyer before he was appointed in December to the Texas Railroad Commission.

Texas Trial Lawyers Association members spoke approvingly of Nu-gent's bill before the legislative session began, and their chief lobbyist, Phil Gauss, was present for the news conference.

Dixie Evatt, a spokeswoman for the Texas office of the Insurance Information Institute, said the bill would duplicate authority the insurance board already has.

Explosives experts checked the car but found nothing.

Police dismantled two bombs Thursday night found by a Jerusalem bus driver in a routine search of his vehicle at the end of his shift. Authorities fearing Arab guerrilla attempts to sabotage Carter's peace pilgrimage have warned the public to be especially alert for suspicious objects during the president's stay.

The government is deploying 10,000 troops and police, including crack anti-terrorist units, to protect the president.

The Palestine Liberation Organization, an unyielding opponent of Israeli-Egyptian peace moves, called for a general strike today in the occupied West Bank of the Jordan River and the Gaza Strip to protest the Carter visit. But a spokesman for the Israeli military government said Arabs had not heeded the PLO call. But business is normally slower on Friday, the Moslem sabbath, in the West Bank.

Palestinians and Lebanese Moslems staged a general strike in Moslem west Beirut and the Lebanese cities of Tyre, Sidon and Tripoli today to protest the Carter visit. Guerrillas in west Beirut enforced the strike call, burning tires in the streets and closing a road to the international

airport.

fered by Carter, but Sadat is seeking some modifications. Carter is scheduled to relay Sadat's response to Begin Saturday night in Israel.

Begin told a parliamentary committee that a positive response from Sadat would "pave the road to peace," but a negative response would be "Egypt's responsibility."

Israeli Justice Minister Shmuel Tamir said the cabinet had "paid notice" to Egypt's counterproposals and to Sadat's call on Thursday for "freedom" and "national rights" for Palestinians.

"I'm doing my best," Sadat said today. "But without the intensive effort by President Carter and the American people...we would have never reached a position" in which a treaty is within reach.

Carter and Sadat, said by U.S. officials to be unhappy with American treaty proposals, rode through 140 miles of blooming cotton and cheering throngs on the four-hour trip from Cairo to this ancient Mediterranean

city. Crowds along the way chanted, "Carter, Carter," and "Long live Sadat."

The train slowed, but did not stop as it passed through towns and villages. Helicopters hovered overhead during the trip.

In the populous town of Tanta, turbaned village musicians, berobed farmers, students and workers greeted the two leaders.

Hanging from trees and lampposts and clustered on rooftops an balcon-ies, they shouted "We love you Carter; Viva Carter," and "We sacrifice souls and blood for you, Sadat."

that the Palestinian issue will have to be resolved in separate negotiations following conclusion of an Egyptian-Israeli treaty.

"The details obviously will have to be workd out over a period of a year after the treaty is signed," Carter said.

The 13-car train, pulled by two German-built diesels, slowed to a crawl when it reached towns along the way. Women carried their infants up to the presidential car and peered at Carter and Sadat.

In another car, Secretary of State Cyrus R. Vance worked on treaty provisions with Egyptian Prime Minister and Minister of Foreign Affairs Mustafa Khalil.

"Welcome Richard Nixon," a sign remaining from the former president's visit and train ride in 1974, was the largest one in view. It was painted on a peeling building crammed with waving, friendly crowds.

Nearing Alexandria, as the train pulled away from a station, three small boys grabbed on to a rail, shouting "Ya Sadat," they hung on for dear life and rode along for a few miles. They were helped aboard by two policemen.

Carter, asked to assess prospects of completing the agreement twice remarked that problems remain.

He said, however, "President Sadat genuinely wants peace, so do I, so does Prime Minister Begin.

"We don't know yet what will happen until we get through the talks," Carter said.

He said it is possible he will delay his departure for Israel by a day if necessary, but said this doesn't appear likely.

Experts dismantle pipe bombs found in Odessa mobile home

ODESSA — Three pipe bombs hidden in a mobile home in Odessa were dismantled by demolition experts Thursday in another development stemming from the escape of William Gregory Forbes, charged with capital murder, from a Missouri jail

Odessa police and Federal Bureau of Investigation agents said they found the bombs Thursday afternoon in a trailer house belonging to Juan Gonzales, 29, of Brownsville.

Gonzales, his wife, Sylvia Olga Gonzales, 27, Steven Wayne Bailey, 25, and Sharon Louise Dearing, 25, were arrested at Ms. Dearing's mobile home in Gardendale. Ms. Dearing was arrested on suspicion of helping Forbes escape from the Missouri jail.

last Friday in a Wichita Falls. gunfight with FBI agents and police who were attempting to

arrest him. Forbes was shot in the head with a shotgun and several times in the chest with a revolver after he had fired at the lawmen with a Chinese-made AK-47 automatic rifle. He also was armed with a .357-caliber magnum revolver, police said.

He was arrested on Oct. 18, 1977, in Neosho, Mo., on a charge of capital murder.

Fire months later, in March of 1978, a man and woman wearing ski masks forced the jailer in the Newton County Jail to release

He had been at large since then.

Of the three pipe bombs found in Gonzales' mobile home, two were reportedly "loaded" with explosives, said Tommy Calender, assistant police chief in Odessa.

Meanwhile, authorities in Wichita Falls have charged Linda Kay Colvin, 25, and Bai-ley, both of Wichita Falls with aiding and abetting Forbes' es-

cape. Ms. Colvin was arrested by FBI agents at her Wichita Falls residence Thursday. In the Gardendale raid, police

said they confiscated several firearms. The Gardendale community is northeast of Odessa. Ms. Dearing, held without bond for her alleged part in the jailbreak, may be extradited to Missouri to face charges there. In addition to that charge, Ms. Dearing was charged with pos-session of a probibited weapon, a 9mm pistol equipped with an illegal silencer; possession of marijuana and for automobile theft in Wichita Falls.

Her bond on the marijuana possession charge was set at \$10,000. Bond on possession of the prohibited weapon was set at \$25,000.

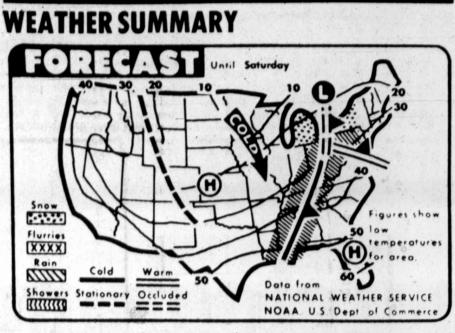

Bond on Gonzales was set at \$50,000 on charges of possession of firearms by a convicted felon.

THE MIDLAND REPORTER-TELEGRAM, FRI., MARCH 9, 1979

New Iran prime minister resigns

TEHRAN, Iran (AP) - Iranian Prime Minister Mehdi Bazargan resigned from the country's provisional government today, but his resignation was turned down by the Ayatollah Ruhollah Khomeini, a source close to the prime minister reported.

Bazargan, 70, traveled 100 miles through a snow storm to submit his resignation to the ayatollah, Iran's religous and political leader, in the holy city of Qom.

Bazargan told the holy man Thursday he could not remain in office if "provocations" against his government continued.

The 78-year-old ayatollah, who masterminded the overthrow of the shah and appointed Bazargan to lead a new civilian government, reportedly gave Bazargan assurances of his

Teamsters union might ignore wage guidelines

WASHINGTON (AP) - The Teamsters union is threatening to barrel through President Carter's anti-inflation wage guidelines with pay raise demands that more than double the 7 percent voluntary limit called for by Carter

The union is asking the trucking industry for a first-year wage increase of 14 percent, sources say, while demanding full cost-of-living protection on top of that.

The 300,000 truck drivers and warehouse workers affected by the contract talks now make an average of \$9.40 an hour in straight-time wages. The union's demand is for a flat \$1.35 hourly raise, plus additional increases tied to the inflation rate, said the sources, who requested anonymi-

The current agreement expires March 31. A top union official has expressed confidence the two sides can reach a settlement by the deadline-to avert a potentially crippling nationwide strike.

In all, the union is seeking \$2.35 over three years, a 25 percent general wage increase. When major fringe benefits and the cost-of-living raises are added, the demand equals a 50 percent to 55 percent boost overall.

One administration official acknowledged Thursday that the union's initial offer is "way above the guidelines." But the official, who declined to be named, said the industry might take a strong stand and hold the union to a settlement within the presidential

continued support.

He was quoted as saying orders would be issued that would bolster government authority and curb the powers of Khomeini-appointed revolutionary committees, which run a parallel government to that of the prime minister.

Details of the directives to be issued have not been disclosed and confirmation of the resignation has not been confirmed by other sources.

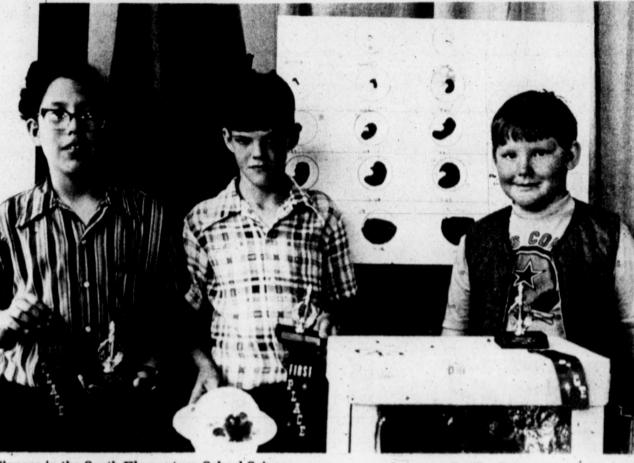

Bazargan has increasingly criticized revolutionary committees for undermining the authority of his government, which was further eroded Tuesday when khomeini publically criticized the Bazargan administration for being weak and for lacking a total committment to the establishment of an Islamic republic.

The source for the resignation re-

port, who is close to the prime minister but requested anonymity, said Friday that Bazargan was still in the holy city meeting with Khomeini, but it was not immediately known how long he would remain there.

Bazargan was chosen by Khomeini to head the provisional government after the ayatollah returned from exile. But before Bazargan and his government of Western-educated liberal politicians could gain control of the governmental machinery left in ruins by the debacle of the previous royal administration, the revolutionary committees dominated by Moslem conservatives and supported by guerrilla armies took control of the country and established a parallel and more effective government.

Bazargan has been especially critical of the wholesale arrests, secret

Carter's inflation fighters have said the 2.1-million-member union will provide a crucial test for the guidelines.

Some officials say the Teamsters, who won wage and fringe increases of more than 11 percent a year in their present three-year pact, could make or break Carter's guidelines.

DEATHS Mary V. Barron

LAMESA — Mary Virginia Barron, 59, of Lamesa died Thursday in a Lubbock hospital after a brief illness.

Services will be at 10: 30 a.m. Saturday in the First Baptist Church here with the Rev. Bill Hardage, pastor, and the Rev. Clifton Igo, pastor of the Second Baptist Church, officiating. Burial will be in Lamesa Memorial Park directed by Branon Funeral Home

Mrs. Barron was born June 10, 1919, in Howard County. She had been a resident of Dawson County since 1925. She was graduated from Lamesa High School in 1935.

The former Virginia Carr, she was married to E.L. "Buddy" Barron July 17, 1937, in Lamesa.

Other survivors include her husband; a daughter, Carrlene Cushing of Islamorada, Fla.; two sisters: Helen Newman of Lamesa and Lillie Ruth Carlton of Merced, Calif., a brother, Raymond Carr of Lamesa, and four grandchildren.

'Shorty' Collie

ANDREWS - Services for A.P. 'Shorty" Collie, 62, of Andrews will be at 2 p.m. Saturday in Second Baptist Church here with the Rev. Bert Hungerford, pastor, officiating. Burial will be in Andrews Cemetery

directed by Singleton Funeral Home. Collie died Wednesday in an An-

drews hospital after a brief illness. He was born in Kiowa, Okla., and lived in Hobbs, N.M., before moving to Andrews 22 years ago. He was owner and operator of Phillips Snap-

py Service here. Survivors include his wife, Violet; two sons, Archie D. Martin Jr. and Cecil Wayne Martin, both of Andrews; four daughters, Mary Jane Martin and Elizabeth Ann McBeth, both of Andrews, Janet Gail Flores of Klamath Falls, Ore., and Betty Lou Roland of Eugene, Ore .: three sisters, Vergie Burton of Broken Bow, Okla., Eula Hurst of Piedmont, Ala., and Robbye O'Bannon of Altus, Okla., a brother, Guy Finis of Fort Worth, and 13 grandchildren.

Velma L. Morgan

ODESSA — Services for Velma Lorraine Morgan, 48, of Odessa were to be at 5:30 p.m. today in Hubbard-Kelly Funeral Home. Burial was to be in Sunset Memorial Gardens.

A spokesman for the Kankakee auxiliary police Civil Defense unit in Illinois said today that the situation was stable

"To say what will happen today is unpredictable," he said. "When the ice lets loose from a jam, there's no telling what will happen. Right now the water is about 5 feet above nor-

Mrs. Morgan died Thursday in an Odessa hospital after a lengthy illness.

She was born March 9, 1930, in Wewoka, Okla. She was married to J.P. Morgan July 12, 1948, in Carlsbad, N.M. She moved to Odessa in 1968 from Farmington, N.M. She was a member of the Assembly of God Church.

Survivors include her husband; a daughter, Ann Rose of Anaheim, Calif.; her father, E.M. Murrell of Hobbs, N.M.; two sisters, Sherry Martin of Eunice, N.M., and Maxine Landes of Tempe, Ariz.; three brothers, David Murrell of Mesa, Ariz., Ray Murrell of Tempe and Roy Murrell of Post Fall, Idaho, and six grandchildren.

Willie Woodson

Services for Willie Woodson, 72, of 1200 E. Cuthbert Ave. will be at 2 p.m. Saturday in the New Hope Baptist Church with the Rev. I.L. Patrick, pastor, officiating. Burial will be in Fairview Cemetery directed by Jackson Funeral Home

Woodson died Monday at his home

He was born April 5, 1906, in Colorado County. He had lived in Midland many years, working for the Schlumberger Well Services before moving to Denver, Colo., six years ago. He had lived in Midland for the past eight months. He was a member of the New Hope Baptist Church in Midland.

Survivors include his wife, Adline; a daughter, Debra Lee Wright of Midland, and a brother, Sam W. Woodson Jr. of Marlin.

Mattie E. Duncan

ABILENE — Services for Mattie Elnora Duncan, 83, of Abilene, sister of Lucille Osborn of Crane, were to be at 3 p.m. today in the First Baptist Church in Robert Lee.

Burial was to be in Robert Lee Cemetery directed by Elliott-Hamil Funeral Home.

Mrs. Duncan died Wednesday in an Abilene nursing home.

She was born Jan. 10, 1896, in Comanche, and attended schools in Comanche County. She was married to Bert Duncan July 25, 1921. She had lived in Robert Lee since 1938 and moved to Abilene in 1973. She was a member of the First Baptist Church in Robert Lee.

Other survivors include a daughter, son, two brothers, nine grandchildren and four great-grandchildren.

sign. The ice is getting soft and crumbling from the jams in pieces.

On Thursday, the jam at the Interstate 57 bridge some 60 miles southsouthwest of Chicago broke, sending what a river patrol spokesman described as a "surge" of water downstream but causing no damage or new evacuations.

Since Sunday, about 500 familes along the Kankakee River in Illinois have been forced from their homes.

Meanwhile, National Guard engineers were dispatched to northwestern Indiana on Thursday to help shore up a weakened Kankakee River dike.

Lake County Civil Defense coordi-nator Donald Zisoff said a tempogary, horseshoe-shaped dam was holding back the water, reducing, at least for now, the threat of serious flooding in the tiny river community of Shelby.

Families who fled their homes earlier this week when the dike broke

Patsy Herrington

Patsy Herrington files for Place 6 in Greenwood

Patsy Herrington, 41, has filed as a candidate for the Place 6 position on the Greenwood school board currently held by Donal Swafford.

Mrs. Herrington said she filed for the position because, "I am a concerned parent that believes the young people of Greenwood deserve every advantage this school has to offer."

She has lived in Greenwood, located 10 miles east of Midland, two years, moving there from El Paso. She and her husband, Al, have one child. She is director of nursing at the

Martin County Hospital in Stanton. "I believe with my vantage point as

a mother of a child in the lower grades, I can contribute a great deal to our school board," she said.

The Place 6 race is the only contested race on the April 7 Greenwood school ballot. Donald W. Lea is running uncontested for the Place 7 # spot.

Travel advisories for occasional snow and blowing and drifting snow were in effect for northern and eastern North Dakota and Minnesota, with 1-2 inches of new snow expect-Snow also fell over the eastern half

of Colorado, western Kansas, and from northwestern Missouri to Wisconsin. The weather bureau said 1-3 inches of new snow was possible in extreme northwestern and north central Missouri.

Mostly clear skies prevailed this morning along the Gulf Coast and through much of the plateau and Pacific Coast.

Midlanders should be proud, **Rotarians told**

"You can be proud of Midland," Action Line-Fish President Colleen Scury told members of the Midland Rotary Club Thursday.

In Texas, she told them, there are only two entirely volunteer staffed help organizations like Action Line-Fish. "One is in Corpus Christi and the other is in Midland," Mrs. Scury said.

Action Line-Fish is an information and referral service, Mrs. Scury told her audience at the Midland Hilton. The service handles everything from where to find fresh dill weed in Midland to where legal aid and information can be obtained, she said.

"We had a man call in who said his wife was out of town and did we know of a recipe for pork chops," Mrs. Scury said. "We never did hear how they turned out," she added. In other situations, Mrs. Scury said,

Action Line-Fish has helped people find the help they needed in regard to surgery, emotional, financial, legal and transportation problems.

'We don't try to solve all the problems," Mrs. Scury said. The volunteers that staff the service try to answer questions if they are on file or refer the caller to the proper agency or service if the situation calls for it, she said.

Action Line-Fish was organized in 1970 and is sponsored by the Midland Association of Churches, Mrs. Scury said.

SHREVEPORT, La. - Services for Julian Lanier "Jimmy" Carr Sr., 81, of Shreveport and formerly of Mid-land were Thursday in Pine Grove United Methodist Church near Minden, La.

Burial was in Pine Grove Cemetery directed by Rose-Neath Funeral Home of Shreveport.

Carr died Tuesday in a Shreveport hospital after a lengthy illness. He was born March 2, 1898, in Minden. He lived in Midland during the

late 1940s and early 1950s. The retired oil man first was drilling superintendent for Loffland Brothers Drilling Co. He later joined Phil Tabor and Bill Coleman to form the Tabor, Coleman and Carr Drilling Co. of Midland. He was a Methodist.

Survivors include a son, Julian Lanier Carr Jr. of St. Louis, Mo.; three sisters, Mary Carr, Betty Carr and Ruby Sexton, all of Shreveport, and three grandchildren.

Dora McDonald

BIG SPRING - Services for Mrs. Floyd (Dora) McDonald, 70, of Big Spring were to be at 3 p.m. today in Nalley-Pickle Funeral Home with burial in Trinity Memorial Park.

Mrs. McDonald died Wednesday in a Big Spring hospital after a lengthy illness.

She was born April 16, 1908, in Merkel. She moved to Big Spring 42 years ago from Midland. She was married to Floyd McDonald Oct. 30, 1965, in Stanton.

Mrs. McDonald was a retired beautician. She was a member of the Church of Christ.

Survivors include her husband; a son, Eugene Jones of Big Spring; a sister, Mozelle Porter of Big Spring, three grandchildren and three great-grandchildren.

Al Battiest

Al Battiest, 67, of 1615 Ventura Drive died Thursday in a Big Spring hospital following a lengthy illness. Services will be held at 10 a.m. Saturday in the First United Methodist Church in Midland with the Rev. Jerry Wyatt, associate minister, officiating.

Burial will follow in Resthaven Memorial Park Cemetery directed by Newnie W. Ellis Funeral Home.

Battiest was born March 18, 1911, in Matoy, Okla., He was reared in Oklahoma. Battiest married Delphia Jackson of Tulsa, Okla., on April 3, 1952. The couple moved to Midland in May 1978 from Durant, Okla., where they lived for one year.

Prior to that, they had lived in Phoenix, Ariz., and in California. Battiest was an automobile salesman. He served in the U.S. Coast Guard in World War II.

Survivors include his wife, Delphia; a daughter, Mrs. Ray Campbell of Midland; two brothers, Eldrige Battiest of Caddo, Okla., and Willard Yeats of Shawnee, Kan.; two sisters, Mrs. J.T. Wigley of Paoli, Okla., and Mrs. J.O. McKenzie of Durant, Okla., four grandchildren and five greatgrandchildren.

Rogers, 19, of Andrews were to be at 10 a.m. today in Easterling Funeral Home here. Burial was to follow in Odessa Cemetery.

PAGE 4A

Unemployment rate falls to 5.7 percent

WASHINGTON (AP) — The nation's unemployment rate fell to 5.7 percent in February, the lowest in 4½ years since the 1974-1975 recession, the government said today.

The jobless rate was 5.8 percent in January.

The February jobs report by the Labor Department gave no indication that President Carter's economic slowdown policies have yet begun to push people out of work. However, the department reported a rise in unemployment among blacks and other minority members, especially black teen-agers.

These are the groups that usually suffer first when the economy begins to falter.

But job losses among minority groups were more than offset by gains for white workers, whose unemployment rates fell to 4.9 percent from 5.1 percent in January.

The overall unemployment rate of 5.7 percent last month was the lowest since August 1974 when unemployment was 5.4 percent of the labor force.

The department said total employment increased in February by 345,000 jobs to a total of 96.6 million. The number of people without jobs remained the same at 5.9 million.

The department gave the following breakdown on unemployment in February, compared with January, for various population groups:

- -Adult men, 4 percent, unchanged.
- -Adult women, 5.7 percent, unchanged.
- -Teen-agers, 16.1 percent, up from 15.7.
- -Whites, 4.9 percent, down from 5.1.
- -Blacks and other minorities, 11.9 percent, up from 11.2.
- -Black and other minority teen-agers, 35.5 percent, up from 32.7.

-Full-time workers, 5.2 percent, unchanged.

-White-collar workers, 3.4 percent, up from 3.3.

-Blue-collar workers, 6.4 percent, unchanged.

Although the white-collar unemployment rate rose slightly, the Labor Department said these workers, especially professional and clerical help, were the big gainers in February.

The department said employment in retail trades rose by 115,000 persons during the month. It said employment gains among white-collar workers accounted for nearly 70 percent of the total increase in employment of 3.6 million persons during the past year.

The overall jobless rate has declined by 0.4 percent since February 1978, with a 250,000-worker reduction in the number of unemployed. The number of persons with jobs as a percentage of the population hit a

record 59.4 percent in February, the department said. The labor force totaled 102.5 million, which was 63.9 percent of the population, also a record high.

Although unemployment continued to decline in February, the administration says it will begin to increase at some point this year as result of Carter's actions to control inflation by slowing economic growth.

The Carter administration reluctantly concluded some time ago that it would have to postpone efforts to further reduce unemployment and even allow for some increase in 1979 to combat the nation's worsening inflation rate.

The Labor Department added new evidence of continuing inflation Thursday when it reported that wholesale prices rose 1 percent in February, with higher food prices again leading the way.

Pictures of moon lo reveal volcanic activity

PASADENA, Calif. (AP) — Voyager I scientists believe pictures of the Jovian moon Io show volcanic activity which spreads molten lava, keeping its surface smooth.

If the scientists are right, Io is an active volcanic moon able to cover the scars of 4 billion years ago, when debris of the planet-building process pockmarked every object in the solar system.

Pictures of Io show what Dr. Laurence Soderblom of the U.S. Geological Survey identified on Thursday as a caldera — the sunken crater inside a volcano.

Soderblom, who heads the moon-imaging team, said a collar of very dark material could be seen around the Io crater. The collar, he said, was almost certainly lava flows.

Soderblom said some of the flow patterns of basaltic material are 60 miles long and 10 miles wides, and the crater is as wide as 30 miles.

The absence of craters on Io initially baffled Voyager scientists when detailed pictures of the litle moon were first beamed back to Earth Monday.

schedule, despite the strike that virtually destroyed Southern California's winter yields. "We expect to ship all

"We expect to ship all our crop," said SunHarvest spokesman Rowland Kemp on Thursday. "Everything we've done right now is on schedule. We're not behind in any material way other than because of weather conditions."

The seven-week strike against 11 major growers in California and Arizona, which provide 40 percent of the nation's iceberg lettuce, left nearly \$10 million of vegetables rotting in the Imperial Valley fields of Southern California.

UFW leader Cesar Chavez has said the strike's main focus will now swing to the Salinas area, since the Imperial Valley harvest season is over. The UFW represents about 7,000 farm workers in the area.

Kemp said, however, that a "large labor force" is developing to fill in for the UFW strikers.

The UFW, which has already called a boycott against Chiquita bananas, said a national lettuce boycott has not been ruled out as a way to pressure vegetable growers into a settlement.

"We're not saying that we're not going to call a lettuce (boycott)," said UFW spokeswoman Vickie Lopez. "The door is open. But we're hoping that negotiations will resume and we won't have to do that."

The bananas are marketed worldwide by United Brand Inc. of New York, SunHarvest's parent company.

The UFW is seeking a one-year 40 percent increase in the base wage of \$3.70 an hour, plus substantial boosts in piece rate pay and fringe benefits.

Women taught rules

THE MIDLAND REPORTER-TELEGRAM, FRI. MARCH 9, 1979

of corporate game

By ELAINE GANLEY Associated Press Writer

PITTSBURGH (AP) - Corporate gamesmanship is more a fact than a dirty word, and Gulf Oil Corp. wants to teach its women the rules.

A two-month pilot project, begun Thursday on International Women's Day, will guide 50 selected women through the ins and outs of corporate politics and help them define their aspirations.

"Women have been criticized constantly for having a narrow perspective, but that's because they haven't had the facts," said Betty Lehan Harragan, author of "Games Mother Never Taught You: Corporate Gamesmanship for Women."

"Women need a lot of help and coaching in the business world ... basic coaching men have had as little kids," she said at a news conference.

Participants in the program, including secretaries, stenographers and analysts, were selected on the basis of career interest, job performance, completion of at least one year of college work, and one year of service with Gulf. None of the participants has a college degree.

Gulf hopes to extend the program to all female employees, and eventually to men, if the project is successful, said Gerald Bush, senior vice president for human resources.

The program, designed to help women make conscious decisions about their careers, seeks to dispel the myth that less is expected of women than of men.

It features 16 hours of workshops and provides self-assessment, assertiveness training, counseling and options for on-the-job training or finishing uncompleted degrees.

As the role of women in society changes, Bush said, corporations are being forced to change their attitudes on a broad scale

"We need to respond to cultural changes in a very creative way," he said. "Right behind it is going to be men who want to be liberated, because men have paid a high price (to get where they are)."

Bush said women often "hide under a rock" rather than admit to job dissatisfaction "so they will not get punished for looking at the grass on the other side of the fence.

Energy rewrite could be forced

By TOM RAUM

WASHINGTON (AP) - President Carter may be forced to rewrite parts of his standby gasoline rationing and energy conservation plan to win Senate approval, Senate energy leaders are saying.

The rationing plan is in deep trouble unless the administration changes it to make more gasoline available to rural Americans, suggested Sen. Bennett Johnston, D-La.

And portions of Carter's standby energy-conservation plan calling for a ban on weekend gasoline sales and restricting outdoor advertising also, are drawing heavy congressional fire.

The standby plan cannot be amended by Congress so any changes must be made by the administration.

Johnston chairman of a subcommittee studying the rationing proposal, cited strong Senate opposition to the plan as currently written, especially among senators from the West.

Johnston said in an interview that he will urge the full Senate Energy Committee to ask the adminstration to revamp the plan to give states more say in how much gasoline individuals would receive.

"Gasoline allocations should be granted to each state based on average use within that state," Johnston said.

· Committee Chairman Henry M Jackson, D-Wash., also raised the possibility Thursday that the administration might have to amend its proposals to win Senate approval.

He disclosed that administration officials had indicated a willingness to congressional leaders to make some changes in the plan, if necessary, to win its approval.

Jackson said he believes the overall prospect for congressional approval of the energy-conservation plan, including the controversial section on rationing, seems good.

"We have to have in place a rationing plan that we can call on in case of further blow-up in the Mideast," Jackson told a reporter.

Both houses must approve the standby plan within 60 days of last week's submission to Congress for it to take effect. The proposals cannot be amended.

Even if the standby plan is approved, any attempt by the president to invoke it could be rejected by either house within a 15-day period.

Some hearings have already been held in both the House and Senate on the program and more are planned for later this month.

The standby rationing plan, which officials say will be invoked only as a last resort, would allocate a certain amount of gasoline for each registered motor vehicle in the country.

Although no quantities were specified, officials have generally indicated that a ration of two gallons per day might result from the kind of crisis at least a 20 percent cut in supplies that could prompt rationing.

That would be grossly inadequate in the West and other rural areas where average driving distances are long, Johnston said

He also said he believes Congress will reject that part of the plan restricting peon and other advertising signs, which even the administration has acknowledged is largely symbolic and would only save about 4,400 barrels of oil a day.

'This discriminates against one industry all because the administration considers if to be a symbol," Johnston said.

Both Johnston and Jackson said the proposal to close gasoline stations on weekend days also may have trouble making it through the Senate as writ-

Jackson said moves will likely be made to persuade the administration to give states more leeway in deciding when to ban gasoline sales.

Estimates uncertain

The Midland Reporter-Telegram

FRIDAY, MARCH 9, 1979

AUSTIN, Texas (AP) - Estimates that Mexico may have as much as 700 billion barrels of oil and gas in reserve are based on calculations that are "over-whelmingly uncertain," a University of Texas professor said. William Fisher said, however,

"It seems almost inevitable that Mexican oil and gas will also play a critical role in the energy future of the United States, in a manner not entirely known, or perhaps even knowable at the present.'

Fisher is professor of geological sciences and director of the university's Bureau of Economic Geology. His views were presented in an article in the most recent issue of Texas Business Review.

He said Meixco's proven reserves at the end of 1978 stood at 40.2 billion barrels, and probable reserves - as posted by the government oil monopoly PEMEX - totaled 44.6 billion barrels.

In both categories, Fisher said, about 70 percent is oil and 30 percent gas equivalent. "In addition, Mexico reports 200 billion barrels of potential reserves, with some sources giving a potential as high as 700 billion," he said.

"While- proved reserves are known with a significant degree of certainty and probable re-serves with reasonable, buttess, certainty, potential reserves imply a very large degree of uncertainty, for they represent only the possible or speculative occurrences of oil and gas in structures and formations yet to be drilled and tested," Fisher

Environmentalists get victory in California

By ELLEN HUME The Los Angeles Times

WASHINGTON — In a victory for environmentalists, the Department of the Interior said Thursday it will reduce by one-third the Southern California offshore area to be leased this June for new oil and gas development

All coastline tracts from San Diego north, about 45 miles south of Los

Slurry line hearing set

By DENNIS E. CURRAN

CHEYENNE, Wyo. (AP) - Gov. Ed Herschler says he will personally conduct a March 26 hearing on a proposed second coal slurry pipeline for Wyoming.

Herschler said Thursday the hearing on Texas Eastern Corp.'s proposed pipeline will be open to anyone who has a comment or simply wants to ask a question.

"I want to know how people feel about this proposal," Herschler said in announcing the hearing.

The 1979 Legislature gave its approval to the Texas Eastern pipeline, but that approval is conditional on the governor and the corporation reaching a contract agreement within 90 days.

Texas Eastern proposes to divert water from the Little Big Horn River to a reservoir near Sheridan and then use it to pump crushed coal 1,200 miles from just north of the Montana-Wyoming border to the Texas Gulf Coast for power plants.

The \$1.8 billion project would pump 25 million tons of coal a year - more than a third of the total mined last year in Wyoming. Texas Eastern plans to get coal from mines near Decker, Mont., and Gillette.

Herschler allowed the Legislature's approval to become law without his signature, saying he still has questions about the project.

"I do not intend to evade my reonsibilities as gover

Angeles, to Dana Point will be deleted from the proposed lease sale, as well as some tracts in San Pedro Bay, the harbor of Los Angeles; around the Channel Islands off the Southern California coast; and in the Santa Barbara Channel, north of Los Angeles.

ENERGY

OIL & GAS

knocked us out of our chairs," William Ahern, energy director of the California Coastal Commission, said.

An aide to Sen. Alan Cranston, D-Calif., called the deletion of 340,000 out of 1,141,800 acres to be leased "a major environmental victory," even though such attrition is normal to the offshore leasing process. Cranston, Rep. Lionel Van Deerlin

D.Calif., California state and local officials, and environmentalists had urged the Interior Department to exempt much of Lease Area No. 48, which stretches along the Southern California coast from San Diego to Point Conception about 40 miles west of Santa Barbara.

San Diego Mayor Pete Wilson had called the proposed lease sale off San Diego "a threat to our quality of life." Sixty-nine of the proposed 217 tracts in Lease Area No. 48 were eliminated Thursday by the Interior Depart-ment, including all 26 proposed tracts in San Diego.

The southernmost tract in the pro posed lease area now will be about 12 miles off Laguna Beach, south of Los Angeles, an Interior Department spokesman said.

Oil industry representatives said Thursday that they could not comment until they had studied which

The Permian Basin Section of the Society of Economic Paleontologists and Mineralogists will sponsor a oneday field trip to Sutton and Crockett counties Saturday.

Persons making the trip will meet in Sonora, south of the Interstate 10 and San Angelo Highway 277 overpass, near a Dairy Queen, at 9 a.m. Johnny Brown of Midland, will be

the field trip leader.

tracts had been eliminated. "But we're always disappointed at any action which frustrates the development of potential domestic energy sources," a Gulf Oil Co. spokesman said

PAGE 1C

One oil industry source conceded, however, that "many people in the industry feel the Southern California offshore area may not be as productive as some other areas.'

The question of productivity, as well as environmental hazards. weighed heavily in the decision to eliminate some of the leases, an Interior spokesman said.

The remaining tracts will be described in a report to California Gov. Edmund G. Brown Jr., who will have 60 days to comment before Interior Secretary Cecil D. Andrus makes a final decision about the June lease sales.

In a letter to Andrus on Feb. 28, 25 California congressmen urged him 'not to trade California's irreplaceable coastal resources for a few days of fuel for America's automobiles.

On learning Thursday of the Interior Department's decision - which is expected to be formally announced today - Cranston and Van Deerlin expressed their delight at the reduced lease area.

"I'm particularly pleased with the environmental sensitivity and cooperative spirit demonstrated by the secretay of interior," Cranston said. 'I'm very hopeful we'll continue to

work together as he focuses attention on the Northern California lease sale in the coming months."

Field trip scheduled

Participants will study the lower Cretaceous in road cuts along Interstate 10 in an east-west traverse. The study includes Ft. Lancaster (Georgetown equivalent) up to Buda formation.

Lunch will be at a roadside park five miles west of Sonora, with participants providing their own meal.

Questions concerning the trip should be directed to Tommy Woodward of Midland, 682-0541.

SECOND PROJECT

Lawrence and Associates will reenter the former Ledge Petroleum Co. No 1 Halff Estate seven miles south of Iraan and deepen to 1,650 feet. The old total depth is 1,595 feet. The re-entry will be operated as No. 1-63-E Halff.

Ledge plugged the project in 1944. The site is 330 feet from north and 4.950 feet from east lines of section 63. block 1, H&GN survey and one location southwest of the Fergus (upper Grayburg gas) field that produces at 2.398 feet.

DISCOVERY FINALS

Belco Petroleum Corp. of Midland No. 1 Ela Sugg has been completed as an Ellenburger discovery in Irion County, 10 miles northwest of the Irion (Clear Fork and Ellenburger) field.

Ten miles north of Barnhart, it finaled for a 24-hour flowing potential of 151.58 barrels of 40-gravity oil and 13 barrels of water, through a 14/64-inch choke. The gas-oil ratio is 2.590-1.

Completion was through perforations from 8,769 to 7,849 feet after 2,000 gallons of mud acid wash and 12,000 gallons of acid.

Total depth is 9,020 feet and 5.5-inch casing is set on bottom. Plugged back depth is 8,981 feet.

Wellsite is 1,320 feet from north and 660 feet from east lines of section 115, block 14. H&TC survey.

It is surrounded by producers in the Spraberry Trend area.

LEA OPENER

Southern Union Exploration Co. No. 1-L Lea-State, a re-entry operation 28 miles southeast of Caprock in Lea County, N.M., has been completed as a Morrow gas discovery.

Operator reported four point

gauges ranged from 473,000 to 1,407,-Wildcat operations and discoveries 000 cubic feet per day through a one have been reported in Permian Basin and one-quarter-inch opening. Tubing pressure was from 2,210 to 3,615 Hilliard Oil & Gas, Inc., No. 1-X

inch casing set at 12,950 feet. Wellsite is 5.5 miles north of the Shoe Bar, North (Morrow gas) field and 1,980 feet from north and east lines of section 14-15s-34e and 10 miles northwest of Lovington.

TIPPERARY STRIKE

Tipperary Oil & Gas Corp. of Midland No. 1 Wiser-State has been finaled as a San Andres oil discovery in Lea County, nine miles southeast of Crossroads.

On 24-hour potentil test, it pumped 48 barrels of oil and 86 barrels of water. The gas-oil ratio is too small to measure. Gravity has not been reported. Total dpeth is 5,003 feet and 4.5-

inch casing is set on bottom.

Location is 660 feet from north and 1,980 feet from west lines of section 18-10s-37e. It is two and one-quarter miles southwest of the Sawyer, West (San Andres) field.

CHAVES DISCOVERY

McClellan Oil Corp. and J. Penrod Toles of Roswell No. 1 Penjack has been finaled as an Abo discovery 19 miles north of Dexter in Chaves County.

The operator reported four-point gauges ranging from 318,000 cubic feet per day, through a 1/8-inch choke, to 1,272,000 cubic feet per day through a 5/16-inch choke. Completion was through perforations from 4,314 to 4,334 feet after 2,000 gallons of acid and 10,000 gallons

of fracture solution. Hole was made to 5,570 feet and 4.5-inch casing was set at 4,550 feet. Hole is plugged back to 4,489 feet.

There is no other nearby Abo gas production. Wellsite is 660 feet from north and

west lines of section 6-10s-26e.

EDDY WILDCAT

A 9,400-foot Morrow wildcat has been spotted in Eddy County, 22 miles southwest of Lakewood.

It is Inexco Oil Co. of Houston No. 2 L. A. Federal, 660 feet from north and 1,980 feet from west lines of section 12-22s-22e and 2.5 miles southeast of the Rocky Arroya (Morrow gas) field and 1.5 miles southwest of a 9.521-foot failure.

EDDY FIELD AREA

Texas Oil & Gas Corp. of Midland No. 2 Indian Hills-State Communitized has been completed 5/8 mile southeast of production in the Cemetery (Morrow gas) field in Eddy County, 11 miles southwest of Lakewood

Operator reported a calculated absolute open flow potential of 590,000 cubic feet of gas per day, through perforations from 9,387 to 9,528 feet after 2,500 gallons of acid and 30,000

gallons of fracture solution.

Total depth is 9,747 feet and 4.5inch pipe is set on bottom.

Location is 660 feet from south and east lines of section 36-20s-24e.

MORROW GASSER

said.

Black River Corp. of Midland No. 1 Cerro Communitized has been finaled as an extension to the Carlsbad, South (Morrow gas) field of Eddy County. One and one-quarter miles south east of other Morrow gas production, it finaled for a daily flow of 559,000 cubic feet of gas per day, through a 3/4-inch choke and perforations from 11,766 to 12,300 feet. The pay was acidized with 7,500 gallons. Total depth is 12,401 feet and five-

inch casing is set on bottom.

Wellsite is 2,080 feet from north and 760 feet from west lines of section 11-23s-27e and six miles southeast of Carlsbad.

BOYD PRODUCER

Yates Petroleum Corp. of Artesia, N.M., No. 1-G-JE Irish Hills-State Communitized is a new gas well in the Boyd (Morrow) field of Eddy County, 14 miles southwest of Artesia.

It finaled for a daily flow of 3,000,-000 cubic feet of gas per day, through a 1/2-inch choke and perforations from 8,931 to 8,942 feet. The pay was treated with 2,500 gallons. Total depth is 9,093 feet and 4.5-inch

pipe was landed on bottom. Location is 1,980 feet from north

and east lines of section 12-19s-24e.

GAINES TEST

Wood, McShane & Thames of Monahans No. 2 Alexander is a new test in the Block A-34 multipay area of Gaines County, 13 miles north of Andrews. It is 1,980 feet from south and 2,000 feet from west lines of secton 23, block A-22, psl survey. It is to drill to 3,100 feet.

Association meeting set

ABILENE - The West Central Texas Oil & Gas Association will hold its 46th Annual Meeting in the Abilene Civic Center Sunday and Monday.

The program will include an address at noon Monday by Jim Gillie of Bartlesville, Okla., assistant to the vice president of Public Affairs for Phillips Petroleum Co. He will talk on industry coordination.

Other featured speakers include:

-James E. Russell of Abilene, Russell Petroleum, Inc., who will talk on the proposed regultions on oil pricing.

-Frank M. Burke Jr. of Dallas, Peat, Marwick, Mitchell and Co., who will discuss current and proposed tax regultions affecting the oil industry. -Bill H. Abington of Dallas, executive vice president of the Texas Mid-**Continent Oil and Gas Association. He** will brief the meeting participants on current legislation in the Texas Legislature

All of the speakers are on the Monday program.

intend to let development occur without assuring the long run protection of Wyoming's citizens and resources," Herschler said.

"We can have development, but we must guarantee that safeguards are built in," he added.

Water is the big issue surrounding the proposed pipeline. Proponents say it will put Wyoming water to beneficial use instead of letting it flow from the state.

Texas Eastern bought water rights from a group of Sheridan businessmen for 40,000 acre-feet of water a year. But it says it needs only 20,000 acre-feet a year and will make the remaining 20,000 acre-feet available to Wyoming for agricultural or municipal use. That would be enough for a city four times the size of Sheridan.

But opponents argued Texas Eastern would be mixing its powdered coal with "some of the finest drinking water in the world."

Meanwhile, Montana is taking a dim view of the project. Montana Gov. Tom Judge reportedly asked Herschler to veto the bill, and Montana's Crow Indians claim rights to all Little Big Horn water under their treaty with the federal government.

Herschler said the water issue is one of the major questions he seeks answers for at the hearing.

"The state's right to sell excess water out of the reservoir is valuable only if the water is there, and only if it can be beneficially used by the people of Wyoming," he said.

The hearing is scheduled to convene at 9 a.m. March 26 at Sheridan Community College.

Tight market expected

WASHINGTON (AP) - The United States will face oil supply problems next winter that could range from a "tight market" to "very severe difficulties," depending on events in the Middle East and Iran, Energy Secretary James R. Schlesinger said Thursday.

Schlesinger said he is not optimistic about the prospect of improving imports of oil from those areas. Iran, he said, appears to be in a state of political chaos because of factional disagreements and a lack of clear central authority.

Because of this, he said, Iran's oil production, which is now resuming after a three-month shutdown, may be subject to further interruptions.

In a speech to the National Petroleum Council, a government-industry advisory group, Schlesinger said the United States may no longer be able to separate energy issues from for-eign policy in the Middle East. He said that "may have some impact on our energy supplies."

Schlesinger did not elaborate.

BUSINESS MIRROR Shareholders are more aggressive

Treasury bonds NEW YORK (AP) - Closing Over-the

By JOHN CUNNIFF AP Business Analyst

NEW YORK (AP) - Like the class reunion, the corporate annual meeting is a rite of spring, agathering of those with mutual interests to review the past, assess the present, and probably peak into the future.

It once could be as casual as the class reunion too, not really a spring picnic but still an outing, sometimes with box lunches and even entertainment. If only for a day, management and shareholders embraced.

But all that has been swallowed now by the more serious concerns of today, such as consumerism, morality, accountability, governance and the like. Shareholders are aggressive; management often is defensive.

This year, say the big accounting firms that now help-management anticipate questions, shareholders will ask about questionable or illegal payments, political contributions, the use of foreign agents.

"What controls has the company instituted to protect against white collar crime? Does the board review the level of compensation of officers? Why aren't there any women on the board of directors?"

That sampler is from a 34-page booklet of probable questions that is being sent to clients by Deloitte Haskins & Sells, an accounting firm. The essential message is: Mr. President, be prepared.

Depending on the company involved, preparation this year must also include briefings on how to handle church groups, unions, universities, and an increasing array of socially concerned individuals.

While the latter have been active for decades, especially in seeking to make corporations more responsive to their owners, the shareholders, they have grown more numerous, and perhaps more effective of late.

Charlotte P. Hutchinson, concenred shareholder in Iowa Power & Light, intends to seek resolutions against nuclear power. So does Ronald Pomerance, shareholder in Pacific Gas & Electric.

Robert Hall, managing editor of Southern Expo-sure, a quarterly journal of social concern, is again likely to be active in questioning the J. P. Stevens Co., particularly regarding its anti-union policy.

Marvin Perry, of Phoenix, has indicated he plans to question the Arizona Bank about its employment data over the past four years, seeking to determine the percentage of Spanish-surnamed employees.

In addition, the management of various corporations must be prepared for the questions of the old-timers, such as Wilma Soss, Evelyn Y. Davis, Edward Calvert and the 40-year veteran, Lewis Gilbert.

These latter once were referred to as "corporate gadflies," and they were treated with little more than condescension and a minimum of patience, the feeling being that they distracted from business.

Some of the scores of gadflys, but certainly not all, have now earned great respect, in part because they have become more probing, more constructive, and above all, more effective in introducing resolutions.

abject to Federal fcome taxes. But there's another reason too, referred to earlier. That is, the annual meeting no longer is quite the same. Like other institutions, it has had to change with the times. Above all, it needs to respond Management recognizes its new duties; it realizes th Low Close Chg. 18 7118 7118 79 79 -1818 7018 1018 51 51 -11251 51 -112it cannot simply get up before its audience and tell what it wants them to hear, and then amuse them with details of the great new product to be introduced. 51 51 4 85 4 85 4 4 4 82 4 82 4 4 4 63 4 63 4 - 18 tated Press 1979, But you may be sure that more than a few top executives long for those good old days, and prepare for their modern-style, sometimes hectic annual meetings with a couple of aspirin and a prayer.

Soybean honored for many food uses

WASHINGTON (AP) - The ambassador from the People's Republic of China says if Americans eat them, they will live longer.

Secretary of Agriculture Bob Bergland calls them 'America's gold.

And, Leon Prosky of the Food and Drug Administration says they are the go-between to lure Americans away from cholesterol-loaded meat and toward a vegetable diet.

Soybeans were honored Wednesday night with a reception and buffet featuring nibbles of beef, chicken, scallops, hamburger, pork and almond cookies --all "extended" with soybeans.

More than 900 ambassadors, congressmen, farmers and manufacturers celebrated the International Soybean Fair by sampling delicacies prepared by the nation's soybean producers, processors and food firms with the help of the Chinese Embassy's chefs.

"For some people, it is impossible not to eat meat. For the Chinese, it is impossible not to eat soybeans," said China's Ambassador Chai Zemin (Chai Tse-min), whose country has been using soybeans for 4,000 years. "Soybeans do not have cholesterol. That's why we say soybeans will make people live longer."

"Soybeans will be America's leading crop in terms of acreage soon. They're America's gold," said Bergland.

Over 63 million acres of soybeans are grown in 30 states. The value of the 1978 soybean crop amounted to \$11.8 billion. U.S. soybean exports last year contributed over \$6.4 billion to the balance of payments.

But party guests seemed more concerned with the taste of soybean exotica than its trade value as they rated Chinese kabobs, teriyaki beef and breaded scallops, which were extended up to 30 percent by the textured vegetable protein. Rep. Raymond F. Lederer, D-Pa., said he was

"really amazed" at how good the peanut butter cookies made from corn-soy milk were.

"Very spicy but quite tasty," declared FDA psy-chologist Dr. Ray Schucker of the kabobs. "But I don't think the American consumer is ready for this. The soybean's time has not really come."

Its time is not supposed to come just yet, said Nick Rose of Blytheville, Ark., who heads the American Soybean Association.

"You won't be able to buy dishes like this in the supermarket for a long time," he said. "All we wanted to do at this fair was show how versatile the soybean is. The future of soybean is for feeding livestock."

His view was shared by a soybean farmer, who said, after munching on a soybean sausage jazzed up with a strawberry, "I'd rather have my hog eat this."
