

Four Candidates To Appear In Second Primary

Based on unofficial returns, Sherman County polled one of the heaviest votes in the history of the county in the Democratic Primary Election Saturday. According to the poll lists there were 924 votes in the county. The poll lists were composed of the names of those paying their poll taxes and those becoming of age since the first of the year. In the counties of less than 10,000 population, over-age voters who vote without paying poll taxes or making application for an exemption, stormed the polls to work a hardship in precinct 4. They used up the 60 extra ballots provided by law and 20-odd others. Late voters were required to wait until additional ballots were provided.

Several voters lost their votes in some of the races by writing in names without scratching the names of those appearing on the ballot. No one in that bracket received a vote for the office. Still others used the "X" system of voting where there was more than one candidate for office but did not mark an "X" to vote for candidates who were unopposed. Several of the unopposed candidates received only a little more than half of the votes cast.

According to incomplete unofficial returns Gov. Allan Shivers and Ralph Yarborough will be in the second primary August 28 for the Democratic nomination for the office of governor.

The names of A. L. Wilson and Ross Turner will appear on the second primary ballot as candidates for the office of Sheriff, Tax Assessor and Collector.

Balloon Furnishes Man From Mars Thrill For Many

A large weather balloon equipped with four boxes of instruments, which was launched in Bedford, Massachusetts landed in Stratford at dusk Monday evening. Only the parachute and instruments were visible to those who viewed the sky.

About half of the population of Stratford raced to the Arthur Milton irrigated farm northwest of Stratford. A few of the cars mired in the irrigation ditches while others milled nearby. Raymond Albert, William Leslie Price, Cotton Marvin, Penny Brooks and Bobby Burkham claim credit for being the first to arrive at the scene.

In the melee of excitement Bill Reed claimed the medal, good for \$25.00 for returning the instruments to their point of origin.

Tuesday morning the large plastic balloon which carried the instruments to Stratford was discovered in the K. L. Eller field about a mile northeast of Stratford.

Torrential Rain Played Havoc With Traffic

Torrential rain Thursday evening and night of last week left 1.61 inches of moisture and stalled two produce trucks. A truck filled with grapes and cherries was flipped on its side by a gust of wind one-half mile west of Stratford on U. S. Highway 54. The trailer lay on its side while the truck stood on its rear wheels with the radiator pointing skyward. The driver was not injured.

As the truck was being pulled onto the highway by a truck driven by Jimmy Stewart a car driven by Charles Durr in which A. J. Roberts was a passenger struck the tow truck. The Durr car was damaged but neither of the occupants were injured.

A semi-truck loaded with potatoes swerved from U. S. Highway 287 about 5 miles south of Stratford to avoid a head-on collision with a car whose driver was apparently blinded by the rain. Wreckers removed the truck from the bar pit Friday evening.

Constitutional Amendments Published

Eleven proposed constitutional amendments which the voters of Texas will approve or reject in the November election appear on pages 3 and 6 of this issue. They should be studied by the voter who desires to cast an intelligent ballot in the general election.

Insurance

Under an amended order issued by District Judge J. Harris Gardner in Austin, the Commercial Security Insurance Company of Houston can keep on doing business.

A previous order by Judge Gardner had closed the company, after Attorney General John Ben Shepperd charged that the firm had violated the state insurance laws.

A hearing is due in the case. Shepperd charged that the company borrowed \$200,000 of its \$250,000 initial capital. The attorney general said that the law requires unencumbered assets.

Natural Gas

Two Texas officials have tabbed the Federal Power Commission order freezing natural gas prices on gas sold to interstate pipelines as "serious" to the state's natural gas industry.

Railroad Commission Chairman Ernest O. Thompson and Attorney General Shepperd expressed dismay at the mandate, which was considered to be an initial step by the federal government to take over regulation of natural gas traffic.

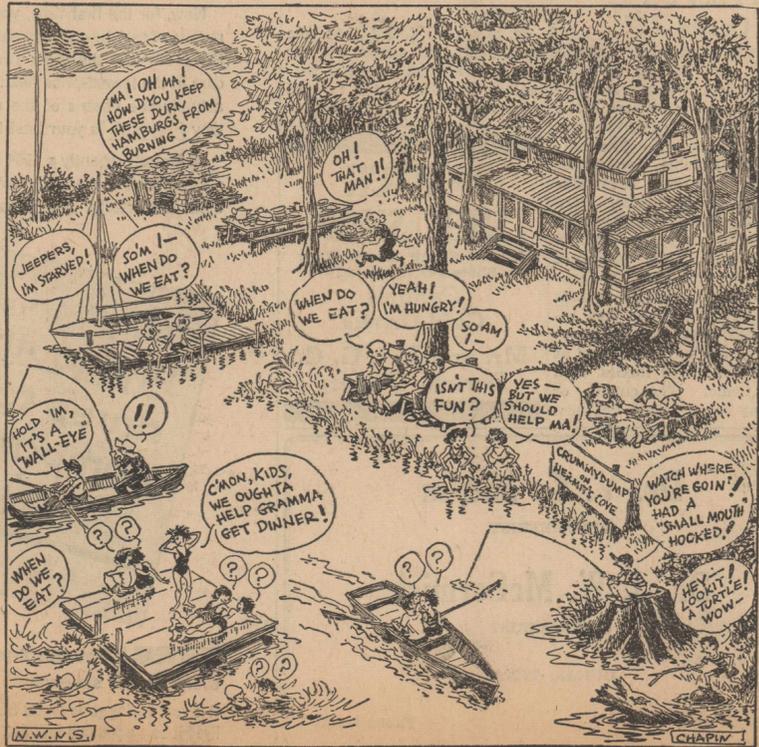

Shepperd said that the move means "financial ruin for a large segment of the Texas natural gas industry."

Thompson called the ruling a "tragic blow" to the state treasury. Texas levies taxes on natural gas according to market value.

XIT Reunion August 9-10

The 18th Annual XIT Reunion and Rodeo promises to be the biggest celebration Dalhart has had in recent years when it gets underway August 9 and 10. Advance entries in the parade, as well as the rodeo show much greater interest than in recent years. The celebration gets started at 7:00 P. M. August 9, with the

Q—Did all U. S. Presidents vote for themselves for the nation's highest office?
A—At least one President apparently did not, because there seems to be no evidence that he ever voted. Zachary Taylor, the 12th President who was elected in 1848, never stayed in one place long enough to qualify to vote, according to George Stimpson's "Book About American Politics." Taylor entered the Army as a young man and retired shortly before his election.
Q—I've noticed when amendments to the Constitution are proposed in Congress—such as the Bricker amendment—they always seem to be in the form of a "joint resolution." Do they have to take this form?
A—According to Senate Parliamentarian Charles L. Watkins, a proposed Constitutional amendment has always been introduced in the form of a joint resolution "by custom." He says there is no requirement that the legislation take this form, that such a measure could be in the form of a Senate or House bill.
Q—Is Congress bound by law to stay in session a certain length of time?
A—If Congress wants to quit earlier than usual, it may do so by passage of a concurrent resolution. The Constitution requires that Congress meet each year, and normally it stays in session at least until July. The Legislative Reorganization Act of 1946 specified that: "Except in time of war or during a national emergency proclaimed by the President, the two Houses shall adjourn" not later than July 31 "unless otherwise provided by Congress." Since the Act became effective, Congress has consistently stayed at work past the July 31 date, except in 1952, when it adjourned July 7.

reunion of the former XIT cowhands with Frank B. Farwell, general chairman in charge of arrangements. The reunion will be held at the XIT Rangers Club house with the XIT Cowhand President, W. O. Cubertson, presiding.

The first rodeo performance will be at 7:30 P. M., on August 9 with two other performances scheduled at 2:00 P. M. and 7:30 P. M. on Tuesday, August 10. Goat Mayo of Petrolia will produce and furnish the stock for the big amateur event. Rue Wharton heads the rodeo committee.

The hour-long parade will move at 11:00 A. M. of the second day with three bands, several riding clubs, a National Guard unit, a Civil Air Patrol Cadet drill team and the Khiva Temple drum and bugle corps slated to participate. Approximately 50 floats will take part in the parade.

Controlling Horn Flies On Beef Cattle

It has been proven through research that control of large horn fly populations increase the weight gains of beef cattle 42 to 70 pounds during the normal grazing season. The construction of cable devices for the control of horn flies: Cable type rubbing devices are commonly used. This may be constructed by wrapping burlap sacks around three pieces of barbed wire or chain. If barbed wire is used, the three strands should be twisted and tied together before covering by wrapping with the burlap and tied at intervals of three inches with binder twine. The chain or wire may be any length but most

of them are fifteen or twenty feet long. The ends of the chain are usually tied about four feet high to posts. The chain should be allowed to sag midway between the posts within two feet of the ground. Another method is to tie one end of the chain or wire to the top of the post and fasten the other end to a dead man in the ground by giving the chain a 45 degree angle.

Mixing of insecticides to be used for control of flies on the above type of devices for beef cattle: D. D. T., Toxaphene, TDE or Methoxychlor at 5% strength may be used on the back rubbing devices. D.D.T., TDE and Methoxychlor usually are available in 25% oil solutions or emulsion concentrates. Wettable powders are not satisfactory. A 5% mixture may be prepared by mixing one quart of the 25% emulsion concentrate insecticide and four quarts of fuel oil. If 60% emulsion concentrate Toxaphene is used, mix one quart of it with fourteen quarts of fuel oil to make a 5% solution.

It has been found that one back rubber is adequate for treating about seventy-five animals. The insecticide to be used should be applied slowly

and evenly to the burlap sack at a rate of approximately one-half gallon for each back rubber. Applications will have to be repeated at about three week intervals.

Cautions: 1. Do not use crank case oil or lubricating oil for diluting the insecticides. 2. Do not spray the oil solution with or without the insecticide di-

rectly on the cattle. 3. Do not use excessive amounts of the insecticide solution on the burlap. 4. Use only Methoxychlor or Pyrethrum on dairy cattle. 5. Almost all insecticides are poisonous to humans and should be handled with care. If spilled on the skin wash thoroughly with soap and water.

Recipe Of The Week

Fruit Punch
(About 50 Servings)
2 small cans canned lemon juice.
1 No. 2 can grapefruit juice.
1 No. 2 can orange juice.
46 ounce can pineapple juice.
2 1-2 pounds sugar made into syrup (use 2 1-2 cups water).
1 15c bottle almond extract.
Food coloring.
Add 1 1-2 gallons water.
Boil 2 1-2 cups water and 2 1-2 pounds sugar together to make a syrup. Chill. Combine fruit juices, extract, syrup and iced water. Add coloring to give desired shade.

Timely Tips
1. Always make a sugar syrup for sweetening either small or large recipes of fruit punch. This eliminates the problem of undissolved sugar.
2. Serve fruit punch to children for mid-afternoon snacks. It is nutritious and delicious.

Shoppers Have Choice Of Proteins On Food List

Homemakers will find foods rich in proteins heading the plentiful list for August. Turkeys and beef, milk and other dairy products, medium and small eggs, peanuts and peanut butter top the list.

Bartlett pears and turkeys are so plentiful, says Miss Lucile King, County Home Demonstration Agent, that they are being featured throughout the nation this month.

Food buyers should also find available plenty of fresh and processed lemons and limes, salad oils and vegetable shortening and some fresh vegetables. The dry and hot weather in many sections of the state and nation has shortened the mar-

keting season for many of the popular field produced crops such as watermelons and cantaloupes.

Embezzlers have been found to have the highest intelligence of any class of criminals.

PRISCILLA CLUB PARTY NEWS

(By Club Reporter)

Dear Aunt Sally:

Boy, oh boy — such a hot day — but it was real cool and pleas-

ant at Ruths and those of us who did not have "baby sitter" problems got over there.

We kept our hostess undressed most of the time and had a lot of fun doing it. Her green formal is beautiful and we are all taking credit for the perfect fit. Didn't know we were dress makers did you? Royce Faye helped serve lu-

icious strawberry and peach chiffon pie and cokes to Mary Belle, Syble, Helen, Twila and Ada Mae. Nancy even got some celery to chew on.

Velma had to go to Dalhart but she sent word for all of us to come to her house next time, and auntie, its going to be a party for sure. Bye. Sarah.

1.90 Inches Rain In Three Showers

Rain falling Thursday afternoon of last week continued through the night for a total amount of 1.61 inches at Stratford. Nearby districts reported from one-half to an inch.

Tuesday night at Stratford .14 of an inch fell and Wednesday night .15 of an inch was recorded.

Parts of the county have received sufficient rainfall to keep maize and sorghum crops alive. In the more favored sections of the county where as much as 10 and 1-2 inches of rain have fallen, farmers are planting over for the fourth time in hopes of getting a stand.

"I REMEMBER" BY THE OLD TIMERS

From Frank P. McNichol, Camden, New Jersey: I remember some forty odd years ago, when the Victor Talking Machine Company was still an infant industry. I can remember that shares in it, at that time, youngest of Camden, New Jersey, industries were being offered from door to door, for twenty-five cents a share, five shares for one dollar—with, believe it or not, very few takers. Many New Jersey residents of those days, myself included, have lived to lament our lack of foresight in this respect—a lamentation that is all the more tragic for with the right perspective we could certainly have been in the money today. I remember the first phonograph horns made of wood for the Victor people by the old Excelsior Drum Works of Camden, later discarded in favor of the more resonant Morning Glory type of horn of metallic composition. But we of those days should not be too critical of our shortcomings in this respect; for our lack of perception in not discerning or knowing a good thing when we saw it. For our viewpoint at the time was strictly speaking, that of the typical man in the street, on the outside looking in, and the Victor Talking Machine Company from its seemingly unpretentious headquarters in the old Camden City Hall on North Front Street, showed no visible indication as to its ultimate emergence as the mammoth industrial Empire of the Radio Corporation of America.

ORGANIZED LABOR is in the midst of one of the biggest get-out-the-vote drives in its history, determined through posters, increasing funds and a core of politically experienced workers to elect candidates considered pro-labor.

Officials of both the American Federation of Labor and the Congress of Industrial Organizations say the stakes are high and the obstacles great, but they're out for success.

Labor's three-pronged political action campaign is designed to: (1) persuade as many as possible of the nation's 15 million union members and their families to register, (2) inform them concerning major issues, (3) make sure they get to the polls on election day.

"Hardly pleasing to labor and liberals," says labor of the record of the 81st Congress. They single out the "millionaires tax bill," the effort to scuttle public housing drive to make the Taft-Hartley labor law stricter, and a social security program which unionists feel doesn't go far enough.

Unionists say their task of getting out the vote is made more difficult because it is a mid-term election and the turn-out at the polls is usually relatively light when the presidency is not being contested. They feel they will not be able to completely match the money, public-relations work and advertising they believe will be used in efforts to elect some candidates whom labor considers unfriendly. Yet, there is optimism among labor spokesmen, who claim a larger number of politically ac-

tive workers than ever and say labor is setting out to elect a "non-partisan slate of progressive candidates."

The Labor League's Political Direction Committee is currently analyzing candidates. Its Public Relations Committee seeks to keep workers informed and to get them to the polls, through leaflets, radio broadcasts, publicity, and phonograph records describing League objectives and organization methods.

LLPPE's Finance Committee is launching nationwide appeals for "a dollar a member" to build up a political war chest and hopes to raise half a million dollars by November. A new league feature is a program designed especially to enlist the aid and get out the vote of women.

But League officials say the machinery is really powered by the fuel of local activity, since "elections are won in the precinct." For the first time, the League has four area directors, whose job it is to travel across the nation sparking union interest in voting.

Separate from League political activity is the stepped-up program of the CIO's Political Action Committee, which is basing its campaign on issues which it describes as broader than that of LLPPE.

PAC is made up of local and state groups of CIO members. PAC is distributing literature and posters for political rallies, publishing "register and vote" reminders in its newspapers and holding institutes to inform CIO members how to conduct voting drives.

Narcissus, jonquill and other bulbs with dead foliage may be taken up and replanted at this time. Now gladioli may be planted for fall blooms, and chrysanthemums should be

pinched back. Miss Lucile King, County Home Demonstration Agent, says plants will have time to harden before cold weather.

Deep watering and heavy mulching will bring many plants through the dry season. For the most part, it is safe to leave off fertilizing. In special instances, light fertilizing may be done.

Says— "I always look for ECONOMY and my ELECTRIC Home Freezer gives it to me!"

Mrs. E. C. Patton of Guymon, Oklahoma: "I use my left-overs for planned-overs! There are many reasons my home freezer is a saving. I always look for economy, because with four growing boys, it takes plenty of food and clothing."

"Behind my home freezer door, I have a store at home that is open 24 hours a day, 7 days a week. No more trips to the grocery store when unexpected company drops in. I have complete meals in my freezer which include a variety of meats, vegetables and desserts."

ELECTRIC HOME FREEZERS ARE AVAILABLE IN UPRIGHT OR CHEST MODELS

All homemakers are looking for economy these days, and the home freezer is one of the best places to find it. Better meals at lower cost, with less work, is the assurance a home freezer will give you.

Freezers save as much as \$250 a year on food costs, and completely eliminate food waste and spoilage, which "eats up" 10% of the amount of money that you spend for food.

"I freeze my ground meat in patties, which is a big time saver. Any time my family decides on hamburgers, it takes but a few minutes to have them ready for eating. I also freeze my cakes in slices, so I can take out just the amount needed for meal time."
