Critics vow to defeat or change SALT treaty

WASHINGTON (AP) - Senate critics of a new treaty to cap the arms race are vowing to change or reject it despite President Carter's plea for ratification to diminish "the shadow of nuclear war."

The strategic arms limitation treaty with the Soviet Union is expected to produce the most searching national security debate since the end of World War II. The outcome is far from sure.

SALT II is being denounced by foes as an unequitable and unverifiable pact that will give the Soviet Union a definite advantage in long-range missiles and bombers and a chance of winning a nuclear

war with the United States. "I have a strong feeling the treaty is likely to be amended or returned for further negotiations," Senate Republican leader Howard H. Baker said Wednesday after Secretary of State Cyrus Vance and Defense Secretary Harold Brown announced that all obstacles to reaching agreement had been re-

Treaty supporters follow the lead of President Carter, who told an audience of Democrats Wednesday night the treaty is "an important step toward greater American security and world peace."

"A SALT treaty will lessen the danger of nuclear destruction while safeguarding our military security in a more stable, predictable and peaceful world, Carter said. "Peace will never be fully secure as long as the shadow of nuclear war hangs over the

The treaty, its text still not released, is the work of nearly seven years of complex negotiations by the administrations of three U.S. presidents.

It is intended as a step to limit the speed of the arms race while laying a cornerstone for significant weapon reductions in a SALT III treaty to be negotiated some time in the future.

The treaty sets a limit of 2,250 on the mix of intercontinental ballistic missiles and bombers Russia and the United States each can have through

Thus the Soviets, who now have about 2,500 launchers, will have to cut back. The United States is about 100 under the limit and will be permitted to build up

The treaty also places restraints on some types of qualitative changes such as the number of warheads per missile. But it does not attempt to curb others such as improvements on the accuracy of existing

missile-guidance systems. Treaty opponents contend the pact permits the Soviets to best the United States in the armaments of nuclear war, that it fails to tackle the possibility that by the mid-1980s a Soviet first strike could destroy the U.S. land-based missile force and that Soviet compliance with the treaty terms cannot be

The Senate will dissect these issues in months of hearings and debate in an effort to find the 67 senators needed to ratify the treaty or the 34 needed

to kill it. One knowledgeable senator says he believes no more than 25 senators have made up their minds. The process begins against the background of an

Associated Press-NBC poll which shows 68 per cent of Americans responding favor "a new agreement between the United States and Russia which would limit nuclear weapons.

Sen. Bob Dole, R-Kan., who will soon announce his candidacy for the Republican presidential nomination, took note of these figures in telling reporters recently that GOP presidential contenders should think twice before coming out strongly against

He told the Senate Wednesday that to mix SALT with partisan politics would be a self-defeating process "with one side portrayed as war mongers, the other as sell-out artists.

Baker, one of the keys to ratification, told reporters after he talked with Carter Wednesday, "I really do not want to vote against the treaty but I have serious misgivings. He noted he supported the first SALT agreement and said he favors continuing negotiations.

Several senators mentioned the post-World War I debate in which the Senate refused to permit the United States to join the League of Nations. Baker and Dole sid President Woodrow Wilson lost that fight because he and key senators refused to compro-

SALT II also has its ardent defenders. Sen. Edward M. Kennedy, who disagrees sharply with Carter on some issues, said, "I pledge that I will do everything in my power to ensure the earliest possible ratification of the treaty. There is no more important contribution we can make to nuclear arms control and the prevention of nuclear war than

the ratification of this treaty." The timing of Senate consideration of the pact depends on how quickly Soviet and American negotiators at Geneva can polish the text and prepare translations on which both sides agree. The process is expected to take two or three weeks.

The only remaining issue is the selection of a place and time for a summit meeting between Carter and Soviet President Leonid Brezhnev, and Carter said Wednesday night that decision would be announced later this week. Brezhnev is ailing and the Soviets reportedly have asked for a site that can be reached by train. Reported possibilities are Helsinki, Vienna

Secretary of State Cyrus Vance, right, meets with Soviet Ambassador Anatoly Dobrynin after the announcement of the U.S.-Soviet agreement limiting strategic arms. (AP Laserphoto)

SALT II Treaty Summary

WASHINGTON (AP) - Here is a brief summation of the proposed SALT II treaty, based on briefings by the Carter administration

Duration: The treaty runs through 1985, with a protocol that will expire at

Limits: Each side would be limited initially to a total of 2,400 strategic

missiles and bombers. The overall limit would drop to 2,250 in 1981. Within those limits are sub-ceilings: no more than 820 land-based missiles with multiple warheads (MIRVs); no more than 1,200 land and sea-based MIRVs and no more than 1,320 total MIRVs and bombers equipped with cruise

Arms reductions: The Soviets would, by the end of 1981, have to destroy some 270 aging missiles, according to American estimates. They would also not be allowed to deploy the SS-16, a mobile missile they have tested with States might have to destroy currently in mothballs in 1984 or 1985, depending on when its new Trident submarines are deployed.

New weapons allowed: The two sides would each be allowed to equip their bombers with new cruise missiles, and to develop one new land-based missile. After 1981, it could be a mobile missile. Each would be allowed to develop as many new types of submarine-based missiles as it could. In addition, each side would be able to substantially increase the number of warheads it deploys: from 8,500 to more than 12,000 for the United States and from 4,000 to more than 8,000 for the Soviets.

And the Soviet Backfire bomber would not count against the strategic limits. It would be dealt with in a side letter from Presient Leonid Brezhnev.

Carter appeals to public for support of SALT II

Carter appealed today for public support of the new arms limitation treaty with the Soviet Union, arguing that its rejection by the Senate would be "a massive, destructive blow to world

Addressing a White House break fast for retailers, Carter said that if the Senate does not ratify the pact, "we would be looked upon as the warmonger" and would suffer a seri-

ous loss of trust among NATO allies. The president, asking for individual support by the representatives of the American Retail Federation, also said a Senate turn-down would undermine his efforts to halt the spread of nuclear weapons.

Emphasizing the list was incom-plete, he cited as potential nuclear powers such nations as Brazil, Argentina, Pakistan, South Korea, India,

Taiwan and South Africa. "If we show now that we reject this mutually advantageous voluntary restraint on our own nuclear weaponry, and initiate the prospect of a massive nuclear arms race, those countries ... would feel that there was no longer any constraint on them," Carter de-

He asked his audience "to help me sell to the American people and directly to the U.S. Senate the advantages of ratification, and the devastating disadvantages" if the treaty is rejected. 'I think the most important single

achievement that could possibly take place during my lifetime for our nation is the ratification of the SALT treaty," said Carter.

Rejection of this treaty, now that it has been negotiated ... would be a massive, destructive blow toworld peace.

Sice the dawn of the atomic age, the president said, the United States "has taken the lead to put constraints on the evolution of nuclear weaponry.

All such efforts, starting with those of President Dwight D. Eisenhower, would be in danger if we now reject this treaty," he continued.

At another point, Carter argued that rejection would cause NATO allies to "be severely shaken in their confidence in us, as a nation determined to have detente with the Soviet Union and not to initiate a nuclear conflict, whose effects would first fall

Rain, some hail dumped on Basin By BILL MODISETT

Staff Writer

A late spring storm moved over Midland around midnight today and dropped a taste of rain, along with some hail on the city and the surrounding area.

While most of the city reported light rain and, in some instances, pea-sized hail, the northern tip of Midland was battered by hail as large as golf balls, according to an insurance agent and residents in Saddle Club North.

vice at Midland Regional Airport recorded only .06 inch of rain, several points around Midland reported nearly an inch of the welcome moisture. Rain reports indicated between .5 and .8 of an inch of precipitation in one form or another fell in the northern part of Midland. The heaviest hailstorm apparently occurred east and north of the city.

Residents in Saddle Club North reported windows and skylights broken out by the golfball-sized hail. People at Midland Country Club also reported damage to their cars from the

unusually large hail. About .8 of an inch fell in northwest Midland with north Midland getting .53 of an inch. Hail, both hard and mushy, ranged in size from peas to

marbles throughout the rest of Mid-

On the other end of the spectrum. the Greenwood community 10 miles east of Midland reported a sprinkle of rainfall, as did Warfield to the southwest. Valley View, southeast of Midland, reported no rain at all

Westview Estates, located north of the airport, reported rain ranging from .25 to .5 of an inch and some hard

In the counties surrounding Midland, little rain and scattered small hail fell, reports indicated. Gardendale, north of Odessa, reported small hail and light rainfall.

Lamesa, Stanton, Rankin, Big Lake and Garden City reported receiving showers and .3 of an inch, with small hail also recorded in Big Spring. Lamesa received about .2 inch of rain.

Today's rain may have been only a preview of more to come, according to the weatherman, as there is a chance more could fall in the Midland area again tonight and Friday.

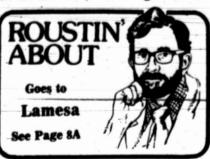

National Weather Service forecasters are calling for a 20 percent probability of showers beginning tonight. Temperatures should be more

pleasant than the 90 degree readings the last few days, forecasters say, with the low tonight expected to dip into the lower 50s and Friday's high to climb only into the lower 70s.

Feds 'just starting' war on firms not complying

WASHINGTON (AP) - The Council on Wage and Price Stability is "just starting" its assault on companies it claims do not comply with the Carter administration's anti-inflation guidelines, a council spokes-

"We fully expect to start identifying more companies publicly," the spokesman, who asked not to be identified, said Wednesday after the council for the first time charged a firm

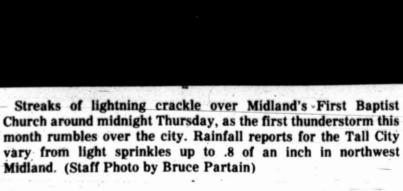

Ideal Basic Industries - one of the nation's largest cement producers, with sales of \$410 million in 1978 strongly denied the council's claim and vowed to appeal immediately.

The council declined to provide detailed price information about Ideal, saying such data is proprietary.

The company could be prohibited from bidding on government contracts if it loses its appeal. The council believes it is "on firm ground" contesting Ideal, the government spokesman said.

The administration has come under fire recently for failing to name names. In late April, Alfred E. Kahn, council chairman, cited 22 major corporations - with annual sales of at least \$250 million — as being in violation of the voluntary guidelines, but refused to identify them, saying they could still be eligible for exceptions.

Contingency gas shortage plan

Clements says rationing won't be included

AUSTIN, Texas (AP) - Gov. Bill Clements said Wednesday his staff is working on a contingency plan to move gasoline to shortage-afflicted areas if supplies become scarce as in California.

The plan will not include rationing, he stressed.

'We're not prepared to develop a rationing plan. I'm not sure how to approach that. And it's not in our jurisdiction," he said. "That's Mr. Carter's problem, and I'm glad to leave it in his hands."

Clements told reporters, "We're

talking in terms of a calculated and planned distribution system. I don't want anyone to think that we in Texas are going to institute a rationing plan

The governor said his stff is working on a plan "to move supplies from one part of the state to another. It would be a planned approach to shortages that may turn up on a spot

He said he was watching develop ments in California with interest. Gov. Jerry Browp ordered a plan that allows motorists to buy gasoline on odd or even days depending on their license plate number.

The governor has authority to allocate limited supplies of fuel to areas with scarce supplies.

Gas shortages in Texas have been spotty so far, Clements said, and caused mainly by decreases of between 15 percent to 30 percent in retail supplies.

"Some of the shortages have been brought about by changes in traffic patterns, but most of it is because of

decreased supplies to retailers," he

Clements said his staff is not working on a deadline and has not formulated the plan's details.

Edward O. Vetter, the governor's chief energy adviser, heads the group studying the proposal. Other members of the governor's energy office and energy advisory council are involved, Clements added.

"It's not a simple problem," he said. "We're considering everything. We're going to try to solve the prob-

Extended forecasts

Saturday through Monday

West Texas: Pair and cooler Saturday. Warming trend Sunday through Monday. Widely scattered thunder-storms possible east of mountains Monday. Highs mid 60s north to low 80s south Saturday warming into the 70s north and 80s south Monday. Lows near 10 north to upper 30s south Saturday warming to near 30 north and mid 60s south Monday.

South Texas: Generally fair and cool Saturday and Sunday increasing cloudiness a little warmer Monday with a chance of showers. Lows Saturday and Sunday upper 36s north ... mid 60s interior and southeast to low 70s south ... highs in the low to mid 80s south ... lows Monday morning in the upper 60s to mid 70s south and highs in the mid 80s to mid 90s southwest.

City Council sails through light agenda of minor items

Midland City Council breezed effortlessly through a light agenda Wednesday, dealing unanimously for the most part - with a small retinue of minor items.

The only real question of the day was whether the council would produce a quorum. However, Gordon Marcum II arrived 15 minutes late to rescue the council, enabling the group to transact its business.

Mayor Ernest Angelo Jr. and councilman Carroll Thomas were absent. The only item of conflict came on a request by Midland Community

Theatre for a special use permit per-mitting the sale of beer and wine for on-premise consumption at the old American Legion Hall downtown.

John Tyler, a spokesman for the theater, said the Summer Mummer productions will be in the facility, which is owned by the county

Speaking in opposition to the permit was William B. Smith, owner of a parking lot across the alley from the

Smith said he had no objections to the sale of alcoholic beverages there, but he opposed the permit "because of inadequate garbage disposal."

The four dumpsters in the area are inadequate for the large amount of trash produced in the block already. And one of them, he added, still overflows despite having a hole in the bottom where the trash can

"We've got a real problem down there," he concluded.

The council agreed to produce more dumpsters, and voted 3 to 1 to grant the permit, with G. Thane Akins vot-

ing in opposition. The council also tackled the problem of parking for handicapped persons in approving a request from the telephone company for a parking zone of this type in the 400 block of West Missouri Avenue.

The governing body instructed the city staff to draw up an ordinance pertaining to facilities for handicapped persons.

Council also authorized execution of a contract with Parkhill, Smith and Cooper Inc. for engineering services ed to construct an access road to Midland Regional Airport, connecting

the facility with FM 1788. In other action, the council dealt with zoning changes, authorized payments and made appointments.

Strike could decide fate of guidelines

By The Associated Press

The United Rubber Workers, Uniroyal Inc. and the federal government are digging in for a potentially long and bitter strike that could determine the fate of President Carter's anti-inflation guidelines.

"I think it's going to be a long strike," an administration official vetured Wednsday after 8,200 rubber workers struck 12 of the tire maker's plants in a contract dispute snagged on the guidelines.

'We've got three parties with differing pressures mounting on them, and it's a question as to who blinks first," said the official, who declined to be named.

The strike represents the most dramatic labor showdown to date over Carter's 61/2-month-old voluntary anti-inflation program, which seeks to hold annual wage and fringe benefit increases to 7 percent a year.

'Hey, Carter, we can't live on peanuts," read one picket sign outside a Uniroyal tire plant in Detroit, where workers walked off the job Wednesday in observance of a noon strike

Rubber workers averaged \$8 an hour under the old contract.

URW President Peter Bommarito, who has dubbed the walkout "Carter's strike," says a 7 percent raise is inadequate for his members in the face of double-digit inflation. Uniroyal, the nation's No. 3 tire

maker, has pledged to comply with the guidelines. Carter's inflation advisers have leaned heavily on the company to stay

within the president's program, even if it means taking a long strike. The administration also has ruled out for the time being any further stretching of the guidelines as a concession to the rubber workers.

One official said the government "got pasted" in public last month when it bent the guidelines to let the powerful Teamsters union win contract increases of about 9 percent a year. "I can't see us doing it again because of that (negative publicity)," said the official, who asked not to be named

He added, however, that if there is a lengthy walkout and inflation remains high, the government will face increasing pressure to modify what would be viewed as an "unreasonable" wage standard.

No new talks were scheduled after discussions ended Tuesday, and federal mediators had no plans to call the parties together again this week.

The dispute has been complicated by a union contention that it had reached tentative agreement with Uniroyal last month on new economic terms that would have broken

Interoffice memos may tell tale for Talmadge

WASHINGTON (AP) - Three interoffice memos are playing an increasingly important role as the Senate Ethics Committee delves into Sen. Herman Talmadge's financial affairs.

The memos, all written in 1974, appear to indicate that more than one person in the office of the Georgia Democrat had knowledge of key financial transactions, which the committee is trying to-trace.

One memo appears to indicate Talmadge knew \$550 in campaign contributions were not going to be reported. Another indicates Talmadge was receiving money through Daniel Minchew, his top aide from 1971 through 1974. And a third indicates the senator's financial secretary, Allyne Tisdale, knew of a \$2,000 campaign contribution that went into a secret ac-

Mrs. Tisdale has denied under oath that she wrote the memos, which bear her initials.

Minchew, who gave the memos to the committee, has passed three separate polygraph tests on the issue. In one private test, he was judged to be answering truthfully when he said he worked with Mrs. Tisdale to convert campaign contributions to cash for Talmadge. In the other two tests one private and one administered by the FBI - he was judged to be truthful when he said he did not fabricate the memos or forge Mrs. Tisdale's

The memos came up again Wednesday when Earl Leonard, a vice president for public affairs of Coca-Cola in Atlanta, denied that he gave Talmadge \$500 in donations from "various Coca-Cola" sources, as one memo stated.

A cash donation of that size would have been illegal in 1974, according to committee attorneys.

Leonard said he was in Manchester, N.H., on Aug. 6, 1974, the date found

on one of the memos that dealt with his alleged contribution. He said he did not know why his name might be on the memo.

Minchew, who is Talmadge's chief accuser in the committee proceedings, came under sharp attack Wednesday from two Talmadge contributors, both of whom said his sworn testimony about their contributions was wrong.

Minchew's credibility is a key issue in the hearings. He has alleged he set up a secret bank account to convert campaign contributions and over-reimbursements of Senate expenses to cash for the senator's benefit:

Talmadge has denied any knowledge of the account and says Minchew is a "liar, cheat and embezzler."

H.P. Williams, a long-time contributor and backer of Talmadge, told the committee he never gave cash to Talmadge - as Minchew has alleged - and that all his contributions were by check He said anyone who says Williams gave cash contributions is lying.

Robert Schramm, a former Talmadge staffer who now is a lobbyist, testified he arranged for delivery of a campaign contribution of \$2,000 in 1974 to Talmadge. But he denied that he ever told Minchew he had delivered the money to Talmadge, a conversation Minchew has sworn did occur. Both contributions ended up in the secret account.

The committee must decide whether Talmadge knew that campaign contributions were being diverted or that his Senate expenses were being

If the committee decides evidence supports the five allegations it filed against Talmadge, it can recommend censure, expulsion or other action, such as stripping Talmadge of his chairmanship of the Senate Agriculture Committee.

The full Senate would decide what punishment, if any, to administer.

Silkwood family seeks more money

to be retried OKLAHOMA CITY (AP) - The testimony has ended in the Karen Silkwood plutonium contamination suit, and now lawyers for Miss Silkwood's family are trying to increase FORT WORTH, Texas (AP) the amount of money at stake before Millionaire Cullen Davis will the case goes to the jury. be retried on murder conspiracy

A motion to increase the damages they are seeking from \$11.5 million to \$71.5 million was to be the subject of a meeting today between U.S. District Judge Frank G. Theis of Wichita, Kan., and lawyers in the case. The jurors have been told to report

Monday to hear closing arguments, and Theis said they probably will get the case Tuesday afternoon. The defense rested its case Wednes-

day, after nine weeks of testimony from 24 witnesses. Rebuttal was

The case centers on a claim by Miss Silkwood's survivors that she become contaminated with plutonium as a result of negligence by the Kerr-McGee Corp., for which she worked as a nuclear fuel plant lab technician. The company claims she contaminated herself, perhaps while spiking her urine samples in an effort to dramatize her criticisms of company safety procedures

Miss Silkwood died in a Nov. 13, 1974 car crash, while en route to meet a New York Times reporter and an Atomic Workers Union official. She had been asked by national

union officers to gather documentation to support her claims that Kerr-McGee was falsifying regorts on fuel fuel rods were passing inspection, and at the trial several witnesses testified she told them she had gotten the documentation. It was not found after the accident, however. Scientists called by the Silkwood

rod quality control. She had claimed

she could prove that unsafely welded

estate testified during the trial that one one-millionth of a gram of plutonium, an amount about the size of a pollen grain, can cause cancer.

On the other hand, Kerr-McGee defense witnesses testified that Miss Silkwood would have suffered no significant health effects from her exposure to three ten-thousandths of a gram of the radioactive fuel, the amount which the company estimated was found in her apartment.

FDA says men who use saccharin are twice as likely to get cancer

WASHINGTON (AP) — The U.S. Food and Drug commissioner says new research indicates men who consume saccharin are twice as likely to get bladder cancer as those who do not. But the author of the study says that conclusion is premature.

The controversy arose as FDA Commissioner Donald Kennedy revealed preliminary details of a new saccharin report to a Senate healthsubcommittee Wednesday.

Kennedy said if such a link is proved in Dr. Ernst Wynder's study, it would mean two of the three major studies on saccharin show an association between the sugar substitute and bladder cancer in men:

Two years ago, Wynder, president of the American Health Foundation in New York, released a study in which he said there was no link between saccharin and bladder cancer in. But Kennedy said Wynder since

then made "changes in his design study," and the new research "appears to support the hypothesis of the association between saccharin and bladder cancer in males." The Midland Reporter-Telegram

Deng warns about SALT

PEKING (AP) - China's senior vice premier warned the United States today against putting too much faith in the SALT agreement, declaring it won't curb the Kremlin's drive for conquest. He also reserved China's "right" to invade Vietnam again.

"We are not against this agreement, not against the negotiations, but we think you should not put your trust blindly in such agreement. Not only this, but all other agreements will not serve to restrain the expansionism of the Soviet Union," Deng Xiaoping (Teng Hsaio-ping) told reporters after meeting with Commerce Secretary Juanita Kreps.

The Washington correspondent for China's Xinhua (Hsinhua) news agency also warned against trusting the Russians, with whom the Chinese have been battling for years over ideology and borders.

Carter meets with Royo

WASHINGTON (AP) — President Carter is turning his attention to the Panama Canal treaties, an issue still very much alive even though a year has passed since the Senate ratified them.

Carter was meeting with Panamanian President Aristides Royo today to discuss proposals in the House of Representatives which, according to the administration, would violate the letter and spirit of

Royo, who arrived here from Paris Wednesday night on a two-day private visit, is hoping for a smooth transition when the United States and Panama undertake joint management of the canal Oct.

Belgians tighten security

BRUSSELS, Belgium (AP) — Belgium tightened security today after Black September Palestinian guerrillas demanded the release of two Arabs held in a Brussels jail for an airport attack last month that injured 16 persons.

'We're taking this thing seriously," a Foreign Ministry spokesman said, "and have stepped up our security measures accordingly." He refused to elab-

Black September, the terror group that killed 11 Israeli sportsmen at the Munich Olympics in 1972, sent a communique to a news agency in Paris Wednesday night warned it would have to "use methods that could harm Belgian interests" if the two Arabs were not freed

Cambodians enter Thailand

BANGKOK, Thailand (AP) - Nearly 8,000 Cambodian civilians and troops from former Premier Pol Pot's army poured into Thailand at two border points today and Wednesday, reporters at the border reported. Some were wounded or ill after long marches and battles with Vietnamese-led forces in Cambo

About 5,000 soldiers and civilians entered And Parai village today, and the soldiers surrendered their weapons to Thai authorities. In 1977, troops from Pol Pot's army invaded the village and killed 29 villagers, most of them women and children.

Nicaraguan troops kill youth

MANAGUA, Nicaragua (AP) - A 15-yéar-old boy was killed in a Managua suburb when he tried to run from national guard troops who suspected him of terrorist activities, witnesses said.

Juan Pablo Garcia Quintero was carrying drinking water in a bucket from a communal faucet Wednesday when a gang of toughs attempted to take it from him, they said. A patrol intervened and one trooper -said "you are one of those who throw bombs.

One of the students wounded in the Tuesday shooting in

Three accept safe conduct

SAN SALVADOR, El Salvador (AP) - Three slipped out a side door to a waiting car and anti-government militants who took over the Costa escaped unharmed on Monday. safe conduct pass to Costa Rica, officials said.

militants were en route by plane to San Jose, the officials. Costa Rican capital, and were accompanied by a Costa Rican security official.

agent flew to San Salvador on Wednesday to "bring opened fire. the three guerrillas to Costa Rica, guaranteeing their lives.

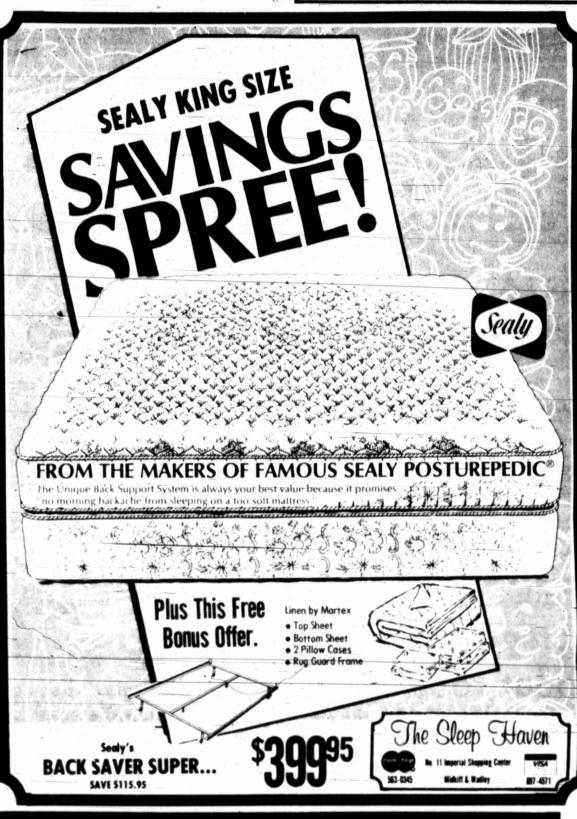

The militants, members of the leftist Popular Revolutionary Bloc, seized the embassy with pistols and machetes Friday while 16 comrades took over the French Embassy, where they continued to hold six hostages, including the ambassador.

The Cost Rican Embassy had been closely guardedne the ambassador and four female hostages

Rican Embassy and held five hostages here over the Members of the bloc also seized the Metropolitan weekend gave up late Wednesday and accepted a Cathedral, where police fired on a demonstration of bloc sympathizers on Tuesday. Nineteen persons One Costa Rican government source said the were killed in the shooting, according to Red Cross

Late Wednesday, Red Cross workers entered San Salvador's blood-stained Metropolitan Cathedral to Costa Rican officials in San Jose said a security retrieve the bodies of 17 of those killed when police

Novel said used in seduction

LONDON (AP) - Politician Jeremy Thorpe used "Giovanni's Room," the homosexual novel by black American writer James Baldwin, in his seduction of male model Norman Scott. prosecutor Peter Taylor said as he opened his murder conspiracy case against the former leader of Britain's Liberal Party and three co-defendants.

Taylor in his opening statement Wednesday said the seduction oc curred on Nov. 8, 1961, when Thorpe was a 32year-old member of the House of Commons, Scott was 21, and both were

bachelors. He said Thorpe took the younger man to his mother's home, gave him the Baldwin novel and later returned to Scott's room.

"He told him not to be frightened or to worry," Taylor related. "He said he looked like a frightened rabbit. Mr. Thorpe put his arms around him, made advances, and homosexual relations took place between them.

Taylor said the relationship continued, and Scott became a "continuing danger" to Thorpe's reputation and career.

"It was a danger of which Mr. Thorpe wasconstantly reminded by Scott pestering him for help and talking of the relationship with

others," Taylor went on.
"In 1967, Mr. Thorpe
was elected leader of the Liberal Party, but the higher he climbed on the political ladder, the greater was the threat to his ambitions from Scott. His anxiety became ar obsession and his

Thorpe, now 50, has re-peatedly denied the alle. gation of homosexualty.

Demos mulling convention sites

WASHINGTON (AP) - With the field narrowed to Dallas, Detroit, New York and Philadelphia, the Democrats are listening to formal presentations from the four cities bidding to play host to the 1980 Democratic National Convention

The site selection committee already has received written bids from each city and is to pick two finalists Friday after hearing live presentations today.

The committee will visit the two final cities before naming the convention site June 28.

The four semifinalists are the survivors from more than a score invited to bid for the meeting, which is considered to be worth millions of dollars

in business to the winner. Detroit already has been selected as the site of the Republicans' next presidential convention, winning a hotly contested fight with Dallas. The GOP meeting is scheduled for July 14,

The Democrats are tentatively considering starting dates of Aug. 4 or Aug. 11, but executives from all three television networks testified Wednesday that they could not set up for

convention coverage before Aug. 11. Detroit Mayor Coleman Young, who also is a co-chairman of the Democratic National Committee, has been lobbying heavily for his party's convention to match the Republican

Dallas also is considered a strong bidder because of its convention facilities and southern location.

New York was host for the 1976 convention which nominated Jimmy Carter for the presidency he later won and may, therefore, have a sentimen-

national convention in 1948 when both parties met there, the Democrats nominating Harry S. Truman and the Republicans Thomas E. Dewey.

Philadelphia last played host to a

Neither Detroit nor Dallas has ever had a major party convention, but Texas had one in Houston in 1928 when the Democrats nominated Alfred E. Smith.

One of the biggest problems in placing the Democratic convention is its

size, probably the largest in the coun-

try. The party wants 18,000 to 20,000 guranteed hotel rooms and a convention hall which seats at least 5,600.

The Republicans, by contrast, need only 12,000 to 15,000 rooms and convention seats for about 4,400.

Delco favors arts in school

AUSTIN, Texas (AP) — Rep. Wilhelmina Delco, D-Austin, said Tuesday she is not trying to take fine arts instruction out of public schools.

Mrs. Delco is sponsoring legislation that would repeal all existing statutory curriculum requirements and would require students to spend a certain percentage of time in basic skills courses.

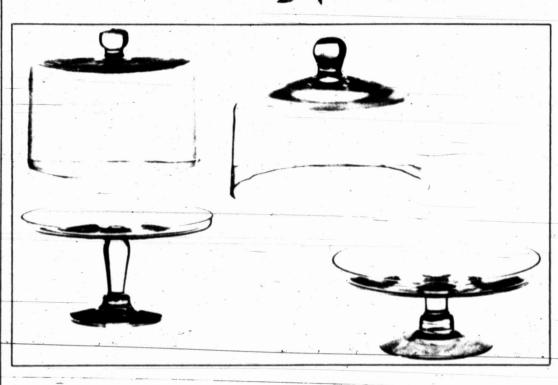

"Recently, supporters of fine arts instruction in the public schools have expressed concern," Mrs. Delco said in a prepared statement. "While effectively pointing out the need to consider fine arts as a basic educational need of our children, these expres-

sions indicate a misunderstanding of the bill."

The House passed her bill May 1 but it is now stalled in the Senate Education Committee with no hearings

scheduled. The sponsor said she would offer an amendment for Senate consideration that would include fine arts among the list of basic skills courses a school district must offer.

The measure is aimed at making school districts teach the 3 R's in a more organized way, said Mrs. Delco's research assistant B.J. Landers.

NEW YORK (AP) — The stock market meandered slightly higher today after veering between the plus and minus columns for most of the day. The Dow Jones average of 30 industrial issues closed at 838.62, up 3.73.

The increase, most of which came in the final two hours, was similar to Tuesday's session, when the market staged a late comeback to finish higher.

Stock

Today, it opened like it was going to continue that trend, but then faltered.

"It tried to follow through with yesterday's rally, it wasn't able to, a little selling began, and then it started to rally again," said Newton D. Zinder, an analyst at E.F. Hutton & Co.

Analysts attributed the market's confusion to investors on one side who are buying at the lows many stocks hit in the Dow's 24point slide Friday and Monday, and, on the other side. traders worried about inflation and the gasoline short-

Advances outnumbered declines by a 3-2 spread on the New York Stock Exchange.

Big Board volume came to 27.67 million shares against 32.72 million in the previous

The NYSE's composite common-stock index rose .17 to 55.96.

At the American Stock Exchange, the market value index rose 1.35 to 177.01.

BUSINESS MIRROR Regulations said stifling nation's housing program

By JOHN CUNNIFF **AP Business Analyst**

NEW YORK (AP) — The main obstacle to a person acquiring his or her own home isn't the \$52,000 median price or the 20 percent down payment or the 10.5 percent mortgage rate, said the real estate

He conceded these to be formidable challenges, especially to the first-time buyer. But what worries him more, Donald Hovde indicated, was America's 'pervasive anti-housing philosophy

America against home ownership? How could it be? Between 1940 and 1960, the percentage of owneroccupied homes rose to 61.9 percent from 43.6 percent. By 1975, it reached 64.6 percent. It's probably 67

percent now. America is the landscape where brand-new single family dwellings rise each spring as surely as the dogwood blooms, where you can take 30 years to pay, where middle-class people can even own two

America is where only two states. Hawaii and New York, showed more renters than homeowners in the 1970 census. It's where more than 5 million new and used, single-family homes were bought (sold) last

Could Donald Hovde be correct? He has credentials. Hovde, a Madison, Wis., investor, is president this year of the National Association of Realtors,

America's largest business organization. He seems to have some evidence too. Even before taking office, Hovde was red hot about restrictions thrown in the way of homebuilding. Ordinances, regulations, limitations - imposed by those who

already own. 'It's pervasive," he says. "It runs through all levels of government." And then this blast: "There

is selfishness today in towns and communities that say 'build elsewhere. And how do towns do it? Through building morato riums, through overly restrictive environmental

controls, hoary building codes, harassment of developers through duplicative reviews and needless paperwork... Regulations that stifle production of housing add 20 percent to costs, said Hovde. He did not say how he

arrived at that figure, but building suppliers and contractors sometimes have cited comparable esti-This, he continues, puts housing beyond the ability

of many families, and forces other families to rely on two paychecks to meet payments, which sometimes consume more than 35 percent of total income.

As viewed by Hovde, a developer, the situation is a national danger. As viewed by many of the 700,000 Realtors, it's a situation that lowers their incomes, made up mainly of commissions on sales.

But in the view of those who own America's 55 million single-family dwellings, valued at \$2.2 trillion or about one-fourth the entire wealth of the

nation, the picture assumes a different hue and To them, new housing often means a strain on water and sewer capacity, and on schools and other municipal properties. A town's environment can be

permanently changed, with traffic replacing pasto-Whatever the changes, say existing homeowners, they often mean higher taxes. And sometimes, resi-

dents complain, in a slowing of in the rate of price appreciation; even worse, the threat of actual price Being first has always been recognized as confer-

ring certain benefits and privileges, but is one of them the right to exclude others? You may test your cool judgment by answering that without even a trace of bias.

To Hovde, the issues are not limited to individual builder, buyer or resident rights. He sees the conflict as one involving America totally — what it means, what it stands for, what it symbolizes.

"We are no longer free to choose where we want to live," he states.

Speaking last month to the Flordia Association of Realtors, Hovde said "Our governments, our nation's towns and villages, are killing the American dream through over-regulation and no-growth legis-

That is one side of the debate, a debate that won't easily if ever be resolved.

You don't need a loudspeaker to hear the respons from the other side, from what is sometimes called the grass roots, the nation's towns and villages: 'Killing it? Why, we're the ones preserving it.'

Eckhardt assails Carter's oil plan

WASHINGTON (AP) - President Carter's plan to deregulate crude oil prices is "ill advised and untimely" when energy costs are playing an increasingly alarming role in inflation, says a Texas congressman.

U.S. Rep. Bob Eckhardt, whose district includes the giant petrochemical complexes in and near Houston, said Tuesday a study completed by his staff shows energy more responsible for inflation so far this year than at any time since the Arab oil

He said rising energy prices since the 1973-74 embargo "were part of inflation, but they were not an abnormal part of it." "If the president's plan would produce enough

additional oil to greatly reduce our dependence on foreign sources, the high price might be worth paying," Eckhardt said. "Unfortunately, the plan will not do this." The gradual decontrol of oil prices by 1981 will

increase domestic producton by 200,000 barrels per day, he said, while total domestic consumption is 18 million barrels daily. The study showed energy inflation in the first

quarter of this year increased the overall rate of inflation by 1.2 percentage points. In contrast, rising energy prices made up .03 percent of the infation rate during the last half of 1978. The figure for March rose to 1.8 percent

Even in the great inflationary period of July 1973 to July 1974, the direct energy contribution to inflation was 1.4 percentage points," Eckhardt said. "Something very, very alarming has occurred re-

Developments since December pushed the inflation rate for energy to 24.6 percent, he said, compared to an 11.6 percent average boost in all other items on the Consumer Price Index.

"I think the question of inflation and energy prices is a heck of a lot more serious than the president is treating it," Eckhardt said.

The computations for the study were projected to an annual rate.

ANSWER TO PREVIOUS PUZZLE

Company wants to share asbestos disease costs

By ELLEN HUME The Los Angeles Times

WASHINGTON - The Johns-Manville Corp., the nation's largest asbestos manufacturer, said Tuesday that it would be "willing to pay our share, even more than our share" for dealing with asbestos-related diseases and deaths among its workers — but added that the federal government must share the burden.

"We are willing to pay our share, even more than our share, but the government must bear its burden also," Johns-Manville chairman John A. McKinney testified at a hearing of the House Education and Labor subcommittee on labor standards.

"If this government, which speci-

fied the use of asbestos, recommended exposure standards, controlled the majority of the environments in which it was used...if this government then fails to pay its share of a fair, equitable and exclusive compensation system for asbestos-related diseases, then this government and its leaders will have shown themselves to be morally bankrupt," McKinney

He disputed earlier testimony and documents that indicated that the asbestos industry knew its workers were contracting fatal asbestos-related diseases as long ago as 1934.

"This simply is not true," McKinney said. "Asbestosis and lung cancer are two distinct diseases, and the relationship between an excess of

lung cancer and exposure to asbestos remained unknown for many years and was not confirmed until the

McKinney also deried a sworn deposition by Wilbur L. Ruff, a former Johns-Manville plant manager in Pittsburg, Calif., that the company's policy was not to tell workers when signs of disease showed up on their company-provided X-rays. Ruff also said the policy was not to refer those workers to outside physicians.
McKinney said that Johns-Man-

ville's corporate medical director, Dr. Kenneth Smith, issued a directive in 1955 ordering that employees be told when their physical examinations indicated health problems. He said he doubted that company policy

was followed perfectly at all plants, but insisted that many workers were told and were referred to outside

Rep. George Miller, D-Calif., challenged McKinney's statements by referring to a transcript of a July, 1957, meeting of company health officials from Johns-Manville's plant in Man-

The transcript indicated that although some employees were notified of the health problems discovered by company doctors, other employees were not told or were moved to less hazardous jobs for fear of disability petitions.

"I see no reason to bring a man in like this, it is dangerous," said Dr. Smith, the corporate medical director, referring to a 58-year-old employee hired 16 years earlier. Another company doctor, D.T. DuBow, agreed, according to the transcript.

"Now take that (name deleted) woman, she is very nervous," DuBow then said. "If she is called in, she will get hysterical and I am sure you will have a claim on your hands.'

The woman they referred to had not been counseled about her health findings for a year, DuBow said in the-

The physician decided to transfer the woman to a non-dusty area but not to investigate health conditions in her former department, the transcript stated. "Taking her off the job will not change things," DuBow concluded.

"The damage has been done." In another case discussed by the doctors, a 52-year-old shift foreman was not transferred, despite his advanced lung condition, according to the transcript. "Should we change him?" asked one company official. "Won't make any difference," said Smith. "If he hits 65 I will be surprised," DuBow said.

Asked by Miller Tuesday why some workers were not moved when their health deteriorated, McKinney replied, "I'm told with respect to certain individuals that after you diagnose that they have advanced fibrosis, that the best thing they can do therapeutically is to continue work-

Flowing Yoakum discovery finals Hilliard Oil & Gas, Inc., of Midland No. 1-X Webb has been completed as a flowing Woodford discovery in the Brahaney (San Andres oil) area of Yoakum County, and eight wildcat operations have been announced in Permian Basin counties. A discovery also has been completed in Crockett

County. The Yoakum County discovery. four miles southwest of Plains, completed for a 24-hour flowing potential of 432 barrels of 37.4-gravity oil.

The gas-oil ratio is 127-1. Completion was through perforations from 11,367 to 11,372 feet after a 2.000-gallon acid treatment.

Hole was drilled to 11,402 feet and 5.5-inch casing was cemented on bot-

The potential was gauged through a 14/64-inch choke. The following tops were picked on

ground elevation of 3,710 feet: Glorieta, 6,070, Tubb, 7,108; Mississippian lime, 10,808 and the Woodford shale at 11,321 feet.

The strike is surrounded by Brahaney (San Andres) production and 1,650 feet from south and 350 feet from west lines of section 513, block D, J. H. Gibson survey

Lincoln Rock Corp. of Armore, Okla, announced three wildcats in Ward County, one of them a re-entry

The firm's No. 2-31-W Texas State is a 6,500-foot prospector eight miles southwest of Wink and 1.5 miles southeast of of the depleted War-Wink, South (Cherry Canyon) field.

Location is 1,980 feet from north and west lines of section 31, block 17, University Lands survey. It will test for production inthe Rus-

tler dolomite, Bell Canyon and Cherry Canyon

Lincoln Rock No. 1-30 Texas State, another 6,500-foot operation, is nine miles southwest of Wink and two miles southeast of the depleted War-Wink (Cherry Canyon) field.

The drillsite is 660 feet from north and 1.980 feet from east lines of section 32, block 17, University Lands

Lincoln Rock No. 1-17-O University is a re-entry wildcat in Ward County, nine miles southwest of Wink.

Formerly Shell Oil Co. No. 1-17-0 University, a Delaware failure which was plugged in 1960, it is 660 feet from north and west lines of section 32. block 17, University Lands survey.

The proejct will be cleaned out to 5.166 feet. It is on e and three miles southwest of the one-well War-Wink (Delaware) pool.

WINKLER AREA

Lincoln Rock Corp. also announced three wildcats in Winkler County, including a re-entry operation.

The No. 1-30-W Texas Sgtate is 467 feet from north and west lines of section 30, block 17, University Lands survey and one and one-eighth miles east and slightly north of the depleted War-Wink, South (Cherry Canyon) pool. The location is just north of the Ward County line.

Contract depth is 6,500 feet. Tests will be made in the Rustler, Cherry Canyon and Bell Canyon.

Lincoln Park No. 1-31-W Texas State, also just north of the Ward County line, is one and one-half miles east of the depleted War-Wink, South (Cherry Canyon) field and 660 feet from north and 1,980 feet from west lines of section 31, block 17, University Lands survey. Tests will be made in the Cherry Canyon.

Lincloln Park No. 1-32 University is a re-entry of the former Ralph Lowe No. 1-31 University which was plugged and abandoned at 18,145 feet

The new operator will cleanout to total depth for tests of the Fusselman and the Ellenburger.

It is two and one-quarter miles northeast of the War-Wink (Fusselman and Ellenburger gas) field. The location is eight miles southwest of Wink.

CRANE PROJECT

Sabine Producton Co. of Midland will re-enter and deepen to 5,320 feet a former McKee (lower Clear Fork) field producer in Crane County, seven miles northeast of Imperial.

Tests will be made in the zone from 5,201 to 5,250 feet in an attempt to complete in the Abell (detrital) field pay. There are three-producers in

Location is 3,280 feet from northeast and 660 feet from southeast lines of secton 20, block 1, H&TC survey.

PECOS SECTOR

John R. Seay of Midland announced plans to re-enter a former Montoya well in the Lehn Apco, North multipay area of Pecos Count and test for production in the Glorieta.

It is one location southwest of Seay No. 1 Shearer, discovery well of the Lehn-Apco, North (Glorieta) field. The project was abanoned in December 1978.

Project site is three miles south of

Tests also will be made in the Montoya. There are no Montoya wells in the area at this time.

International Oil & Gas Corp. of Midland No. 1-64 P. C. Coates has been completed in the Coates (Strawn oil) pool of Pecos County, 25 miles south of Bakersfield.

The well finaled for a 24-hour pumping potential of 41 barrels of 37-gravity oil and 18 barrels of water, through perforations from 11,050 to 11,169 feet after a 10,000-gallon fracture treatment. Gas-oil ratio is 205-1.

Total depth is 11,234 feet and fiveinch casing is cemented at 11,233 feet. The plugged back depth is 11,185

Location is 660 feet for south and 1,600 feet from west lines of section 64, block 2, CCSD&RGNG survey.

Sun Oil Co. No. 9 Central National Bank has been completed as a Strawn sabd well in Coke County, six miles southwest of Silver and one location west of the Lygay (Odom oil) pool. On 24-hour potential ftest it flowed

125 barrels of oil and no water, through a 12/64-inch choke and perforations from 5,944 to 5,967 feet. The gas-oil ratio is 2,145-1.

Total depth is 6,820 feet and 5.5-inch casing is set on bottom.

Location is 467 feet from the most southely south line and the most southerly east line of J. S. Lane surveh No. 11.5.

YOAKUM TEST

North American Royalties, Inc., No. 2 Waldon is to be drilled as a southwest offset to one of the two wells in the Block D (Devonian) field of Yoakum County, eight miles west of Plains.

Location is 1,800 feet from north and 900 feet from west lines of section 398, block D, J. H. Gibson surve, abstract 1604.

Contract depth is 12,000 feet.

ANDREWS OILER ARCO Oil & Gas Co. No. 4-212 University has been completed as the seventh Strawn well in the Emma multipay pool of Andrews County, 11

miles southeast of Andrews. Opertor repoted a 24-hour pumping potential of 10 barrels of 41.2-gravity oil and eight barrels of water, through perforations from 8,865 to 11,551 feet after 5,100 gallons of acid.

Gas-oil ratio is 1,047-1. Operator will comingle the production with the Devonian and Fussel-

A re-entry operation, it originally was drilled by Sinclair Oil & Gas Co.

and compelted in 1957. Location is 1,593 feet from south and west lines of secton 30, block 9, University Lands survey.

New offshore area to open

ATLANTA (AP) — Tenneco Oil Co. announced Wednesday that it expects to begin oil exploration activities off the Georgia coast before the end of the month.

The Houston-based corporation also said it plans to drill at least two wells this year in the Georgia Embayment area of the

Tenneco's announcement said the 276-foot Offshore Mercury drilling rig is expected to arrive sometime after mid-May at Block 208, about 90 miles southeast of Savannah, Ga.

Actual drilling on Block 208, for which Tenneco paid \$9.4 million, is expected to be started before June, the announcement said. Drilling was delayed more than a month by the Offshore Mercury's late departure from a job in the Noth Sea. Tenneco, Exxon, Getty and other oil companies paid the federal government more than \$100 million in March 1978 for 57 of the 224 leases in the 1.3 million-acre

Although Tenneco officials have said the possibilities of finding oil off the coast of Georgia are slim, they say the effort is justified by rapidly rising oil

Drilling on Block 208 is expected to go to a depth of about 11,000 feet and cost more than \$4 million. After the first well is completed in 45 to 60 days, Tenneco said the Offshore Mercurv either will drill a second well in the same area or 15 miles south of there.

Garza areas gain testers

Four field area operations have been announced in Garza County.

Wil-Mac Oil Corp. of Dallas No. 1-A J. F. Lott is to be drilled as a 1/2-mile west stepout to production in the recently-opened Coulter (Spraberry) field, 12 miles southwest of Post.

The project, scheduled for a 5,400 foot bottom, is 2,173 feet from north and 467 feet form east lies of sectidon 13, block 1, Jasper Hays survey.

Convest Energy Corp. of Houston No. 1-A Wayne Williams is a location south and slightly north offset to to the same operators No. 3 Williams, producer in the Pollan (Ellenburger) field of Kent County.

The Garza County test is 2,867 feet from north and 910 feet from east lines of section 66, block 5, H&GN survey and two miles southwest of

MILLER PROJECT

Harry A. Miller Jr. of Midland No. 1-B Connell is to be drilled as a west offset to production in the Rocker A, Northwest (San Andres) field of Garza County, six miles south of Post.

Location for the 2,900-foot operation is 870 feet from north and 858 feet from west lines of section 9, block 5, GH&SA survey.

GREG-JOHN AREA

Westland Oil Cevelopment Co. of Houston No. 1-E Connell is to be dug one mile northwest of the Greg-John (Strawn) pool of Garza County, eight miles south of Post.

Scheduled to 8,150 feet for tests of the Strawn, it is 1,980 feet frm south and 660 feet from west lines of secton 37, block 5, GH&H survey.

LEA OPERATION

The Dow Chemical Co., operating from Midland, announced leation for a 12,600-foot project in the Crossroads, South (Devonian) field of Lea-County, seven miles southeast of

The drillsite is 1,980 feet from south and 660 feet from east lines of section 16-10s-36e.

UNDESIGNATED AREA

Amoco Production Co. No. 1-E State is to be drilled in an undesignated

Drinkard area of Lea County, three miles northwest of Eunice. Contracted to 6,900 feet, it is 430 feet from south and 1,980 feet from west lines of section 180-21s-37e.

GRAMA RIDGE

Minerals, Inc., of Hobbs, N.M., No. 1-34 Llano-State Communitized has been spotted in the grama Ridge (Morrow gas) area of Lea County, 18 miles southeast of Halfway.

Slated for a 13,400-foot total depth, it is one mile northwest of Morrow production and 1,650 feet from south and 660 feet from east lines of section 34-21s-34e.

EDDY AREA

Amoco Production Co. No. 1-AA Federal is to be drilled as an 11,700foot test in an undesignated area of Eddy County, four miles west of Carlsbad.

17-22s0-26e.

Senate passes gas bill; now House gets chance

By The Associated Press

In Washington today, the House gets its chance to consider President Carter's request for standby authority to ration gasoline. In California, meanwhile, drivers with even-numbered licensed plates get their chance

the authority to invoke rationing is to be used only in a far more serious situation than the one now prompting

The Senate coupled its 58-39 approval of the plan with unanimous passage of a resolution spelling out the circumstances under which Carter could invoke the rationing power.

Those circumstances include a 20 percent loss in U.S. oil supplies for at least 30 days, as a result of an embargo by exporting nations, oil-field sabotage, an act of war or terrorism, or an "act of God that destroys substantial

In addition, Carter promised not to use rationing to ease lines at gasoline stations caused by temporary shortages, and to make more gasoline available to farmers and energy-producing industries.

original conception of the plan so that it now would guarantee a larger share of rationing coupons to people in states where average gasoline use is

Under the California plan, which so far covers some 10 million of the state's 15 million motorists, drivers with odd-numbered license plates refuel on odd-numbered days and even-

The plan was designed to cut long gasoline station lines that have developed alongsidegasoline shortages attributed to the combination of slackened Iranian oil deliveries, rising demand, and panic buying.

The plan's effects on the first day DAWSON COUNTY
Tamarack No. 1 Smith, drilling 4,436 were mixed. In San Jose, San Diego and some sections of Los Angeles, gas station lines shrank. But in other parts of Los Angeles, some lines were longer.

the panic would continue under the new plan because "if you don't get gas today, then you won't be able to get it until Friday." The prospect of a similar plan was also raised in Texas, where Gov. Bill

distribution plan for Texas in case fuel shortages hit there. There were also these other energy related developments Wednesday:

TEHRAN, Iran (AP) - Iran has decided to increase the price of a barrel of its crude oil by 60 cents beginning May 15, oil sources re-

Te move will raise the price of a barrel of Iranian light quality crude to \$17.17 and a barrel f the heavy

grade to \$16.64. The 60-cent increase affects all existing contracts, the sources said, and is in addition to a surcharge im-

posed April 15. At that time, Iran slapped a \$1.90 surcharge on light crude and \$1.80 on heavy crude, over the basic prices set by the Organization of Petroleum **Exporting Countries.**

An official of the National Iranian Oil Company said an announcement about the price increase was expected

later today. The 3.6 percent increase on all grades of oil came as a surprise here and was expected to upset the tenuous stability into which oil prices had settled.

Post-revolutionary Iran was producing an average of 3.9 million barrels a day, compared to 6.2 million barrels during the regime of Shah Mohammad Reza Pahlavi. About 750,-000 barrels is now set aside for the domestic market and the rest is

Empire area gains project

General American Oil Co. of Texas No. 9-B Green is a new 11,000-foot test in the Empire, South (Morrow) are of Eddy County, seven miles west of Loco Hills.

Location is 1,980 feet from north and 2,310 feet from east lines of section 19-17s-29e.

the United States could tap as much energy from underground heat sources - for example, hot water as current oil consumption would supply in 162 years. Geothermal energy

and oil cannot always be put to the

same uses, however. -Interviews by The Associated Press with a number of dealers and observers of the petroleum industry showed that they believe the price for premium gasoline will rise above \$1 a gallon in most areas of the country before the end of the year.

-Operators of passenger trains and buses reported business up, with Amtrak bookings for the next two weeks 40 percent ahead of last year.

-Treasury Secretary Michael Blumenthal went before the House Ways and Means Committee to seek support for the "windfall profits" tax which Carter wants to follow removal of federal price controls from crude oil. Some commission members expressed doubts about the proposal but Chairman Al Ullman, D-Ore., said the decision for decontrol and the tax "seems to be the only way we can

-The Progressive Alliance, a coalition of labor, consumer and other liberal groups, called for creation of a publicly owned federal energy corporation to produce oil from federal

-In Johnstown, Pa., General Public Utilities Corp. said it may be facing insolvency because of the March 28 accident which crippled its Three

Mile Island nuclear power plant. -In Washington, consumer activist Ralph Nader asked the Nuclear Regulatory Commission to require yearly evacuation drills within 30 miles of all nuclear power plants.
