Michelin announces Midland plant to employ 700

By ED TODD Staff Writer

Midland's increasing industrialization came to the fore Monday night, when a Michelin Tire Corp. executive announced the building of a multimillion-dollar rubber-mixing plant here. Groundbreaking is to begin in 1980.

The "aesthetically-designed" plant is to include 500,000 covered square feet on an 230-acre site west of Holiday Hill Road and between Interstate 20 and U.S. Highway 80. It should be in operation by 1982 and employ a work force of 700.

"We found many conditions attractive about Midland," Reggie Wells, Michelin's divisional manager of career development, said at the annual Mialand Chamber of Commerce membership dinner in Midland College's Chaparral Center.

Wells listed Midland's appeal to the tire company:-"...industrial growth, public schools, higher educational opportunities, attention to the arts, transportation, water, utilities, a pleasant lifestyle, people concerned about their environment, fiscally responsible government on all levels."

Wells said Michelin likes the "outstanding quality" of the people here. "The positive attitude of Texans, their independent nature, their industriousness, their pride in productivity and quality are evident," he said,

"and are desired personal traits of Michelin employees." Wells said Michelin also found appeal in "the atmosphere that exists

which fosters the growth of the free enterprise system."

In addition to the Midland plant, Michelin is considering construction of two other plants in Texas.

The second plant, which would be the radial-tire manufacturing facility in Texas, would be near Austin.

The third plant, which would produce steel cords, would be at Temple. Rubber from the Midland plant and steel cords from the Temple plant would be shipped to near Austin for the making of tires.

Wells said Midland city and county officials "have been most helpful" to Michelin.

He listed some citizens who worked with the company: Doug Henson, banker; Howard "Rocky" Ford, president of the Industrial Foundation of Midland; the Scharbauer family of ranchers and landowners; Joe Kloesel, president of the Midland Chamber of Commerce; Grant Billingsley, the chamber's economic development manager-"who has practically lived with our people in the field," and Ron Schwisow, chairman of the chamber's Midland Area Sales Team (MAST).

"Michelin looks forward to becoming a solid member of your industrial community," Wells said.

Michelin, a tire-manufacturing factory which originated in France around 1890, first came out with a removable pneumatic bicycle tire. It was produced

in 1891 by Edouard and Andre Michelin.

Today, Michelin employs more than 110,000 people in 50 facilities worldwide, Wells said.

In 1894, Michelin decided that automobiles, too, needed pneumatic tires to help make the horseless carriages "practical and popular."

"Innovations continued," Wells said. "In 1923, Michelin produced the first low-pressure passenger tire with an unheard of tire life of 10,000 miles. In 1930 came the first 'tubeless' tire."

Michelin came out with the first "metallic" tire, which turned out to be "a milestone in the development of heavy-duty truck tires," he said.

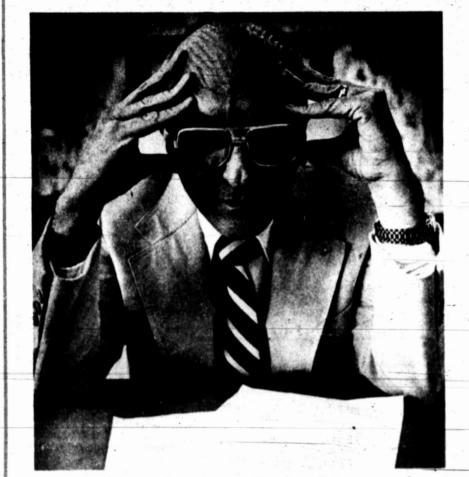

The firm introduced the steel-belted "X" radial passenger in 1948 — 15 years before any other manufacturer marketed a radial tire.

Later, Michelin introduced the American motorists to the radial tires. He said Michelin opened plants in the United States to meet the "ever-

growing demand for radial tires.

Michelin broke ground for its first U.S. plant, at Greenville, S.C., in 1973, and the first lire was manufactured there two years later.

Since then, Michelin has opened a rubber-mixing plant at Anderson, S.C.; built a truck tire plant at Spartanburg, S.C.; is constructing a small truck and recreational tire plant in Dothan, Ala.; has built corporate headquarters for the manufacturing division in Greenville, S.C., and is to build a radial tire manufacturing plant in Lexington, S.C.

Contest for slogan promoting chamber to pay someone \$250

In an effort to focus attention on the Midland Chamber of Commerce and the role it plays in helping build a better city for all residents, officials today announced a special promotion that will make one citizen \$250 richer.

The project, planned by the chamber's Public Relations Committee and announced during a news conference today, will begin with a slogan contest. This is open to residents of Midland County and will feature a \$250 prize for the winning slogan.

The second phase of the campaign will be launched in the fall with plans calling for the winning slogan to be used in connection with a variety of publicity and promotional materials.

The contest begins today and ends at 5 p.m. May 25. Winner will be announced May 31.

Harry Clark, chairman of the Public Relations Committee, said the slogan campaign was selected as a means of obtaining the broadest public participation in the project. It is focusing attention on the varied roles the organization has in relation to Midland and its people.

"In the modern-day world, a slogan is used as a rallying point for creative and centralized efforts, and we hope this slogan will be a rallying point for the chamber's efforts," Clark said.

He emphasized the chamber is seeking a slogan that best communicates the ways in which the chamber's work helps, directly and indirectly, make life more fulfilling for every Midlander.

Contest rules are as follows:

- Entries must be 10 words or less and emphasize the chamber's rela-

U.S., Egypt pressure Israel

JERUSALEM (AP) — The United States and Egypt put pressure on Israel today to stop its attacks on the Palestinians in Lebanon, but Prime Minister Menachem Begin vowed to keep up the war on "terrorists who spill the innocent blood of men, women and children."

State Department officials in Washington expressed concern as Israeli jets on Monday made their second raid in two days. The officials said U.S. Ambassador Samuel Lewis met with Israeli officials in Jerusalem and urged their government to halt the attacks.

Egypt's acting foreign minister, Butros Ghali, called for firm US. intervention to check the Israelis. He said the air strikes were exposing the Middle East to grave dangers. But there was no indication of adverse effects on the Israeli-Egyptian negotiations that opened Sunday to arrange Israel's withdrawal from Sinai.

The Israeli air force attacked Palestinian camps in northern and southern Lebanon Sunday and Monday after a cease-fire of more than a week. The

Heads you win, tails you lose

WASHINGTON (AP) — Car owners have one chance in two of getting their vehicles repaired right at a fair price, says Transportation Secretary Brock Adams.

And he adds:

-The average car owner is overcharged \$150 annually in repairs made on his or her car.

-Fifty-three cents of every dollar spent on fix-ups go for unnecessary repairs.

Those are some of the conclusions of a government-sponsored undercover survey of garages in seven cities.

Drivers in the study took cars with carefully planned malfunctions to 62 randomly selected garages to come up with the results.

The report on the experiment also found: —Nine times in 10 when the motorist's complaint concerned engine performance, the garage made an unnecessary repair or missed the real problem.

-The rate of over-repair or under-repair was 32 phia, Mian percent for complaints concerning brakes, 44 percent for suspensions and 51 percent overall. Adams de

"Outright criminal fraud is only a small part of the problem," Adams told a news conference Monday.

"What we have instead is a variety of wasteful practices, including habitual over-repair or 'package deals' such as replacing points, condensers and spark plug wires when only one spark plug is needed; replacing parts until the problem goes away — even though one part may have been needed, you wind up buying the whole batch; and finally, just plain old lack of competence to do the job right," he said.

He said the government was not trying "to indict

the entire auto repair industry." No fault was found in half the garages visited, he said.

The survey was conducted in Atlanta, Philadel-

phia, Miami, Houston, Nashville, Tenn., White Plains, N.Y., and Brooklyn, N.Y. It cost \$66,000.

Adams declined to identify the garages, but he said their names will be turned over to local authorities for possible prosecution.

Men and women, whites and blacks, received comparable treatment when they sought help for their cars, he said. No distinction was found between garages in big cities and those in the suburb of White Plains, N.Y., he said.

Adams called on the auto repair industry to police itself and to start a system of certifying repair businesses which comply with industry-designed standards.

Until that happens, the transportation secretary advised drivers to use diagnostic centers or visit several garages for estimates and evaluations before deciding where to go for repairs. lestinian guerrillas near the south Lebanese town of Reihah, 11 miles from the Israeli-Lebanese border.

Begin, opening the summer session of the Israeli Parliament Monday, said Israel would continue attacking Palestinian guerrillas in Lebanon "until they are unable to carry out their missions of murder."

Referring to the Palestinian attack April 22 on the coastal town of Nahariya, in which four Israelis and two of the three raiders were killed, he said: "We will not wait for the next attack after Nahariya. We will give them no rest."

Begin's speech also included an invitation to Lebanese President Elias Sarkis to meet him and negotiate a peace treaty between Israel and Lebanon, but Lebanese Premier Salim el Hoss rejected the offer immediately.

"Begin's offer is blackmail," el Hoss said in Beirut. "The offer is a maneuver to camouflage Israel's attacks against innocents in Lebanon." Shimon Peres, leader of Israel's opposition Labor Party, said Begin's proposal was a farce.

"As if Sarkis would decide to come without the consent of Damascus," he commented, referring to the 22,000 Syrian troops occupying northern and central Lebanon.

Summer gas shortage: How serious will it be?

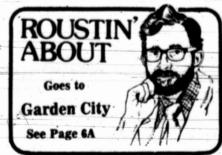

NEW YORK (AP) — Transportation Secretary Brock Adams and gasoline industry officials appear at odds about how serious the nation's gasoline supply squeeze will be this summer.

Adams said Monday that the current long lines at Caliornia gas stations are a harbinger of things to come in many parts of the nation i the next few months.

But industry officials said that while supplies of gasoline are tight and may get tighter, the lines in California are unique to that state.

"You see a picture in your morning newspaper of long lines, and the first thing you think is, 'I've got to fill up this morning," said Edward Murphy, director of statistics for the American Petroleum Institute, an industry group. "If a lot of people do that, you've got problems." According to Murphy, this sort of panic buying is causing problems in California. While other states have had some problems with gasoline supply, they have not been as severe as in California.

Adams, speaking in Washington at a meeting of the Society of American Business and Economic Writers, told a California reporter asking about the situation there, "Your summer's a little early.

Joe Kloesel takes over as chamber president

Midland's phenomenal economic development over the past few years has paralleled the two-year reign of the "most enthusiastic" and the "most energetic" Harrell Feldt as president of the Midland Chamber of Commerce.

"It's quite a challenge to follow the Feldt administration," incoming chamber President Joe Kloesel told the almost 600 Midlanders and guests

Orson Bean brought his outlandish and unconventional comic humor to Midland Monday night. See story on Page 5A

at the chamber's annual membership dinner in Midland College's Chaparrel Center Monday night.

Kloesel is president of Drilco Industrial Division of Smith International Inc. in Midland. Feldt is an attor-

ney. Theme of the fete was "Enlarging Horizons."

Kloesel cited the Midland boom from increased oil exploration to burgeoning downtown Midland and added air service at Midland Regional Airport. He introduced officers and directors of the chamber. But he bypassed naming the chamber's committee chairmen, for that would take too much time, he said.

"That is, of course, where the bulk of the work is done," Kloesel said. Earlier, Feldt accepted laurels and

returned them in kind. He spoke of the "marvelous, marvelous time" he had as chamber president and of his role in "improving the quality of life" in Midland.

Feldt, the chamber's 44th president since 1928, presented a "special plaque" of thanks to perennial chamber-booster William H. "Bill" Collyns, chamber president in 1954 and editor of The Midland Reporter-Telegram. He received a standing ova-

"If I could do as much (as Bill Collyns)," Feldt said, "I would consider myself successful."

He cited some of Collyns' service roles: president of the Midland, West Texas and Texas State Chambers of Commerce; Outstanding Midlander of Year in 1943; ruling elder in the Presbyterian Church; secretary of the Industrial Foundation of Midland; director of the Texas Good Roads Association and a leader in the Permian Basin Petroleum Museum, Li-

(See LEADERSHIP, Page 2A)

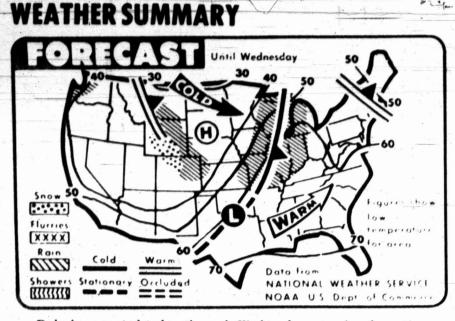

William H. "Bill" Collyns was cited for his more than four decades of "unselfish leadership" in community and West Texas projects and organizations at Monday's annual Midland Chamber of Commerce membership dinner. Also recognized were Gordon Knox for his role in city beautification programs and John Ingram for his role in developing MidTran, a transit system. (Staff Photo by Brian Hendershot)

brary and Hall of Fame. In another presentation, Feldt cited Gordon Knox in his role as chairman of the chamber's Visual Improvement (VIP) committee to "make this city more beautiful.'

Through Knox's efforts, trees were planted along streets and boulevards. "Those works will be with us forev-

er," Feldt said.

He also cited an ailing John Ingram in his role in MidTran, a public transportation system for the "handicapped, the needy and those in the "employment force" who don't or choose not to drive personal automobiles to work.

In referring to Midland's recent surge in industrial, business, and residential growth, Feldt said that Midland has a "more imaginative, creative group of people than any place in the country," and recapped the factors making up the city's economic boom:

-The "new, vibrant economy" as eflected in \$87 million in building permits issued in 1978.

-Additional wings to Midland Memorial Hospital.

-Additional stories to The First National Bank and the construction of downtown buildings, including the Blanks, Cox and Gibraltar Savings Association building. —Construction of the new Theatre

Midland (Midland Community Theatre) and Midland College's Chaparral Center. -Midland Exhibition Center, now

under construction. -Air service of Braniff Interna-

tional Airways at Midland Regional Airport.

-The planned expansion of Texas Instruments and the construction of a PPG Industries plant here. -Airline boardings were 400,000 in 1978 and are expected to be 750,000 in

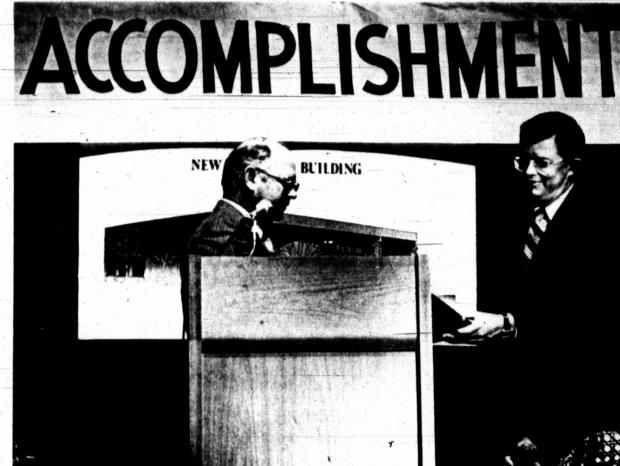

1980 "Think of all of those accomplishments - just in two years," said Feldt. "It's an amazing story."

Feldt said the happenings of the late 1970s is "truly a significant time in Midland."

Kloesel also noted the civic, medical, business and industrial advances of Midland

Inflation-weary Americans say corporate profits 'too high'

NEW YORK (AP) - Most Americans are not pleased with recent reports of record corporate profits, an Associated Press-NBC News poll shows.

The inflation-weary public says business profits are too high and that it is company executives and large shareholders - rather than the public or employees — who benefit most from higher corporate earnings.

Despite these negative views, Americans are split on whether the government should impose controls on those profits.

In recent weeks, corporation after corporation has announced higher profits in the first quarter of this year: Exxon, up 37 percent over last year's first quarter. Atlantic Richfield, up 61 percent; Du Pont, up 48 percent; Union Carbide, up 58 percent; Chase Manhattan, up 78 percent.

The AP-NBC News poll taken April 30 and May 1 found 68 percent of the public saying business profits are too high. Twenty-two percent said they are about right and 5 percent said profits are too low.

percent of the interviewed nationwide by telephone are not sure

Only 5 percent said the public benefits from business profits and 2 percent said the profits go to the companies' employees.

One percent said all categories benefit and 6 percent are not sure.

Although the public is weary of constantly rising prices, it is not sure government controls on business profits would do much for the nation's economic troubles

Forty-nine percent favor mandatory controls on profits, but 41 percent are opposed. Ten percent are not sure.

As one might expect, those who say business profits are too high are most likely to favor controls on such earn-

large favored controls by a 58-33 margin

profits are about right opposed controls by a 63-29 margin and the small group which said profits are too low opposed controls by a 51-31 edge.

As with any sample survey, the results of the AP-NBC News polls could differ from the results of interviews with all Americans with telephones because of chance variations in the sample.

For polls with 1,600 interviews, the results should vary no more than three percentage points either way simply because of sample errors.

Charges against Talmadge backed by polygraph expert

WASHINGTON (AP) - A polygraph expert says his lie detector test strongly indicated Sen. Herman Talmadge's chief accuser told the truth when contending Talmadge accepted cash from a secret bank account.

Raymond J. Weir told the Senate Ethics Committee Monday he thinks Daniel Minchew also was truthful when the former Talmadge aide said Allyne Tisdale, the senator's financial secretary, helped convert campaign contributions to Talmadge's personal

Two other polygraph experts who gave lie detector tests to Minchew were scheduled to testify today. News reports have said Minchew, top aide to the Georgia Democrat from 1971 through 1974, failed a test given by an FBI examiner and passed one given

by a private examiner. Weir, former chief of internal security for the National Security Agency, told the Senate committee he spent more than one hour testing Minchew April 4 in the office of a Minchew attorney. The tests he administered were paid for by Minchew. Weir testified the lie detector tests

were so "clean cut" he concluded almost immediately Minchew proba-

4

10-

bly was telling the truth. Talmadge, who had been present for all previous testimony, left the room when Weir began testifying. Mrs. Tisdale, who spent four days denying any knowledge of improper activities, also was absent.

Weir, who estimated he has run 5,000 polygraph tests and supervised an additional 50,000 in the government and in private industry, said he asked six questions relating to the principal charge against Talmadge: that the senator converted campaign contributions and over-reimbursements of Senate expenses to his personal use.

Minchew contends he funneled about \$39,000 in such funds through a secret bank account to benefit the senator. Talmadge denies any knowledge of the account and calls Minchew a "liar, cheat and embezzler."

Weir said two of his questions asked if Minchew gave money to Talmadge from the secret account. Another asked if Minchew and Mrs. Tisdale worked together to convert campaign contributions to the senator's personal use.

Minchew replied "yes" to those three questions.

Big Spring Industrial Park is the proposed site of the facility.

Dr. Bill Grusey, Texas Education Agency administrator and Dr. Gary Curtis, head of the TEA programs for the handicapped met with the two Howard College officials to discuss the proposal.

-A commitment is needed from Grusey before consultants from east and west coast colleges can begin designing course descriptions for the facility

Those consultants will also perform feasibility studies to determine how many potential students are in the eight southwestern target states and where they are located.

College officials feel there are 1,500 potential students in the Texas, New Mexico, Arkansas, Louisiana, Oklahoma, Missouri, Arizona and Colora-

Former GSA

official convicted BALTIMORE (AP) - A former assistant manager of a General Ser-

vices Administration store in Washington has been convicted of conspiracy and accepting a television set and trash compactor from a GSA supplier.

William Howard Anderson, 31, of Washington, was convicted Monday by a U.S. District jury here.

Anderson, who was promoted to manager of the GSA store at the Department of Housing and Urban Development after the manager was named in the first round of indictments, was found guilty of accepting the gifts from James Hilles Associates, Inc., a Westminster, Md., company authorized to sell supplies to GSA stores.

The jury found Anderson innocent of two charges of bribery involving the gifts, apparently because there was no evidence that Anderson knew that the manager was billing GSA for the gifts in the form of false bills for supplies from Hilles.

Warm, gusty weather likely

It may be too soon to get the water skis out of the attic, but sailboaters should enjoy this week's weather, as warm, gusty winds continue to blow. **Temperatures Wednesday should** approach 90 degrees, with a low tonight around 60.

Winds won't be quite as high Wednesday, but will still be in the 15 to 20 mph range.

Record high for May 7 was 100 degrees set in 1947, while the record low was set in 1938 with 41 degrees. There was no official rainfall in the

last 24 hours, with only a trace recorded for the month and 2.86 inches falling this year.

Part of the negative reaction to business profits comes from the public perception of who benefits from such earnings.

Thirty-seven percent said top-level executives reap the benefits of big profits, while 33 percent said the money flows to large shareholders of the corporations. Sixteen percent said the corporations themselves get most. of the benefits.

- Contest is open to members and non-members of the Chamber of

Commerce, and there is no age limit. Participants must be residents of Midland County. Employees of the Chamber and members of the chamber's Public Relations Committee are not eligible.

- Decision of the judges will be final and all slogans submitted become the property of the Midland Chamber of Commerce. Entries will not be returned and may be used at will by the Chamber.

- In the event of a duplicate winning slogan, the entry received first will be judged the winner.

The slogan campaign was designed by the Image Campaign Subcommitee in the chamber, composed of Chairman Jim Servatius, Lou Lindsey, H.A. Tuck, Bunnie Kent, Cal Henline and Don Harvey.

California again slightly shaken

SAN FRANCISCO (AP) - Tall buildings trembled, but there were no serious injuries or damage when the second moderate earthquake in 10 days shook northern California.

"It was pretty scary. The whole foundation of the house shook badly. said Carmen Irizarry of East San Jose after Monday night's tremors struck at 10: 11 p.m. PDT.

The earthquake was measured at 4.8 on the Richter scale by the University of California Seismographic Center at Berkeley, and at 4.9 by the National Earthquake Information Service in Golden, Colo. Several aftershocks, including one of 2.6, following the main temblor.

Officials said they believed it was the strongest quake in the San Francisco Bay area since 1970 when one registering 4.9 was centered near Danville, about 15 miles east of Oakland.

The epicenter was placed along the Calaveras Fault system, five miles west of Mt. Hamilton and 10 miles east of San Jose, a city of 600,000, about 60 miles southeast of San Francisco.

In East San Jose, Larry Zanella said the refrigerator fell over in his kitchen, and in nearby Los Gatos, Ron Vielicka said the quake set his dogs howling and growling.

"My dogs went bananas beginning about two hours before it hit, and other dogs began barking, which I've never heard before," Vielicka said.

"I was watching the walls kind of weave and wave," said Capt. Zack **Snyder of the state Dept. of Forestry** office in Morgan Hill, also near the epicenter.

For others, the quake produced a rolling feeling-in buildings from San Francisco Bay area more than 100 miles south to the Monterey Penninsula.

"Lots of burglar alarms went off, too," said a dispatcher at the Santa Clafa County Communications Center.

Although the area was hit by a quake of 4.3 magnitude April 27, it was "pure coincidence," according to Dr. Robert Uhrhammer of the UC seismograph center, who termed both tremors minor. "I have not received any reports of injuries and I would not expect any from a quake of this magnitude. Uhrhammer said.

The Richter scale is a measure of ground motion as recorded on seismographs. Every increase of a num-

ber means a tenfold increase in the magnitude

caused \$400 million damage.

The San Francisco earthquake of

1906, which occurred before the Richter scale was devised, has been estimated at 7.9. The quake and subsequent fires killed 700 persons and

Release of weather balloon signals U.S.-China pacts

PEKING (AP) - Commerce Secretary Juanita Kreps plucked a smiling, pig-tailed girl from a crowd today and together they released the first Chinese-American weather balloon.

The yellow, American-made balloon sped into the sunny, dust-filled sky, marking the signing of four science and technology agreements and the beginning of joint scientific ventures by the two nations.

"Thank-you, auntie," said 10-yearold Guo Li, known to her friends as "Lili," after Mrs. Kreps returned her to hundreds of clapping Chinese gathered around the perimeter of a dirt field at China's weather bureau.

A Chinese balloon also was released, to commemorate the opening of a joint upper air observation station in Peking. The sensor-equipped balloons soared to 100,000 feet and sensitive ground instruments picked up data on temperature, humidity and wind.

The information never before available from China will be used in global weather monitoring and prediction and will aid high-altitude aviation.

The four agreements signed today cover meteorology, oceanography and fisheries research, measurement technology, and exchange of technical information and management consultants with China.

Mrs. Kreps signed the technical exchange agreement at The Great Hall of the People with Vice Premier Fang Yi, chairman of the State Commission on Science and Technology. They toasted with champagne.

Other agreements were signed by Richard Frank, administrator of the National Oceanic and Atmospheric Administration and by Jordan Baruch, assistant secretary for science and technology, both of the Department of Commerce.

"It may well be that in this wrinkle in the fabric of time, American knowledge will benefit China," Mrs. Kreps said in her luncheon toast before the signing. "However...it was China that gave the world scientific advances no less profound than the wheel, the sun dial and the Great Wall."

She said that while the United States leads today in rocketry, 500 years ago China already had solid propellant rockets with sophisticated steering

In his luncheon toast, Fang said 'the four agreements are like four fresh flowers" that sprang from seeds planted when Senior Vice Premier Deng Xiaoping visited Washington in January.

Council sets tentative date for open house at airport

Baker added.

Open house at Midland Services Administration **Regional Airport was** tentatively slated for 10 a.m. June 15 when the Midland City Council met today in a special longer than 90 days. session.

The council met in Council Chambers to swear in the three members who were re-elected in the April 7 general election. Taking the oath administered by Midland County Judge William Ahders were Doris Howbert, Gordon Marcum II and Carroll M. Thomas. Mrs. Howbert was elected mayor pro-tem for this next year, replacing G. Thane Akins. All work on the terminal building at Midland Regional Airport, and the two-story parking lot should be completed by June 12, City Manager James Brown said.

The council also decided to invite the Chamber of Commerce to the opening ceremonies and to ask for their assistance in planning the open house.

Changing the entrance to the Downtown Post Office from Wall Street to North Main Street was

approved. Fred Baker, director of public works, said the entrance would be designed so only those going north on Main Street would be able to make a right turn into the parking lot. He said a representa-

tive with the General

oil process, said he is puzzled by the "economics" cited by operators predicting production losses without Corp. and oil operators from the disposal facilities. apparently, he discharging salt water produced in oil said, production continues despite the recovery operations into Whalen increased cost of brines disposal since Lake. The ban was ordered after the Whalen Corp. facilities have been Chief Engineer Bob R. Harr reported closed.

Poerner contrasted the disposal cost of 7 cents a barrel at. Whalen Lake to 27 and 28 cents a barrel at other area disposal facilities operators now use.

Examiners pinned these conditions to their recommendations to reopen the disposal facilities at Whalen Lake:

-Whalen Corp. must comply with commission rules on disposition of skim oil.

-The company must upgrade its disposal facilities as it has proposed to do -Whalen's skimming facility will operate during normal business hours

only, or at other times when company personnel can supervise the receipt of salt water into the lake. At other times, the facility must be locked.

-Oil and grease content of produced salt water discharged into the lake will not exceed an average of 72 milligrams per litre over any 48-hour period

-Whalen will not discharge unskimmed produced salt water, raw crude oil, waste oil, or similar material into the lake and will take reasonable steps to prevent others from doing so.

-Whalen personnel will report any flow-line break, any unauthorized dumping or any similar occurances which might result in pollution to the commission.

-Whalen will continue its clean-up operation on the lake and the lake perimeter to remove crude oil accumulated as a result of disposal of produced salt water.

enjoyment of your illusion of security

Bean was born in Vermont, was originally named Dallas Frederick Burrows, but didn't explain his namechange, perhaps because he need not.

And, behaving a tad-bit carefree in his obvious money-worryless state, Bean said he cares not if his children get a college education. He'll send hem money — and does — if they do, however.

"I WANT THEM to be happy, prod-uctive people." He said an "onerous sense of duty (to family) is corrosive of love.

Before he got onto his insecurityadvocacy kick, Bean put on the role of a chauvinist and sang the virtues of the crowing, strudding rooster and others of the male species.

"I used to talk about chickens a lot," he said of his growing-up years in Vermont.'

"(Take a) rooster: He's a fool. He struts," and does not much more, except crowing.

easter

loor surface.

gathering by emcee Parker Humes, who contrasted the comic with last year's chamber speaker, "conservative columnist" Mark Russell, who generously shoots word barbs. Bean commented:

"I certainly don't mind the fact of being a bit strange," he allowed. "But that don't mean I'm liberal."

And radio-man Humes, who also became an occasional comic, earlier noted that the night's chamber of commerce crowd was in noticeable contrast to other crowds, presumably those younger people attracted by rock 'n' roll and other pop-art concerts that attract attention from law-enforcement agencies.

'We had 600 in attendance (tonight), no police and only one assistant constable," said Humes

And he seemed soothed by the serene music played on the harp during the dining hour by Paula Hahn. "I sort of felt like I had gone to the

big chamber of commerce in the sky," Humes said.

Organizations fueling fight over right to smoke in public

By The Associated Press

To puff, or not to puff - in public anyway. That is the question in Dade County, Fla. In New York, legislators emerged from smoke filled backrooms and OK'd a public smoking ordinance of their own.

The referendum today in Florida fueled familiar arguments. Some restaurant and shop owners led by Dade Voters for Free Choice said the ordinance, if passed, would hurt business. The Group Against Smokers Pollu-tion, GASP, said public health would be hurt if it didn't.

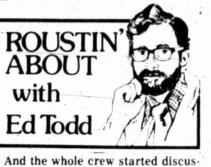

GASP forced the vote with 10,000 signatues on petitions. Peter Georgiades of Action on Smoking and Health in Washington D.C., said if it passes, "People all over the country will take heart and attempt it.'

The proposed ordinance would confine smoking to special lounges in workplaces and schools and stop it in health facilities except hospital rooms where the patient asks to smoke

Restaurants would have to divide seating space and partitions would be required around smoking areas in waiting rooms and lobbies.

Bars, tobacco stores, hotel guest rooms, pool halls, gambling establishments and boxing-and wrestling arenas would be exempt.

The arguments on street corners,

bars, restaurants and in homes con

tinued Monday as the furious last-minute campaigning peaked. "We want our freedom from pollu-

tion that is killing some of us," said GASP spokesman Dr. Charles Tate.

"The question is whether the gov ernment has the right to tell me I have to build a partition in my private law office," said Free Choice spokesman Neal Sonnett.

Larry Kay, regional director of the Bagel Nosh restaurant chain, got right to the point. "It stinks," he said.

Kay's two-word summation would have been lost on New York Assemblyman Richard Gottfried, who said Monday: "Your right to blow smoke around ends where your neighbor's nose begins.

The Manhattan Democrat's argument apparently fell on receptive ears - and noses. The Assembly voted 80-58 to ban smoking in most public places, except for designated smoking areas. The bill now goes to the Senate, where its fate is uncertain.

For New York's non-smokers, it was their biggest victory yet. Last year, the Assembly turned down two no-smoking bills.

Supporters offered arguments identical to their Florida counterparts chiefly a healthier environment all around

The county is Glasscock, population about 1,500, and the town, if you can figure out where it begins and ends, has about a 10th of that. Maybe more. It's not incorporated, which theoretically leaves this farmingand-ranching community with fewer headaches than its Big Brother cities

MILWAUKEE, Wis. (AP) - Ken Allswede is a pleasant enough fellow, but not one you would notice in a crowd.

He is 51. He stands 5 feet 10, is a bit round shouldered and a bit paunchy. He wears glasses and runs a grocery store. He is a dutiful father and husband, pays his bills, keeps to himself.

On occasion, though, something magic happens to Ken Allswede. Suddenly his eyes narrow, his neck

muscles twitch, his pulse quickens in his temple. His step is sure, light, his manner bold. He is alert. He is confident. He is alive.

"Put a cue stick in my hand and I guess I am a different person," he said. "The game does that to you. It demands all your concentration.

Timid players don't do well." Ken Allswede is a three-cushionbilliards player.

He was one of 24 who came to Milwaukee recently from around the Midwest for a tournament. They arrived carrying leather cue-stick cases, like clarinetists assembling for a concert, and met in the billiards room of the Antlers Hotel, a tired old hangout that must have been grand

when it was built in 1927.

"Not many places have billiards tables," Allswede said, as if by apology. "Pool tables are all over, but not billiards tables. This place isn't much, but the tables are superior."

Three-cushion billiards, students, bears no more relation to pool than checkers to chess; only the playing surface is similar.

Pool players knock balls into pockets. Billiards tables have no pockets. Billiards players use three balls only. To score a billiard, they must hit a ball into another ball, bounce it off at least three cushions, then hit the third ball. A feat of geometric skill, timing, subtlety.

Even the players differ. Pool players acknowledge a good shot with a whoop, or an oath. Billiards players applaud their opponents with a polite tap of cue stick on the floor. After a game, billiards players shake hands. Pool players just pay off.

PAGE 7A

"I started out playing pool as a kid," Allswede said, "but when I was about 17 I discovered billiards and was hooked.

"When things bug me at the store, or at home, I can go knock a few balls around a billiards table and forget all my cares."

DEATHS Ernest C. Stover

Services for Ernest C. Stover, 63, of 105 S. Bentwood St. were Monday in Ellis Funeral Home with the Rev. Bob Netherland, pastor of Asbury United Methodist Church, officiating. Burial was in Resthaven Memorial Park.

Stover died Saturday at his home. He was born April 26, 1916, in El Paso. He moved to California when he was 16 and was a roofer there until 1966 when he moved to Midland. He worked as a mechanic in Midland.

He married Mary H. Watson Feb. 21, 1970.

Survivors include his wife; a son, Larry C. Stover of Richmond, Calif .: two daughters, Donna Lee Burkett of Anderson, Calif., and Mary Jane Stone of Odessa; three brothers, Bob Stover of Dunsmuir, Calif., Charles Stover of Santa Rosa, Calif., and Mike Stover of Fair Oaks, Calif.; three sisters, Helen Green of El Paso, Billie Aaron of Midland and June Mellow of Arcadia, Calif., and six grandchildren.

Pallbearers were Norris Kissinger, L.M. (Ray) Parish, Jimmy D. Sparks, Bob Births, Charlie E. Walker and Thomas Stone

Ulis Newton

Graveside services for Ulis Newton, 75, of Las Vegas, Nev., were to be at 11 a.m. Tuesday in Resthaven Memorial Park, directed by Newnie W. Ellis Funeral Home. Officiating was to be the Rev. Roy A. Carley of the First Baptist Church.

Miss Newton died Thursday in Las Vegas.

She was born April 24, 1904, in Miles. She had lived the past 40 years in Las Vegas where she taught school.

Survivors include a sister, Mrs. Roy L. Taylor of Midland, and a nephew.

Billy Richardson

Services for Billy V. Richardson, 24, of Midkiff, were to be at 2 p.m. today in Newnie W. Ellis Funeral Home. Burial was to be in Resthaven Memorial Park

Richardson was born Aug. 9, 1954, in Odessa, and was a lifelong resident of Midkiff.

He died of natural causes Sunday in a Midland hospital.

Survivors include his parents, Mr. and Mrs. R.R. Richardson of Midkiff, a brother, Johnny Richardson of Odessa; his grandparents, Mr. and Mrs. F.E. Tauch of Atlanta, and several aunts and uncles.

Golda K. Horne

SILVERTON - Services for Golda

Jonah E. White

SLATON - Services for Jonah E. White, 8f, of Slaton, stepfather of Travis Webb of Hobbs, N.M., will be at 2 p.m. Thursday in Westview Baptist Church with the Rev. Jim Wilkierson, pastor, officiating.

Burial will be in Englewood Cemetery directed by Englunds Funeral Home. White died Monday in a Slaton hos-

pital after a lengthy illness. He was a trucker and a carpenter.

Other survivors include his wife and two brothers.

Clara Popiel

FREDERICKSBURG — Services for Clara Popiel, 78, of Big Spring were to be 2 p.m. Wednesday in Schaetter Funeral Home in Fredericksburg. Burial is to be in City Cemetery.

Mrs. Popiel, the former Clara Augusta Becker, died Sunday in a Big Spring Hospital.

Survivors include her husband, Stanley; two daughters, Clara Trammel of San Antonio and Mrs. Bill Ahrlett of Stonewall; four brothers, Charles Becker of Austin, Oswald Becker, Jake Becker and George Becker, all of Marble Falls; a sister, Bertha LaForte of Marble Falls, nine grandchildren and 13 great-grandchildren

Issiac Walraven

BIG SPRING — Services for Issiac Ike Walraven, 76, of Big Spring were to be at 2 p.m. today in Larry D. Sheppard Funeral Home here. Burial was to be in Trinity Memorial Park. Walraven died Monday at his home

after a lengthy illness.

He was born March 3, 1903, in Sandflat. He was married Jan. 27, 1932, in Anadarko, Okla. He was an oil field worker. He was a member of the **Plumbers and Pipe Fitters Union** 239.

Survivors include his wife; two daughters, Faye Berey and Margie Norwood, both of Big Spring; a son, Ike Walraven of Fort Walton Beach, Fla.; three sisters, Louetta Seal of Abilene, Shirley Smith of Odessa and Willie Stewart of LaMarque; a brother. Claude Walraven of Albany, six grandchildren and three great-grandchildren

Bessie S. Molett

BIG SPRING — Services for Bessie Sadie Molett, 89, of Big Spring are pending at Larry D. Sheppard Funeral Home here.

Mrs. Molett died Saturday in a Big Spring hospital after a lengthy illness.

Burial is to be in Cameron Memorial Cemetery at Cameron.

Murrel Hennigan

Sinatra seeks press muzzle

WASHINGTON (AP) - Singer Frank Sinatra, who has had his share of run-ins with reporters, is appealing to 2,000 of the nation's political and business leaders for help in "reining in the runaway press."

"If you do this, I will enlist in your army any ol' day," Ol' Blue Eyes wrote at the conclusion of a two-page letter.

A spokesman said the letter was mailed along with a reprint of a 30page magazine article critical of the press.

"He's practicing democracy, the principle of speaking up," said Lee Solters, a spokesman for Sinatra in Los Angeles. "He has as much right to speak up as anybody."

Solters said Sinatra sent his letter and a copy of the article to President Carter, members of Congress, governors, business leaders, heads of the country's college journalism departments and editors, publishers and news columnists.

"He's mailing it to anyone who

(A)

would have any kind of interest in what that pamphlet as to say," Solters said.

The reprinted article, "The Powers of the Press: A Problem for Our Democracy," was written by Washington lawyer Max M. Kampelman, a former aide to the late Sen. Hubert H. Humphrey. Kampelman's article first appeared in Policy Review, a quarterly journal of the Heritage Foundation, a conservative "think

tank" in Washington. The article characterizes the press as a "powerful, ever-growing institution with huge financial resources to supplement the power it wields in its control over the dissemination of news, but ith fewer and fewer restraints on its powers.

In his letter, mailed last month, Sinatra wrote that he had "met and confronted the unlimited power of the press

"It frightens me as a husband and a parent who is concerned for the wellbeing and future of his family. And it

(B)

certainly frightens me as a member

Charging the press with operating with "an irresponsibility that is almost beyond comprehension," Sinatra's letter said he was sending copies of the Kampelman pamphlet: "Because you have been subject to this irresponsibility in your personal life and in the office you hold."

He added:

"I beg you to lend your moral persuasion as an outstanding leader and the prestige of your high office to the crusade of reminding the press that there is more to the Constitution of this great nation than the First Amendment it so frequently hides behind."

Solters said Sinatra had sent the letter and accompanying article to about 2,000 people, and was planning to ship it to more. "He's had a tremendous response saying he's got a lot of guts," the spokesman said.

Sinatra's mass mailing is the latest round in his long-running dispute with

(D)

sidered unfair.

Wilson for \$3 million after Wilson published an unauthorized biography that Sinatra said was "false, fictionalized, boring and uninteresting."

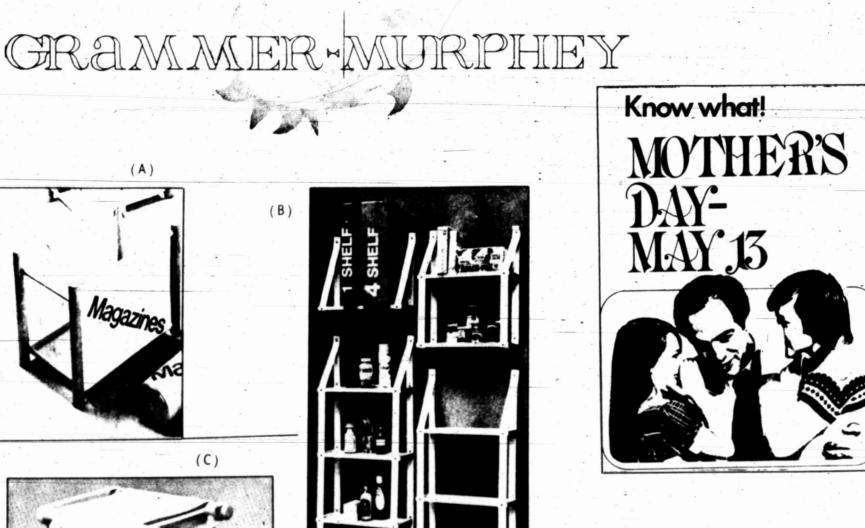

In the same year, Sinatra became involved in a publicized squabble with columnist Mike Royko. After Royko published a column saying Sinatra was followed by an "army of flunkies" and had a full-time police guard while in Chicago, the singer responded by calling Royko a "pimp."

The columnist printed the letter and offered to sell the original to the highest bidder, with the proceeds going to the Salvation Army

of the Republic which it threatens."

Cincinnati police lodge takes 'stress day' off

CINCINNATI (AP) - Cincinnati faced a day with limited police protection as the Fraternal Order of Police takes a "stress day" off following the burial of the fourth officer to be slain in 10 months.

"The signal to leave will be when the first shovelful of dirt falls on the casket," said Elmer Dunaway, president of Queen City Lodge 69 of the FOP.

The plan called for non-supervisory police officers to drive downtown from the cemetery after the burial and park and lock their cruisers around City Hall.

Dunaway said the group then would walk four blocks north to police headquarters and drop keys from the cruisers at a monument to Cincinnati's slain officers.

Dunaway said the walkout would last until after a City Council meeting Wednesday afternoon

Cincinnati City Manager William V. Donaldson said the city had a contingency plan but he would not discuss

The job action was designed to protest the deaths and what the FOP termed the leniency of judges and parole boards "who release convicted criminals to prey upon society." It also was aimed at City Council members and city administrators, whom the police group blames for a "grossly undermanned police force."

Budget cuts made three years ago reduced the size of the force from 1,126 to the current 923.

"The citizens of Cincinnati have

'Kiss and tell' campaign set by Coyote members

TALLAHASSEE, Fla. (AP) - Coyote of Florida, Inc., which bills itself as a "loose woman's organization," is asking Florida prostitutes to identify any clients who are legislators and who have voted against ratification of the Equal Rights Amendment and other feminist issues.

"The ERA affects all women, not just the 'good' women," says Coyote spokeswoman Darlene Lashman of apparently grown accustomed to the senseless slaying of one police officer after another," the police union said in a prepared statement.

In the latest killing - of Police Officer Melvin Henze, 31, on Saturday - bond has been set at \$1.6 million for Perry Wilson, who has been charged with aggravated murder. Wilson also faces charges of attempted aggravated murder because he allegedly pointed his pistol at another officer after the slaying, and felonious assault in the wounding of a woman during a fracas at a dice game Friday

In addition to voicing their protests, the police want changes in regulations so they can use hollow-point bullets, a more deadly ammunition. and place shotguns in cruiser cabs instead of trunks. They also want to change rules determining when an officer has cause to draw or use his weapon.

At its meeting, the City Council is expected to consider the recommendations of a special task force appointed after two officers were killed in March. Among other measures, the report recommends use of bulletproof vests.

The police also are involved in wage negotiations with the city government. Donaldson has said he has amended 14 items involving fringe benefits, but the city is holding the line on its proposal of a 7 percent wage boost with a cost-of-living clause, followed by another 7 percent next year. An experienced police officer now earns a base salary of \$16,153 a year.

"And it's about time that the good

old boys get a taste of their own

medicine, and just in time for the 1980

No surprises in energy plan

WASHINGTON (AP) - President Carter has quietly sent his "Second National Energy Plan" to Congress and there are no big surprises. He says, as he has before: Keep trying to save oil, keep using nuclear plants, keep looking for better and cleaner energy sources.

ing."

The 400-page plan, known as "NEP-2," repeats policies Carter has already proposed - ending oil price controls while imposing a "windfall profits" tax - and provides analyses to support them.

The plan, required by Congress to be turned in two years after Carter's highly publicized first report, was sent to Capitol Hill Monday.

Under policies laid out in the plan, the administration says:

-The average household's gasoline expenses would rise about \$38 - to \$761 — in 1981, with increases ranging from about \$36 in the Northeast to about \$40 in the Midwest.

-The average household's payments for home heating oil would increase about \$29 - to \$430 - ranging from about \$13 in the warm Southwest to about \$33 in New England.

-The extra costs for gasoline and home heating oil would hit hardest at high-income households.

Revolution in Iran

Two years ago, Congress required the second report to deal with the then-unfinished matter of domestic crude oil prices and other energy supply programs.

But in the meantime, Carter has sent Congress his propoal to phase out price controls on domestically produced crude oil while levying a "windfall profits" tax on oil companies to channel revenue to support development of new energy sources. Other report highlights also repeat

administration positions and predictions already made public:

-World oil production won't match demand past the mid-1980s. -Alternatives must be found in

coal, nuclear, synthetic and other energy forms to begin filling the supply gap between 1985 and the end of the century

-Solar energy, fusion nuclear power and other nearly perpetual energy forms should make major contributions after the turn of the century.

-To stimulate transition to new energy forms, prices of oil and natural gas must be allowed to reflect their "replacement price," meaning steadily increasing costs until the alternatives arrive to stabilize the supply

summary WASHINGTON (AP) - Here is a summary of the new Energy Plan estimates of average an-

nual household fuel expenditures plus the increases resulting from President Carter's proposals in 1981:

GASOLINE BY REGION:

New England, average household gasoline costs would be \$733, plus \$36 due to Carter's plan; New York-New Jersey, \$774 plus \$36; Mid-Atlantic, \$742 plus \$37; South Atlantic, \$740 plus \$37; Midwest, \$797 plus \$40; Southwest, \$733 plus \$38; Central, \$747 plus \$38; North Central, \$749 plus \$39; West, \$775 plus \$37; Northwest, \$784 plus \$39; and U.S. average, \$761 plus \$38

HOME HEATING OIL BY **REGION:**

New England, \$446 a year, plus \$33 due to Carter program; New York-New Jersey, \$443 plus \$31; Mid-Atlantic, \$399 plus \$27; South Atlantic, \$283 plus \$19; Midwest, \$401 plus \$31; Southwest, \$184 plus \$13; Central, \$391 plus \$31; North Central, \$359 plus \$27; West, \$320 plus \$23; Northwest, \$351 plus \$25; and U.S. average, \$401 plus \$29.

GASOLINE BY HOUSEHOLD **INCOME GROUPS:**

Under \$5,000 annual income, gasoline costs average \$387 per year plus \$19 due to Carter plan; from \$5,000 to next higher category, cost \$532 plus \$27; from \$10,000, cost \$672 plus \$34; from \$15,000, cost \$824 plus \$41; from \$20,000, cost \$888 plus \$44; from \$25,000, cost \$1,032 plus \$52; from \$30,000, cost \$1,137 plus \$57; over \$35,000, cost \$1,170 plus \$59

HOME HEATING OIL BY HOUSEHOLD INCOME GROUPS:

Under \$5,000, cost \$366 a year plus \$26 due to Carter plan; from \$5,000 to next higher cate gory, annual cost \$376 plus \$27; from \$10,000, cost \$390 plus \$28; from \$15,000, cost \$404 plus \$29; from \$20,000, cost \$418 plus \$30; from \$25,000, cost \$435 plus \$31; from \$30,000, cost \$468 plus \$34; over \$35,000, cost \$455 plus \$32.

Farmers seeks fuel

ATLANTA (AP) - Bountiful crops this spring have put a strain on the supply of diesel fuel for farmers, and state officials fear the situation may get worse.

State Agriculture Commissioner Tommy Irvin said Monday he sent a telegram to Energy Secretary James Schlesinger urging that diesel allocations for agriculture be given serious consideration

Energy Windfall profits tax

runs-into opposition

The Washington Post

WASHINGTON - President Carter's new "windfall profits tax" proposal ran into criticism Monday in a Senate Finance subcommittee as oil-state senators and other conservatives blasted the White House for blunting incentives for new oil exploration.

During a session in advance of House hearings now scheduled for Wednesday, panel members argued that the oil companies should be able to keep all new revenues they get

ENERGY OIL & GAS

. from price decontrol, or at least es-

cape taxes on money they reinvest in the search for more oil. Sen. Russell B. Long, D-La.; finance committee chairman, told Carter officials that "under your program the industry can raise enough money to stay at the mercy of the Arabs as long as you remain in government which may not be that long.

Long berated administration spokesmen, "Did it ever occur to you that you people are flirting with the survival of freedom in this nation and on this planet?'

He said the current shortage requires that energy production be 'more profitable'' than any other venture.

The senator's contentions came in the face of testimony by congressional and administration officials that

Tight ration battle due in committee

By TOM RAUM

WASHINGTON (AP) - Congressional energy leaders say President Carter's revised gasoline rationing plan stands a better chance of approval than his first version. But extremely close votes are expected.

'We're in a tight fight, a very tight fight," said chairman Henry M. Jackson, D-Wash., of the Senate Energy Committee.

His panel was taking up the modified measure to give the president

lifting price controls alone would give the oil companies all they need for new exploration.

Emil M. Sunley, deputy assistant secretary of the Treasury, tried to defend Carter's actions by telling Long "the administration is doing essentially what you want done decontrolling oil prices" and that the profits tax was part of the package. Sunley also contended that the relatively mild "windfall profits" tax proposal was "not a pussy cat tax that some have suggested." Carter's proposal would bring in between \$500

million and \$1 billion a year in new revenues. Neither Long nor other subcommittee members appeared to be mollified by Sunley's reference to the decontrol action, Sen. Mike Gravel, D-Alaska, the subcommittee's chairman, said he saw "really no need for a windfall

tax" of any kind. Other panel members agreed. For all the strong rhetoric, insiders said the subcommittee's reaction did

not necessarily mean that the full finance committee ultimately would not enact some form of excise tax on the oil industry, although it most like ly will be weaker than Carter has proposed.

Long has hinted he would be willing to push through some sort of windfall tax if it incuded a hefty "plowback" provision allowing the oil companies to escape tax on money they reinvest in new exploration.

Both the administration and Democrats on the House Ways and Means committee oppose any such move. Sunley said a plowback clause would create "distortions" in the way industry stepped up its investment. "We have serious problems about its wisdom," he said.

Carter's proposal is designed to siphon off some of the extra revenues that the oil companies would reap from his decision to lift domestic price controls, and use the money for rebates to finance new energy research and help the poor cope with higher gasoline prices.

Norman Hitt promoted

ODESSA — Perry Gas Companies, Inc., an Odessa based energy related holding company, announces the promotion of Norman Hitt and the recent addition of Kenneth Clases to the staff.

Hitt was promoted from company pilot to manager of Aviation. He has been with Perry Gas approximately three years. Hitt is currently serving as president of the Odessa Aquatic Club.

Kenneth Clasen has been employed

The measure has been criticized by liberals as too weak, and there are indications that the House Ways and Means committee may try to stiffen it somewhat.

Alice M. Rivlin, director of the Congressional Budget Office, told the subcommittee Monday that Carter's decontrol plan appears sufficient to ensure "a significant amount of new investment" for exploration and development

She said outlays for oil and gas exploration may rise as much as \$27 billion by 1981.

And Sunley estimated that even with the windfall profits tax Carter's decontrol plan would result in an additional 1.2 million barrels a day of domestic production - an increase of 20 percent over what would have occurred without decontrol.

For all their complaining about the windfall tax proposal, subcommittee members spent most of their time criticizing the administration for a wide variety of energy policies from cutting back on offshore oil leases to restricting the use of Alaskan territory.

Several members asserted that what Carter should seek to do is encourage enough new exploration to make the U.S. "energy independent" as the Nixon administration once proposed. Sunley argued, however, that this would be "unrealistic."

Manager appointed

BIG SPRING - Robert A. Fuller has been named manager of Engineering, Research and Development, American Petrofina, Inc., in Big Spring.

Fuller was formerly manager of Process Engineering and Development at Big Spring for Cosden Oil & Chemical Co., a wholly-owned subsid-

Fuller's new post includes the Engineering Department, Energy Conservation, and Environment sections.

He joined Cosden at Big Spring as a junior engineer in the Petrochemical Division in 1961 following graduation from the University of Florida with a B.S. degree in Chemical Engineer-

In October 1964, Fuller became section leader of Polystyrene Development, andwas promoted to manager of Process Development in 1969.

He was promoted to manager of Process Engineering and Development for Cosden in January 1972. In May 1977, he was appointed manager of Process Engineering and Development for American Petrofina, Inc.

Fuller is a member of the American Institute of Chemical Engineers, He serves on the Industrial Tean of the

Big Spring Chamber of Commerce

and on the Board of Directors of

Family Services and is a former

member of the Big Spring School

Board.

cost U.S. valuable time

By TOM GARDNER

RENO, Nev. (AP) - The revolution in Iran cost the United States some valuable time as the nation moves toward a serious shortage of oil, says U.S. Energy Secretary James Schlesinger.

Schlesinger told the convention of the Independent Petroleum Association Monday that the federal government had anticipated a serious shortage of gasoline in the country by the 1990s. However, the unrest in Iran "hastened that day of reckoning," he said.

"The national energy plan forecast oil shortages in the United States and other industrial countries within five to 10 years," he said. "We have lost some valuable time.

Schlesinger said the Middle East "is a volatile area where outsiders could create problems which would affect production." He said there vulnerabilities beyond the. were availability of crude" because much of the Mideast's oil production was

shipped over waterways on which in-

Schlesinger said the Carter administration's proposals to decontrol oil production, thus encouraging more pumping of lower-grade crude and more exploration for new sources of oil, would help ease the shortage but would not achieve energy independence

terruptions were possible.

To do that, he said, "the federal government will continue to attempt to increase the supply of natural gas and to encourage companies now using oil to switch to natural gas."

During the next twenty years, the crisis could strain economic, social and political institutions, a strain already being felt in gasoline-starved areas of California and Nevada, he said

Schlesinger, who has been ordered by President Carter to look into the California shortage, said it was possible the state was under-allocated. But he added that allocations would not be realigned to benefit one or two states at the expense of another.

Exxon wildcat staked in Ward County area

Exxon Corp. spotted location for a 7.000-foot wildcat in Ward County, 11.4 miles north of Barstow. It is the No. 1 Lee Monroe

The prospector is 1,980 feet from northeast and southeast lines of section 8, block 1, W&NW survey.

The site is 3/4 mile southeast of the depleted Pruitt, East (Delaware 5270 oil) pool.

IRION WILDCAT

Threshold Development Co. of Dallas No. 1 R. A. Habermacher has been spotted as a 2,500-foot wildcat in Irion County in the Tom Ketchum (Canyon oil and gas) field.

Eleven miles northwest of Mertzon. it is 1,500 feet from south and 467 feet from east liens of section 3078, block 28, T&TC survey.

The Tom Ketchum pool produces at 6.800 feet.

TOM GREEN TEST

Experanza Energy Corp. of Dallas staked its No. 4 Turner as a 7,300-foot wildcat in Tom Green County, four miles southwest of Carlsbad. It is 1,2145 feet from south and 2,321 feet from west lines of TTRR survey No. 116. Ground elevation is 2,196

It is 5/8 mile southwest of the opener of the two-well Percy Turner (Wolfcamp gas) field.

RUNNELS TRY

feet.

E. B. Fletcher of Dallas No. 3-417 L. B. Watkins is to be dug as a 4,900-foot wildcat in the depleted Bays (Goen and Fry) field of Runnels County, three miles south of Wingate. Drillsite is 500 feet from south and

west lines of section 14, Henry L. Bays survey No. 444.

The location is 7/8 mile southwest of the Deike (Fry and Goen) field and separted from it by dry holes.

UPTON WELL

Laguna Petroleum Co. of Midland No. 1-B Fulmer is a new well in the **Upton County Spraberry Trend Area** field, three miles north of Rankin.

It finaled for a daily pumping po-tential of 92 barrels of 40-gravity oil and five barrels of water, through perforations from 6,896 to 7,084 feet, 7,478-7,994 feet and 8,115 to 8,356 feet. The pay was fractured with 3,932 barrels of fluid.

Total depth is 8,500 feet and 4.5-inch casing is cemented at 8,488 feet, the plugged back depth.

Location is 990 feet from north and 1,320 feet from west lines of section 33, C&MRR survey. It is one and threeeighths miles southwest of other Spraberry Trend Area production.

The upper Spraberry was hit at 6.900 feet on ground elevation of 2,645 feet. The lower Spraberry was found at 7,500 feet and the Dean at 8,130 feet.

GLASSCOCK OILER

MWJ Production Co. No. 1-39 TXL is a new well in the Glasscock County portion of the Spraberry Trend area field, 14 miles west of Garden City. The Midland operator reported a daily pumping potential of 47 barrels of 38.3-gravity oil and 25-barrels of water, through perforations from 6,-803 to 8,427 feet. The pay was acidized with 4,000 gallons and fractured with

120,000 gallons. Total depth is 8,570 feet and 5.5-inch pipe is cemented on bottom. Plugged back depth is 8,558 feet.

SAXON PROJECTS

Saxon oil Co. of Midland staked two more projects in Reagan County.

The No. 1-3-G University will be drilled one mile northwest of the Farmer (San Andres) field and one and three-eight miles northeast of the V-Bar (San Andres) pool.

Location for the 2,500-foot test is 2.356 feet from south and 2.121 feet from west lines of section 3, block 48, University Lands survey and 7.5 miles southeast of Big Lake.

Saxon No. 1-22-58 University is 1/2 mile west of Spraberry Trend Area Production, 14 miles northwest of Big Lake.

The drillsite for the 7,900-foot operation is 1,644 feet from north and 1,320 feet from east lines of section 22, block 58. University Lands survey.

Refinery order sought

WASHINGTON (AP) - The chairman of an influential House energy subcommittee is calling on President Carter to order oil refineries to produce more gasoline.

However, Rep. Toby Moffett, D-Conn., stopped short of accusing the oil companies of deliberately holding down production to drive up prices. But Moffett, chairman of the energy subcommittee of the House Government Operations Committee, said refineries are operating at lower levels than could be justified by the loss of Iranian oil.

Moreover, Moffett said Carter has the authority to order stepped-up gasoline production and should use it.

"They (administration officials) don't need any more authority from us to force the production of more gasoline and heating oil," he said.

"I'm asking them to bring diesel fuel under an allocation system as we have now with gasoline," said Irvin. "I am urging them to look into thesituation before it gets chaotic."

Farmers use diesel-run machinery to plant and harvest crops.

The commissioner said telephone calls to his office indicated spot shortages of diesel fuel throughout the state, and a survey of oil companies suggested the situation could become more serious.

Properties to be sold

MILWAÚKEE, Wis. - Clark's board of directors, as part of its longrange plans, has decided to divest the company's oil and gas properties, Emory T. Clark, chairman of the board, announced at the company's annual meeting of shareholders held April 24 in Milwaukee.

Lehman Brothers Kuhn Loeb, Inc., investment bankers, has been engaged by the company to handle the sale and to render advice during the sale negotiations. The properties are all located within the United States, principally offshore Louisiana and Texas. Acreage is also held in New Mexico, Wyoming and onshore Texas and Louisiana.

Contract

awarded

BARTLESVILLE, Okla. - Maurer Engineering, Inc., Houston, has been awarded a \$44,800 contract by the Department of Energy for a study on improving methods of measuring residual crude oil saturation of underground reservoirs.

The contract was announced by the DOE energy technology center in Bartlesville, Okla., which will monitor the work.

The project will include a compre-hensive review of methods presently used by industry, universitites, and government agencies for handling, storing, and testing cores from oil producing reserviors.

The objective of the work is to produce recommendations for improving those methods and, in turn, provide more accurate estimates of the quantity of crude oil contained in undergroud formations, if any. The study is scheduled for completion by the end of August 1979.

Research on residual oil determination is part of the DOE program for developing methods used in enhanced oil recovery.

standby authority to order rationing at a hastily called meeting today.

A Senate floor vote was planned later in the day if the committee approved the plan. "I would assume we'll get it out of committee. But on the floor, the vote could be very close. There's going to be quite a debate,' Jackson said

And Rep. John Dingell, D-Mich., chairman of the House energy and power subcommittee, said he anticipates the plan will face considerable resistance in the House if it passes the Senate.

"It will be difficult," Dingell said. Both Jackson and Dingell said they endorsed the changes made by Carter, which they claimed improved the overall plan

Faced with likely rejection of the original plan in Congress this week, the president sent on Monday an amendment to the plan that would expand the amount of gasoline some states could get.

The modified version would give more gasoline to states like those in the West where driving distances are large and where more gasoline has been used in the past.

Carter's original plan would have allocated rationing coupons based solely on the number of registered cars in a household. Under the modification, the amount would be based half on the number of vehicles in a family and half on the amount of gasoline historically used in each state.

The modified formula also would allow households to get ration rights for no more than three vehicles.

The changes were aimed at picking up support for the plan from various congressional critics.

But Jackson said in an interview there are still "so many competing interests" that even the new plan could be in jeopardy.

"I have yet to see a proposal that is considered by all involved as being fair," Jackson said. "This is an effort to find some accommodation. I just don't know what will happen on it.'

However, Jackson said, if the revised rationing plan isn't approved, probably no plan can pass.

The administration says it has no intentions of using the rationing plan in the near future, but that Congress should approve it so the president could invoke it if needed.

In a related development, Sen. Russell B. Long, D-La., strongly critic-ized Carter's proposal for a "windfall profits" tax on additional revenue oil companies would realize under his companion proposal to remove price controls from domestic crude oil starting next month.

Long, chairman of the Senate Finance Committee, said denying the oil industry money to increase production would leave communist nations in a position to dominate the world.

as a company pilot. He previously waswith Scenic Airlines and Wilson Aviation of Midland. He holds an A.A degree from Pasadena City College. Pasadena, Calif. Clases was a mem ber of the Naval Air Reserve.

Federal policies Stock attempt overkill, market say economists By DONALD C. BAUDER **Copley News Service**

> In a Grade B cops and robbers movie circa 1950, the villain tiptoed up to a woman lying in bed and unloaded a pistol into her skull. It turned out, however, that the trip was wasted: The lady in bed wasn't his intended victim. Moreover, she was already dead. He had been pumping those bullets into a corpse.

> It was a case of overkill on a mistaken target, and the villain pleaded innocent of a crime on the grounds that you can't murder a dead person.

> Today, the nation's monetary authorities also are attempting overkill on an inappropriate target, but they may not be able to hang their defense on some legal sophistry. They may be overkilling the economy into a deep recession.

> That is the opinion of monetarist economists those who believe that the growth of the money supply is the major determinant of the economy's course.

The monetarists-who almost alone predicted this year's horrendous inflation - are nearing a consensus that, once again, the Federal Reserve has applied the brakes too hard too late in a futile attempt to correct a problem which was foreordained many months ago.

The Fed is excessively restricting monetary growth in an attempt to stem today's inflation - but today's inflation was caused by excessive monetary growth last year, say the monetarists. In tightening the spigot too severely, the Fed will bring on the worst of two worlds - a recession accompanied by high inflation. If the misguided overkill continues, we conceivably could suffer double-digit inflation and double-digit unemployment at the same time, say some of the monetarists.

It's a question of varying time lags, say the monetarists. A given policy response - be it tight money or easy money - will affect economic growth in six to nine months and prices in 18 to 24 months. Thus, the post-November restrictive posture will cause a recession later this year, but it will not start hosing down inflation significantly until next year.

And if history is any guide, say the monetarists sorrowfully, the Fed will overreact again during the recession - providing excessively easy money to combat the recession, which will have been set in concrete many months earlier.

According to figures released by the Federal-Reserve Bank of St. Louis, money growth in the last five months has slowed drastically - representing the sharpest deceleration of recent history. M1, or cash plus checking deposits, soared at an 8 percent annual rate from April through November of last year and since then has dropped by 1.6 percent at an annual rate.

Similarly, demand deposits, after growing by 7.3 percent from April through November, have plummeted by 5.3 percent. The adjusted monetary base (member bank reserves at Federal Reserve banks plus currency in circulation, adjusted by the St. Louis Fed for reserve ratio changes) has grown by 5.5 percent in the last five months after growing by 9.8 percent in the previous seven months.

"That's the sharpest cutback in monetary growth I can remember, going back to times such as 1959, when people didn't know any better. It's faster. deceleration than we had leading up to the 1973-1975 recession. Yet (Treasury Secretary Michael) Blumenthal wants the Fed to tighten even more. It's idiotic," said Professor A. James Meigs of the **Claremont Economics Institute at Claremont Men's**

College, Pomona, Calif.

"From here, any further tightening would be economic suicide," said Jeffrey Nichols of Wall Street's Argus Research Corp.

"In the last 100 years, the degree of severity of a recession has been directly related to the degree of monetary restraint prior to it.

"And the monetary restraint since last fall already has been sufficient to cause a downturn or recession," said Nichols, who foresees three quarters of recession beginning fairly soon, with real (inflation adjusted) economic growth declining by 2.5 percent while inflation averages 9.5 percent this year, falling off in late 1979 and early 1980

Tennessee doesn't honor ex-president

By DENNIS MONTGOMERY

NASHVILLE, Tenn. (AP)-"You Remember Tennesse Johnson.

That's what Hollywood called the movie it made about him. Maybe you know him better by the name President Andrew Johnson. Well, he's not forgotten down home either, but his memory is not what you'd call universally revered.

Apart from the U.S. Park Service's preservation of his Greeneville house, business, grave and monument, there isn't a lot in these parts to bring him to mind.

Johnson, a Democrat, was elected to the White House by a majority of one — John Wilkes Booth. In 1868 he became the only president to be impeached, escaping conviction by but a vote. Departing from Washington in 1869, he didn't return until 1875, when he became a senator. He died that same year.

You may suspect Johnson's service to the Union caused some resentment on the home front. He was impeached as much for Southern sympathies as anything else, but you'd be right.

So the state Capitol boasts marbles and bronzes of President Andrew Jackson, Ku Kluxer Nathan Bedford Forrest, Boy Hero of the Confederacy Sam Davis, Secretary of State Cordell Hull, Pvt. Alvin York, Admiral David Farragut, Sen. Ed Carmack and Albert Gleaves. And statehouse tourists may pay respects to President James K. Polk's remains. The names of state office buildings echo the praises of others, but the only reminder of Johnson is an 1870s portrait hanging near the Capitol information desk.

An English earl, a German baron, a French marguis and a Cherokee chief made the roll of Tennessee's 95 counties. As it happens, Union County was so named in 1850 for its non-secessionist sympathies. Washington, Jefferson, Madison, Monroe-Virginians all - Van Buren of New York and Tennesseans Jackson and Polk are on the list. And Jackson, father of the spoils system, is attended by a platoon of Army pals - Coffee, Dyer, Lauderdale, Gibson, Shelby

There are nearly four-score heroes from various wars among the 95 - including a rank of New Englanders - but no Andrew Johnson, the man who presided over the peace concluded at Appomattox.

Oh, there is a Johnson County. But that's Thomas ULES Johnson, one of the early settlers of the Doe River. And there's a Johnson City - after Henry Johnson, a storekeeper there when the railroad came through. 5/8/79
