relatives searched the countryside private arms manufacturers, Cou for traces of the boy, who was kidnaped as he lay sleeping in his father's ear yesterday afternoon. The night's search failed to uncover a morally or financially. Arms makers child. At 6:30 a policeman noticed a the public mind by acquiring news car resembling that owned by the boy's father, parked on the courthouse square about two blocks from

the scene of the kidnaping. The policeman investigated and found the kidnaped boy in the car. He was so frightened he cuold not talk and was unable to tell police the movement to have the portrait of how long he had been there or any details of the kidnaping. He was un-

harmed. Police notified the boy's parents immediately. Officers said there were no clues in the car that might lead to the identification of the ab-

PRESIDENT TO **ENTER SCRAP**

WASHINGTON, Dec. 18. power fight waxed hotter today when Pres. Roosevelt revealed he had interested himself in the New York City move for lower utility

The president revealed that Mayor LaGuardia and Maurice Davidson, New York City commissioner of water, gas and electricity would confer with him in a few days.

The conference with the New York city officials came after a bristling exchange between the Edion Electric light institute and the federal power commission regarding the president's program of pow-"yardsticks" and especially the T. V. A. experiment.

The president's interest in the New York City fight was taken to indicate he intends to enter the fight for lower utility rates along all fronts The LaGuardia administration

has hinted it may build tis own power plant for supplying the city, ue to high power rates.

Davison has rejected bids for upplying light, power, and steam for 1935, on the grounds the costs are excessive.

In announcing this coming conference with LaGuardia and Davison, the White House recalled once before Mr. Roosevelt had interested himself in lowering New York City electric rates.

Ox-Cart Justice, 16-Cylinder Crime

Washington's great crime conference shows America's ad situation due to the fact that it is ox-cart justice which is pursuing 16-cylinder crime. America's crime rate will continue to surpass that of every other civilized country, noted specialists declare, until there is a unified, thorough-going reform movement that will centralize law enforcement, modernize police activity, and eliminate legal red tape. The public is not yet sufficiently aroused to do its vital part. Eminent speakers declare there must be an upsurge of popular indignation that will thunder compellingly at the door of every legislature. Inadequate police systems and out-of-date judicial systems absolutely must go. They cannot meet the new challenge and demand-Crime flourishes in America just be-

Washington hears in detail of reforms needed at once to meet crime. The 40,000 separate police agencies in America must be coordinated. Hundreds of machine guns must be relaimed from criminal hands. Second offenders must not be pardoned or paroled. Ambitious criminal enterprises show the utter inability of states working alone. Detectives need education more than bravery, microscopes more than guns. Popular disrespect of law is back of these troubles-Children are not made to respect law, and that leaves them but one

New Factors in World Trade

Contrary ocean currents, shallow streams, high mountains and other physical barriers determined not long ago the location of markets and trading centers. Men built canals, searched for all-water routes, or level roadbeds for their trains and trucks. The confluences of rivers and roads fixed the accessibility of commercial cities and accessibility was the secret of their success. Panama and Suez, London and New York, symbolize the old needs of men of trade for centrally tion is a specific example. Starting located channels and centers of business.

Now the headlines tell another story "Airport in Brazil movement, diffuse in administration "number 27."

Now the headlines tell another story, "Airport in Brazil democratic as a New England town located as focus for world lines" is the title of a dispatch which reveals that the old needs have gone and that new era small political groups and local political groups are groups and local political groups and local political groups are groups and local political groups and local political groups are groups are groups and local political groups are groups are groups and local political groups are groups are groups are groups are groups and local political groups are g is here. Near the beautiful bay of Rio there is being built an tical agencies, relief has finally airport, only five minutes by auto from the center of the city, where land and seaplanes and dirigibles can come to rest. Hangars and aerodromes will house the flying palaces which come even now from New York, London, Paris, Berlin, Bue-now Aires and Cayada.

It works well.

Shifted to the highly-centralized serial numbers had been noted, restate control of a single agency, with all power over local administrative subordinates, and the citizens participation reduced to a shadow.

suade old Peter Kendall to leave this home with its immense walnut stairs, its carved French mantels and windows dipping to the floors. He loved every inch of his home. He loved every inch of his home. He was happier here with his needs attended to by servante who had been with him for many then Tony came and I had an years. He was happier within sight of his factory. He knew most of his workers by name, knew their problems, and prided himself on the fact that he had been kind and considerate.

sounded sober and indifferent and for the children and a community recreation center for the older Of course Peter had taken the ones. His employees were of course Peter had taken the drink because he had talked with paid. They should love him. He believed they did. But recently there had been difficulties, murmurs of dissatisfaction, some threats of rebellion.

He had attributed this to the times. All over the country, all over the world there was restlessness. It was natural that the feeling should penetrate to his factories. It was in the air.

THERE had been cases of deliberate attempts to foment rebellion. He had dealt summarily with thinking things out. Her head was them. It had been necessary to discharge young Eric Oleson, son of his oldest and most valued foreman.

All the trouble had started when equipment became known. They had come to him—a committee of leaders—asking that the million dollars to be expended be given them in wages instead. They could get along with the could get along the could get alon get along with the plant and old machinery, they had said.

had sald bitterly.

Peter, tooking down into Ann's from Oscar, who brought rumors of He was particularly uphappy to Peter, looking down into Ann's white, three face, thought "She's fearfully unhappy. How she must love that fellow!"

OLD Peter Kendall set looking into the fire which was three.
