Senate now scrutinizing SALT accords

WASHINGTON (AP) - In a test of how best to deal with the Soviet Union and diminish the threat of nuclear war, the Senate is scrutinizing the SALT II treaty after hearing a solemn pledge from President Carter to carry his fight for ratification "to every American who will listen."

Carter's appeal to a joint session of Congress Monday night did nothing to diminish demands from critics for substantial changes in the treaty which was negotiated over a sevenyear period.

"I think the treaty has no chance of being passed without amendment," said Senate Republican Leader Howard H. Baker of Tennessee.

The harshest reaction came from Sen. Henry M. Jackson, D-Wash., who called the president "foolish."

"I think he's been foolish," said Jackson, a hard-line opponent of

SALT. Strong support for the treaty came from Sen. Edward M. Kennedy, D-Mass., a frequent Carter critic on domestic issues.

"History will judge the Senate harshly if we fail to fulfill the promise now at hand," said Kennedy. The Senate Foreign Relations Com-

mittee is working out a detailed schedule of hearings on the treaty. The panel plans to open its public examination of the agreement July 9,

with Secretary of State Cyrus R. Vance and Defense Secretary Harold Brown presenting the administration's case

Sen. Frank Church, D-Idaho, chairman of the committee, said he thought Carter "made a strong impact on the country." But Church added he thought it was impossible to gauge the reaction of the Senate at this early stage in the debate.

"What this country needs is an intelligent and rational and informed debate and I hope that the Senate will rise to that responsibility," Church said.

Carter made it clear, in a speech obviously aimed at a national televi-

sion audience as well as Congress, that he believes the best argument for SALT is to consider the world without

"SALT II is a matter of common sense," said the president. "SALT II does not end the arms competition, but it does make that competition safer and more predictable, with clear rules and verifiable limits where otherwise there would be no rules and there would be no limits."

Without the treaty, Carter said: The Soviets could build 1,000 new missiles, double the number of warheads on existing missiles, triple the production rate of the Backfire bomber, increase the Backfire's range, encode all data from missile tests and hide all their launchers

The treaty limits each nation to deployment of 2,250 launchers for intercontinental weapons, a reduction from the 2,400 allowed under SALT I. The agreement also limits to 1,200 the number of ballistic missiles that can be armed with multiple warheads.

Carter pledged that the defense and foreign policy officials of his administration would testify before the Senate "in detail and in public" and added that "this treaty will withstand the most severe scrutiny.

The president also pledged: "I will explain it throughout our nation to every American who will listen."

Both supporters and critics are drafting new language to address troubling issues raised during the long history of negotiations.

Sen. Barry Goldwater, R-Ariz., filed an amendment even before Carter and Soviet President Leonid I. Brezhnev signed the treaty Monday in Vienna, Austria. Goldwater's change would count the Soviet Backfire bomber among the weapons limited by the pact.

The Soviets have made it clear they would reject the treaty rather than include the Backfire, which they claim is a medium-range plane.

Cancer center delayed while request amended

By SUSAN TOTH Staff Writer

Approval for a cancer treatment center in Midland has been moved back again, this time at the request of Midland hospital officials.

Midland Memorial Hospital Monday requested a public hearing on the proposed \$1.7 million facility be postponed while the hospital "significantly and materially amends" the proposal based on new information gained in a meeting with officials of M.D. Anderson Hospital in Houston earlier in the day.

The request came at a rehearing on the matter before the Project Review Committee of the Permian Basin Health Systems Agency Monday night.

The amendments, according to Midland Memorial Hospital attorney Fred Davis, will result in the application's being reaccepted and redated by the Texas Health Facilities Commission, which must issue a certificate of need before the center can be

ning point, Davis said.

While Midland officials would not comment on the nature of the changes, Davis said "we are very excited about the changes to be made. We think it will result in a significantly enhanced and strengthened application."

A group of Midland Memorial Hospital officials met in Houston Monday with Dr. Charles A. LeMaistre, chancellor of The University of Texas system, and five other UT officials at M.D. Anderson hospital and tumor institute, returning from the nearly five-hour meeting shortly before the 7:30 p.m. hearing was to begin Monday.

The amendments to the application are the result of that meeting, Davis noted.

The Midland group included Ed Magruder, president of the Midland County Hospital District; Mickey Cappadonna, a member of the hospital board of trustees; Wayne Ulrich, hospital administrator; Dr. William P. Trotter, and state Sen. W.E.

land, Magruder said.

A tentative agreement with M.D. Anderson was outlined in the original application for the certificate of need for the cancer center, and was one point challenged by Odessa's Medical Center Hospital officials in their request for a rehearing.

The meeting between the Midland group and the Houston group had been planned since June 12, Magruder said, when LeMaistre said he would be available for the meeting.

The application for the cancer center was to go back through the hearing process beginning Monday night with a rehearing by the project review committee because of objections from Medical Center Hospital officials.

Medical Center pointed out procedural problems in the original hearings held May 21 on the Midland cancer center and requested the rehearing

Odessa representatives appeared taken by surprise by the move Monday night to postpone the hearing.

Man charged in shooting of mother released on bond

BIG SPRING - An 18-year-old Big Spring man charged with shooting his mother to death Sunday was released from the Howard County Jail Monday afternoon after posting \$25,-000 bond set by Peace Justice Lewis Heflin.

Big Spring police said the son, Jesse Curry Jr., was arrested Sunday night at his mother's house in southeast Big Spring. He was charged Monday with murder.

The woman, Lillian Curry, 50, was found lying on the front porch with wounds from the blast "all over from the neck to the bend of the

knee," said Big Spring Police Detective Claude Morris.

Apparently only one shot was fired from a 12-gauge shotgun, which police said they recovered at the scene. Morris said the shot was fired in the house and that the blast knocked a hole in the wooden front door.

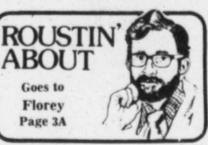

The fatal incident occurred shortly before 10 p.m. Sunday.

Mrs. Curry died 20 minutes later at Malone-Hogan Hospital here, police said.

A neighbor of the Currys telephoned officers after hearing the shot, according to police.

Despite the amendment announcement, Joe Weber, Medical Center's attorney, read a letter to the committee contending the equipment list for the Midland center would basically duplicate equipment already available in Odessa.

Funds for the sophisticated treatment center in Midland were donated by Midland resident Helon Y. Allison as a memorial to her late husband, James N. Allison Sr., and son, James N. Allison Jr.

To gain peace, 'sometimes you have to make war'

EDITOR'S NOTE - Freelance writer David S. Helverg of San Diego, Calif., was in Leon, Nicaragua's second largest city, when the Sandinista rebels captured the national guard garrison Monday. He accompanied a group of guerrillas on a combat mission and in this report tells of his experience.

By DAVID S. HELVERG

LEON, Nicaragua (AP) - Marcio, one of the two squad leaders at the rebel command post, was a large, friendly man with short, dark hair and a .38 special tucked in the waistband of his blue jeans.

At 41, he joked about being the "old man of the revolution" against President Anastazio Somoza.

Ariel, the other squad leader, was younger, shorter and quieter, with throughtful hazel eyes. He wore combat boots and jeans and carried a Belgian FAL rifle across his back.

On his head was a black beret with a red tassel and a small Snoopy pin with the word "peace" across the bottom.

Like most of the rebels, both men used only one -name, a pseudonym.

"I was a bank clerk before the uprising last September," said Ariel. 'I love peace and just wanted to work. But sometimes you have to make war if you want to be free, if you want to live with any kind of dignity.

After we had talked for about 20 minutes, he looked at his watch and said: "We have to go on a mission. Want to come along?'

He explained that his group was to create a diversion to draw the attention of national guard snipers in the cathedral tower while other Sandinista units attacked the church

The Sandinistas had controlled most of Leon for two weeks, but national guardsmen still held five buildings near the central plaza.

Ariel formed up his men, seven high-spirited teen agers armed with FAL and Garand rifles.

Those who stayed behind at the post were left with a hodge-podge of weapons including .22 rifles, shotguns and pistols.

We walked single file for two blocks when a national guard Cessna loomed overhead. Suddenly it heeled over into a dive.

Two lines of smoke and a hollow boom marked the path of its rockets.

"They destroy houses. They kill women and children. But they never hurt us," said one of the young rebels. Somoza wants to punish the people because he knows they support us."

We walked through a doorway into a pleasant house with an interior courtyard.

In a back room we climbed through a hole that had been pickaxed through the wall and found ourselves in the kitchen of another house. We crossed the room, climbed through a hole above a sink and stepped down into a chair in the living room of another house.

We continued moving through deserted houses and alleys, advancing several blocks toward the main plaza and cathedral without exposing ourselves to hostile fire

Finally we came out in the cloakroom of a finely appointed building with a marble staircase and a large shattered glass mirror. Ariel said it had been a society club

We crept up the stairs, sprinted past windows and reached the top floor.

The Sandinistas took position and on orders from Ariel opened fire through the windows, shooting across the roofline of an adjoining building.

The noise was deafening as the youths fired single . shots and on full automatic.

There was the crack of counter fire and bullets smacked above our heads. Dust and bits of plaster mixed with gunsmoke and the smell of cordite. Spent brass cartridges spilled out of the guns and clinked on the floor.

During breaks in the firing, the youths would yell, 'Patria libre o morir!'' - A free country or death!

Ariel, calm and precise, told his men to keep low and not stand exposed too long in any one place.

I asked about dried blood on the floor.

We took this place from the national guard yesterday," Ariel replied.

I asked what he wanted to do if the guerrillas won. "I don't know. Work in an office maybe. Help rebuild the country...

His words were lost in the roar of gunfire.

At the end of two hours, we pulled out of the building, retracing our steps to the command post.

Summer 'just around the bend

On Thursday, Midlanders officially can consider it summertime.

At 5:56 p.m. Thursday, the sun's rays will reach the Tropic of Cancer, signaling the beginning of summer in the northern hemisphere.

The event marks the northernmost reach of the sun in its yearly arc between the two tropics, and coincides with the longest day of the year.

The sun will rule the skies for 14 hours and 15 minutes Thursday. Also on that day, the sun moves into the constellation Gemini, where it will remain until July 20, when it passes

into Cancer. But that's getting ahead in the celestial ball game. June, after all, has its own celestial calendar.

The earliest sunrise this year occurred June 13, which also was the date that the moon achieved perigee, or its closest distance to Earth for the

led

lth.

month. The latest sunset of the year will

take place at 8:59 p.m. June 27. The moon, meanwhile, will continue drifting away from the earth until June 29, when apogee is attained. Apogee occurs when the moon reaches its farthest point from

Earth. On that date, the moon will be 251,692 miles away.

Of course, the moon is not the only heavenly body in an elliptical orbit. The earth, too, will attain aphelion the point farthest from the sun - on July 3.

On that day the sun will be 94.5 million miles away across the solar system

As for the moon, it should be visible in the early morning skies for the next few days. The evening moon will return as a crescent for several days at month's end.

use it to sight Mercury and Jupiter on June 26-27. A quick glance at the sky 30 minutes after sunset on those dates should reveal each planet as a bright star by the crescent. The next phase of the moon will

When that occurs, Midlanders can

occur Sunday.

With the official start of summer just around the bend, Midlanders may get a modest amount of relief Wednesday from sultry pre-summer weather.

On Wednesday, the temperature should reach "only" into the mid-90s, said the weatherman.

Recently, the mercury has been nudging 100 degrees, and was expected to be in the high 90s today.

A reading of 99 degrees was recorded Sunday and Monday by the Nation-

al Weather Service at Midland Re-(See IT'S, Page 2A)

Clements to order gas program

AUSTIN, Texas (AP) - Gov. Bill Clements says he will order an oddeven day gasoline sales program for three of the most populous counties in Texas in an effort to relieve the crunch in the fuel-starved cities of

We will institute this program in those three counties, but the rest of the state had better understand it will get worse before it gets better," Clements said Monday night on a television talk show carried by many of the public television stations in Texas.

Harris counties where long lines snake away from gas pumps open only briefly or closed entirely on weekends.

Clements said earlier that voluntary conservation had not cut gasoline conservation enough.

counties are 38 percent of all vehicles in Texas," Clements said.

He said gasoline supplies will be allocated to approximately match the

number of cars in the three counties.

"We're going to try to take care of the maldistribution problem," said Clements. "Some people are going to be inconvenienced. There's no doubt about it," he added

Clements, who hinted other fuel-saving provisions would be ordered, said he will reveal other parts of his energy program at a news conference today.

The governor said he would "talk in terms" of ordering higher temperatures in state buildings. But he added, "I think the admonition of President Carter to go to 80 degrees is a little too much."

Clements earlier said all his directives would concern energy conservation.

"This is going to be a no-tie summer," he said. "That will really become symbolic. No ties and short-sleeve shirts. That will be a strong signal to everyone to drive slower and turn up our thermostats. "It's just a gimmick," he said, "but I think it will work."

The governor termed the situation "critical" in Tarrant, Dallas and

Carter makes case for SALT

WASHINGTON (AP) - President Carter, making his case for the SALT II treaty, argues that its rejection would leave the United States' landbased missiles, including the MX, jeopardized by growing Soviet strategic strength

Opponents are already arguing that the better way to protect the landbased missile force is to reject the treaty

And that is just one example of how the debate on SALT II, a pact the president calls "a matter of common sense," is likely to confuse the public, and perhaps the Senate.

Carter, in his speech to a joint session of Congress Monday night, began the Senate's SALT II debate by asserting the treaty "reverses the momentum of the Soviet arms buildup," but "constrains none of the reasonable programs we have planned to improve our defense."

One of those programs is the MX, a \$30-billion missile more powerful and accurate than anything now in the U.S. arsenal. Moreover, the MX would be mobile. It could be shifted around, perhaps in underground trenches, to foil a potential Soviet attack.

"Without the SALT II limits, the Soviet Union could build so many warheads than any land-based system, fixed or mobile, could be jeopardized," the president said.

Treaty critics have a simple answer to Carter. They say the United States, without the treaty, could build decoy missile silos faster and for less money than the Soviets could deploy additional warheads aimed at the silos.

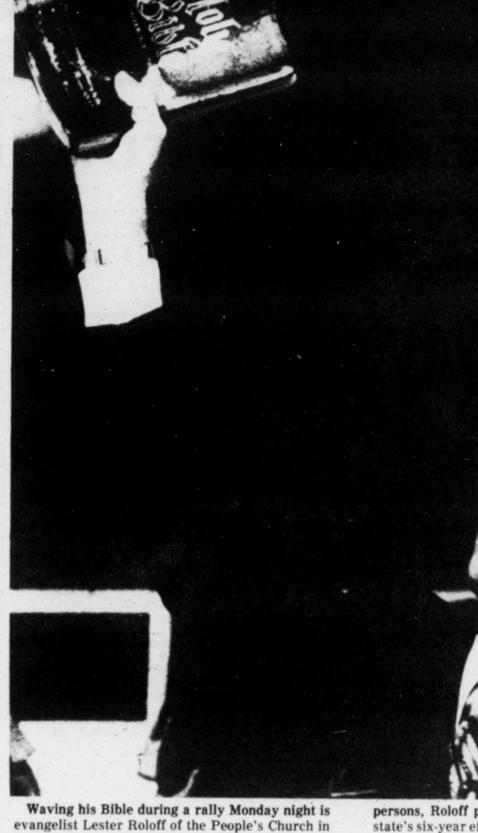

Carter said that when he finally decides how to deploy the MX, it will be in a "verifiable mobile deployment system.'

Critics like Paul Nitze argue that the treaty in fact prohibits the deployment method favored by the Air Force, in which a missile would shuttle around a grid of silos, with the Soviets never sure which one the missile was in.

Nitze claims this would violate treaty prohibitions against constructing additional launchers and deliberate concealment to impede verification that the treaty is being adhered to. The Soviets say they have yet to see a mobile deployment mode they would find verifiable.

And the MX was not the only debate the president started.

-"It slows, even reverses, the momentum of the Soviet arms buildup," the president said of the pact. "Under the treaty, the Soviet Union will be held to a third fewer strategic missile launchers and bombers than they would have simply by continuing to build at their nre

gional Airport.

Promising some relief today were brisk southwesterly winds which were expected to drop to 10 to 15

mph tonight. Record high for a June 18 is 107 degrees recorded in 1951. The record low for a June 19 is 57 degrees in 1963, said a weatherman at the National Weather Service.

The sun will set tonight at 8:57 p.m. Sunrise Wednesday will come at

Sandinista guerrillas in control of many major Nicaraguan towns

MANAGUA, Nicaragua (AP) -President Anastasio Somoza's forces battled for Managua's slums today and tried to check a guerrilla army in southern Nicaragua, leaving the Sandinista rebels in control of major towns in the northwest part of the country.

The president said the national guard would fight until it crushed the rebels waging their second offensive in 10 months to end 42 years of Somoza family rule. But he conceded it would take longer than the two weeks he predicted more than a week ago.

Guerrillas of the Sandinista National Liberation Front on Monday completed their occupation of Leon, Nicaragua's second largest city 55 miles north of Managua, and were reported by persons in Chinandega, Chichigalpa and Esteli to be holding most of

state

Clergymen rally on steps

of Capitol to support abortion

those three other cities in the northwest.

The Sandinistas also claimed Matagalpa, 80 miles northeast of Managua, but there was no confirmation of this.

High-ranking government sources said the recapture of Leon "will have to wait for a while." They said the national guard, Somoza's 13,000-man army, was concentrating on recovering the slums in eastern Managua and on defeating a Sandinista force trying to capture the southern town of Riva to make it the rebels' provisional capital.

Heavy gunfire could be heard in the capital late Monday from the slums to the east of Somoza's heavily fortified headquarters. Government planes strafed and fired rockets, and thick columns of black smoke rose in the

eastern part of the city. Explosions in what appeared to be a chemical or paint warehouse sent flames and smoke skyward.

Sniping broke out in the late afteroon just across the street from the military compound that surrounds Somoza's headquarters bunker. Guardsmen responded with machinegun fire, jeeploads of troops were sent to investigate, and the firing ceased.

Somoza in an interview with ABC-TV claimed his troops were recovering the barrios, or slum districts, "yard by yard." But reporters who visited the barrios Monday found the rebels well dug in behind barricades and heavily armed. They have controlled the eastern part of the capital for more than a week, cutting the main road to the airport.

The government also claimed that its forces in the south had bottled up the force of about 700 heavily armed Sandinistas who crossed the border from Costa Rica last Friday and were reinforced over the weekend. But other informed sources said the rebel force had broken through the guard's lines and was fighting its way toward Rivas, the southern town in which Sandinista leader Eden Pastora said the five-member provisional government named by the rebels last week-

reported restricting air operations against the guerrillas in the south.

In Washington, the U.S. government called on the Organization of American States to mediate between Somoza and the Sandinistas. In its first gesture of conciliation to the leftist rebels, the State Department said they had a right "to play a role in the developing political situation' and Nicaragua should have a "broadbased representative government."

CORPUS CHRISTI, Texas (AP) -Evangelist Lester Roloff says officers who try to enforce a judge's order to close the preacher's youth homes will find non-violent resistance - until they try to take the girls from the facilities.

"When they come to get you," he told residents of his Rebekah Home at a Monday night rally, "I want you to act like you did when you came in here.

"A little girl has a right to protect herself There will be no violence, the only people I'll permit to exercise protection will be the girls," he said, drawing high-pitched cheers from the Rébekah residents.

The three-hour rally was just what Roloff wanted on the eve of the possible climax to his six-year battle with the state. The Texas Department of Human Resources claims Roloff must have a license for his three South Texas homes. Roloff says a license means the state is more important than God. He refuses to seek the licenses. Last week, State District Judge

Charles Mathews of Austin gave Roloff until today to seek licenses or facing closing of the Rebekah Home, the Park Avenue Day School here and the Anchor Home for Boys in Zapata. Roloff says the order could leave up to 400 children with no place to go. More than 3,000 Roloff followers jammed into his People's Church for

the boisterous rally. Many came from outside of Texas and many were preachers who claimed to be facing similar legal battles. A surprise guest and speaker at the

rally, Rep. Clay Smothers, D-Dallas, set the tone for the rally with his fiery talk. Smothers said he also runs a private youth home based on the Bible.

"Brother Roloff doesn't take state money. I don't take state money. And I don't want their advice." said Smothers, who added that he had been called the "black Lester Roloff. "Who's going to take these chil-

dren?" Smothers asked, echoing an oft-repeated Roloff argument. The audience in the church - and

two groups watching on closed circuit television elsewhere on the grounds also heard testimony from a former marine who lost an arm and an eye in Vietnam.

The emotional rally was punctuated by hymns and songs from the youthful residénts. Some 300 preachers were in the audience and one hoisted a sign saying "Georgia for Roloff."

The 63-year-old fundamentalist preacher said he was unsure as to what might happen next. He said he had heard some rumors.

"I've been told they're (the state) sending a task force to Corpus Christi to operate these homes," he said. Roloff also said that if the girls resist "they're going to have too big a task for the task force."

He later spoke of a proposed plan to have his employees - clutching Bibles - stand at the gates here. A second line of defense would include parents. Behind them would be the girls.

"Taxpayers, it's a bad business to turn this over to the state. They'll rob you.

Roloff indicated that his lawyers still were "busy, busy, busy.". He said, "Where they are, that's none of vour business.

There was speculation that the Roloff forces might again try to win at least a delay of the Mathews' order. "I'm praying that God will get us back into court," he told the rally. The homes got back into court and won briefly Monday until an embarrassed local judge changed his order.

State District Judge George Hamilton said he unknowingly signed an order that might have been contrary to the one issued by Mathews.

"The lawyer brought me the order and assured me it had nothing to do with Roloff. He said some of the parents wanted their children returned to them when they are taken from the Roloff home. They were not under a court order, so I felt it would be proper to return them to their parents," Hamilton said Monday.

eral Mark White, Hamilton said he read the order and found that it included all the children at the homes and might countermand Mathews' order.

But after a call from Attorney Gen-

An hour after he signed the order without reading it, Hamilton rescinded the action.

As the mass rally was going on here, Gov. Bill Clements - a Roloff friend - spoke about the situation on statewide public television. He called Roloff "a fine, dedicated Christian man

"The bottom line is that would the children be better off in a penal institution, a penitentiary, or would they be better off in these homes? Ninety percent of them were sent there on the order of a judge who could have sent them to a penal institution," Clements said.

The governor, who recently toured the homes with White, said he woulddo anything within his power to keep the homes open. However, he said the Texas Legislature's refusal to pass a bill he supported in an effort to aid Roloff prevents him from taking any meaningful action.

Testimony won't hurt case, prosecutors say

DALLAS (AP) - Prosecutors say testimony by their chief witness that there is no documented evidence that Bille Sol Estes concealed assets from the Internal Revenue Service will not hurt their case in the federal fraud trial of the paroled West Texas swindler.

IRS undercover investigator Walter Perry - who posed as a high-rolling investor in dealings with Estes testified Monday that, "If there were any assets to seize, I imagine the IRS would have seized them.

Estes and a business associate. Raymond K. Horton of Midland, are accused of conspiracy to defraud investors with nonexistent oil field steam cleaners and concealing assets from the federal government.

Assistant U.S. Attorney Jim Rolfe contended evidence that Estes shared stock in an energy development company with Horton still stands "even if it (the stock) wasn't worth very much.

Rolfe said the prosecution does not need to prove Estes had considerable holdings to establish that he tried to hide them from the IRS.

Prosecutors have introduced over 29 hours of tapes of clandestine meetings during 1977 between Estes and undercover IRS agents posing as possible business investors.

Jurors chuckled frequently-when Horton's attorney, William Ravkind, questioned Perry about his meetings with the Abilene wheeler-dealer. Ravkind pointed out in one transcript that Estes told Perry he had been offered \$7 million in book and movie rights to "tell his (Estes') story.

'You mean to tell me Estes was offered \$7 million for a story we're all hearing for free," Ravkind said.

During each of the four days of the trial Ravkind has asked U.S. District Judge Robert Hill to sever Horton's trial from Estes' case. The judge has refused repeatedly to grant the motion.

Dr. Christopher Henry, research scientist with the Bureau of Economic Geology at The University of. Texas at Austin, said at one time the Shafter district was the leading silver producer in Texas.

Currently, there are no silver mines operating in Texas, but with the increase in price people have begun looking in areas they ignored before, Henry said.

Ruins of the ghost town of Shafter lie in a weathered state between the wood-rail fence and mountain peaks. The old West Texas ghost town soon may have a resurgence if silver mining is resumed. More than 32 million ounces of silver and 5,900 ounces of gold were mined here between 1883 and 1942. (Staff Photo by Ed Todd)

High court may expand right to sue Uncle Sam

WASHINGTON (AP) - A mother's attempt to collect \$2 million from the government for her son's death in a federal penitentiary could lead to an important constitutional decision by the nation's highest court.

The Supreme Court agreed Monday to consider once again denting the doctrine of sovereign immunity and expanding the individual's constitutional right to sue Uncle Sam. Specifically, the justices will decide whether federal prisoners who suffer cruel and unusual punishment may sue the government for damages.

Currently, the right to hold federal officials liable for violations of constitutional rights is very restricted.

In 1971, the Supreme Court ruled that the victim of an unconstitutional search by federal agents could recover damages in a lawsuit based directly on the Fourth Amendment.

asthmatic, and in the summer of 1975 was hospitalized outside the prison. The attending doctor recommended that Jones be transferred to a better climate and receive certain prescribed medicine

Jones remained in Terre Haute and was not given the medicine.

summoned to help him.

An unlicensed prison nurse eventually tried to treat Jones with a respirator that did not work properly. When Jones' condition worsened, the nurse gave him two injections of a treatment of asthma

He suffered an asthmatic attack on

Aug. 15, 1975, and was admitted to the prison hospital. He stayed there for eight hours, but a doctor was never

any practical benefits. Dr. Melvyn Tockman, clinical director of the cancer detection program, says that the average lung cancer patient lives about a year after a tumor is found; however, patients screened in his clinic who are found to have lung cancer have achieved a with them. three-year survival rate for certain tumors. What is not known is whether this greater period of survival is due to the early treatment these patients receive

once cancer is detected, or whether it simply reflects the fact that the cancer was discovered at a much earlier stage. Some of the tumors detected might have continued to grow for years before producing symptoms

Dear Mr. B .: There are early-dectection lung

cancer programs, but their value in prolonging life is

uncertain. In Maryland, doctors at the Johns

Hopkins Hospital are spotting lung cancers very ear-

ly, but they still don't know whether the program has

treated successfully?-Mr. K.B.

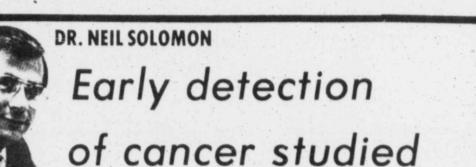

Of more than 10,000 high-risk patients screened at. the clinic, 71 had tumors, some of them as small as a pinhead. Most of those screened were men, 45 years of age or older, who smoked at least a package of cigarettes a day. About half the 71 patients with cancer could not risk surgery because of heart and lung diseases caused by heavy cigarette smoking.

The method used in the screening program involves a combination of sophisticated x-ray include two full-sized films which are examined by two radiologists.

The aim of the program is to detect and remove drug not supposed to be used for tumors before they metastasize (spread). But even some of the neassized tumors whi has metastasized, meaning that it was generally too late to save the patient. Cancer of the lung, even when detected early, is still a serious disease-and smoking is still its major cause.

Dear Dr. Solomon: Is there any way that lung member of Alcoholics Anonymous (AA) for two cancer can be found early enough so that it can be years, and has done quite well on the program. However, he started taking tranquilizers to help him stop his drinking, and now appears to be addicted to them. Although the pills are perfectly legal-he gets them by prescription-they sem as harmful as the drinking. Would you have any suggestions about how

Since then, some lower federal courts have extended the right to sue to instances in which other constitutional rights are violated. But the Supreme Court has not yet agreed to expand its 1971 decision.

Whether such a right exists under the Eighth Amendment protection of prisoners will be decided on a case stemming from 1975 prison death of Joseph Jones.

A convicted bank robber, Jones began serving a 10-year prison sentence in 1972. Two years later he was transferred to a federal penitentiary in Terre Haute, Ind.

Jones was diagnosed as a chronic

A federal trial judge dismissed Mrs. Green's suit. Although ruling that the Supreme Court's 1971 decision gave Mrs. Green the right to sue, the trial judge said Indiana law stood in her way.

The 7th U.S. Circuit Court of Appeals last August cleared the way for a federal trial, however. It agreed that Mrs. Green had a constitutional right to sue for damages and ruled further that Indiana law could not "subvert" that right.

BUSINESS MIRROR Carter facing tough economicpolitical test

By JOHN CUNNIFF

NEW YORK (AP) - In the months to come, President Jimmy Carter faces a test that leaders often have been unable to pass.

It is a test of mettle and tenacity, and it involves a choice of whether good economics or smart politics will be employed. The former would serve the nation best, but the latter might save the candidate.

Carter maintains he can meet the challenge. He has promised that no matter what the personal price, he will use what he perceives to be sound economics and will avoid expedients.

No matter how convincing that promise might be, it doesn't erase the question of whether an incumbent president can tolerate a weak economy, and particularly a recession, at election time.

For Carter, therefore, the next few months mean a test of fire. As piles of negative economic news make fire, the blaze grows hotter, the temptation to remove oneself from the heat grows more alluring.

Should he boost the already inflated economy? Should he ease up on his anti-inflation efforts? Should he cease to seek a balanced budget? Or should he hold firm, possibly sacrificing himself in doing so?

The economy is a big factor in any election. After losing to John Kennedy in the 1960 presidential race, for example, Richard Nixon blamed his political inheritance of a weak economy.

Nixon didn't forget. When, a decade later, the economy soared out of control, generally thought to precede a recession, President Nixon reversed his policies. He froze wages and prices. And won another term.

Carter's job isn't the same, except that it involves an economy with little self-discipline and that his job could be lost if voters find themselves in a recession they feel could have been avoided.

But the challenge is similar: Does a candidate listen to a higher conscience, or does he accept the political expedient?

Economists commend Carter for saying he will fight inflation even to a bitter political end. But politicians ask if he can stand the heat.

Timing is a factor. Carter tacticians had expected the slowdown to have begun before now. Had it, the chances are fair, though probably no better, that we would have been through it and out by the elections.

That would have been a beautiful scenario. What is better for a candidate seeking re-election than to have economic growth coincide with his promises of better times to come? It's an upbeat theme.

The scenario is at least six months delayed. And, assuming we are now into the slowdown, there's a chance it could become a recession. That is, production would even decline rather than merely slow.

Nobody can tell, either, how long it will last. Nobody, not all the king's men nor all the president's advisers. What Carter looks for is a slowdown short and sweet. But he cannot be certain of it.

It now appears that without major economic changes the odds are better than 50-50 that people will be less than encouraged by economic signs as they go to the polls a year from this November.

With that situation ahead, many feel the president

He refuses to send children to school

DENVER (AP) - Maynard Campbell says he would rather go to jail than send his three children to public schools. He says they can get a better education through a correspondence course.

Campbell's two youngest children, Chuck, 8, and Becky, 6, have never attended public schools. And he said he took Barbara, 12, out of school in the third grade because "she knew nothing" even as a straight-A student.

On May 10, District Judge William Eakes ordered Campbell to prove that his three children are registered for public school or enrolled in a state-approved home-education course. The judge warned Campbell he would be held in contempt of court he if failed to appear for an Aug. 30 hearing on the matter.

"There is no way I will comply with that order." said Campbell in telephone interviews last week. "I'm ignoring it. Nobody's going to take my kids."

Campbell, his wife, Brigitta, and their children live in Durango, and he operates a two-way radio business from his home. Campbell, 37, says he himself has a teaching certificate from the state of Florida.

He said that after he took his daughter Barbara out of public schools in Texas, he enrolled her in an accredited national correspondence course operated by the Calvert School of Baltimore.

"It took a year and a half (in the correspondence course) to get her up to the speed of the third grade,", said Campbell.

So Campbell did not even bother sending Chuck and Becky to schools and instead enrolled them in the same correspondence course.

Campbell said authorities in New Mexico, where the family lived prior to coming to Colorado about a year ago, also were concerned about the children not going to school.

But when they checked out the correspondence course and found it was "excellent," they gave their permission for the children to get their education that way, he said.

Campbell said he believes it is a violation of his constitutional rights to require him to prove he is obeying the law.

"The bedrock issue behind all of this is the simple fact that you are not required to prove your innocence, but they're demanding that we prove our innocence," he said.

"They're claiming that we're not educating our children, but they have not proyen that, they cannot prove that."

Campbell said he sees some similarities between himself and Utah polygamist John Singer, although he does not agree with much of Singer's philosophy.

Singer was killed by a shotgun blast Jan. 18 after police say he pulled a gun on 10 officers trying to arrest him. He earlier had been charged with contempt of court for refusing to send his five school-age children to public schools.

Campbell said he views Singer's death as a "pure and simple case of murder."

"I don't mean he was exactly right, but he did have the right to refuse to send his children to public schools," said Campbell.

TCRR survey. It is one location

northeast of the two-well J-D (Goen

oil) field which produces at 4,173

The Cotton project is scheduled on a 9,000-foot contract. The Mary Shirk Wolfcamp pay is at 8,344 feet.

IRION PROJECTS

ARCO Oil & Gas Co., operating from Midland, spotted locations for a pair of tests in the Spraberry Trend area of Irion County, nine miles northeast of Barnhart.

The No. 1-32 J. R. Scott Estate is to be dug two miles southeast of other Spraberry production and 1,980 feet from north and 660 feet from west lines of section 32, block 14, H&TC survey

ARCO No. 1-34 J. R. Scott Estate is 5/8 mile southeast of production and 660 feet from north and east lines of section 34, block 14, H&TC survey. Each gtest is contracted to 6,100

YOAKUM OFFSETS

Getty Oil Co., operating from Midland, staked a pair of projects in the recently opened Brahaney (Devonian) pool of Yoakum County, four miles southwest of Plains. The No. 5 E. D. Webb is a north

offset to Hilliard Oil & Gas no. 1-X Webb, the field discovery and lone producer, and 2,173 feet from north and 467 feet from west lines of section 13, block D, John H. Gibson survey. The No. 8 A. J. Davis is a southwest offset to the discovery and 467 feet from south and 552 feet from east

lines of section 514, block D, John H. Gibson survey. Each of the tests will be drilled to

RE-ENRTRY TRY

11.500 feet.

Gulf Oil Corp. No. 626 W. N. Waddell and others is a re-entry project in the Running W (Wichita-Albany) area of Crane County, 20 miles northeast of Crane

Scheduled to test above 6,270 feet, it is a former Waddell producer.

It is 2.5 miles southwest of the only Wichita-Albany well in the field and 2,669 feet from south and 2,620 feet from swest lines of section 13, block B-21, psl survey.

WELL RECLASSIFIED

H. G. Sledge No. 1 Roy Glass, former gas producer in the Big Salute, North (Canyon) field of Sterling County, has been reclassified as an oil well to become the third oiler in the field.

As an oil well, it potentialed for a daily flow of 3.46 barrels of 43.8-gravity oil, through a one-inch opening and perforations from 7,900 to 8,050 feet. The pay was fractured with 30,000 gallons. Gas-oil ratio is 15,029-1.

It is bottomed at 8,250 feet and 4.5-inch casing is cemented on bottom. The plugged back depth is 8,189 feet.

'Windfall' legislation vote expected today in House

By TOM RAUM

WASHINGTON (AP) - Tax-writing congressmen are ready to send the full House a toughened version of President Carter's proposed tax on oil company "windfall profits."

The tax, which would soak up some of the enormous revenues firms will reap from the decontrolling of oil. prices, faced a final vote today in the Ways and Means Committee.

Combined with various existing taxes, the windfall tax in its present

> ENERGY OIL & GAS

form would allow the industry to keep from 17 to 23 cents of each dollar gained from decontrol.

The president asked Congress to designate revenues from the tax to help low-income families pay their heating bills and to fund certain mass transit and energy technology projects.

But how the funds should be spent will be handled later in the House.

House leaders hope to bring the bill to the floor for a vote next week and to have it to the Senate before July 4th. 'We're under quite a bit of pressure

to get it out," said a committee source wo asked not to be named. The Senate has no plans to hold hearings on the proposal until the House, in which all tax bills must originate, has completed its work.

The tax accompanies the president's action to slowly lift price controls on U.S.-produced crude oil, a process that began June 1 and will continue until mid-1981 when domestic oil prices will have attained world levels

Under price controls, U.S. oil prices have been averaging about \$11 per 42-gallong barrel - compared to world prices averaging about \$18 including surcharges. The nation imports roughly half of the petroleum it uses.

The committee, responding to constituent outrage over rapdily rising fuel prices, previoulsy voted to tae a \$6.8 billion bigger bite out of oil-industy decontrol profits than Carter's original bill.

make it even tougher. Some are backing a proposal by Rep. Charles A.Vanik, D-Ohio, to replace the measure with a levy of \$3 to \$4 on every barrel of oil pumped under decontrol.

Vanik and many other House liberals also hope to accompany passage of a tough windfall tax with elimination of foreign tax credits for oil companies - credits which industry foes claim are a \$2 billion a year "loophole.

U.S. companies operating abroad now routinely subtract the taxes they pay to foreign governments from the U.S. taxes they owe on their foreign earnings.

Meanwhile, an industry official a gallon last January.

Scarred Exxon Chester heads for Boston port

CHATHAM, Mass. (AP) - A scarred 600-foot tanker steamed toward Boston Harbor early today with the crew of a freighter that sank after the two ships collided near the Cape

Coast Guard officials said the 577foot Liberian freighter Regal Sword, loaded with scrap iron, went down 30 miles east of Chatham shortly after 7 p.m. Monday, about 90 minutes after its starboard hull was slashed by the bow of the Exxon Chester.

mation indicated the freighter might

"The initial report was that the Regal Sword sunk shortly after the collision," Cmdr. Maurice Dumas said. "But our helicopter recently on the scene says it can see the silhouette of the Regal, so at this point we don't know if she's partially submerged or

"Ships in the area reported zero visibility," said David Feit, a marine meteorologist with the National Weather Service. "You have to move very slowly in that area because you can't see beyond 150 feet."

The Exxon Chester was making its regular delivery of liquid asphalt from Linden, N.J., to Boston.

Coast Guard officials said the Regal Sword was en route from Portsmouth, N.H., to Philadelphia

The accident took place 20 miles north of where the Liberian tanker Argo Merchant foundered in 1976 in America's worst oil spill.

It is 50 miles north of the spot where the Italian cruise liner Andrea Dria sank in 1956 after colliding with the Swedish-registered Stockholm, killing 50 persons.

NOLAN TESTER

feet.

A 16,900-foot wildcat has been spotted in Nolan County by Delray Oil, Inc., of San Antonio.

It is No. 1 B. B. Shelton, 1,980 feet from the most northerly north line and 1,300 feet from the east line of A. H. Akins pre-emption survey, abstract 902.

It is two miles southwest of the EVB, South (Canyon reef and Canyon sand oil) area.

MCCULLOCH PROJECT

James D. Harmon of Houston No. 1 Lutrher E. Smith is to be drilled as a 2.500-foot wildcat in McCulloch County, two miles northeast of Placid.

It ids 373 feet from north and 630 feet from west lines of J. W. Black surkveyNo. 290, abstract 1960 and four miles southeast of the Heart of Texas (Pennsylvanian and Marble Falls) pool.

CROCKETT VENTURE

Dameron Petroleum Corp. of Midland No. 2-11-A W, P. Hoover has been spotted as an 8,000-foot wildcat in Crockett County, 33 miles southwest of Ozona.

It is 894 feet from north and 786 feet from west lines of section 22, block NKM, GC&SF survey. Ground elevation is 2,440 feet.

The site is one and three-eighths miles west of Wolcamp production in the American field.

UPTON TESTER

Cotton Petroleum Corp., operating from Midland, staked location for a northwest offset to the discovery well of the Mary Shirk (Wolfcamp) field of Upton County, nine miles northwest of Rankin.

It is No. 7-B Lane, 467 feet from south and east lines of section 13, block 2, MK&T survey and in the Amacker-Tippett, South multipay area which at one time had Wolfcamp gas production at the 9,000-foot level.

Inspector funds voted

WASHINGTON (AP) - Federal safety inspectors would be required at all nuclear power plants in the United States under legislation the House has approved.

The House voted 350-10 Monday to give the Nuclear Regulatory Commission \$5 million to hire 100 new inspectors.

House members rejected a move to bar issuance of new federal licenses to nuclear plants in states that have not submitted plans for evacuation in case of accidents.

Wellsite is 727 feet from south and 467 feet from west lines of section 19,b The location is 1,980 feet from south lock 22, H&TC survey. and west lines of section 45, block 8,

FIELD EXTENDER

Shell Oil Co. No. 1-A Noelke as been completed as a 1/2-mile east extension to the Yucca Butte (Devonian) field of Pecos County, four miles southwest of Sheffield. The well potentialed for a calculat-

ed absolute open flow of 1,100,000 cubic feet of gas per day, through perforations from 8,520 to 8,665 feet after 5,230 gallons of acid.

The gas-liquid ratio is 30,666-1, and gravity of the liquid is 65.2 degrees. Total depth is 10,185 feet and 7-inch

casing is set at 10,020 feet. The plugged back depth is 8,910 feet. Wellsite is 1,980 feet from south and west lines of section 20, block A-2,-

TCRR survey. PECOS WELLS

Rippy Branch Oil Co. of Midland has completed a pair of wells in the Massey (1000) field of Pecos County, 12 miles south of Grandfalls.

Completed as the second and third wells in the field, they are No. 1-A Bonebreak and No. 2-A Bonebreak. The No. 1-A finaled for a 24-hour pumping potential of 25 barrels of oil, gravity and gas-oil ratio not reported. and 10 barrels of water, from open hole at 10,018 feet, where seven-inch casing is set, and plugged back depth of 1,011 feet. The total depth is 1,061

feet. Location is 330 feet from south and 1,650 feet form east lines of section 111, block 8, H&GN survey.

It is one location east of the field's discovery well.

No. 2-A Bonebreak was finaled for a daily pumping potential of five barrels of oil, gravity and gas-oil ratio not reported, and 10 barrels of water, through perforations from 1,010 to 1.018 feet.

Total depth is 1,038 feet and seveinch casing is set at 1,028 feet. The plugged back depth is 1,018 feet.

Location is 330 feet from north and 990 feet from east lines of secton 114, block 8, H&GN survey.

The wellsite is one location north of the field discovery.

MIDLAND PROJECTS

Parker & Parsley of Midland staked two 9,300-foot tests in the Spraberry Trend Area field of Midland County.

The No. 1-A Hutt is 660 feet from north and 1,650 feet from west lines of secton 26, block 38, T-3-S, T&P survey and 15 miles southeast of Midland.

The No. 2-C Golladay is 660 feet from south and 1,320 feet from west lindes of section 55, block 37, T-2-S, J. L. Veazey survey and eight miles southeast of Midoand.

MGF TESTER

MGF Oil Corp. No. 1 Coleman is a new test in the Ackerly (Dean sand oil) area of Howard County, six miles northwest of Vealmore. The 8,350-foot test is 1,980 feet from south and 3,300 feet from west lines of seciton 18, block 33, T-2-N, T&P survey.

who are studying a request to revise ceilings for the first time since 1973.

Service stations' gross profits average about 12 cents to 13 cents; the operators want at least 16 cents per gallon.

Legally, prices at the pump are established through a detailed regulation scheme. "A Guide for Retail Gasoline Pricing" says stiff fines will accompany its violation.

The guide instructs service stations to:

-Base current prices on the selling: price of each grade of gasoline as of May 15, 1973.

-Add to that 1973 price the difference between the cost of the gasoline in inventory on May 15, 1973, and the current cost for each grade received from suppliers. This can be passed through completely to customers.

-Add an additional 3 cents to cover such other costs as utility bills, insurance, Social Security and minimum wage increases.

-Include increased rental costs and charges attributable to installation of federally-required vapor recovery systems.

Service station owners complain they are caught in an untenable squeeze; that, in effect, they are forced to live with the same profit margin as they did in 1973, despite skyrocketing inflation and rising costs beyond their control.

Their only relief, they complain, comes from the 3-cent allowance for non-gasoline costs, but this is wiped out by business expenses far in excess of this figure. For example, workman's compensation in the District of Columbia has risen 500 percent since 1973, says a spokesman for the National Congress of Petroleum Retailers.

The Council on Wage and Price Stability, however, alleges that gasoline prices at the pump are "far larger than can be explained" by rising crude prices alone.

Retail profit margins, the council said in a recent report, increased 33 percent from January to April, while crude prices rose only 9 percent.

Independent service station owners claim this analysis is distorted by margins registered by oil companyowned stations and self-service retail-

The arithmetic issue remains unresolved.

In addition to the general pricing calculations, Department of Energy regulations prohibit:

-Tie-in sales that require a motorist to purchase products or services such as a car wash, food or auto accessories and repairs as a condition for buying gasoline.

-Changes in business practices that give special treatment to preferred customers, such as credit card holders, cash-paying motorists or station regulars.

Motorists who have complaints about pricing policies can call the Energy Department's toll-free hotlie at 800-424-9246. Dealers, with questions about pricing, should contact DOE's local Economic Regulatory Administration office.

No. 1 Hader,

on their license plates - also was to begin Monday in three of Texas' most populous counties - Dallas, Tarrant

The most serious problems were being reported in the New York City area - where gas went for as much as \$1.24 a gallon — and the area around Baltimore and Washington, D.C. There also were warnings of trouble ahead in Pennsylvania and Georgia. While local officials took action to deal with shortages in their area,

some had words for the federal government. "The truth of the matter is that

until Washington gets off its duff, we're not going to have an answer to this," said New York Mayor Ed Koch. "You have to find a way to deal with the Arab-OPEC holdup.'

In Alabama, state troopers and National Guardsmen escorted some gasoline trucks to protect them from striking independent haulers angry over rising diesel prices.

and Harris "We will institute this program in those three counties, but the rest of the state had better understand it will get worse before it gets better," Gov. Bill Clements said Monday night.

DEATHS

Cecil R. Scott

Services for Cecil R. Scott, 69, 109 W. Wadley Ave., were to be at 10:30 a.m. today in Thomas Funeral Home Chapel with the Rev. Bob Porterfield, pastor of West Kentucky Baptist Church, officiating. Burial was to be in Fairview

Cemetery Scott died Friday.

He was born in Celina. He was a

retired Shell Oil Company employee. Survivors include his wife, Helen; a daughter, Connie Jeanenne Strebler of Leesburg, Mo., and two grandchildren

Pallbearers were to be Melvin Jones, Ed Smith, Jim Watson, Ed Endmon, Kenny Smith and James Bannister

Honorary pallbearers were to be Thane Akins, James Williamson, Aaron Wells and Gordon Wells.

Dr. A. Blackford

HOUSTON - Services for Dr. Arthur D. Blackford, 53, brother of Opal Petrie of Midland, were last week in Forest Park Lawndale Funeral Chapel here with the Rev. Dewey Fuller officiating.

Graveside services and burial were in Forest Park Lawndale Cemetery directed by the Eastwood Masonic Lodge

Dr. Blackford died June 10.

He was a native of Stanton. For the past 28 years, he resided in Houston, where he worked as an optometrist. He was a graduate of Hardin-Simmons University and attended medical school in Tennessee.

He was a past master, a life member and secretary of Eastwood Lodge 1383 AF&AM and Park Place Lodge 1172 AF&AM. He was a past high priest of Park Place Chapter and Council. He also was past commander of the Park Place Knights Templar, Scottish Rite Bodies, Arabia Temple Shrine and past patron of Eastwood Chapter 1107 OES.

Dr. Blackford was secretary of the Downtown Pasadena Lions Club and a member of the Optometric Association. He was a veteran of World War II. He was a member of Spring Woods United Methodist Church.

Other survivors include his wife, a sister, five brothers and several nieces and nephews.

E. Johnson

LAMESA - Services for Elizabeth P. Johnson, 90, of Lamesa will be at 3 p.m. Wednesday in Bryan Street Baptist Church with the Rev. Ford Heath, pastor, and the Rev. Clifton Igo, pastor of Second Baptist Church, officiat-

Burial will be in Pride Cemetery near Welch directed by Branon Funeral Home

Mrs. Johnson died Saturday in a Lamesa nursing home after a lengthy

Henry A. Smith

BAIRD - Services for Henry A. Smith, 73, of Baird, stepson of Effie Smith of Lamesa and brother of Annie Mae Freeman of Lamesa and Minnie Anderson of Big Spring, were Monday in Parker Funeral Home Chapel here with the Rev. V.D. Walters of Elmwood Baptist Church officiating. Smith died Saturday in an Abilene

hospital after a brief illness. He was born May 11, 1906, in Coal-

gate, Okla. He was a retired service station attendant. He was a member of the First Baptist Church. He had lived in Abilene for 20 years before moving to Baird in January 1976. Other survivors include his wife, a

son, a daughter, four brothers, four sisters, six grandchildren, three great-grandchildren and a number of nieces and nephews

Ricky Casarez

LAMESA - Services for Ricky Casarez, 16, will be at 4 p.m. Wednesday in St. Margaret Mary's Catholic Church here with Msgr. Jerome Vitek officiating

Burial will be in Lamesa Cemetery directed by Branon Funeral Home. Casarez died Sunday while swim-

ming in a playa lake near here. Survivors include his parents, Mr. and Mrs. Guadalupe Casarez of La-

mesa; five sisters, Mrs. Juan Arrendondo, Martha Casarez, Isabel Casarez, Nora Casarez and Melissia Casarez, all of Lamesa; three brothers, Guadalupe Casarez, Miguelito Casarez and Jose Luis Casarez, all of Lamesa, and his grandparents, Cresencia Reyna of San Antonio and Mr. and Mrs. Jose Casarez of Lamesa.

Mrs. J.P. Curry

BIG SPRING - Services for Mrs. J.P. Curry, 50, of Big Spring are pending with Nalley-Pickle Funeral Home.

Mrs. Curry died Sunday in a Big Spring hospital.

She was born Lillie Barrett Feb. 11, 1929, in Texarkana. She was a resident of Big Spring for 25 years and was a retired civil service employee. She was a member of Immaculate Heart of Mary Catholic Church. She was preceded in death by her husband, Jesse P. Curry Sr.

Survivors include a son, Jesse Curry Jr. of Big Spring; a brother, Emmett Barrett of Texarkana; three sisters, Mrs. C.D. Cawthorn of Texarkana, Mrs. F.A. Johnson of Fauke, Ark., and Glenda Beardon of Hope, Ark., and several nieces and nephews.

Mrs. Kirkpatrick

BIG SPRING - Services for Mrs. Ira Kirkpatrick, 84, will be at 2 p.m. Wednesday in Nalley-Pickle Rose-

Europe DC-10s take off

ZURICH, Switzerland (AP) - European governments have begun clearing their airlines' DC-10s to resume their flights after adoption of new inspection and maintenance programs for the grounded planes. But they still won't be allowed to land in the United States.

Switzerland and the Netherlands gave the go-ahead Monday, followed by France today. The West German Transport Ministry said new certification should be issued for Lufthansa's 11 McDonnell-Douglas jumbo jets later today

The French Civil Aviation Administration said the three DC-10s registered in France would resume commercial flights tonight. UTA flies them to Africa, the Far East and French colonies, but three UTA DC-10s registered in the United States will remain grounded.

A Dutch charter airline put one of its DC-10s back in the air for a flight to Majorca, the Spanish Mediterranean island, and Swissair, KLM and Garuda, the Indonesian airline, said they expected to be flying theirs as soon the way was clear for them to land at their destinations.

Spanish aviation officials said Iberia, the Spanish airline, would not return its seven DC-10s to service immediately

The new inspection and maintenance programs were adopted at a closed weekend meeting in Zurich of 13 European airlines that fly the controversial wide-bodied jet and the civil aviation authorities of 21 European countries

The U.S. Federal Aviation Administration grounded all DC-10s in the United States after the May 25 crash of an American Airlines DC-10 in Chicago in which 273 persons were killed. Although foreign airlines fly a different model of the plane, foreign governments around the world grounded them also because of the U.S. deci-

The Swiss Civil Aviation Board said the Zurich meeting revealed there was "no technical reason opposing the exploitation of the aircraft provided a detailed maintenance and inspection program is observed."

Swissair said it would put its DC-10s into service as rapidly as they receive landing clearance at their destina-

"We are confident that within two or three days our DC-10 '30' fleet will be able to serve most of the routes foreseen for this model," a Swissair spokesman said.

The FAA sent two representatives to the Zurich meeting but said the planes still could not land in the United States.

The agency also denied it had prior information that could have helped prevent the Chicago crash.

"There was no single report or pattern of report that suggests a potential for catastrophic failure of the (engine support) pylon," FAA Administrator Langhorne Bond told a House of Representatives subcommittee in Washington Monday.

James King, chairman of the U.S. National Transportation Safety Board, confirmed Monday that the 10-inch crack discovered in an engine pylon of the crashed plane could have been caused when a fork lift was used to move the engine and pylon as a single unit rather than separating the two as the manufacturer specifies.

Attending the 20-hour Texas Justice of the Peace Training Seminar held recently in Odessa was Judge John H. Biggs of Midland. He was one of 56 justices of the peace in attendance. The training center for the seminars is based at Southwest Texas State University in San Marcos.

Truckers block shipment of gasoline supplies

By The Associated Press

Gasoline remained in storage tanks in Connecticut, New Jersey and Rhode Island and wasn't delivered to Skelly service stations in 16 Midwest states as independent truckers turned their anger on the nation's fuel suppli-

The blockades came as four states - Maryland, New Jersey, New York and Virginia - and the District of Columbia - prepared for even-odd gasoline rationing to deal with already short fuel supplies.

Shipments to some Minnesota towns were virtually cut off - four of seven gas stations in St. Peter said they were out of gas for June -- and the chairman of the House Transportation Committee urged Gov. Al Quie to declare a state of emergency.

And in Oklahoma, judges ordered truckers to stop blockading an Oklahoma City truck stop and a Sun Oil refinery in Tulsa

While the truckers tightened their squeeze on terminals, their leaders met in Washington with government officials to air owner-operator grievances: rising fuel prices, the 55 mph speed limit and varied state limits on the size of their loads.

"We're going to do what we can to accommodate the concerns that you have," presidential domestic policy adviser Stuart Eizenstat told representatives of the drivers coalition.

But the truckers said they were not satisfied, and spokesman William J Hill urged the nation's 100,000 owneroperators to take "an extended vaca-

tion" beginning at midnight Wednes-

Hill, chairman of the National Inde-

pendent Truckers Unity Committee,

Federal officials promised the nation's governors that the FBI and U.S. attorneys were available "to make certain that the law was obeyed and violence prevented."

Senate Ethics Committee mulls Talmadge hearings

WASHINGTON (AP) - The Senate Ethics Committee is meeting in secret to decide whether it should continue hearings into financial misconduct allegations against Sen. Herman Talmadge.

However, sources indicated today's scheduled discussion on a motion by Talmadge to dismiss the allegations could be lengthy and a decision could be-delayed.

The sources said earlier attempts to negotiate a settlement could be resurrected. The committee offered a settlement two months ago - before public hearings on the allegations against Talmadge began - but the Georgia Democrat did not respond.

The committee's attorneys concluded their presentation of evidence against the senator last week.

Attorneys for Talmadge then moved to have the case dismissed. arguing that none of the allegations had been proven and that the most serious charges rested on the word of a "man no one can believe."

that "more than enough evidence" had been presented to require Talmadge to present a defense.

are that Talmadge knew he was overdiverted and not properly reported.

Talmadge contended the overcharges were the result of staff error and that he did not know of the activities. He said he knew nothing of the diversion of campaign contributions. Much of the case presented against Talmadge rested on whether the committee believed Daniel Minchew, the senator's chief aide from 1971 through 1974.

Uranium miners' lung cancer risk known by government in 1940s, senators learn

WASHINGTON (AP) - Government officials knew in the 1940s and 1950s that uranium miners faced a erious risk of lung cancer, but took no action, according to a Senate subcommittee investigation.

A Senate Human Resources subcommittee headed by Sen. Edward M. Kennedy, D-Mass., summoned former public health officials to testify today about the frequency of such cancer among miners in Utah, Arizona, Wyoming and New Mexico.

Among those called before the panel were Eugene Zukert, a former

Accident hospitalizes two

BIG SPRING - Two Lamesa men remained in serious condition this morning in a Lubbock hospital after a car reportedly hit their motorcycle in a hit-and-run incident north of Big Spring Sunday night.

Driver of the motorcycle, Roland Delgado, 27, and Roberto Rosales, 25, his passenger, suffered head injuries

in the accident, which occurred about eight miles north of Big Spring on U.S. Highway 87. The two men were taken to Malone-

Hoga Hospital in Big Spring after the 11:55 p.m. incident, but were transferred to Methodist Hospital in Lubbock early Monday.

Department of Public Safety reports indicate Delgado and about seven other motorcyclists were traveling north in the right-hand lane when a car reportedly traveling at a high rate of speed ran through the group, hitting Delgado's motorcycle and knocking it out of control.

The motorcycle flipped and landed about 220 feet from the point of impact, DPS reports said. Delgado and Rosales were thrown about 150 feet, reports showed.

DPS officials said witnesses described the car as a Chevrolet Malibu, possibly vellow or white.
