Nuclear engineers cite three human errors

HARRISBURG, Pa. (AP) - With a stable but still highly radioactive reactor ready for a cold shutdown. attention shifted to the cause of the Three Mile Island nuclear accident.

Engineers said three separate human errors contributed significantly to crippling the power plant eight days ago, at least one in violation of federal Nuclear Regulatory Commission regulations.

NRC engineer Darrell Eisenhut, who briefed the five NRC commissioners Wednesday, said mechanical as well as design problems also were "major contributors" to the accident. But he emphasized that eight similar plants around the country could continue to operate "without undue risk to the health and safety for the pub-

Physicists working round the clock at the contaminated Susquehanna River site examined a number of reactor shutdown options, including one proposed by the plant's designer, Babcock & Wilcox, that could do the job in 10 days.

"There's been a steady improvement in the status of the plant," said NRC official Harold Denton, who is personally supervising the work on orders from President Carter. 'We've made a lot of progress in planning for eventual recovery of the core (which) remains stable.'

Denton said the Babcock & Wilcox plan proposed for the cold shutdown - bringing the reactor to the point where it could no longer pose any risk of escaping control - was getting highest priority. It minimizes both the need for equipment inside the con-tainment building to operate for a

Related stories, Page 12A

long time and the release of contaminated water outside.

"The plan is basically one that involves natural circulation within the reactor vessel and ... water in the steam generator to remove heat,"

Denton said.

Robert Bernero, another NRC official, said: "We're very concerned about the workers, and being very careful that they won't get any undue exposure. That's why we have a housekeeping team inspecting all the equipment, all the valves, all the pumps, before we begin the final step of the cool-down.'

Bernero estimated it might cost upwards of \$150 million to replace the damaged core and clean up the reactor. That price would have to be paid by the plant's operator, Metropolitan Edison Co., which could pass it on to

its customers with higher rates. Eisenhut said an analysis of the near-catastrophe found these errors:

-Valves on an emergency pumping system were closed when they should have been open.

-The main emergency core cooling system was turned off at the wrong

—Four auxiliary water pumps were disengaged, in violation of NRC regulations, when they should have been

ready for use. Joseph Califano, secretary of health, education and welfare, said in Washington that federal officials planned long-range health studies of Three Mile Island employees and residents who might have been exposed to higher-than-normal radiation

"We will have to follow those indi-

viduals we choose for many years," he told the Senate Human Resources health subcommittee, which is conducting the first major congressional inquiry into the worst nuclear accident in American history.

Califano said he expected no increase in the cancer death rate in the area as a result of the accident. But he suggested it was possible that radiation levels within five miles of the plant migh, continue higher than normal for months or years. This was disputed by other witnesses.

"It is weeks or months at most," said Shepard Bartnoff, an official of Jersey Central Power Co., which is one of the plant's owners.

Water main floods, kills Odessa man

METRO EDITION

ODESSA - A 19-year-old Odessa drowned Wednesday afternoon, when he was trapped in a flooded water

Reynaldo Mileg was sealing a joint in a 24-inch water main leading to a new water tower site in northeast Odessa, when an eight-inch water line ruptured and flooded the water main and a 12-foot-deep trench around part of it.

"He didn't have a chance - no place to go," Bill Childress, Odessa fire chief, said this morning of

Childress said Mileg was about 30 feet into the new water main when a backhoe digging more trench footage for laying of additional pipe struck and ruptured the smaller, high pressure line. Water gushed in and quickly filled the trench.

"It's just a freak accident," the fire chief said. "It (the work) is an operation that's done daily...Then something goes wrong."

After water from the ruptured line was cut off, firemen pumped water from the trench and then dug out mud, which had filled the pipe, to, recover Mileg's body.

Childress said the force had pushed Mileg about 30 feet farther into the open end main. About 300 feet of the concrete jacketed and lined steel water main had been lain. He said the water main is covered with dirt as it is laid down and sealed.

Mileg was working for a private contractor in the city of Odessa,

Trucking shutdown may be drawn out

WASHINGTON (AP) — As a four-day trucking shutdown sends shock waves through the auto industry, government officials say truckers and the giant Teamsters union could stay locked in a "test of strength" at least into next week.

Federal mediators arranged a resumption of contract talks today for the first time since the industry lockout of striking Teamsters began Sunday. However, sources said no rapid progress seemed likely to break the

"I think I would expect it to continue.into next week," said an official, who asked not to be named. "There will be a test of strength for a few

The dispute, pitting 500 of the nation's largest general freight haulers against their 235,000 unionized drivers

and warehouse workers, has resulted in the most extensive trucking shutdown in the nation's history.

The auto industry has been hurt the most so far. Chrysler Corp., the nation's third largest automaker, said virtually all of its U.S. manufacturing operations would have to close Mon-

Money is at issue in the dispute, with Carter's anti-inflation wage guidelines playing a prominent role. Bargainers had agreed to a \$1.50-

an-hour increase in general wages over three years, as well as continuation of the current cost-of-living formula. The industry also agreed to a \$30-a-week increase in contributions to pension and health and welfare

The main stumbling block is a union demand that cost-of-living raises be

paid twice a year instead of annually, as has been the case. The difference is 2 percent, or 26 cents an hour, which the industry says translates into a total tab of \$200 million over the life of a new contract. The cost-of-living change wuld put the total package 2 percentage points over Carter's wage standards.

Carter's energy blueprint will increase gas prices

WASHINGTON (AP) — President Carter is unveiling a new energy blueprint for the nation tonight that will boost gasoline prices, perhaps by as much 15 cents a gallon over the next two years, and add measurably to inflation.

Carter's plan, triggered by higher prices by oil exporting countries and an interruption in supplies from Iran, includes the gradual lifting of price controls on U.S.-produced

Another component, facing an uncertain fate in Congress, would levy a new tax aimed at curbing windfall profits for

The basic components of Carter's plan were outlined by White House officials who asked not to be identified.

Although a number of congressional sources say they doubt the tax can be enacted, Carter is expected to sweeten the pot by suggesting the extra tax revenues be earmarked for programs designed to conserve oil by encouraging production of gasohol - a blend of unleaded gasoline and grain alcohol - and the development of solar and other energy sources, all of which have support in Congress.

The decontrol portion of Carter's new energy plan does not require action by Congress and officials say the president will go ahead with it regardless of whether Congress

approves the windfall tax proposal

Carter goes on television from his Oval Office at 9 p.m. EST for a radio-television announcement of plans to gradually decontrol domestic crude oil prices starting June 1, with total decontrol scheduled by September 1981.

Estimates of at-the-pump results of his strategy to both discourage consumption and encourage production through higher prices vary widely.

Gasoline could go up 7 cents to 15 cents per gallon by 1981, according to some unofficial estimates. But the American Petroleum Institute, an industry group, recently issued a study asserting that phased decontrol would add just 5 cents to each gallon of gasoline over the 21/2-year span.

The inflationary impact is equally uncertain, with some forecasters seeing each stage of decontrol adding one-half of one percent to the federal cost of living index.

Carter's energy address will reflect fresh concerns aroused by the accident at the Three Mile Island nuclear power plant in Pennsylvania. Before the accident, he had been expected to declare full support for an expanded nuclear energy program.

Now, sources say, Carter is likely to announce appointment of a high-level commission to investigate the accident and reassess nuclear power safeguards.

Chamber accepts bid

and a new owner already has been found for the present building The chamber board of directors Wednesday accepted a bid by HBF

designed with a capability to expand to three floors. Chamber President Joe Kloesel said the other contender for the contract, Area Builders, submitted a bid of \$556,000. After considering some

HBF was selected, said Kloesel. HBF listed 240 calendar days for the job, while Area Builders estimat-

The chamber moved into its current building in 1971. The second floor was used then for the federal court and jail, according to Fred Tyler, cham-

with the lower level to be leased for retail use and the chamber housed on the second floor, according to Kloesel.

Midland Day in Austin will be April 16 and 17, and a delegation from the Tall City will host a reception for the Legislative Committee chairman. The board endorsed three bills that have been reviewed by the chamber's

Residents tell Midland police of home, storage burglaries

Burglary of a home in the 400 block of East Dengar Avenue was reported to police Wednesday.

Elpidia Lopez told police \$1,000 cash had been taken from her home between 10 a.m. and 4 p.m.

Police said entry to the home had been gained by breaking a large window located at the rear of the resi-

Police said the burglary of a city storage unit was reported Wednes-

Roy Hamilton of Route 1 told police an estimated \$4,000 worth of clothes, furniture and fishing equipment was

Midlanders arrested in March 11 burglary

Two men were in Midland County Jail today, arrested Wednesday in connection with a burglary reported to have occurred March 11 at the 007 Club, 110 N. Big Spring Street. Howard Gene Dorn, 22, and Levi

Duson Jr., 37, were arrested and charged with burglary, police said.
Peace Justice Robert Pine Wednes-

day set bond at \$5,000 for Dorn and \$20,000 for Duson.

taken from the unit at Midland Mini

Storage on North Big Spring Street. The owner of the storage business, Shack Reeder, 201 Plaza Center, told police he noticed the storage unit rented by Hamilton had been broken into sometime in January, but that he had been unable to get in touch with

Hamilton said he was notified of the burglary by the secretary of the business about 3 p.m. Wednesday.

Entry to the storage unit appearently was gained by prying off the lock on the door, said police. Theft of a car was reported Wednes-

day, police said.

Leroy B. Griffin, 1017 D, N. Edwards Street, told police his car, valued at \$800 was taken from the 400 block of E. Estes Avenue between 3 p.m. and 5: 10 p.m.

Griffin told police the car was locked at the time of the theft. Police also said the theft of a stamp

machine and stamps or cash, total value estimated at \$176.50, was reported by an employee of H and M Stamp Company Wednesday.

The items appearently were taken from the basement snack bar Saturday or Sunday, police said.

Symphony does best for company

When company comes visiting, you strive to do your very best - don't

The answer is yes in the case of the Midland-Odessa Symphony which this week had "company" in the form of a guest conductor for its fifth pair of season subscription concerts.

On the podium for the concert pair in Midland and Odessa was Maestro Kurt Woss of Vienna, and the orchestra's instrumentalists rose ad-

A review

mirably to the challenge, and the honor, of having so distinguished a guest conductor to lead the ensem-

Woss has led such renowned orchestras as the Vienna Philharmonic, The Berlin Philharmonic, the Munich Philharmonic, the BBC Orchestra of London and other noted

The program for the concert pair was as Austrian as the guest conductor — the Symphony No. 3 in D major of Franz Schubert, and the Third Symphony of Anton Bruckner.

Conductor Woss is widely regarded as one of the foremost interpreters of the music of Bruckner, so it was no surprise that the orchestra's reading of that composer's sometimes sonorous, sometimes "angular" Symphony No. 3 emerged with clarity and

There are occasional banalities in this work but it is nonetheless a piece of dimension and majestic splendor, and Woss and the orchestra worked very effectively together to bring these laudable qualities forth.

The more melodic and romantic Symphony No. 3 of Franz Schubert received fine and deferential treatment from the orchestra and its leader; the performance was lustrous and polished, in the main.

In keeping with the concert theme, "A Night in Old Vienna," (which somehow sounded just a bit shallow for a concert offering two such "serious" works as the Schubert and the Bruckner), the orchestra and guest conductor offered a Strauss waltz as an encore. It hadn't the clout of the Bruckner or Schubert, of course, but it nevertheless was pleasant to hear.

-ROGER SOUTHALL

Brown lung bill pushed

WASHINGTON (AP) - Former brown lung disease are urging Congress to pass a bill that would compensate more than 35,000 people afflicted by the respiratory ailment.

"The mills won't take care of us, and our state is run by the mills, so our hope is with Congress," said Mrs. Vergie White, who worked for the Spray Cotton Mill in Eden, N.C., for 21

Many cotton textile workers continue to remain on the job, she said, even as their breathing worsens, until they are forced out, unfit to work again.

"A worker who is afraid for his job will not complain about working conditions or file a complaint," Mrs. White told a House labor standards subcommittee Wednesday as it held hearings on legislation that would give financial aid to brown lung sufferers. The hearing was continuing

Another brown lung victim, Mrs. Beatrice Norton of Spartanburg, S.C., said, "I worked in the dust year after year and, just like my mama, I got sicker and sicker." She started in the Maifair Mills Bailey plant at age 14 and quit 36 years later.

Rep. Butler Derrick, D-S.C., said the bill he has introduced would compensate victims totally disabled by brown lung and aid dependents of deceased sufferers who had been totally disabled.

Little mortgage progress reported

Little progress has been made on the Single Family Mortgage Revenue Financing Program since an underwriter was appointed in March, Chairman Harry Clark told the city of Midland Housing Authority Wednes-

The group met in a regular session Wednesday in the City Hall Council

When selected, the underwriting firm of Howard, Weil, LaBouisse and Friedrichs Inc. also was given the OK to do a feasibility study on the housing program in Midland.

The Housing Authority is waiting on bill before the state Legislature which would clarify the legality of the revenue financing program, in which bonds would be sold to provide money for home loans at 81/2 percent inter-

Ruth Wenck, panel member, reported the Midland Commission for Local Community Development is almost out of funds. The local contributions had been used to rehabilitate homes for elderly and handicapped persons in Midland.

In reviewing the financial condition of the authority, Secretary Fred Kester reported the group netted \$2,064 in January and \$1,579 in February.

Damage in one of Hillcrest Manor's apartments from a fire will be paid for by the insurance company, Kester said. The fire had been caused by a cigarette and started in a chair in one of the apartments. Major damage was caused by smoke, he said.

Spring snowfall hinders travel in northern U.S.

By The Associated Press

Much of the Canadian border region experienced snowfall today as rain in the Pacific Northwest turned to snow over the Cascades and spread across the northern Rockies into the northern Plains.

Snowshowers were scattered across the Great Lakes region and rain swept the Ohio valley. Snow cover ranged up to 3 inches across the Snow and winds gusting to 50 mph

were hindering travel in western New York. Mount Washington, N.H., and Burlington, Vt., each received an inch of new snow. Conditions were expected to im-

prove further for residents of floodstricken areas along the Illinois River, barring any additional heavy spring rains.

Flood-widened rivers and tributaries in the state continued to recede slowly Wednesday and a steady fall in the water level was predicted. The Illinois was 9 feet above flood stage at Peoria.

Most of the more than 2,000 persons left homeless in the flooding remained with friends or relatives or in rental apartments and campers. Some began cleaning up houses soiled by muddy floodwater and pummeled by waves and high winds.

The National Weather Service said Wednesday marked a full month that the Illinois River had been above flood stage, although near-record levels which forced thousands of residents to flee their homes didn't occur

Warmer weather again in forecast

Midlanders can try one more time to try to put away their sweaters for the season and break out the swimming suits, since the mercury Friday should hit near 80 degrees, with the low tonight to be in the low 40s, according to the weatherman.

The National Weather Service at Midland Regional Airport is calling for fair and warmer temperatures into the weekend. Balmy breezes about 10 to 15 mph should become light and variable to-

night, the weatherman said. High Wednesday was 67 degrees with the overnight low at 43 degrees. No precipitation was recorded in the past 24 hours.

Area weather watchers reported sunny skies, light breezes and warm temperatures early today.

until two or three weeks ago.

Meanwhile rain continued along the northern Atlantic coast today. Locally heavy thundershowers moved through central Florida last pight dropping 2 inches on Gainesville and 1/2 inch on Cross City.

Canadian air pushed through the Gulf Coast states clearing the skies across Texas and the lower Mississippi Valley with clear skies stretching into Georgia.

Early morning temperatures around the nation ranged from 9 in Williston, N.D., to 76 in Key West,

Here are some other reports:

Brown says SALT could save U.S. \$30 billion

WASHINGTON (AP) - Defense Secretary Harold Brown said today a new arms limitation agreement with the Soviet Union would save the United States from spending an additional \$30 billion over the next 10 years to maintain the nuclear balance.

Brown also said the SALT II agreement, which he described as "very close" to completion, would improve the "survivability" of U.S. land-based Minuteman missiles by restricting Soviet launchers and the numbers of Without such curbs, Brown said, the

Soviets could put up to 40 warheads on each of their biggest weapons and they "could have nearly one-third more strategic systems than with the agreement.' The Pentagon chief made these

points in a speech prepared for a New York City meeting of the Council on Foreign Relations and the Foreign Policy Association. It was the second shot in the Carter administration's new effort to sell the strategic arms limitation treaty.

Zbigniew Brzezinski, President Carter's national security adviser, started the coordinated campaign Wednesday night by telling the Chica-go Council on Foreign Relations that the United States and the Soviet Union "are on the verge of an historic achievement.

The administration's drive for support appeared aimed, at the outset, at influential groups whose members might persuade senators now wavering or opposed to the impending trea-

ty to support it. Some observers believe the administration will have to fight to muster the necessary two-thirds Senate vote

for ratification. Without referring directly to the reportedly poor health of Soviet President Leonid I. Brezhnev, Brzezinski urged that the arms pact be sealed soon so the next generation of Soviet leaders will "face clear and agreed restraints on the competition in strategic arms."

Amid indications that final agreement could be near, Brown said, "There are at least two or three remaining major issues" to be nailed down finally, involving verification

and limits on new missiles. The United States wants it absolutely clear that neither side will encode radio signals, called telemetry, sent back from test missiles in flight. Such signals provide technical information, and the ability to read them helps verify compliance with treaty

His paintings have no message

By BETH MOHR Copley News Service

Gino Hollander looked at a painting he named for

his daughter, Lisa, and said: 'She could be my daughter, or your daughter or anybody's daughter. I make no demands about the

faces I paint and I have no stories to tell." Lisa's expression is decidedly pensive and gentle tints establish her youth, but those who look at her will form their own opinions of the depth and direction of her thoughts.

The desire to get behind the girl's mood is almost irresistible. This quality of making the viewer a part of what is going on in the canvas is typical of Hollander's captivating paintings and drawings. Lisa's father probably knows her as well, or better.

than many parents know their children. Hollander, his wife, Barbara, and their five children left the United States to live in Spain in 1962. Their home in the quiet countryside near

Torremolinos, Andalusia, is where he paints and where the children were educated until time for We sent them to schools back here because they

specializing in Paleolithic wall paintings discovered in caves, and Scott, 16, is preparing for college. The Hollanders lost a son of 24; he died four years ago. 'The children were involved with us," Hollander

said. "We shared trips and interests. If they wanted to stay up until 1 or 1:30 in the morning, that was all right with us. But, we never pushed them into careers. We never said, 'Hey, do this.' We want them to do whatever makes them happiest."

Hollander, 53, didn't begin working at what he liked best until 13 years ago. Before he began painting at 40, he and his wife were filmmakers in New York.

"I did documentary and art films that made pretensions of having something to say, but they didn't satisfy me," he said.

'You have to like working with crowds of people and putting at least three months into making one film. I didn't.

"A painting takes, maybe, an hour and what happens is between me and the canvas. I am in love

His style has been tagged abstract impressionism and he has been called "one of the first of the new figuration painters." Whatever the labels, his works command emotional response in the United States and Europe. That is what he wants.

"In a world filled with emotion, emotion in art

His paintings are filled with affection, sadness, happiness, quiet. He prefers the gentle to overpowering moods.

"I don't want to use art for screaming. What's the matter with the other emotions. I've had my screaming times too but there is still hope.

"I hear the ringing of a little bell and a shepherd with 50 sheep passes by. That gives you a good feeling. I am riding and the horse stumbles. That shoots a little adrenaline. A letter arrives from one of

And, sometimes the memory that one child will never write?

Black and gray tones add age and a mood of mourning to one of Hollander's most-moving protraits. Slashes of color lend a feeling of expectation to another. Of the latter, Hollander said:

"To me, it says something about what has been and what is in the future. To someone else, it will say something different."

In his painting, "Figures In Harmony," the harmony is unquestionable. Figures touch affectionately and are more strongly linked by a flow of blue-white color. But, they have no age and belong to no specific place or era - except that given by the

While subtle color places the emphasis on soft moods in many of the paintings, a vibrant sunset sky gives bright color the lead in one seascape. Then, the pale gray sea begins to captivate. The water is as weightless as the air.

Everything Hollander puts on canvas is done with ease and freedom. He refuses to force an idea or a

"If you think about a painting too much, it becomes a head thing. When you try to think it through you lose the emotional thing. If I work for half an hour and feel I am losing what I want, I put it aside. I can come back later and find it.

"I push the paint around and can see it start to happen. Everyone has something to say and this is one way of saying it. I have been painting long enough to know it is going to come out if I let it."

Hollander has a kind of reverence for the ancient ability of art to communicate.

'We have gone into some of the caves to see the Paleolithic drawings photographed by my son. They tell us about the way man lived 15,000 to 30,000 years ago. We can learn about some of the earliest things we had because one of those things was art.

'Cave drawings not only tell us something, they are beautiful. I looked at one drawing of a pregnant woman and her face might have been done by Modigliani.'

Hollander recognizes and responds to man's lasting fascination with art.

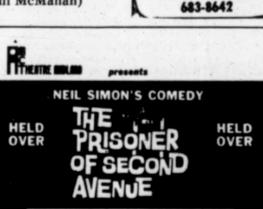

Gino Hollander, with the portrait of a lady, is an artist who says he leaves it to the beholder to decide what his paintings have to say. Hollander's work is known in the United States and in Europe. (CNS photo by Phil McMahan)

Two to debut

HOLLYWOOD (AP) William Hurt and Blair Brown make their motion picture debuts in "Altered States," adapted for the screen by Paddy Chayefsky from his first novel.

Ken Russell will direct for Warner Bros. Hurt is the 1978 winner of the Theatre World Award and has appeared on public television. Miss Brown has appeared in numerous television productions.

By ED HUTSHING **Copley News Service**

Two more late entries, to the Holmes-Doyle Canon are worthy .of interest.

Both have the tonguein-cheek approach to reality. 'The Philosophers' Ring" is "by Dr. John H. Watson, unearthed by Randall Collins" and "Demon Device" is "by Sir Arthur Conan Doyle as communicated to Robert Saffron." In the latter case, Saffron was acting as a medium, while, in the former, Collins

A review

"found" the manuscript after a period of ratiocination that led him to the Theosophical Society.

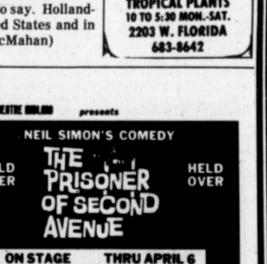

What Collins has done is go on an intellectual chase through history just before World War I broke out. His figures are real-life characters such as Bertrand Russell, John Maynard Keynes, Lytton Strachey, Virginia Woolf, Aleister Crowley, Annie Besant, Leila Waddell and Ludwig Wittgenstein. Their links. are through Cambridge University, secret societies, mysticism, philosophical breakthroughs in moral con-cepts and drug peddling.

The fun of the book lies in the fact that it is mindboggling in its sinuous and sinister turns of thought. The reader is left hanging from the cliff, wondering if the villainy and hinted-at skulduggery is perhaps a form of self-hypnosis.

"The Demon Device," on the other hand, while not involving Holmes or Watson, does involve their creator.

DEATHS

'Slim' Standefer

SAN ANGELO - Services for T.J. "Slim" Standefer, 73, of San Angelo, brother of Mrs. Leroy Olsak of Lamesa, will be at 4 p.m. Friday in Harris Avenue Baptist Church here.

Officiating will be the Rev. J. Earl Dunn, pastor, and the Rev. David Womack. Burial will be in Mullins Cemetery directed by Johnson's Funeral Home

Standefer died Wednesday in a San Angelo hospital.

He was born May 23, 1905, in Bosque County. He was married to Bess Wilson Dec. 24, 1929, in Blakey. He was a member of Harris Avenue Baptist

Other survivors include his wife, a daughter, two sisters, a stepbrother and his stepparents.

Jim' Coleman

Services for James L. "Jim" Coleman, 54, of 3913 Gaston St. were Tuesday in Newnie W. Ellis Funeral Home with Ty Morris of Crestview Baptist Church officiating.

Burial was in Resthaven Memorial

Coleman died Sunday in a Midland hospital.

He was born Sept. 27, 1924, in Lometa and attended school there. He then served in the U.S. Army. After his discharge, Coleman returned home and farmed. He then moved to Austin for a short while. Coleman moved in 1954 to Midland, where he was employed by Borden's. He was a mem-

ber of Crestview Baptist Church. Survivors include his wife, Marjorie; two daughters, Melynda Coleman and Jana Coleman, both of Midland; two brothers, O.B. Coleman of Midland and Jack Coleman of Big Spring, and two sisters, Mrs. Homer Linzey of San Saba and Mrs. Don Owens of Lampasas.

Pallbearers were C.H. Jennings, Ed Bryan, Jim Barrett, Raymond Sessoms, Wayne Lyles and Forrest Riggs.

Inez Robb dies

TUCSON, Ariz. (AP) - Inez Robb, a nationally syndicated columnist who retired in 1969, is dead at the age

Mrs. Robb, who died Wednesday. suffered from Parkinson's Disease. Funeral services are pending.

She began her journalism career in 1927 at the New York Daily News and joined the International News Service in 1938, serving as a war correspondent in World War II.

In 1953 she joined Scripps-Howard Newspapers and the United Features Syndicate. Her column was carried in 140 newspapers. Mrs. Robb also contributed to mag-

azines including the Saturday Evening. Post, Saturday Review and Vogue. Her book, "Don't Just Stand There," was published in 1962.

Survivors include a sister and a brother. Her husband, J. Addison Robb, died about a month ago. They had lived in Tucson for about 17 years.

Bomb injures six

JERUSALEM (AP) - A terrorist bomb exploded today near a bus stop in Arab East Jerusalem, wounding four Arabs and two Jews, none seriously, authorities reported.

The blast occurred on Sallahadin Street, a main thoroughfare near the Herod's Gate entrance to Jerusalem's

Old City Associated Press photographer Rina Castelnuovo, who was at the scene a few minutes after the 4 p.m. explosion, said the sidewalk was stained with blood and shop windows

were broken. A large force of police moved in quickly to block off the street and search for other explosives.

A spokesman at Hadassah Hospital said the victims' wounds were classified as moderate or light.

C.C. Kimbrough

CISCO - Services for Charlie C. Kimbrough, 85, the father of Mrs. A.S. Leiske of Midland, were Wednesday in Holly-Rhyne Funeral Home. Burial was in Oakwood Cemetery.

Mr. Kimbrough died Tuesday night in an Eastland nursing home follow-

ing a lengthy illness. He was born Dec. 3, 1893 in Eastland County. He was a retired barber. He was a member of the Wesley

Methodist Church. Survivors include his daughter, a grandson and two great-grandchil-

C.F. Wendland

Services for Charles F. Wendland, 45, of 3332 Camarie St. were held Wednesday in St. Paul's United Methodist Church with the Rev. Tommy Nelson officiating. Burial was in Fairview Cemetery directed by Newnie W. Ellis Funeral Home.

Wendland died Monday at his home after a lengthy illness.

He was born April 13, 1933, in Corpus Christi. He was reared in Harrison, Ark., having moved there with his family at the age of 12. He finished school in Bergman, Ark. He served in the U.S. Army during the Korean

After his discharge in April 1954, Wendland moved to Andrews to work in the oil field. He was married to Peggy Ellis Oct. 23, 1954, in Odessa. They lived in Andrews 12 years before moving to Midland, where they resided three years.

Wendland was transferred to Michigan with Shell Oil Co., for six years before returning to Midland in 1977. He had been with Shell 22 years. He was a member of St. Paul's United Methodist Church

Survivors include his wife; two sons, Michael Wendland of Houston and Dave Wendland of Midland; a daughter, Mrs. Gary (Becky) Ikle of Odessa; his mother, Edna Wendland of Harrison, Ark.; four brothers, Gene Wendland of Kansas City, Mo., and Jim Wendland, Larry Wendland and Dan Wendland, all of Harrison; two sisters, Dorothy McCarthy of Joliett, Ill., and Pat Seiten of St. Louis, Mo., and several nieces and neph

The family has requested memorials be directed to the American Cancer Society or the Organ Fund at St.

Paul's United Methodist Church. Pallbearers were Bill Shiplett, Dean Rippetoe, Alton Hatfield, Charley Robertson, Mike Munn and Allen Humphreys.

Shirley Chesser

ABILENE - Services for Shirley D. Chesser, 44, brother of Sydney Chesser of Midland, will be at 10 a.m. Friday in Elliott-Hamil Chapel of Faith in Abilene with burial in Elm Wood Memorial Park.

Chesser died Tuesday in an Abilene hospital.

He was born Oct. 4, 1934, in Big Spring and was graduated from Stanton High School in 1953. Chesser attended Odessa College. He was married to married Margie Sue Wilson Sept. 12, 1954, in San Angelo. The couple moved to Abilene in 1974, where he was active with the Boy Scouts and a past president of the Jaycees.

Survivors include his wife, four sons, his parents, two brothers and four sisters.

Jerry' Gritzman

ATLANTA, Ga. - Graveside services for Jerome "Jerry" Gritzman, 71, of 1101 W. Wall St. in Midland were Friday in Crest Lawn Memorial Park in Atlanta, directed by Green Lawn Funeral Directors.

Gritzman died March 28 in a Houston hospital.

He was born in Tuscaloosa, Ala. He was a retired auditor for the Sheraton Inn in Midland.

Survivors include a son, Gordon Smith of Odessa; two sisters, Ruth Berch of Atlanta and Edith Tenebaum of Birmingham, Ala., and a brother, Max Gritzman of New Or-

C. Crawford

OZONA - Services for Clifford Crawford, 20, of Ozona were held Wednesday in Ozona First Baptist Church here. Burial was in Cedar Hill Cemetery directed by Larry D. Sheppard Funeral Home.

Crawford died Sunday in a Del Rio hospital.

He was born Dec. 23, 1959, in Menard. He was married to Sally Cawley Sept. 3, 1977, in Eldorado. He was employed as a plant operator for Indian Wells Oil Co. of Ozona.

Survivors include his wife; a daughter, Jimmie Grace of Ozona; two sisters, Karen L. Bishop and Tressa Crawford, both of Ozona; four brothers, Ricky Crawford of Iraan and Randy Crawford, Danny Crawford and Terry Crawford, all of Ozona; his parents, Mr. and Mrs. Bill Crawford of Ozona; his maternal grandparents, Mr. and Mrs. Jack Barnett of Ozona, and his paternal grandmother, Rosa Crawford of Eden.

Patricia Kilmer

BIG SPRING - Services for Patricia Nettiebell Kilmer, 89, of Big Spring will be at 2 p.m. Friday in Wesley Methodist Church here. Burial will be in Mount Olive Memorial Park directed by Larry D. Sheppard Funeral Home.

Mrs. Kilmer died Wednesday in a Big Spring hospital after a short ill-

She was born Jan. 27, 1890, in Mansfield. She was married to Frank Kilmer in Tucson, Ariz. He died in 1954. She was a member of Wesley Methodist Church, the Rebekah Lodge of Midland and the John A. Kee Rebekah Lodge. She received a decoration of chivalry in 1972 from a

Survivors include her daughter, Dorothy Severin of Big Spring; a sister, Mrs. Louis Ratliff of Cleburne, four grandchildren and eight greatgrandchildren.

80-story building nixed

HOUSTON (AP) - Houston will have to be satisfied at least for a while that the 75-story building now under construction will be its tallest structure.

A Federal Aviation Administration ruling has canceled possible plans to increase the El Paso Tower in Texas Commerce Plaza to 80 stories.

Ansel Windham, FAA area coordinator, said the 75-story limit is needed to protect traffic patterns for the two major airports in Houston and 17 satellite fields that operate through the control tower at Houston Intercontinental.

Anything higher than 998.50 feet above the ground and 1,049 feet above sea level would threaten takeoff and landing patterns, Windham said. He said builders could exceed such standards but would then be fully liable in case of an air disaster.

The El Paso Tower will be 998.50 feet above the ground and 1,107 above sea level.

Originally planned for 70 stories, developers added another five stories last month, attributing the change to heavy demand for lease space.

Ben Love, Texas Commerce Bancshares chairman, said another possible increase to 80 stories is being canceled to stay within the safety guidelines.

The 50-story One Shell Plaza is now Houston's tallest structure, 949 feet above sea level and 899 feet above the ground.

Compensation bill meets with setback

AUSTIN, Texas (AP) - The House dealt a possibly fatal blow Wednesday to a bill allowing large businesses to pay for their employees' on-the-job injuries instead of buying workers compensation insurance. A 76-59 vote postponed floor action on the bill (HB438) until May 4 against the wishes of the sponsor, Rep. Don Henderson, R-Houston.

The postponement means the bill would have only about three weeks to complete its trip through the legislative process before the lawmaking session ends May 28.

Henderson's bill, a major legislative goal of the Texas Association of Business, would enable firms with a \$4 million annual payroll to drop their workers compensation coverage and become "self-

The TAB repeatedly goes before the Stae Insurance Board in opposition to rising workers comp premiums, which now total about \$1 bilion a year in Texas.

Henderson sought a one-week delay in the bill because, he said, "we are trying to come to an agreement among the parties interested in this legislation." He said it was intertwined with another bill that would attempt to deal with the product liability "crisis" by making it harder for injured consumers to win suits against manufacturers.

Trial lawyers are against both bills, But Rep. Bob Bush, D-Sherman, a lawyer, moved for the delay to May 4, saying, "if they are trying to reach a compromise, a week is not enough time. This is a major piece of legislation that will affect millions

of workers in the state of Texas."

Trial lawyers, who handle contested workers compensation cases for a fee of one-fourth the benefits, strongly oppose the bill. Opponents maintain an injured worker would be reluctant to sue his or her employer for adequate compensation for an injury.

Bush said the bill would "set up a dual system of workers compensation, one for giant corporations and the other for small businesses."

Day of deaths described by former prison hostage

HOUSTON (AP) - A former teacher in the Texas Prison System, who was held a hostage for 11 days during a siege by three inmates in 1974, told a jury Wednesday of the final day when four persons were killed in an escape attempt that failed.

Ronald Robinson, now a professor of criminal justice at East Tennesse State University; testified he heard 'shouting, the screaming, and the shooting"as hostages and inmates pushed a homemade shield down a ramp at a prison unit called The

Robinson said he did not know who fired the shots but "they sounded close and were muffled."

He was the second prosecution witness in the retrial of Ignacio Cuevas, accused of causing the death of a hostage.

Cuevas was convicted in the spring of 1975 and sentenced to death. The Texas Court of Criminal Appeals granted him a new trial, after he spent four years on death row, on the ground the presiding judge at the first trial had erred when he failed to disqualify a juror.

Robinson said none of the hostages was physicially abused during the longest siege in U.S. penal history. Using a shield of chalkboards, law-

books, and hostages, the three in-

mates attempted to escape from the prison but were met by a blast of bullets and the stinging stream of

high pressure fire hoses Two convicts, Fred Carrasco and

Rudolpho Dominques, were shot to Two hostages, Julia Standley and

Elizabeth Beseda, were shot to

During Wednesday's session the jury was dismissed and Robinson testified that on the last day Mrs. Standley, a prison librarian, had told him, "Ron, tonight you can sleep in your own bed again.

Robinson said he answered, "Julia, you have never been more beauti-

She was dead a few minutes later. State District Judge Miron Love refused to permit the statements to be heard by the jury.

After the Wednesday proceedings that lasted only a half day, prosecutors indicated additional hostage survivors will be called to testify.

The Pan American Student Forum of Texas presented Vicky. Kelly with a \$400 scholarship at its state convention in San Antonio recently. The daughter of Mr. and Mrs. John Kelly was one of five students in the state to receive the award. A senior, she is president of the Lee PASF and member of the National Honor Society, Who's Who in American High School Students and the LHS A Cappella

Bills to control open trucks referred to Senate committee

Austin Bureau

AUSTIN - Ever get peeved because your auto windshield has tiny holes from gravel flying from those big open trucks lumbering along ahead of you?

Sen. A. R. Schwartz of Galveston says he is - the windshields of both his cars are peppered - as he brought up an old issue of requiring truckers to cover open trucks with tarpaulins while hauling loose materials.

Schwartz argued before the Senate Economic Development Committee on behalf of his SB 84 which would require vehicles hauling loose material to be covered by canvas, tarps or similar covering. His legislation would have teeth: a fine of up to \$2,000 and-or a jail term of up to a year for a third or subsequent conviction for violating the law. His bill would also require the violater to pay treble damages to the injured party if the law wasn't complied with.

A host of industry representatives appeared to testify against Schwartz' bill and another "loose gravel bill" by Sen. Jack Ogg of Houston. The Ogg

bill is like Schwartz' except it doesn't contain the penalties.

Both Schwartz and Ogg said existing laws regulating open trucks hauling loose materials are not being enforced.

Schwartz presented committee members with a sheaf of newspaper clippings and editorials citing the problems and damages caused by flying gravel on Texas highways. He reminded the committee he tried unsuccessfully two years ago to get a similar law passed. He accused fellow senators of being relucant "to offend anybody who owns or drives a truck."

It costs less, Schwartz said, for a trucker to cover his truck with a tarpaulin than the costs of replacing a single broken auto windshield.

A 1971 law, which witnesses agreed was not being adequately enforced by the Department of Public Safety, calls for open trucks to not be filled with loose material to higher than six inches below the top.

Wayne King, representing the American Automobile Assn., said there is widespread public support for the Schwartz-Ogg legislation. "We have problems all over the state with sand and gravel and trash and garbage," he said. "The problem concerns safety as well as the environment.

Industry spokesman argued that a \$5 per load surcharge for tarpaulincovered transports imposed by the Texas Railroad Commission, and other costs that would have to be incurred, would cost the industry millions of additional dollars every years. These costs, the witnesses said, would be passed on to con-

Tom Johnson, representing the Texas heavy-highway branch of Associated General Contractors, said member-contractors build 95 percent of the state's new highways. He said requiring tarps would cost his contractors a total of \$11 million a year.

Since present contracts are already awarded, the contractors would have to pick up the tab for the additional costs the first year. From then on, Johnson said, the costs would be passed on to the taxpayers.

The Ogg and Schwartz bills were sent to a subcommittee.

Coal yield may triple

> HOUSTON (AP) - The coal affiliate of Exxon Co. USA estimates production of lignite in Texas will triple by 1985. Joe M. Hamner, planning

manager for Carter Oil Co., said the state's production by 1985 will approximate 50 to 55 million tons compared with the current output of about 19 million a

Hamner said Carter estimates Texas lignite recoverable reserves at more than 10 billion

Speaking Tuesday before the Houston chapter of the American Petroleum Institute, Hamner said most of the increased Texas production will be used to generate electricity.

Carter has extensive lignite acreage in East Texas where Exxon is studying the feasibility of building a plant to gasify some of the reserves.

Field classed

reservoir

as major

HOUSTON (AP) - A Chinese geologist has placed the Gudao field near the mouth of the Yellow River among the world's largest oil fields.

Wang Ping, a senior geologist for the China National Oil and Gas and Exploration and Development Co., said Gudao reserves approximate 700 million barrels.

Wang made the disclosure while participating in a symposium on new giant oilfields during the 64th meeting of the American Association of Petroleum Geologists. The three-day meeting ended Wednesday.

Wang later pleaded confidentiality while declining to give newsmen additional details about Gudao which was discovered in 1968 and placed on production in 1971.

Geologists classify giant fields as those capable of producing at least 100 million barrels of oil or 1 trillion cubic feet of natural gas. Fields in the Middle East, North Africa or Asiatic Russia, however, can gain such a classification only if believed capable of producing 500 million barrels of oil or 3 trillion cubic feet of gas.

T.A. Fitzgerald, Exxon Corp. exploration advisor, said 288 giant fields were discovered during the 11 years ending with 1977,

Moran well completes

HOUSTON - Moran Bros., Inc., Itoday announced the completion of its No. 1 Porter in the West Yukon field, Canadian, County, Okla.

The operator finaled the well in the Mississippian-Hunton zone from 8,594 to 9,170 feet and in the Skinner-Oswego section from 8,160 to 8,282 feet.

On the 24-hour potential test on the Mississippian-Hunton, the well flowed 334 barrels of oil, with a gas-oil ratio of 1,272-1, on a 14/64-inch choke. Flowing tubing pressure was 425 pounds. No water was produced with the gas and oil.

From the Skinner-Oswego, the well flowed 100 barrels of oil on the 24-hour potential test through a 24/64-inch choke. The gas-oil ratio is 4,550-1 and the flowing tubing pressure is 475

Moran Exploration, Inc., a whollyowned subsidiary of Moran Bros., is the operator of the well and owns a 38.5 percent working interest. Other working interest owners are ABT-Windfohr Oil Co. of Fort Worth and William Moss Properties of Dallas.

Moran has completed two other wells in the area and two more are in the process of being completed. Moran also holds an additional in-

terest in 2,773 acres in the field.

on the average for each gallon of

gasoline? How much of it goes to the

Organization of Petroleum Exporting

Countries? What is the profit for the

oil companies? And how much does

ENERGY

OIL & GAS

wonder where all that money goes?

NEW YORK (AP) - When you're

Who is getting the lion's share of

off each gallon? Most oil companies and gasoline analysts are reluctant to hazard even the vaguest of guesses about what percentage of the price of a gallon

goes where. And those who will, point out that generalizing the percentages is difficult because taxes vary from state to state, dealer profit margins differ, and the cost of the crude oil used to make gasoline depends on whether the oil comes from a foreign or a domestic well.

But a composite of several estimates of how gasoline costs break down goes something like this:

The biggest chunk of the cost — the 72-cent figure is a basic average for all types of gasoline - goes to pay for the oil from which the gasoline is made. This portion is bigger for some companies than others because some, like Mobil and Exxon rely more heavily on foreign oil, which is more expensive than domestic petroleum. But on the average, about 45 percent, or more than 32 cents, of the cost of a gallon of gasoline is for the basic ingredient - crude oil.

The second largest component in the price of gasoline is federal, state and local excise taxes. These vary from locality to locality and state to state, but in general, account for 20 percent, or more than 14 cents, of the cost of a gallon of gas.

Gasoline dealers are the next to dip their hands into the income from the sale of the fuel. By law, their profits from the sale of a gallon of gas are limited to those of May 1973 — before

Fuel shortage idles tractors

AUSTIN, Texas (AP) - Farmers and oil distributors agreed Tue day there is a shortage of diesel fuel in some areas of Texas and the nearest available supply may be several hun-

dred miles away. "We've got tractors sitting in the field and they can't run because there is no fuel," Dale Glasson, Farmland Industries Inc., told a special subcommittee of the Texas Energy Advisory Council. He estimated about 15,-000 farmers are affected in the West

Texas area. Glasson estimated there was a 12 percent shortage in March. "There is a shortage from one end of West

Texas to the other," he said. Bill Nelson, Texas Wheat Producers Board, said there were nowheat farmers needing diesel now but he estimated the need for deisel d; uring the June and July harvest season would more than double last

Carl King, Texas Corn Growers Association, said corn, mile and cotton GLASSCOCK COUNTY growers are faced by the "biggest pinch" at the present time.

Nick Murphy of the Governor's Office of Energy Allocation said fuel dealers are required to set aside 4 percent of the diesel they get for emergency needs. His office is now taking emergency requests for diesel fuel and in turn will notify farmers

where they can get the fuel "The best distribution point may be several hundred miles away,' said. "I do not believe we can find a convenient dealer in West Texas. I do believe we can find it somewhere in

Extender potentials

Kelly Bell Inc., operating from Midland, and Southern Union Exploration Co., Dallas, announced successful completion of a gas condensate exten-

sion well in the multipay Sheriff, East field in Calhoun County The companies said the No. 1 Kni-

pling tested at the rate of 5.3 million cubic feet of gas per day and 60 barrels of condensate per million cubic feet of gas. Production was through perfora-

tions in the Frio sand at selected intervals at a depth of 9,131 feet to 9,182 feet, with bottom hole pressure on the test registering 3,661 pounds per square inch. The well was drilled to 9,296 feet

set on bottom. Kelly Bell Inc, the operator, and Southern Union Exploration, a subsidiary of Southern Union Co. are partners in the well. The Knipling is the first well to be drilled on a 600-acre block in which Southern Union Exploration has 25

and 5.5-inch production casing was

percent interest. The Sheriff, East field is located in the Texas Gulf Coast Basin and is

their market.

the total.

be created from its crude-oil source, and that accounts for about 12 percent of the total cost of a gallon of gas, or not quite 9 cents. That goes to pay for refining, storage and transportation.

And the price of refining is going up, because of the Department of

"tilt" in refining costs — meaning that refiners can pass on more of their costs to gasoline customers rather than to customers of other fuels. The tilt regulation will add about a nickel to gasoline prices this year.

Energy's recent decision to allow a

The purpost of the tilt is to encourage production of unleaded gasoline, which in the past few years has risen from almost nowhere to a third of the market because of federal regulations requiring that most new cars have anti-pollution catalytic convert-

ers that burn only unleaded fuel. Unleaded gas is more expensive to produce than gas with lead, because when lead is not used as a performance additive, gasoline must be refined much more carefully to reach an equivalent quality.

Once produced, gasoline must be marketed, and the factors involved in this - advertising, accounting, credit-card bookkeeping and others - eat up 7 percent, or about 5 cents, of the price of a gallon of gas.

And if the gas is successfully marketed by the oil company, the results are reflected in profits - which are about 3 percent of what motorists pay at the pump, or 2 cents a gallon. Last year, the nation's oil compan-

ies turned a \$14.2 billion profit on sales of \$84.6 billion, coming from more than just gasoline, of course.

Others' smoke very harmful

AUSTIN, Texas (AP) — A cancer researcher has told members of a House committee to think about cigarette smoke the next time they wake up with red eyes, stuffy nose and a cough after a night on the

Dr. Carmault Jackson Jr. of The University of Texas Health Center at Houston said Wednesday studies have shown a non-smoking passenger in a train's club car has inhaled in one hour as many carcinogens as if he had smoked 17 to 35 ciga-

"We're talking about the sidestream smoke, the smoke that you inhale as a non-smoker," he told the **House Committee on Health Services.**

A bill to close "a lot of exceptions and loopholes" in the 1975 no-smoking law was sent to subcommittee for more study.

Armadillo dealers beware

AUSTIN, Texas (AP) - House members planned to vote final passage today on a bill making criminals of people who sell skunks and armadillos. The bill, by Rep. Bill Hollowell, D-Grand Saline,

advanced on a voice vote Wednesday. Hollowell's bill provides penalties of up to a \$1,000 fine and 180 days in jail for selling skunks and

armadillos or possessing them for sale.
"We have a rabies epidemic in Texas from El Paso to the Louisiana border," Hollowell said, with skunks one of the major carriers. He said experts testified that armadillos carry leprosy.

He told the House the reaction of one member of the House Environmental Affairs Committee, Rep. Ron Bird, D-San Antonio, to the testimony.

'Mr. Bird ... was a consumer of armadillo meat. He had an icebox full. He has emptied that icebox since hearing that testimony," Hollowell said as the House guffawed.

United talks collapse

WASHINGTON (AP) - Contract negotiations between United Airlines and striking machinists are collapsed after only one day, apparently ruling out any chance for a swift end to the 6-day walkout that has grounded the nation's largest air carrier.

Sources close to the talks said late Wednesday that company representatives flatly rejected contract proposals made by the International Association of Machinists and Aerospace Workers as negotiations resumed under the auspices of federal mediators.

Company bargainers, who did not meet union representatives face to face, were said to have left the Washington hotel where negotiations were being held for Chicago, where United is headquartered.

More than 18,000 union members struck the airline Saturday, two days after a rebellious union rank and file rejected a tentative accord worked out by nego-

Flynt charge dismissed

CINCINNATI (AP) - A state appeals court has dismissed an organized crime charge against Larry Flynt and opened the door for a new trial on a pandering of obscenity charge against the Hustler magazine owner.

The 1st Ohio District Court of Appeals ruled Wednesday that prosecutors could seek a new trial on the pandering obscenity charge. But the court unanimously threw out the organized crime charge, citing a companion decision that concludes parts of the state's organized crime statutes are vague and

Flynt's trial here in February 1977 attracted national attention when a jury convicted him on both charges. He was sentenced to 7 to 25 years in prison

Diggs charged by House

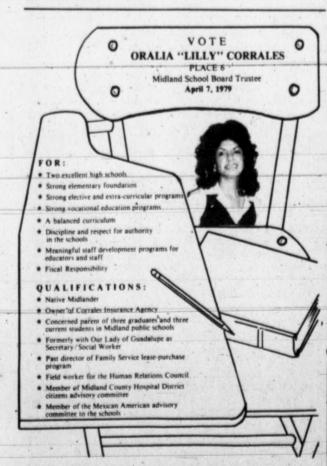

WASHINGTON (AP) - Rep. Charles Diggs, already appealing his federal court conviction on 29 counts of mail fraud and filing falsified payroll forms, must now defend himself against a congressional committee's charges that he violated House

The House ethics committee Wednesday accused Diggs, the senior black member of Congress, of 18 violations of the chamber's rules. That action opens the way to a possible "trial" of the Michigan Democrat by the panel and subjects him to the possibility he could eventually be punished by the full House.

BART resuming service

SAN FRANCISCO (AP) - The Bay Area Rapid Transit district is resuming trans-bay service to Oakland after an 11-week shutdown that followed a fatal fire in an underwater train tube.

The state Public Utilities Commission, warning it would keep a close watch on the transit system, decided at an emergency meeting Wednesday that service could resume.

Science panel urges physicians to prescribe fewer sleep aids

WASHINGTON (AP) - Doctors should strictly limited numbers and for short periods of time. limit sleeping pill prescriptions and better warn their patients of the medications' potential health hazards, a National Academy of Sciences panel

The panel, in a report published today, said sleeping pills normally should be prescribed only in

'Prisoners' held over

"The Prisoners of Second Avenue," now on stage at Theatre Midland, has been held over for one additional performance Friday at 8:30 p.m. The trials and tribulations of life in the big city

jungle is the theme of this comedy by Neil Simon. Darrell Ward plays Mel Edison, a harassed individual trying to cope with New York, being unemployed and middle aged. Coila Morrow plays

The grimness of the situation does not keep "The Prisoner of Second Avenue" from being a convulsing comedy, organizers said. Reservations may be made by calling the Theatre Midland boxoffice at 682-4111.

Although the report called current practices of prescribing sleeping pills "difficult to justify," it said there is no need to ban barbiturates, as has been suggested, even if they are sometimes abused.

Physicians should rarely, if ever, prescribe the

drugs to new patients for more than two to four weeks, the study said. For patients already taking

sleeping pills, doctors should refrain from providing

In 1977, 8.5 million American adults used prescription sleeping drugs, mostly barbiturates and benzodiazepines, according to the report published in the

New England Journal of Medicine. About a quarter of those used the drugs every night for two months or longer, it noted, even though there is little evidence the pills are effective beyond a few

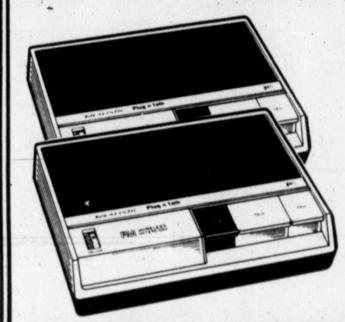

The prescribed use of barbiturates has been declining steadily since 1970 and accounted for only 17

percent of the sleeping aid prescriptions in 1977. The study was conducted by the academy's Institute of Medicine at the request of the White House and the National Institute on Drug Abuse.

Market index

NEW YORK (AP) - American Stock

Stock market gains

stock market recorded its second straight gain Wednesday as traders looked ahead to new energy proposals from President Carter.

The pace of trading accelerated to a five-month high. Volume on the New York Stock Exchange reached 41.94 million shares, up from 33.53 million Tuesday and the heaviest total since a 50.45 million-share day last Nov. 1.

The Dow Jones average of 30 industrials, which jumped 13.08 Tuesday, added another 1.47 to 869.80. Actively traded oil stocks

included Exxon, up 1/8 at 53 3/8 as of the 4 p.m. close in New York and Texaco, ahead % at 26%. General Public Utilities, the company that owns the crippled Three Mile Island

nuclear power plant, led the active list and dropped 1/4 to 141/2. In the past week the stock has fallen 3% points. The daily tally on the NYSE showed about five gainers for every three

stocks that lost ground, and the exchange's composite index posted a .16 gain to 57.71. Standard & Poor's index of 400 industrials was up .26 at

114.63, and S&P's 500-stock composite index added .25 to 102.65. The Amex market value index rose .80 to 180.65, clos-

ing above 180 for the first time since it was introduced 5½ years ago.

In the over-the-counter market, the NASDAQ composite index closed at 132.75, up .42.

Grain

FORT WORTH, Texas (AP) — Export wheat 3.72½-3.78½. Milo 1.12-1.58. Yellow corn 2.97-3.07. Oats 1.96-1.98.

KANSAS CITY, Mo. (AP) — Wheat 50 cars: ½ to 1 higher; No. 2 hard 3.47½-3.53½; No. 3.341¾-3.56½n; No. 2 red wheat 3.47¼-3.49½n; No. 3.15¾-3.48½n.

Corn 6 cars: 1½ lower to 5 higher; No. 2 white 2.68; No. 3 2.66; No. 2 yellow 2.53¾-2.64½n; No. 3 2.33½-2.63½n.

Oats 0 cars: Unch; No. 2 white 1.18-1.66½n; No. 3 1.49-1.65½n.

No. 2 milo 3.61-1.04n.

No. 1 soybeans 7.24-7.44¾n.

Sacked bran 115.60-115.50.

Sacked shorts 107.00-107.50.

LITTLE BOCK, Arkansas (AP) — Domestic milled rice prices were steady discontinuation.

mestic milled rice prices were steady during the past week. Strong dry rough rice price levels were a strengthening factor along with continued good export demand. Current domestic long grain prices are: Texas 21.00; Arkansas 21.00-22.00; Louisiana 21.00-22.00. Medium grain: Texas 17.00; Arkansas 17.00; Louisiana 16.00-17.00. (All per cwt bagged f.o.b. mills) Rice mill byproduct markets continue with very little trade activity. Current quotes: bran; Texas 45.00-17.00; Arkansas (nominal) 10.00-50.00; Louisiana 10.00. BUSINESS MIRROR Small business, creator of jobs, being strangled

By JOHN CUNNIFF. AP Business Analyst

NEW YORK (AP) - Everyone seems to love small business, and well they should when they look at its record for new products and new jobs. But nobody seems to do very much for it.

Rarely is its voice heard above the shouts of Big Business, Big Unions and Big Government. Sometimes it squeals in frustration, but it runs out of breath and patience, and sometimes it fights with

Squeezed by the big three, it shrinks in size. Between 1950 and 1976, big firms increased their percentage of manufacturing assets to 45.5 percent from 39.7 percent, according to congressional hear-Onerous government regulatory and tax policy helped move the trend along. Government reporting

small businesses 38 times more than the very largest corporations. Labor unions haven't always been sympathetic, often applying to small enterprises the same wage standards as for giant industries, even though small business doesn't enjoy the same economies of vol-

requirements, for example, are said to cost some

All three tend to overlook small business contribu-

tions to the economy. As put by the House Committee on Small Business last year, it is the cutting edge of competition, the innovator-inventor, the source of leadership, the

entrepreneurial outlet, the job creator. "It is surprising to some that between 1969 and 1976, small businesses accounted for what can be considered virtually all the new private sector employment in this country," said the committee.

It found that while total employment rose by 9,583,000, the 1,000 largest companies accounted for only 74,897, while state and federal governments accounted for 3 million. Smaller firms employed the

Will lack of appreciation give way to support? Arthur Levitt, Jr. thinks so. Levitt is head of the American Stock Exchange, which has its share of smaller companies, but he has additional input too.

As chairman of the White House Commission on Small Business, Levitt is charged with the job of picking the brains of small business people, 25,000 of them in 50 states and Puerto Rico.

By August, 2,000 delegates will have been selected and in September Levitt and his commissioners will report to the President. In January the President convenes the White House Conference on Small Out of it, Levitt vows, will come remedial legisla-

tion: reform of taxes, government regulations, pa-

perwork, international trade and the correction of other areas of irritation and perhaps injustice. But why, he was asked, has small business smaller business would be the correct term, because as generally used it excludes only the 1,000 largest concerns - been unable or unwilling to state its

Based on his attendance at many of the state hearings, and on "hundreds of conversations with

various explanations to two vital ones: 1."Fear of government retribution." They fear, he said, that the government will "get even" if they shout too loudly. They fear the bigness of govern-ment, he said. They fear the "faceless burea-

2."It doesn't make any difference." He believes both attitudes will change. The committee, he says, has a commitment to action from President Carter, and Levitt himself has courted the White House and Congress. He promises legisla-

Given hope and better organization, he insists, the small business lobby can become the most powerful in history. It has to be that way, he suggests, if the economy and the marketplace is to be saved.

MHS YOUTH CENTER CHATTER Bulldog diamond studders rolling

By JANE FORSYTH, VALERIE VAN PELT and CECILY SHULL

Two eggs, four eggs, six eggs per basket. If you want to know the new cheerleaders than go ahead and ask it. In all the excitement about Easter Holidays more excitement was added Tuesday with cheerleaders tryouts. Next year cheers will be led by Milby Hartwell, Kyle Raybourne, Rod Steele, Shawn Mowles, Susan Cowden, Amy Davenport, Nita Bedford, Catherine Baimbridge and alternate, Dru Perry. CONGRATULATIONS!! Cheers to you as you lead next year's winning season!!

Last Saturday the MHS diamond-studders beat San Angelo. The guys lead the 5-4A baseball race 4 and 0 in district play. Tracy Gann, Bobby Stovall, Tommy Munoz, Jimmy Zachery, Kelly Lilly and David Brigham did an excellent job at the plate. The vicotry score was 10-8 for these Bulldogs. CON-GRATULATIONS!!!!

Good luck to all the Bulldog teams as they compete in UIL district competitions this weekend.

THOUGHTS TO PONDER for the holidays: Juniors and Sophomores, if you want to run for class officers, decide now because the elections are right after the holidays.

Seniors, be thinking about a class song, flower, and class colors. Everybody think about the Special Project of the Youth Centers.

Carole and Marvin Rasco (The Roscos) and all the Youth Center members wish to express their sincerest thank you to the following: Eddins-Walcher Co., The United General Insurance Agency, Christiani's Jewelers, The Rod Rick Corp., United General Claims Agency and The Permian Corp. These people were generous enough to donate enough money to purchase the Mirror Ball and the lights to go in the Youth Center to complete the Disco look. Many Thanks!!!

JUNIOR ROTARIAN this week is Bill Creager and Junior Lion is Cecily Shull. CONGRATULA-

TIONS!!! There go Ces, Jane, and Val hopping down the Bun-ny Trail!! Happy that Easter is on its way!; Have a

P.S. Rasco says, to all, may the Easter bunny be good to you!! Newsflash!! Those Super diamondstudders claimed another vicotry over the Odessa Bronchos Tuesday night!!! Score 11-5.
