Agreement Reached on Skeletonized NRA PROJECTS TO **AFTER 4 DAYS**

will begin tomorrow morning, after a shutdown of four days, it announced today by County Administrator H. E. Driscoll.

In a telephone conversation this norning, the administrator told the Daily News that certain work relief projects would be started again in the various cities of the county, and that work would be apportioned up to 50 per cent of the budgets. The following projects were listed for work Friday Projects

Cisco: Fish hatchery, zoo, wood ard, sanitation, cannery Ranger: Cannery, city park, re-

reation building, sanitation. Eastland: Negro school, College and Neblett street, Mangum Lake survey, cannery, football field. Gorman: Cannery, full speed.

Rising Star: Cannery, full speed There are more fruits and vegetables at Gorman and Rising Star. which need to be canned. Hence the full speed operation of the can-neries there," Driscoll said. Shut Down Monday

Work was suspended temporarily by an order Monday which disconinued all projects with the exception of the five canneries of the county. Reason given for the shutdown

rder was that the county would receive only \$13,090 instead of a re quested \$32,535 to take care of all relief work during June.

The county administrator that disbursement orders this month will not be issued to employable families, but instead that they will work out their pro rata grants on

work relief projects. State Relief Director Adam R. ohnson yesterday said that Texas could not reasonably expect larger apportionments and urged all persons on relief rolls who are able to

NRA Most Important Since Dred Scott

Speaking of the ruling of the supreme court in the NRA case and its codes, the president remarked to 100 newspaper correspondents at the capital of the nation and this most emphatically that he considered the decision "the most important opinion of his lifetime and certainly the most far reaching peacetime decision since the Dred Scott case." Chief Justice Roger B. Taney, a democrat, was responsible for the decision in the Dred Scott case. All this away back in slavery days. That opinion was responsible in the long run for the secession of the states where negroes were held as chattels the property of their masters to be bought and sold at the

James Buchanan was the last democratic president until the coming of Grover Cleveland. Abraham Lincoln was the successor of Buchanan. He emancipated the slaves. It was more than a revolution. Why refer to it? It had its day

and the chattel became a free man.

A vast deal of water has gone under the mill since the days of Abraham Lincoln and the earlier passing of Robert B. Taney. All this happened in the tallow dip and oxcart period of American history. There is an old world but the transformation that has taken place in all systems of government and all fields of human endeavor are found in the pages of modern history and the files of the newspapers of the world. Really the economic war for control of government has just begun in the republic of the fathers. It is to be a battle for the reserved rights of the 48 commonwealths or the control by federal power of the treasure wealth of all commonwealths as well as the continued control of the government in control was killed as dead by suthe making of tarifi may, mancial laws and all laws which affect agriculture and industry by those who believe in a That same decision will tend to powerful central authority and the political gospel taught by Alexander Hamilton away back in the dawn of American liberty and the creation of a republic made by freemen and to be perpetuated by freemen all down the eventful years.

Oil Man On Record For State Control

"It is my judgment that in Texas the laws are now adequate and that with the thorough enforcement of these laws there is no reason for any collapse of the crude oil market," remarked J. Edgar Pew of Philadelphia and Dallas, Sun vice president in charge of production. Then followed an announcement of a five per cent bonus to employes of the Sun empany now receiving \$2,500 or less per year and this additional comment: "With the NRA dead the country can now go ahead to a great and permanent prosperity." He predicted that with proper enforcement under the Texas laws "the producers will be much better off than they have ever cent of the country, having no inbeen." He closed with the following nugget of advice: "All terest in utility profits, will respond 90 days was substituted. producers should now unite to urge federal approval of the in sympathy to the efforts of the "It was charged on the floor and advertising truthful or he will lose interstate compact to the end that the oil producing states may cooperate in making their oil conservation program commay cooperate in making their oil conservation program com- al profits to holding companies of Share company of New York to pro-

A nine-state pact was signed. To date this pact has not And national and state adminisbeen given approval by either house of the American congress notwithstanding the sweeping decision of the supreme great deal, once aroused. Cities may court in the NRA demolition. And why not? If the 48 states more profitable utilities to be oper are to be the rulers of their own rights as guaranteed by the ated for the public benefit, since the federal as well as state constitutions why should there be public bears the burden of paying delay in decisive action on the part of the federal lawmak- the bill. ers? If the rights of the states have been abrogated then less foresight they have: Witness the hour and the issue calls for more than quick action.

Texas Leads For Conservation Resources

A vast majority of Texans are for the strict enforcement and recognition of the reserved rights of a commonwealth This has been demonstrated satisfactorily. Governor Allred and Attorney General McCraw and the state railroad commissioners, backed by the supreme power of the courts and the legislative and legislative enactment, are going all the road. Officially and otherwise they are for the conservation of the petroleum wealth of Texas. They are for the conservation of the natural gas wealth. They are for the drastic enforcement of all laws of the state against those who violate the statutes of the state. They are for the confiscation of crude handled by those who have defied the laws of the

commonwealth. Texas is one of the 48 states. Texans are capable of making their own laws, of conserving their own products, of drafting and enforcing their own quotas which will insure prosperity to all engaged in the industry directly or indirectly in order that justice may be done to all and that the sovereign rights of the commonwealth shall not be violated from "up above or down below." Nine members of the supreme court of the United States have made their decision. There are many authorities of the school of Hamilton who have insisted that the opinion of the court recognizes to the limit the rights granted to a commonwealth by the farmers of the federal constitution. Time and again the federal constitution has been amended. In coming time it will be amended (added to) by the sovereign voters of the 48 states. There is a way to go about it and the framers of the constitution pointed the way in language that the seafaring man (or any other man) is able to understand if he is capable of reading print.

More Building During This Year

Last year, new residential housing construction totaled \$108,000,000. This year it is expected to reach \$250,000,000. Forty per cent of the "housing market" is in 5 states -New York, Pennsylvania, Illinois, Ohio and California, and more than 75 per cent of prospective business is in one-third

loads for their continued pioneering. Washington forged into the lead of the national golf tournament tooay with a par 72 in the first round. Mackenzie, former Walker cup captain, was the first player to equal par today on the difficult Oakmont layout.

# HALF BUDGET **ALLOWED FOR**

Relief work in Eastland county will begin Friday morning; after a shutdown of four days, it was announced today by County Ad-ministrator H. E. Driscoll.

In a telephone conversation Thursday the administrator told the American that certain work re-lief projects would be started again and that work would be apportioned up to 50 per cent of the budgets. The following projects were listed for work Friday

Projects
Cisco: Fish hatchery, zoo, wood ard, sanitation, cannery. Ranger: Cannery, city park, rereation building, sanitation. Eastland: Negro school, College and Neblett street, Mangum Lake survey, cannery, football field.

Gorman: Cannery, full speed. Rising Star: Cannery, full speed. "There are more fruits and vegetables at Gorman and Rising Star, which need to be canned. Hence the full speed operation of the canneries there," Driscoll said. Shut Down Monday

Work was suspended temporarily by an order Monday which disconinued all projects with the exception of the five canneries of the

order was that the county would receive only \$13.090 instead of a requested \$32,535 to take care of all relief work during June. The county administrator said

that disbursement orders this month will not be issued to employable families, but instead that they will work out their pro rata grants on work relief projects.

State Relief Director Adam R. Johnson Wednesday said that Texas could not reasonably expect larger apportionments and urged all perons on relief rolls who are able to Two hundred persons were present Tuesday at the Baptist Workers work, to avail themselves of farm

### NRA Most Important Since Dred Scott

Speaking of the ruling of the supreme court in the NRA case and its codes, the president remarked to 100 newspaper correspondents at the capital of the nation and this most emphatically that he considered the decision "the most important opinion of his lifetime and certainly the most far reaching peacetime decision since the Dred Scott case." Chief Justice Roger B. Taney, a democrat, was responsible for the decision in the Dred Scott case. All this away back in slavery days. That opinion was responsible in the long run for the secession of the states where negroes were held as chattels the property of their masters to be bought and sold at the

James Buchanan was the last democratic president urtil the coming of Grover Cleveland, Abraham Lincoln was the successor of Buchanan. He emand pated the slaves. It was more than a revolution. Why refer to it? It had its day and the chattel became a free man.

A vast deal of water has gone under the mill since the days of Abraham Lincoln and the earlier passing of Robert B. Taney. All this happened in the tallow dip and oxcart period of American history. There is an old world but the transformation that has taken place in all systems of government and all fields of human endeavor are found in the pages of modern history and the files of the newspapers of the world. Really the economic war for control of government has just begun in the republic of the fathers. It is to be a battle for the reserved rights of the 48 commonwealths or the control by federal power of the treasure wealth of all commonwealths as well as the continued control of the government in the making of tariff laws, financial laws and all laws which affect agriculture and industry by those who believe in a preme court's NRA decision as Tex- low municipalities to regulate, utility powerful central authority and the political gospel taught by as thought it ought to be killed. Alexander Hamilton away back in the dawn of American liberty and the creation of a republic made by freemen and to be perpetuated by freemen all down the eventful years.

### Oil Man On Record For State Control

"It is my judgment that in Texas the laws are now adequate and that with the thorough enforcement of these laws there is no reason for any collapse of the crude oil market," remarked J. Edgar Pew of Philadelphia and Dallas, Sun vice president in charge of production. Then followed an announcement of a five per cent bonus to employes of the Sun Oil company now receiving \$2,500 or less per year and this permanent prosperity." He predicted that with proper enforcement under the Texas laws will overlook. Supreme court is the producers will be much better off than they have ever made up of nine men. About 70 per text the monopoly rights of the city. dicted that with proper emiorcement under the Texas laws will overlook. Supreme court is been." He closed with the following nugget of advice: "All cent of the country, having no in-producers should now unite to urge federal approval of the terest in utility profits, will respond had been stacked during the night. in sympathy to the efforts of the new deal president to curb salaries may cooperate in making their oil conservation program com-

A nine-state pact was signed. To date this pact has not utilities. been given approval by either house of the American congress notwithstanding the sweeping decision of the supreme court in the NRA demolition. And why not? If the 48 states chime in by taking over some of the are to be the rulers of their own rights as guaranteed by the more profitable utilities to be operfederal as well as state constitutions why should there be ated for the public benefit, since the delay in decisive action on the part of the federal lawmak- public bears the burden of paying the abuses which have been so de- Ceolige of Puget Sound, did not parers? If the rights of the states have been abrogated then the hour and the issue calls for more than quick action.

### Texas Leads For Conservation Resources

A vast majority of Texans are for the strict enforcement the supreme court decision said: and recognition of the reserved rights of a commonwealth This has been demonstrated satisfactorily. Governor Allred saying that social welfare should and Attorney General McCraw and the state railroad com- not be the concern of the govern missioners, backed by the supreme power of the courts and ment of the United States the legislative and legislative enactment, are going all the road. Officially and otherwise they are for the conservation of the petroleum wealth of Texas. They are for the conservation of the natural gas wealth. They are for the drastic enforcement of all laws of the state against those who violate the statutes of the state. They are for the confiscation of crude handled by those who have defied the laws of the commonwealth.

Texas is one of the 48 states. Texans are capable of aking their own laws, of conserving their own products, of drafting and enforcing their own quotas which will insure prosperity to all engaged in the industry directly or indirectly in order that justice may be done to all and that the sovereign rights of the commonwealth shall not be violated from "up above or down below." Nine members of the supreme court of the United States have made their decision. There are many authorities of the school of Hamilton who have insisted that the opinion of the court recognizes to the limit the rights granted to a commonwealth by the farmers of the federal constitution. Time and again the federal constitution has been amended. In coming time it will be amended (added to) by the sovereign voters of the 48 states. There is a way to go about it and the framers of the constitution pointed the way in language that the seafaring man (or any other man) is able to understand if he is capable of reading print.

### More Building During This Year

Last year, new residential housing construction totaled \$108,000,000. This year it is expected to reach \$250,000,000. Forty per cent of the "housing market" is in 5 states -New York, Pennsylvania, Illinois, Ohio and California, and more than 75 per cent of prospective business is in one-third

FHA estimates that a backed-up need now exists for 1.000,000 to 1,500,000 new homes

### Bird Attempts To Hatch Golf Balls

QUANAH, Texas June 6 - The hen that reputedly tried to hatch Quanah Country club course.

The chapparal had gathered six MAGNA, Utah, — When Flor-lost golf balls and apparently in-ence Woodbury goes a-milking, she tended trying to hatch them. The does a thorough job. At the annual nest was discovered by Jimmie milk-maid contest at the Utah Mocre, Quanah golfer.

### Don't Expose Your Property To Loss

If you were carrying \$10,000 in cash in your machine, you'd want to have it insured.

But are you not driving your machine with anywhere from \$1,000 to \$25,000 of your property exposed?

If you injure a man, and he obtains a damage verdict against you, you've got to pay it.

If you haven't the cash, your property can be sold to get it.

Don't risk your house, your bank account, your business. Let a Travelers Automobile Policy stand between your worldly goods and the result of that

MOST PEOPLE TRADE

The Policy of this Store. The patronage of the people of Cisco has built this Store, Not Us. It is Your Store. You will find the Highest Quality Merchandise here at a price you can afford to pay. A Complete Line of Fruits and Vegetables at All Times. There will be no raises in the prices, only when the market justifies. We hope to continue it as the place "Where Most People Trade." We Especially want all our farmer trade to know we will be in much better position to take care of them now.

### Stories in STAMPS

TWINGED HORSE of the MUSES

URUGUAY, Italy, Spain, other countries display in stamps their regard for the most famous horse of Greek fable, the winged Pegasus. Said to have sprung from the trunk of the Gorgon Medusa, when her head was cut off by Perseus, Pegasus was caught by Bellerophon, but threw his rider on his flight to heaven. In heaven, Pegasus served Zeus, fetching thunder and lightning for the god of power.

Pegasus, therefore, is considered a symbol of the thunder-cloud, and also as a curse-horse, representing the speed at which curses were fulfilled. But more recent stories make Pegasus the horse of the Muses and symbol

# Ford V-8 Brings

# Fine-Car Performance of the factor of the fa

# Within

# Your Reach

THE FORD V-8 - one of the most important forward steps in the history of the automobile - brings to all the people what was formerly within reach of the few. The V-8 engine had always been known for its outstanding performance, but it was used only in expensive cars. People wanted itknew it was better. But, few inotorists could afford to pay \$2000 or more for an automobile.

The principle of the engine was right but the price was prohibitive. Ford decided to get that price down to where more people could have a V-8 car.

That was the new idea. The V-8 was a new kind of car to fit new times, but the thought behind it was the same . . . the tested Ford idea of service. The Ford Motor Company simply continued to don be the pioneering work that has been itsa. specialty for 30 years and set a new scandard of value. The significance of the Ford V-8 is that

now it becomes possible for every one to have a really fine automobile at low cost. Igen Price is not a barrier. Even those who can B afford high prices for an automobile are hone driving the Ford V-8. It is the car of fashion as well as utility.

Today's Ford V-8 gives everything you would like to have in performance, beauty, comfort and safety. As for dependability and economy—the Ford has always been known for that. Today it stands also for the newest, latest developments in auto-le 110 mobile building.

# WHEN LIVES ARE AT STAKE

You need the same protection that race drivers demand

KELLY PETILLO ON MAY 30, WON the 500-Mile Indianapolis Race on Firestone Tires, breaking the track record and driving the entire distance at a rate of 106.24 miles per hour.

This record is an outstanding demonstration of tire efficiency. To go 500 miles in less than five hours on this rough and bumpy 26-year-old brick track, without tire trouble of any kind, demonstrates the strength and blowout protection that Firestone builds into their Gum-Dipped Tires.

AB JENKINS ALSO RECENTLY demonstrated the stamina, efficiency, and blowout protection built into Firestone Gum-Dipped Tires. He drove his 5000 pound car over the hot salt beds at Lake Bonneville, Utah, 3000 miles in 231/2 hours. This was an average speed of 127.2 miles per hour, and although temperatures were as high as 120°, he had no blowouts or tire trouble of any kind.

These records are made possible by special construction features built into Firestone Tires.

Take no chances-protect your life and the lives of others by letting us equip your car with Firestone Tires and give you the Safety and Blowout Protection that race drivers demand.

### Before you buy new tires ask yourself these three questions

1-"Will the tread give me the greatest traction and protection against skidding?"

2-"Are they built to give me the greatest blowout protection?"

3-"Without sacrificing these two important safety features will they give me longer mileage, thus making hem the most economical tires I can ANSWER No. 1-Leading university tests show Firestone High Speed Tires stop your car 15% quicker than the best of all popular makes of tires.

ANSWER No. 2-Unequaled performance records for sixteen consecutive years prove that Gum-Dipping gives you the greatest blowout protection

ANSWER No. 3-Thousands of car owners report unequaled mileage records - evidence of the longer wear and greater economy of Firestone High Speed Tires.
