RAIL STRIKE IS THREAT TO LABOR ACT

About Our Friends

By STEP A. LONG
The first time I saw Corrine, (but I don't know her name) was not Corrine I thought what a sweet, prettily smiling wife she was. Her husband was a poor man, but industrious. He had possibilities. He bought a home for Corrine and lived it nicely. He dressed her though not expensively. He was kind to her and loved her. Corrine should have been grateful. She was not satisfied. She thought the setting in which she herself was not suitable to a wife of her exquisiteness. She developed a restlessness and a roving course of time Corrine was usually seen with a man who suddenly made a lot of money having inherited some turpentine land which he had sold at a price; then Corrine began to buy clothes that were far too expensive for a woman in her position. The next thing the neighbors knew Corrine had left her husband and was living downtown in a high priced apartment. The cost of her clothes had increased and she wore jewels and had a car. She was well pleased, there was no doubt about that. She was ending to the fullest what the gods had let her have. The time went on, the turpentine lost interest in Corrine, as she was always out. But she was active enough to pick up another beau. After a while he too got on her. She passed from love to lover, slipping down hill a little with each change. Eventually her jewels disappeared; she was wearing out her old clothes; then she began looking for a new one. She did not know how to do it; but she found simple work and paid her a little. She did not mind very well, though, as she was used to being a lady. She was accustomed to

The agent wounded one of the suspects.

Cisco Sweetheart to Be Entered at Revue

Every mail is bringing in letters of acceptance from cities invited to participate in the Texas Sweetheart No. 1 contest, according to a letter just received from the Fort Worth Frontier Fiesta by J. E. Spencer, Secretary of the Chamber of Commerce. The Cisco Chamber of Commerce agreed to sponsor a sweetheart for Cisco, but Mr. Spencer left for Colorado on a business trip immediately and nothing has been done about the matter pending his return, it is understood. One hundred cities were invited to select their representative to take part in the final contest in Fort Worth on Saturday, May 22nd. The winner last year, Miss Paye Cotton of Berger, is now in Hollywood with Universal Pictures. The new Texas Sweetheart No. 1 will be given a featured role in Billy Rose's Casa Manana Revue of 1937 and afterward she will have an opportunity in motion pictures. Each girl chosen to represent a city will be paid her fare, by train or bus, from her home city to Fort Worth and return, and if she lives a distance that would make it necessary for her to spend a night in Fort Worth, her hotel room will be provided by the Frontier Fiesta. Each contestant will be given an audition by Rose, and even if she does not win the Texas Sweetheart title, each girl will have a chance to gain a part in the Casa Manana Revue. Although the invitations went out only a few days ago, more than 25 cities already have notified the Frontier Fiesta that they will choose a representative.

Explosion of Well Kills 2, Injures 7

HOBBBS, N. M., April 16. (U.P.)—Two men were killed and 7 injured yesterday when the Monument gas well southwest of here exploded and caught fire. One man was missing. This is a natural sequence of the neon sign which has been advertising the Cisco test at night as it tells the traveler something is going on in Cisco.

LONE STAR STRIKE SETTLED; GAS SERVICE NOT INTERRUPTED

PORT WORTH, April 16. (U.P.)—A four-day strike of 162 Lone Star Gas company employees ended today in a truce that represented concessions from both sides. The agreement ratified by strikers late last night recognizes the union as collective bargaining agent during the year ending April 15, 1938. The union agreed in return, and not to call any strikes during that period. Twenty-six men, discharged by the company for the sake of economy were not reinstated immediately, as the strikers had asked, but the company agreed not to discriminate

AUSTIN, April 16. (U.P.)—The Texas senate's week-long battle between a sales tax and natural resource tax to finance Social Security projects was carried into another week today when recess was ordered without a deciding vote. An afternoon session was devoted to uncontested bills. At the morning session two proposed schedules of natural resource taxes, were defeated. The next vote will be on substituting Senator Clint Small's proposed 2 per cent retail sales tax for a sales tax plan proposed by Senator L. J. Sulak. Chief difference is that Small limits oil-gas assistance to those in need. Sulak's proposal limited natural resource taxes to supplement the present state ad valorem taxes. Seventeen votes were cast against the natural resource schedules offered today. A schedule on oil, gas, sulphur and carbon black was defeated 11 ayes to 17 no's.

MINES BUREAU ISSUES PUBLIC GAS WARNINGS

(U.P.)—The Bureau of Mines, after an investigation of the New London, Texas, school disaster recommended today the elimination from public buildings of spaces not adequately ventilated, together with the use of warning agent with distinct odors in piped gas. The report based on the findings of four explosion experts also urged the use of heating plants detached from school and public buildings. The gas which exploded in New London killed more than 290 children and teachers. The report was forwarded to Governor Allred of Texas.

'GRAUSTARKS' OF EUROPE CRINGE AS POWERFUL NEIGHBOR STATES QUICKEN PACE IN ARMS PARADE

By PETER C. RHODES
United Press Staff Correspondent
PARIS, April 16. (U.P.)—With the world gripping feverishly in another arms-riddling race and a scramble to achieve superiority, there still remain a few states that have not been touched by the war-preparing fever. Three of them, Luxembourg, Monte Carlo, Andorra, border on France and live on friendly terms with their big neighbor, who has always guaranteed to respect and safeguard their independence. The three, Lichtenstein, lies between Switzerland and Austria. As Chancellor Adolf Hitler has never mentioned poor Lichtenstein in his Anschluss program, the inhabitants rarely find themselves in doubt about the future and about internal intrigues threatening economic and territorial stability. Of these four states, Luxembourg is the largest and the one most endangered by war preparations. Lying at the corner of Belgium, France and Germany, and possessing rich iron and coal deposits, Luxembourg is very likely to face swallowing for territorial and economic reasons in any future European conflict. Moreover, precisely because of the arms race it is experiencing one of its greatest economic booms. Luxembourg mines and foundries are working overtime to meet iron and steel orders from neighboring states. Modern Army of 300 The Duchy of Luxembourg possesses a "large" police force and an army, with giant barracks in the capital city of the same name. The army, equipped with modern arms, runs almost to 300 and might resist invasion for several hours in some war, unless, of course, one neighboring state occupies its territory in defense. Although existing treaties stipulate neutrality for Luxembourg, neutrality even backed up with armed support, it is likely that the Luxembourg would look upon invasion or armed occupied defense with much the same view. The situation of its citizens would not be different in either case, as any modern cannon could fire over the country—not to mention on it. The Republic of Andorra, with a people's army of all able-bodied citizens, is not in such a dan-

A.F.L. CHALLENGES STRIKERS BY UNIONIZING 65,000 WORKERS

HOUSTON, April 16. (U.P.)—With two strikes involving 1,200 workers under way, the American Federation of Labor today challenged the Committee for Industrial Organization by including 55,000 wage earners in Houston and South Texas in its unionization drive. A. J. Bannon, president of the Houston Labor Council, announced that the A. F. of L. had added 34,850 laborers and white collar workers in Houston to its goal of 30,400 members in the South Texas Oil industry. Negotiations were opened between 1,200 striking mechanics and automobile dealers, and 35 men returned to work in one of the 42 shops tied up. Roy Sessions, president of the Refinery Workers Union, announced today that 700 men have been summoned to aid the CIO in unionizing oil workers.

FORD WORKERS MAKE STRIKE THREAT TODAY

By United Press

shell and other foreign materials imbedded in the rock. A number of shark teeth have been taken from the same formation on previous trips. The shark teeth differ from the common short, blunt fish teeth by reason of extreme length and sharpness.
Fish teeth are often preserved. Davis explains, because their dentine surface prevents decay long enough for calcium carbonate (limestone) to precipitate and form a hard rock about them. The calcium substance of the teeth, in connection with the water which contained large amounts of calcium, helped to prevent their decay. Because of this lime factor characteristic of the water and the teeth, geologists find teeth preserved in many places.
The area in which Possum Hollow and Stephenville are located was once submerged, and a seaway extended from the Gulf of Mexico across a large part of Texas as well as a number of other states. The limestone formation of the hollow was laid down during the Lower Cretaceous period. Eons later the area was elevated and has been above sea level ever since.
When the fish whose heads held those teeth were swimming around in the shallow sea, the North American continent was larger than it is now. Perhaps twice as large. The seaways of the Lower Cretaceous period were confined to Alaska.

Texas Called Most Hospitable State

"On the heart of every Texan," says Karle Wilson Baker, Nacogdoches writer in the May issue of the new travel magazine "Globe," "the ultimate post-mortem would reveal the one unchanging inscription: Howdy, stranger! Draw up and set."
There are only three other states that compare with Texas in hospitality and local pride, the writer says: Massachusetts, whose natives pity the rest of the country for being so crass that they don't know what they are missing by not being a member of their charmed circle; California, whose natives have a difficult time remembering that anyone exists east of her mountains; and Virginia, whose motto extended from the Gulf of Mexico across a large part of Texas as well as a number of other states. The limestone formation of the hollow was laid down during the Lower Cretaceous period. Eons later the area was elevated and has been above sea level ever since.

BEAUTY EXPERT TO BE AT RED FRONT

If you've ever had sun-lamp treatment, you know how the ultra violet rays seem to "wake up" the skin—clear it, and give it a healthy, youthful bloom.
But alas, not many of us can have regular ultra violet treatments. They're somewhat expensive and inaccessible. So for a long time the problem was how to get the beauty effects of the ultra violet lamp in an inexpensive form. That is the reason the Colonial Dames Laboratories of Hollywood spent many months of research and experiment, and the result is a new Vitamin D Cream. And let me hasten to explain that to a manufacturer a cream like this isn't as easy as it may sound. Many have tried the same thing and failed. But I must say this particular cream seems the most scientific yet. It is richer in Vitamin D than any cream I've heard about, and the process is protected by an exclusive patent.
Now about what it does for you. First, it is a luxurious of the all-purpose type, very delightful to use because of its rich, velvety texture and delicate scent. But most important—it has convincingly demonstrated its remarkable value in overcoming such problems as enlarged pores, premature lines, dryness, blackheads and blemishes. It comes in two strengths—one for the overage skin, and a higher concentrate for the skin with more than average deficiencies.
If you'd like to test this cream yourself, and other fine beauty products by its makers, here's your opportunity! Miss Ida Bragg, special representative from the Colonial Dames Hollywood Beauty Studio is to be the guest of Red Front Drug Store this week. Those interested (and I'm sure all of you will be) may have a complete facial treatment and make-up at her expert hands, with no obligation. Appointments are limited, however, so better telephone in advance.

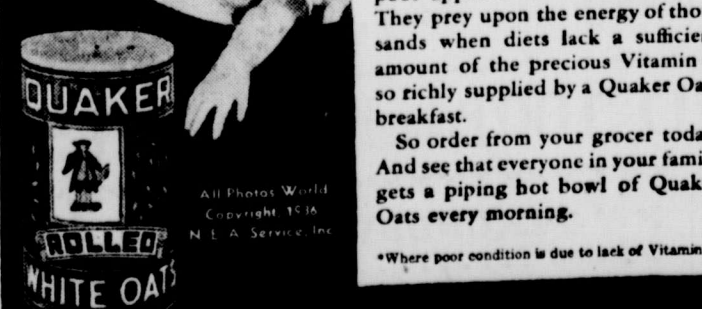

FISH TEETH FOUND AT POSSUM HOLLOW

STEPHENVILLE, April 16.—Fish teeth about 50 million years old were dug from the limestone at "Possum Hollow" near Stephenville last week when S. F. Davis, head of the chemistry department at John Tarleton College, took a group of geology students there on a field trip.
The teeth were in a sedimentary formation deposited in a shallow sea which existed in this area before the time of man. Reptiles ruled the earth at that time, and dinosaurs stretched their necks to nibble the tops of giant trees. Flowering plants were beginning to appear.
The teeth are dark brown with shiny enamel surface which helps to distinguish them from pieces of

DESDEMONA

By MRS. W. C. BEDFORD

The Methodist Missionary Society met Monday afternoon at the church (the old Masonic hall) for the study of the sixth chapter of "Out of Africa." The meeting was called to order by the president, Mrs. Charles Lee. Roll call responses were names of missionaries to Africa and some of the pictures of them were passed around. The devotionals was given by Mrs. W. H. Whitworth. A short business session was held during which Mrs. Lee, Mrs. Bragg and Miss Mollie O'Rear reported they had assisted the representative of the Curtis Publishing Co. and had \$8 for the society's part of the subscription—four bottles of vanilla were reported having been sold. The society voted to send \$5 to the conference treasurer for a baby life membership and the name of little Charles Bragg was to be the life member. The society also voted to allow \$4.00 for the expense of the delegate to the missionary conference which met last week at Temple. The report of the delegate, Mrs. McDonald, was then given. She gave a splendid report telling especially of the address of Dr. Cram, Gen. Secretary of the Board of Missions, who held many interesting things about the missions in Africa which he visited last year. Mrs. Bragg gave a tribute to the memory of David Livingston, the great explorer and missionary to Africa. Mrs. Stordman gave an article in "The Green Car Does Service in the Congo." The superintendent of

study then conducted a review of the book and the members took notes and wrote comments on each chapter and with a short sketch of the author. During the six weeks of study, the attendance has been good and much interest taken. The story of the Hottentot who appeared on the radio, "We, the People," Sunday was told. He had been rescued from the Zulus by a band of Methodist missionaries who took him to their hospital after he had been tortured and terribly burned as a sacrifice to the rain-god. Officers present besides those mentioned were: Mrs. Preston Sparks and Mrs. Bedford.

Styie McEntire left Thursday for Odessa to resume his work with a casing pulling crew after having been at home for quite a long time after a serious case of the flu.

Mr. and Mrs. Preston Sparks drove to Ranger Monday afternoon on business. They took Mrs. O. D. McDonald to Oden to visit her mother while Rev. McDonald attended a state-wide meeting of Methodists at Fort Worth.

many friends hope she may soon recover.

He was accompanied by two friends who are ministerial students, one of whom, Rev. Moore, preached at the Baptist church Sunday night as the closing service of the revival meeting which had been conducted by Rev. King of Rising Star and the pastor, Rev. H. N. Balderer. The series of services were well attended and there were a number of conversions.

Sympathy of the community is being extended to John Arnold on account of the death of his father

who passed away while asleep Monday night at his home near German.

Few Recall London Tower Beheading

BOSTON (AP)—Few people know it, but a former governor of Massachusetts was beheaded.

Sir Henry Vane came here from England in early Colonial times with John Winthrop Jr. and others. A few months later, Sir Henry was elected governor.

Tactful and diplomatic, Sir Henry soon endeared himself to the Colonists. But as time went on, Puritans condemned his tolerance and finally he returned to England.

It seems that Sir Henry had been active during England's civil war and after the Restoration, the King committed him to the Tower for alleged high treason. Sir Henry was convicted and executed.

ADMIRATION - TRIPLE-SEALED IN "CELLOPHANE"

DECISION GOES TO THE Bag ... ON POINTS

The first three rounds were a draw between the two favorites: Coffee-in-Bags and Coffee-in-Other-Containers. In the first round, the quality of the two was the same. In the second, both had the same oven-freshness. In the third, fragrance and flavor were uniform in both. But in the fourth...

Coffee-in-Bags won the decision on price!

When the housewife finds that Admiration Coffee in the moisture-proof Cellophane bags is the same fresh, fragrant, delicious coffee as that packed by other methods, she will certainly choose the bag at about 4c the pound less. Methods of packaging, plus Admiration's fast truck delivery service, assure her of an equally good coffee at a more economical price.

Buy it in the bag and save the difference.

Admiration Coffee comes packed three ways: vacuum glass jars, slip-covered tin cans, and in triple-sealed Cellophane bags.

Miss Graves Judges Neighbors HM Work

Miss Martha Graves, Cisco Home-Maker Department head, was in Breckenridge and Gordon Thursday judging the dresses of their departments looking to the sending of delegates to the Fort Worth rally to be held April 28 to May 1. It is quite an honor to Miss Graves that she should be given the distinction of judging these schools, since so much depends upon her decisions in whom are to be selected as delegates to this future home-makers convention. Cisco has already had its class criticism of dresses and work done by the girls. Judging of local work and selecting of delegates will be made here next week. Miss Graves announces.

'Graustark's' of—

(CONTINUED FROM PAGE ONE)
and Italy began quarreling over whether inhabitants of the Cote d'Azur are French or Italian. Sharing France's good facilities for transport, Monte Carlo has been enriched by a steady and wealthy tourist trade, and is suffering in no way economically. Moreover, its few hundred citizens are losing no sleep over the war danger. **Marshal Without Army**—Liechtenstein, which recently celebrated its 85th anniversary, possesses the tiniest army of any state in the world. Its single soldier, Field Marshal Kieher, has the unique honor of being exactly the same age as his fatherland, just 95. He took part in the country's first and only war—the Austro-Prussian War of 1866—where he is said to have covered himself with glory. Kieher still marches up and down for admiring officers in his 1866 uniform, complete with Gras rifle, bayonet, stripes and plumed helmet. Without a band to give him marching aid, Kieher has ingeniously developed a huge white beard so that no one notices that it is himself whistling to keep marital step. A rare photographer relieves his normal habit of standing before a mirror when undergoing self-imposed drills. The camera also serves to replace the illusion of enemy rifles. **What will be the fate of these tiny states if the predicted war sweeps Europe?** No one knows, but some feel that they will be swallowed in the territorial changes that follow.

President Refuses Comments on Court

WASHINGTON, April 16 (AP)—President Roosevelt today avoided comment in a press conference on the fight over his judicial reorganization plan. He declined comment on the compromise proposal advanced by Senator Pat McCarran, democrat from Nevada. Asked if he would accept McCarran's proposition for a dual addition of two justices to the supreme court, Mr. Roosevelt said, "There is some new plan offered every ten or fifteen minutes."
