Fire prevention is an important part of civil defense. If an enemy attacks this country, his bombs, whether they be atomic, high explosive, or incendiary, will cause more damage by fire than they will by blast. Hence, anything done to make it hard for fires to start is a step towards preparing your community to protect itself if war comes.

The majority of all fires start in chimneys. Others are caused by trashpiles, rubbish, or stored odds and ends that accumulate around and ends that accumulate around tings. Electric Cooking Is

...as MODERN women KNOW!

Modern as tomorrow's motor car . . . electric cooking is the ultimate in modern cookery. For is not electricty associated with everything that is modern . . . radio . . . radar . . . television? It's a modern age we live in and the modern woman cannot be completely satisfied with old-fashioned home-helps. That's why so many, many modern women in the territory served by Southwestern Public Service Company have switched to the modern way of cooking ... of course, it's electric. FEAST OF ASSUMPTION. . . King Paul and Queen Frederika of Greece participated in the nation's annual feast of the assumption of the blessed Virgin Mary on the island of Tinos in Aegean sea. The image of the Virgin was carried through the streets and more than 25,000 worshippers followed their king and queen. Here, the king and queen pass by ailing worshippers lying in the path to be followed by the bearers of the icon of the Virgin to whom they will pray for cures.

Chrysler this year introduces the first power steering ever offered on an American passenger car. Many owners tell us it is the greatest advance in car driving since the self-starter! To a person who hasn't tried it, it is actually impossible to describe what a difference it makes. Driving becomes a new and wonderful experience. At your touch on the wheel, hydraulic power instantly provides four-fifths of the energy needed to steer the car. Gone is all sense of tug, strain, tension. In its place you find a wonderful sense of absolute front wheel control with almost no effort on your part. Hydraguide is regular equipment on Crown Imperials, optional at extra cost on other 8-cylinder models. Whatever car you're driving now, we invite you to ...

Greatest Crisis In History If the reputation denotes in terest in any particular subject, then the present repeated use of this popular word "crisis' reveals the all-consuming concern

What's the fastest-growing line of trucks in America?

Look around you—in cities, on farms, at terminals and loading docks wherever goods are moved on wheels.

More and more, the pay load's packed on a GMC.

You see those letters on medium and heavy Diesels, the most economical workers in their field. For GMC means first in Diesel power.

You see gasoline-powered GMC's front-running the highways of America -pace-setting delivery of the necessities of peace and war.

You see nimble bantamweights of the family - the highest-powered 1/2 - to 2-tonners made—outpulling, outhauling every other truck in their class.

Ever wonder why GMC is gaining a greater percentage of the industry than any other truck-maker?

Ask the truck drivers themselves. See the confident way they talk of the power plants, the broad-shouldered chassis-the way a GMC handles.

Ask about the tons they've hauled, the miles they've logged - the nip-andtuck schedules they've licked time and again.

Ask these cost-wary haulers why they've made GMC the fastest-growing fleet in the land.

They'll tell you it's because GMC is the finest motor truck made.

If you'll come in, we'll show you why we think they're right.
