FLAG PROGRAM AT GRAMMAR SCHOOL MON.

By TOMMY LA MORE
Flying flags at the Grammar school added a gala day atmosphere to the scene Monday as students, faculty, guests and Boy Scouts of Troop No. 101 lined up on the east entrance of the high school to watch flag ceremonies and to hear talks on George Washington and what it meant in the history of our country. The American Legion Auxiliary sponsored the event, arranged the program and provided the flags for the occasion. Mrs. Charles Yates and Mrs. James Haynie were in charge of the ceremonies. The program began with a song led by Mrs. M. H. Applewhite, followed by the invocation by Dr. E. S. James. Principal C. C. Duff gave an outline of the program and its significance. Dr. James spoke on George Washington and the flag. Boy Scouts showed the proper way to display the flag, whether on a wall, window or across the street, with other flags and in a parade, and by Crandall Jones on the days on which the flag should be flown. Green Funeral Home assisted in the flag ceremonies by showing the way a flag should be draped. The scouts then demonstrated the raising of the flag on its staff. This phase of the program ended the ceremony.

The quartet, consisting of Lory and George Boyd, Harry Schaefer and W. Frank Walker, and these numbers were interspersed throughout the program. Cherry pie, whipped cream and coffee were served.

If Resmond Wright of Los Angeles, above, had her way, then pensive Patsy, this Irish setter, couldn't keep her even dozen omnivorous offspring. HEALTH OFFICERS URGE CITY BE KEPT CLEAN AGAINST PESTS

Dr. W. P. Lee, City Health Officer, and H. A. Bible, Sanitary Commissioner, are urging precautions to be taken by Cisco citizens to prevent disease spread, and mosquito and fly accumulation. In a statement they mention numbers of unsightly and unhealthy conditions that now obtain in the residence district of Cisco. They urge immediate correction of same by individual residents. Their statement follows:

"A visitor from the State Department of Health was in Cisco during the last few days, looking over the city in general, and with special attention to tourist camps. His report was very favorable, indeed. "We also, have been in almost all parts of the town recently. We find many things to commend, and also some in need of correction, and that speedily, since the weather will soon be warm and the summer pests—flies and mosquitoes—will be on us in droves, unless we begin now to prevent such a condition. "In some places waste water is allowed to accumulate near dwellings and hydrants are allowed to drip; empty cans and buckets and even discarded automobile tires may all unsuspectingly be furnishing the neighborhood with mosquitoes. Then, too, in some places the premises should be watched for leaks in sewer pipes.

All drivers realize the need for safety we all enter the drive for safety with proper care and good faith. Please, Mr. Driver, don't be too hard on our first time. Give us a little to get used to the enforcement.

It would seem that our government is now in danger from too much prosperity and fear is expressed that too much securities buying from abroad will flood the country with gold and affect securities markets. Means will be sought to tame the millions of alien's money and render it harmless to our own financial security. The experience of King Midas who found himself starving in the midst of untold gold, repeats itself oftentimes in the history of individuals when they find that all the wealth of the world sometimes fails to bring them security or the happiness they crave.

Germany is fighting a political revolution in Austria where she seems intent on bringing that country back to unity with herself as in days of old. Austria has what Germany needs and she will leave no stone unturned until sentiment crystallizes for unity.

And now financial experts figure that Social Security reserve funds will reach 20 billions by 1980 and they are working to limit such a useless amount of accumulation. It would be too large a fund to let accumulate for the use of graffers who will follow after this generation.

Japan fears riots and takes precautions as sentiment is said to be turning against the soldier group. And indeed, the building up of a huge war machine may be the means of the overthrow of the rulers themselves. Ancient history is full of examples of where the soldier power turned on those in control and took charge themselves under the leadership of some powerful and ambitious general.

We weak mortals build up huge machines to guard us from fancied dangers and then are in turn devoured by those defenses.

We hear many tales of the thriftiness of the Scotch. A visiting Scot went to the municipal links and after selecting a bright young chap for his caddy asked him if he was good at finding balls. On receiving a reply in the affirmative, he said, "Well, find one and we will begin the game."

Many stores are told of the serenity of the Tennessee mountaineers. A traveler asked a native some directions and the bewickered individual possessed to have never heard of Knoxville, Nashville, and the Georgia line. The exasperated tourist asked him if he had ever heard of God. "Let's see," the rugged native said, "is his last name Lem?"

During the course of a lecture by a world famous traveler, he explained: "There are some spectacles that one never forgets." A timid little old lady in the audience spoke up and shyly asked, "Will you tell me where I can get a pair? I am always forgetting mine."

The spinster who insisted on calling legs limbs asked the maid if she had given the canary his bath. "Yes, Miss, you may come in now," she replied.

Cisco has much above the average in ministers and when they get together they tell some good jokes in their off moments. Here is one on the ministry. During the Civil War there was much rivalry between the regiments and companies from different states. An evangelist who had been holding a revival in one of the camps happened in to the tent of an officer of another regiment and mentioned the fact that he had eight conversions during his services in the rival camp. The officers was taken aback for a moment but recovering he called to a sergeant and said, "Officer, detail ten men for Baptism immediately, we are not going to let those New Hampshire dogs get the better of us in that way."

Dusty House Called Menace to Health

MINNEAPOLIS (AP) — Henry N. Pratt, M. D. assistant in the practice of medicine in children at the Harvard Medical school, re-emphasizes the theory that a dusty house may make children ill.

According to a report of his findings, published in Modern Medicine, issued here, four of five children who suffer from perennial asthma are sensitive to house dust. "This sensitivity," the physician wrote, "is an indication that the difficult breathing and other asthmatic symptoms which these children suffer, are probably owing to the presence of the house dust."

Salary Fund Had Deficit in 1936

Eastland county had a deficit of \$15,662.50 in the officers' salary fund for the year ending December 31, 1936, according to figures compiled by Auditor Don Parker.

The deficit in the fund was made up from the general fund. The state was to have paid 14 cents per capita as its portion of the salary fund to the county, as reimbursement for the handling of criminal cases, and 20 per cent of the district attorney's salary, but only seven cents was paid in the per capita proportion. That helped the county to the extent of about \$2,300.

No appropriation was made by the legislature for its aid on the district attorney's salary.

Fees from the different offices put \$97,130.57 into the officers' salary fund from which the officials and deputies were paid with the additional \$15,662.50 from the general fund. That much was provided the officers and deputies under the law.

Eastland has been under the officers' salary fund type of payment with other Texas counties for a year. The constitutional amendment abolishing fees for certain offices was voted in 1935.

Commissioners' court, which had the option of allowing precinct officers, constables and justices of peace, their remuneration by salaries or fees decided upon the latter method.

5-Year Study Urged for Pupils Who Work

FARGO, N. D. (AP) — Students planning to work their way through college should arrange to attend school five years instead of four, according to Pearl Dinan, dean of women at the North Dakota agricultural college.

"It often happens that students who work stay in school for more than four years, anyway," she said. "If these students would plan their courses at the beginning of their freshman year with a five-year course in mind, they could balance the entire five-year period more successfully."

Even when planning to work, Miss Dinan said, a student should have at least \$150 saved to meet the expenses of enrolling and of board and room until established.

Gary Cooper says: "It's plain common sense for me to prefer this light smoke"

"A little over a year ago I changed to Luckies because I enjoy the flavor of their tobacco. Ever since, my throat has been in fine shape. As my voice and throat mean so much to me in my business, it's plain common sense for me to prefer this light smoke. So I'm strong for Luckies!"

An independent survey was made recently among professional men and women—lawyers, doctors, lecturers, scientists, etc. Of those who said they smoke cigarettes, more than 87% stated they personally prefer a light smoke.

Mr. Cooper verifies the wisdom of this preference, and so do other leading artists of the radio, stage, screen and opera. Their voices are their fortunes. That's why so many of them smoke Luckies. You, too, can have the throat protection of Luckies—a light smoke, free of certain harsh irritants removed by the exclusive process "It's Toasted". Luckies are gentle on the throat.

Zoo Population Ebbs; Animals are Lonesome

LIMA, O. (UP)—City officials hope someone will come forward with contributions for the restoration of Fawcett Park Zoo, where now visitors see rows of empty, decaying cages.
Lack of funds has prevented replenishment of the animal population. At present, the zoo houses only two lone-come coyotes, three rabbits, one fox, a cinnamon bear, an eagle and three owls.

French Convict Port Slowly Being Eclipsed

SAINT MARTIN-DE-RE, France (UP)—This little village located in the Atlantic off the city of La Rochelle has suffered from adversity as well as its reputation as the prison town from which former criminals were sent to France's Devil's Island. Statistics just published reveal that the village population has diminished from 3,000 to 1,300 in the course of the last century.
Present-day statistics show an alarming condition, with deaths far surpassing births, and marriages falling off.

Nature Put to Work to Curb Drifting Snow

RUSHMORE, Minn. (UP)—A new idea for preventing snow blockades is being tried on a county highway south of here.
The plan is to furrow the snow deeply by use of a snowplow in fields adjoining the road to be protected. The deep furrows catch the snow and pile it up, much in the manner of a snow fence.
The plan, engineers said, is proving successful and may be extended to other sections of the state.

POKER CALLED RELAXING

TCRONTON, Ont. (UP)—Men over 40 who play nadsimton, unless they have been active athletes all their lives, are "insane," Dr. C. O. Young, local physician, declared. Golf is the finest game of all for men between 35 and 50, and poker is a much better game to play than bridge, because it is more relaxing, believes Dr. Young.

State Lines Bisect Church Pipe Organ

BLACKSTONE, Mass. (UP)—The organ at St. Paul's Roman Catholic church is perhaps the only organ in the world which is bisected by state lines.
Half the organ is located in Blackstone and the other half is in Woonsocket, R. I.
The state line runs through the choir loft of the church.

Snow Swirl is Steam; Error Traps Driver

WOODSTOCK, Vt. (UP)—Rolfe F. Cillingham was taken to a hospital with injuries after arriving through a "snow swirl."
What he thought was snow turned out to be steam from the frozen radiator of Fred Flanders' stalled car. Flanders was unhurt though Cillingham's car pushed his machine 300 feet.

**BANKHEAD ASKS
EARLY ACTION
ON JUDICIARY**

WASHINGTON, Feb. 23 (AP)—Speaker William Bankhead expressed hope today after a conference between President Roosevelt and house leaders that early consideration of the judiciary program would be made with the senate taking first action.

Mr. Roosevelt and his house leaders discussed the strategy to be followed in placing the program before congress.

"We hope," Bankhead said, "to wait on the senate unless it takes too long."

Bankhead said he "guessed" the house would approve the program. His "guess" was made after a canvass of the legislative situation.

**Judge Refuses
Farnsworth's
No Guilty Plea**

WASHINGTON, Feb. 23 (AP)—District Federal Court Justice James Proctor today denied the request of John Farnsworth that he be allowed to plead not guilty and stand trial on charges of conspiring to communicate United States naval secrets to Japan.

Judge Proctor ruled that Farnsworth must stand on his plea which in effect admitted guilt and threw himself on the mercy of the court.

After being returned to his jail cell, Farnsworth announced that he intended to retain another attorney and appeal from Judge Proctor's ruling.

CONFIDENTIAL REPORT
CRIME FILE ON BOLITHO BLANE

BEGIN HERE TODAY

Investigation of the murder of BOLITHO BLANE, British banker, aboard CAMELTON, the S.A.G. Agency, which is being conducted by Detective Officer KETTERING runs into a mass of conflicting circumstances.

As the investigation heats up and possible motives are checked for each passenger on the yacht, LADY WELTER, the BISHOP OF BUDE, INOSUKE HAYASHI, and REGINALD JOEL LYNN still appear to offer strong motives for the crime. Only NICHOLAS STUART, Blane's secretary, appears conclusively ruled out.

Then Lady Welter's maid appears, testifies, and corroborates previous testimony which tends to account for Lady Welter's innocence. Previously, Rocksavage, Mrs. Jacelyn and COLT DOSSO have offered rather conclusive proof of their innocence.

Next FBIIR ROCKSAVAGE is called for re-examination and under pressure she admits that she spent almost an hour with Jocelyn in her cabin, which she would enter the period of the crime. This tends to clear Jocelyn of the murder but Rocksavage remains an likely suspect.

"Why I Choose CAMELS"

"I'M A SECRETARY," says Joselyn Libby, "and I often eat in a hurry. When I enjoy Camels with my food I feel on top of the world."

"I WANT A CIGARETTE that doesn't jangle my nerves," says master welder Dan Rafferty. "And Camels do. Camels are mild!"

JIMMIE FOXX slugging first baseman of the Boston Red Sox says: "I stick by Camels and Camels stick by me. Camels set me right. I smoke Camels for their refreshing 'lift,' and for the aid they give my digestion. Camels help me feel my food agrees with me."

At mealtimes Camels are an aid to digestion—speeding up the flow of digestive fluids—increasing alkalinity—bringing a sense of well-being. Steady smokers prefer Camels. They are so mild!

CHIEF ENGINEER George J. Buckingham stows up with Camels before clearing port. He says: "It's a strain keeping machinery under control. Camels help ease the tension."

THE CHAMPION GIRL bronco-buster and rodeo star, Rose Davis, says: "The Camels I smoke with my meals and after are most enjoyable."

"MARK ME DOWN as a man who appreciates how mild and tasty Camels are," says all-events bowling champion, Johnny Murphy.

"CAMELS help keep me pepped up," TWA hostess, Betty Steffen, says, "I see many famous people, and most of them smoke Camels."

N'TL OUTBOARD MOTOR-BOAT CHAMPION, Fred Jacoby, Jr., says: "My condition is important! That's why Camels are my cigarette," says Fred.
