Hitler Sh-Shs Romance Talk

That gesture of Chancellor Hitler's isn't a salute. To cameramen at the Beyerleth festival, eager to record his meeting with Frau Winifred Wagner (advancing with hand extended), he is saying something like: "Now, boys, none of that! Pictures are verboten." Thus he tries to sh-sh recurrent rumors of a romantic connection with the great composer's relative.

WHEAT, CORN TOBACCO AND RICE INCLUDED

WASHINGTON, August 11 (U.P.)—The Senate Agriculture Sub-Committee approved a bill today approving mandatory ten-cent cotton loans by the Commodity Credit Corporation. The bill provides for loans on other basic agricultural commodities in event prices fall to a certain level. The loans on these commodities would be on the basis of 70 cents a bushel for wheat, 50 cents a bushel for corn, 8 cents a pound on tobacco and 65 cents a bushel on rice. Authority for loans under the bill would extend to December 31. Committee Chairman E. D. Smith of South Carolina, said the measure was designed to meet an "immediate and distressing need" to prevent "wholesale disasters." The House Labor Committee, meanwhile, agreed to several modifications of the wages and hours bill in an apparent effort to aid democratic leaders in ending the deadlock which threatened adjournment plans. The administration sought to smooth out differences over crop loans and house and senate leaders indicated a solution could be worked out to permit adjournment by August 21 or August 25.

Disease Postpones Farmer's Course

The farmers short course and the county agents conference that is held in connection with the farmers' course, have been postponed. The course was to be held this next week at College Station but will be delayed some time, due to the danger of infantile paralysis. There are no cases of the disease in or near College Station, but the official Health Officers suggested that it be discontinued for the reason that the people attending the course would come from disease-stricken areas, bringing the germs with them. The course was to be held at the Texas Agriculture and Mechanical College, and there was too much danger of the disease getting into the school.

Congress Can Serve The County

The national administration realizes that the tax on undistributed corporate earnings has been a failure, said Representative Emanuel Celler, Democrat, of New York, recently. "It was passed as a revenue-raising measure," he added. "And as we all know all it accomplished was to force corporations to deplete their reserves. The government got virtually no income from it, and business was harmed."

Congressman Celler has introduced a measure to amend the tax, and if the advice of qualified experts is followed it will be passed this session. L. H. Parker, treasury authority on taxation, has pointed out that his department has received a vast amount of correspondence complaining of the effects of the tax—and that almost all of it has come from small, not large, corporations which found that the tax made it next to impossible for them to expand their plants and build up financial reserves. Senator Harrison, Chairman of the Senate Finance Committee, expressed himself in favor of tax revision to give relief to debt-ridden corporations, and to encourage plant modernization and rebuilding. The late Senator Robinson, majority leader, spoke on behalf of modification of the law so that "investments in new enterprises would be encouraged. Secretary Morgenthau, in a letter to the president concerning tax policies, said that tax changes should be made in order to remove inequities and aid industry. Jesse Jones, chairman of H.C. declared that he would like to see an amendment to this act that would encourage expenditures for modernization of all character; for replacement of plant, machinery and equipment," etc.

Probably no item on the congressional calendar would do so much to encourage business, to increase spending power, and to provide new opportunities for employment as Mr. Celler's bill to modify the undistributed earnings tax. Congress will do the country a major service if it passes the measure this session, thus encouraging new job-creating expenditures.

Now Do Something

Congress, according to reports, is at last showing signs of "economy mindedness." It is no secret that the towering national debt, which recently reached an all time high of \$36,600,000,000, is worrying legislators.

They certainly should be worried; for the principal adverse effects of a gigantic debt, with its necessary accompaniment of rising prices, falls on the poor and moderately well-to-do. Every laborer, every professional man, every white-collar worker, every storekeeper, today can buy less than he could otherwise—because a great part of the cost of everything he buys or uses is tax levied included in the price of every article.

Concern over the debt, now exhibited by congress, should be followed by "doing something about the debt." A policy of budget balancing, and regular debt reduction, would do more for real recovery than all the expensive political panaceas ever devised.

BEHIND THE SCENES IN WASHINGTON

BY RODNEY DUTCHER NEA Service Staff Correspondent

WASHINGTON—The big question as to the blow the President received with collapse of the court plan is not one of degree but of duration.

No one questions seriously the fact that his prestige has had a terrific sock and that his control over Congress is temporarily gone. The question is whether he will be able to regain command.

The first early important test of the extent to which Roosevelt's strength is shattered will come in the administration attempt to get a much stronger wage-hour law than the emasculated version of its bill reported out by the Senate labor committee.

Whatever happens to that one, after Congress adjourns, the President will have the Washington sounding board all to himself and may be expected to make a "fire-side chat" and other speeches in an effort to build up his prestige and power by January.

Congress will return to find him fighting, and all New Deal legislative proposals not passed at this session will be before it.

THE opposition, busily attempting to nail down its court victory so that Roosevelt can be stymied from now on, is making a special drive against some of Roosevelt's young aides—notably Tom Corcoran and Ben Cohen, to whom he assigns his hardest jobs.

Thus Senator Burt Wheeler of Montana, who fought for the holding company act with Corcoran and Cohen ever at his side—after they had drafted the measure, had spread the story that Corcoran had warned him administration forces would beat him on the court fight.

OUT OUR WAY

SHORE LEAVE

SAN FRANCISCO REPORTER BUMS ACROSS NATION

By RICHARD M. MOREHEAD United Press Staff Correspondent FORT WORTH, August 11 (UP)—Take it from John M. Kennedy of San Francisco, "bumming" across the nation isn't what it used to be. Kennedy, reporter for the San Francisco News, left last June 1 on a hobo investigation tour that has taken him to New York and almost home sometime next month and the railroad crews being kind, Kennedy will be back in his home office to report his experiences.

"Boy, this is one assignment I wouldn't care to repeat," said the

reporter on a stopover here. "I don't like a hobo's life. It's the most miserable in the world, and I'll be glad to get back to the coast."

"I eat one meal a day, if I'm lucky—sometimes only a sandwich," said Kennedy. "I've traveled so fast that I hardly had time to work and people don't want to give money or food anymore. They all say 'why don't you go on relief?'"

Kennedy has made many interesting observations while going hungry, being jailed three times for vagrancy, and taking one beating from a pair of husky railroad police. He started out with \$2.51 which he promptly spent and has since carried less than a dollar at a time if any money at all.

"Hobos, the type who don't mind working for a meal, are having a pretty good time. Jobs aren't hard to find. Most hobos are finding plenty of two-bit jobs and are becoming self-supporting, saving their money to buy food. "Men who get free rides on the

railroads usually are between 25 and 35 years old. In 1933, anybody could get a ride on a freight, but the railroads are strict now. The young boys are sticking to hitch-hiking which some states are prohibiting. I waited for 52 hours to catch a ride in one Indiana town and finally was picked up by a farmer on a hay wagon."

Figures compiled by railroad and highway experts show about 2,770,000 full time transients are on the move across America now. In 1933 the transients population was estimated at 1,250,000.

Kennedy has traveled in 40 states on this trip, and covered more than 8,000 miles. His most pleasant experiences were in Iowa, where a train crew pointed out the next freight for Chicago; and in Harrisburg, Pa., where a police sergeant ordered food for the reporter in his cell and collected the money to send him to New York, without

knowing he was not a genuine tramp. Kennedy's final observation was this: "All states ought to prohibit soliciting free rides. Last year, an estimated 450 motorists were murdered by persons they picked up usually boys. I also think we ought to establish a central bureau in each state where transients can work for their meals and transportation."

GASOLINE COST VEXES FRENCH

FARIS, August 11 (UP)—The excessive price of gasoline in France removes more than two and a half million potential buyers out of the automobile market, a survey indicates.

Investigators reported on how many persons of each town and village they passed through would be able to buy an automobile if they could afford to keep it.

The reports revealed that 50,000 persons would be willing to buy an automobile costing around \$1,500 or more and a further 375,000 would invest \$1,000 in the purchase of a car. An additional 250,000 would buy one for around \$800, while 825,000 would pay from \$200 to \$400 for a second-hand vehicle.

"This makes an appropriate total of 2,500,000 inhabitants of France who wish and can afford to buy an automobile if they were not held back by the question of the upkeep."

The cost of upkeep, however is not much higher than what the average buyer would be willing to spend, and a reduction in tariffs on gasoline would just about bring the level down to what many would consent to withdraw from their annual budget for that use, the survey indicated.

For a small car, in figuring \$40 insurance and \$30 for repairs, the annual cost would not be excessive. All people having listed their names in the report would be willing and able to spend that amount. But reckoning on 15,000 kilometers as the distance over which the car is taken during the year, the price of gasoline consumed would be \$180. Including oil, the annual expenditure would be \$240, and this is more than the hesitant buyer can allot from his yearly budget.

Boy Unconscious 5 Weeks to Survive

FORT WORTH (UP)—Sammy Turner, 10, injured so badly two months ago that doctors gave him less than 24 hours of life, has amazed hospital attendants by his rapid recovery.

The youngster was brought here May 14, his skull fractured in several places when a frightened horse dragged him through a creek bed. The boy's head struck a tree with such force that the horse was knocked down.

Sammy was unconscious for five weeks, and was fed through a tube. Despite physicians' predictions that he might never regain consciousness, the youngster soon recovered his senses and apparently will survive the accident.

Business Men Beat Girls, Score 2 to 3

The girls played the business men last night at the Soft Ball field in one of the most evenly matched games ever played.

Extra innings were played when the business men lucked out or them by scoring the winning run ending the game 2 to 3.

Mr. Leach seemed to be the only player on the field. He covered third like a big leaguer. Lucky no scout was present, as we are afraid we would have lost a good ball player.

Although Nick Miller did some masterful pitching, the girls knocked all but the cover off the ball.

Smitty Huestis starred and also fumbled at shortstop. George Boyd played a good game also, such as it was.

New Schedule for Cisco Soft Ball... WEDNESDAY, August 11. Jaycees vs. Huestis. THURSDAY, August 12. Scranton vs. Red Front.

SOVIET PILES UP GOLD RESERVES

SAN FRANCISCO August 10 (UP)—Soviet Russia has established through intensive gold mining, an active reserve of 7,000,000,000 according to information obtained by the Institute of Pacific Relations.

Among some of the results accruing from this intensive gold mining, the institute has received reports of large gold shipments to England, indicating that the Soviet considers its gold supply sufficient to use in building up reserves for foreign exchange.

Reports from London are also to the effect that Soviet importers are paying for their purchases abroad largely in cash instead of availing themselves in the 50,000,000 credit facilities accorded them in England last year.

The fact that the credit was the only one accepted in 1936 also indicates the Soviet is confident that its output of gold will be sufficient to pay for importations in cash hereafter when trade conditions necessitate.

The Soviet, the institute found also has begun the repayments of various foreign credits before they fall due.

Pressure Off Exports—The final conclusion by the Institute of the effects of this intensified gold production in Soviet Russia is that its foreign debt has

'Batting Casey' Leaves Art Objects

SYRACUSE, N. Y. (AP) - The household furnishings of O. Robinson Casey, reputed to have been the original of De Wolfe Hopper's 'Casey at the Bat,' went for a 'ding' when they were auctioned to settle his estate.

The liveliest bidding was for a nine-piece dining-room suite in the 'Jacobean style.' Reported to be worth \$750 the suite was sold for \$75 when the auctioneer refused to recognize any jump bids of less than \$25.

Casey, in his younger days a baseball player, was superintendent of the S.P.C.A. here at the time of his death.

Counterfeiters Solve Tax Problem

SALT LAKE CITY, (UP) - Counterfeiters have solved a problem which confronted Utah's state tax commission.

The commission for a while feared the profits from the sales tax would be used in the purchase of replacement one-mill sales tax tokens which Utahans dropped and refused to retrieve.

However, that problem seems to have automatically righted itself with the advent of counterfeit aluminum discs the size of the one-mill token, punched with the usual circle hole, but without the usual words 'Utah sales tax token' and 'Utah state tax commission' stamped on their sides.

The tax commission now has a new problem-what to do about the counterfeiters. If their operations remain small, no harm will be done and it will save the state the necessity of purchasing replacements.
