# R. R. Spend Large Sum In Texas In 1940

Railroads in 1940 spent in Texas a total of \$90,875,589 for materials and supplies of all kinds and for wages of railroad employees, the Association of American Railroads announced today.

This total 'does not include taxes paid by the railroads to state and local governments in Texas, for which 1940 figures. are not yet available. In the year 1939, however, such taxes totaled \$6,483,733.

The stimulating effect of these expenditures is felt throughout the state because of the wide distribution of railroad wage payments, and the fact that supplies and materials were purchased in approximately 603 localities in Texas.

Railroad purchases in Texas in 1940 totaled \$15,650,630 of which \$15,567,803 was expended for fuel, materials and supplies and \$82,827 for the purchase of new equipment. In addition, the railroads paid \$75,224,959 in 1940 in wages to employees located in the state, the total number of such employees in July, 1940, having been 44,600. The expression is an old one used by vaudeville and theatrical people to indicate when they had "arrived" or when they had become established as leaders in their profession.
