Chris and Herman get acquainted

# Herman the Gator turns up in the most unlikely place

Story and Photo By BRIAN HENDERSHOT News Staff

Alligators in West Texas?

Unlikely as it seems, E. N. Becket, 804 Palomino St. in Saddle Club North, found one of the aquatic reptiles sunbathing in his front yard Wednesday.

Herman; as the gator has been dubbed by 8-yearold Chris Becket, is only a foot long and unable to tackle any sizeable prey.

The gator showed up just after recent rains, but .

where he came from is anybody's guess, Becket

It doesn't seem to matter now though, since Herman seems quite content making an occasional barking sound or hissing while swimming in the family's

But next time it rains, Midlanders might want to

# Prices of meat and other food may actually be coming down

WASHINGTON (AP) - Consumers buffeted by rising costs may finally be getting a break with one key drain on the pocketbook - the grocery store.

Two government departments had encouraging news Thursday. The Agriculture Department said soaring retail meat prices are finally leveling off and should actually decline in coming months. Labor officials say wholesale food prices already are dropping.

About 2 billion pounds more pork, chicken and turkey on the market as a substitute for almost 1 billion pounds less beef than a year ago should bring the slight decline in retail meat prices, the Agriculture Department

Consumers with relatively smaller amounts of cash to spend also should dampen food-store price hikes through the rest of the year, the department said.

The Labor Department reported that last month's decline in wholesale food prices was the biggest in more than three years. The monthly report said food prices declined 1.3 percent in May, led by a 6.9 percent decline in the price of beef and Veal.

Prices paid to cattle producers have been dropping in recent months as shoppers have found greater supplies of pork and poultry available and have chosen to

substitute them for beef on the dinner table, Agriculture Department specialists say.

The wholesale decline is "bound to have some effect at the retail level," said John Early, chief of the Labor

Department's division of industrial prices. And President Carter, speaking at a labor union convention Thursday, had an upbeat forecast about inflation in general: "It can be controlled if we are determined, patient, persistent and fiscally responsible," he said.

The Agriculture Department's report on meat prices noted that a "slowing in the rate of growth in consumers" disposable income will moderate retail prices during the second half of 1979.

It said "retail beef prices (should) slow their rate of increase during the third quarter ... and decline seasonally during the fall."

Nonetheless, charts accompanying the report showed that department economists expect consumers to buy more meat between now and December than they have in the last three years.

The department maintains that "high demand" be-cause of rising personal incomes is partly responsible for soaring meat prices.

By RICHARD MASON Staff Writer

ALBUQUERQUE, N.M. - Officials representing several federal agencies Thursday fought to keep a public hearing on the draft environmental impact atatement for a proposed nuclear waste facility in southeastern New Mexico from degenerating into a political forum on the pros and cons of nuclear energy.

By nightfall, they were unsuccess-

The hearings, which were to continue through today in Albuquerque, were organized to seek public input into the environmental statement on the nuclear waste experiment, tabbed the Waste Isolation Pilot Plant.

Not all comment was confined to

the speaker's podium Thursday. Both pro- and anti-nuclear advocates picketed outside Alburquerque's Convention Center, site of the hearings.

Thursday night, anti-WIPP proponents staged a counter-hearing, contending the Department of Energy was trying to prevent public comment by rushing the hearings.

Following the counter-hearing, opponents to the WIPP project filled the DOE hearing room - occasionally chanting, sometimes singing, usually applauding and frequently interrupting speakers.

Tempers flared repeatedly as the hearings dragged on into the evening, and pro- and anti-WIPP spectators occasionally become involved inshouting matches. At one point, about 15 spectators,

most wearing Stop WIPP buttons,

walked out, contending the hearings were rigged by the DOE. Anti-WIPP spectators began arriving during the afternoon session. By nightfall, the audience of 350 was

predominantly anti-WIPP oriented. During the Thursday morning session, however, several pro-WIPP speakers presented comments on behalf of the project.

On Thursday morning, representatives from two Texas governmental agencies spoke during the first ses-

David Priester, an assistant attorney general for the state of Texas, told the 150 in attendance that Texas was interested in the waste facility because of the probability that radioactive material would be transported through the state. Priester said later that Texas Atty.

Gen. Mark White wanted to reserve comment on the waste facility until public hearings are held in West

Priester said White had received 'tentative confirmation' from Secretary of Energy James Schlesinger for a public hearing in mid-July or sometime in August in the West Texas

According to the attorney, the state is seeking to have the hearing held in

of Health when and if shipments occur in the state Meanwhile, John Gordon, an engineer with the Texas Energy Advisory Under questioning from Dr. John Council, an intergovernmental agency organized to défine Texas' inter-

Cumberland, a member of the hearing panel, Gordon suggested that indemnities in the case of accidents be ests in energy matters, told the audience that current U.S. Department of paid for on a pro rata basis by those Transportation regulations were sufagencies using the WIPP site. ficient to cover transportation of

Several anti-nuclear, anti-WIPP audience members questioned connections between pro-WIPP proponents and the nuclear industry, prompting panel member Dr. Irwin Remson to remark that the hearings 'should not be a political arena for

debates on nuclear energy. "This is a forum for public input on the environmental statement," Rem-

# Zoning change OK'd for shopping center

By LANA CUNNINGHAM Staff Writer

Magnatex Corp. may be able to clear a final hurdle in the way of its proposed shopping center and housing development in early July.

That possibility arose Thursday when the Midland City Council's approved a zone change and preliminary plat.

The council met in City Hall for a regular session, moved up from Tuesday of next week because of council members' vacations

The zone change request was from single family district to Planned District on 57.398 acres on the southeastern corner of FM 868 and Midkiff Road. The shopping center will take 43.3 acres with housing to be on 14.1

Changes were recommended by the Planning and Community Development Director Richard Hennessy on various details. Joe Nuessle, city attorney, commented that, "I think we've got the thing (plan) in pretty good shape. It's something we (city) can enforce.

A second reading on the zone change will be on the council's June 19 agenda. The plat will be submitted in a final form to the Planning and Zoning Commission in the last step, and Hennessy said the earliest it could be considered is at that panel's July 2 session.

If that is approved, Magnatex can begin actual work on the development, Hennessy said.

In other action Thursday, council members voted to suspend Texas Electric Service Co.'s 16.1 percent proposed revenue increase 120 days in order to study the request.

TESCO has asked for the rate increase to become effective June 21. Earlier this week, hearings on the (See CITY COUNCIL, Page 2A)

# Carter approves full development of new, mobile MX missile system

WASHINGTON (AP) - President Carter has approved full-scale development of a big new mobile MX intercontinental ballistic missile designed to elude any Soviet surprise attack, according to administration sources. Carter was expected to announce

his decision soon, probably today, a week before traveling to Vienna to sign the new SALT II nuclear arms control agreement with the Soviet

The sources, who declined to be identified, said Carter had decided to base the new 190,000-pound MX missile in what was called a "mobile land system" involving a pattern of some 200 missiles scattered among an estimated 8,000 to 9,000 shelters, or

"hardened" launch points. They said Carter was not prepared to announce the precise basing mode, which has been the subject of intense debate within the administration, until he has had a chance to discuss the deployment plan with officials in four Western states, where the missiles would be spread over government-owned land in sparsely settled

According to sources, the system now contemplated would be deployed on Defense Department-owned land in New Mexico and Arizona but also would require additional land in Utah and Nevada now under control of the federal Bureau of Land Manage-

Carter apparently wants to touch base with state governors before announcing the plan in hopes of heading off local opposition.

The sources said the consensus called for a "hardened horizontal shelter" system in which the missiles, each armed with 10 nuclear warheads, would be deployed on tracks by which they could be moved from one launch point to another in less than 30 minutes if necessary to avoid an impending Soviet strike.

The MX, the first new land-based ICBM system developed in more than a decade, is intended to strengthen the "survivability" of U.S. nuclear strike forces, which are expected to become vulnerable to a possible So-viet surprise attack by about 1982 or

Russian missiles have become more and more accurate in recent years, raising concern for the safety of the current 1,000 Minuteman ICBMs in their fixed silos.

According to the sources, the new mobile MX system would cost about \$30 billion to \$32 billion over 10 years. It would become fully operational in 1989, they said.

Both the House and Senate have authorized \$190 million in development funds and the House directed the administration last week to push forward with deciding on a suitable launch system.

### Texas area forecasts

West Texas: Partly cloudy through Saturday Scat-tered thunderstorms mainly north today becoming more numerous tonight and Saturday. Locally heavy thunder-storms possible Panhandle this afternoon and tonight. Not as warm Saturday. Highs 80s north and 90s south. Lows upper 50s Panhandle and mountains to the low 70s south. Highs Saturday mid 70s. Panhandle to near 90 south and the mid 90s Big Bend.

South Texas: Scattered showers and thunderstorms western sections today with locally heavy rain possible. Elsewhere today partly cloudy with a few thundershowers. Mostly cloudy over all South Texas tonight and Saturday. A few thundershowers tonight, increasing Saturday. Continued warm and humid. Highs in the 90s. Lows in the 70s.

## Weekend brings chance of storms

The weekend is coming, so the weatherman has decided there's a chance of thunderstorms in the fore-

Partly cloudy through Saturday with a chance of thunderstorms is the official word from the National Weather Service office at Midland Regional Airport.

Low tonight is expected to be in the upper 60s for the Midland area, with Saturday's high expected to be in the

Southerly winds should be only 10-20 mph tonight, but should be gusty near the thundersforms.

Chance of rain is put at 30 percent tonight and Saturday for the Midland area, but the Big Spring region has a 50 percent chance tonight decreasing to 30 percent Saturday.

Thursday ranked as one of the few summer days to hit the Basin recent-

Recorded high was 96, still a full 10 degrees lower than the record high for the date of 106 set in 1964. Overnight low was measured at 71, well above the record low of 57 degrees set in

## Midland man charged with assault

An 18-year-old Midland man remained in Midland City Jail today after being charged with aggravated assault in connection with an incident early Thursday morning.

Peter Daniel Virgil remained jailed en lieu of \$15,000 bond set by Peace Justice Robert Pine.

Another man has been charged in connection with the incident, according to police, but is not in custody at

this time. Frank Piccolo, 18, 4815 W. Storey Ave., told police Thursday he had just gotten off work at Furr's Cafeteria at Midkiff Road and Cuthbert Street

about 1:20 a.m. when he was assault-

ed by five men. Piccolo said he fell to the ground when the men began hitting him. He said he then pulled a knife and began

fighting back. Police arrived and took Piccolo to the emergency room at Midland Memorial Hospital. There, he saw the five men who allegedly assaulted him

and pointed them out to police. Two of the five alleged assailants were treated for superficial knife wounds, according to police Piccolo was treated and released.

# Truckers seek organized shutdown

By The Associated Press

Independent truckers who blocked highways in more than a dozen states to protest rising diesel fuel prices want to organize their scattered groups for a nationwide effort to be sure Washington takes them serious-

Demonstrations, including some that began Wednesday, choked highways Thursday from Florida to Oregon, where organizer Dave Crandall said "the whole West Coast" would be shut down by the weekend.

No incidents of violence were reported. In most cases, a threatened court order or an appearance by police and tow trucks was enough to

send the truckers on their way. The shutdowns by owner-operators have not been sanctioned by the Inde-

pendent Truckers Association, but there were indications that could

In Los Angeles today, the ITA planned to show off a communication center that would enable it to coordinate strike efforts nationwide.

"Basically, people are in a holding pattern," said ITA spokesman Mike Parkhurst, "The pressure's been building up so we've had to re-activate our national communications center ... There are a few guys that are straining at the bit and want to kick up a little dust."

Parkhurst said the ITA, while not planning a strike, will determine if one is necessary "so we can then formulate our position over the week-

The independents, who pay for their own rigs and fuel and make their own contracts to haul freight, are upset by

say they can no longer meet truck mortgage payments. They also want the 55 mph speed limit lifted, so they can travel faster, and make more trips and money.

rapidly rising diesel fuel prices. Many

Among the larger demonstrations Thursday: -A convoy of trucks crawled

through Seattle's rush hour traffic, creating a mile-long traffic jam. -Several Utah motorists found themselves fixing flat tires after somebody scattered roofing nails on

four major highways. -Six truck drivers were arrested for trespassing in Milford, Conn., after they parked their rigs in front of diesel pumps at a truck stop and

locked them. -About 300 big rigs blocked the Indiana Toll Road near Gary after officials put a 25-gallon limit on diesel

down most of the fuel stops in the central part of North Dakota. However, organizer Don Hausaur said they

around the blockade and no arrests

-An estimated 100 truckers shut

need help "We need cattle and produce haulers," he said. "When we get people hungry, they'll finally realize we're not kidding and start calling congressmen and senators.

Meanwhile, in Minnesota, where truckers claim commencial hauling is off by 50 percent, food industry officials said delivery shortages could begin by Monday, if the shutdown continues.

Other incidents were reported Thursday in Missouri, Iowa, Wyoming, Montana, Oregon and Colora-

# NASA preparing team of Skylab lawyers

WASHINGTON (AP) - The Skylab space station's plunge back to earth, now expected between July 4 and July 28, has prompted U.S. officials to prepare plans for sending lawyers to any spot on the planet where debris from the space craft might cause injury, damage or death.

The National Aeronautics and Space Administration has calculated the odds at 152-to-1 against a falling piece of Skylab harming human life anywhere in the world. The agency

jail — but public outrage may be

his worst punishment.

says the odds go up to 600 billion-to-1 on a particular individual being hurt when the 77-ton space station tumbles out of orbit and crashes to earth. However, the agency does "want to. be prepared in case any claims are

filed," said Richard G. Smith, who heads the NASA Skylab re-entry task force. The North American Air Defense Command (NORAD), which is follow-

ing the orbit of the satellite from its command center in Colorado Springs, Colo., predicted Thursday in its weekly Skylab report there is a 95 percent probability the station will fall to earth between July 4 and July 28. NORAD added there is a 50-50 chance

it will come down by July 16. It was the second successive week NORAD has added a week to Skylab's expected life. Last week it predicted

If Skylab does cause harm, foreign claimants will have an easier time recovering losses than those living in the United States.

Under a 1972 treaty, the United States is liable to citizens of foreign countries for any damage caused by U.S. space vehicles. Fifty-two nations signed the treaty.

U.S. citizens, though, must file their claims under the Federal Tort Claims Act, which requires a showing of neg-

However, a 1958 law, and NASA contingency plans, provide for the government to pay U.S. space vehicle

re-entry between June 28 and July claims up to \$5,000. Claims exceeding \$5,000 would require congressional action for a no-

fault recovery, Smith said. He said lawyers from NASA and the State and Justice Departments will be ready the day Skylab falls and will go to any country which requests their aid through various U.S. embassies. Smith added that includes countries which did not sign the 1972 treaty or do not have diplomatic relations with

## William Duncan

MUNDAY - Services for William Calvin Duncan, 54, of Abilene, brother of Maxine Hayes of Midkiff and R.C. Duncan Jr. of Andrews, were to be at 2 p.m. today in First Baptist Church in Abilene with the Rev. Jack Mints, pastor, officiating.

Burial was to be in Johnson Memorial Cemetery directed by McCauley-Smith Funeral Home.

He died Tuesday in a Big Spring hospital after a brief illness.

Duncan was born March 5, 1925, in Young County. He was a service station attendant and a U.S. Navy veteran of World War II. He was a Baptist. He moved to Abilene from Mile City, Mont., in 1965.

Other survivors include two daughters, two sisters, a brother and six grandchildren

# Probers study DC-10's design

WASHINGTON (AP) - With the U.S. fleet of DC-10s grounded indefin itely, investigators are studying the plane's design in hopes of learning why an engine fell off one in Chicago last month and why cracks keep appearing in the engine mounting pylons of others.

Federal Aviation Administration inspectors concentrated their efforts at the McDonnell Douglas Corp. plant in Long Beach, Calif., where the DC-10 is manufactured. They are studying closely the documents used in the process that led to certification of the

DC-10 as airworthy in 1971. Langhorne M. Bond, the FAA chief, has said the agency wants to learn if a design defect might have slipped

through the process.

Meanwhile, National Transportation Safety Board specialists also worked on the investigation in Long Beach, Washington, Tulsa, Okla., and

## Investigation launched

LOME, Togo (AP) — A panel of African legal experts will investigate the alleged murders of an estimated 100 school children in the Central African Empire, Ivory Coast President Felix Houphouet-Boigny said.

He said French-speaking African leaders decided last month to commission the inquiry after hearing Amnesty International charges that the children, aged 8 to 16, were killed by the authorities in Bangui, the empire's capital. The students allegedly were arrested after protests against Emperor Bokassa I. The investigation begins Wednesday.

"We're trying to find out what happened, what is causing the cracks in the engine mounts, was something overlooked in the certification process, is there a basic flaw in the system?" said Fred Farrar, an FAA spokesman. "It's arduous work."

In Washington Thursday, U.S. District Judge Aubrey E. Robinson Jr. extended from June 11 to June 15 his order that U.S.-registered DC-10s be grounded until the cause of the Chicago crash has been found and correct-

The planes cannot fly while the restraining order is in effect, regardless of FAA action. The Airline Passengers Association, a consumer organization, filed the original suit to ground the planes.

Also Thursday, Western Air Lines, Northwest Airlines and World Ailways filed motions to intervene in the grounding case, saving they will seek to win permission for their DC-10s to resume flying because the cracks found in other planes have not appeared in their fleets.

ground "until the problem is found, analyzed and cured." He said that would take at least a week, and perhaps several weeks or months if a major redesign is required. Bond suspended the certificate of

Bond said DC-10s will remain on the

the DC-10 Wednesday, saying there might be a design defect in the engine mounting assembly.

All 138 DC-10s operated by U.S. airlines are grounded and the FAA said Thursday foreign carriers that operate the 143 foreign-registered

DC-10s have voluntarily taken them out of service.

This is the fourth grounding for the plane since the May 25 crash of an American Airlines DC-10 in Chicago that killed 275 persons in the nation's worst aviation accident. An engine fell off the plane as it was taking off and the aircraft plunged to the ground and burned

The investigation has centered primarily on the two under-wing engine mounts, or pylons, where cracks have been found.

The pylon that fell off the Chicago plane, taking the engine with it, had a 10-inch crack in its aft bulkhead. Investigators have determined that the

crack existed before the accident. The safety board team that investigated the crash in Chicago now is

studying reports in Washington on the accident and making metallurgy tests

on parts recoverd from the aircraft. In Tulsa, investigators are looking at remnants of the three engines from the crashed plane. Early indications

are the engines worked properly. At Dallas-Fort Worth International Airport, a flight simulator is being programmed to try to duplicate the final seconds of the doomed plane's flight so experts may learn why the aircraft did not continue to fly on its two remaining engines.

In a related development, Defense Department spokesman Thomas B. Ross said Thursday military personnel and their families scheduled to fly aboard civilian DC-10s under Pentagon contract will be flown on military transports instead.

# Burglary, thefts investigated

Midland police today were investigating one reported burglary in the

city and numerous thefts. Charlie Linebarger, 3411 Andrews Highway, reported the burglary of a

building at 202 E. Pine St. Taken was a bathroom lavatory valued at \$200. According to police reports, entry and exit from the building was

through the east kitchen door. Bill Renfro, 608 S. Colorado Ave., reported the theft of a earth tiller valued at \$400. Renfro told police the

tiller was taken from his backyard. The theft of a socket wrench set, valued at \$150, was reported to police by George Baker, 2500 Copus No.

ported the theft of five fishing rods and a tackle box. The items were valued at \$144.50, according to George Loudamy, 3402 Shell Ave.,

J.W. Pettus, 4425 Stanolind Ave., re-

reported the theft of a pair of pants from S&Q Clothiers, 315 Andrews Highway. Value of the pants was not known, according to police reports.

The theft of two jumpsuits and a gown from Janie's Intimate Apparel, No. 260 San Miguel Square, was reported to police by Willie Keaton, 4615 Versailles Drive.

The items, which Keaton said were taken about 10:45 a.m. Thursday, were valued at \$159.

Development of energy resources is changing the wide-open spaces of Wyoming and creating some problems too. A Denver oil company purchased mineral rights and drilled this oil well 300 feet from Jim Slattery's house near Gillette, prompting Slattery to file suit. (AP Laserphoto)

but there is very little we can do under the existing

sections of Cheyenne and Casper, Wyoming's two

IN ROCK SPRINGS, in southwestern Wyoming, an eight-block area is sinking into an underground honeycomb of abandoned coal tunnels. In the town of Hanna, east of Rock Springs in

mineral rich Carbon County, the school board had to abandon a school site because of a similar subsidence problem from 10 layers of coal tunnels. It managed to find another site that Superintendent John Tynon said is "above where two geological faults meet, so they can't mine there.

virtually impossible to stop something like this when In Weston County, near the South Dakota border, Manager Robert Forbis. twenty-six 100-car Burlington Northern coal trains rumble through the county seat of Newcastle every day, tying up traffic as they haul Wyoming's coal mental Quality Council to block a plan by Vulcan wealth to midwestern power plants. Local offi-Materials Corp. to construct three tanks to store cials say the railroad is doing all it can to reduce the impact of the trains.

Wyoming's population is estimated at 459,000, and while that may not seem like a lot, it grew by 9.8 percent last year, state planners say. State legislators fondly call Wyoming the nation's "energy breadbasket," because it is the nation's No. 2 uranium producer, ranks fourth in coal, fifth in oil and

seventh in natural gas. Wyoming's unemployment rate is below 3 percent, the lowest in the nation, and its per capita income of \$9.096 is second highest in the nation behind Alaska. Wyoming's mineral industries employ 45,000 persons and miners earn the state's highest average wage at almost \$22,000 a year.

WHAT ALL THAT means to Jim Slattery is that an oil well sits 300 feet from his rural home east of Gillette in Campbell County. Slattery, a state brand inspector, said he was not thinking about growthstatistics when he moved onto his 80 acres, though he knew the federal government owned the mineral rights under his land.

Davis Oil Co. acquired those rights and last March began drilling an exploration oil and natural gas well on an access road near Slattery's house. Slattery is suing the Denver-based energy company, saying his 10-year-old daughter has a heart condition and is suffering from "fumes and loud and disturbing

"I wouldn't want an oil well in front of my house,

# Voyager I photos show lo volcanos

PROVIDENCE, R.I. (AP) - New Voyager I photographs of Jupiter's moon to showing eight volcanos belching out sulfur gas have surprised scientists attending a national geologists convention here.
"It's the most incredible thing ever seen in the

space program," an amazed planetary geologist, Donald E. Wilhelms of the U.S. Geological Survey said Thursday. "It's like '2001,' only this is real." Joseph Boyce, a planetary geologist with the Na-

tional Aeronautics and Space Administration in Washington, D.C., described the progress of the Voyager mission at the 10th Annual Planetary Geologists Principal Investigators meeting at Brown University. Most of the planet and moons in the solar system

are cold and inctive, so geologists were thrilled by the turbulent activity on Io, he said. The first photos of the volcanos were sent back to Earth in March

"It's the most exciting discovery we've ever had in planetary geology," Boyce said. "If you flew over Earth, you'd be lucky if you saw one volcano erupt-

The Voyager I saw eight on the yellow-orange surface of Io, the closet of four moons to Jupiter. "We also have things that look like lava lakes," Boyce said. "This is a crazy place."

What causes the volcanos? Boyce believes the strong gravitational fields of Jupiter and three outer moons are tugging Io in different directions, creating enormous heat and distorting the surface of the

He said tides on Earth are caused by similar gravitational pull from the Earth's moon, but the effect is much less pronounced. Studying Io may give scientists clues about the history of the Earth's

moon, Boyce said. The Voyager I, launched Sept. 5, 1977, reached its closest point to Jupiter in March

# Draft foes prepare campaign

Opponents of peace- over the recent Memori- bers." time draft registration are mobilizing a last-minute lobbying campaign to kill legislation the Senate may consider next week to require all men age 18 through 26 to sign

Most of the lobbying effort has been aimed at members of the House because it was expected they would have the first vote on the politically controversial subject.

In a quick turnaround, however, opponents shifted their attention to the Senate Thursday when its Armed Services manpower subcommittee met in closed session and approved a bill that would reinstitute registration on Jan. 2, 1980.

It is widely expected efforts will be made on the Senate floor to tack the registration bill onto legislation due to be debated Monday authorizing \$40 billion in weapons purchases. The full Armed Services Committee is expected to take up the bill Monday morning, clearing the way for its debate on the floor

The House also is expected to vote later this month on a separate version of a registration bill approved by the House Armed Services Committee

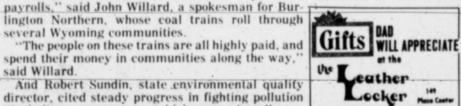

The House bill would not start registration until Jan. 1, 1981 - after the next congressional elections - and would affect only males who turn 18 after that date, a group much smaller than that covered by the Senate legislation.

Women would be excluded from registration in both the House and Senate bills.

Barry Lynn, head of a national anti-registra-tion group, said the lobbying campaign in the Senate "literally has just begun. Telephone calls are just starting to be made. There will be visits (to senators).

"We've got to do an enormous amount of work," he said. "I don't know if we've got enough time.

Lynn's organization, the Committee Against Registration and the Draft (CARD), sent volunteers to talk with

INULES CHIGGERS

# Authorities say they've found 'dead' Air Force sergeant

SAN ANTONIO, Texas (AP) - On New Year's Eve 1977, Staff Sgt. Wilmer W. Higgs Jr. vanished. His car was found in the San Antonio River, and four months later the Air Force declared him dead.

But is he? Local and federal authorities said Wednesday they have located the 33-year-old Higgs living in the Galveston area. The FBI says Higgs has lived and worked in Southeast Texas for the the past 18 months, posing in at least two jobs as "Johnny

Newman. Higgs disappeared from the all-night gas station where he moonlighted. About \$120 was missing from the cash register; blood stains were on the floor.

When the submerged car was found, police said the keys were still in the ignition and there were signs of a struggle. A statewide search was mounted. But no trace of Higgs or his body was ever found

The Air Force declared the Lackland Air Force Base marksmanship instructor "officially deceased" on Jan. 20, 1978. A memorial service was held in the coastal town of Vidor. and death and insurance money were paid to his wife, Carolyn.

But Vidor police records show a man named Wilmer W. Higgs Jr., matching the description of the missing sergeant 'right down the line," was issued a traffic ticket there June 4, 1978, said Vidor Police Lt. Sam Kittrell. The FBI contacted Vidor police three weeks ago about the ticket said Kittrell.

San Antonio Police Lt. Virgil Roberson said FBI reports showed Higgs worked for a construction company at the South Texas Nuclear Project near Bay City for several months after his disappearance, apparently using the alias "Johnny Newman.

"I have information that he is alive. The next step is to file theft charges against him for the money missing from the gas station," said Roberson. He said the station owner must decide

whether to press those charges. Roberson said local police know the man is near Galveston, where he is reportedly working as a carpenter, and plan to apprehend him if charges are

Military authorities are trying

Wilmer W. Higgs Jr.

to determine if fraud was involved in connection with the undetermined amount of death benefits and insurance money his wife later received.

Higgs' wife and the couple's two daughters moved to Hawaii last Aug. 31. She declined to comment\_on the investigation Wednesday.

# Virginia governor making commercial pitch to China

### The Washington Post

"HONG KONG - It was an important moment in U.S.-China relations. One of Hong Kong's leading pro-Peking newspapers, The Wen Wei Po, rushed the story onto its

"Just arrived in Peking is John Dalton, governor of the American state of Georgia.

Few who have met the governor of the commonwealth of Virginia, in his determined and well-organized 17-day blitz of the Far East, would make that mistake again. Dalton has brought mountains of material on the potential of Virginia products and Virginia industrial opportunities to Japan and Hong Kong, and Wednesday he climaxed the trip with an unusual two-hour meeting in Peking's

Great Hall of the People.

Listening to the governor's detailed sales talk was Yu Qiuli, China's chief economic planner and a member of the ruling politburo of the Chinese Communist Party. Yu is not the sort of man with whom a true son of the Virginia Republican Party like Dalton would be expected to find much in common, but the governor saw it as two planners interested in trade and agriculture discussing how they might help each other.

'We talked about the agricultural commodities that Virginia is in a position to export, the coal we produce in Virginia and we talked about power operations in Virginia and what is going to happen in China in the years to come and what they are going to be needing in assistance," Dalton said in a telephone interview from his Peking hotel

Dalton has traveled abroad only once before as gover-

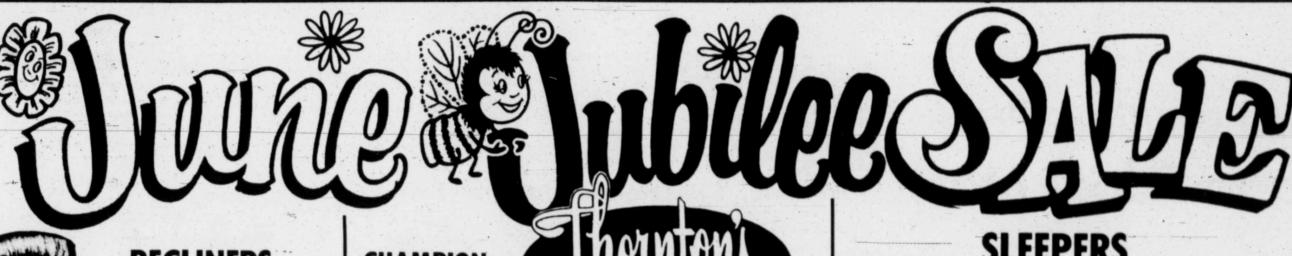

nor, to Europe last year, but he has evidently prepared for this trip as if it were a campaign swing through Virginia. Without being asked, he carefully spelled for the benefit of a reporter the name of each Chinese official he had met. He used the complicated new Pinyin spelling system and pronounced the names correctly.

At a commune Tuesday, he also had a chance to recall his days as a Virginia cattleman and swap tips with commune director Yu Suiho, who was dressed in the usual Mao suit and cap. The governor eyed a vat of kernelless corn-fodder in the commune cow barns. "We let the feed corn grow until it begins to harden," he said. His host confessed the Chinese peasants had to cut the corn before kernels grew because they needed the land

Dalton is only the second U.S. governor to visit China since the normalization of relations between Peking and Washington on Jan. 1. Jay Hammond of Alaska came earlier in the year, and Ohio Gov. John Rhodes is expected to follow. President Carter, Dalton said, encouraged governors at a recent conference to visit China once during their terms in order to stimulate trade and improve relations.

'We decided about four months ago that we were going to go to the Far East," Dalton said. He had told Chinese Vice Premier Deng Xiaoping of his interest in visiting China, when Deng dined with several state governors in Atlanta during his U.S. visit earlier this year. After another chat with Chinese Ambassador Chai Zemin, the

trip was on. Dalton emphasized repeatedly the trip would do much good for his state.

# Half million Poles go to Papal Mass

NOWY TARG, Poland (AP) -Pope John Paul II returned to his faithful Polish highlanders today for a morning Mass on a vast open field and was greeted by what appeared to be the largest crowd of his homecoming pilgrimage

Thou art Peter," sang a crowd that organizers of the Mass estimated to number at least 500,000. Hundreds more streamed toward the Mass in lines stretching miles over nearby hills and through woods.

The pope's return to the foothills of Poland's Tatra Mountains had been warmly anticipated by the highlanders, who live in one of this communist but predominantly Catholic country's most devout areas.

The pope hiked and skied in their mountains before his election as pontiff and most towns in the area feel close ties to the outdoors-loving former archbishop of Krakow.

The pope arrived in a blue and white Polish airline helicopter, making a half-hour flight from Krakow over rolling green pastures and

He was greeted on arrival by an honor guard of scores of blue-jacketed highlanders in traditional white homespun pants and thonged san-

The pope celebrated Mass at the Auschwitz death camps Thursday, condemned the destruction of "man by man" and pleaded for "no more war, only peace!"

The Roman Catholic pontiff sounded his call to peace from one of the wooden railroad platforms over which some 4 million people from 28 nations passed to Nazi gas cham-

"Auschwitz is the place where everyone should visit. And during the visit one should ask, 'What are the limits of hatred, what are the limits of destruction of man by man?"

pope said. He singled out the Jews who died: "The very people that received from God the commandment 'Thou shalt

# Senators vow sanctions battle

WASHINGTON (AP) — Senators opposing U.S. trade sanctions against Rhodesia vow a "bitter, bloody fight" to end the 14-year old embargo despite President Carter's decision to

The president announced Thursday he believes the sanctions should be retained as a matter of principle on grounds the recent Rhodesian elections were neither free nor fair and that Rhodesia has not made sufficient progress "toward legitimate majori-

Bishop Abel Muzorewa, Rhodesia's first black prime minister, called the decision "inhuman.

But Carter, saying Rhodesia's constitution retains "extraordinary" powers in the hands of the African nation's tiny white minority, said the United States is determined to do what is right, what is decent, what is

He said a U.S. diplomatic observer will be sent to Rhodesia to report on what progress is being made toward achieving genuine majority rule.

Carter said he will do all he can to see that his decision is not reversed but acknowleged that his position does not now command majorities in either the Senate or the House.

The first test will come Monday in the Senate where an amendment lifting the trade sanctions has been added to the military procurement

Sen. Richard S. Schweiker, R-Pa., said the amendment will be offered to every piece of foreign policy legislation to come before the Senate until it is nailed into law. "I think we have the votes to win in

the Senate but its going to be a bloody, bitter fight," Schweiker said. And he said that the fight likely will

continue down to a final struggle to overturn a presidential veto.

'The president has gone back to the

original hardest line position this country has ever had on Rhodesia," Schweiker said. "He ignores the progress that has been made. He sets new conditions that go beyond the requirements set by law. He has left no room for compromise. This is going to lead to a bitter, prolonged and divisive battle between Congress and the White House.

Schweiker was echoed by many other leaders of the fight to lift sanctions including Sens. Jesse Helms, R-N.C., Robert Dole, R-Kans., and S.I. Hayakawa, R-Calif.

Carter made his decision under the terms of the 1978 Case-Javits amendment which required him to lift sanctions if he determined that a government had been installed in Rhodesia based on free and fair elections and if a good fighting effort had been made to settle Rhodesia's continuing guerilla war.

Sen. Jacob Javits, R-N.Y., a cosponsor of the amendment, said Carter's decision is likely to draw bipartisan support. But he said it is too early to predict whether the president will be overruled or whether he himself will support him.

But the president was not lacking for allies.

Sen. Edward M. Kennedy, D-Mass., often viewed as a potential presidential rival of Carter, hailed the president for taking a "principled" position and said he will work to make certain it is sustained.

Rep. Stephen J. Solarz, D-N.Y chairman of the House Foreign Affairs subcommittee on African Affairs, said the president will prevail in the House if he is "prepared to fight for his policy.

Many of the black nations of Africa, including oil-rich Nigeria, oppose lifting sanctions unless steps have first been taken to deal with the demands of the outlawed Patriotic Front.

But the Senate voted 75-19 last month to express its opinion that the legal requirements for lifting the sanctions have been lifted.

Sen. Paul Tsongas, D-Mass., said that vote would be reversed if it becomes likely Nigeria would protest

the lifting of sanctions by cutting off oil exports to the United States.

"If constituents are sitting in milelong gas lines because of a vote against racial justice, I think perceptions would change rapidly," Tsongas

# Prime minister 'shocked'

SALISBURY, Zimbabwe Rhodesia (AP) - Prime Minister Abel Muzorewa said today he was astonished and shocked by President Carter's decision not to lift sanctions against Zimbabwe Rhodesia, calling it a "blatant example of political expediency and of double standards" by the self-proclaimed U.S. champion of human rights.

"I am deeply shocked by the decito convene an all-parties conference , sion of President Carter to maintain punitive sanctions against my government and the people of Zimbabwe Rhodesia," Muzorewa told reporters outside his office. "It would be hard to think of a more

blatant example of political expediency and of double standards and it is astonishing that it should come from a president of the United States, who claims to be a champion of human The U.S.-educated Methodist bish-

op denounced Carter's statement on Thursday that it would not be in the interests of the government and people of Zimbabwe Rhodesia to lift the 13-year-old trade embargo. Carter said he believed the sanc-

tions should be retained as a matter of principle on grounds the recent Rhodesian elections were neither free nor fair and that Rhodesia has not made sufficient progress "toward legitimate majority rule.'

"I wonder in what way it is in the interests of the people of my country to be subjected to sanctions which deny them the right to trade freely,

which deny them employment opportunities and which deny them increased educational opportunities,' Muzorewa asked

The bishop took issue with Carter's criticism that the new constitution for the black-led state was approved by white voters only. Carter also said the constitution "preserves an extraordinary power for the white minority."

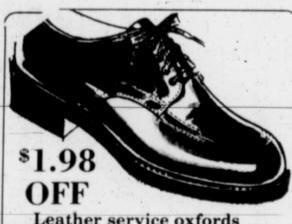

"It would be hard to think of a more blatant example of political expediency and of double standards ...." - Abel Murozawa

# Herbie cuts disco album

By DAVID N. ROSENTHAL

SAN FRANCISCO (AP) - Herbie Hancock's gone disco? Herbie Hancock, disciple of Miles Davis, cohort of Chick Corea, creator of the legendary "Headhunters" album? Say it ain't so, Herbie.

"The new album is disco," the wizard of the keyboards confirms. "And I like it. One of these days the idea will get around that Herbie Hancock is all kinds of music and people will stop trying to pigeonhole me 'I'm not saying that 'Feets Don't

Fail Me Now' is the definitive whatever it is. But I like the tunes and I like the words - it seems to be balanced in all different areas."

Okay, but why do you like disco? For a man who often has been on the cutting edge of musical change, it's certainly not much of a switch from what everyone else is doing.

"It excites me to have people dance to my music," the 39-year-old Hancock replies. "I've always been interested in different types of music not just jazz - but in the past I was only interested in how they applied to

jazz. Now I am exploring those areas. If you like the music, it makes sense to do it.

"Nobody made me do it. In fact, some people at the record company were against the switch. So that ought to dispel the myth I'm going disco because of commerical pressure."

Besides being the jazzman's first venture into the world of thumping drums, danceable rhythms and simple lyrics, the "Feets Don't Fail Me Now" album is notable for another reason - it features his voice for the first time.

At least it's his voice after it has gone through an electronic gizmo called a vocorder, which feeds the words he sings through the synthesizer. They come out sounding like a warrior from "Battlestar Galacti-

"I'm not a singer," Hancock readily admits. "The quality is fine, but the vibrato is awful. Sometimes I'm flat and sometimes I'm sharp. The vocoder synthesizes my voice and it comes out according to what I play, an English actress with delicate beauty and rare sensitivity. Her feelings about "Battlestar Ga-

lactica" are mixed.

Actress gets spaced-out role

"I did the two-hour pilot film a long time ago," she remarked. "I thought the role was rather promising: A kind of Jane Fonda character who leaves her son with her husband and goes of to pursue her career as a television newscaster (on the planet Caprica). The lady was dying of caricer, and I had some poignant scenes.

"But when the pilot was tested before sample audiences, the kids cried and said, 'You can't do this to us.' So instead of having the character die, the role was cut down so it was hardly

She returned to the series to appear in another two-hour adventure, but she declined to be one of the regulars. They were Lorne Greene, Dirk Benedict and Richard Hatch. Making guest appearances in the movie are Ray Milland, Lew Ayres and Wilfred Hyde-White.

For Jane Seymour, "Battlestar Ga-lactica" marks another boost in a career that started 15 years ago in England. Born in Bristol the daughter of a surgeon, she started dancing ballet at 13, made her acting debut shortly afterward in a Chef Boyardee commercial aimed at American TV.

She enjoyed some success in Britsh-made films "Oh What a Lovely War," "Young Winston" and "Frankenstein, The True Story" with Michael Sarrazin and James Mason. Her biggest attention came as the virginal Solotaire in the first of the Roger Moore-James Bond epics, "Live and Let Die." The exposure was good, but she realized that not much happens to the careers of the Bond beauties.

Two years of classics in the English theater helped provide background for more diverse roles. When she came to Hollywood for a TV movie, "King David," producer Renee Va-lente told her: "If you'd lose your English accent, you'd never stop

Seymour tried it with a dialogue coach. No luck. She found the solution by working in British radio: "We have so many dialects in England, and the programs are set in various regions. I had to learn each dialect. After that it was easy to pick up American. I was able to talk with a New York accent in 'Seventh Avenue,' like a Bostonian in the 'The Captains and the Kings' and with a Midwest twang in 'The Awakening Land."

She recalled her arrival here three

"I came with only 300 pounds, which is all the British government would allow citizens to take out, with a six-week return plane ticket and no work permit. Within a day I had my first role, in 'Captains and Kings' and I managed to get a permit to work."

Even though she eschewed series television, she has been working steadily ever since, — "and in nothing but American roles."

be returning next season.

PEKING (AP) - An American who gave up the space age nine years ago to collect art is showing seldom seen Chinese folk art to the United States. George J. Goodstadt of Plattsburg, N.Y., also has introduced representative American artists to the Chinese art world.

In 1970, he decided that 12 years with the Goddard Institute for Space Study, where he was a space scientist, was enough. Although he had no previous experience and didn't paint, he embarked on a totally different career as a buyer and seller of paint-

Five years later he made his first trip to China and has been back a dozen times since.

At the Canton Trade Fair, where he hoped to pick up some Chinese oil paintings for his Manhattan gallery, he stumbled across a pile of water colors and sketches on the floor, done by little-known Chinese peasant artists

"The oil paintings were terrible," he said recently in an interview here. "But these were great. They were wonderful. They caught the spirit, I thought, of

He picked up a batch and the New China Arts Corp., which he set up in New York City, was born. His search for new works by peasant artists takes him by train, car and bus to some of China's remotest rural areas. He comes back exhausted, but happy with his finds.

He admits frankly his object is to make money. and he is doing quite well at it. But he has been fired with enthusiasm for the primitive, colorful wood

blocks, water colors and sketches he has acquired. Goodstadt has introduced peasant artists to new techniques, shown films of American artists at work, and donated dozens of American art books to

He has helped popularize in the United States the locally farnous Weifang New Year woodblock prints. vividly cheerful portrayals of country life which Chinese paste over their doors during the lunar new year festival.

The prints come from Weifang in Santung Province. Yangliuching in Hopei and Taohuawu in Kiangsu. The eustom began in the middle of the 17th century and has been continued ever since.

Besides the doorways, peasant put them on windows, over stoves, in stables, pigsties and on carts. The colors used are red, yellow, green, purple and rose, the scenes show harvests, peasant side occupations, fishing and, on the political side, agricultural mechanization, irrigation and improvements in

Another source of peasant art is Huhsien in Shensi Province, near Sian, Goodstadt has commissioned woodblocks from talented artists there which have been shown around the United States. On his last trip to China, he stopped by the Central

Art Institute here and found an exhibition of paintings by its students which so impressed him he will show it around America on a non-commercial

"There are oil paintings of Tibetans, character studies of Chinese which are absolutely magnificent," he said.

# Midlander authors social studies text

Dr. Robert A. Carter Jr. is preparing his tenth book for publication.

Carter, social studies, secondary English and foreign language coordinator for the Midland schools has co-authored "You, the Citizen," with Dr. John Richards, chairman of the business administration department of Corpus Christi State University. Soon to be published by Benefic Press of Chicago,

this is the seventh in a series of books Carter has coauthored for social studies programs. Erma Underwood, a Midland photographer and

traveler, acted as a researcher and assistant to Carter on this and past publications. Many of Carter's books are in use in various school systems around the state as well as in Memphis.

Tenn., Oklahoma City, Okla., and Chicago, Ill. Carter has been with the Midland schools since 1954. He has served as an instructor at both the junior and senior high school levels as well as chairing the Austin Freshman School and Lee High School social studies departments. Carter has taught graduate extension courses for Sul Ross, Stephen F. Austin and UTPB universities.

He received his BA from Sam Houston State University, MA from The University of Texas in Austin and his Ph.D from North Texas State University. Consultant services have included working with Harcourt Brace Jovanovich, Inc. in New York, the

Texas Education Agency, West Texas Education Center, the Southwest Regional Laboratory in Austin and various schools and educational service cen-

Carter has served as president of the Texas Council for the Social Studies, West Texas Regional Council and the Midland Educators Association.

In 1967-68, Carter was on loan from the school district to the Midland Chamber of Commerce acting as executive director for Objectives for Midland. The program has served as a guide for community development for the past several years.

# Fate takes Cubs' Tracy by hand

If Xavier, Ohio, University hadn't dropped its football program a few years ago, Midland Cubs first baseman Jim Tracy might not be contending for the Texas League batting title this

'After I graduated from high school, I received a couple of football and basketball scholarship offers and had accepted a full-ride scholarship to Xavier in football when they decided to drop the sport," he explained his close call. If he had gone to Xavier, he probably wouldn't

have played baseball. Instead, Tracy wound up at non-scholarship Marietta, Ohio, College, largely through the persuasiveness of the dad of Kent Tekulve (the Pittsburgh Pirates' pitcher), a neighbor. Kent had gone there and "his

dad sold me on it." "I didn't go out for football because they treat their baseball program like a sophisticated semipro program. They had 106 candidates for baseball and I felt I had to participate in the fall program to stand a chance. They divide their squad into six teams and play a regular sched-

It turned out to be a wise move. Jim batted .325 as a freshman, made the all-regional and all-Division III World Series tournament team at Springfield. Ill., as Marietta finished runner-

up and 44-6 for the year. As a sophomore, he hit .411 in Ohio Conference play and .391 overall, going 5-for-9 in the regionals. That summer, his de velopment was hastened by a season with Chatham in the fast

Cape Cod League. That fall he decided to work rather than go back to college and was drafted by Chicago in January. After one and a half years at Pompano Beach, he was promoted to Midland late last season and for a while the

Texas League was a struggle. 'In Midland I was seeing pitches I never saw for strikes in Class A ball," the 6-3, 190-pound lefthanded swinger recalled. "But Billy Williams (Chicago's roving batting instructor) was a big help. He backed me off the plate, turned my front foot in and it helped me keep my eye, on the pitch better. Jack Hiatt, who was my manager at Pompano, was another big help. He got me out of my crouch and had me standing up straighter. I didn't have a good year, but Jack stayed with me. I guess you'd have to say that Billy, Jack and Jim Saul are the reasons I'm

here today.' 'This year I have just concentrated on putting into practice everything I've been taught and knowing the strike zone has

been a big help," he adds.
Saul also had faith and pa tience and Tracy responded after a dismal Midland beginning by winding up with eight homers, 29 rbi and a climbing .259 batting average last year. And this year, it has paid off, but it has not been without its trials and tribulations, this time

Always an outfielder, Tracy is learning the intricacies of first base play this year, "but it helped this spring when Randy (Midland manager Randy Hundley) told me to get a first baseman's glove and get lots of work, because that's where I

was going to play." To the casual observer, Tracy's play around the bag is no giveaway that it's a foreign position, but he knows. "The toughest play for me is holding a man on first with a left-handed batter at the plate. I can't get used to the idea of that big hole

the batter has to hit through." And while his football career went up in smoke when Xavier dropped the sport, his high school days as a wide receiver were not without their value. Tracy contends the experience and things he learned from high school coaches Terry Malone and Dean Wright have carried over. "They taught me how to win and to be a competitor and that's something that stays with

you no matter what the sport." And, strangely enough, Tracy took the baseball route without any pushing from his father, Jim, Sr., who might have harbored an understandable prejudice toward baseball, since he once pitched in the Phillies and

Giants organizations. "My parents have been in my corner all the way, but my dad didn't do any pushing, although he was upset the year I decided not to go back to college. My mother told him that it might not be a decision they agreed with, but it was my decision to

Since turning pro, Tracy rates his biggest thrill as the night he hit two homers and knocked in six runs against the Miami Orioles in the Florida State League. Toughest pitcher? "Mark Clear, who was with El Paso last year and is with California this year. He had good heat and a tough slider. I'm also very impressed with this year's Jackson staff. They throw strikes and make you think at the plate."

And while Tracy took a holiday from college, he intends to finish. During the offseason he goes to Xavier. "I'm 45 credits short of a degree, and if I'm invited to play winter ball, say in Puerto Rico, Mexico or Venezuela, that would mean a further delay. But I am majoring in English and hope to teach and coach on the high school level when my baseball days are

The way things are going for Tracy this season, that may be some very distant time in the

The win gave Midland a 3-2 edge in the final series against the Mets and left the Chicago farmhands 5-5 on the

Still, it wasn't enough to keep Midland in first place in the Texas League West. While the Cubs were splitting in the East, San Antonio was mopping up the diamond with Tulsa and Shreveport in the Alamo City and with Thursday's doubleheader sweep nudged four percentage points in front of the Cubs. When Midland left for the East, it led the TL by 4 1/2

So it's back to Square One when the Cubs return home tonight to open a five-game showdown series with the

Dodgers at Cubs Stadium. Mack, now 5-2, won his third game on the road trip Thursday, fanning nine and walking only two in a 7 1/3 inning stint, but it may have been a costly win. Mack pulled something in his pitching arm in the eighth and Allen had to finish up.

MACK OPENED the game with three perfect innings and Jackson's

# SA Dodgers

## take over first place

By The Associated Press Mark Bradley's three-run homer and a triple by hot hitting Ed Santos Thursday night helped the San Antonio Dodgers sweep a Texas League baseball doubleheader from the Shreveport Captains, 3-2 and 1-0.

The doubleheader sweep also allowed the Dodgers, who have won eight games in a row, to move into a narrow lead in the Texas League West. The Dodgers took over first place by percentage points over the Midland Cubs.

In other Texas League action, El Paso clubbed Tulsa, 12-7, Amarillo beat Arkansas, 7-5, and Midland beat Jackson, 6-1.

Bradley's three-run homer in the bottom of the third inning of the firs game helped Doug Harrison raise his pitching record to 4-2. Scott Budner was the losing Shreveport pitcher. Santos tripled to open the fifth in-

ning of the second game and came home with the game's only run when Hilario Soriano beat out an infield hit. Rusty McDonald, who struggled throughout the early part of the game, picked up the victory, his fourth against a single loss. McDonald gave up five hits and allowed several Captains to reach base before the Dodgers grabbed the lead. He retired the last five batters in order. Steve Cline was the losing pitcher. Santos now has 21 RBI, nine doubles, a triple and two homers.

The Tulsa Drillers jumped out to an early lead an appeared to be coasting toward victory, leading the El Paso Diablos, 7-5, going into the bottom of the seventh. The Diablos exploded for seven runs on three homers and took only run came with two-out in the seventh, after Mack had fanned four straight. Taco Perez double and Sergio Beltre singled in the run. In the eighth, Mack hurt his arm on a pitch to Hubie Brooks. However, he pitched again and got Brooks on a rap back to the box, but threw wildly to first and Brooks came up with a pulled hamstring. Both players left the game.

Midland got two third-inning runs off Jackson starter Rick Anderson, who is noted for his control, but walked Bill Haves and Dan Rohn. Martin then singled to left for a run and a second came in when the return to the infield was mishandled.

In the fourth Eric Grandy doubled and Carlos Lezcano doubled off the wall, but Grandy had to hold at third when Keith Bodie looked like he might have a chance to catch the ball off the wall. Mike Turgeon then got the run in with a fly ball

In the eighth, Martin doubled and scored on a single by Jesus Alfaro. Russell Clark relieved Anderson and after Grandy walked, Lezcano singled home two runs.

The Cubs final run came in the ninth when Hayes singled, was forced at second by Dan Rohn's grounder. Rohn stole second and then Martin plated the run with his fourth hit. Thatgave Jared 4-for-5 for the night and 21-for-43 against Jackson pitching this

CUB CLOUTS-Grandy was fighting a slump when Midland took to the road, but the loose-swinging righthander from Baltimore return home with an 11-game hitting streak after going 14 for 37 on the trip...Outfielder Brian Rosinski had his 10-game hitting streak stopped in Wednesday's doubleheader...The Cubs took the season's series with the Mets. 6-4.

## Segelke to face Dodgers tonight

Righthanded Herman Segelke, 5-2, who started with five straight, wins will be trying to snap a two-game lose streak when he takes the mound for Midfand at 7:30 p.m. today when the Cubs open a five-game homestand against the San Antonio Dodgers at Cubs Stadium. The game was switched from June 13 and season tickets for that date are good tonight...The Cubs standing 8-4 with the Dodgers this season.

Tonight is also Two-Bit Beer Night and Saturday it will be Diamond Night with every adult fan being given a packet containing a stone. Ten of the stones will be real diamonds. Appraisals will be done by Riggan's Jewelers ... Also district finals in Burger King's Pitch, Hit and Run will feature 9-to-12 year olds from Odessa, Hobbs, Abilene, Big Spring and

# indicted

ST. LOUIS (AP) - An indictment charging Kenneth Spinks, younger brother of former heavy weight champion Leon Spinks, with attempted robbery and assault has been returned by a St. Louis Circuit Court grand jury

Assistant Circuit Attorney Rick Meyers said the indictment received Thursday by Judge Floyd McBride charging the 19-year-old Spinks was in connection with the attempted holdup of a 67-year-old man last

Meyers said Spinks was accused of driving the getaway car in the incident. He said Samuel Lee Conley, 23, and Larry Lee, 20, were also indicted on attempted robbery and assault charges in the case.

### Pecos loses

AUSTIN, Texas (AP) First baseman Scotty Self cracked three straight hits, including a two-run triple, as Cleburne defeated Pecos, 5 2. Thursday in the Class 3A semifinals of school-

boy baseball. Lefthander Eddy Pruitt had a no-hitter for Cleburne for three innings and finished with a six-hitter to win his 14th game against a single loss this season. The loser was Genardo Rodriguez, who lasted only 3 1/3 innings and was pulled following Self's triple down the rightfield

bill on offshore records ploration and want to gain all the information at no expense" were be-

hind the bill. Since the logs are confidential, a major oil company could see that a drilling looked promising, Brown said, but could cap the test well instead of putting it into production, and no one would ever know.

"We're not talking about private land, we're talking about and owned by the people of the state. Land the state could be getting millions in taxes from if developed," Brown

At one point, Knowles asked if Brown was implying that the major oil companies were intentionally not developing some leases.

"They aren't even coming close to developing all of them," replied

Brown noted that logs of wells in Louisiana are public records after two years and the same applies to those from wells drilled beyond the three-mile limit in federal waters.

"Either Louisiana is right and everybody else is wrong, or we're wrong and everybody else is right,' said Sen. E. Edwards Barham of Oak Ridge. "I think it is in the public interest to make all logs public rec-

# Meeting scheduled

AUSTIN, Texas (AP) - Gov. Bill Clements and top Texas legislative officials plan to impress on the Texas congressional delegation Monday the "Texas position" on the energy crisis.

Clements, accompanied by Lt. Gov. Bill Hobby, Texas House Speaker Bill Clayton and Texas Railroad Commission members Mack Wallace and Jim Nugent, scheduled a morning meeting in the Sam Rayburn office build-

"It is pure nonsense" that there is plenty of oil and gas left in the United States, Clements said at a news conference Thursday.

"It is just not true, no matter what all these people are saying," he said when asked about newspaper advertisements that claimed there was no real gasoline shortage.

"We have a true, terrible energy crisis in this country. There is no question at all this is the No. 1 issue that is going to cause a giant economic dislocation in this nation." Clements said.

'We intend to talk to the Texas delegation in further support of the Texas position on this energy situation.

# Poerner reports gas shape good

CORPUS CHRISTI - Texas Railroad Commission Chairman John H. Poerner said the state's natural gas industry is in the strongest condition it has ever been.

"Despite obstacles which were encountered early in the 1970's in the form of frequent gas shortages, now the industry is in a good position to improve the quality of service to the consumer," Poerner observed in an address before members of the Texas Gas Association meeting here.

Poerner said optimism "rather than rampant cynicism sweeping our nation today" should be commonplace in the gas industry. "The free market place," he said.

"we once enjoyed in our state quickly responded to the short supply and in five years, thr number one enemy not enough gas - was overcome.' A sign of the marked improvement

in the industry's health, Poerner observed, is the fact that during the past two years there has only been one curtailment in the state which occurred on the first and second days of 1979 when bitter sub-freezing weather swept across Texas.

Adding to the improved supply picture, the Texas energy official maintained, was the Commission's unanimous decision in April to eliminate the state-level restrictions on the volume of natural gas used as an indus-15/64-inch choke and perforations trial boiler fuel.

The decision to rescind the Docket 600 boiler fuel use rule, Poerner said, served a dual purpose:

One was to keep the prime fuel available for Texas industry and citizens and hot have it siphoned off by other states, and two, to take advantage of the clean burning properties of natural gas in order to maintain clean air standards in Texas as long as "As Texans, it's ours. We paid to

develop it," Poerner asserted. "Our needs must come before those of other states, particularly California, a state that has repeatedly thwarted the efforts of industry to link our resources from coast to coast. As far as I'm concerned, Californians may breathe the pollution of their own political bad

and 258 barrels of water, through Poerner said he believes Califorperforations from 5,000 to 5,012 feet. nia's own stringent clean air standards "appeared to be the major The pay was fractured with 36,000 cause of their desire to switch from other fuel sources to our gas.' Total depth is 6,600 feet and 5.5-inch

The RRC Chairman noted that it has been natural gas that has provided the fuel to build Texas' vast coastal petrochemical and refining complex which, in turn, provides nearly a quarter of the national refining ability, 80 percent of the nation's synthetic rubber and 40 percent of our basic petrochemicals.

Poerner read a letter he received from the Texas Air Control Board which stated that TACB studies of Harris and surrounding counties indicate "as long as natural gas countinues to be used for most energy requirements, air quality in all but one very small portion of this very heavily industrialized area will be superior to that required by the national ambient air quality standard for sulfur

"However, any substantial curtailment in the availability of natural gas will result in a rapid increase in sulfur dioxide emmissions. Poerner maintained that the con-

tinuing availability of natural gas should be applauded by coastal area

# Tank rates increased

AUSTIN, Texas (AP) - The Texas Railroad Commission approved a 5 percent rate increase Thursday for about 60 motor carriers of tanktrucks.

The vehicles haul mostly liquid petroleum products, petroleum by-products and petrochemicals.

The Texas Tank Truck Carriers Association and the Texas Bulk Carriers Association requested as much as a 7 percent rate hike on behalf of the truckers.

# Schlesinger says gas outlook has improved

By J. P. SMITH The Washington Post

WASHINGTON - Energy Secretary James R. Schlesinger Thursday said the nation's summer energy outlook has improved and supplies of gasoline and other products will be 'tight but manageable." He also claimed the United States has met its International Energy Agency commitment to reduce oil consum ption by 1 million barrels a day.

Schlesinger said the world oil market "is stretched taut and any further. interruption could interfere with the delicate balance we have today." He said the current shortage runs between 1 million and 2 million barrels a

## **ENERGY** OIL & GAS

day worldwide. Department of Energy projections distributed at a news briefing Thursday set the shortfall at 1.6 million barrels a day with total free world demand at 53.6 million barrels a day.

As for the slightly improved domestic oil outlook, he said "there will be some easement, but it will not be great.

Overall, he said motorists can expect about 5 percent more gas oline at the pumps this summer than during the May crunch that forced gas lines in California and elsewhere.

Schlesinger's more optimistic energy outlook comes when his often controversial policies are continuing to draw criticism within som e senior administration circles, as well as on Capitol Hill.

His finding that the United States has already met its IEA goal, along with a firm statement Thursday that the United States has outperformed Western European nations in conservation, is geared, some administration sources said, to strengthe n President Carter's position as he prepares to meet with other industrial nation leaders at the Tokyo summit later this month.

Future prices, he said, depend on decisions taken at the June 26 meeting of the Organization of Petroleum Exporting Countries in Geneva. "One would be rash to predict there will be no price increase," he said. In a related development Thursday,

a senior DOE official, Douglas Robinson, told a Hill subcommittee there is strong evidence of price gouging at retail service stations. Robinston said some stations could be guilty of "substantial overcharges" for unleaded

He said that, of 1,137 alleged violations so far, 757 operators have signed

# Leaders to make attempt to halt rise

By R. GREGORY NOKIES

WASHINGTON (AP - President Carter and leaders of six other industrial nations may seek ways to put a lid on spiraling world oil prices at their economic summit conference in Tokyo this month, a key administration official says.

He said they also will consider new measures to boost energy production, including coal, and for cutting oil imports, and thus consumption, beyond the 5 percent previously agreed

"It will be a fair test of the summit whether the leaders are going to be able to do something in both of these areas," he said at a briefing for reporters Thursday.

The official, who asked not to be identified, said the industrial nations expect another increase in boil prices from a meeting of the Organization of Petroleum Exporting Countries in Geneva June 26. Discussions at the economic sum-

mit June 28-29 in Tokoyo are expected to be dominated by energy questions

and oil prices. "If, as expected, OPEC raises the price, it will be a major, major

issue," he said.

Besides Carter, others at the summit will be the leaders of Germany,. France, Great Britain, Italy, Canada, and the host country, Japan. It will be the fifth time, beginning in F'zance in 1975, leaders of these nations have

met to discuss economic issues. Although oil prices have been a prime topic before, they will command even greater attention in Tokyo because of oil shortages and skyrocketing prices, which are up more than 30 percent since the first of the year.

'The energy situation is much more urgent than at past summits," the official told reporters at the briefing. "It is an acute problem that is not going to get much better" anytime The official indicated the govern-

ments are most concerned about the rising price of oil in the spot market, where prices now range from \$30 to \$35 a barrel, compared to the average world price of \$17 a xarrel. With demand for oil exceeding sup-

ply by a wide margin, there is a temptation for oil nations to sell at the spot price, rather than at the lower contract price. The basic OF'EC price is \$14.75 per barrel, and it is this price the industrial nations expect will be increased at the June 26 OPEC meetconsent orders with DOE to lower

At his news conference, Schlesinger said there was no evidence of any collusion among refiners to hold back supplies and push prices upward.

In recent days, DOE and State Department analysts have suggested that OPEC will raise its prices - now officially \$14:55 a barrel, although the average is more than \$17 a barrel - to \$18 or more. At the least, these officials say, U.S. gasoline prices will increase by 12 to 15 cents by Decem-

As for the improved outlook for domestic gasoline supplies, Schlesinger said it is due primarily to the increased output of refiners, who are now operating at 85 to 87 percent of capacity, compaed with about 83 percent in recent months.

"There has been some excess conservatism in refining policy," Schlesinger said. As for the shift upward in the output of gasoline and other products, Schlesinger said, "We have strongly encouraged the industry to operate at these levels." Last month, Schlesinger critics in

the administration and on Capitol Hill, - such as Rep. Toby Moffett, D-Conn.

 appealed to the secretary to force the oil companies to increase refinery

production Oil company executives, however, say the United States had a disproportionate share of the shortfall because of DOE pressure - since ended not to buy in the spot market and because companies can command

higher profits for oil products in some

other countries.

At Thursday's briefing, Schlesinger said the U.S. consumer is faced with a 'disproportionate share' of the world shortfall due to the more-pronounced impact the Iranian shutdown had on U.S. oil companies, the tendency of oil exporting countries to break contracts in order to sell at more-lucrative spot market prices and the unwillingness, until recently, of U.S. companies to bid for oil in the high-priced spot market.

Schlesinger said that, while the administration had asked Saudi Arabia to increase its oil production, "I do not know that we can state we have any expectation of an increase." Last week, there were reports from Riyadh that it would boost oil production by as much as half a million barrels a day in July.

LERWICK, Shetland mot, razorbill and gan-Islands - On Dec. 30 the net. tanker Esso Bernicia ruptured its hull while docking at the new oil peat from the fields to rest of the United Kingterminal for the inter of provide heat for the is dom was having difficul-Sullom Voe.

tons of fuel poured into-and exported to the well." the water. Then, frus- world. trating efforts to contain gaged mainly in fishing, the spill, a winter gale struck the Shetlands, spreading the thick oil over a wide area.

The oil was washed up along the bleak but beautiful coastline, a nesting place for birds and a feeding area for the famous Shetland sheep. Within days the birds' feathers became matted and the birds began dving by the thousands.

The oil spill also contaminated the seaweed that is exposed at high for the sheep. Some of and four months of bad crowded in - they curtide and provides food the animals were poi. weather." The current rently number 3,700 - to soned, others became spring has been no exnired in the sludge and drowned, hundreds of lambs died because their oil-coated mothers could not suckle them.

Thus the people of these remote, pastoral British islands - lying about 100 miles north of the Scottish coast in the North Sea - came to face their fate: they would profit from the new refinery at Sullom Voe, but they would also suffer

"It was a real disaster," one official said. We are still trying to clean up the mess.

A consortium of oil companies has spent \$6 million in the moppingup operation but oil traces remain. Additional fencing is being put up to keep the sheep away from the oily seaweed. The pollution's impact

will continue to be felt. Sheep are grazing on lands that had been reserved for cattle, and feed must be imported for the cattle. Months from now, the

Shetland islanders will still be balancing the relative advantages of oil against the disruption of their traditional way of When oil was discov-

ered in the North Sea in 1971, the Shetlands were a place apart - a cluster of low-lying, treeless, heather-covered, islands at Britain's northern extremity, at about the same latitude as the southern tip of Green-The Shetlands were

Norse-ruled until 500 years ago, when, as part of the dowry of a Danish princess they became part of Scotland. Many place names are

derived from the Norse. Lerwick, the name of the capital, comes from leir vik - muddy bay. Sullom comes from sol heimr - place in the

Of the dozens of islands, only 17 are inhabited, the largest confusingly called "Main-

Birdlife abounds and many rare species are present - the Arctic skua, the red-throated

diver, the snowy owl - building processing facalong with the more tories. Reclaimed land common puffin, guille- provided more grass for sheep and cattle.

Relatively speak-Sheltand ponies were ing," a Shetland official originally bred to carry said, "at a time when the landers' cottages. Now ties with employment, Within hours, 1,100 they are raised as pets we were doing rather

When oil was found in the North Sea, the Shetland archipelago was the nearest point of land, and the most economical way to move the oil was by pipeline to a terminal here, then by tanker to The Shetland wool that refineries in Britain and

> Not long after the British government decided to proceed with construction of the terminal at Sullom Voe, the islanders' traditional way of life began to change Construction workers build the storage tanks.

ception - "miserable," wharves and pipelines. Officials of the Shetland Islands Council, the local government, were er, the islanders have re. aware of the potential mained cheerful and dangers, as well as the friendly and resigned to potential advantages.

Stock market gains

NEW YORK (AP) — The stock market staged a broad advance today as it attempted to stretch its rally into a fourth day. Trading was heavy.

At 2 p.m., the Dow Jones average of 30 industrials was ahead by 2.60 points at 838.10. Gainers led losers by better that 2-1 among New York Stock Exchange-listed issues.

New York Stock Exchange volume came to 29.9 million shares in the first four hours of trading.

The Labor Department said producer prices overall rose just .4 percent last month as beef prices declined. But producer prices at the intermediate level rose 1 percent in May, while prices at the crude level gained .8 percent.

Oil, gas and petroleum industry service issues have recorded sharp gains lately as rising energy prices and rising sales have created profit gains and new opportunities.

Among energy stocks, Continental Oil was up 1/4 at 36% and Charter jumped 21% to 25 %

McDonnell-Douglas, its DC-10 jetliners grounded by federal order, fell 1/2 to 21.

The NYSE's composite common-stock index gained .35 to 57.58; the Amex market value index added 2.20 to 194.13.

# Current shortfall in repayment of loans noted

NEW YORK (AP) - The unprecedented slowdown in the repayment of consumer debt during April could mean two things: statistical error, or that borrowers are finding it difficult to meet repayment

The possibility of error never can be fully discounted in dealing with numbers issued by the federal government, since most of them are massaged by seasonal adjustment factors, to make them

Still, the shortfall in repayments was so marked as to suggest that many borrowers are running into problems with their finances. In an over-extended budget, loan repayments understandably become tardy.

This does not automatically mean the onset of a slowdown, however, because in this unique economy of ours there is still money available for installment loans. That being so, the inevitable can be delayed. An overextended borrower might, for example,

simply renegotiate the the loan that he is unable to repay. The technique, repaying by reborrowing, is common enough, Uncle Sam has used it for many Eventually, however, neither borrower nor lender is willing to put up with such tactics. Lenders get

there is no other way out but to cut back on lifestyle. The April debt statistics suggest we are coming to that point, but that we are still one step away. Consumers added \$25.8 billion to their debts. And

tougher, borrowers more realistic. The latter realize

their repayments slowed, to only \$21.7 billion. That repayment figure was \$1.2 billion less than in May, the sharpest repayments decline on record. It seems to indicate that borrowers had a tough time repaying. And a tough time is prelude to a spending

cutback. One doesn't need to rely solely on government figures to reach that conclusion. Delinquencies have shown up in several credit areas, home mortgage loans excepted. And personal bankruptcies are rising again.

Anyone can extend the reasoning to the next step: A sharp spending cutback could catch sellers with too many goods for the lowered demand. Poor business, of course, means rising unemployment. And unemployment means difficulties in repaying

loans. In short, while a downturn could correct a lot of the economies current imbalances - price increases, high interest rates, an inflation psychology among them - it could raise the dickens too.

The problem facing officials is to bring about a correction without creating a cascade of disruptions. This has always been the problem with corrections, but this time the dimensions might be larger. To begin with, the expansion has thrown interest

rates, prices, expectations and other factors further out of line than in most recessions of the past few decades. And then there are the elections.

But rarely are solutions reached for purely economic reasons; in most instances politics are in-

The dilemma for the Carter administration is whether to permit the economy to correct itself with a minimum of interference or to plunge into the

# RRC appoints panel to study policy

AUSTIN-A 12-member advisory committee of experts in the Texas oil and gas industry has been appointed by the Railroad Commission to review and recommend alternate procedures for well operators seeking category status under the federal Natural Gas Policy Act of 1978.

Taylor Yoakum of Midland and William M. Fowler and Bill Roden, both of Odessa, were named to the panel that represent experts in the legal, transmission and production areas of the industry.

NGPA guidelines allow the state to design its own well category determinations, and commission General Counsel Rex White said the RRC was simply

exercising that option. The commission's Well Classification Section has reportedly received and docketed approximately 9,800 applications from operators for natural gas

well determinations. White said his staff has prepared a draft that will result in less paperwork for operators and simplify the NGPA process.

# Suggestions live up to 'comedy' venture

By JUDIE GLAVE

NEW YORK (AP) - They were there to discuss the serious question of "the future of comedy in public television." But some of the nation's to gagsters could not resist some tongue-in-cheek sug-

Seeking a subject that would combine the familiar sitcom form with the tonier atmosphere of the Public Broadcasting System, funnyman Robert Klein suggested, "Something like the 'Adventures of Teddy Roosevelt' just might work." National Lampoon contributor Jeff Greenfield said

writing is the key and suggested "Jeanne Dixon's Astrology for Dogs" would go over if the lines

Those were a few of the less-serious ideas exchanged at WNET's day-long, informal rap session with 12 of the country's top comedy writers, producers and actors.

Executive Producer Jac Venza explained that WNET wanted to try to fulfill a suggestion made in the Carnegie Commission II report for "greater representation of native American humor on the public airwaves.

Stiller's wife and comedy partner, Ann Meara, said WNET should follow its own path in the search for comedy, saying you can get "a hernia" in the mind trying to please the network brass.

"All in the Family" director Paul Bogart opined

that situation comedy was "held in low regard by everyone except those who watch it,

Actress-writer Judy Kahan, of Norman Lear's 'Fernwood 2-Night" suggested renaming the format "sitcalm."

and was elected secretary-treasurer in 1976.

By OWEN ULLMANN

WASHINGTON (AP) - One of the largest mergers in U.S. labor history is giving birth Thursday to a goliath organization that immodestly hopes to grow into the nation's No. 1 union.

At the helm of this creation is a young, little-known union leader suddenly perched at the forefront of the American labor movement.

The new union is the United Food and Commericial Workers, the product of two powerful food industry groups - the Retail Clerks International Union and the Amalgamated Meat Cutters and Butcher Work-

With a combined membership totaling 1.25 million and growing every day, the UFCW instantly becomes the AFL-CIO's largest union and the country's fourth largest - trailing only the Teamsters, the National Education Association and the United Auto Workers. Many labor observers believe the UFWC could be the largest in a decade.

THE MAN HEADING this giant is William H. Wynn, a 47-year-old Indiana native who started his career bagging groceries and unexpectedly became tme Retail Clerks' president in 1977 when his predecessor died in office.

By virtue of the UFCW's size and resources, Wynn will command the ear of both the labor movement's inner circle and the chieftains of the Democratic Party, from Jimmy Carter on down. After a good dose of planned media exposure, Wynn's aides hope he also will gain the public's attention as a major

The 735,000-member Retail Clerks and 520,000member Meat Cutters voted themselves out of existence and agreed to create the new union at separate conventions Tuesday and Wednesday. The marriage of the two, long-time organizing rivals marks the largest merger in organized labor since the AFL and

CIO joined 24 years ago. The founding of the new union will be commemorated Thursday and Friday at a convention that is scheduled to attract President Carter, Sen. Edward Kennedy, several cabinet members, United Auto Workers President Douglas Fraser and a host of other labor leaders.

The two unions had been talking about merging since 1972, but the talks kept bogging down. Labor leaders thought that when the clerks president, James Housewright, died in 1977, so did the merger

BUT WYNN, Housewright's successor, was determined to keep the merger alive, aides say. When a tentative agreement was reached late last year, Wynn's stock within the labor community soared.

Meat Cutter's President Harry Poole, who becomes a vice president of the new union, receives praise for helping pave the way to the merger, but Wynn gets most of the accolades.

'The perspective of Wynn was altered after he put together the merger," said one Carter administration official. "That accomplishment clearly has had a great impact on people."

in Norway, and 80 to 90 people are killed in It's not surprising, then, that efforts to increase safety at sea for users of small boats rank high

are damaged by fires and explosions every summer

OSLO, Norway (AP) - About 200 pleasure boats

among Norwegians. Safe design and construction have thus become increasingly important considerations in recent

years with the dramatic rise in pleasure-boat ownership. Today every fifth Norwegian family owns a small pleasure craft. They range in size from small open

boats with outboard motors, medium-size wood or reinforced-plastic family boats - called "snekke" here - or speedy cabin cruisers for longer trips along the coast. Norway also exports pleasure boats, with exports

last year reaching some \$40 million. Because of the accidents and lost lives, Norwegian

consumer organizations started a safety campaign

They came up with a form listing minimum standards of quality. These requirements, however, failed to satisfy everybody concerned and finally the Norwegian ship-classification society, Det Norske Veritas (DnV), was asked to develop a new set of rules.

Prepared in cooperation with insurance companies as well as the national Maritime Affairs Directorate, the new rules appeared in 1969 and have since been adopted by all the Nordic countries.

Then classification of all pleasure boats began. Some 170 Norwegian manufacturers collaborated in this effort, and today a total of 185,000 boats and 450

Safety rules cover such features as hull strength, seaworthiness, fire resistance and fire prevention,

fire-fighting facilities and provisions for escape in case of fire or accidents. Many pleasure boats today are made from glassreinforced plastic, and special attention is paid to their construction requirements. Emphasis is put on

thickness of the bottom, sides and the deck. Vessels are also strengthened for engine beds, mast support, mooring fitness and keel. Boats must also meet special requirements to avoid swamping. Stability is checked in relation to boarding methods and the maximum movement of

people on board. Watertight bulkheads and bilgepump arrangements are specified to prevent leakage through the hull. All decks need non-slip surfaces - as do all grips, handles and rails. An escape ladder on the outside is

a must on all larger pleasure boats

Prevention of fire and explosion is a central aim of the rules. Certified petrol-engine boats made of glass-reinforced plastic must be designed with separate and individually ventilated gas-tight engine and fuel-tank compartments. All petrol tanks need top connections with special attention being paid to the tightness of fuel pipelines and flexible hoses

These and other precautions have significantly reduced the risk of fire and other mishaps in small boats around the coasts of Norway and other Nordic

DnV claims the odds of fire in certified boats are only 30 percent of the rate in other crafts.

# When tulips come, it's Tuckerman time

PINKHAM NOTCH, N.H. (AP) — While most residents of the Northeast enjoy spring, devoted adventurers annually Friday, June 8. trudge back into winter at an isolated area called

Tuckerman Ravine. They come from throughout the country to New Hampshire's postcard White Mountains, leaving the warmth of spring on the road below to struggle more than two hours and

is no lift. The reward? Skiing or riding an inner tube down the steep, dangerously icy slope. It takes only a few minutes - some say seconds - to

two rugged miles up a

snow-covered,

wind-driven trail - there

reach the bottom. The ritual has been going on year after year after year.

"ARE WE nuts? Yes, I guess so," said Andrew Painter, a 77-year-old retired New York banker who has undertaken the ski adventure each spring since 1938, "except for two years during the war when we couldn't

get gas." A run down the ravine is a treacherous challenge for the most expert skier, particularly this year with much of the surface ice-covered. A fall at the top of the bowl on the east side of 6,288foot Mount Washington,

By DAVID WYSOCKI the highest peak in the Northeast, often means a harrowing slide to the

base of the ravine. A recent hike to the ravine began in 70-degree temperatures at the base of the mountain. But to the hikers walking up the trail, many of them lugging skis on their shoulders, the frozen beards and snow-covered backpacks seen on

to come. Less than two hours later, after the grueling uphill walk, the temperature stood at about 25 degrees; snow was falling and the wind was howling, dropping the wind-chill factor to near-

those walking back down

was a warning of things

ALONG THE way, hikers crammed into a small building, nick-named "Howard Johnson's," to warm themselves while others stomped their feet out-

ly 20 below.

The uncomfortable circumstances aroused a cameraderie as some ate and others drank wine.

They also tried to decide whether they had already had enough, or wanted to hike another hour or so to ski the bowl

or ice-covered trail.

"I think I'd rather have a snack and go back down where it's warm," said one young woman, who sat shivering on the porch. Others, who had com-

pleted the brief ride down the bowl, recounted the experience.

"IT WAS good. We got three runs in," said Martin Roth, 36, who drove eight hours with his wife, Joze, from Westchester County, N.Y. They said it was their ninth spring trip to the mountain.

"This is our annual end-of-the-season run, said Mrs. Roth. "Now we can hang up the skis." "We couldn't even see

where we were going, the snow was flying up so high," said Chet Davis, 21, a University of New Hampshire student who careened down the bowl on a large inner tube. "It was a lot more fun than skiing.'

On a good day, as many as 2,000 skiers trudge up the mountain, said Rene LaRoche, a U.S. Forest Service ranger whose office is in a hut behind "Howard Johnson's.'

Some seasons, he said, skiing continues well into

HE ATTRIBUTED the time to relatively little snow and rain storms that washed away much of the snow, although 30-35 feet remained. More Enforcement than 50 feet in the bowl is

not uncommon. The tremendous snow depths in the cirque, a geological term used to describe an ancient glacier head, result from strong prevailing westerly winds that blow snow from the west side of the mountain, over the peak

and into the bowl. "You can get one inch on the ridge and a foot or more in the bowl from the same storm, LaRoche said.

Geologists believe that if the annual mean temperature dropped slightly, Tuckerman would have snow year 'round and once again would be covered by a glacier.

Despite the less than desirable conditions this year, Painter, known as "Tuckerman Andy." returned for his annual ra-

vine weekend. "I know when the poor conditions at the tulips come up that means Tuckerman time," said the Darien,

# Conn., resident.

## criticized

WASHINGTON (AP) The chief of the Justice Department's civil rights division says a law designed to fight racial discrimination by cutting off federal funds is not being enforced well.

Assistant Attorney General Drew S. Days III said Thursday there is general confusion and a lack of manpower and funding to enforce Title VI of the 1964 Civil Rights Act,
