THEY ADD UP

College Station—Texans may not realize it, but farm gardens produce a sizable portion of the farm income in the state. There were approximately 400,000 farm gardens in Texas in 1947, according to an estimate made by J. F. Rosborough, extension horticulturist for Texas A. & M. College. The figure includes gardens up to an acre in size. The value of the vegetables and fruits produced, including those processed for home use as well as fresh for the table, averaged \$110 per garden. That figures out to a total income from the gardens of \$44,000,000. "Cotton and wheat, the two crops that we figure make the most money, actually brought in an income

only a little over eleven times, in the case of cotton, and about six times, in the case of wheat, that of the value of the gardens." Rosborough says. "The value of the gardens was over ten times that of flaxseed, an up-and-coming crop in the southern part of the state."

Mrs. J. E. Mills, Mrs. Edwin Lee Mills and little son, Edwin, Jr., were in Snyder, Okla., last week for a visit with the baby's great grandfather, E. L. Mills.

SOIL CONSERVATION—A COMMUNITY PROBLEM

No farmer can most effectively conserve soil and water without the cooperation of his neighbors. Conservation is a community problem. It can be handled best through the organization of a soil conservation district. Soil conservation districts are local subdivisions of government set up by farmers themselves by petition and referendum. They are chartered by the state government. They are administered by boards of supervisors or directors chosen by ballot from farmers in the district.

Of the 48 states, 45 have enacted legislation authorizing soil conservation districts. Congress has directed the Soil Conservation Service to work with farmers through properly organized districts. If there is no district in your county, plans for such organization may be obtained from your state soil conservation committee. OUR NATIVE LAND, A Trust to Keep*

* This information is furnished by the Blackwater Valley Soil Conservation District.

KITCHEN MEMO BY JEAN CLARKE
He-man favorite, and for most women too, is any dish with Sauerkraut. This recipe uses Beef Brisket—a good item for price-conscious cooks and a pleasant change from the usual franks or spareribs combination. Flour 3 lbs. beef brisket with 2 tbs. flour and brown in 2 tbs. hot fat in heavy frying pan. Add small amount of water, cover, cook until almost tender. Add 1 qt. sauerkraut, 1/2 cup sliced onion, 1 1/2 cups grated raw potato, 1 tsp. caraway seed, 1 tbs. sugar, 1 cup boiling water. Cover, cook about 30 mins. over low simmer flame.

Deep fat frying isn't too complicated a cooking process if you remember that it's most important to maintain even heat. Keeping the flame at correct heat also saves waste of food and fat. Fat that gets too hot can't be used more than once or twice.

If you have recently bought a new gas range, particularly one built to "CP" standards, remember that the oven preheats faster than older models and needs less gas to keep fixed oven temperature.

Fudge won't boil over if butter is rubbed around the top of the pan.

A change from the usual cereal for breakfast, and nourishing too, is French toast. It's a saving use for stale bread usually thrown out. Dip stale bread slices in an egg and milk mixture, fry same as pancakes over medium low heat.

I've Gone All Out For All-Electric Living

Lucky, lucky lady with all those wonderful electric appliances . . . her electric range, refrigerator, water heater, complete home laundry and other labor saving devices.

And behind these appliances, behind the walls of her home, she has all important Adequate Wiring. She knows that the electric wiring in her home is large enough to provide her with plenty of electric service when and where she needs it.

Call or write your nearest Public Service office now for a wiring check-up by a specialist. There is, of course, no obligation.

Adequate Wiring MEANS:

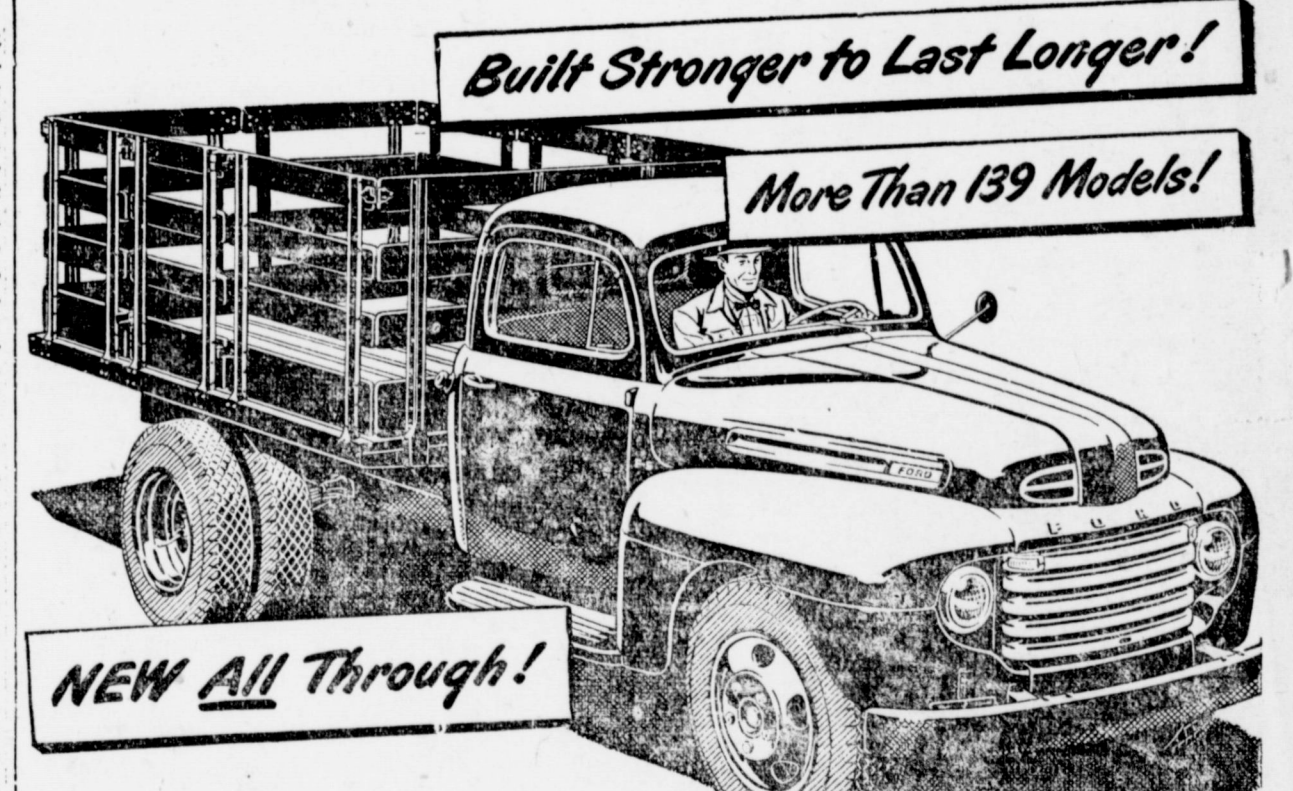

1. ENOUGH CIRCUITS for serving efficiently and safely all the appliances you have.
2. LARGE ENOUGH WIRE for serving your present and future needs.
3. ENOUGH OUTLETS AND SWITCHES for convenient living.

We Have Nothing to Sell But Good Electric Service

Brand NEW for '48 FORD Bonus Built TRUCKS

Built Stronger to Last Longer!
More Than 139 Models!
NEW All Through!

Bonus* Built — THE AMAZING RESULT OF AN ENGINEERING PRINCIPLE THAT ASSURES WIDER USE, LONGER LIFE . . . and ONLY Ford Trucks Have It!

EVERY single one of the great new Ford Trucks for '48 is Bonus Built . . . designed and built with extra strength in every vital part! But that's only part of this vital truck engineering principle . . .

This extra strength provides WORK RESERVES that pay off for truck operators in two important ways:

- FIRST, these WORK RESERVES give Ford Trucks a greater range of use by permitting them to handle loads beyond the normal call of duty. Ford Trucks are not limited to doing one single, specific job!
- SECOND, those same WORK RESERVES permit Ford Trucks to relax on the job . . . to do their jobs easier, with less strain and less wear. Thus, Ford Trucks last longer because they work easier!

Only the New Ford Bonus Built Trucks Give You All These Big Advancements!

- NEW! 3 New Engines . . . up to 145 h.p.! Brand new Six . . . 2 brand new V-8's! Packed with advancements that give you real performance! Proved Ford reliability and thrift!
- NEW! 2 New Big Jobs . . . Biggest Ford Trucks in history! Gross vehicle weight rating up to 21,500 pounds! 145 h.p. engine! 5-speed transmission! They're rugged; they're something!
- NEW! Million Dollar Cab . . . Living Room Comfort! New coach-type seat. More headroom, legroom, elbowroom! Picture-window visibility. New exclusive Level Action cab suspension.
- NEW! New frames, axles, brakes, steering! Built stronger to give your Ford Trucks even longer life! These new Ford Trucks for '48 are really new all through!

ONLY FORD TRUCKS ARE BONUS BUILT FOR WIDER USE, LONGER LIFE!

Yes, Ford Trucks for '48 are Bonus Built . . . built stronger to last longer! That's why they give their owners wider use and longer life! That's why life insurance experts can certify proof that Ford Trucks last up to 19.6% longer. That's why the record shows there are more Ford Trucks in use today than any other make. Let us show you the revolutionary new Ford Bonus Built Trucks today!

THE BUGS ARE BUST

College Station—Entomologists of the USDA's Bureau of Entomology and Plant Quarantine recently sampled untreated bins of wheat in a midwestern state and found a heavy infestation of stored grain. If all wheat in farm storage is infested at the same rate, the scientists report, the loss of grain will have a direct effect on the grain conservation program.

Grain stored in southern states is always more heavily infested and damaged by insects than grain stored in northern states because of the moisture and temperature factors, entomologists of Texas A. & M. College point out. The insects develop more rapidly and do more damage to grain with a moisture content above 9 per cent, while a daily temperature of 70 degrees, or more encourages their development. The entomologists recommend a mixture of three parts of thylene dichloride to one part carbon tetrachloride as the ideal fumigant for

killing insect pests in stored grain.

The U. S. Navy reports that 183 Marines were killed and 616 wounded on Eniwetok during the war.

Muleshoe Club Met With Mrs. Pierson

The Muleshoe Home Demonstration Club met Thursday, Jan. 8, in the home of Mrs. B. L. Pierson with Mrs. W. M. Dudley as hostess.

Council report was given by Mrs. D. R. Aylesworth. There will be no material for feather comforts this year.

Mrs. Tom Zimmer and Mrs. Ernest Holland were appointed to send flowers to Mrs. P. Busbice who is ill in the Green Hospital.

Mrs. W. F. Hays resigned as reporter and Mrs. J. T. Shofner was elected to take her place. The Demonstrators for the new year were selected.

The club goals for the year are to have 100 per cent average attendance for the year, more recreation at each meeting, and have at least one member attend each training school throughout the year.

"Plan a Work Area" was the demonstration given by Mrs. Laurette Williamson.

Refreshments of cake, cookies, coffee and cocoa were served to four visitors, Mesdames Carrie Owens, R. H. Sneed, John Dudley and Ollie H. Hawkins; thirteen members: Mesdames W. F. Hays, O. C. Kirk, D. E. Beller, Ernest Holland,

C. E. Briscoe, D. R. Aylesworth, S. C. Caldwell, H. M. Shofner, Tom Zimmer, B. L. Pierson, J. T. Shofner, Laurette Williamson and the hostess, Mrs. W. M. Dudley.

The next meeting will be Jan. 22 in the home of Mrs. Ernest Holland. Each club member is urged to be present at all meetings. Visitors are always welcome.

GIRL SCOUTS MET AT GRADE SCHOOL BUILDING

The Girl Scouts met at the second grade building January 12. Miss Head, our leader from Clovis, was there. We had refreshments and then sang.

Those present were the following: Ann Woodley, Ginger Gaede, Venette Wood, Barbara Douglass, Lita Allen, Bobby Bowen, Rosemary Pool, Virginia Wood, Marion Harris, Quineil Elliott, Paula Provence, Kay Roy, Janell Green, Diana Barnett, Bettie Collins, Mrs. Harris, Laura Whalin, Pearlene Coulter, Lenita Lewis Whalin, Patsy Scabreth.

HALF CENTURY CLUB MET WITH MRS. ENGRAM

The Half Century Club met in the home of Mrs. J. H. Engram on January 8. Fourteen members were

present. After a short business meeting, new officers were elected for the new year. Then the hostesses, Mrs. Engram and Mrs. Witherspoon, served sandwiches, cake, and coffee.

The next club meeting will be on January 22 at the farm home of Mrs. Alpha Julian north of Muleshoe.

Enochs Club Met With Mrs. Seagler

The Enoch's HD Club met in the home of Mrs. C. G. Seagler Friday afternoon.

A regular business session was held. Mrs. Bell thanked the club for the gift they presented her. Refreshments of spiced tea and pecan pie were served to fifteen members and two visitors.

The next meeting will be with Mrs. Grusendorf on Jan. 29. Mrs. Williams will meet with us in that meeting.

Welch-Embry Rites Read Here Sunday

Sunday morning at 9:00 a.m. in the home of Minister and Mrs. Ebb Randol, Miss Billy Jo Welch and Mr. Chester Henry Embry were united in a single ring ceremony by Minister Randol.

The couple was accompanied by Miss Claudine Trapp, and Mr. Joe Embry. Others attending were Mr. and Mrs. Ray Lawhorn, parents of the bride, Mr. and Mrs. J. E. Embry, parents of the groom, Lula Mae and Floyd Embry, James and Janet Lawhorn and Reece Wiltterding. The couple left immediately after the ceremony for a honeymoon trip.

Mrs. Buford Butts Hostess To Guild

The Wesleyan Service Guild met in the home of Mrs. Buford Butts Monday evening, January 12, with the new president, Mrs. Francis Gilbreath, presiding.

Mrs. Fred Johnson gave the devotional and Ann Woodley sang a solo.

Plans were discussed for the new year and the theme given. The theme for the year is: "Thy way may be known upon the earth."

The new officers for the year are: President, Mrs. Frances Gil-

Facts on American Colleges Offered in Magazine Series

What college do you want to attend? Tens of thousands of parents and prospective students are pondering the answer to that question.

To provide this essential information, *Cosmopolitan* magazine, in the January issue, begins a series of articles on American colleges, describing in detail every facet of college life.

First college to be described is the University of Minnesota, largest university on a single campus in the United States.

With 28,000 students and five graduation classes each year, the University of Minnesota offers a curriculum that should appeal to virtually every prospective student.

A few of the highlights of the University of Minnesota follow: It operates its own airport for fledgling fliers. There is a university radio station over which professors broadcast their disquisitions, making it theoretically possible for a student to win his degree by merely listening to these broadcasts without ever leaving his bed.

The university maintains its own police force which is empowered to pursue and arrest a fugitive any place in Minnesota. The *Minnesota Daily*, the student newspaper, boasts the largest circulation—34,350—of any college newspaper.

In the Coffman Memorial Union there are twenty dining rooms, a

post office with 18,000 boxes, an underground garage, eighteen grand pianos, a soda fountain, a barber shop, a bookstore, billiard tables, a swimming pool, checker tables, card tables, and sixteen bowling alleys.

"The curriculum is positively staggering," the article states. "The university's graduate schools offer advanced study in every field except theology. There is a college of agriculture forestry, and home economics in St. Paul on the 'farm' campus, which is a short trolley hop from the main campus in Minneapolis. There is a law school, a justly famous medical school partially endowed by the Mayo Clinic, an institute of technology, a college of science, literature and the arts, and a dozen other colleges.

"The admission requirements at Minnesota are flexible: there are even a few students without high school educations. For those with special needs, there is University College, a division of the university that manufactures curricula on order."

breath; Vice President, Mrs. Fred Johnson; Recording Secretary, Miss Elizabeth Harden; Corresponding Secretary, Mrs. Delma McCarty; Treasurer, Mrs. Harold Weyer. Other officers and committees will be announced later.

Those present were Mesdames Francis Gilbreath, Noel Woodley, Fred Johnson, Curtis Spivey, Delma McCarty, Jim Burkhead, Jim Cox, W. B. LeVeque, Jim Alsop, Marty Ezell, David Anderson, N. H. Greer, James Case, Miss Elizabeth Harden, visitor, Ann Woodley, and hostess, Mrs. Buford Butts and daughter, Patricia.

The next meeting will be January 26 in the home of Mrs. Clyde Holt.

FAREWELL PARTY HELD FOR BILL MATTHIESENS

A surprise farewell party was given Friday night, January 9, in honor of Mr. and Mrs. Bill Matthiesens and Nick, in their home.

Games of forty-two were played during the evening and refreshments of sandwiches, cookies and coffee were served. A lovely chennille bed spread was presented to the honorees from friends.

Those present were Messrs. and Mesdames Art Ryan, Barney Smith and family, Jack Epps, R. L. Roubinek and son, Morris McKilip, Harry Engleking, R. L. Matthiesens and daughter, D. J. Harris and also attending were Mrs. Josephine Roubinek and Mrs. Myrtle Priboth, and the honorees, Mr. and Mrs. Bill Matthiesens and Nick.

Everyone departed wishing them happiness in their new home.

SHIRLEY DAVENPORT IS HONORED WITH PARTY

A birthday party honoring Shirley June Davenport was held in the second grade room at Baileyboro school with Mrs. L. H. Davenport and Pauline Chappell as hostesses, on January 8. Shirley was eight

Progress PTA Held Amateur Program

The Progress PTA met Monday night, January 12, with a large crowd attending. Mrs. Grandy's room won the prize with twenty two votes. Mrs. Ernest Locker was elected secretary-treasurer to succeed Mrs. James McDorman, who resigned.

Everyone is very proud of the loud speaker purchased by the PTA with the proceeds made at the pie supper and sock social. The loud speaker has been used a few times already.

There were several entries in the Amateur Program and the program was enjoyed by everyone.

Mr. Grandy did a very good job of auctioneering off the socks, getting as much as from five to ten dollars for several socks.

Each room in school will be responsible for one PTA program, be-

ginning with the next program which will be the second Monday night in February. Everyone come.

Mr. and Mrs. Leland Mounts, former residents of Bailey county, now residing at Hale Center, were in Muleshoe visiting and attending to business Tuesday. They recently sold their farm in Hale Center community, and were toying with the idea of moving back to the best part of the Plains.

Mrs. Morris Douglass, Mrs. Harold Weyer, Mrs. W. B. LeVeque and Mrs. Dudley Malone were visitors in Lubbock Tuesday.

New "One-Arm" Lock

NEW YORK—No need for Richard to come and open the door for this pretty housewife. Yale's new spring latch, pictured here, features "one-arm" action. The new lock makes it possible for one person to open the door with ease, though encumbered with packages, without having to have both hands free to manipulate key, lock and door knob.

A revolutionary invention, the lock also has new material and mechanical patented improvements which make it impossible for anyone except a master locksmith to pick it. It heads a series of new night latches which are the first new products in the builder's hardware line announced by Yale &

Lice Inflict Heavy Damage on Cattle

DDT Treatment Cuts High Winter Losses

Lice are injurious to all types of cattle. Animals produce less meat and milk if lice are unchecked. Young animals and poorly-nourished old animals suffer most from lice.

The winter season is the time lice are bad on cattle. The louse population builds up then. Dr. Harold Gunderson, extension entomologist at Iowa State college, says one louse unchecked in fall means 1,000 the following March.

For lice control on cattle, DDT is being used successfully. Early in fall, before cold weather arrives, it is mixed with water and sprayed on the animals. After cold weather comes, a DDT dust is recommended. Farmers are being advised to use a dust containing 10 per cent DDT. Some of the powdered louse killers on the market contain less than 10 per cent DDT, but have other effective insecticides combined with the DDT.

The rotenone dusts recommended for cattle grub control can be used for lice control. Usually they are diluted for lice, to cover greater areas and reduce the cost. For instance, one pound of a cattle grub dust containing 1 1/2 per cent rotenone can be mixed with two pounds of flour to make an effective louse killer.

World's Largest Potato Yard Found in Chicago

The world's largest potato yard is located—not in Idaho, nor in Maine—but in the largest city near the geographical center of the nation—Chicago.

In the Wood street yards of the Chicago and Northwestern railroad,

an average of 20,000 carloads of potatoes are handled annually. Many thousands of tons of other vegetables also pass through this yard.

The yard is the central marketing point for potatoes, which come in from virtually every state in the union. Dealers and brokers assemble in the yard each day before dawn to buy, sell or reassign an average of 36,000 bushels daily. The Wood street yard is a far cry from the wooden platform which served as a terminal years ago.

Milk Testing Traced To Michigan Farmers
By Louis Sellers

Forty years ago a few progressive dairy farmers in Michigan organized the first cow-testing association in the United States. They wanted to improve the profitability of their herds. They hired a tester to weigh

and test the milk of each cow and to keep a record of her feed cost and income. They wanted that information so they could cull the low producers from their herds and feed the rest more economically.

In the first four years of their pioneer effort, these Michigan farmers doubled the average profit per cow. Since then thousands of other dairy farmers have followed their example with equally striking results.

New Chemical Utilized For Grasshopper Poison

Research men at various state colleges after trying benzene hexachloride, a chemical discovered in Europe and brought to this country for experimental use as a grasshopper poison, believe it is the best thing yet discovered for hog mange, as well as grasshopper control. The compound is a wettable powder that can be used as either a spray or dip for hogs and is sold under various trade names.

Texans Studying Ways To Improve Education System

Every county and small community in the State of Texas will be engaged in determining the kind of educational system the State should have under a program announced today by the Gilmer-Aiken Committee on Education.

Senator James E. Taylor, Chairman of the Committee, speaking before five hundred representatives of city and county school systems in their annual meeting in Austin, revealed far-reaching plans for carrying a study of education to the people of the State.

Under the plan announced committees will be formed in each county of the State to advise and inform the Gilmer-Aiken Committee.

"Thus," said Senator Taylor, "the eventual recommendations of the Gilmer-Aiken Committee will become the recommendations of the people of the State. We are convinced that the people want an educational system even better than our present excellent one, and this means will be used to carry out their wishes."

The next program is to be implemented by the appointment of Dr. H. A. Moore of Austin as Executive Agent of the Committee and by the retention of Dr. L. D. Haskew, Dean of the College of Education of the University of Texas as Technical Consultant to the Committee. Both men are assuming their duties at once, it was announced, and a speedy program of action is contemplated.

Week end guests of Mr. and Mrs. J. J. Gross were their brothers, Henry Hapke, of Wood River, Neb., and Henry Gross, of Glidden, Iowa, a nephew, Chris Hapke and his friend, Alvin Telschke, also of Iowa.

W. H. Robertson was in Lubbock on business Tuesday.

Mrs. Harold Weyer had as guests this week her mother, Mrs. Cooper Morgan, of Hereford, and sisters, Miss Jane Morgan, Hereford, and Mrs. J. R. Cole, of Houston. They returned to their homes Thursday.

SNOODLES

By Cy Hungerford

ing been the rental received from farmers using the bins for storage of surplus grains. The revenue in turn has been used, they say, to keep the bins in good repair and to pay interest on the money represented by the investment in the bins.

From the standpoint of keeping the grain in good condition in the bins, it is questionable whether the Government will again enter into a program providing for the purchase of similar units for the benefit of farmers. It was learned that it is being toyed with the number of small units to be properly test the grain.

Turning of the grain is a difficult and often badly infested by insects. The Government officials will not be able to store grain in elevators until the turn of the year are available.

Douglas, Mrs. Har- W. B. LeVeque and Malone were visitors Tuesday.

Farm Notes

PIGS ARE SHORT
College Station — Texas raised more pigs in 1947 than in 1946, but the total is still below the 10-year average of 1936-45.
That's the gist of a report from

the USDA's office of Bureau of Agricultural Economics in Austin. According to the report, 2,244,000 pigs were raised on Texas farms in 1947, about three per cent more than in 1946, but 14 per cent below the 10-year average.

Fall farrowings were up 12 per cent above the 1946 number for the

state as a whole, but some west-north central counties reported a drop due to short grain reserves.

The production picture doesn't look any better for 1948. According to breeding intention estimates, 186,000 sows will farrow in the spring of 1948, just about the same number as in 1947, but 19 per cent below the 10-year average of 230,000 head.

of steel bins had been sold to farmers so that in the fall of 1942 the Government held title to approximately 130,000 steel and wooden bins with a storage capacity of about 280 million bushels. During that period the Government transported a number of the steel bins from Illinois and Iowa to the surplus wheat producing areas of Kansas, Nebraska, South Dakota and

North Dakota.

The Government has consistently followed the policy, since 1939, of offering the bins for sale to farmers at cost, to encourage an increase in farm storage facilities. The policy apparently was successful because as of June 30, 1947, all bins had been sold except a relatively few steel structures located in the surplus corn producing states. The

Government claims it has not lost money on its investment in the bins, its principal source of revenue hav-

PULL THE SWITCH

College Station—The first impulse when fire breaks out in the home is to pour on water. But that is not always the wisest move.

Mrs. Bernice Claytor, extension home management specialist for Texas A. & M. College, says that when fire is in or around electrical equipment, water or other fire extinguishers should never be used until the electric current is cut off at the switch.

For that reason, she suggests that every member of the family know how to "throw" or "pull" the main switch to deaden the wiring system in case of a fire emergency.

After the electricity is turned off, the fire can be treated by the proper extinguisher. But it is well to remember, Mrs. Claytor says, that wires inside motors and other electrical equipment are covered with tarry material which burns like an oily rag.

"Tin Can" Storage History Revealed

The U. S. Government in 1939 and 1940, purchased more than 62,000 steel grain storage bins with a capacity of slightly more than 136 million bushels. The bins were used in 1939-1941 principally for the storage of corn in the surplus producing areas. In 1942 the Government procured about 78,000 wooden grain storage bins with a capacity of slightly over 156 million bushels. At the time of the purchase of the wooden bins only a small number

COL. W. D. WANZOR Auctioneer
HUGH FREEMAN Clerk

On a heavy-duty job, give me new Advance-Design CHEVROLET TRUCKS and here's a "load" of reasons why...

Only Advance-Design Trucks Have All These New and Finer Features:

- ★ Cab that "breathes"
- ★ Flexi-Mounted cab
- ★ Unweld, all-steel construction
- ★ Larger, more durable, fully adjustable seat
- ★ 22% greater visibility
- ★ New, rear-corner windows
- ★ Stronger, new frames
- ★ Full-floating hypoid rear axles
- ★ Specially designed hydraulic truck brakes
- ★ Valve-in-Head Thrift-Master or Load-Master engines
- ★ More efficient loading (stake and high-rack bodies)
- ★ New, thorough sealing insulation
- ★ Standard cab-to-axle-length dimensions permitting interchange of bodies
- ★ ... and MANY more!

Brother, how these stronger, new frames stand-up! Wheel-bases are longer, too, for better load distribution. And the brakes are exclusively designed for greater brake-lining contact!

There's nothing like the cab that "breathes" for comfort! Fresh air is drawn in from the outside—heated in cold weather—and used air is forced out. The cab is cushioned on rubber-Flexi-Mounted—with 12 inches more foot room and eight inches more seating space. There's 22% greater visibility, too, they tell me. The seat is fully adjustable. Man, this is it!

Look—rear-corner windows! Now it's a cinch to back up without jackknifing. Yes, air, these trucks are brand new—really different with Advance-Design. And they're packed with power steering and power brakes. *Fresh air heating and ventilating system and rear corner windows optional at extra cost.

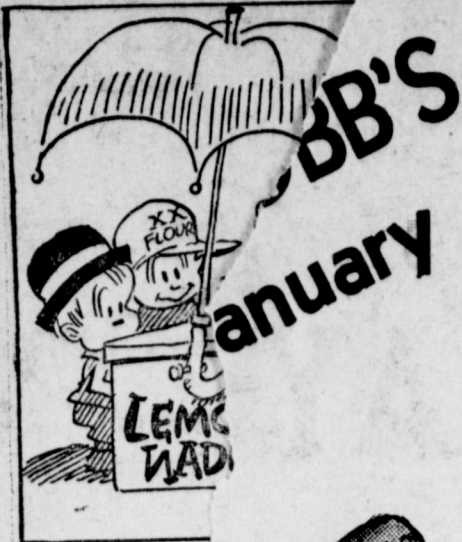

Here's a special, heavy-duty job and an extra-special truck! Take your pick from 107 different models and eight wheel-bases. There's one made for your special kind of job.

Chevrolet logo

Come in and see these trucks—today! There's a Chevrolet Advance-Design truck to meet your specific needs and offer you TRANSPORTATION UNLIMITED!

Muleshoe, Texas

Death Rate Shows Big Increase In '47

Austin—It is estimated that during 1947 there were 195,000 live births and 61,000 deaths in Texas. The number of births in 1947 far exceeds the former record of 180,000 in 1946. The excess of births over deaths last year gave Texas a natural increase in population of 134,000 people, according to Dr. Geo. W. Cox, State Health Officer.

It has been apparent for some time that reductions in the mortality due to preventable causes could not any longer offset the staggering increase in the number of deaths due to cancer and the various heart diseases. For this reason, it was not difficult to predict that 1947 would see the general death rate begin an upward trend.

Practically all of the increase in the mortality during the first nine

months of 1947 may be attributed to the steadily mounting death toll levied against the population by heart disease, cancer and apoplexy.

Considerable satisfaction should come to those engaged in public health work in knowing that during the first three quarters of 1947 the lowest death rates ever recorded in Texas were reached for the following diseases: typhoid fever, diarrhea and dysentery, scarlet fever, diphtheria, measles, poliomyelitis, tuberculosis, malaria, syphilis, pellagra, and typhus fever.

Mr. and Mrs. N. S. Abbott and baby, of Spade, visited here with friends Sunday and attended services at the First Baptist Church. Mr. Abbott was formerly with the soil conservation service Muleshoe office.

W. F. Hays, Jr. was a visitor here with his parents Sunday. W. F. is living in Plainview.

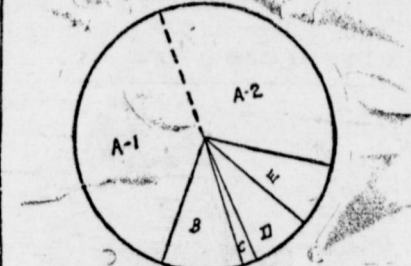

Milk Products Help In Conserving Grain Better Rations Result When Proteins Are Used

With a world grain emergency and a national drive to conserve grain used in feeding, and with grain prices high, milk by-products are more important than ever in poultry feeding.

Balanced rations probably can do more to conserve grain used in feeding than any other single measure. Milk nutrients found in skim milk, buttermilk and dried cheese whey have been found highly effective in building balanced poultry rations.

These milk by-products provide animal proteins of unusual quality. The milk proteins, lactalbumen and

Total Dry Milk Production—1946

C Dried Cream and Sterilized Dry Milk Solids - Animal Feed
D Dried Whey
E Dried Buttermilk

casein, have a high growth promoting value and contain all the essential amino acids. These proteins give balance to the lower quality vegetable protein in grains normally fed poultry.

Milk by-products are rich in lactose, or milk sugar, a natural laxative which helps poultry maintain good intestinal health and minimizes the hazards of intestinal parasites. These milk by-products also provide minerals, particularly calcium and phosphorus and contain the water soluble vitamins of whole milk.

In preparing a balanced ration the object is to feed the correct proportion of the various nutrients that poultry require. In every case there is a point beyond which it is wasteful to include additional grain without providing other nutrients because the fowl cannot make complete economical use of all nourishment in additional grain.

Killing Chestnuts

The Asiatic blight which struck down native chestnut orchards in the United States, estimated at sums up to a hundred million dol-

Forest Fire Commissioner W. L. Shaddix inspecting chestnut burs for asiatic blight.

lars some 25 years ago, is still active, and doubt that it will pass over and let this luscious crop come back usually is accepted by well informed agriculturists.

Poultry Relish Grit; Aids Grinding Process

Grit is a material of value to poultry but full details are not yet definitely known, according to University of Delaware. It is certain that birds like it and, when grit is fed freely, they consume more than is actually needed. Grit containing a large amount of soluble calcium has been widely recommended but appears to have no advantage where other forms of calcium are included in the ration. Actually it might be detrimental, say Delaware specialists. Helping the gizzard in the grinding process is the only known function of grit. A hard mica grit of suitable size doubtless should be available to all chickens.

Productivity Depends Upon Organic Matter

The soil's ability to produce high crop yields needed to feed hungry millions depends on its organic matter supply. Soils rich in organic matter are good "sponges" for soaking up and holding rainfall for crops. Organic matter helps restore soil structure, improves tilth and helps plant roots get more nutrients from the soil. Use lime, fertilizers containing phosphorus and potash to get good catches of legumes.

Chevrolet Sets Production Mark in December

Detroit—Production of passenger cars and trucks by the Chevrolet Motor Division during December set a new postwar high, when a total of 110,049 units were made in the company's assembly plants, it was announced today by Nicholas Dreystadt, Chevrolet general manager.

The total of 38,160 trucks and commercial vehicles produced during December not only was a new postwar record, Dreystadt pointed out, but also came within 736 units of setting an all-time high mark for this type of production. Chevrolet produced more trucks and commercial units last month than in any single month since June 1929, when 38,896 units were made.

The production of 71,889 passenger cars in December also was a new postwar record, exceeding any production month since the resumption of automobile making following V-J Day. It was higher than any pas-

senger car production since December 1941.

Shortly before the end of the year, Chevrolet announced it was the first single company to make more than a million passenger cars and trucks in 1947. The year-end production figures show a total of 1,031,330 passenger and commercial vehicles were manufactured in Chevrolet assembly plants.

ARMY RECRUITER TO BE IN MULESHOE

T-Sgt. Leon Reynolds will be in Muleshoe for interviewing all men interested in acquiring information about the present policies and advantages now available.

High school graduates, listen to this offer! If you're near graduation, why not talk to your counselor about the opportunities offered by the Army Technical School Plan? You get the full Army pay while in training, plus all the other benefits: excellent food and quarters, recreation and sports, the finest kind of medical and dental care, the chance to get ahead and be a real leader, in the Army or out!

For further information contact Sergeant Reynolds when in town or call at the Army & Air Force Recruiting Force Recruiting Office in Clovis, N. M.

As of September 1, the U. S. Navy had 226,000 men afloat and 49,000 ashore. As of November 1, the U. S. Marine Corps had 2,400 men afloat and 19,000 ashore.

Mrs. Lillian Sellars has returned after two months absence and resumed her position in M. G. Bass' office.

Mr. and Mrs. F. L. Wenner have returned home from Amarillo, where they visited Mrs. Wenner's sister, Mrs. C. P. Waters.

Area Banks Show Record Deposits

Reflecting unprecedented prosperity over the entire area, deposits of 36 banks in 29 towns in the South Plains area totaled a record \$239,678,365.81 at the close of business on Dec. 31, 1946, a compilation of bank statements from over the area revealed Saturday.

The record-breaking deposits showed an increase of \$76,774,789.20 over the figure of Dec. 31, 1946. On that date deposits totaled \$162,903,581.61.

Every bank in the entire area, including the new bank at Anton, which was opened only the past summer, showed deposits of more than a million dollars. The Anton bank's deposits were \$1,082,137.55. Bumper crops, increased oil production and greater livestock production augmented by higher prices in every phase of marketing of products were contributory to the great flow of cash into the banks. Never before in the history of the area have bank deposits shown nearly a 50 per cent gain during a year's time.

Deposits by towns on Dec. 31, 1947, were:

Abernathy	\$2,445,919.00

DAIRY TIPS FOR '48

(Feedin', Conservin', and Producin')
In the cold bleak days of winter after summer's work is done, there's a little time to ponder and prepare for things to come. Gather 'round the room and listen and we'll think awhile out loud. So's to keep our cows producin' above the average of the crowd. Understand now there's a shortage in our feed grains, not our hay. So we've got to feed some roughage more than once or twice a day. Feed all the hay your cows will eat—give them grain to meet their needs. Feed silage if you have it and help conserve our feeds.

If you've got a low producer clut-terin' up your barn you should send her to the butcher where she'll cease to do you harm. There's a new technique of breeding termed the artificial way. 'Tis considered quite a saving in the small herds so they say. So what about your herd sire, do you need this guy or not. If you don't let's find a buyer and remove him from the lot. After heeding all these measures there is one thing else to do, Give cows water in their leisure—it will help your income, too. Now we've covered many details and before it is too late, Let's feed the cows to fill the pails in nineteen forty-eight. By Ralph A. Porterfield, Extension Dairyman, University of Maryland.—Submitted by County Agent J. K. Adams.

McMillan To Show Africa Hunt Films

Lubbock, Jan. 10—W. G. McMillan, Lubbock contractor, achieved a life long ambition when he spent months in the heart of darkest Africa hunting wild animals and recording his experiences with over 10,000 feet of colored film. For the benefit of the Lubbock Kiwanis Club's boys and girls fund, he has consented to hold the first showing of these films in the Lubbock High School auditorium.

All seats will be reserved for the premiere at 8 p.m., January 23. After the premiere, the schedule calls for two matinee performances at 2:30 Saturday and Sunday afternoons, and two more performances the following Monday and Tuesday nights, January 26 and 27.

Political Announcements

The Journal is authorized to make the following announcements for public office, subject to the action of the Democratic Primaries in July.

For County Judge:
CECIL H. TATE
(Re-election)

For Sheriff, Tax Assessor and Collector:
J. C. BUCHANAN
(Re-election)

For County and District Clerk:
M. G. BASS
(Re-election)

For County Treasurer:
HELEN JONES
(Re-election)

For Commissioner, Prec. 2:
TOM L. SMITH
(Re-election)

For Commissioner, Prec. 1:
L. T. McKILLIP
(Re-election)

Chaplains Call for Help

Radio receiving sets and other entertainment equipment being supplied to 125,000 or more permanently illing ex-GIs by the Hospitalized Veterans Foundation must meet the most rigid specifications.

Moreover, such equipment is purchased by the Foundation at approximately factory cost. Consequently the dollars you contribute to this laudable program accomplish much more than through any other channels.

As an example, a \$15 contribution will provide a lonesome hospitalized veteran with a high-quality, long range radio set especially suited to his need, a set which normally would retail at about \$40.

Caution is the word in making allocations of the radios and other equipment. Chaplains, special service officers and welfare directors of the nation's 140 veterans' hospitals and homes are invariably consulted.

Thus the Foundation's disbursement committee has assurance at all times that the materials go to the places where they are most urgently needed to spread sunshine and boost morale.

The chaplain of one hospital reported that out of 530 patients only 96 were supplied with radio receiving sets and most of those were on loan.

Another chaplain in a smaller veterans' home said: "We could use 100 pillow-type radios tomorrow."

All contributions are deposited to the credit of the Foundation in the American National Bank & Trust Co., 33 N. La Salle St., Chicago.

Disbursements are made by the treasurer, but only on order of the executive committee.

Use the attached coupon if you find it convenient in forwarding your contribution.

MR. SAMMY KAYE
607 Fifth Avenue
New York City.
Dear Sammy:
Enclosed please find \$..... as my contribution to the Hospitalized Veterans Foundation's fight against loneliness.
Name.....
Address.....
City..... State.....

Mr. McMillan and his family will appear on the stage and give a personal account of their experiences on opening night. Narration of the film will also be rendered by McMillan personally at all other performances.

Reserved seats for the premiere cost \$2.40 including tax. Children are admitted for 60 cents at the matinee performances, and \$1.50 will be charged at other showings. Seats

may be secured by writing the Kiwanis Club, Box 3, Lubbock, Texas.

WORKERS CONFERENCE TO BE HELD AT SUDAN

A workers conference of the West Plains Baptist Association will be held Friday, Jan. 23, beginning at 10 a.m. with the First Baptist Church of Sudan.

THE STROUP Way Is The Best Way!

WHY LAND SHOULD BE LEVELED

Irrigation has become almost an exact science. No longer can it be said that efficient, inexpensive watering depends alone on the type of irrigator used... land leveling has justified its existence. Experiments have proven the benefits of land leveling by showing greater returns with less water consumption. More even penetration with less run-off obviously means uniform, better production. Thus land leveling brings better paying crops and cuts down on the number of irrigations per season.

Conditions Soil for Irrigation. The Stroup Land Leveler—Trim Leveling Costs and Do Better Work With This Efficient, Free-Planing Land Leveler!

Beef Producers Are Advised On Market Factors

"What's Ahead in 1948 for the Cattleman?" is the title of a treatise recently made public by the Extension Service of A. & M. College and furnished this paper by County Agent J. K. Adams. It lists favorable and unfavorable factors likely to affect supply and demand for beef this coming twelvemonth, and is summarized briefly here as follows:

- Supply, favorable—
1. Range conditions good over most of U. S. The Southwest an exception.
 2. Supplies of by-products feeds expected near record of last year.
 3. Supplies of hay generally abundant.
 4. Marketings of cattle and calves are exceeding all records.
 5. Breeding cattle numbers are down.
 6. Cattle imports from Mexico nil
- Supply—unfavorable—
1. Grain and winter feed pastures short.
 2. Feed and pasturage costs up.
 3. Shorter calf crop looked for.
- Demand—favorable—
1. Consumer income highest on record.
 2. U. S. population increasing 2 million annually.
 3. Lower income groups receiving larger share of national income.
 4. Exports holding up.
 5. Demand of by-products high.
- Demand—unfavorable—
1. Savings declining
 2. Increasing competition for consumer dollar.

TROUTMANS BACK FROM THE PERSIMMON COUNTRY

Mr. and Mrs. O. D. Troutman have returned home after a two weeks tour of eastern Oklahoma, where they spent Christmas with two of his sisters. From there they went through the Ozarks to Missouri and visited Mr. Troutman's aunts and uncles.

It was Mrs. Troutman's first visit to Arkansas and Missouri. On the return trip the couple were snowbound at El Reno, Okla., and spent the night there. Then they spent one day and night with Mr. and Mrs. John Hayes at Erick, Oklahoma. Mrs. Hayes is a sister of Mrs. Troutman.

Internal Parasites Cut Yield of Wool Year-Round Control Program Advocated

Most of the emphasis on parasite control in sheep has been tied up with faster gains, better lamb carcasses and prevention of damage to the intestinal walls of the animal. Attention of shepherds now is being directed to the effect of internal

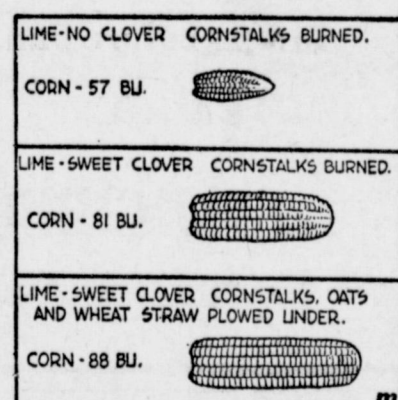

Producers must be insect free.

parasites on the yield of wool. Michigan State college is urging flock owners in that state to treat animals with phenothiazine to keep them in good condition and to get a heavier growth of wool. Phenothiazine is administered as a drench or in pellets, or mixed with salt and kept before the flock all the time. A dependable year-round program calls for individual treatment of all animals in fall and spring, and use of the phenothiazine-salt mixture throughout the pasture season. This is the program being followed by progressive shepherds to keep parasites in check.

Soil Needs Nitrogen

How lime, clover and crop residues increase the soil's nitrogen and organic matter supply and thus boost crop yields, is shown by the chart below. This drawing summarizes results of tests at the Dixon soil experiment field by University of Illinois agronomists. All three plots in the tests were limed and the crop rotation on each included corn, oats and wheat. One plot had no clover. The small grain straw was removed and the cornstalks were burned. This plot produced a four-year average of 57 bushels per acre. The second plot had the same

treatment, except that sweet clover was seeded in the wheat and plowed under as a green manure crop for corn. The increased nitrogen and organic matter from the clover boosted the corn yield 24 bushels. On the third plot, sweet clover was grown and in addition the cornstalks, oats straw and wheat straw were returned to the soil. The extra organic matter, nitrogen and other plant foods thus saved and returned in the crop residues gave the soil "what it takes" to yield 88 bushels of corn per acre.

High Milk Producers Required for Profit

The size of the milk veins is a true measure of the size of the milk veins. This diagram of the udder structure by Clemson Agricultural college shows the udder structure in detail. If the end of the vein is forked, two or three milk wells

often may be found on either side. A good mammary system is indicated by a large udder, which gets its capacity in length and width rather than excessive depth, extending well up behind and forward.

New Seed Disinfectant Suggested for Cotton

Ceresan M seed disinfectant is being recommended for use against numerous seed-borne and soil-borne crop diseases, including seed-borne anthracnose, angular leafspot, seed decay and seedling damping-off of cotton. The active ingredient of this new material is ethyl mercury p-toluene sulfonamide, which has been successfully tested by colleges over a period of years under the designation of No. 1452-F.

NOTICE TO BIDDERS

Notice is hereby given that the Commissioner's Court of Bailey County, Texas, will receive bids on the following described road machinery, to wit: One Motor Grader powered with diesel engine developing not less than 78 horsepower at 1400 RPM, enclosed cab, not less than 12' blade with 2' extension, 11 tooth scarifier, draw bar, complete machine to weigh not less than 23,000 pounds.

Contract to be made by the Commissioner's Court of Bailey County, Texas, for such machinery on the 31st day of January 1948. Bids on same may be delivered to the County Judge of Bailey County, Texas, on or before 10:00 A. M. January 31st, 1948.

The Commissioner's Court reserves the right to reject any and all bids. Dated at Muleshoe, Texas, this 12th day of January A. D. 1948. Cecil H. Tate County Judge, Bailey County, Texas.

SANTA FE FUND PROVIDES FOR WOOL RESEARCH

Abilene—Additional money for use in exploring the possibilities of wool and mohair in West Texas has been made available through \$5000 fund authorized by the Santa Fe railroad, it has been announced by President C. P. Dodson of the West Texas Chamber of Commerce. This augments a similar amount provided by the WTCC for research work now being done by the Texas Technological College.

This research will cover both the resources and liabilities of the cotton and wool industry in West Texas for its possible use in the development of the textile industry, according to WTCC Manager D. A. Bander.

Six From Bailey Attending McMurry

Abilene, Jan. 12—Six McMurry College students are from Bailey County, according to a recent report from college officials. Twenty-two states are represented in the students body at the Abilene Taylor county leads all others with 207 students. Other high counties and the number of students represented are: Jones, 33; Mitchell, 22; Fisher, 21; Lubbock, 17; Calahan, 16; Nolan, 16; Dallas, 12; Haskell, 12; Runnels, 11; Dawson, 10; and Potter, 10.

New Mexico tops the list with out of state students, sending 14 students to the McMurry campus. Other states sending more than one student include California, 7; Oklahoma, 4; Tennessee, 3; Indiana, New York, and Virginia, two each.

BLACKWATER VALLEY SOIL CONSERVATION DISTRICT NEWS

Irrigation wells have been located on land owned by Otto Lingnau and U. L. Childers.

Applications for soil conservation assistance have been received from J. H. McDorman, 85 acres; Otto Lingnau, 320 acres; B. H. Wagnon, 158 acres; Charles and Julian Le-nau, 37 acres; G. P. Meissner, ten-

ant on 180 acres owned by George and Maude Lange, of Superior, Wisconsin; J. A. Love, 354 acres; and C. C. Bamert, 159 acres.

Soil Conservation Service technicians assisted in running terrace lines on 885 acres of land owned by V. B. Mays, former Bailey County resident, now residing in Lubbock.

W. M. Harmon was assisted last week in running a diversion terrace.

Lanham Higginbotham, of Shallowater, a former Muleshoe resident, is reported to be seriously ill in a Dallas hospital. Mr. Higginbotham for some time was connected with the Muleshoe lumber yard of Higginbotham-Bartlett Company. His wife and children are in Dallas with him.

Mr. and Mrs. Olin Nix and daughter, Hazel, were guests over the week end in the home of Mr. and Mrs. Fred Johnson.
