Jewish vigilantes claim responsibility for acts of terrorism in U.S.

MINEOLA, N.Y. (AP) — A group of self-described Jewish vigilantes who said they mailed bombs to suspected Nazi sympathizers last week have claimed responsibility for stabbing a 70-year-old man they thought was a Nazi war criminal.

"This is only the beginning," a man who identified himself as a member of Jewish Executioners With Silence (JEWS) warned in a telephone call to a radio station after Wednesday's stabbing.

The caller said the attack on Vladislave Civzelis, 70; of the Bronx, was intended for Boleslavs Maikovskis, who was convicted of war crimes in Latvia, a Soviet satellite country on the Baltic Sea.

It was the second attempt to kill Maikovskis, who came here in 1951 and later was convicted in absentia by a Latvian court ad condemned to death for the slaughter of Jewish children.

'I'd like to take responsibility for the stabbing," a caller, who also said he was from JEWS; told the New York Daily News.

"We are also responsible for the letter bombs last week," he said. A caller told The Associated Press last week that bombs had been sent to former Nazis and Nazi sympathizers in several U.S. cities. The bombs were later found and dismantled without injury.

That man had identified himself as a member of the International Committee Against Nazism. A New York-based group by the same name disavowed any part in the scheme.

The new name discrepancy was not explained by the man; who also called Among those who received bombs last week was Tscherim Soobzokov, a

former Nazi SS officer living in Paterson, N.J. He was cleared by a federal grand jury last month of war crimes. Bombs also went to the National Socialist White People's Party in Ci-

cero, Ill., and Gary Rex "Gerhard" Lauck, head of the overseas branch of the German Nazi Party in Lincoln, Neb. Bombs sent to Matt Kohel, head of the National Socialist White People's

Party in Arlington, Va., and Frank Collins, head of the National Socialist Party in America, in Chicago, were found in post-offices. Police gave this account of Wednesday's attack:

Civzelis and his wife, Marta, 74, were relaxing in lawn chairs on the Maikovskis' driveway Wednesday morning after, a week-long visit with

As they talked, a stranger with a scar on his upper lip approached. "Are you Maikovskis?" he asked.

Civzelis replied: "No, I'm from The Bronx."

The man carried an overnight bag and told-the couple he would pay them "a lot of money" for a news story. Then Civzelis called Maikovskis' wife, Janina, who said she wasn't interested.

The man started to walk away, then whirled and pulled a gun, ordering the elderly couple into the back yard where his pistol misfired twice. He then attacked Civzelis with a knife, stabbing the old man in the back and

Civzelis' wife was knocked to the ground by the attacker and suffered a broken nose and broken wrist. Both were rushed to a local hospital, where Civzelis underwent surgery and was reported in critical condition. His wife was in good condition.

Last August, Maikovskis was wounded when he refused to let a man in his house. The assassin fired nine shots through the door, hitting Mai-

Carter off for Vienna

'With hope but without expectations'

WASHINGTON (AP) - President Carter headed for Vienna today, saying he is approaching his first summit with Soviet President Leonid I. Brezhnev "with hope but without false expectations.

At a departure ceremony on the White House south lawn, the president said his main goal at the summit and the "unchanging duty of every president" is to avoid nuclear war while maintaining U.S. security.

Carter left with modest goals for the summit, where the two leaders will sign a treaty to limit U.S. and Soviet strategic nuclear weapons. He said the treaty "gives us en-

hanced national security and increased hope for a peaceful future.' At the departure ceremony, Vice President Walter F. Mondale told Carter: "The best wishes of the

this most crucial of all missions.' "I'll certainly do the best I can," the president said before he, his wife and daughter boarded a helicopter for

American people go with you today on

Andrews Air Force Base in nearby Maryland. Their plane took off at: 26 a.m. EDT on the eight-hour, 15-minute flight to the Austrian capital.

While conceding that no summit can end the "sharp competition" between the two superpowers, Carter said he will try to "broaden our communications with the Soviet leadership" as well as make clear U.S. views "so that there can be no dangerous misunderstandings as we pursue our separate courses.

"I go to Vienna with the confidence which can only come from representing the greatest, the strongest and the most free society in the world," Carter declared.

Although surprises cannot be ruled out, the principal purpose of the summit remains the signing of SALT II.

But aides say Carter will be looking beyond Vienna with the hope of promoting a continuing U.S.-Soviet dialogue aimed at smoothing "the peaks and valleys" in relations between the

In addition, the U.S. president can be expected to attempt a firsthand appraisal of Konstantin Chernenko, the politburo official some see as having the inside track to eventually

succeed the ailing Brezhnev. U.S. officials sprang something of a surprise earlier this week by revealing they expect Chernenko to participate in the summit, the first between U.S. and Soviet leaders in 41/2 years.

Mrs. Carter and daughter Amy are making the trip and will have their own schedule, including a Danube River cruise.

At a news conference Wednesday, Secretary of State Cyrus R. Vance, who will accompany Carter, declared, "We must move away from the peaks and valleys, the ups and downs we have seen, to a more stable relationship.'

Vance also told reporters Carter will stress to Brezhnev that "detente is a two-way street and that we must both recognize it as such."

Man persuaded

HOUSTON (AP) - The owner of a West Side service station says he lowered his \$1.20 a gallon price for gasoline after someone fired bullets through a window and the canopy at the

Ken Catmull lowered the price to 99.9 cents for premium, 98.9 cents for unleaded, and 97.9 cents for regular.

fired by unknown persons Tuesday night and he lowered the prices Wednesday morning after a conference with his

The station, Catmull said, is being audited by the Department of Energy. He said DOE officials had indicated the audit would be completed Monday but advised him Wednesday they were still at work.

Catmull said he originally raised his prices to the high level in an attempt to maintain normal operating hours at the station which also handles a large volume of beer and cigarette sales. He said he now will be reducing his hours of operation. The high prices did not seem

to bother customers.

Guard patrols Alabama roads

By The Associated Press

National Guardsmen patrolled Alabama's roads today and Tennessee officials vowed court action against a violence-ridden trucker's protest that is squeezing supplies of food and fuel in many states.

Independent owner-operators continued to blockade diesel pumps at scattered stations coast to coast or tie up highway traffic to press their demands for more and cheaper fuel and fewer load regulations.

A few more rigs were reported shot up Wednesday but there were no new injuries. Police said some sniping victims were shot at after being warned over their citizens band radios to stay off the road.

The violence continued this morning when a sniper's bullet tore into the radiator of a truck hauling grain on Interstate 80 just north of Omaha,

And New York state police arrested two drivers when 100 trucks blocked traffic during the rush hour at the Newburgh-Beacon bridge north of New York City. Police said traffic was stacked up four miles in both directions before the arrests broke up

the jam. Several truckers were arrested Wednesday, including two in Montana charged with destruction of property for firing at the fuel tank of a grain truck. The pair, David Hashbarger and Jack Westre, both 30, face up to 10 years in jail and a \$5,000 fine if con-

Alabama Gov. Fob James called out the National Guard after Linda Pruett, the 20-year-old wife of a Georgia trucker, was shot and critically wunded late Tuesday while riding in her husband's rig.

State troopers rode shotgun on rigs hauling fuel to Alabama hospitals, law enforcement and fire protection facilities as well as those laden with perishable goods such as produce.

The truckers' week-old protest has begun to take its toll on already-short supplies of fuel. In Birmingham, Ala., officials Wednesday began rationing

fuel for city police and fire vehicles.

Tennessee Gov. Lamar Alexander sympathized with the truckers' concerns but said the state will seek a court order today to "prohibit anyone from interfering with the movement

of gasoline to consumers." Food shipments were also pinched, said Bob Green of Overdrive, the magazine of the Independent Trucker Association, which Monday called for a strike by the nation's 100,000 owner-

Green-said California growers and shippers are having trouble finding trucks to go to the East Coast. "You can't run from California to New York City not knowing if you're going to have enough to fuel to get there,

Bill Miles, who buys produce for nearly 250 Bi-Rite Food Stores in middle Tennessee, said, "We're in pretty fair shape at the moment but it's going to catch up with us.

Meanwhile, in Sun Valley, Idaho, state leaders attending the Western Governors' Conference urged the Interstate Commerce Commission to allow rate increases for merchandise hauled by the independents.

And William Maebert, head of the National Association of Truck Stop Operators, called on Transportation Secretary Brock Adams to become "actively and vocally involved" in seeking solutions to the diesel fuel

The truckers say they can't make a decent living between the rates they're allowed to charge and the rising price of diesel fuel, which has jumped to \$1.29 a gallon in some

Midlander, 16 others indicted in cocaine case

LUBBOCK - A Midland oilman was among 17 persons named Wednesday in indictments alleging a conspiracy to deliver and sell cocaine

in Lubbock. The group, indicted last week by a federal grand jury, has been directed to appear at 9 a.m. Friday before a

U.S. magistrate in Lubbock. Named from Midland is David Lansom Rankin, 706 W. Nobles St. He is

employed with Rankin Oil Co. The names were disclosed about 3 p.m. Wednesday after U.S. assistant

attorneys unsealed five of six indictments returned Jan. 7 by a federal grand jury here. One of the indictments alleged a

14-person conspiracy involving transportation of cocaine from Ruidoso, N.M., to Lubbock that began March 1,

Another indictment charged three

persons with bringing cocaine from Austin to Lubbock in late June of last

The only single count indictment returned by the grand jury named Rankin as the defendant. That indictment accuses Rankin of perjuring himself while giving testimony concerning cocaine transactions to the grand jury.

Rankin also is charged in a second indictment with conspiring to possess cocaine with the intent to distribute the drug and with facilitating that conspiracy through a telephone con-

The Midland man is one of nine persons who face multiple charges under the five indictments.

Officials said the investigation cost \$70,000 and involved wiretapping and extensive air and ground surveil-

The 17 persons named in the indictments, other than Rankin, include 11 from Lubbock, two from Ruidoso, one from Austin, one from McLean and

one whose hometown was unknown. Warrants were issued for three men still at large. They are Jerry Wayne Burgess, a Ruidoso art gallery owner; John Paul Newsom of Ruidoso, and a man known only as "Holly-

Besides Rankin, the other non-Lubbock persons named were rancher Ted Simmons of McLean and Joe

Leonard of Austin

Also indicted were Randy Tom Leavitt, a Texas Tech law student; Steve Hoyle Moss, a ski shop owner; Steve Zane Hall; Robbie Gamble, an oil and realty businessman; Robin Houston; Bobbie Ledbetter; former night club owner Eli Masso; used car salesman Scott Lamoreaux; Blas Torres Jr., former waitress Suzanne Smith and Steve Bussell.

Old North Ward School may have been oldest structure in Midland

By JOE SALMAN Oil Editor

Apparently what was the oldest structure in Midland was torn down less than two months ago, and more than likely even those who knew about the building's demise did not realize the significance of its pass-

When the old North Ward School groaned and creaked while being tugged at by cables attached to bulldozers until it was nothing more than a pile of unwanted rubble, an era came to a close for Midland - an era

that lasted more than 90 years. In April, when the last remnants of North Ward - later known as North Elementary - were scrapped and hauled away from 600 W. Ohio Ave., it marked the first time since 1885 that the location was without a facility used for the education of children or young men and

Not only did an era end, but what probably was the oldest building in Midland became a part of the North

Information from the obituary of one of Midland's pioneers reveal the historical significance of the old North Ward School.

The obituary is that of J. N. Jackson, who, along with his wife, moved to Midland in 1883 as one of the first permanent residents of the town.

In 1885, Jackson became one of Midland's first schoolteachers when he stood before his classes in a threeroom, wood, L-shaped building that stood on the spot where North Ward was built.

The wood structure was torn down in 1890 and replaced by a brick building that was used as the school until North Ward was built in 1927.

Apparently, the old school was still in pretty good shape, but the city needed a new high school and at the same time an elementary school or two. A new high school was erected elsewhere and North

Ward was constructed. Some of the townspeople wanted to preserve some of Midland's educational history, so it was decided to incorporate part of the brick building erected in 1890 into the 1927 version.

It follows, then, that when the wrecking ball and bulldozers had done their work, a building erected in Midland in 1890 - 89 years ago - had vanished. Jackson moved from Midland in 1923, and was living in

So, until only a few weeks ago, a small part of that old

building could be seen as part of North Ward.

Extended forecasts

Saturday through Monday West Texas: Clear to partly cloudy and continued warm Saturday through Monday. Highs in the 90s except near 105 lowlands of the Big Bend. Lows 60s north and 70s

North Texas: Generally fair and warm: Highest temperatures in the lower to mid 50s. Lowest temperatures in the lower to mid 70s.

Directors of PBRPC pass Lamesa grant application

Lamesa's application for an Urban Development Action Grant was passed with favorable comment in Wednesday's board of directors meeting of the Permian Basin Regional Planning Commission.

The grant application to the De-Warm weather

should continue

Warm is the weather word for Friday from the National Weather Service at Midland Regional Airport. The mercury is expected to climb into the upper 90s with few clouds to diffuse the rays of the sun.

Area weather watchers reported fair skies and a "beautiful morning" around the Permian Basin early

The overnight low reached 60 degrees and the low tonight is expected to touch the mid-60s. The high

Wednesday was 90 degrees. The record high for Wednesday and the record low for today were both set in 1947, with temperature readings of ,103 degrees and 56 degrees, respec-

partment of Housing and Urban Development requests \$623,100 to help stimulate private investment of \$4 million for community development

Texas area forecasts

West Texas: Fair with very warm afternoons and mild at night through Friday. Highs through Friday in 90s except above 100 along the Rlo Grande from El Paso to Big Bend. Lows in 60s and 70s tonight

North Texas: Fair and a little warmer through to-night. Mostly fair and continued warm Friday. Highs through Friday. 89 to 99. Lows 64 to 69.

South Texas: Fair through Friday with warm days and mild at night. Highs upper 80s to mid 80s. Lows mid 50s Hill Country to low 70s along the Gulf Coast.

Port Arthur to Port O'Connor: Easterly winds 10 to 15 tots through Friday Seas 2 to 4 feet.

Port O'Connor to Brownsville: Easterly winds to to 15 knots through friday Seas 3 to 5 feet.

The major project activities of Lamesa's UDAG program are construction projects for a shopping center, a day care center and the reconstruction of the Lamesa Cotton Oil

Lamesa's UDAG project is designed to encourage population growth, provide employment for low and moderate income groups and to upgrade Lamesa's tax base to provide increased revenues.

Other notable resolutions that passed with favorable comment

-A grant application from Seminole to the Farmer's Home Admimistration for area development assis-

tance planning. -A grant application from the Criminal Justice Advisory Committee to the Criminal Justice Division of the Governor's Office for the continuation of funding for the Regional

Planning Project for 1980. -An application to the Texas Department of Community Affairs for a 1979-80 regional drug abuse plan.

Testimony to begin in Estes trial DALLAS (AP) - Attorneys esti-

mated testimony in the fraud trial of paroled West Texas con man Billie Sol Estes would begin this afternoon after jury selection had been completed during the morning session.

Estes and Midlander Raymond K. Horton are standing trial on charges of conspiracy to committ fraud.

A total of 26 panelist were picked Wednesday after tedious individual questioning of the 52 prospective jurors. After attorneys agree on 35 potential jurors, they will strike names until a final panel of 12 and two alternates are selected.

Most of those excused Wednesday said they were familiar with Estes' previous fraud conviction and indicated it would prejudice them during their deliberations

Early in the day, Assistant U.S. Attorney Jim Rolfe moved to dismiss one of the four indictments returned against Estes on Feb. 22. The dis-

John Wayne fan tries to capture image of 'Duke'

PHILADELPHIA (AP) - The U.S. Mint's chief designer and engraver, a longtime John Wayne fan, is trying to capture the actor's bigger-than-life image on a special congressional

Frank Gasparro, who remembers seeing Wayne movies as a boy, recalled, "John Wayne always straightened out all the problems and he always treated the girl proper.

"When you came out of the movie, you always felt a little bigger than you were. Wayne was a big man - not just in body, he was bigger than life. That's what I'm trying to show in the

Gasparro had been working on the veteran actor's special congressional medal for five hours when he learned of the Duke's death.

"It was a shock," said Gasparro. "I was hoping to finish it before his

Wayne's medal was authorized by Congress and approved by President Carter May 26 at the request of several film stars. Wayne, who died Monday after a film career that spanned half a century, joins 31 other Americans so honored, including the Wright brothers, Charles Lindbergh, Jonas Salk and Marian Anderson.

It will take about three weeks to finish the 111/8-inch-diameter green wax model that will be used to produce Wayne's three-inch gold medal, Gasparro said. The one-of-a-kind coin likely will be given to Wayne's family, with bronze duplicates eventually made available to the public.

"I understand the government already has received about 5,000 letters asking for duplicates," Gasparro

The sculptor was advised June 1 that he would be designing the medal-

The design authorized by Congress called for a portrait of Wayne on one side with the words "John Wayne -American.

The design for the reverse side of the medal is still under consideration.

Gasparro said. Michael Wayne, one of the actor's sons, sent Gasparro two photographs. He suggested that one, showing Wayne on horseback galloping through Monument Valley in Utah, be used on the reverse side. Gasparro said he has sketched an adaptation of the photo for use on the medal and

sent it to young Wayne for approval. The actor's son also sent a head shot from the movie "The Alamo," which is being used with 10 others for the portrait side of the coin.

Gasparro previously has designed coins featuring the faces of Susan B. Anthony, J. Edgar Hoover, Ms. Anderson, Jimmy Carter and others.

Wayne became Catholic the day before he died

LOS ANGELES (AP) - John Wayne, known for his tough talking movie ways, rarely went to church. But 24 hours before he died, "The Duke" became a Catholic and re-

ceived the last rites, his family says. Wayne, whose parents were Presbyterian, had three wives - all Catholic. His seven children and 21 grandchildren were raised as Catholics.

The wife of Wayne's eldest son Michael, declined to disclose plans for her father-in-law's burial Wednesday, saying details will be made public afterward.

"That's about all I can say. The eeremony will be private," Mrs. Wayne said.

Father Robert Curtis, a Paulist priest and chaplain at UCLA Medical Center where Wayne died Monday at age 72 after a long bout with cancer, confirmed the actor's conversion to Catholicism.

'John Wayne was received into the Catholic Church the day before he died," Curtis said in a statement read by Margaret Morris, a spokeswoman for St. Paul the Apostle's Church in Los Angeles.

"Mr. Wayne was conscious at the time. We are not at liberty to speak about something that is a personal 73-year-old Midland man who matter between a priest and a peni-

Michael Wayne was quoted in the New York Daily News as saying that his father asked Curtis to convert him 'the day before he died.' "I wasn't in the room at the time," Michael said, "but Father Curtis

gave Dad the last sacraments."

missed indictment charged the West Texas wheeler dealer with reporting false income figures on his 1975 in-

come tax return. Standing trial with Estes in Judge Robert Hill's courtroom is Midland businessman Raymond K. Horton, A third defendant, M.L. Copenhaver, last week pleaded guilty to one conspiracy count and Rolfe said prosecutors would move to dismiss the other charges against him.

Rolfe said sentencing for Copenhaver had not yet been set. Estes and his attorney, G. Brockett

Irwin, wore identical blue pinstripe suits to court Tuesday. The portly Abilene swindler apparently has lost weight in recent months and has shucked the trademark horn-rimmed glasses for more subdued metal

His wife, Patsy, and several members of his family sat in the back of the courtroom during Tuesday's jury

Estes and Horton are charged with conspiring to bilk four leasing companies of more than \$589,000 by financing oil field steam cleaners that do not exist. According to the indictment, a total of 38 cleaners were bought and sold on paper only through dummy corporations using money loaned from the legitimate leasing companies.

The scheme outlined by the federal government is almost identical to the one that earned Estes a conviction in the early 1960s, when he was convicted of mortgaging non-existent ammonia fertilizer tanks.

Because of his notorious reputation

as a flim-flam man, Estes was forbidden from self-employment and from promotional activities when he was paroled in 1971.

The allegations spelled out in the grand jury indictments are not new. Many surfaced in newspaper ac-

counts two years ago, when state and federal agencies began their investigations of Estes and his associates.

Buy? Sell? Tra

FURR'S

PROTEN

YOU SAVE

16-

As part of a plea bargain last October, Estes pleaded guilty to conspiracy to conceal assets from the IRS and

plotting to defraud investors. But he withdrew his plea when federal judge rejected the bargain, which hinged on approval of the U.S. Parole Commission.

Another indictment says Estes and Horton ran several businesses in Horton's name, although they actually were owned by Estes. That indictment also charges *Estes with conspiring to defraud the government of income tax for the years 1959-1962, 1971 and 1977. @

According to the hefty indictments, . Estes and Horton allegedly filed false financial statements with the leasing companies and received fraudulently obtained checks in the mail

School investigation may bring Ector County closer to busing

ODESSA - Investigation of new things." charges of racial discrimination in the Ector County schools is taking the district one step closer to court-ordered busing, an Ector County school official said today.

The new charges, apparently generated because of the publicity given an earlier investigation, will be checked this summer by the Department of Health, Education and Welfare's office of civil rights.

The only information available on the five newest charges - to be checked out by the end of August, according to Ector County Schools Superintendent Bill Holm - is that one pertains to a handicapped student and the other four involve discipline

"We don't know if that is one student with four complaints or four different cases," Holm said. "That's what's so frustrating about these

Findings from this investigation high school students from one school will go to the U.S. Department of to another for special vocational pro-Justice for consideration with other complaints of racial discrimination filed against the district earlier this year, Holm said.

The continued investigations, the superintendent contended, are "a step process to get us back into

The district has had a court case pending against it since 1970 and has operated under a court order since that time.

Ector County schools, unlike Midland's, do not have a busing program to integrate the schools.

The busing that is done in the district is to relieve overcrowding and to bring students who live more than two miles from school to the classroom,

The district also buses some 400 grams, Holm said.

The district has eight schools with minority populations of 66 percent or more, Holm said, including six neighborhood elementary schools, Blackshear Junior High School and Ector High School.

But he stressed all schools in the district had some minority represen-

"I think it's a political thing," Holm said of the continuing investigation. "It has nothing to do with the best educational program.

"There has been no attempt by this district to do anything that would deny or prevent any child from getting a decent and equal educational opportunity," he said, "and I think we're in a position to know."

Some friends in deed (mayors) back a friend in need (Carter)

PITTSBURGH (AP) - The nation's mayors, fighting the battle of the budget and the revolt of the taxpayers, are looking for friends. So they're being especially nice to Presi-

At the annual convention of the U.S. Conference of Mayors, which closed here Wednesday, Carter won a surprising string of victories from a group that was criticizing him only a few months ago as cold, if not hostile, to the plight of the cities.

Railroad, drought leave town of Soash high, dry

SOASH -Railroads are like the government

'You never know what they're going to do," says Dawson County historian Wayne C. Smith.

A land investor-colonizer by the name of W.P. Soash of Waterloo, Iowa, figured he knew what the railroad was going to do.

He speculated, bought 300,000 acres of ranchland from Col. C.C. Slaughter in 1908, and set up a townsite in 1909. Apparently, he was so confident and optimistic of his venture that helent the promising town his sur-

HE HAD INTENT of converting the range land to farm land.

So, he brought in trainloads of farmers from the East and Midwest to settle this area midway between

Lamesa and Big Spring. He built his two-story land office out of pebbled concrete in 1909-10. Also

place name, was his home office, and branch offices were at Chicago; St. Louis; Madison, Wisc.; Columbus, Ohio; Des Moines, Iowa; Omaha, Neb.; Kansas City, Kan.; Lincoln, Neb.; Watertown, S.D.; Ashland, Ohio; Agros, Ind.; Sheffield, Iowa, and Big Springs (sic), Texas.

with

Soash envisioned 100,000 families living in the Osash area, which he hailed as "The Big Springs Country of the South Plains of Texas." (Today, the old Soash, land is mostly in cotton and ranch land.)

Soash built up hopes of lush crop land, flowing streams and lakes, fat cattle and a vibrant trade hinged to the Santa Fe Railway laying rails through Soash's territory. It

constructed were a post office, blacksmith shop, R.E. Slaughter's Dry Goods & Groceries store and the twostory Lorna Hotel

Soash built up hopes of lush crop land, flowing streams and lakes, fát cattle and a vibrant trade hinged to the Santa Fe Railway laying rails through Soash's territory. It didn't.

Before Santa Fe's route bypassed Soash, the community flourished. Timber was shipped in by Texas & Pacific Railroad freight trains to Big Spring and then was hauled by teampulled wagons to Soash. Houses went

But they soon went down and were set up elsewhere.

"WHEN THE RAILROAD didn't come this way, it (Soash) kind of dried up in a hurry. Of course, coupled with that was the drought," said

Today, all that remains of Soash's dream is the four walls of the old land office, which apparently also was a bank, and a Texas historical marker, at the crossroads a mile to the south.

"It's kind of sad, really," said Smith. "The old man (Soash) had something kind of going but the whole thing fell apart. The railroads kind of messed him up. The town went bust-

But Soash wasn't such of an "old man" at all when he came to Texas on a land deal at the age of 28 in 1905. He sold parcels of the XIT Ranch land and founded the Panhandle town of Ware in Dallam County and the South Plains town of Olton in Lamb

WARE FADED FROM a town to a community of a post office and store Today, it's off the map, out of the Texas Almanac and is nothing more than farms. The post office and storealso are gone. Olton remains a small

Roloff must get license, or lose his homes

AUSTIN, Texas (AP) - Evangelist Lester Roloff has six days to decide whether to quit resisting attempts to license his troubled youth facilities or see his girls and boys taken away.

Roloff was not present Wednesday when State District Judge Charles Mathews ordered the three homes closed unless they applied for state licenses by Tuesday. The evangelist's attorneys refused

to say whether they would appeal Mathews' ruling "They'll hang black crepe on heaven's gate if they close these homes," said Roloff in a protest aired in a half-hour television program the

Roloff blasted Mathew's decision during that program and called for mass protest rallies this weekend at his home for girls in Corpus Christi.

evangelist bought on a Corpus Christi

"My heart's aching and breaking over what happened today ... The license is a Russian, Communistic piece of equipment. There is no doubt in my mind ... The license is altogether unconstitutional, illegal, historically wrong, practically wrong and biblically wrong," said Roloff.

Mathews also ordered Lester Roloff Evangelistic Enterprises Inc. to pay \$2,850 in civil penalies. The figure translates to a \$50 daily penalty tripled for each home - to cover the 457 days since an earlier injunction against Roloff took effect.

Assistant Attorney General David Young said the state welfare department was prepared to move the children within 24 to 48 hours after a closing order takes effect.

The youngsters would either be returned to their parents or turned over to welfare workers for placement.

"It's a black day," one Roloff supporter murmured following the threehour hearing.

For six years, Roloff has refused to license his homes on grounds it would violate the separation of church and state doctrine

Strict discpline and fundamentalist religious instruction are combined at his facilities - the Rebekah Home for Girls in Corpus Christi, Lighthouse Home for Boys in Kleberg County, and the Anchor Home for Boys in Zapata.

'As I said before back in October (1976) with no doubt in my mind that Brother Roloff is doing a good and a great service," Mathews said.

"I think he's a fine man. I think if it were left up to Brother Roloff-he would have licensed them a long time ago," the judge added. But I think it is his following that wouldn't permit him to do that.' Several of Roloff's supporters in the courtroom whispered, "No, no," at Mathews' remark

Roloff, at a prayer meeting following his telecast, blamed news media coverage of an alleged violent incident at one of his homes for the threatened closure.

"The news media has been the biggest source of child abuse in the world," said Roloff.

Mathews earlier decried hundreds of the evanglist's backers who have written the judge asking him not to close the homes.

"It's improper for them to write letters. I've been averaging 10 to 12 a day," he said. "They start out, 'Don't you believe in God? You must not,' and things like that.

Rubber talks bounced by serious snags

WASHINGTON (AP) - Marathon negotiations between the United Rubber Workers and B.F. Goodrich Co. ran into serious problems early today, dimming hopes for a swift settlement of the tire industry's labor problems.

"We've run into some pretty difficult snags, chief federal mediator Wayne L. Horvitz announced about 4 a.m. EDT, shortly after bargainers recessed their talks until later today.

Interferon helps prevent infection in transplants

BOSTON (AP) — Doses of interferon, one of the body's natural defenses against viruses, will prevent infections that cause sometimes fatal complications in organ transplant patients, a study shows.

The research is one of the first practical applications of interferon, sometimes described as a potentially ideal weapon against viruses. Experimentation with the medicine, which is made from human

blood, has been limited by its scarcity. Doctors at Massachusetts General Hospital used interferon to delay outbreaks of infections caused by the cytomegalovirus in kidney trans-

The researchers say that controlling this infection, usually harmless in healthy people, would greatly reduce the deaths that result from risky transplant surgery

The germ is one of the most common complications of transplants. It can lead to severe infections and rejection of the new organ and plagues recipients of heart and bone marrow transplants as well as kidneys. The doctors said they believe that if the drug had been given for a longer period in their experiment, it would have totally prevented the

infection. "Limitation of cytomegalovirus infections would greatly reduce the morbidity and mortality of renal transplantation," they wrote. Their study was published in today's New England Journal of Med-

The doctors gave injections of interferon to 21 people for six weeks after they received new kidneys. Another 20 patients took inactive placebos. None of the interferon patients developed cytomegalovirus infections until about a week and a half after they stopped taking the medicine. The people who received placebos, however, caught the infections an average of 41/2 weeks after their operations.

The infections contracted later by the interferon patients were not as severe as those suffered by the other people

"This first study is very promising," Dr. Robert Rubin, one of the co-authors, said in an interview. "It is as good as anything ever is in this field in terms of showing clinical efficacy.

Transplant patients receive drugs that reduce the body's natural urge to reject the new organs. However, these medicines also obstruct their resistance to disease. In the patient's weakened condition, the usually harmless cytomega-

lovirus can be lethal. It causes viral pneumonia, fever and heptatitis and leaves the body susceptible to diseases caused by other organisms. Rubin said 70 percent to 95 percent of transplant patients catch the virus. However, the seriousness of their infection usually depends on how much of the immunity suppressing drugs they are given.

Doctors develop common test to determine heart attack risk

searchers have deve- an interview. loped a formula that common tests to accurately figure the odds of whether patients have limitation or another, coronary artery disease, ranging from poor accua condition that often racy to very high cost." leads to heart attack.

Using this method, the researchers say doctors can make a few calculations using patients' age, sex and the outcome of three or four tests to find heart disease.

The common tests now inaccurate and give con- blood vessels. searchers say, adding that their method helps doctors make sense of these tests.

A description of the formula, worked out by two doctors at Cedars-Sinai Medical Center in Los Angeles, was published in today's New England Journal of Medi-

Dr. George A. Diamond, one of the co-authors, said until now, physicians had to use intuition to figure out the meaning of conflicting

"Faced with multiple test results, they simply sit down and, based on their own experience and knowledge, come up with a ballpark figure on their

BOSTON (AP) - Re- own," Diamond said in several hundred pa

He added: "None of allows doctors to use the tests we have are the prediction of presreally very good. All of ence or absence or corothem suffer from one

The doctors have developed a series of tables that predict the likelihood of coronary artery disease based on age, sex and the results of the percentage chance of electrocardiograms and other tests that measure the heart's movement available are frequently and narrowing of the heart disease.

> Armed with this information, the doctors can work out the chance of disease in an individual patient using an equation called Bayes' theorum. "It's very simple algebra," said Diamond. "It can be done with paper and pencil and a hand calculator in a couple of

Diamond said his team has tested the formula on

tients, and "this format was highly accurate for nary artery disease."

Coronary artery disease is defined as the narrowing of at least one major artery by more than 50 percent.

The doctors said they ear-old man who appeared to be in good health. An electrocardiogram showed that he had a 54 percent chance of

But when these calculations were added to the results of two more tests. the likelihood of disease was 99 percent. In fact, the man was found to have coronary artery disease in three vessels.

Most Americans rely on medical specialists

NEW YORK (AP) — Nearly 20 percent of all Foundation, which co-sponsored the report. Americans get most of their medical care from a A recent National Academy of Sciences gynecologist, cardiologist or other specialist rather than from a general practitioner, a new study

The report, described as the largest ever on how doctors spend their time, is the latest in a continuing debate over whether medical schools are turning out enough physicians for personal care.

The study, published in today's edition of the New England Journal of Medicine, concludes that this trend may bring an early end to a shortage of family doctors - possibly by the mid 1980s.

Dr. David Rogers, one of six authors of the report, said it proves there is a "hidden system" of medical care in the United States that will make up for projected shortages of so-called "primary care" physicians - doctors who treat the headache, sore throat, upset stomach and other minor ail-

Rogers is president of the Robert Wood Johnson

A recent National Academy of Sciences report projected shortages of primary care physicians well into the 1990s, and critics of medical schools today say there are too many specialists.

As a result, federal guidelines require an increasing proportion of medical school graduates to spend their first year of residency in general care areas Next year, the proportion will be 50 percent.

However, the new report, based on records of the daily activities of 10,000 doctors, predicts the general-care shortage will end shortly after 1985.

that they serve as the principal doctor for 65 percent

sity of Southern California asked the physicians to keep careful records of what they did for three According to the findings, gynecologists reported

Robert Mendenhall and co-workers at the Univer-

of their patients. For cardiologists, the figure

was 58 percent, for gastroenterologists 42 percent, and so forth for other specialists.

The study then looked at the number of all doctors falling into the categories they surveyed and concluded that during 1976, 62 percent of all Americans had some kind of doctor who was acting as a personal or family physician.

The study went on to say that even with no changes in doctors' training or geographical distribution, 85 percent of Americans should have a personal doctor by 1985. Five years after that, the number should rise

DEATHS

Jimmy H. Gatlin

TURKEY - Services for Jimmy Hardy Gatlin, 72, of Stanton were to be at 2 p.m. today in the First Baptist Church here. Burial was to be in Dreamland Cemetery directed by Seigler Funeral Home.

Gatlin died Monday in a Lubbock hospital after an illness. He was a native of Waputica, Okla. He was a retired plumber and horse

Gatlin had been a resident of Stanton for two months. Gatlin earlier had been a resident of Turkey and Mid-

He was married to Bessie River on Jan. 5, 1930, in Turkey. He was a Baptist.

Survivors include his wife; five sons, Leon Gatlin of El Paso, Jimmy Gatlin and Dicky Gatlin, both of Midland, Tommy Gatlin of Stanton and Howard Gatlin of Abilene; three daughters, Peggy Ellison of Lamesa. Christene Mansfell of Midland and Karen Sorell of Stanton; a brother, Clarence Gatlin of Turkey; three sisters, Lettie Beck of Turkey, Mrs. Tom Crow of Durant, Okla., and Marion Brewer of Olivehurst, Calif., 28 grandchildren and 16 great-grand-

Thomas U. Myers

LUBBOCK — Services for Thomas U. Myers, 74, of Lubback, stepfather of W.B. Hickman of Midland, were to be at 2 p.m. today in Sanders Memorial Chapel here with the Rev. Allen Lynch, associate Pastor at First Christian Church, officiating.

Burial was to follow in Resthaven Memorial Park in Lubbock under the direction of Sanders Funeral Home. Myers died Tuesday in a Lubbock

hospital. He was born Aug. 17, 1904, in Lindsey, Okla. He was a resident of Lubbock for 28 years. He owned and operated a tailor shop.

Other survivors include his wife, a stepson, four brothers, a sister and four grandchilren.

Hubert Jackson

ODESSA - Services for Hubert Jackson, 86, were to be at 2 p.m. today in Sunset Memorial Garden directed by Hubbard-Kelly Funeral Home. Jackson died Tuesday in an Odessa

hospital following a long illness. He was born Sept. 10, 1892, in Tennessee. He moved to Odessa in 1951 from Vernon. He was a World War I

Survivors include a daughter, Helen Lee of Hobbs, N.M., and three

Antonio Valadez

O'DONNELL - Services for Anto-

nio G. Valadez Sr., 76, of O'Donnell, father of Rosa De La Garza of Big Spring, will be at 4 p.m. Friday in St. Pius X Catholic Church with the Rev.

Pat Hoffman, pastor, officiating. Burial will be in O'Donnell Cemetery directed by Branon Funeral Home of Lamesa.

He died Wednesday Valadez was born in Floresville, where he was married to Guadalupe

Nieto in 1923. He was a farmer. He was a Catholic. Other survivors include his wife, a son, two daughters, 27 grandchildren

R.N. Lauderback

and 28 great-grandchildren.

CRANE - Services for Robert Neal Lauderback, 71, a city councilman, were to be at 3 p.m. today in Larry D. Sheppard Funeral Home Chapel here. Burial was to be in Crane Garden of Memories.

Lauderback died Tuesday in a Crane hospital.

He was born Dec. 11, 1907, in Dilly and had lived in Crane for 32 years. He married Mary Elizabeth Caldwell Jan. 27, 1947, in Crane.

Lauderback was a retired tool pusher. He was a member of the First Baptist Church. He was a past district deputy and past grand of Oddfellow Lodge No. 169, past master of the Order of the Eastern Star and Rebekah Lodge.

Survivors include his wife; four sisters, Mrs. Hurley Page of Houston, Mrs. W.H. Appell Sr. of George West, Mrs. Bill Dudley of Austin and Mrs. J.H. Ferguson Jr. of Lake Charles, La., and a brother, James C. Lauderback of Crane.

Sarah E. Jones

LUBBOCK - Graveside services for Sarah E. Jones, 89, of Lubbock, sister of Jim Hopkins of Stanton, were to be at 11 a.m. today in City of Lubbock Cemetery with Doyle Ragle and Jo Carr, associate pastors of St. John's United Methodist Church, offi-

Arrangements were handled by Rix Funeral Directors.

She died Friday in her home after a lengthy illness.

Mrs. Jones was born in Madisonville and moved from there to Lubbock in 1931. She was a member of St. John's United Methodis* Church.

Other survivors include two sons, a stepson, four grandchildren and seven great-grandchildren.

Resugio A. Fierro

SAN ANGELO-Resugio A. Fierro, 60, of Ozona died Wednesday in a San Angelo hospital. Services are pending with Gutier-

rez Funeral Chapel.

House changes mind about getting pay raise

WASHINGTON (AP) - The House has decided it really doesn't want the \$3,162 a year pay raise it voted for

Now it's got to decide how to resurrect the \$952 million legislative appropriations bill that fell by the wayside Wednesday when the House first accepted - and later rejected - a 5.5 percent pay hike for congressmen and top-paid bureaucrats.

The pay proposal, which would have cost taxpayers between \$50 million and \$60 million a year, produced an interesting day of parliamentary maneuvering.

First, House members took the unusual step of rebuffing its Rules Committee by agreeing to vote on keeping their salary of \$57,500 a year and to keep the salaries of bureaucrats making more than \$47,500 a year at current levels

The Rules Committee had decided the only vote allowed would be whether a pay raise, scheduled to go into effect in October, would be 5.5 percent

Then the House rejected by voice vote the very amendment it had just allowed to be presented - a freeze on current salaries.

Anatoli Kuznetsov dies

LONDON (AP) - Anatoli Kuznetsov, 49, a Soviet author who defected to the West and was a friend of the murdered Bulgarian defector Georgio Markov, died Wednesday. No cause of death was reported, but Kuznetsov suffered two heart attacks last year after Markov died from being stabbed by a poison-tipped um-

That left the members with a choice - approve the 7 percent increase proposed the Appropriations Committee or approve the more modest 5.5 percent increase offered as a compromise. They chose the more modest figure by a 396-15 vote and attached the amendment to the legislative appropriations bill.

But the House finally undid all that that had gone before by rejecting the appropriations bill by a 232-186 vote. The margin of defeat grew sharply once it appeared the measure was

It was impossible to say what caused the reversal. Some congressmen contended they voted for the 5.5 percent hike because they opposed the only other choice they had at that time - the 7 percent hike. They said their strategy was to kill the hike by killing the overall appropriations

But others noted that congressmen who opposed the increase could have voted for the freeze, a motion that was presented before the vote on the 5.5 percent hike but attracted little

In any event, killing an appropriations bill is a highly unusual step. Congressional officials said they could not remember the House killing one of its appropriations bills in the past 12 years.

The House action came after lengthy debate on the merits of increasing congressional salaries at a time when President Carter is trying to hold down wage and price increases in private industry.

Soviet Union to conserve energy

MOSCOW (AP) - The Kremlin decreed today that "very strict" energy-saving measures be adopted throughout the Soviet Union to help boost the nation's fuel and electric

power supplies. The decree, issued by the Central Committee of the Communist Party and the Soviet government's Council of Ministers, criticized shortcomings in transportation of fuel to consumers and ordered increases in coal, heavy oil and natural gas output.

It was published in the Communist Party newspaper Pravda and other Soviet newspapers.

"Reliable supply of the economy and population with fuel, electricity and heating energy in the fall and winter of 1979-80 is a very important state task of Soviet ministries and agencies," the decree stressed.

The policy statement urged "the development and putting into practice of measures for conserving fuel, electric and heating energy and oil products, and organizing of very strict control over their rational utili-

It ordered production increases by the end of this year of 1 million metric tons of coal from the Ekibastuz area of Soviet Kazakhstan, 3.2 million tons of heavy oil and 1 billion cubic meters (35 billion cubic feet) of natural gas.

Odessa visitor bureau director resigns post

ODESSA - Jim Garrett, director of the Odessa Conventions and Visitors Bureau, has resigned effective June 30, City Manager Kerry Sweatt has announced

Bertha Steely, 28, a sales representative for the bureau, will serve as interim director while applications are being considered.

Garrett, 34, said in his resignation he had accepted a position with Aqua Blast Service Co. in Baton Rouge,

Education bill backers regroup

WASHINGTON (AP) - The Carter administration and its allies in the fight for a new Education Department are regrouping after winning one vote to keep their bill alive but losing a chance to have it clear the

A session which ended a few minutes after midnight today was not enough to finish the time-consuming amendment process which precedes the final vote.

The bill faces the prospect of being sandwiched between pending appropriations measures — the money bills which set spending limits for a year which all have time deadlines.

Aware that time is an important factor in the outcome, opponents of the bill have tried to slow the proposal down during four days of debate by demanding roll call votes and quorum calls requiring attendance in the

Rep. John Erlenborn, R-Ill., claimed their tactics were working and that enough members had changed their minds to defeat the bill with about six votes to spare. But an administration spokesman

who asked not to be identified predicted the bill would pass.

A crucial vote occurred late Wednesday on whether to keep the

Rep. David Obey, D-Wisc., who described himself as a "friend" of education, led the move to end the debate without voting formally on the substantive issue. His motion failed 266 to

Obey said the new department would "significantly weaken the

voice of education in this country. The move would shatter the political coalition, including labor, health and welfare interests, which has operated successfully over the last two decades, he said.

Obey dismissed the notion that education needs the visibility of a cabinet secretary, adding: "The fact is, I would trade visibility for power any

Speaker Thomas P. O'Neill, D-Mass., argued that members should reject the parliamentary tactic and eventually vote on the substance in the bill. He said if Obey's amendment was accepted the members would have wasted the 14 hours they had spent on the debate.

way," O'Neill appealed. "Vote your

mind and your conscience." The Senate adopted its own version of the Education Department legisla-

Singer 'Sunshine Sue' dies

shine Sue" Workman, a country singer widely known in the 1940s and 1950s, has died at the age of 67.

Mrs. Workman died Wednesday night after suffering a heart attack. Born Mary Arlene Higdon on a farm in Keosauqua, Iowa, "Sunshine Sue" was the first woman radio show emcee in the country

Her Old Dominion Barn Dance program, which was broadcast on Saturday nights by radio station WRVA here from 1946 to 1957, frequently was heard over the CBS radio network's Country Side show.

Carter Sisters, Grandpa Jones, Chet Atkins, "Crazy" Joe Maphis and Mary Klick.

She married her guitar-playing high school sweetheart, John E. "Sugarfoot" Workman, at age 17 and teamed up with him to perform country music

They started on small radio stations in Iowa, then went to Chicago to play at the National Barn Dance broadcast over station WLS. It was there that she picked up the name "Sunshine

Her program discovered or gave From there, the Workmans played oost to such country singers as the in Richmond and Louisville.

Court rejects Hunt heirs' trial request

AUSTIN, Texas (AP) - The Texas Supreme Court today rejected a plea by the sons of the late H.L. Hunt to get a full trial of their suit against Coastal States Gas Producing Co. over Libyan

Nelson Bunker Hunt, Herbert Hunt and Lamar Hunt sued Coastal in 1973 after the firm bought oil from Libya's Sarir Field, had it refined and then sold the products.

The Hunts and British Petroleum Co. developed the Sarir Field. The Libyan government nationalized British interests in 1971 and the Hunt concession in 1973.

In response, Hunt published notices in newspapers throughout the world claiming the nationalization violated international law and threatened suit against anyone who came into possession of Sarir oil.

In May 1973, Coastal signed a contract to purchase oil from the field. The oil was transported to Italy, refined and sold

A portion of the net proceeds from the Sarir oil were brought to this country, where Coastal is located.

Case records show the Hunts abandoned their claims against the Libyan government in exchange for \$19 million in 1975. The Hunts' suit seeks to recover the proceeds realized by Coastal from oil allegedly purchased prior to the 1975 settlement.

A Houston judge dismissed the case without a trial because, he ruled, it arose from the Libyan government's expropriation of an oil concession.-

In upholding the trial judge, the Houston Court of Civil Appeals said the Act of State Doctrine prohibits American courts from inquiring into the actions of foreign powers.

The Supreme Court concentrated on whether Hunt's appeal comes within the exception to the act created by the 1964 Hickenlooper Amendment.

The high court concluded Hunt had obtained only a contractual right under the concession agreement, and the Hickenlooper Amendment applies only to a claim of title or other right to property."

The three justices who dissented agreed they would reverse the summary judgment and submit Hunt's suit for trial.

Texas Pacific stakes project

Texas Pacific Oil Co., Inc., Midland, staked No. 1-32 State as a southeast outpost to the two-well MAG. (Pennsylvanian oil) pool of Crockett County, 18 miles southeast of Ran-

Tenneco trys new region

ATLANTIC CITY, N.J. (AP) Tenneco is drilling far south of its successful first well in efforts to find more oil and gas in the offshore Baltimore Canyon Trough.

Drilling on the first of 39 new tracts began Tuesday whith the semi-submersible rig Zapata Ugland in positon about 92 miles east of the Maryland-Delaware state line, said company spokesman Frank Reid.

The new well is near the Wilmingon Canyon, a seabed geographical eature in the Baltimore Canyon rough, which is an offshore geologial formation.

Tenneco's well is the first drilling n the tracts awarded to oil compans at the second mid-Atlantic lease ale held in New York on Feb. 28.

In that sale, oil companies paid 41.7 million to the federal government for the right to drill on tracts where the U.S. Geological Survey esimates 114 million barrels of recoverable oil and up to 1.93 trillion cubic

feet of natural gas may be trapped. Tenneco paid \$6.4 million for the lease tract where it is drilling. The well, the 18th wildcat drilled in the Baltimore Canyon Trough so far, is in 355 feet of water on the edge of the Continental Shelf.

The new well is 75 miles southwest of the 18,400-foot well where Tenneco reported strikes of natural gas and oil within the past three weeks. The strikes were 106 miles east of Atlantic ;

Natural gas was discovered 13,180 feet below the seabed and flowed at a rate of 12 million cubic feet a day. The oil, first found off the mid-Atlantic states, was discovered 8,318 feet below the seabed and flowed at a rate of 630 barrels a day, the company

Both strikes were considered significant, but not commercially producible because of the cost of bringing the hydrocarbons ashore.

Tenneco plugged the hole late last week and is awaiting the results of two exploratory wells now being drilled nearby by Texaco and

Texaco is drilling within two miles of the successful Tenneco well in an attempt to confirm a major gas strike reported last August in the lease tract directly to the northof Tenneco's find. Exxon is drilling about five miles to the southwest.

DALLAS (AP) - Texas independent oil operators are planning a national program aimed at counteracting inaccurate statements about the industry and educating the public on oil and gas issues.

Chester R. Upham Jr., president of the 4,000-member Texas Independent Producers & Royalty Owners Association, said the program will be

"We need aggressively to open up," Upham said after the trade group concluded its 33rd annual meeting Tuesday by authorizing activation of The use of advertising was authorized and one of the objectives of the

program involves quick responses when association officials believe the industry is being unjustly attacked. In other actions, the association endorsed President Carter's order to decontrol crude oil prices and called for total decontrol of natural gas

prices as soon as possible. It also voted to support a proposal for an exploratory drilling investment credit and for the reinstatement of import duties or other import restraints on crude oil as a means of assuring maximum development of

domestic energy resources. The votes were taken as Stephen P. Potter, a senior vice president of the American Petroleum Institute, told the independents "things don't look good at all" for the industry at the Washington level. Potter said the industry faces uncertainty over Carter's windfall

profits tax proposal and uncertainty over price controls. 'In the face of this uncertainty, it is important for all of us to recognize the value of mutual support that all parts of the industry can give to each other right now," Potter said.

Upham, a Mineral Wells independent who was re-elected to a second term as president, earlier had said the Carter windfall profits tax "in reality is a confiscation of property and the most devastating proposal against the security of our nation yet devised."

Upham, recently elected chairman of the Texas Republican Executive Committee, said the proposed tax will reduce the domestic producer's ability to invest sufficient risk capital to produce sufficient supplies of crude oil "to withstand even a minor threat" of oil import disruptions.

Prosecutors asked to check 'criminal conduct'

WASHINGTON (AP) - Federal prosecutors are being asked to investigate "possible criminal conduct" in the nation's program to store emergency oil in salt domes in Texas and

J.K. Mansfield, inspector general for the Department of Energy, said he is turning over to the Justice Department the result of an internal departmental investigation into manage-

ment of the reserve. "The suspected criminality relates to such matters as bribes and largescale thefts" of costly governmentfinanced equipment, Mansfield told a Senate Governmental Affairs Committee Wednesday.

He cited the investigation as one example of the difficulty the agency has in keeping tabs on projects under its jurisdiction involving billions of tax dollars.

In other congressional energy developments Wednesday:

-Sen. Bennett Johnston, D-La., said he has conducted a survey of senators that suggests Congress will be unable to block president Carter's decision to decontrol oil prices.

Johnston, who favors decontrol, said 65 senators told him they would side with the president's decontrol decision in any showdown vote, 22 said they would vote to keep price lids on oil and 13 said they were undecid-

-The House Ways and Means Committee voted to boost the so-called windfall profits tax on the oil industry from the 50 percent level proposed by President Carter to 70 percent, Rep. Al Ullman, D-Ore., chairman of the committee, planned to complete work on the tax in time for the full House to consider it before the Fourth of July

In his testimony on Energy Department shortcomings, Mansfield did not elaborate on specifics of alleged

But he testified, "The pattern emerging from the facts we are gathering makes us think we may be seeing only the tips of the iceberg ... a fraction of the wrongdoing that may in fact be occurring in the pro-

The reserve is eventually intended to hold a billion barrels of crude oil as a hedge against another Mideast oil embargo or major supply disruption.

Mansfield said his office has already found that the Energy Department wasted \$1 million in tax dollars by allowing "four expensive drilling rigs" to go idle and unused. Sen. Lawton Chiles, D-Fla., the sub-

committee chairman, cited the strategic petroleum reserve as a prime example of mismanagment and potential fraud. 'We pour oil into caverns. Some of

the caverns were not sealed, and the oil drained out. When caverns are sealed, we find that someone forgot to install pumps, so we can't get it out," Chiles said.

Mansfield cited abuses in other programs administered by the agency, including one to provide federal grants of up to \$800 to help low-income families insulate their homes.

An internal Energy Department report obtained by the subcommittee contended that these grants had been used for such non-related items as smoke alarms, office curtains, dehumidifiers and, in one instance, a chain

Mansfield said problems plaguing these programs underscore the Energy Department's inability to police its own programs.

But Lynn Coleman, the department's general counsei, denied widespread mismanagement of energy programs. "We did not check our integrity at the door when we entered

Self-imposed oil cuts essential, say officials

PARIS (AP) - Senior U.S. officials told Western nations today it was "absolutely essential" to achieve their self-imposed goal of cutting oil imports by 2 million barrels a day, and urged them to favor business investment over consumers even if this meant "severe social and political difficulties."

U.S. Treasurry Secretary Michael Blumenthal said "some very nasty storm clouds have appeared. They threaten us with much worse inflation and payments positions, and in time, they threaten to stop the growth we need to reduce unemployment."

Blumenthal was speaking to the foreign and other ministers of the Organization for Economic Cooperation and Development, grouping the leading Western industrial nations. They met to discuss the economic problems of the 24 member states.

Charles L. Schultze, chairman of the U.S. Economic Policy Committee. bluntly exposed the dilemmas and "Catch 22" situations Western governments face in dealing with the oil

Schultze, who also heads President Carter's Council of Economic Advisers, told the meeting that on the one hand, governments could offset the oil price pinch by lowering taxes on consumer goods. But thisl"requires a delicate resetting of policy dials in a way that is easy to describe in theory, but extremely difficult to

achieve in practice," he said. Alternatively, governments could freeze wages, but this would require labor groups to accept "real wage declines (and) that is most unlikely to be achieved.'

Schultze showed how the intricate ties between oil prices and inflation can cause dangerous illusions. Oil prices go up. Inflation burgeons. For against the new inflation-swollen price situation, and the world thinks it has an oil glut, as happened in 1974.

"The world may go through another cycle in which consumers of oil are given false signals," said Schultze. In turn, "the credibility of governments in warning about a longer term energy problem will be impaired, and long-term adjustments again (be) de-

Schultze said the only way to stimulate growth and improve employment was to lower public expenditure. "They may require a realignment of tax burdens in a way that favors investment over consumption.'

He said subsidies and protection of special economic groups may have to be reduced. "The political and social difficulties of pursuing such a course are severe," he warned.

Wolfcamp well finals

Lingen Exploration Inc. of Houston No. 1 Cox-Howard has been completed in the Credo, West (Wolfcamp) field of Glasscock County, 15 miles northeast of Garden City.

The operator reported a daily pumping potential of 11 barrels of 41-gravity oil, no water, through perforations from 7,513 to 7,649 feet after a 5,000-gallon acid treatment.d

The total depth is 8,348 feet and 4.5-inch casing is cemented on bottom. Hole is plugged back to 7,707 The location is 1,320 feet from north and 660 feet from west lines of section

25, block 30, W&NW survey. A re-emtry project, it originally was drilled by John L. Cox of Midland as the No. 1 Harwood.

Image program planned Committee puts bigger tax bite on industry.

By ART PINE The Washington Post

WASHINGTON — The House Ways and Means Committee voted Wednesday a major stiffening of President Carter's "windfall profits" tax that would boost the tax bite on the oil industry by more than one-quarter over what the White House had proposed

By a 22-to-14 vote, the panel agreed to raise the rate at which t7 windfall" tax is levied to 70 percent of the eligible extra revenues the industry reaps from decontrol rather than 50 percent as Carter had sought.

It also voted to continue permanently a special "upper-tier" category of taxation that Carter had wanted to phase out between 1985 and 1990 — a move that would further increase the tax burden on the industry here.

The action, which came on an amendment by Rep. Dan Rostenkowski, D-Ill., constituted the strongest step the committee has taken to toughen the mild tax that Carter pro-

posed last April 26. Together with other changes, the amendment would raise the measure's total tax bite to \$6.5 billion in 1982, compared to the \$4.9 billion that Carter had proposed — or \$26.5 billion over five years, up from \$20.6 billion

The panel also turned back a bid by oil-state legislators to exempt all newly discovered oil fromm the tax. Instead, committee members approved a compromise amendment that eased the tax on new oil only

Approval of the Rostenkowski amendment came as a surprise to most observers. Rep. Al Ullman, D-Ore., the panel's chairman, had outlined a plan to raise the tax rate to 60 percent, and that was expected to

However, committee sources conceded that the action Wednesday was intended in part to give the House an extra bargaining chip in negotiations with the Senate, whose Finance Committee is expected to try to weaken

The Ways and Means Committee Wednesday voted down, 21 to 11, a bid by a group of liberals to boost the rate to 85 percent. It also defeated, 18 to 16, a move to tax newly discovered Alas-

The 70 percent tax rate the panel approved Wednesday would apply to all categories of oil except for newly discovered oil selling at a price between \$17 and \$26 a barrel.

As part of its alternative to the exemptions proposed by the oil-state legislators, the committee voted to limit the tax rate on this category of newly discovered oil to 50 percent, to encourage new exploration.

Moreover, the \$17 to \$26 a barrel limits would be adjusted upward each year by two percentage points more than the previous year's inflation rate - bringing the \$26 figure to an estimated \$44 a barrel by 1990. Energy Department experts esti-

mated Wednesday the proposal would boost likely oil production by some 160,000 barrels a day by 1985, over and above the 940,000 barrel a day increase that Carter's proposal might have spurred. However, the impact of the amend-

ment on the total tax bite of the windfall legislation still is uncertain. Experts said it could range from negligible to several hundred million dollars, depending on technical defini-

The amendment the panel approved making the "upper-tier" category permanent effectively means there will be no gradual reduction, as Carter had planned, in the tax bite on oil discovered since 1972.

Carter's original proposal carved out three "tiers" in which oil discovered before 1972, oil discovered since 1972 and newly discovered oil would be taxed at varying levels as they moved from controlled prices to world prices.

The pre-1972 oil was to be taxed as

Nominations down slightly AUSTIN, Texas (AP) - Major

buyers of Texas crude oil have submitted nominations for 2,736,229 barrels of oil a day in July, a decrease of 22,516 barrels daily from June, the State Railroad Commission reported Wednesday. The commission will meet Friday to

set the statewide oil allowable for July. The June allowable is 100 per-

Amendment protects funds

AUSTIN, Texas (AP) - An amendment by Rep. J.J. Pickle, D-Texas, will prevent the possible loss of \$20 million in school land tax revenue. Texas Land Commissioner Bob Armstrong said Wednesday.

Armstrong said Pickle's amendment would exempt school and university lands from the proposed "windfall profits tax." It was approved, 20-13, by the House Ways and Means Committee on Tuesday night.

its price rose above \$6 a barrel, with the tax phasing out in 1983. The oil discovered since 1972 would be taxed when it reached \$13 a barrel, phasing out in 1980. The third tier was \$16.

Wednesday's actions would block the phaseout of the \$13 a barrel category and continue the tax permanent ly. It also would raise the \$16 benchmark for "third-tier" oil to \$17 a

Approval of the alternative to the

oil-state legislators' proposal was a major victory for the administration. The rejected amendment, sponsored by Rep. James R. Jones, D-Okla.,

would have weakened Carter's bill. Jones had argued that newly discovered oil should be entirely exempt from the "windfall" tax to provide extra incentive for new exploration. The successful alternative was sponsored by Rep. Andrew Jacobs, D-
