Midlanders turn eyes to skies

Tornadoes sighted in Basin; Some heavy rainfall

Almost everybody in Midland was watching the skies Tuesday night.

Heavy thunderstorms spawned tornado sightings between Midland and Andrews and dropped heavy rains on parts of the Permian Basin while leaving others completely dry.

With the memory of the devastating tornado that ripped through Wichita Falls last Tuesday still fresh, reports of a tornado moving toward Midland from the Andrews County line sent as many as 40 Midlanders with children, dogs, cats and sleeping bags to the shelter of the Midland County Courthouse.

The crowd began to gather about 9:15 p.m. Tuesday, a Midland County Sheriff's Department spokes-man said today, and had left by about 10:30 after the threat of an incoming tornado had passed.

Reports of shelter seekers in the downtown Southwestern Bell Telephone Building could not be confirmed this morning.

"I don't know. I was staying near my bathtub last night," one telephone company spokesman said today.

Since the building is usually locked at night, however, its use a shelter probably was limited, said the spokesman.

Despite heavy rains in the area and some strong winds, no reports of damage had been received by this morning.

The storm apparently spent a good deal of its time directly over the National Weather Service rain gauge at Midland Regional Airport, where 1.62 inches of rain was measured between 10 and 10:38 p.m. with most of that measured from 10: 17 to 10: 38, weather service spokesmen said. Hail a half-inch in diameter was mixed with the

heavy rains at the airport, and pea-sized hail was reported at the Warfield truck stop east of Midland. The area east of Lamesa in Dawson County ap-

parently got the heaviest concentration of rain. Residents there reported up to an unofficial four inches during the storm Tuesday night. Gauges further south in Dawson County recorded

two to three inches. Midland apparently missed the majority of the

moisture, with most city gauges reflecting only a few tenths of rain. South Midland recorded .6 inch and north Midland

got only .1 inch. Far east Midland received only .2 inch, but in the far western part of the city, .67 inch fell. Greenwood missed the rain altogether, reports indicated

Forecast for Thursday calls for a continued chance of afternoon and evening thundershowers with some possibly becoming locally heavy tonight.

Probability of rain is put at 30 percent tonight. decreasing to 20 percent Thursday.

High Thursday is expected to be near 80, with the overnight low in the upper 50s.

Recorded high Tuesday was 79 degrees, nowhere close to the record temperature for the date of 97 degrees, set in 1975. Overnight low was 56, a good deal milder than the 33 degree record set in 1953.

The 1.62 inches recorded at the airport brought the monthly accumulation to 1.63 inches and the annual rainfall total to 2.86.

Court hands news media defeat

WASHINGTON (AP) - The Supreme Court, voting 6 to 3, ruled today that public figures suing for libel may inquire into a journalist's "state of mind" and the editorial process behind the allegedly libelous statement.

Handing the news media a major legal defeat, the justices ruled that reporters and editors enjoy no constitutional protection from having to answer such questions in libel cases.

"We have concluded that the (2nd U.S. Circuit) Court of Appeals misconstrued the First and 14th amendments and accordingly reverse its judgment," Justice Byron R. White wrote for the court.

The decision is a big victory for former Army Lt. Col. Anthony Herbert, who is suing CBS and others in a \$44.7 million libel action.

The decision means lawyers

another?" or "Didn't you and your editors suspect that your source was lying?" - actual malice might be easier to prove in future libel suits.

White was joined in the majority opinion by Chief Justice Warren E. Burger and Justices Harry A. Blackmun, Lewis F. Powell Jr., William H. Rehnquist and John Paul Stevens.

Three justices, William J. Brennan Jr., Thurgood Marshall and Potter Stewart, filed separate dissenting opinions but only Marshall voted to give the news media a total victory.

"Because I believe some constraints on pretrial discovery are essential to ensure the 'uninhibited and

School election

robust' debate on public issues which (the court's 1964 ruling) contemplated, I respectfully dissent," Marshall said.

Brennan wanted the court to shield journalists from "state of mind" questions in certain instances but added: "This privilege must yield if a public figure plaintiff is able to demonstrate to the ... satisfaction of a trial judge that the libel in question constitutes defamatory falsehood." Stewart voted to send the case back to the federal trial court for rulings on each individual question Herbert's lawyers sought to ask.

The test case decided today stemmed from Herbert's 1973 lawsuit against CBS, the network's "60 Minutes" news magazine program, correspondent Mike Wallace, producer Barry Lando and the Atlantic Monthmany of them, but refused to respond to those dealing with the editorial process - how he decided what to include and exclude from the telecast.

A federal trial judge ruled that Lando had to answer the questions, but the 2nd U.S. Circuit Court of Appeals ruled that journalists must always be free from questions that might inhibit their constitutional rights under the free-press provisions of the First Amendment.

The circuit court said that "faced with the possibility of such an inquisition ... the tendency (among journalists) would be to follow the safe course of avoiding contention and controversy - the antithesis of the values fostered by the First Amendment.

Today's decision reversed the circuit court's ruling The high court's secret deliberations in the libel case and its lengthy

Herbert will be able to ask at least some of the questions they previously were barred from asking in pre-trial proceedings.

"According an absolute privilege to the editorial process of a media de-fendant in a libel case is not required, authorized or presaged by our prior cases," White wrote.

He said that to give journalists such an absolute privilege "would substantially enhance the burden of proving. actual malice, contrary to the expectations of (past libel rulings)."

Under a landmark 1964 Supreme Court decision, public officials and public figures who sue for libel must prove "actual malice" - knowledge that a statement was false or reckless disregard for whether it was false.

If questions probing into the editorial process are allowed - such as "Why did you use this quote instead of

voting slow

The April 28 runoff election between incumbent school board member Ed Runyan and retired teacher Alice M. Greer seemingly is not attracting the interest of the original election. By this morning, after two full days of absentee voting, only 25 persons had cast their ballots at

the school district office. A record number of absentee ballots was cast for the April 7 election, which set up the runoff. Voters apparently were attract-ed then by the Plan O referen-

dum on that ballot. Absentee voting will continue through Tuesday at the school

district office at 702 N. N St.

Herbert, who was stripped of a battalion command, gained national prominence in 1971 when he formally charged his superior offices with covering up war crimes in South Vietnam.

Lando's investigation of Herbert's experiences led to a Feb. 4, 1973, segment on "60 Minutes" called "The Selling of Colonel Herbert."

In it, the truth of Herbert's charges was called into question. Lando also wrote an article for the Atlantic Monthly magazine about his findings.

Herbert's suit charged that the program and article "falsely and maliciously" depicted him as a liar and injured his reputation.

Herbert's lawyers questioned Lando on 26 occasions and asked a host of questions. Lando answered

Tensions rising again in Iran, but Khomeini's foe backs down

TEHRAN, Iran (AP) - Ayatollah Ruhollah Khomeini's forces staged military parades throughout Iran to boost army morale and demonstrate the new Islamic republic's strength. Meanwhile, Tehran's local religious leader, Ayatollah Mahmoud Taleghani, did an about-face after warning against "another dictator" and appealed to his supporters to cease public protests against Khomeini's revo-

But several thousand of his sup-

porters demonstrated in Tehran for

the fourth successive day demanding

a purge of "counter-revolutionary

elements" from the revolutionary

Meanwhile, thousands of flower-

garlanded soldiers paraded through

Tehran and provincial capitals, car-

rying large portraits of Khomeini and green Islamic flags as crowds of by-standers clapped in approval.

committees

leader of the revolution, ordered the parades to try to repair some of the damage done to the morale and efficiency of the armed forces during the upheaval that led to the overthrow of Shah Mohammad Reza Pahlavi.

Khomeini, the 78-year-old religious

The executions resumed today after a one-day layoff for the firing squads. Seven men were shot for killing antishah demonstrators, Radio Tehran announced.

This brought the total number of confirmed executions by Khomeini's committees to 143 since the last royal government fell in early February.

Taleghani, who went into hiding last weekend after Islamic militiamen arrested his two sons and a daughter-in-law, roughed them up and held them for 24 hours, urged the revolutionary committees on Tuesday to exercise restraint and warned against restrictions on freedom.

Measles outbreak noted

HOUSTON (AP) - Houston-area health officials say a measles outbreak here is worsening quickly, and could become an epidemic unless a program to vaccinate all students is carried out.

"I'm getting newly verified and possible cases today faster than I can keep up," Dr. David Williams, chief of epidemiological services for Harris County, said Tuesday.

A total of 64 confirmed and 21 suspected cases of red measles or rubeola have been reported to city of Houston and county health officials during the past few weeks.

Carter angers environmentalists with plan to open forest lands veloped forest lands were studied for

WASHINGTON (AP) Environmentalists angered by President Carter's recommendation to open millions of acres of national forest lands to development are turning to Congress for

help. "There's no necessity for it," William Tate, executive director of the Wilderness Society, said Tuesday. 'These are marginal lands.

Carter recommended to Congress that 36 million acrcres of roadless land - 7.5 million acres of which are in Alaska - be opened for "multiple uses," such as mining, grazing, timber cutting, recreation and oil and gas exploration.

An additional 15.4 million acres would be designated as wilderness under the Carter proposal, announced Monday. Such a designation would keep the lands virtually free from new development and mineral exploration.

Turnage said conservationists would appeal to Congress to classify

day with a chance of showers.

Details on Page 2A.

more land as wilderness. Congress must appqove all wilderness areas. The timber industry also plans to go

to Capitol Hill over the proposal. Don-Lee M. Davidson, president of

the National Forest Products Association, said Congress would be asked to reduce the amount of land proposed for wilderness classification or given temporary protection pending further review.

Davidson said the effect of Carter's decision "could well be either shortages of wood products needed by consumers or increased imports. The national forest system contains 187 million acres, of which 14.7 already are classified as wilderness. The addition of 15.4 million acres would mean that 16 percent of all national forest lands would be preserved from development.

Carter's proposal concerned the "Roadless Area Review and Evaluation" or Rare II process, a program under which 62 million acres of unde-

Committee recommends better safety equipment, safeguards

WASHINGTON (AP) - A government advisory committee on nuclear safety says the nation's nuclear power plants should be equipped with improved instruments to alert plant operators to the condition of vital safety systems.

That was one of several recommendations made Tuesday by the Advisory Committee on Reactor Safeguards to its parent agency, the Nuclear Regulatory Commission. The committee said specifically the

nuclear plants should have instru-

ments to give plant operators a better reading of the temperatures and water levels in the plants' reactor core.

The group also recommended new safety research and analysis in the aftermath of the Three Mile Island nuclear power plant accident March 28, and said the NRC should consider having its own computer system to simulate'reactor operations and accidents

Operators of the Three Mile Island

tions inside the reactor and its water system when the accident began, and were slow to realize that certain safety valves should have been open or closed at the time.

public a preliminary study written in January 1978 in which a consultant, Carl Michelson, a Tennessee Valley Authority specialist on nuclear safety, predicted just the sort of confusion that apparently compounded the Three Mile Island accident.

Plumbing speeds nuke cooling

HARRISBURG, Pa. (AP) - The painfully slow ing process of cooling down the damaged reactor at the Three Mile Island nuclear power plant is being accelerated through changes in the plant's plumb-

Denton goes home

HARRISBURG, Pa. (AP) - Harold Denton, sent here to tame the worst nuclear power plant accident in the nation's history, has gone home to Maryland. - Denton, a nuclear physicist who is the Nuclear Regulatory Commission's chief of operations, was dispatched as President Carter's personal representative after a reactor accident at the Three Mile Island atomic plant nearly caused a catastrophe.

Denton supervised an operation that controlled releases of radiation and strove to harness the renegade reactor.

"I consider my task here completed," Denton said at his final news conference Tuesday, although the contaminated cauldron is still not at the totally safe point called cold shutdown:

Four hours later, he walked into his Rockville. Md., home to the happy cries of his three children.

"Oh, he's here! He just came in the door," said his daughter Liz, 18, who happened to be on the telephone with a reporter at the time.

"Fantastic! Oh, it's so great to have him home after 19 days!" she said.

The 43-year-old Denton had come to Three Mile Island on March 30, following two days of confusion, poor communication and misleading reports about the dangers.

From the moment he arrived aboard an Air Force helicopter, Denton turned around the mood at the site. His credibility was never questioned and there was no doubt about who was in charge.

The public got nearly all its information about the scary accident from Denton, who patiently translated complex technical developments into lay terms with a soothing voice at his regular news conferences

In the process, he became a sort of folk hero, drawing praise from Carter and warm thanks from Gov. Dick Thornburgh.

And young ladies in the Harrisburg area were spotted with T-shirts saying, "Harold Denton Can Heat Up My Reactor Any Time."

Nuclear fuel shipments cause concern to India

WASHINGTON (AP) - India's worry about uncertain future shipments of nuclear fuel from the United States is expected to be the most contentious topic when Foreign Minister Atal Bihari Vajpayee

Harold Denton, chief of Nuclear Regulator Commission operations at the plant, said Tuesday that technicians hope to lower the temperature of the reactor's cooling water by another 10 degrees.

He had announced plans last week to reduce the water temperature by 10 degrees per hour from about 280 degrees down to 230 degrees, but it was only down to 245 degrees by Tuesday.

"The preferred cooling plan ... is taking a lot-longer than I had imagined it would," Denton said at a final news briefing here. He arrived at Three Mile Island 19 days ago, when the reactor's core was in danger of melting, and was returning to Washington

He also said releases of radioactive iodine have been halted and a flap over disposal of radioactive waste will be solved by taking the material to Washington state instead of South Carolina, where authorities refused to admit it.

Meanwhile, the Metropolitan Edison Co., operator of the plant, said Tuesday it could go bankrupt unless the state gives final approval to at least part of a proposed \$49 million consumer rate increase that was approved only six days before the nuclear accident.

At the plant's troubled reactor, the NRC wants core temperatures at 230 degrees before steps are taken to bring it into what is called a cold shutdown. That's the point at which there is no longer any risk of a chain reaction in the core going out of control.

The reactor normally heats pressurized water, which in turn heats other water into steam to power turbines. The steam is now being used to carry off reactor core heat.

"Plans are being made to lower the temperature about another 10 degrees by opening up new flow paths for steam," Denton said.

Victor Stello, a Denton aide who is taking over as the NRC chief of operations at the site, said a cold shutdown is being delayed so that precautionary backup systems can be completed.

'The design just takes time, and it takes time to fabricate pipe and install it," Stello said.

Denton said increased releases of iodine 131 during a recent 30-hour period were far too slight to present any danger to the public. The releases have been halted, he said.

He said a possible cause of the iodine releases was a procedure used by company technicians to replace charcoal filters that decontaminate gases before they are released.

"We found that 20 filters had been removed, but no replacements had been put in," Denton said, adding that in the future, each of the 130-pound filters will be replaced as soon as its removed.

Metropolitan Edison went before the Public Utility Commission Tuesday in connection with the rate increase, nearly all of which was slated for runn Three Mile Island. Met Ed. offered to trim \$16 million from the

fortable appearance for Spring-through-Summer. The four pieces-a solid jacket, solid trouser, checked trouser and reversable vest-offer a degree of versatility that can accommodate practically any business or social engagement. And, tailored in a beautiful texturized polyester twill, it's a natural for today's active man. Stop in, select one for yourset at this special Spring Value price...

a 190.00 value

NOW ONLY

ees President Carter and Secretary of State Cyrus R. Vance next week.

Vajpayee will spend a day and a half in Washington after visits to New York and Detroit. The United States has a contract to deliver

enriched uranium to India through 1993, the Indians say

But a U.S. law passed since the agreement was signed makes it more difficult to ship uranium unless India consents to full safeguards by the International Atomic Energy Agency aimed at insuring that India does not use the uranium to make nuclear weap-

A recent effort failed to bring agreement on the appointment of a special joint committee of scientists to determine whether these safeguards would interfere with development of peaceful nuclear energy in India.

Beginning this fall, the Congress will have power to veto uranium shipments unless President Carter expressly orders them.

Indian Prime Minister Morarji Desai refuses to submit to full international safeguards as long as they are not also applied to countries which, like the United States, already have nuclear weapons. Desai, 83, says he has no intention of making nuclear weapons, but his promise would not bind his successor.

The question of U.S. uranium shipments to India is part of the broader issue of nuclear development in South Asia, including Pakistan's desire for nuclear weapons

Other items on the agenda for discussion include developments in the Middle East and Vietnam and the military activity of both the United States and the Soviet Union in the Indian Ocean.

Welding defects found

LOS ANGELES (AP) - Welding irregularities were found in the containment vessel of the "twin sister" reactor at the Three Mile Island nuclear power plant, according to X-ray inspection reports cited by the Los Angeles Times.

The Times also reported that an unpublicized mishap at the "twin" reactor - involving a closed valve and instrument deficiency - occurred one week before the more serious accident at the Pennsylvania nuclear plant.

The "twin" reactor, known as Unit 1, has one of the best safety records in the nuclear industry. But these inspection reports, plus the minor accident, raise questions about its safety, according to the Times report, published Tuesday.

Metropolitan Edison Co., which operates the twin reactors at Three Mile Island, discovered problems last month with its subcontractor's inspection report on 63 welds in Unit 1.

Metropolitan Edison officials declined Monday to discuss what irregularities were found in the routine inspections, pending a meeting with the subcontrac-tor, Nuclear Energy Services Inc. Officials of Nuclear Energy refused comment, the Times said.

A Metropolitan Edison official who declined to be identified said, "Maybe in the back of their minds (the utility's employees) do suspect they were falsified."

Quake cleanup hindered by rain

DUBROVNIK, Yugoslavia (AP) - Persistent rains plagued earthquake cleanup operations again today and made life more miserable for 80,000 people spending their third night outside.

Avalanche dogs and specialists with listening de-vices combed demolished neighborhoods in the Montenegro coastal area, leveled by a powerful quake Sunday.

increase. But James Liberman, general counsel for the utility's parent company, General Public Uti-lities, said that without a "transfusion" the company faces bankruptcy. The commission could decide this week whether

the utility is entitled to the increase in view of the accident, which has crippled the plant indefinitely

Carter says he'll nominate **Barrow for Marine position**

WASHINGTON (AP) - President Carter an- The Corps has denied the reforms resulted from the nounced today he will nominate Gen. Robert H. McClure incident. Barrow, a three-war veteran who cracked down on training abuses, to become the 27th commandant of, the Marine Corps.

Barrow, holder of the Navy Cross and the Army Distinguished Service Cross for "extraordinary heroism" in the Korean and Vietnam wars, will replace Gen. Louis H. Wilson, who will retire June 30 after four years as head of the 187,000-member. Corps, said the sources, who asked not to be named

The 57-year-old Barrow, a native of Baton Rouge, La., has been assistant Marine commandant for the past 13 months

His nomination is subject to Senate confirmation, but this is normally automatic.

As Marine commandant, Barrow will sit as a member of the Joint Chiefs of Staff, the nation's topmilitary body

While Marine manpower chief in 1976, Barrow was instrumental in drafting reforms designed to end physical abuse and harassment of recruit trainees by drill instructors. Officials said the training reforms, which include closer supervision by officers, have worked well.

Barrow told reporters at the time that the Corps would not ease the tough physical conditioning that traditionally marks the training of Marine recruits. But he said there would be no more "excess stress" on recruits, including "nose-to-nose yelling" by drill sergeants.

Among other things, Barrow ordered the length of the training day at boot camp shortened from the old dawn-into-night schedule.

The changes followed the death of Marine Pvt. Lynn McClure of Lufkin, Tx., who died after suffering head injuries during close combat training.

By SUSAN TOTH Staff Writer

The changing of the guard and a discussion of the inter-district transfer policy highlighted an otherwise routine meeting of the Midland school board Tuesday.

Two new school trustees were sworn in to office by Dist. Judge Perry Pickett.

Joyce Sherrod, whose resignation as a Midland teacher was accepted just before the swearing in, and Parker Humes took the oaths of office. The third trustee to be sworn in this year will be determined by voters in a runoff election April 28 between incumbent Ed Runyan and retired teacher Alice M. Greer.

Ann Page, who was narrowly defeated by Mrs. Sherrod in the April 7 school board election, said in her farewell speech to the audience and her fellow board members that she was "proud of our district and the things we stood for.'

She thanked each trustee individually for his contributions during her one-term tenure on the board, and urged each of them to "extend the same kindness to the person who succeeds me."

To standing applause from the audience and the board, Mrs. Page was presented a framed color photo of the board she was leaving by board president Johnny Warren, who thanked her for her tireless work and "mother's touch.

David Grimes, who chose not to run for re-election, seemed more relieved than saddened by his departure. His farewell oratory was limited to "I wish you all lots of luck. Goodbye."

Grimes then tucked his photo under his arm and stepped down. Neither of the deposed members

remained for the rest of the meeting, which included consideration of several transfer requests from outside the district.

Transfers for four students in the Greenwood district who attended Midland schools this year were approved, but a transfer for a student currently enrolled in Greenwood who wanted to transfer to Midland for high school was turned down pending approval from the Greenwood superintendent

Special education students from Greenwood were accepted for transfer on the condition the Greenwood district pay tuition for the students.

Special education students are not included in the average daily attendance figures used to get reimbursement from the state, Midland Schools Superintendent James Mailey noted, so the tuition would cover the difference in state aid that normally would be received.

In other business, the board heard a report on special education and strings programs and authorized the staff to place orders for new school buses for next year.

The board, after an executive session, agreed to sell one lot taken for back taxes in November 1967 for \$460. They also purchased five lots near the school warehouse and bus barn for \$7,500.

Following a lengthy executive ses sion, two students were expelled for the remainder of the school year.

One expulsion was for striking a teacher and the other for carrying a weapon on campus, school officials. said

Man hurt

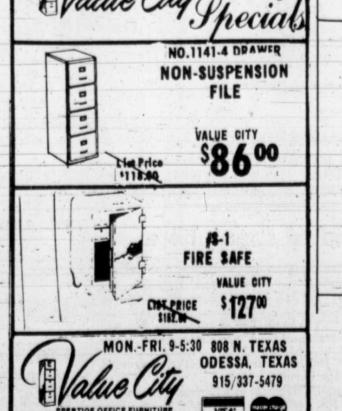

A 26-year-old man was wounded after he and police officers exchanged about 25 shots in a gun battle in the busy concourse of Cleveland **Hopkins** International Airport, police said.

No one else was wounded, officers said, although about 50 people were in the area when the shooting started Tuesday night.

> Police said they had no idea why the man, identified as Bruce Brightharp of Cleveland, started firing a .38-caliber revolver. Brightharp was hit by four bullets and was reported in fair condition at Southwest General Hospital today.

An airport maintenance man said he recalled seeing the man at Hopkins for about a month. "just sitting there, kinda quiet, bothering nobody."

Berkeley voters tell police to ignore marijuana laws

BERKELEY, Calif. (AP) - Voters in this city made famous by campus protest have told police to all but gnore marijuana smokers and have approved a measure prohibiting the use of city funds to support South Africa's apartheid government.

Both measures were endorsed overwhelmingly by voters Tuesday in an election marked by lower-thannormal turnout.

The city is the home of the University of California's largest and most prestigious campus, the scene of violent activism in the 1960s.

The marijuana measure would pro-

hibit spending city funds to enforce state and federal laws against marijuana smoking. It directed city officials, including police, to lobby for repeal of such laws.

The main apartheid initiative, accompanied by a second enabling measure, would ban the deposit of city money in banks with direct or indirect ties to South Africa.

With all 118 precincts reporting, the marijuana measure was approved 17,-507 votes to 9,681. The main antiapartheid proposal was approved 17,-718 to 9,314 and the companion initiative passed 16,519 to 8,454.

Tax-supported legal aid denied striking farmers

RAYMONDVILLE, Texas (AP) -A South Texas state judge has ordered the tax-supported Texas Rural Legal Aid not to represent striking farm workers arrested here.

Attorneys for the Charles Wetegrove Co., hit by a Texas Farm Workers Union strike that slowed harvesting for two weeks, complained that TRLA is not allowed to get involved in criminal matters.

State District Judge Darrell Hester agreed and after a Tuesday hearing said he would sign an injunction barring TRLA involvement in criminal proceedings

TRLA Lawyers last week represented union members arrested as picket line tension mounted. Rollins Koppel, attorney for Wetegrove; said it was unfair for TRLA to use its federal funds to represent persons charged with crimes. However, attorney Randy Fleuriet, representing TRLA, said the legal aid group is not barred by law from working on certain criminal cases.

Willacy County Sheriff Oscar Cor-rea testified that the TRLA lawyers made it more difficult for deputies to maintain order on the picket lines. "I felt had they not been there we could have talked to the people and they would have understood laymen's terms about the law," Correa said.

Koppel had also asked Hester to bar TRLA from getting involved in labor activities. But the judge refused to issue an order preventing the legal aid lawyers from attending rallies or demonstrations.

TRLA lawyers indicated they will appeal the injunction. The Texas farm Workers Union

strike began here April 4. A Wetegrove official testified that the strike cost the company \$300,000. Koppel said the harvest returned to normal Monday as extra law enforcement officials protected workers who returned to the onion fields.

Chavez again calling for banana boycott

WASHINGTON (AP) - Cesar Chavez, his United Farm Workers union locked in another struggle he fears it may not survive, is resorting once again to his ultimate weapon - a call for a consumer boycott.

The target is not grapes or lettuce or wine. It is Chiquita bananas, Chavez hopes the boycott will bringvictory in the union's three-month

strike against 11 major lettuce growers in California and Arizona.

Sun Harvest Inc., one of the larges banana boycott, the UFW hopes, would pressure Sun Harvest into settling with the union and set a pattern for the other growers.

"Our best hope is the boycott," Chavez said in an interview Tuesday. "The best hope is what we call 'The Court of Last Resort' - the American public.'

In its 13 years, the 12,000-member UFW has won the backing of up to 17 million adults for boycotts launched to gain bargaining recognition, according to a national poll cited by the union.

"The American public," Chavez says, "has been very good to us." Chavez, 52 and still the dominant force in the union he founded 13 years ago, is touring the country on behalf of the six-week-old boycott.

This week he is in Washington, seeking publicity for the boycott, along with money from other unions and government support for his let-

tuce strike. The boycott, he says, is causing alarm at United Brands.

But company spokesmen following behind Chavez contend the UFW provoked the lettuce strike and is exploiting the good intentions of sympathetic consumers who are being asked to back a strike that will result in sharply higher food prices.

Chavez contends the growers are trying to break the strike - and ultimately the UFW - by importing illegal aliens to replace the striking farm workers.

Non-union harvesting is up to 30 percent "and increasing," he said, claiming the U.S. Immigration and Naturalization Service is ignoring the situation.

"If we cannot stop the unchecked illegal immigrant strike-breaking game that they've been playing, it'll be very serious for the entire union. We need desperately to get the govPlace WANT ADS INSTANTLY! Dial 682-6222

Actor Orson Bean will be the featured speaker at the Midland Chamber of Commerce membership banquet, scheduled May 7.

Actor to be featured at Chamber banquet

Award-winning comic actor Orson Bean will be the featured entertainer for the Midland Chamber of Commerce annual membership dinner to . be held at 7:30 p.m. May 7 in the Chaparral Center at Midland College.

Bean has been a stage and screen actor, television celebrity, producer of off-Broadway plays, night club comedian, author, founder and director of an experimental school for children and a professional magician.

He has described himself as a "househusband and explorer of inner

tainer doing a magic act that toured

the country. He first appeared n New

York City at the famous Blue Angel

Supper Club, where he received more

laughs than applause. He decided

then to stick to straight comedy.

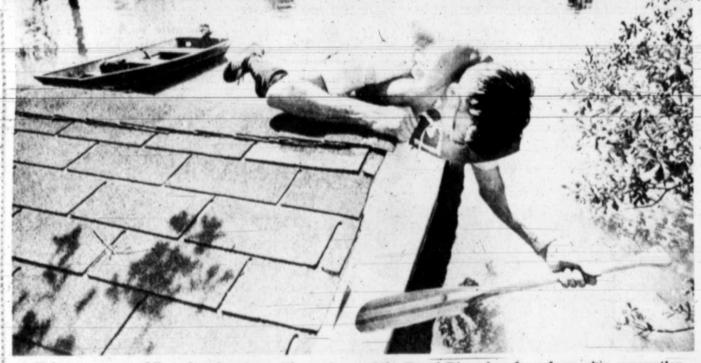

"Men of Distinction," which was followed by "John Murray Anderson's Almanac" for which he received the Theatre World Award.

Bean played the lead in "Will Success Spoil Rock Hunter?" opposite Jayne Mansfield, which he said "accounts for my bad posture.'

David Merrick used him in "Subways'Are For Sleeping," which won Bean a Tony Award nomination'. He followed this with a two-year run in "Never Too Late."

The comic actor also starred for a year with Melina Mercouri in "Illya

Rival firms oppose agreement

WASHINGTON (AP) - The Western Union Telegraph Co. wants to expand its radio and television transmission operations, but competitors are crying foul, saying the company seeks to make the move at taxpayer expense.

At issue is an agreement between Western Union and the Corporation for Public Broadcasting, that would allow the company to use government-owned transmitting and receiving facilities around the country.

Rival communications companies say that would give Western Union an unfair competitive advantage.

The Federal Communications Commission is expected to decide shortly whether to approve the agreement. Western Union and PBS are urging approval, while other firms, including RCA and American Telephone & Tele-graph, say the deal should be reject-

the People's Republic of China. He also is a former national chairman of the Republican Party.

Following his official announcement, Bush will begin his campaign

with visits to Connecticut, Massachusetts, New Hampshire, and Florida,

Bush's government career includes time as director of the Central

mitting programs to its television affiliates over Westar I, a Western Union communications satellite, using ground facilities owned by CPB. The 157 transmitting and receiving stations cost CPB \$39.5 million, most of it government money, and serve 276 public broadcasting affiliates across the country.

Western Union last November asked the FCC to lease three of the ground facilities near Washington, New Orleans and Jouston. The company said it envisions eventually beaming radio and television programs to at least 22 additional cities serviced by the government system.

As part of the agreement between Western Union and CPB, Western Union would pay \$5 million over the next seven years to use the grstations. It would use its own satellites and its own equipment to hook into the publicly owned facilities and "from time to time" would be allowed to use public broadcasting terminals.

The leasing proposal emerged threes ago when Western Union and CPB signed a 10-year contract for leasing access to Westar I for \$2.4 million a year. That agreement included provision for Western Union to use the government-owned ground facility but they withheld approval of that part of the contract.

Since then, RCA American Commuhave said if the Western Unin-CPC tage at taxpayer expense.

"If Western Union can use public facilities to have an instant telecommunications network with minimal investments, competition will not be equal," argued RCA in briefs filed before the FCC. "There is no way that private business...can compete with entities using public facilities.'

Joe Mahon, Western Union's assistant vice president for public broadcasting services, said if the company had to build its own ground facilities,

they would be costly. Mahon conceded that an agreement with the government would be cheaper than building ground facilities, but said, "We're not getting a free ride or something for nothing." However, RCA told tje FCC that under the proposed agreement, Western Union could realize profits "far exceeding that which privately-funded carriers can achieve.

Lawyers for CPB argue that the agreement with Wes4nion would not threaten its autonomy and would offsepenses of leasing the satellite.

Mike Wilhelm, a CPB attorney, sai agreement would "realize far more revenue than will be sacrificed in equipment."

ernment to enforce the law space. Chavez said the union will face its

critical test late this month when the lettuce harvest begins in California's Salinas valley, billed as the nation's 'Salad Bowl. The company, however, says the

issue "is not the establishment or survival of a union or cause, but the settlement of a contract.... And so far, United Brands spokes-

man Dennis A. Sullivan said, the boycott has not affected sales of Chiquita, which he called "the most valuable thing" United Brands owns.

Sullivan denied that Sun Harvest has hired any illegal aliens. He said California's farm labor law allows for replacing striking workers, and that is what Sun Harvest has done.

The growers have offered threeyear wage increases averaging 7 percent a year in line with President Carter's anti-inflation guidelines. Chavez says the guidelines don't

apply because more than half of the 1,000 striking workers make less than \$4 an hour.

The government acknowledges that workers making less than \$4 are generally exempt from the guidelines but says the pay standard applies to the strikers as a whole because many make more than that.

Chavez said a few workers make as much as \$8.50 an hour on piece rates, but they work less than 40 hours a week and are unemployed much of the year. "They are poor, very poor,' he said.

The growers, who say many UFW workers earn up to \$12 an hour, say they offered increases of up to 12 percent in the first year to boost the minimum hourly wage from \$3.70 to

But they say the UFW still insists on a \$5.20 minimum in the first year and total wage and fringe benefit hikes of 200 percent over three years.

Missing items may have been found

A man using a metal detector between March 15 and 19 near the old Superior Oil Company building at 3701 Andrews Highway may have found several items police believe were taken in a March 14 burglary.

Two rings, a bracelet and a man's gold wrist watch were thrown from a ear into the lot east of the building, police were told. A man who works nearby told them he had seen someone using a

metal detector in the area, officials said.

Police investigators found none of the stolen articles and believe they may have been picked up by the man with the metal detector, according to officials. The property was taken from the motel room of a San Antonio man.

Sergeant Bob Miller today asked the man who was using the metal detector in that area or anyone having information pertaining to the case to telephone the police department.

Former Bryant aid to speak here

Melanie Barrier, former press secretary for Anita Bryant, will address the Midland Chapter of Texas Eagle Forum at 7:30 p.m. Thursday. The meeting is scheduled in the Fellowship Hall of Golf Course Road Church of Christ.

Also speaking will be Emory Bartlett, local chapter president, who will report on her recent trip to Washington, D.C., where she attended a National Pro-Family Rally.

Eagle Forum is an educational and legislative organization concerned about the moral issues today, said Ms. Bartlett.

The Forum is a non-partisan group active in local, state and federal levels of government, according to Ms. Bartlett.

More information may be obtained by telephoning Ms. Bartlett, 694-7308, or Cindy Miller, 697-5073.

Publisher denies knowledge of alleged bribe to guard

NEW YORK (AP) - New York Post publisher Rupert Murdoch says he had no knowledge of transactions the newspaper made to obtain jailcell pictures of Son of Sam killer David Berkowitz.

Murdoch briefly took the stand Tuesday at a pretrial hearing in State Supreme Court in Brooklyn to testify in the case of James Mitteager, charged with bribing a guard to get the pictures the Post published in December 1977. The photos showed Berkowitz asleep in the psychiatric prison ward of Kings County Hospital.

Mitteager, a freelance writer, has maintained that he has been singled out for prosecution by the state's special prosecutor while higher-ups at the Post are going untouched.

Murdoch, an Australian who has newspaper interests on three continents, said he knew nothing of the money transaction between Mitteager and his newspaper. He said he sometimes deals in millions of dollars and would not have been involved in something so small as Mitteager's exchange. The Post allegedly paid Mitteager \$13,000, of which \$5,800 went to the guard, Herbert Clarke.

Clarke, who has immunity in the

He was finally caught because a policeman ticketed his car after he parked on a Brooklyn street just prior to his final assault in which he shot a 20-year-old young woman to death and blinded her 20-year-old date. A police check of tickets that were handed out in the area at the time of the shooting led to Berkowitz' arrest at his Yonkers apartment.

Berkowitz pleaded guilty to the killings — to avoid a trial, he said — and was eventually removed to a facility for the criminally insane.

DEATHS

a the sea

Jessie Beacham

Services for Jessie Beacham, 90, of 2800 W. Illinois Ave. were to be at 2 p.m. today in the First United Methodist Church with Dr. Charles Lutrick, pastor, officiating.

Burial was to be in Resthaven Memorial Park, directed by Newnie W. Ellis Funeral Home.

Mrs. Beachman died Tuesday in a Midland nursing home.

She was born Oct. 3, 1888, in Mexia, and moved to Midland from Jones County in 1907.

She was married to the late Walter Beacham in Midland on May 16, 1909.

She was a member of the First United Methodist Church and the Friendly Builders Sunday School Class.

Survivors include a daughter, Mrs. R.E. Klebold of Midland; a sister, Mrs. H.E. Zinn of Chula Vista, Calif .; two grandchildren and four greatgrandchildren.

Pallbearers were to be L.A. Klebold, Tom Hale, Francis Adkins, L.T. Sledge, Charles Reeder and Tommy Davis.

James T. Swails

Services are pending at Newnie W. Ellis Funeral Home for James T. Swails, 72, of 2508 College Ave.

Swails died early Tuesday in Midland Memorial Hospital.

He was born Oct. 23, 1906, in San Saba County. He was married to Beatrice Matlock Sept. 28, 1930, in Carlsbad, N.M.

A resident of Midland County since 1927, Swails worked for the county and the Midland Independent School District and owned an air conditioner service company. He was a member of Parker and Main Street Church of Christ.

Survivors include his wife, Bea: two sons, James A. Swails of Midland and Jan N. Swails of Stuttgart, West Germany; two daughters, Mrs. James A.' (Sammie) Beggs and Mrs. Robert R. (Deanna) Whitaker, both of Midland; four brothers, Durward Swails and Dayton Swails, both of Midland, Bert Swails of Sonora and

Derrell Swails of Austin; four sisters, Enola Myres of Brady, Mrs. Aldis Wade, Dorotha Ruple and Ona Thomas, all of Midland, nine grandchildren and three great-grandchildren.

Fred E. Foster

ODESSA - Services for Fred Eugene Forster Sr. were to be at 11 a.m. today in Hubbard-Kelly Funeral Home here, with burial in Sunset Memorial Gardens. Forster died Monday in an Odessa

hospital following a lengthy illness. He was born April 9, 1894, in Albia,

Iowa, and was married Jan. 18, 1932, in Shawnee, Okla. He was an independent oil well drilling contractor, coowner of Forster Drilling Co. and a member of the First Christian Church

Survivors include his wife, Anna; a son, Fred Forster Jr. of Midland; a daughter, Mrs. Philip A. Grimes of Columbia, Mo.; a sister, Mrs. Ruth Floyd of Shawnee, Okla., five grandchildren and a great-grandchild.

Clifford A. Parr

Services for Clifford A. Parr, 70, of rural Midland, were to be at 10 a.m. today in Newnie W. Ellis Funeral Home with Elvis Barrington, pastor of Primitive Baptist Church, officiating

Burial was to be in Fairview Cemetery.

Parr died Tuesday in a Midland hospital.

He was born Jan. 8, 1909, in Midland. He retired eight years ago from the Texas Pacific Motor Transport, where he had worked for 31 years.

Parr was a deacon in the Primitive Baptist Church. Survivors include his wife, Irene;

two daughters, Betty Louise Trauber and Jerry Faye Presley, both of Midland; two brothers, Alfred "Blondie" Parr of Big Spring and Roy Parr of Carlsbad, N.M.; three sisters, Florence Harrison and Venoy Curtis, both of Midland, and Bertha Monroe of Rankin, nine grandchildren and three great-grandchildren.

Pallbearers were to be Alton Jones,

Johnny Godwin, J.C. Jones, Lonnie Jones, Don Adams and Winfred Pardue.

Honorary pallbearers were to be deacons of Primitive Baptist Church.

Charles E. Day

SAN ANGELO - Services for Charles Edward Day, 49, formerly of Forsan near Big Spring, and commander of the West Texas wing, including Midland, Odessa, Abilene and San Angelo, of the Confederate Air Force, will be at 2 p.m. Thursday in the First Christian Church here Officiating will be the Rev. Col. Marcus A. Valenta, Confederate Air Force chaplain.

Burial will be in Lawnhaven Memorial Gardens, directed by Robert Massie Funeral Home.

Day, a civilian pilot and pioneer of antique aircraft and flying shows in West Texas, died Tuesday in an auto-

Black accused in cross-burning act

building

AMHERST, Mass. (AP) - A crossburning that touched off day-long discussions of racism at quiet Amherst College was set by at least one unidentified black student, the college president says.

"The worst cruelty is that black students have been manipulated and used by one of their own," President John William Ward said Tuesday night at a meeting with students to discuss Monday's cross burning. "That is obscene," he said.

College authorities were trying to determine the student's identity, said Douglas Wilson, an Amherst spokesman.

Wilson said black students told Ward "the materials for the cross which was burned on the lawn of a black residence came from the basement of that residence and was constructed and burned by one, possible more, black students.

Black students and their white supporters, claiming they were unsatisfied by Ward's response to complaints raised before the cross burning, continued to occupy the lobby of Converse Hall, the college administration mobile accident west of San Angelo. He was born June 11, 1929, in Forsan. He was married to Frances Boswell Sept. 6, 1963, in Dallas. A Korean conflict veteran, Day owned and operated Charles Day Aircraft Refinishers since 1971. The company, which was moved to

San Angelo from San Antonio, gained an international reputation for its work repainting and refitting airplanes. He was a member of the Elks Club.

Survivors include his wife; two sons, a daughter, his mother, a sister, a nephew and a niece

Pallbearers will be Jim Franklin, Bud Paulson, Bill Henry, Odus Wittenburg, Bill Cole, Warren Ksraus, W.C. Riley and Walt Templin.

Honorary pallbearers will be members of the Confederate Air Force. An honor guard from Goodfellow Air Force Base will be present forburial with full military honors, in-cluding a 21-gun salute. There will be

at Malibu.

Marvin decision expected today

LOS ANGELES (AP) - With millions of dollars in the balance, Lee Marvin and Michelle Triola Marvin moment of decision. nervously awaited a judge's decision today in a lawsuit that could affect lovers everywhere.

Superior Court Judge Arthur Marshall, who has heard three months of often lurid testimony in the Hollywood-style courtroom drama, said he would release his written ruling today.

His verdict, based on a landmark California Su-

said Miss Marvin as she waited anxiously for the affair as casual.

Miss Marvin, 46, who filed suit seven years ago for half of Marvin's millions, said she would come to the courthouse with her attorney, Marvin Mitchelson, to receive the judge's ruling.

The document is to be released to lawyers and reporters simultaneously. "If I win, I will be overjoyed and in a state of

He made love to her in his dressing room, he said, and soon had moved into her apartment.

Asked to describe his feelings for Miss Marvinthen, he said, "She was fun to be with. I found her very enjoyable.

preme Court Decision, is expected to become a guideline for future property litigation between unmarried couples.

"I'm a nervous wreck. But I'm ready to face it," Frampton girlfriend

won't get share

WHITE PLAINS, N.Y. (AP) - A judge has ruled that Peter Frampton's former live-in girlfriend is not entitled to half of the rock star's fortune because their verbal contract included adultery.

State Supreme Court Justice Joseph Gagliardi diemissed Penelope McCall's lawsuit Tuesday. He said the alleged contract between Frampton and Miss McCall "requires in its performance the commission of adultery which remains a crime in this state.'

Gagliardi rejected any parallels with the Lee Marvin-Michelle Triola Marvin suit in California because neither the actor nor his former girlfriend were married to anyone else during their years together.

Gagliardi said the contract between Frampton and Miss McCall was "clearly opposed to sound morality and is based on the illicit association of the parties. Thus, it is void and unenforceable.'

Miss McCall, 30, maintained she had a verbal, contract with Frampton, 28, that "they would I equal partners in all proceeds from his employment" as a rock star.

Frampton's record, concert and poster earnings have been put as high as \$67 million by music industry sources.

Miss McCall said she gave up a career and husband to become Frampton's bedmate and business partner and asked the court to award her half his earnings during the five years they lived together. Miss McCall's attorney, Richard Lefkowitz, said he would speak to his client, vacationing at an undisfosed site, to determine if they would appeal. In New York, the Supreme Court is a trial-level court. Miss McCall claimed Frampton was nothing more than an opening act when she first met him. She said she gave up her career as a music promoter when Frampton induced her to leave her husband in 1973.

She was married at the time to Mick Bridgen, a stage hand for Humble Pie, a rock group in which Frampton got his start. The British singer had a wife, Mary, whom he divorced in 1976.

Miss McCall said Frampton brushed her off last July and left her broke and dependent on friends. Her suit, filed last January, asked for an accounting of his earnings since 1973 and half of them plus part of future earnings. In addition, she sought half his mansion on the 53-acre estate in Croton-on-Hudson that she said she helped him choose.

shock," she said. "If I lose, I'll handle it. I'm not a crybaby.

Marvin's lawyer, A. David Kagon, said the 55year-old actor, who lives in Tucson, Ariz., woul not come to Los Angeles for the ruling. Kagon said he would relay the results to Marvin by phone.

The judge will rule on whether the six-year love affair between the actor and the former showgirl involved an expressed or implied contract to share property acquired during the relationship.

Miss Marvin sought \$1.8 million, an estimated half of the fortune Marvin made during the time he lived with her.

The case already has set a precedent on appeal. The California Supreme Court in 1976 upheld the right of unmarried persons to sue for property division when a live-in relationship ends.

The judge's decision was the final act of a courtroom drama that exposed Hollywood private lives to public scrutiny and provided enough details for a soap opera.

The often emotional testimony of more than 60 witnesses filled more than 8,000 pages of trial transcript. Celebrities such as Gene Kelly, Trini Lopez, Mel Torme and Bill Dana testified.

But the plaintiff and defendant were the trial's star witnesses.

There were bitter accusations between the former lovers involving alleged infidelities, abortions and alcoholism.

On the witness stand, they both tried to resurrect memories of a love affair that began 15 years ago on the set of the movie "Ship of Fools" and died six years later on the beach at Malibu.

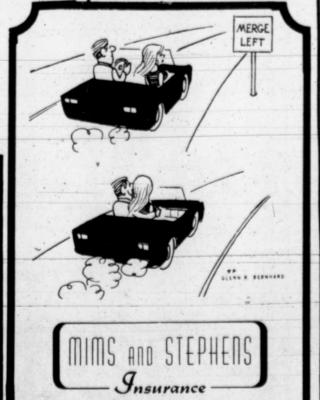

"I loved Lee," Miss Marvin said tearfully.

"I never loved her," Marvin growled through clenched teeth.

Miss Marvin, frequently weeping on the witness stand, depicted the actor as a loud, boisterous drunkard who embarrassed her in public. She told of her efforts to stop his drinking and make sure he was sober on movie sets.

She said she became pregnant by Marvin three times during their affair but had abortions because 'he didn't want more children."

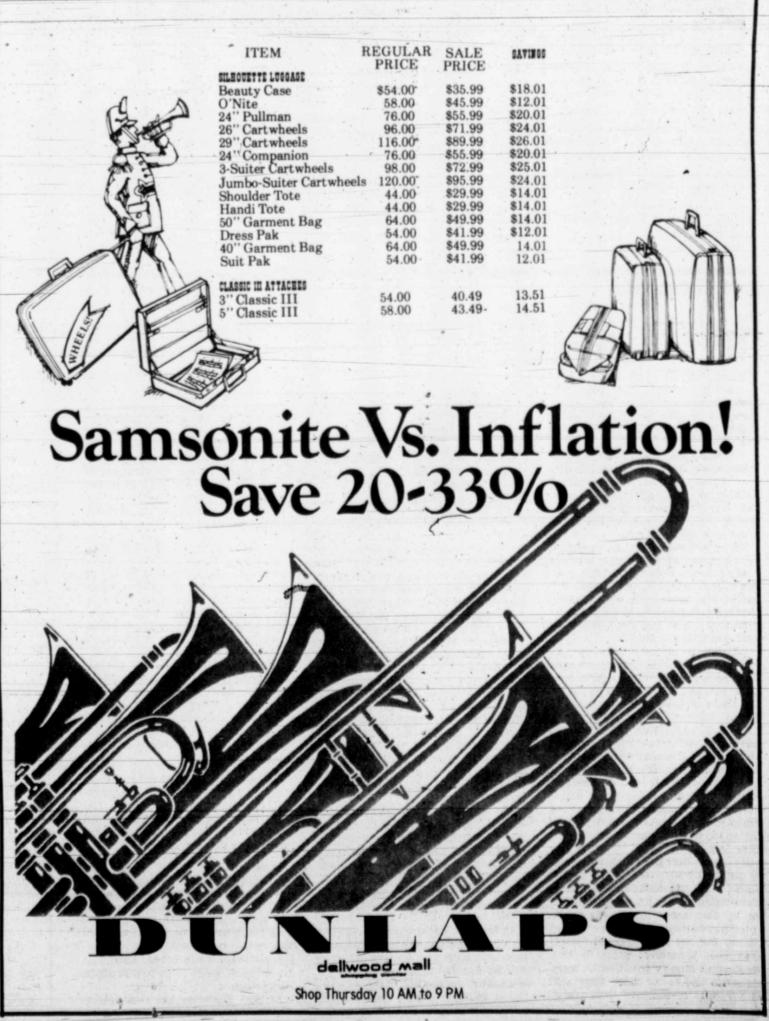

As a result of the abortions, she said in gulping sobs, "I have scars and I can't bear children." Marvin, the tough-guy movie star who won the 1965 best actor Oscar for "Cat Ballou," depicted the love

It's Realtor Week

This is Texas Realtor Week and congratulations and best wishes most certainly are in order for all Realtors here and elsewhere across the Lone Star State.

Midlanders, of course, are more familiar with Realtors at the local level, and it is to them that a snappy salute is directed.

Midland Realtors, individually and through their Midland Board of Realtors, have done so very, very much in the development of Midland that it would be next to impossible to list all of their helpful acts in this regard. Yet, most of us are inclined to take them for granted.

The Realtors are active in their support of all endeavors leading to overall progress, growth and betterment of the community. They work tirelessly in serving the housing needs of individual newcomers and companies transferring or contemplating moving new or additional personnel to the Tall City. They also have been active in seeking new and expanded businesses and industry for Midland.

The list goes on and on, reaching into practically all facets of community life. They are good citizens.

Midland Realtors form a vital link in the community's overall economy.

The highest type of real estate service is provided by the Midland Board of Realtors, which is a professional association of Realtors, affiliates and other interested representatives of the business community, organized for the benefit of its members and BOUGHAR the community. Its members adhere to a strict code of ethics which has to do basically with the Realtor's obligation to the public, his obligation to his client, and his obligation to his colleagues.

The term Realtor, incidentally, is a service mark registered with the U.S. Patent Office, which means that only qualified members may use the term. The term by no means is easy to come by. It is easily understandable why members are proud of their **Realtor** designation.

And Midlanders are proud of their Realtors and of what they have meant and mean to the continuing growth and development of the Tall City.

The proposals by President Carter for new protections for the citizen against invasion of an individual's right to privacy merit widespread support.

One of the principal proposals affects the news business, which

there could be problems in federal legislation which seeks to give too broad a protection to individual rights to privacy.

The public's right to know must remain paramount over the individual's right to privacy in

By JACK ANDERSON

WASHINGTON - In a voice husky from booze and laryngitis, Billy Carter recently joked with reporters about his Libyan connection. He alluded to his big mouth, which has lost friends and alienated people. The Libyans, he cracked, "are the best friends I got in the world right now."

But to Justice Department officials, it is no laughing matter. They want to know how President Carter's younger brother became so close to the Libyans, who have granted arms and asylum to international terrorists and have befriended some of the world's most notorious rogues and renegades. Billy Carter told reporters that his only interest in Libya is to promote

and Tripoli in chauffeur-driven cars. The Libyans picked up all the bills

and handed out gifts, including an expensive leather saddle for Carter. One source familiar with the arrangements estimated that the trip must have cost the Libyans over \$50,000

We flew to Tripoli to piece together the story. We learned that the Georgians had discussed establishing a corporation to handle Libyan investments in the United States. "They were eager to relieve Libya of some of its petrodollars," an American diplomat told us.

Significantly, Carter talked to the Libyans about lifting the freeze on eight C-130 transport planes, which the Libyans have purchased from the United States but which Washington has held up, intelligence sources told our reporter Avivah Swirsky. The planes have been gathering mildew for five years on the Lockheed grounds at Marietta, Ga.

Portrait Gallery in Washington.

Washington tapes solve

the big hanging problem

He responded to a long welcoming speech with a simple, polite "Thank you." His host, Ahmed Shahlti, head of Libya's foreign liaison office, later delivered an after-dinner speech criticizing U.S. support of Israel. But Carter scrupulously avoided any political retort.

He also patiently played the role of the president's brother, shaking hands at an embassy garden reception and visiting American children at the Oil Company school

Sources differ, however, on Billy Carter's reaction to the cultural shock of spending a week in a country that

friend there. But not once has anyone ever said to me, "Would you like to see the Gilbert Stuart portraits of George and Martha Washington?"

Depending on the season, my host will say, "Would you care to see a Red Sox game?" or "How about going over to watch the Celtics play basketball?'

Once I said to a pal on the Boston Globe, "I'd love to see Picasso." And he replied, "He isn't here any more. He was traded by the Patriots for a place kicker and two draft choices.'

I believe it's silly for Americans to argue which city has more culture. I think the decision as to where the portraits should hang must be left to the wishes of the people involved.

I am fortunate to have in my possession a tape made during the sitting of the portraits:

It isn't generally known, but Stuart painted President and Mrs. Washington at the same time because George wanted to save money.

The tape was given to me by the Smithsonian, and they have authenticated that the voices are those of George, Martha and Gilbert Stuart. Here is a partial transcript:

WASHINGTON: Gil, what do you intend to do with these portraits? STUART: It is my dream, Mr. President, that some day they will hang in the National Portrait Gallery in the nation's capital.

WASHINGTON: I'd like that, wouldn't you, Martha? MARTHA: What other choices do

we have?

STUART: Well, I heard from an art dealer that Boston would like them. MARTHA: You mean the home of that dreadful Yankee, John Adams?

STUART: That's the way I felt about it, Ma'am. They have no appreciation of art. Just the other day I heard Paul Revere say, "If you've seen one portrait, you've seen them all."

in turn affects the public's right to know. It would provide protection for any person preparing material for publication. Police would be prohibited from raiding work places and rummaging through such materials in search of evidence, as they did in the case of the Stanford Daily.

The other proposals would limit government access to medical records, protect individuals who cooperate in medical research from having their records disclosed, and establish new. controls on credit information gathered by private agencies on individuals' finances, tastes and purchasing habits.

These are needed protections in this day of data banks stored in huge computers.

NICK THIMMESCH

But we must acknowledge that

instances which involve the expenditure of public funds or the use and possible abuse of police powers.

Congress should scrutinize the Carter proposals carefully to see that they do not restrict unduly the public's right to know about public affairs.

The privacy afforded welfare recipients, for instance, should not be absolute. And their medical records should be open for investigation of possible fraud. Citizens who become a charge on the public purse must necessarily sacrifice some of their rights to privacy.

These are relatively minor reservations. If they are considered carefully by the Congress, the president's privacy program seemingly should have citizen endorsement.

Libyan-American friendship. But the Justice Department is trying to determine whether he has stepped across the legal line and should register as a foreign agent. This would be required by law if he has performed any services for the Libyan government.

The Justice Department asked Carter three months ago to explain his relationship with the Libyans, but he has not responded. Meanwhile, we have conducted our own investigation of Carter's Libyan caper.

Carter was put together with the Libyans through Mario Lianza, an Atlanta real estate operator, at the Libyans' urging. Libya's charge d'affairs in Italy, Gibrill Shalouf, reached in Rome, told us that he had helped arrange the invitation for Carter.

An entourage of eight Georgia politleians and businessmen, including state senators Floyd Hudgins and Henry Russell, accompanied the president's brother to Libya. They traveled first class, stayed at the best hotels and were shown around Rome.

The Georgians and Libyans alike denied that the controversial planes had been discussed. But competent sources insisted that the Libyans hoped to use the president's brother to get their planes released.

Most members of the Georgia congressional delegation, meanwhile. have joined Billy Carter in trying to break the ban on military transport shipments to Libya. All but two Georgia congressmen have asked President Carter in a private March 21 letter to "sell twelve L-100's and associated support worth approximately \$200 million" to Libya. The L-100s and C-130s are basically the same aircraft.

From all accounts, Billy was not his usual fun-loving, beer-swilling self in Tripoli. He was taken aside by U.S. embassy officials and cautioned about the "sensitive nature" of

prohibits alcohol. Some say he didn't touch a drop, except on U.S. property at the embassy reception. Others confide that he managed to keep his whistle wet.

Libya's revolutionary leader, Muammar Qaddafi, was away from Tripoli during the Carter visit. He left it to his top associates to entertain the Georgians. But he complained to us afterward about the ban on the C-130s. "The United States is behaving as a thief," he grumped. "They didn't give us planes. They didn't give us even our money back. Of course, the money we have given the United States, if we had kept it, would now become double because of the in terest.'

Footnote: Billy Carter not only failed to respond to the Justice Department's questions about his Libyan relationship but refused to answer a grand jury's questions about curious loans to the Carter peanut works. He is drying out at the Long Beach, Calif., naval hospital where he is also unavailable to comment on our story.

MARTHA: George, I've never asked anything of you before. But you have to promise me that I'll never hang in Boston.

WASHINGTON: (laughing) Martha, you worry too much. The Bostonians are too cheap to buy a Gilbert Stuart painting, much less a pair.

MARTHA: Nevertheless, you must promise.

WASHINGTON: All right, Martha, I promise. Gilbert, you're a witness. I never want our portraits to hang in a city that throws Coca-Cola bottles at opposing baseball teams.

STUART: I couldn't agree with you more. I'd rather have my work hanging in Cleveland.

That was the end of the tape, but I believe it speaks for itself. The three people involved have been turning over in their graves knowing the pictures were in Boston. But they'll be jumping for joy once the portraits are safely ensconced in the city of Washington, where they belong.

Californians.

Melvin Laird again urges gasoline rationing, now

WASHINGTON - Melvin R. Laird, a much consulted man in this town, believes President Carter should push Congress to take a quite unpopular. action - legislate gasoline rationing now.

"Carter has to do something to make the energy crisis real to people," Laird explains. "Gas rationing would make people feel a little hurt, and then they would appreciate what this oil import situation is doing to the security of the country.

"We are now paying \$50 billion a year for our oil imports, and we're heading for \$57 billion next year. If we don't limit imports, our dollar will continue to deteriorate on the world market, inflation will remain doubledigit as it is now, and the country will

get weaker and weaker. "Rising gas prices won't wake people up. In Germany, when gas soared to \$1.85 a gallon, consumption kept going up, too. We need gas rationing for the psychological effect it will have.'

Laird was secretary of defense and has some understanding of national strength. He also chaired the National Energy Project for the American Enterprise Institute in its first stages. And he is one of the most adroit politicians around, having served many years as one of the most skillful tacticians in that comradeship called Congress.

He knows that gas rationing would be politically very unpopular, partic-ularly as we go into the 1980 elections. Even without hearing any drumbeating for this strong action, the public voted gas rationing down in a recent Gallup Poll by a 52-40 count. Moreover, only 43 percent polled believe the current energy situation is "very serious," and fewer think there will be a repeat of the long lines which

formed at gas stations in the winter of 1973-74.

Despite the pleadings of three Presidents, the energy message isn't getting through. Since Laird first advocated gas rationing in late 1974, we have used more and more of the stuff. In March, 1973, daily consumption was 6.5 million barrels. It now stands at 7.3 million, a 12 percent increase. Demand for gas rose 4.5 percent in the first quarter of 1979 over 1978, while overall demand for petroleum rose 1.7 percent. People want and use more gas, period. Gas stocks at the end of March were 242 million barrels, down frm 265 million in late January. We are getting down to what the industry considers minimum acceptable levels.

The outlook is not good. Besides nudging upwards toward the 90-cent and \$1 a gallon mark for premium, there is good prospect for shortages this summer and worse ones in 1980. Iran's oil production is at half-speed. The Saudis, who were pumping 9.5 million barrels daily, recently cut to

As far back as three years ago-the government released a contingency gasoline rationing plan. The plan was refined several times since, but essentially it holds that if the gap between gasoline supply and demand

becomes unmanageable, rationing will be declared necessary.

Unlike World War II .rationing designed to cut demand for rubber for tires and then fuel - the present plan's emphasis is to provide more equitable distribution and efficient use of gasoline. The Department of Energy insists that any plan for standby gasoline rationing is "designed for use only in an extreme gasoline shortage.

The plan would apply to retail sales of gasoline (not diesel fuel) at filling stations. Coupons would be issued to persons based on motor vehicle registraton records. The value of the coupons, in gallons, would vary according to market conditions. There would be extra gas for priority users national defense, fire, police, emergency medical, sanitation, postal, snow removal, public transportation. Farmers, businessmen and government organizations needing gas for off-highway vehicles would be provided for, as would foreign visitors (Mexicans and Canadians principal-

People could voluntarily sell or transfer unused coupons - theoretically an incentive to save gas. The Department of Energy once called this the "white market" system but now avoids that term.

A three-month supply of the coupons, costing \$10.5 million to print, has been stored at Pueblo, Colo., since 1974. One-third the size of a dollar bill, and looking a little like one, the coupons could be enlarged by unscrupulous souls, and possibly used in dollar-bill change machines, alas. The government doesn't like to talk about that prospect.

At that, Congress has two legisla-

tive shots at stopping any gas rationing program of the kind proposed by President Carter several weeks ago. Since there is small sentiment in the republic for gas rationing, it is highly unlikely that Congress will respond to small sentiment.

Besides, such a program would cost an estimated \$1.8 billion a year to administer. There is question as to whether rationing would even reduce the amount of gasoline consumed; it might only provide better distribution and supplies. Laird admits it would also amount to a "further surrender of our personal freedom to bureaucracy" and could never be totally fair. He manfully argues, however, that an enlightened Congress, responding to presidential leadership, could approve gas rationing - even in an election year. 1

hurts a little, what damage their country is suffering from paying these terrible penalties on imported oil," says Laird, a Wisconsin Republican who would rather suffer measles than more bureaucracy.

CAN YOU QUOTE IT? By LAVINA ROSS FOWLER AND ELIZABETH ROSS WIERSEMA 1. The word, "Martyr" was one who

Lee Brown, owner of a flooded Jackson, Miss., store, talks with authorities while standing in thigh-deep water. A security officer waits in the boat at left. Following last

week's torrential rains, the nearby Pearl River is 25 feet above flood stage and much of the city is flooded. (AP Laserphoto)

Flood forces more evacuation

continues to pour over its banks, forcing new evacuations downstream from water-logged Jackson, where authorities say some flooded areas may not dry out for a week or more.

And in Alabama, Civil Defense officials worried whether people will leave their homes in time to escape anticipated record flood crests expected to threaten the west-central section of the state.

Buddy Stuckey, assistant civil defense director for south Mississippi's Marion County, said 2,000 persons fled their homes Tuesday.

"They learned their lesson from the '74 flood," Stuckey said. "People are being real good about it. They've been real cooperative.

Jackson officials said 17,000 persons remained homeless in the metropolitan area.

Officials say at least five deaths in Mississippi have been attributed directly to the flooding that began last week

Stuckey said 20,000 sandbags were distributed Tuesday, mostly to persons wanting to protect their homes from the waters that are expected to reach flood levels Thursday.

"It looks like we'll be evacuating our entire town before the crest gets here," said Georgetown Mayor Beal Allbritton as mobile homes and loaded cars headed toward the only road leading out of the community of 420 about 40 miles south of Jackson.

The Pearl's rise at Jackson climbed Tuesday to almost 43.3 feet, more than 25 feet above flood stage, the National Weather Service said. By nightfall, the river had fallen to 43 feet.

"Mississippi is going to beat this thing just like it has everything in the past," said presidential aide Bill Simpson. Gov. Cliff Finch and federal officials met Tuesday to brief reporters on plans for providing disaster relief for flood victims. President Carter declared the state a disaster area Monday.

Officials warned that the level of the Pearl River in Jackson still might fluctuate, even as it begins to recede. But they said the water would not clear out of the Jackson area for a week or more, and some areas behind the levees, such as the flooded state fairgrounds, would have to be pumped dry. In Alabama, Civil Defense Director Warren

You have to joke — or cry

By MATT MYGATT

JACKSON, Miss. (AP) - Howard Bros. Discount Center was remodeled a few months back. Now you can nudge your boat right into the TV department, scoop up fish in the aisles and find snakes among the drifting dog food and shampoo bottles.

But that wasn't part of the plan.

"You've got to joke about it because if you think about it, you want to cry," manager Frank Vogt said Tuesday, his department store inundated by about two feet of water from the swirling Pearl River. He said losses were about \$350,000 in merchandise.

Sacks of manure that he used to try to keep water out were of little use, he said. Neither the store nor his home - 15 feet under

water, to the eaves - was covered by flood insurance, he said. "But you're looking at a half-million dollars with

all the fixtures and everything," he said as he waded through the darkened store.

'There are snakes in here but I don't know if any of them are poisonous. I haver't been close enough to look," he said.

"You could run an outboard motor down these aisles," he said, pointing with a flashlight to several tion of the flooding.

saturated television sets.

"We had one in here running up and down." "It's a business loss," he said. "But I work for a good company, and they'll take care of me."

Vogt reached down and scooped up a visitor to the store - a fish. "We don't sell any pets here," he said

The smell of dry dog food floating on the murky

water permeated the inky darkness. "The sorry thing about it is we just had it remodeled in February," Vogt said. "That's the sad thing:

The 1½-mile trip from the store in Jackson's northeast side, site of some of the worst flooding in the city, to his three-bedroom home in nearby Flowood used to be a quick hop. But these days, it's a good half-hour drive via four-wheel drive vehicles down Mississippi 25, over the bulging Pearl River. Then, Vogt steps into a small fishing boat for a half-hour trip down a residential street that's co-

vered by 15 feet of water. Standing on top of his home Tuesday, the boat tied off to a ventilation duct. Vogt told how he managed to save an outboard motor from his house, and sent his wife and three children to New Orleans for the dura-

American observers Bayard Rustin, left, and Leonard Sussman, right, share black voters' high spirits Tuesday outside a polling station in Bu-

laweyo, Rhodesia's second-largest city, during the first day of elections for a new government of limited black majority. (AP Laserphoto)

Rhodesia officials forsee vote

to remain heavy for second day

SALISBURY, Rhodesia (AP) - Officials predicted another big turnout of voters today on the second day of the Rhodesian election. More than 20 percent of the nation's black and white adults went to the polls on the first day and only a few guerrilla attacks were reported.

PAGE SA

In the first eight hours of the fiveday polling to elect Rhodesia's first Parliament with a black majority, more than 568,000 of the 2.8 million black voters and 100,000 whites cast ballots Tuesday.

Even optimists among white election officials were surprised by the black voters' response. "It's startling," said one.

The turnout in northeast Rhodesia far exceeded the national everage, although the region is heavily infiltrated by Robert Mugabe's guerrillas based in neighboring Mozambique.

Nearly 50 percent of those eligible voted in Mukumbura, a fortified town close to the border.

Dressed in their Sunday best, hundreds of villagers lined up for hours on a dusty road under a broiling sun to take part in their first universal-suffrage election.

In the tobacco farm district of Centenary, site of the first guerrilla attack on a white farm in December 1972, truckloads of workers marked their ballots despite a rash of guerrilla attacks in the district two nights before in which four black workers were killed and five were wounded. Bob Schonken, a local police spokesman, said he expected the violence to escalate as the election continues. But he said the vow of guerrilla leaders Mugabe and Joshua Nkomo to disrupt the elections "so far was obviously unsuccessful." "Our people still came to vote today," one young white farmer told reporters who toured three centers in the northeast. "They, like us, are tired of war. They, like us, hope a new

government will bring peace and international recognition." One young man from the Shona

tribe said he was voting "to end the war." "It will have to end because we will

have chosen our own government," he said, answering questions through an interpreter. "They (the guerrillas) will have to come back because we will have won what they have been fighting for.

"It seemed like people were intoxicated with joy as they were going to the polling booths today," said Hishop Abel Muzorewa in a speech to some 300 journalists and 70 foreign observ-

Muzorewa, one of Prime Minister Ian Smith's three black co-sporisors of the new constitution and the man generally expected to be the first black prime minister, said: "I am satisfied that the will of the people will be triumphant.'

He criticized the U.S. government for refusing to send official o'pservers to see that the election is "free and fair." And he said he could not understand why governments that "recognized the invaders in a rnatter of hours" in Uganda might deny recognition to a government elected by the people for Zimbabwe-Rhodesia, asthe nation will be renamed.

and gives the whites a veto over changes in the constitution.

The government had a force of nearly 100,000 regular and reserve troops on duty throughout the country to guard against guerrilla action. An army spokesman said that on Tuesday security forces drove off guerrillas who opened fire on voters at two polling places; there were several other "ineffectual" attacks on voting stations, and a truckload of black voters detonated a land mine.

Bloch's death revealed

KAMPALA, Uganda (AP) - Dora Bloch, the British-Israeli grandmother left behind in the 1976 Entebbe hijacking rescue, was pulled from her hospital room and executed in a forest the same day, a Kampalan told reporters in the aftermath of President Idi Amin's fall.

"It was Saturday afternoon and I was coming from my shopping when I heard about nine shots," said bookkeeper Victor Kato, who lives on the edge of Namanve Forest, used by Amin's secret police as a dumping ground for the bodies of their victims.

"I rushed to the main road and asked people what had happened. They said that two cars had turned into the forest with a white lady. On going there we found a body of an iderly woman. They shot her along with a white chicken.

"Maybe it was some sort of witchcraft, I don't know."

Mrs. Bloch, 74, was aboard an Air. France airliner which a gang of Palestinians hijacked in 1976 and took to Uganda's international airport at Entebbe, 21 miles south of Kampala.

Suffering from a sore throat, she was taken to a Kampala hospital and was not at the airport when Israeli commandos rescued the rest of the passengers and crew members.

Kato said he realized the dead woman was Mrs. Bloch when he heard BBC reports that she had been left behind and her fate was unknown.

He said she was executed near a sandbank in a clearing about 200 yards from the main road in the national forest. He estimated the bodies of at least 6,000 people were left rotting there by Amin's State Research Bureau and others of his agents.

"They left her body there for some time," he said. "Then they came to collect it, probably to prevent journalists from seeing it."

One of the last people to see Mrs. Bloch alive at Mulago Hospital said she was in good spirits and awaiting her discharge when Amin's agents came for her.

"I had just completed the evening ward rounds and was standing on the fourth floor," said the medical superintendent, Dr. J.G.S. Makumbi. "I heard a scuffle on the sixth floor where Mrs. Bloch was staying in one of our VIP rooms.

"I rushed to the stairs to see what ... would want them."

was happening and I saw armed men carrying machine guns pulling her down the stairs. They were firing to frighten people out of the way. We naturally ran."

Place W/

as

Makumbi said Mrs. Bloch was pulled into a Mercedes sedan and driven away.

"We could still hear her screams as the car approached the gate of the hospital," Makumbi said.

Makumbi said he kept Mrs. Bloch's cane, clothes, shoes and other personal effects "...thinking that her family

Amin's troops reported on rampage in Tororo

KAMPALA, Uganda (AP) — Troops still loyal to Idi Amin are reported killing officials in eastern Uganda believed sympathetic to the new government in Kampala.

With the invasion force of Tanzanian troops and Ugandan exiles still preparing to extend the new government's authority to northern and eastern Uganda, the deposed president's forces were reported on a murderous rampage in the eastern city of Tororo, near the Kenyan border.

It was believed that pro-Amin Moslems were also killing members of Christian tribes in the area in retaliation for Christian murders of Moslems after the fall of Kampala to the invaders last weekend. That outbreak of killings was in retaliation for massacres of the Christians by Amin's Moslem supporters during his eight years in power.

The whereabouts of Amin remained a mystery. Various reports, none confirmed, put him in Libya, Sudan, Iraq, Zaire or still inside Uganda, possibly in the northwestern corner of the country where he was born. Meanwhile, Tanzanian commandos made a dash some 50 miles to the east of Kampala to secure the Owen Falls dam and power plant on the Nile River. The plant produces all of Uganda's electricity and 15 percent of the power used in Kenya; and there had been fears that Amin's men would blow it up.

The road from the Tanzanian front lines 13 miles east of Kampala to the dam was reported still unsafe, with bands of Amin troops harassing cars attempting to travel it. But the Tanzanians were reported preparing to follow up the raid in force.

Provisional President Yussufu K: Lule's Cabinet held its first meeting at the presidential residence in Entebbe, 21 miles south of Kampala, where Lule is recovering from the flu. It set limits on withdrawals by bank depositors in an attempt to prevent runs on the Kampala banks, which were looted after the city fell to the invaders.

It was a slap at the black governments of Tanzania, Uganda, Mozambique and Botswana, all of which support Nkomo and Mugable and all of which recognized the self-appointed government of Ugandan exiles soon after Tanzania's invasion force captured Kampala last week.

The two guerrilla leaders and the African governments that support them contend that the new Rhodesian constitution's promise of black-majority government is a sham because it preserves white control of the civil service, armed forces, police and judiciary for at least the next five years

hundreds of demonstrators against Shah Mohammad Reza Pahlavi in the capital last Sept. The broadcast said Ebrahim Ghorbani was put to death in Kerman. in southeast Iran, for killing one person during the nationwide rioting

Volcano risk found worldwide

By RANDOLPH E. SCHMID

WASHINGTON (AP) - The rumblings of the geologic time bomb known as Soufriere volcano came 77 years after that same mountain spewed forth death and destruction, taking more than 3,000 lives

But while residents of the Caribbean island of St. Vincent know of the danger in their midst - and no one was killed in the Friday the 13th eruption last week - the same hazard exists in parts of the world where people are less aware of the danger.

There are more than 500 active volcances in the world ranging from the explosive types," such as Soufriere, to the non-explosive ones like Kilauea on Hawaii, which produces streams of highly fluid lava.

"We consider a volcano active when it has erupted within recorded history. Most of the world's volcanoes are dormant, and thus are deceptively quiet. They are dangerous because they are like geologic time bombs that can erupt with very little warning." commented Dr. Robert Tilling of the U.S. Geological Survey.

Vietnam proposes DMZ

BANGKOK, Thailand (AP) - Vietnam proposed the creation of a demilitarized zone on its border with China as peace negotiations between the Communist neighbors began today in Hanoi.

Radio Hanoi reported that Vietnamese Vice Foreign Minister Phan Hien also proposed that both armies withdraw two to three miles from the border recognized before the Chinese invasion Feb. 17 and that prisoners of war be exchanged as soon as possible.

He said although the two governments were now at the negotiating table, Chinese troops still occupied more than 10 areas in Vietnamese territory. He charged that the Chinese were continuing to strengthen their forces along the border and said the situation was "very tense.

There was no immediate word of the Chinese response. But earlier today Xinhua, the official Chinese news agency, accused Vietnam of a number of border provocations in recent days and said there were casualties on both sides in fighting between April 9 and April 16.

Hien said a preliminary survey determined that the Chinese invasion force destroyed four provincial hospitals, 21 district hospitals, 281 schools and many pagodas and historical sites on the Vietnamese side of the border.

The Chinese troops withdrew from most of the Vietnamese territory last month after claiming they had "punished" their neighbor for alleged border violations.

At first, Vietnam insisted that negotiations to restore normal relations could only start after all Chinese troops withdrew from Vietnamese territory but then withdrew that condition.

The Chinese delegation led by Vice Foreign Minister Han Nianlong arrived in Hanoi on Saturday.

And the United States isn't immune, added Tilling, chief of the survey's Office of Geochemistry and Geophysics. Besides the volcanoes in Hawaii there are several others in this country, some of which resemble Soufriere, he said.

"In the Cascades we know that there are some volcanoes that have the potential for explosive eruption," he commented, referring to the Northwest mountain range. "Lassen Peak, Mount Shasta, Mount Hood, Mount St. Helens and Mount Baker ... have erupted in the past and can erupt again in the future.

He said his agency is now monitoring some of these mountains to watch for signs that might precede an eruption

"While there is no general method developed yet for making predictions of volcanic eruptions, recent studies ... have revealed certain precursor signs and patterns prior to eruptions," Tilling said. He said eruptions of Kilauea have been preceded by a swelling of the ground and swarms of minor earthquakes.

A growing problem worldwide, he explained, is that past eruptions have deposited layers of ash and lava around volcanoes that have eventually turned into fertile soil, attracting large populations to the very areas where they are likely to be affected by an eruption.

Basically, scientists describe volcanoes as openings, or windows, in the surface of the earth through which molten rock and gas from the interior of the planet can reach the surface. Some volcanoes, like Stromboli in Italy, may erupt continuously for centuries, while others lie quiet for a thousand years and then burst unexpectedly.

Volcanoes are named for the Roman god Vulcan, arms maker for the other gods. The Romans thought the smoking mountain Vulcano off the coast of Italy was the chimney of his forge.

"If you spot the 500 or so active volcanoes on a world map you will see that a great many of them are located around the Pacific Ocean," Tilling said. This circle of activity is called the "Ring of Fire" and is also where most of the world's earthquakes occur. Many volcanoes are also located in and around the Mediterranean Sea and active volcanoes also are often found in the oceans.

The Hawaiian Islands were formed by volcanic activity, as were many Caribbean islands, such as St. Vincent. A new volcano forged its way from under the sea in 1963 creating the island Surtsey near Iceland.

The last major eruption of Soufriere came May 6-7, 1902, taking more than 3,000 lives. It ocurred in conjunction with one of the most destructive volcanic eruptions in history, that of Pelee on the island of Martinique. Pelee exploded violently a day later, wiping out the the port of St. Pierre, killing 30,000.

Soufriere is a name given to several volcanoes that give off gasses, and the one on St. Vincent is also known as Morne Garou.

Not far away, on Guadaloupe, is another voicano also called Soufriere. In between is Martinique.

THE MIDLAND REPORTER-TELEGRAM, WED., APR. 18, 1979.

By CHRIS CONNELL

WASHINGTON (AP) - The Carter administration is using the latest annual report on the health of Social Security as ammunition for its anti-inflation program and its fight to convince Congress to pass a

Monday, blamed inflation for an expected 9.8 percent cost-of-living increase the nation's 35 million retired and disabled workers, their survivors ad

The trustees said the Hospital Insurance trust fund, Medicare's so-called Part A, will go broke sometime between 1988 and 1998. Urging Congress to pass the hospital cost containment bill and look for new ways to finance Medicare, they said Medicare paid \$17.9 billion in hospital bills in

said the cost-of-living increase, expected to cost \$10 billion, "underscores the need for broad support of President Carter's anti-inflation program."

The trustees also warned in their report to Con-

ance trust fund starting in 1983.

The report said that fund might not have enough money at the start of each month for benefit checks to be sent out then. The problem would correct itself later in the month as payroll taxes gradually came in and would clear up entirely by 1992, the trustees said.

They suggested legislation to allow commingling the Disability Insurance and Old Age funds to tide the system over during such cash flow crunches.

The cash flow problem is envisioned only in the worst of three possible economic scenarios the trustees drew up.

The trustees — Treasury Secretary W. Michael Blumenthal, Labor Secretary Ray Marshall, and Health, Education and Welfare Secretary Joseph A. Califano Jr. — emphasized that the balance between income and outgo "is quite fragile in the immediate future."

They said Congress should not try to roll back scheduled payroll tax increases unless it cuts benefits or finds additional revenue.

Ross said Congress acted courageously in 1977 gress that a recession later this year could cause a when it voted for higher payroll taxes and put the cash-flow problem for the Old Age Survivors Insur- system on a sound footing for the next half century.

But he added that the president and Congress should look for ways to forestall those payroll tax increases.

"There's no question that the public is resistant of the present level of payroll tax, much less those that have been legislated to take place between now and 1990," Ross said.

American workers and employers are paying 6.13 percent on wages up to \$22,900 this year for Social Security protection, for a maximum tax of \$1,404. The tax rate will climb to 6.65 percent in 1981 and 7.65 percent in 1990.

The wage base is expected to climb steadily by about \$2,000 a year, so that by 1987 some Americans will be paying more than \$3,000 a year in payroll taxes on income up to \$42,000.

The Old Age trust fund will run a deficit at least until 1981. It shrunk by \$4.4 billion last year to \$31 billion. But the rising taxes will replenish it by the 1990s, even under the worst of the scenarios.

The "pessimistic" set of projections show the Old Age fund lasting until about 2015, when the post-World War II "baby boom" generation advances into old age.

Administration using Social Security report as 'ammunition' in fight

huspital cost containment bill. The system's three trustees, issuing their report dependents will begin receiving in July. fiscal 1978, up 17 percent from 1977. NEW YORK (AP) - There was a time not long ago when outside directors attended corporate board meetings for the good fellowship and prestige, and probably the money too, but certainly not to work.

They work now. Though not company officers, which would make them insiders, they are handling more roles, more responsibilities. They audit ex-penses and income. They run checks on the chief executive.

"They are tightening their grip on corporate governance," says Gardner Heidrick, whose company has studied the trend. "They assert their independence from the board company's management.

Quite a change. Many shareholders recall that just days before its descent into bankruptcy, some board members were nearly ignorant of the old Penn Central railroad's condition. That helped change things.

Courts since then have ruled that directors are liable to shareholders for their performance in office. And the Securities and Exchange Commission has encouraged the appointment of non-officer board members.

Studying the changes, Heidrick and Struggles, an old-line executive search and consulting firm, found that the majority of boards are now dominated by outside members, and that these members are activists.

The search firm found in a survey just released that new outside board members take on more committee responsibilities sooner than their predecessors and that increasingly they are named to key committees

Not only do they dominate boards by a 60-40 ratio, and on utilities by 75-25, the survey found, but they chair nearly all board committees, including audit, compensation, finance, and pension-retirement.

Directors are keeping a sharp eye on the chief executive too. The surveyors estimate that a third of major boards now measure the top officer's performance quantitatively, up from one-fourth in 1977. While these changes might suggest that investor-

owned companies are relinquishing power to the public, they might not be as dramatic as imagined. Power is shifting, but it remains in the business community

"Power is shifting to outside board members," an analysis of the survey concludes, "but not to 'outsid-ers." The majority of outside directors, it was found, are or were officers of other companies. Inevitably, this finding will give rise to claims that

the "old boy" arrangement, under which chairmen appointed as board members their friends from other companies, is still intact. But it may not be

The analysis accompanying the study, in which 1,352 outside directors were contacted, concludes that the predominance of business executives on boards results from the increased complexity of business matters.

For this they are relatively well paid. Assuming they attended all meetings, directors of industrial companies with sales of \$500 million or more received \$14,450, a 13 percent increase over 1977.

Medium-size industrial companies, defined as having sales between \$100 million and \$499 million. paid their directors an average of \$10,140, a mere \$171 more than a year earlier. Smaller companies averaged payments of \$5,830, compared with \$5,-578

For this, they remind you, they assume more

responsibility than before. They cannot snooze while attending meetings. They are committed to knowing what is on the papers before them. They must be on their toes.

Because, among other reasons, shareholders these days have been inclined to sue their directors if they feel the directors have not adequately looked after shareholder interests.

That, finally, is still another change.

Wage insurance plan bites dust

WASHINGTON (AP) - Treasury Secretary W. Michael Blumenthal was once asked about the origin of President Carter's plan to protect the income of workers who cooperated with his anti-inflation program.

"Who fathered this baby?" inquired a skeptical congressman.

"I hope you don't mind if I tell you," replied the urbane Blumenthal, "that it was a group effort."

As congressional budget-writers effectively killed the president's "real wage insurance" plan this month, the same could perhaps be said about its death.

Opposed by business and most of organized labor, the proposal saw its slim chance for survival snuffed out when the House and Senate budget committees opted for fiscal austerity and removed \$2.5 billion earmarked for the program.

Ironically, the axing of the money came as part of the committees' efforts to reduce the federal deficit to below the president's target of \$29 billion, another goal of his anti-inflation drive.

The defeat also contributed to a growing perception that Carter's voluntary anti-inflation program, buffeted by sharp increases in consumer prices, was beginning to unravel.

Livestock auction report

The Southwestern Livestock Auction Co. ran through 527 head of cattle Tuesday.

The market was steady to \$2 higher on heavyweight feeder cattle.

Steers weighing in at 600 to 700 pounds sold for \$88 to \$92.50 per hundred weight; 500 to 600 pounds, \$95 to \$100; 400 to 500, \$105 to \$112.50; 300 to 400, \$112.50 to \$125; 300 to 400 pounds, \$112.50 to \$125; under 300 pounds, \$140 to \$155.

Heifers weighing 600 to 700 pounds sold for \$74.50 to \$77.50 per hundred weight; 500 to 600 pounds, \$82.50 to \$85; 400 to 500, \$92.50 to \$100; 300 to 400, \$100 to \$108.50; under 300 pounds, \$120 to \$140.

Cows utility went for \$58.50 to \$61 per hundred weight; canners and cutters, \$55 to \$57.50; bull grades 1 and 2, \$73 to \$80.

Bred cows auctioned for \$600 to \$750 per head, and cows and calves sold for \$750 to \$950 per pair.

Hot tomatoes do better in your garden

By EARL ARONSON **AP** Newsfeatures

Just about every vegetable-garden popularity grees. poll will include as a winner tomatoes, which can be a most rewarding crop. If you want a better harvest, here are a few ideas.

Tomatoes need sunshine. Plant them where they will get plenty of it - all day if possible. If you have no room else- you may plant tomatoes where, stick in a few, any time except April, well-staked, among the flowers. They blend in well.

Don't plant them too early. Start them indoors rather if you use seed.

until the topsoil temperature is at least 55 de-

In short, delay planting outdoors until all danger of frost has passed. Wait until mid-May to mid-June in northern states, where

the growing season is short; mid-April to early-June in temperate states. In the far south, May and June, when the temperature might be too hot for good tomatoes

in the summer. Select your variety carefully. Choose for dis-You are better off buying ease resistance and started plants in the long adaptability to your cli-

run. As a guide, don't mate. If there are letters choose short, compact, 5-10-5 to stimulate new plant tomatoes outside such as VF or VFN after the variety name it will mean it has been bred to be resistant to the common tomato diseases

verticillum (V), fusarium (F), and nematodes (N), a root-invading soil pest. Such diseases may cause plants (and fruit) to wither and die. Among disease-resistant varieties are Big Girl Hybrid, Jet Star, Supersonic, Better Boy, Beefmaster, Burpee's VF Hybrid, Ramapo Hybrid, Wonder Boy and others.

If you live in an area with a short growing season select an early-maturing variety. If you buy seedlings

Art winners profiled

NEW YORK (AP) - Here are brief profiles of the Pulitzer was won by his book, "Now and Then: **4979** Pulitzer Prize arts winners:

FICTION **John Cheever**

John Cheever, 66, winner of the 1979 Pulitzer Prize for fiction, is the author of six collections of stories and four novels. His Pulitzer Prize-winning book "The Stories of John Cheever," chronicles 61 of his short stories, beginning with some of his earliest works. One of his novels, "The Wapshot Chronicle" won the National Book Award in 1958 and the American Academy and Institute of Arts and Letters' Howells Medal for fiction.

DRAMA Sam Shepard

Sam Shepard, a 35-year-old playwright whose works have been performed primarily Off- and Off-Off Broadway, is currently in his fourth year of residency at the Magic Theatre in San Francisco. His play "Buried Child," which won him the Pulitzer Prize for drama Monday, is a view of a disintegrating rural family in Illinois. The work opened last fall at the Theatre for the New City and moved to the Theatre de Lys in Greenwich Village, where its last scheduled performance was Sunday. Shepard began writing plays when he was 18 and has written scores of plays in the past 14 years.

Poems 1976-1978," published last year. His first award was for the novel "All The King's Men" in 1947. A teacher at several universities, Warren was on the faculty of Yale University for 22 years, becoming professor emeritus of English in 1973.

NON-FICTION

Edward Wilson

Harvard professor Edward O. Wilson, 49, an expert on insect societies has gained world-wide attention for his theory of sociobiology, which he extends, in his Pulitzer Prize-winning book "On Human Nature," to human society. In his book, he combines theories of evolution, ecology and ethology as he considers how humans' biological heritage may direct our behavior and development. His book was published in 1978.

HISTORY **Don Fehrenbacher**

Don E. Fehrenbacher, winner of the history prize for "The Dred Scott Case: Its Significance in American Law and Politics," is the William Robertson Coe professor of History and American Studies at Stanford University. A New York Review of Books critique termed Fehrenbacher's winning work "probably the most thorough study of any Supreme Court decision ever undertaken.'

Two years ago Fehrenbacher edited and completed the writing of "The Impending Crisis," a history of pre-Civil War years that won the prize posthumously for Professor David M. Potter, also of Stanford.

BIOGRAPHY Leonard Baker

Leonard Baker's book "Days of Sorrow and Pain: Leo Baeck and the Berlin Jew" won the 1979 Pultzer Prize for biography. Published in 1978, it is the story of a rabbi who helped German Jews maintain themselves during the horrors of the Nazi regime. The American-born Baker spent five years in 10 countries interviewing some 100 persons who knew Baeck. As Berlin's leading rabbi and one of the world's foremost Jewish theologians, Baeck helped many Jews escape from Germany as Hitler rose to power, and during the war he worked with the underground until he was imprisoned in a camp where he was assigned to hauling trash. Baeck survived the Holocaust and became a world leader of liberal Judaism.

POETRY

Judd, president and director; Coyn Mateer, Mt. Vernon, Ill.; Billy Delp, Fort Worth, and H. L. Atnipp, Midland. From left standing are E. E. Runyan, Paul Karcher, Stanley Cromwell and Curtis Bedrich, all of Midland. (Staff Photo by Bruce Partain)

Midland Wildcat Committee hosts Texas American officers, directors

Officers and directors of Texas American Oil Corp., Midland-based oil and gas exploration and refining firm, were guests of the Midland Wildcat Committee Tuesday in the Petroleum Club of Midland.

William S. Judd is president and director of the company. With him at the reception were H.

L. Atnipp, executive vice president

and director; Curtis Bedrich, secretary-treasurer, and G. Stanley Crcmwell, vice president - Land and Geology, all of Midland; Coyn Mateer. Mt. Vernon, Ill., director; Billy Delp, Fort Worth, director; E. E. Runyan and J. Paul Karcher, both of Midland, directors, and Ted Ward, vice dpresident - Drilling and Production, Monahans.

Five West Texas areas gain wildcat projects

Operators have announced locations for wildcat projects in five West Texas areas.

Jake L. Hamon of Dallas scheduled a 12,300-foot wildcat in Dawson County, 5.5 miles northwest of Patricia. It is No. 1 Sellers, 660 feet from north and east lines of labor 16, league 270. Moore County School Land

Total depth is 1,990 feet and 4.5-inch

casing is cemented on bottom. Wellsite is 2,110 feet from north and 330 feet from east lines of section 4, block 207, TCRR survey and eight miles east of Bakersfield. The Levens No. 3 White & Baker as completed for a daily flowing

Judd hailed the recent announcement by President Carter on the phaseout of price controls on petroleum as a great incentive for all operators, both independents and majors, to "get out and find more petroleum

"We will have to wait and see what the full effect of the changes will be, and see what will come out of the president's excess profits tax threat before we can actually plan ahead," Judd said. "I believe if there is an excess profits tax passed it will include a plowback credit clause."

Judd said that he expected Texas American's operating budget to increase tremendously in the next five years. "This year, it is \$11 million. In five years, it should reach \$25 million or go as high as \$28 million

Judd said that the lifting of price controls would increase cash flow and that "Texas American will plowback much of the extra profits in exploration.

The stripper well phase of the president's plan drew praise from Judd.

Government has hope shortage won't come

after June 1.

By ROBERT C. TOTH The Los Angeles Times

WASHINGTON - The government held out hope Tuesday that American drivers can avoid a gasoline shortages this summer if President Carter's plan to cut both U.S. imports and consumption is implemented quickly - and there are no new disruptions in the Middle East.

But Department of Energy officials nonetheless urged Congress to give them power to close gas stations on weekends and order fuel-saving ther-

They made the statement in issuing

commercial and industrial buildings.

goals for ther citizens and local governments. A Department of Eergy official said

Tuesday that federal authorities here have not yet begun negotiations with any governors on specific state targets.

If voluntary restraints on gasoline

consumption do not work, the Depart-

ment of Energy wants authority to

order gas stations closed on weekends

Presient Carter, in his April 5

speech laying out voluntary measures

to conserve fuel, said individual

states would be asked to set reduction.

One official raised the possibility Tuesday that a heating oil shortage could cause "real hardship" next winter unless stocks, now in the "critical zone," are rebuilt to safe levels by Oct. 1.

Refineries will be asked to set targets for rebuilding these stocks and if they refuse, the Department of Energy will require them to do so, the official said.

Of the nation's 19.5-million-barrela-day oil consumption, about 9.5 million barrels are imported. The Carter administration hopes to cut these imports by 1 million barrels, which would represent 5 percent of total usage but about 10 percent of imports

About one-third of the cutback has already been achieved, officials said Tuesday, and they expressed confidence that the full goal can be realized under the "response plans" call for factories to switch from oil to natural gas as their fuel, plus restraint by the public in auto and home use.

survey.

The site is one mile southwest of a 12,373-foot dry hole, one and threeeighths miles east of a 9,630-foot failure and three and one-quarter miles northwest of the Patricia (Siluro-Devonian) area.

TOM GREEN TEST

Texan Resources Corp. of Houston No. 1 Poulter has been spotted as a 5,800-foot wildcat in Tom Green County, eight miles south of San Angelo. It is 1,538 feet from south and 8,644 feet from east lines of Robert A. Abbott survey No. 91. Ground elevation is 2,109 feet.

The site is 1.5 miles southwest of the discovery well of the Christoval, North (Palo Pinto) oil pool.

STONEWALL AREA

The Desana Corp. of Midland No. 1 Freeman is a new 3,700-foot Swastika wildcat in Stonewall County, four miles south of Old Glory

Drillsite is 660 feet from north and east lines of section 5, block A, Arnold & Barrett survey and 7/8 mile northeast of an undesignated and depleted Swastika oil discovery.

STEPOUT SET

Desana also will drill its No. 5-123 Flat Top as a northwest offset to production in the five-well Biggs (Swastika) field of Stonewall County, 10 miles south of Old Glory.

Scheduled for a 3,250-foot bottom, it is 1,650 feet from south and 990 feet from west lines of section 123, block 1, BBB&C survey.

CROCKETT WILDCAT

Vista Resources, Inc., of Albuquerque, N.M. No. 2 W. E. West Estate has been scheduled as an 8,500-foot wildcat in Crockett County, 7/8 mile west of the lone well in the Wamoco, South (Canyon oil) pool

The drillsite is 2,700 feet from north and 2,400 feet from east lines of Runnels County School Land survey No. 2, abstract 2,831. Elevation at ground level is 2,580 feet.

The Wamoco, South pool produces at 7,674 feet.

RUNNELS EXPLORER

E. B. Fletcher of Dallas No. 1-426 M. R. Williams has been staked as a wildcat project two miles northwestof Winters in Runnels County. Scheduled for 4,900-foot bottom, it is 3.300 feet from north and 660 feet from west lines of Thomas A. Baber survey No. 1, abstract 991.

The site is one location northeast of depleted oil producer and one location northeast of a 3,076-foot failure.

PECOS WELLS

The Levens Corp. of Midland has completed a pair of wells in a southeast extension are of the Walker (Queen) pool of Pecos County.

The No. 2 White & Baker was finled for a daily flowing potential of 70 barrels of 31-gravity oil and 10 barrels of water, through a 1/4-inch choke and perforations from 1,826 to 1,916 feet

The gas-oil ratio is 800-1. The pay was acidized with 2,250 gallons and fractured with 30,000 gal-

potential of 85 barrels of 31-gravity oil and eight barrels of water, through an 18/64-inch choke and perforations from 1,826 to 1,915 feet. Gas-oil ratio is 600-1, and the pay

was acidized with 2,250 gallons and fractured with 30,000 gallons. Total depth is 1,990 feet and 4.5-inch

pipe was cemented on bottom Wellsite is 2,310 feet from north and 990 feet from east lines of section 4. block 207, TCRR survey.

EDDY TESTER

Cotton Petroleum Corp., operating from Midland, staked No. 1-24 Federal as a 7,700-foot project in the Indian Basin (Pennsylvanian) pool of Eddy County, 15 miles southwest of Lakewood.

Ground elevation is 3,796 feet. The location is 660 feet from south and east lines of section 4-21s-23e.

COKE RE-ENTRY

WES-TEX Drilling Co. of Abilene will re-enter its No. 3 Harris Estate, former ACR (Odom lime oil) pool producer in Coke County.

Completion attempt will be made as the sixth producer in the Lygay pool. The project, six miles south of Silver, is 1,089 feet from south and 467 feet from west lines of Winfield Scott

survey No. 11. Total depth is 6,845 feet. The well was completed from the Odom 8.5 miles southwest of the other ACR Odom wells.

UPTON AREA

John L. Cox of Midland No. 1 Amerada-Neal is a new project in the Spraberry Trend Area field of Upton County, 10 miles northeast of Rankin

Slated for an 8,700-foot bottom, it is 1,320 feet from south and west lines of section 12, block 4.5, GC&SF survey.

NEW WELL

John L. Cox No. 1 Mann is a new pumper in the Spraberry Trend Area pool of Upton County.

Six miles north of Rankin, it finaled for a 24-hour potential of 155 barrels of 38-gravity oil, plus 22 barrels of water, through perforations from 7.-001 to 8,401 feet after a 90,000-gallon *fracture-treatment.

Location is 1,320 feet from north and west lines of section 10, block A, EL&RR survey and 5/8 mile south of other production.

STERLING OILER-

Wagner & Brown of Midland No. 34-9 Hildebrand has been added as a producer to the Conter (Pennsylvanian) pool of Sterkling County, 10.5 miles southwest of Sterling City. The operator reported a 24-hour flowing potential of 80 barrels of 47.8gravity oil and 10 barrels of water, through a 1/4-inch choke and perforations from 7,206 to 7,956 feet. The gas-oil ratio is 4,250-1.

The pay was fractured with 77,000 gallons.

Hole was drilled to 8,200 feet and operator set 4.5-inch casing at 8,126.38 feet. The plugged back depth is 8,070 feet.

Location is 1,980 feet from south and east lines of section 9, block 21, H&TC survey.

'It is almost a certainty that many fields that have been depleted will lend themselves to rejuvenation through secondary recovery pro-

"The president has given the oil industry a real challange - develop a good supply of domestic hydrocarbons so that we will not have to depend so heavily on foreign supplies," Judd said.

grams.

Judd said the fanatic environmentalist continues to be a roadblock to developing the petroleum industry, transportation of petroleum and the development of alternative sources of energy.

"In the early days of the industry there was not too much effort on the part of the oilman to take care of the environment, but I believe the industry has cleaned up its actions and that the environment is of primary concern," Judd said, "There has to be a lot of common sense used by both the environmentalists and the oilman.

Thornton joins Forest

Jack D. Riggs, Forest Oil Corp. vice president-regional manager in Midland, has announced the appointment of Jack D. Thornton as division manager - West Texas Division, with headquarters in Midland

Thornton is responsible for the company's exploration, engineering, drilling and production operations in West Texas and southeast New Mexi-CO.

Prior to joining Forest Oil, Thornton was employed by Coastal States Corp. as assistant vice president and exploration manager in Houston.

He is a native of Roby and was graduated from Texas Tech University with a B.S. degree in Geology.

Thornton and his family were residents of Midland from 1949 until they moved to Houston in 1977.

While in Midland, he was active in the Optimist Club, YMCA, Junior Baseball and other civic organizations.

completes

CROCKETT WELL

Methane Gas Co. No. 3-F Maggie Moore has been finaled in the Adams-Baggett Ranch (Canyon sand gas) field of Crockett County, 30 miles south of Ozona

It completed for a calculated, absolute open flow potential of 625,000 cubic feet of dry gas per day, through perforations from 4,993 to 5,168 feet after 6,000 gallons of acid and 6,852gallons of fracture solution.

Total depth is 5,314 feet and 4.5-inch casing is cemented on bottom. The location is 1,098 feet from south and 510 feet from west lines of D.

Y. Jackson survey No. 8.5.

SPRABERRY

John L. Cox of Midland No. 1 J.T.L. is a new well in the Upton County Spraberry Trend Area pool. On 24-hour potential test it pumped 135 barrels of 38-gravity oil and 80 barrels of water, through perforations from 7,023 to 8,420 feet after a 130,000-gallon fracture job. The gas- LEA COUNTY oil ratio is 680-1.

Total depth is 8,430 feet and 4.5-inch pipe is set on bottom.
