### When is a Man a Mason?

To the question, 'When is a Man a Mason?" John Fort Newton made this answer:

When he can look out over the rivers, the hills and the far horizon with a profound sense of his littleness in the Mississippi Day vast scheme of things and yet have faith, hope and courage, which is the root of every virtue. When he knows that, deep down in his heart, every man is as noble, as vile, as lovely as himself; and seeks to know, to forgive and love his fellowman. When he knows how to sympathize with men in their sorrows, yea even in their sins, knowing that each man fights a hard fight against many odds. When he has learned how to make friend with himself. When he loves flowers ,can hunt the birds without a gun; and feel the thrill of an old forgotten joy when he hears the laughter of a child. When he can be happy and high-reinded amid the meaner drudgery of life. When star-crowne trees and the glint of sunshine on the flowing waters subcase like the thought of one much loved and long dead. When no voice of distress reaches his ear in vain and no hand seeks his aid without response. When he finds good in every faith that helps any man lay hold on divine things, and sees majestic meaning in life whatever the name of that faith may nen he can look into a wayside puddle and see something beyond the mud, observe a forlorn Mississippi Club of Texas who are fellow mortal and see something beyond sin. When he knows how to pray; how to love; how to hope. When he has kept meeting old friends on the Fiesta faith with himself, with his fellowman; with his God; in his hand a sword for evil, in his heart a bit of song; glad to live and not afraid to die. Such a man has found the only real secret to Masonry and the one it is trying to give all the

### Sen. Robinson Death a Heavy Blow

The sudden death of Senator Robinson of Arkansas, the majority leader, has removed one of the most respected senators and astute parliamentarians from the national scene. And it marks a heavy blow to an Administration faced with the first important Senate revolt against its legislative plans.

The work of the majority leader is to line up Senators in support of White House measures. No leader ever worked harder at this, or did it more successfully, than Mr. Robinson. Few Senators, it is felt, could do a difficult and often thankless job as well. The president's program will probably again have as ardent or popular a champion in the senate.

A combination of the intense Washington summer heat and the behef that the introduction of more major bills can only lead to prolonged, fatile debate is causing a growing sentiment on the part of Congressmen that the wise thing to do is to pass the necessary appropriation bills and go home.

# Channel buoys

What would modern navigation do without the channel buoys—those floating markers that keep ships off the shoals? In a very real sense, the advertisements in this paper are channel buoys, placed for your protectionfor the safeguarding of the family expenditures.

These advertisements are the signed statements of reputable firms who seek your patronage on the single basis of giving value for every dollar spent. They are honest statements, the only kind an advertiser can use and remain an advertiser.

People who get the most for their dollar in the market-places are those who keep an eye on the channel buoys. Day by day, they follow the advertisements to learn what and where to buy to the best advantage. Make this a habit. Study the advertisements, in the interest of shrewder buying.

> The advertisers in this paper have charted the channels of buying for you. Keep to the course.
