# Celestial shows in store for Midland skywatchers

By RICHARD MASON Staff Writer

Midland night owls can expect a mute "celestial fireworks" display for the next few nights while early risers will be blessed with a lunar

August traditionally is a good month for stargazers with the nightly appearance of the Milky Way and the annual Perseid meteor showers.

This year, presence of a bright moon in the early morning hours (usually the best time to view meteor displays), may dampen part of the

sky show.

Meteors should fall at the rate of about 50 an hour, with the best display occurring as the earth passes through the cosmic fragments on its yearly trip around the sun.

Showers should continue for several nights before and after the middle of

The earth encounters additional bands of meteoroids during its yearly orbit in October and November.

that the objects are fragments from disintegrated comets. Rural residents can expect the best views, since their nighttime skies

will be unfogged by Tall City lights. Scientists estimate that as many as 200 million visible meteors occur in the earth's atmosphere every day. Along with invisible meteorites, the fragments may add another 910 metric tons of material daily to the earth's weight.

Today also marks the advent of the last quarter moon for the month of

The orb will rise about midway through the night and set about midday as it chases the sun during its monthly revolution around the earth. The next phase, the new moon, will occur Aug. 22 - with the first quarter

moon due Aug. 30. Apogee, or the point where the moon is farthest away from the earth during its monthly orbit, will occur Aug. 23 when the moon will be about 252,580 miles away from Midland. Perigee will occur Sept. 6, the morning of the lunar eclipse, when the moon will be a mere 221,806 miles above the Tall City.

Midland residents will be on the edge of the best viewing area for the lunar eclipse Sept. 6.

The moon should slip slowly into the shadow of the earth about 4:18 a.m. By 5:30 a.m., the moon is expected to enter the dark part of the shadow, becoming totally immersed about 20 minutes later.

Early risers east of Midland may see a partially-eclipsed "moonset" as

the sun rises Sept. 6.

The last visible funar eclipse in this hemisphere occurred May 25, 1975. The next will be visible July 6, 1982.

Other than that, Midlanders, or at least their country cousins, can expect nightly views of the Milky Way, which arcs in a basically north-south pattern across the sky.

The Romans called it the Via Lactea and subscribed to the ancient Sumerian belief that it was the road that the deceased traveled on their way to heaven

Vikings and American Indians generally held the same belief. Mongols and Babylonians, meanwhile, believed the Milky Way was the seam which bound together the two halves of the heavens.

# Bus keeps MCAA alive

# Community action group must dispose of van

By BILL MODISETT

Strange though it may seem, all that's currently breathing life into the Midland Community Action Agency is a bus — actually a large van.

It was practically a foregone conclusion prior to Monday night's MCAA board meeting that the directors would vote to disband the 11-year-old agency.

The agency is out of funds, lacks the support of Midland's city government and currently is without a staff. Talk of disbanding started early during the 7:30 p.m. meeting, but MCAA secretary Dollie Ball, whose job with the agency ended Friday, quickly noted that the agency

still had not disposed of a bus it owns. All the agency's office furniture had been placed in storage, remaining bills had been paid and unused funds were ready to return to the proper authorities, she told the

But the agency's 10-passenger bus - used to transport patients in the non-emergency medical transportation program - had not been sold. The bus had been advertised for sale. Only one bid was

received - that one for \$200. Directors talked over options for disposing of the bus

Do you know if they make battery-operated fans? In the

office in the building where I work, I use a fan to

stay cool, but rumor has it that we will have to stop using

electricity for fans this month or be fined. Can you

ANSWER: We are under the impression that this

crackdown on use of electricity stems from the Depart-

ment of Energy's regulations as related to all non-residential buildings. This states that such buildings may

be cooled to no lower than 78 degrees in the summer and

heated to no higher than 65 degrees in the winter,

which might account for your having to use a fan. We are

not aware of requirements for curtailment of the use of

electricity for fans. Maybe this is peculiar to your

master's degree in social work who applies.

Answer Line...

ing agency to give it to.

There's a catch, however. Under guidelines of the State Department of Highways and Public Transportation, the bus has to be used for the transportation of elderly and handicapped individuals.

The board authorized the executive committee of the agency to attempt to locate a qualifying recipient group within 30 days.

If such an agency can't be located within that time frame, the bus will be returned to the highway department, the board decided.

A second bus now is in the possession of the Ector County Senior Citizens organization, and the board voted to transfer title on that bus to the senior citizens group when the organization receives its state char-

# Indian dam deaths may total 25,000

NEW DELHI, India (AP) - Unofficial press estimates of the death toll in the Machu River dam disaster ranged from 10,000 to 25,000 today as more monsoon rains hampered relief efforts and the search for bodies.

The Hindustan Times said its estimate of 25,000 victims was based on the populations of Morvi and the nearby villages of Lilapur and Adepar, all hard hit when the swollen river flooded over one dam and broke through another one below it late Saturday in the northwestern state of Gujarat.

The United News of India said the toll could go as high as 10,000, and state officials said at least 1,000 drowned in and around Morvi.

The worst previous dam disaster on record occurred in 1962 at Belluno, Italy, were 2,300 died.

Flights bringing food and rescue workers were canceled Monday because of the weather. Buses were dispatched to Morvi with relief supplies and they were to evacuate survivors. But their progress was slowed by washed out roads

Morvi is near the center of Gujarat state, about 300 miles northwest of Bombay. A city of 60,000 people, it was once the capital of a maharajah's

### Texas area forecasts

# **DEATHS**

# George T. Abell

George Thomas Abell, 79, pioneer Midland independent oil operator and founder of the Permian Basin Petroleum Museum, Library and Hall of Fame, died Monday in a Midland hospital following a long illness.

Services will be at 10 a.m. Wednesday in the First Presbyterian Church with Dr. Ray Riddle officiating. Inter-ment will follow in Resthaven Memorial Park, directed by Newnie W. Ellis Funeral Home.

Abell was born Aug. 8, 1900, at Wakeeney, Kan.

He long had been active in the Independent Petroleum Association of America, Texas Independent Producers and Royalty Owners Association, Mid-Continent Oil & Gas Association and the Permian Basin Petroleum Association.

Abell was a charter member of the Permian Basin Petroleum Pioneers Association and had been a member of the Midland Downtown Rotary

Club since 1937. He was a member of the First Presbyterian Church of Midland.

Survivors include his wife, Gladys; a son, Duane H. Abell, San Antonio; a sister, Ester A. Denton of Midland, and two brothers, Walter Abell of Midland and Wallace Abell, Amaril-

Pallbearers will include Jno. P. Butler, Arthur Yeager, John Younger, Harvey Herd, Ben Black and Robert Leibrock, all of Midland.

Honorary pallbearers will include J.M. Armstrong, Martin Allday, Hamilton McRae, Holt Jowell, Harry ·Neilsen, Maurice Bullock, Allen Traubaugh, Ed Vogler, James Trott and Lester Van Pelt Jr., all of Midland; A.R. (Happy) Dyer of Odessa; Ben Bird and Atwood McDonald, both of Fort Worth; Clayton Williams Sr., Lee O. White, Dean Whitley, all of Fort Stockton, Claud Aikman of San Angelo and members of the Downtown Rotary Club.

The family has asked that memorials be directed to the Permian Basin Petroleum Museum, First Presbyterian Church, Midland Memorial Hospital or Trinity Towers.

and grew up there. He served in World War II. He was married to Nadine Dees on May 20, 1945, in Balmorhea.

Hicks was born Aug. 5, 1922, in Hico

hospital after a long illness.

Hicks was a plant supervisor for El Paso Natural Gas Co. and had worked for the company since 1946. He moved to Midland from Jal,

N.M., two years ago He was a member of Fannin Terrace Baptist Church in Midland and

Masonic Lodge No. 1276 in Goldsmith. He was a former member of the Fourth Street Baptist Church of Big Spring. Survivors include his wife; a son,

lst Lt. Larry Hicks of Fort Carson, Colo.; a daughter, Sharon Gaines of Odessa; his mother, Mrs. G.W. (Iola) Hicks of Hico, two sisters, Grace Thornton of Hico and Nell Snow of Truth or Consequences, N.M., and two grandchildren.

Pallbearers were to be Argie Hale of McLean, Thurman Cox of Kermit, Alton Fuller, Derwood Gaines and Tom Martin, all of Midland, and J.B. Roach of Jal, N.M.

# Alean McGill

BIG SPRING - Mrs. Alean McGill, 66, of Big Spring died Monday in Stanton after suffering an apparent heart attack.

Services are pending with River-Welch Funeral Home in Big Spring. She was a Baptist.

Survivors include two sons, Lloyd Harrison and Garland Harrison, both of Big Spring; a daughter, Mrs. David (Esther) Shaw of Sweetwater; her father, Parley A. Edgerton of Big Spring, and a sister, Annie Mae Ellis of Orange.

# **Earl Braggs**

SWEETWATER - Graveside services for Earl Braggs, 74, of Sweetwater, stepfather of Dorothy Taylor of Midland, were to be at 2 p.m. today in Sweetwater Cemetery directed by Cate-Spencer Funeral Home. Braggs died Sunday in a Sweet-

water nursing home. He was born March 10, 1905, in Taylor. He was married to Josie Busby on Oct. 24, 1964, in Sweetwater. He was employed by Davis Truck and Tractor Co. for 30 years.

Other survivors include his wife, a daughter, a stepson, a grandchild and three great-grandchildren.

Commissioners OK shelter fees

# D.P. Thornton

Services for Dewey Prince Thornton, 23, 3205 W. Golf Course Road, will be at 4 p.m. Wednesday in Bellview Baptist Church with the Rev. G.A. Magee officiating. Burial will be in Resthaven Memorial Park directed

by Newnie W. Ellis Funeral Home. Thornton died Monday from injuries received in an automobile accident in New Mexico.

He was born July 18, 1956, in Midland. He was graduated from Midland High School in 1974.

Thornton was a senior biology student at Texas Tech University. He was a member of Bellview Baptist Church.

Survivors include his parents, Mr. and Mrs. Dewey E. Thornton of Midland; a sister, Jackie Thornton of Tulia; a brother, Lane Thornton of Midland; his maternal grandmother, Mrs. J. Prince of Kerens, and his paternal grandmother, Eula Thornton of Malakoff.

# John D. Rowe

BIG SPRING - Services for John D. Rowe, 65, of Big Spring are pending with Nalley-Pickle Funeral Home in Big Spring.

He died Sunday in a Big Spring hospital.

Rowe was born May 30, 1914, in Delphus, Ohio. He was married to Grace Gimlin in August 1956 in Las Cruces, N.M. She died Feb. 14, 1976. Rowe retired from the U.S. Air Force Aug. 30, 1960, after 20 years of service. He had lived in Big Spring since 1972, having moved here from El Paso.

Survivors include a stepson, Gerald Gimlin of Houston; a stepdaughter, Louadah Waggoner of Lubbock, and four sisters, Mrs. Herbert Booher of Linton, Ind., Mrs. Cardell Gunn of Santa Maria and Mrs. W.D. Ertel and Kay Brosius, both of Weslaco.

# Robert Roseberry

Services for Robert Armsted Roseberry, 35, 1605 E. Golf Course Road, are pending with Jackson Funeral Home He died Monday in Midland.

Roseberry was born Aug. 13, 1944, in Jefferson. He had lived in Midland 26 years.

Survivors include his wife, Kay; a son, Lance Roseberry of Midland; three stepchildren, Carmel Scott, Sandra Scott and Laquarrie Scott, all of Midland; his mother, Margaret Roseberry of Midland; two brothers, James Edward Roseberry and Charles Edward Roseberry, both of Midland, and four sisters, Ruby Lee Lockhart and Barbara Ann Roseberry, both of Denver, Colo., and Patricia Ann Cook and Rosemary Johnson, both of Midland.

# Thurman Owens

SWEETWATER - Services for Thurman W: Owens, 68, of Sweetwater, brother of Mrs. Vaunell King

of Midland, were to be at 4 p.m. today in Cate-Spencer Funeral Home here. Burial was to be in Sweetwater Ceme-

Owens died Sunday in a Big Spring

hospital. He was born Sept. 1, 1910, in Fisher County. He was a retired farmer and a U.S. Army veteran of World

War II. Other survivors include a brother and a sister.

Dr. David B. Connery

# Dr. D.B. Connery

Dr. David B. Connery, 72, 3114 Humble Ave., retired Midland physician and former medical director for the Texas Department of Human Resources' nursing service, died Monday in a Midland hospital following an

Services will be at 2 p.m. Wednesday in St. Nicholas Episcopal Church with the Rev. Derk Manley, pastor, officiating.

Burial will be in Resthaven Memorial Park directed by Newnie W. Ellis Funeral Home. Dr. Connery was born Jan. 29, 1907,

in New Castle, Pa., and spent his early life and attended school there. He was graduated from Westminister College in Wilmington, Pa., in 1928 with a B.S degree and earned the Doctor of Medicine degree at the University of Pennsylvania in 1932. He served his internship at Presbyterian Hospital in Philadelphia, Pa., and his residency in 1935 at Children's Hospital in Boston, Mass.

He was in general practice in Newcastle from 1935 to 1943. He served as an officer in the U.S. Naval Reserve in World War II.

From 1944 to 1948, he was a fellow and first assistant in urology at Mayo Clinic in Rochester, Minn. He held a M.S. degree in urology.

Connery set up medical practice in

Midland in June 1952 and retired in He was medical director of the

Texas Department of Human Resources' nursing services from June 1973 to January 1977. Dr. Connery was a medical consul-

tant for the Texas Rehabilitation Commission in Midland and Odessa. He was a member of St. Nicholas Episcopal Church.

Survivors include his wife, Helen, and five sons, William M. Connery and Brad Connery, both of Midland, Robert T. Connery of Denver, Colo., David B. Connery of Rockport and Bruce L. Connery of Houston.

# Clouds remain; Rain not likely

Skies over Midland should be cloudy through Wednesday, but chances of rain falling from them are slim, the weatherman said.

Considerable cloudiness through Wednesday is the official forecast from the National Weather Service office at Midland Regional Airport. Probability of rain from those clouds, however, is only 20 percent for tonight and Wednesday. The forecasters offer little doubt

about continued warm afternoons, with the high Wednesday expected to be near 90. Low tonight should be near 70, with winds expected to be from the south to the southeast at 10-15 mph Monday's high was 94 degrees, no-

where close to the record for the date of 105 set in 1946. Overnight low was recorded at 70

degrees, a full 10 points below the record low for the date of 60 set in No rain was recorded at the airport

to change the monthly total of .41 inch or the annual accumulation of 10.44 inches Area towns were enjoying the same

mild morning Midlanders had, with most reporting cool temperatures and clear skies early today. Humid south winds blowing across

the Big Bend into the Panhandle brought cloudy skies to West Texas early today, but the rest of the state was mostly clear and mild.

# Leadership Midland nominations sought

Deadline for receiving nominations to the Leadership Midland program, sponsored by the Midland Chamber of Commerce and Midland College, is Aug. 24.

Leadership Midland is designed to give interested men and women with

leadership potential an opportunity to develop their knowledge and leadership abilities for community service in Midland. To develop these abilities, participants will attend a series of nine informative, one-day sessions which cover community needs and con-

These sessions consist of dialogues with various community decisionmakers, tours of community facilities and lectures. Topics for these sessions cover a gamut of city concerns such as re-

gional economy, public education, tools of leadership, the decision-making process and governmental and criminal justice systems. The program selects 20 to 40 persons. This small class size allows for

better interaction for the participants. Age of the nominees ranges between 21 to 40, although no upper age limit is required.

Information concerning Leadership Midland may be obtained by calling the Chamber of Commerce.

MCAA votes to dissolve itself after disposing of property

### (Continued from Page 1A)

Hibbits moved "that the board

dissolve as of this evening .. "At the time of the disposal of the bus and the funds," board member the Rev. Glenn Shoemake corrected. "Within 30 days," Dr. Hibbitts ack-

Board member Jack Leonard seconded the motion, which passed by a four-to-two vote with members Charlie Welch and Joy Bates abstaining.

Following the meeting, Welch remarked, "This is the saddest day I've seen in a long time. I just couldn't vote to dissolve this agency without another one (agency) here to serve

these poor people.' Another agency may be in operation soon, however, MCAA board member Freddie Nelms said after the meeting. He, Dr. Viola Coleman and former MCAA executive director Neva Cooper have been exploring the possibility of starting another agen-

Nelms said that due to the action of

the MCAA board Monday night "there is a better chance for forming another organization" to provide for the needs of Midland's elderly, handicapped and disadvantaged residents. However, since Dr. Coleman, a

Midland physician, was not present Monday night, further plans could not be announced, Nelms said. A new agency might be started within 30 to 60 days, Nelms added.

The MCAA has been plagued with problems and controversy during its final two years.

The City Council withdrew its support of MCAA about two years ago, demanding a complete change in the agency's bylaws and the resignations of all board members and staff members who had been with the agency prior to 1977 before it would reinstate

Then, in July, a state official vetoed the agency's funding grant, bringing almost certain death to the agency.

Next-to-last chapter of the agency came Monday when the board voted to disband in the near future.

nior citizens center, an item to be included on a bond issue that will be put to a vote Sept. 4.

Wright said the city wants the county to agree to participate financially in the programs, although County Judge Bill Ahders can't be authorized to enter into a contractual agreement with the city until after the September bond election. Commissioners delayed action on

health unit and senior citizens center, but approved fees that will be charged the county for using the city's animal shelter Commissioners also called a public hearing for Aug. 27 on the proposed

the request for participation in the

1980 county budget of \$9.5 million-According to Judge Ahders, if that

budget is approved without changes, it should not mean an increase in the county tax rate.

The current county tax rate is \$1.05, with 95 cents being charged for county taxes and 10 cents for state taxes. per \$100 in assessed valuation. The assessed valuation is based on 32 percent of the full value of property. Commissioners approved a contract with Henry T. Young for a window washing service for the courthouse. Young told commissioners his service will clean the courthouse's exterior glass and aluminum frames

Young will clean the windows early in September and the job should take about a week, he said.

Computer programmer Skip Ful-kerson of Odessa demonstrated a punch-card computer voting system used by Odessa. Fulkerson said he believes the sys-

tem Odessa uses is comparable to any system used anywhere in the state. If Midland wanted such a system, he said, it could get the type of voting machines used by Odessa for about \$250 each. Fulkerson estimated the county would need 150-200 of the ma-

Asked about problems possibly inherent to the system, Fulkerson said, "We've pretty well eliminated all the problems that come up in elections."

He said the system was fast and efficient and voting costs in Odessa had been reduced by using the system. But commissioners took no action on the item.

Taking a break from a hectic grand opening day is Lajuana Griswold, employee of The Freight Damage Furniture Store, 2900 W. Front Ave. Store officials said although the original store in Wichi-

ta Falls started out selling damaged goods, only 5 percent of the merchandise now sold is damaged. The five Texas stores specialize in factory-direct discount goods. (Staff Photo by Bruce Partain)

> The past fades and edifices of yesteryears — such as this "exhausted" building in Stanton — collapse. Stanton once carried the place names of Grelton and Marienfeld. (Staff Photos by Ed Todd)

# Big Lake takes name from playa

Names conjure up images. That's why settlers who affix names to their "stomping grounds" ponder over what to name their

Now, you single out towns to see what kind of images are evoked:

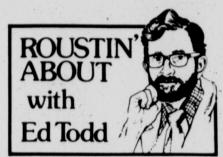

Big Lake: The town got its name from a playa-like depression which alternately was a lake or a dry hole depending on drought or rain. The settlement came into being in 1911 when Arthur Stilwell laid the Kansas City, Mexico and Orient Railroad lines and boomed after the Santa Rita No.1 oil well was

Big Spring: Big Spring, which had faded promises of being the metropolitan "capital" of this West Texas territory, was named after the "big spring" in Sulphur Draw, which was the watering place for buffalos, coyotes, lobos, antelopes, mustangs and other wildlife. Site of Big Spring is in a rocky gorge between two foothills of the Cap Rock escarpment. The Texas & Pacific Railway built its roundhouse and shops here, but they have gone the way of the steam locomotive: into scrap iron. Today, Big Spring largely bases its economy on petroleum production and refining, farming, ranching and try.

Crane: Actually, this oil town cropped up in the mid-1920s with the bringing in of wildcat oil wells, and was named after a Baptist preacher and Baylor University president, William Carey Crane. Place names in the county include the salt-rich Juan Cordona Lake and Horsehead Crossing on the Pecos

Garden City: The name didn't come from grandiose dreams of a plush, fertile, garden land, but rather, some say, from a Mr. Gardner, who ran a general store and who was the settlement's first postmaster. Before 1893, the ranching community was known as New California

Iraan: The settlement in ranching land drew its name from Ira and Ann Yates, ranchers who suddenly became a well-heeled oil couple after petroleum was discovered on the ranch in 1928.

McCamey: McCamey gushed into existence in 1925 with the bringing in of a gusher by driller George B. McCamey. In a few months, the town of tar-paper shacks, lean-tos, tents and frame buildings was a bustling, sometime outlaw-ish place of about 10,000

Midkiff: Contrary to some sources, Midkiff is not a ghost town, at least not in Upton County; the Midkiff in neighboring Midland County, however, is. The community took its name from the Midkiff Ranch. Present-day Midkiff takes in a spot called Hadacol's Corner, which cropped up around 1950, when drilling rigs moved into this ranching-cotton coun-

Midland: The city, tabbed the headquarters of the "vast" Permian Basin Petroleum Empire, is midway between Dallas-Fort Worth and El Paso was settled in the late 1800s by "thrifty, law-abiding" people from the Northwest. They developed farms and ranches. But the complexion of this "cow town" began to change in 1923, when the Santa Rita No. 1 at Texon was brought in and signaled the petroleum age in West Texas.

Odessa: The legend — and fact, perhaps — is that

Odessa got its name from a Russian who, after stepping off a T&P train, called this then-deso-late land on the prairie "Odessa," because of the resemblance of its prairie land to the steppes of Russia. Odessa, a former cow town, lays claim to the

Rankin: Rancher F.E. Rankin in the early 1900 lent his surname to this ranching settlement by donating the townsite, which is located in Upton County and along the Santa Fe Railway line.

Stanton: First, this Martin County settlement was a Texas & Pacific Railway Co. section house called Grelton. That was in 1881. But when the Carmelite Monks moved in, the place was named Marienfeld for "Field of Mary." By 1886, though, a drought and then a blizzard visited the countryside, and many of the German Catholic families moved out and were replaced by ranching and farming Protestant families. In 1890, the town was renamed after Edwin M. Stanton, Abraham Lincoln's secretary of war.

Warfield: Warfield was a flag stop on the T&P in rural Midland County and had a store and school. Today, it's mainly farm and ranch land just south of Midland Regional Airport.

Alpine: This village in the foothills of the Davis Mountains in Big Bend Country was dubbed Osborne in 1882 when the Southern Pacific Railway lines were laid there. But the name was changed to Murphyville in honor of Dan Murphy, owner of Kokernot Spring from which the railway got water for its steam locomotive boilers. The name was changed to Alpine in 1888. The town's economy is rooted in ranching, tourism, retirees, education (Sul Ross State University) and candelilla wax.

# Nine convicted in Midland area paroled by governor

**Austin Bureau** 

AUSTIN - Nine persons convicted of crimes in the Midland area have been paroled by Gov. Bill Clements on recommendations by the Texas Board of Pardons and Paroles.

# The welfare mentality

From his eye-opening experience as commissioner of U.S. immigration, Leonel Castillo has conclude astutely that foreigners succeed in this country because they are unfettered by the welfare mentality.

Mr. Castillo, one of the nation's most prominent Mexican-Americans, noted during a recent interview with a Copley News Service reporter that he is leaving the administration in which he has been an earnest and able administrator because the government does not have all the answers.

The answers, he has found, lie in hard work and self-reliance within this capitalistic society, His view, not widely shared among federal officials, is that the individual can do for himself much that the government cannot. How very correct he is in this assump-

Hard work and self-reliance form the very foundation on which this nation was built, and yet it now has reached the point where the welfare mentality is chipping away at the foundation. And how has it all come about? Why, through the federal government and its welfare planners, with their "we'll take care of you regardless" philosophy. Mr. Castillo, feeling as he does, is wise in parting company with the administration and he is to be commended for making public the reasons why. He has correctly diagnosed the quandry in which the society has placed itself: In trying to be compassionate to the poor, the welfare system strips all incentive as well as self-respect from some of those upon whom it showers its beneficense.

This is a trap which has been avoided by immigrants, including those who enter this country illegally. Coming from less benevolent societies and expecting no free lunch they have the motivation and capitalistic spirit which built this country.

Commissioner. Castillo's views are a compelling argument for tempering the government's efforts to bail out everyone. No one questions the imperatives of providing for those so young or old or unfortunte that they cannot work. One may readily believe, however, that beyond this point a paternal welfare system becomes a barrier to self-sufficiency.

Mr. Castillo points out, as proof that the system here still works, that ours is the only major country in the world which has to patrol its borders to keep people

But many will subscribe to his view that the American Dream could be an even better reality without some of its stifling burden of government paternalism.

# Almighty barrel'

Mighty Barrel," which we consider worth sharing, as follows:

"Since the energy shortage and the dependency of America on the OPEC nations, the barrel (42 gallons) has become a timely and more common unit of measurement. Listed below are the prices Americans are paying for various items as the costs relate to this popular unit of measurement -

"Yogurt - \$58.80; milk - \$84; butter - \$302.40; Aramis (after shave lotion - \$10,752; caviar -\$13,440; silver - \$421,427; house paint - \$294.

"Crude oil - \$22; coffee - \$483; Right Guard (deodorant) - \$1,-177; gasoline - \$35.28; copper -\$2.643; perfume - \$48,400; Jack Daniels Whiskey - \$1,848.

"Gold — \$24,320,867; Coors beer - \$168; Coca Cola - \$92.40; uranium - \$243,500; salt - \$53;

## BROADSIDES

George Bush retails politics effectively in New Hampshire

Novak

Bush has plenty of both. What's

more, he knows that retailing is his

only chance. Although he is becoming

the Averell Harriman of the Republi-

can party in accumulating high public

jobs (five so far, climaxed by CIA

director), Bush is unknown to the

public. He needs a strong showing in

Iowa's Jan. 21 caucuses and New

Hampshire's Feb. 26 primary to

To accomplish this, he has visited

New Hampshire a dozen times so far

in 1979 and will be here another

dozen times before the year ends.

While John B. Connally rushed into

the New Hampshire legislature for a

quick speech early this year, when

Bush went to Concord it was for a

whole day chatting with lawmakers.

If native Texan Connally is a little too

big for this state, transplanted Texan

Bush is the native New Englander

Besides his understated style, Bush

seems correct for the state ideologi-

cally. His remarks are conservative

(marginally more so than Connally's

and no less so than Reagan's on eco-

who fits right in.

break the anonymity barrier.

No longer in question is the clarity of intelligence demonstrating Moscow's intent to trigger a huge new test program the instant the new Strategic Arms Limitation Treaty (SALT II) is ratified. It seems likely to harden American public opinion against what has come to be called

WASHINGTON - Preparation of

three "distinctly new" test silos for

'modernized' Soviet long-range mis-

siles are now receiving final prepara-

tions at Soviet test ranges, a piece of

intelligence that could doom contin-

uation of SALT as a game that runs so

heavily in the Kremlin's favor.

By JACK ANDERSON

the SALT "process."

"This may well prove to be the end of the SALT process," says a Nixon-Ford administration official, who was one of the original authors of SALT II and supports the final version. "When our people read about what Moscow is doing under this new treaty, they may say to hell with SALT.

Students of SALT, mostly critics but also including important supporters, long have been concerned that the "process" of SALT, replacing substance, has become the political objective. The impending Soviet test program could stop this dangerous inversion by concentrating public attention on substance.

During the period of intense Soviet testing following SALT I, the U.S. still had stratetic superiority. In contrast, the U.S. today is on the verge of losing, if it has not already lost, strategic parity. That points to outrage as the public watches four free years of testing for Moscow, while the U.S. fails to test a single new intercontinental ballistic missile (ICBM).

Preparations of the new test silos to let Moscow exploit Article 4 of SALT II are virtually complete. High Pentagon officials are privately warning senators and other politicians not to be surprised when "modernized" (improved) versions of the main So-

nomics and national security) but

seem more moderate. Although he

has enlivened his speaking style, it

still lacks Connally's dynamism or

Bush's profligate expenditure of

time on minute numbers of people

was evident in his three-mile jog, em-bodying both components of his New

Hampshire strategy. Gregg asked

John Harrigan, a young weekly news-

paper editor and a jogger himself, to run along. Afterward, Harrigan was

invited for breakfast (prepared by

Mrs. Gregg) at Gregg's country home

All told, Bush spent nearly two

hours with Harrigan. A day later, the

Coos County newspaper showed a

photo of Bush jogging and this com-

ment in Harrigan's story: "For the

record, Mr. Bush seems to be in good

physical shape, which he says is pret-

ty important when one contemplates

traveling tens of thousands of

How successful Gregg has been in

weaning friends from Reagan is

something the flinty former governor

keeps very close. But despite Gregg's

efforts at temporary concealment,

successes popped up along Bush's

North Country campaign trail. Wil-

liam Ingram, a Lancaster lawyer ac-

tive in Reagan's 1976 campaign, met

Bush for the first time a few hours

after his morning jog but had already

Why did Ingram embrace Bush

sight unseen? The answer embodies

Bush's hopes here: "I was disappoint-

ed in Reagan last time, and think he's

getting a little old. I'm not sure I

agreed to be his local chairman.

Reagan's elegance.

viet ICBM force are tested immediately following final ratification of the

One defense official made this clear last week to a meeting attended by Senate staff experts: U.S. negotiators of SALT II "know that the Russians deliberately negotiated Article 4 so that they could go ahead and test and deploy all their new missiles without violating the treaty.'

This Soviet upgrading or modernization of the existing force is a loophole totally separate from the provision in the treaty (Article 2) that gives each side the right to build one new missile. President Carter has announced a decision (still resisted by arms control enthusiasts) for the U.S. to build the MX mobile missile as its new missile.

The U.S. has no plans for upgrading or modernizing its present land-based missile force. There is today no intention to fire a single test of any longrange missile until the MX-itself is fired (now scheduled for 1983).

That means silence from the Americans amid heavy Russian missile-rattling. The Soviet Union, without cheating, is in the same position to modernize its land-based long-range missiles as it was after ratification of SALT I on Sept. 14, 1972. Immediately thereafter, the Soviets began initial tests of the huge SS-18 and the large SS-19, whose size did violent injustice to the spirit of SALT I. Now, both the SS-18 and the SS-19 will be modernized under SALT II, along with three lesser missiles

Skeptics within the U.S. SALT delegation sounded repeated warnings during the negotiations that Article 4 must not leave the "modernizing" door wide open. One result was to limit the modernized missiles to a 5 percent variation from the older missiles (which the Soviets can easily vio-

Moscow's negotiators never have been willing to give the U.S. accurate measurements of its existing missiles

want that much power for Loeb (William Loeb, the Manchester Newspa-

Reagan). And, of course, I'll go a long

Gregg without Bush was not enough

to sign up Bob Morrell, an amuse-

ment park owner in Glen, N.H., who

backed Reagan in 1976. But after

showing Bush through his "Heritage

New Hampshire" (an automated his-

torical museum), Morrell told us he

thought Reagan was too old. He was

torn between Bush and Rep. Philip

Crane of Illinois but felt Crane's cam-

paign was too disorganized "and

During the 24 hours that we fol-

lowed Bush, it is doubtful he was seen

by more than 100 registered Repub-

lican voters. Yet, he probably pinned

down a half-dozen local county lead-

ers. That's retail politics, which could

set the foundation for an upset trans-

forming Republican politics in 1980.

Gregg makes things happen."

way with Hugh Gregg.'

**WASHINGTON MERRY-GO-ROUND** 

CHARLEY REESE

By CHARLEY REESE Sun Belt Syndicate

ignorant

ORLANDO, Fla. - One of the

heroes of American leftists is Che Guevara, an Argentine doctor and a

Marxist buddy of Fidel Castro. Gue-

Guevara was a goof-up and a failure

whose stupidity finally got him killed in Bolivia where he had gone to make a revolution and instead made a

comic opera. His death on Oct. 9, 1967,

was the climax of an American mili-

tary success story.

After the U.S. State Department

had put the skids to Fulgencio Batista

and the surprised Castro found him-

self in power, Guevara became presi-

dent of the National Bank and the

chief of the Cuban economy, which he

promptly wrecked by nationalizing

everything in sight and trying to turn

as island with no power and no raw materials into an industrial state.

# SALT, Soviet-style, is too 'salty'

from which to measure the permitted 5 percent variations. Indeed, the "modernizing door" was left open, as the intelligence reports of the new silos at

Soviet test sites prove.

That sets the stage for public outcry as soon as the new Soviet tests are launched. It could mark the end of innocence that up to now has made the SALT process a self-contained objective even more important than the SALT substance.

WASHINGTON WHIRL: Thanks to Congress' traditional haste to leave town at the end of a session, the taxpayers are unwittingly subsidizing Communist Party propaganda. It happened in the rush to clean up the legislative calendar last year. A single paragraph in the Overseas Voting Rights Amendment, passed without proper scrutiny, allows qualified political committees to use the special third-class bulk mail rate (just under three cents per letter) instead of the regular bulk rate of eight and one-half cents. The Postal Service estimates the loophole will cost more than \$18 million this year and \$24 million in 1980. And the first political committee to qualify was the Communist Party

### THE BIBLE CAN YOU QUOTE IT? By LAVINA ROSS FOWLER AND

ELIZABETH ROSS WIERSEMA

1. According to The Interpreter's Bible, Revelation gives assurance that the evil which appears in control now, will be overcome by the power of God. Revelations 1:3 carries a blessing to those who read it. What numer-

al is predominant in the first chapter: three, five or seven? Rev. 1:7 2. Why did Jesus travel around to various towns according to Mark

3. What did God say to Cain when he saw Cain was disappointed because his gift was not as acceptable as Abel's? Gen. 4:7

4. What mysterious things happened following the crucifiction? Matthew 27:51 5. Complete the great benediction

from Hebrews 13: 20: "Now the God of peace that brought again . Four correct...excellent. Three correct...good.

# IT HAPPENED HERE

30 yearss ago (Aug. 14, 1949):

It will be back to school Sept. 6 for an expected 4,000 Midland students, according to Supt. Frank Monroe.

The first bale of cotton of the 1949 season in Midland County was brought in and ginned Friday by Oswald Raggett, who farms in the Greenwood community.

The 1949 edition of the Midland High School Bulldogs will hit the field early Monday for their first pre-season workout. Coach Tugboat Jones said he expects about 35 boys to report for drills with the A squad and possibly 30 for the B squad.

Che Guevara, a goof-up:

Charley Reese

In 1964, Guevara wrote an article in which he indulged in the communist ritual of self-criticism. Ah, well, if he couldn't govern, perhaps he could lead another revolution.

Guevara made his first mistake by believing communist propagandist, Regis Debray, who had claimed that Bolivia was ripe for a socialist revolution. Actually, the Bolivians had had their revolution in 1952, had broken up the large land holdings, and were relatively content with their government - especially the peasants.

Guevara arrived in Bolivia in November 1966, as Dr. Adolfo Mena Gonzales, using a forged passport and Organization of American States credentials. He brought with him 17 Cubans, including four with the rank of major. He set up a base near the Nancahuasu River and began to recruit and train. One of his early recruits deserted and became a guide for the Bolivian army.

Guevara's plan was to set up another Vietnam in South America. He was counting on starting a ruckus that would result in an influx of massive American support and eventually American combat troops. The United States fooled him. They sent instead one team of Green Berets.

The Green Berets set up a 19-week training program for a Bolivian ranger battalion. In the meantime, Guevara goofed again. He left his base camp to escort Debray and another journalist and was spotted. Debray was arrested and Geuvara's guards at the base camp were forced to flee, abandoning most of his supplies.

In the skirmish, Bolivians recovered enough documents from dead guerrillas to round up the small urban network Guevara had managed to establish. Now Guevara's forces were split. They had failed to work out in advance a rendezvous point or a means of communication, so Guevara's band and the other one led by a man named Joaquin wandered about in search of each other.

In August, the Bolivian army, tipped by a farmer, set up an ambush, caught Joaquin's contingent in the middle of a river, and wiped it out. The American trained ranger bat-

talion took the field on Sept. 15 and by Oct. 8 trapped Guevara in a canyon. All but six of Guevara's men were killed or captured. Guevara himself was wounded, taken prisoner and evacuated to La Higuera.

On Oct. 9, the local commander received orders to execute Guevara and his Bolivian lieutenant. Guevara was shot with a surplus U.S. carbine. He died a goof-up and a failure at the logical end of a long string of errors. It's entirely fitting that the Ameri-

can left should adopt such a dunderhead as its hero. After all, they have adopted a discredited system of economics and slavery instead of freedom. Stupid people tend to admire stupid people

The facts of this column, but not the opinions, are from an article by Lt. Col. John D. Waghelstein in the August issue of "Military Review."

Stock market gains

NEW YORK (AP) - The stock market, largely ignoring adverse economic news, continued its rally in active trading Monday.

The Dow Jones average of 30 industrial stocks rose 8.20 to 875.25 on Monday, after maintaining a gain of around 6 points through most of the

"This isn't based on news - the news has been universally sour lately," said Larry Wachtel of Bache Halsey Stuart Shields.

Stock buying interest by large institutional investors began showing up early last week apparently on the be-lief that stocks had become attractive after a lengthy

slump, analysts said.

The Dow industrial last week posted a net gain of nearly 21 points, including a jump of nearly 9 points on Friday.

On Monday that buoyancy continued. The market showed little response to a generally gloomy report by the Joint Economic Committee of Congresy. That report, released over the weekend, said the recession could last well into the 1980s and have more severe impact that generally thought if U.S. productivity is not improved.

Gains were widespread across most sectors of the market as gainers outnumbered losers by a 5-2 margin at the close of the New York Stock Exchange. Big Board volume came to 41.98 million shares, up from 36.74 million turnover in the previous ses-

Sears Roebuck, up % to 20%, topped the NYSE most active list as of the 4 p.m. close. IBM, down 1/8 to 70 also was actively traded.

Superior Oil, the highest priced stock on the NYSE, fell 1½ to 434 after announcing approval of a 5-for-1 stock split and higher quarterly dividend.

The NYSE composite index of all listed common stock rose .54 to 61.18. Standard & Poor's 400-industrial index gained 1.16 to 118.91 and its 500-stock composite rose 1.02 to 107.42.

The Amex market value index closed up 1.13 at 203.54, exceeding its previous high set on Friday. The NASDAQ composite of over-the-counter trading rose 1.00 to

Livestock

AMARILLO, Texas (AP) — Confirmed: 14.800.

Trade active throughout the Panhandle area through mid-afternoon Monday. Slaughter steers fully 2.00 higher, heifers 1.50-2.00 higher. Most feedlots reported very broad buyer interest from most sources. Sales reported on 12.200 slaughter steers and 2.600 heifers. (Note: All live cattle prices based on net weights for the feedlot after 4 percent shrink.)

Slaughter steers: Good and mostly choice, 70-80 percent choice, 1.000-1.250 lb 10.00-53.00 Mixed good and choice 2-3 950-1,175 lb sp. 30-61.00, couple loads mixed good and choice 1,175-1,350 lb holsteins \$7.00-\$8.00.

Slaughter heifers: good and mostly choice 2-3 850-950 lb sp. 50-60.50, 91 head choice 2-3 875-1,000 lb including heiferettes 58.50-59.00, two loads 1,000 lb heiferettes 58.50-59.00, soon sloads 1,000 lb heiferettes 58.50-59.00, slaughter cows: Utility 2-3 46.00-50.50, cutter 44.00-49.00.

Hogs: 100, not enough on offer to test trade.

LUBBOCK, Texas (AP) — Today's base price cotton quotation for strict low mid-dling 1-116 inch at Lubbock is 59.10.

NEW YORK (AP) — Cotton futures No.2 were mixed at midday dealings today.
The average price for strict low middling 11-16 inch spot cotton advanced 86 points to 82.68 cents a pound Monday for the ten leading markets, according to the New York Cotton Exchange.
Late afternoon prices were \$1.00 a bale lower to \$1.25 higher than the previous close. Oct 85.10, Dec 85.60, and Mar 66.79.

# Government to watch over food industry

WASHINGTON (AP) — President Carter's chief inflation adviser says he hopes the food industry will "look again" to make sure it is giving consumers a fair shake on food prices now that it knows the government is looking over its shoulders.

Alfred Kahn made the statement after Carter summoned 16 food industry representatives, including top executives of major supermarket chains, to the White House Monday to demonstrate his concern over rising retail prices.

the White House Monday to demonstrate his concern over rising retail prices.

Carter told the group he was "particularly disturbed" that supermarket prices have been going up when farm prices have been coming down. "We are very concerned about this trend," he emphasized during the meeting, which lasted more than an

But a supermarket spokesman, Robert O. Aders of the Food Marketing Institute, said Carter was told he had been given faulty data on food prices. Aders also said the food representatives stressed that they were not gouging the consumer.

not gouging the consumer.

"I'm sure we convinced the president there has been no profiteering at all," Aders, who is president of the institute, told reporters after the meeting.

He didn't deny that retail prices might still be increasing while farm prices are declining, but said this reflects the normal food industry time lag and

that the trends even out over time.

Aders also said any real relief from rising food prices depends on controlling inflation, as the cost of food goes up along with everything else. "It all depends on the general inflation rate," he said.

Aders, the group's spokesman, said several supermarket executives told Carter they were not increasing their overall profit margin at consumers'

creasing their overall profit margin at consumers' expense. But he said he didn't know whether this was

true of the entire industry.

About 30 retail food firms have been named by the administration's Council on Wage and Price Stability as probably not complying with the government's voluntary price guidelines. However, none of these

firms was represented at the meeting.
Supermarket chains that were represented included the Kroger Co., Pathmark, Albertson's, Safeway, Jewel, A&P, Winn-Dixie and Super Valu. Representatives of the meat industry also attended.

Kahn told reporters Carter voiced skepticism over the assertion that the government's food-price fig-ures were wrong. The data, Carter said, showed that while farm prices declined at an annual rate of 17 percent in the last three months, retail prices increased at an 8 percent annual rate.

Aders was unable to detail where the government's figures were wrong.

Kahn said that if nothing else results from the

meeting with the food executives, he hopes "the fact

we're looking over their shoulders ... may encourage them to look again" at their pricing policies.

There were these other economic developments

Monday:

—The government reported retail sales increased by 0.4 percent in July, the first increase in four months. Carter said the slight gain reflected "the drain on consumer purchasing power caused by inflation — particularly increases in energy costs."

—A poll by the National Alliance of Business found that nearly half of 809 business executives questioned felt the nation's economy will worsen during the next two years, although 60 percent thought their

the next two years, although 60 percent thought their own business would improve.

-The Agriculture Department said demand for U.S. grain is outstripping record crops, and could reduce stockpiles by nearly 20 percent by next summer. This will keep prices high, it concluded.

Consumers won't get price breaks from bumper crops

WASHINGTON (AP) — American consumers probably will not benefit from recent bumper grain crops because of a high foreign demand for the major grains, the Agriculture Department says.

Demand for the crops has been so great that the stockpiles of four record crops — corn, soybeans, rice and peanuts — could be reduced by nearly 20 percent by next summer, the department's outlook and situation board said Monday.

The result will be high farm prices and no relief for consumers from a declining cost of raw food materials, the department said.

But farmers, faced with greater grain supplies and relatively high incomes, also are expected to produce more pork and poultry for 1980 and beef for 1982, Farm prices account for less than 40 percent of the

cost of food to consumers, government economists The latest, revised analysis comes after crop forecasters predicted Friday that farmers were

growing record corn, soybean, rice and peanut crops

and the second-largest wheat crop ever.

55mph too slow? **HOW ABOUT 200 MPH & 14.2** MILES PER GALLON WITH 5 PASSENGERS AND THIS IS NOT THE WHOLE STORY! General Aviation, moving one out of every three inter-city air travel passengers, uses less than 12 of 1% of all petroleum consumed in the U.S.A. On most trips, these airplanes will actually burn less fuel than a 1979 automobile making the same trip. Midland to Denver:
By Road - 679 miles 55 mph & 15 mpg
12.3 hrs. enroute & 45 gais, fuel burned
By Air - 516 miles 198 mph & 14.2 mpg
2.9 hrs. enroute & 39 gais, fuel burned With your own airplane you make the schedules. You reduce endless hours on the road and eliminate airline connections, terminal layovers, and backtracking travel to hard-to-reach places. Of the 12,350 airports in the United States, only about 550 are served by airlines. There is no reason to end a meeting before you are finished miss an appointment leave early to make a scheduled airline connection or search for the time it takes to drive to your next

# Jane Fonda is like Joan of Arc says story in Soviet youth paper

MOSCOW (AP) — Jane Fonda's name is "like a curse to Hollywood bosses" because of her politics, says the Soviet youth newspaper, but in Russian eyes she's a "symbol of American freedom fighters" like the radical black activist Angela Davis.

"The name of Jane Fonda is today on all the blacklists of America, journalist V. Krivchin wrote in Kom-somolskaya Pravda. "The Pentagon, CIA, FBI, all are vigilantly watching her ... She is like Joan of Arc, and they are threatening her with the same fate."

The long, detailed article gave the impression that Miss Fonda is unable to make movies and noted she "was

performance in "They Shoot Horses, Don't They?" which was shown on Soviet television in July.

Nothing was said about her current box office hit "The China Syndrome" or the Academy Awards she won for "Klute" and "Coming Home."

Krivchin wrote that unlike most Hollywood superstars, fame and fortune were not enough for Miss

"The natural beauty and artistic talent which Mother Nature bestowed on Jane Fonda would seem to mean a cloudless life for the Hollywood star,' he wrote. "... But she, who was to be the idol of the American Philistines,

district.

rant and Hidalgo coun-

ties, and in the 21 coun-

ties of the Corpus Christi

refused to conform to the Hollywood

mold.
Today the name of Jane Fonda is like a curse to Hollywood bosses."

The writer said she has found "new prominence, especially among com-mon people in America "— American Indians, blacks, Puerto Ricans and

Mexican-Americans — as a result of her outspoken political views. But it was her opposition to U.S. involvement in the Vietnam War that caused her the most trouble, the arti-

"Jane Fonda was forced to hide out in Paris from the persecution of authorities and from the attacks and harassment of those who wanted to portray her as an unbalanced movie

and even the sale of narcotics."

# Ector one of six counties in DPS speed limit project

- Special efforts will be made in six Texas counties - including Ector to improve compliance with the 55 mile-per-hour speed limits, the Department of Public Safety said Monday.

The counties included in "Project Accident Reduction" are Bexar, Williamson, Bell, Smith, Wise and Ector. The project continues through Dec. 31.

Officials said a special task force of highway patrol troopers will augment regularly assigned personnel during periods

of high accident frequency. The task force will come from troopers working on their days off or overtime beyond a regular shift.

All troopers will be in marked patrol units.

Payment for overtime costs will be provided from a \$509,000 grant obtained through the Texas Office of Traffic Safety.

The DPS said the counties were selected on the basis of statistics showing high accident rates, high traffic volumes and above average speeds.

Similar programs on a lesser scale are already in operation in Hopkins,

# Fate of beaches blowing in wind

CORPUS CHRISTI, Texas (AP) — Pessimistic scientists, discouraged by thick concentrations of oil from a runaway Mexican well, warned today that any shift in fickle winds could push miles-long swaths of oil onto Padre Island.

"I don't see any relief from it," said John Robinson of the National Oceanic and Atmospheric Administration. "There's nothing in the foreseeable future to

change the situation here. A pair of oil patches appeared today on beaches in front of resort hotels on South Padre Island. The 3- by 5-foot and 2- by 6-foot globs were 90 miles south of a 25-square-foot patch that washed ashore earlier.

But the scientists said they were more worried about the huge slicks lurking offshore, particularly a concentration of thick, floating oil 81/2 miles long and a half mile wide sitting several miles off the coast near Brownsville, at the southern tip of Texas. Robinson said that patch was expected to "narrowly miss the coast," according to computer predic-

But, he added: "A slight change of wind will put it on the coast. They (large oil slicks) still might come ashore somewhere else. We hope there is a reversal of currents somewhere, but we're not certain of that at this time by any means."

Government officials were more hopeful about protecting the environmentally sensitive Laguna Madre, a strip of fairly shallow water between Padre Island and the mainland. It serves as a home for a variety of wildlife and as a breeding ground for shrimp and other marine species.

Some tar balls have been reported in the Laguna Madre, but Robinson said the experts were not

### **Just Shake it** and Let it Fall Into Place. The Precision Haircut.

Because your head is unique, the way your hair grows is equally unique. Really quite different from every one else's.

Precision haircutting is a technique for cutting the hair in harmony with the way it grows. Your hair eventually grows out but it doesn't lose its shape with a precision haircut. Consequently your haircut will look as good after five days as it does after five minutes. And because the hair falls naturally into place you won't have to keep fussing with it. Usually a shake of the head does it.

At Command Performance we shampoo, precision-cut and blow dry your hair for fourteen dollars, whether you're a gal or a guy. And no appointments are ever necessary.

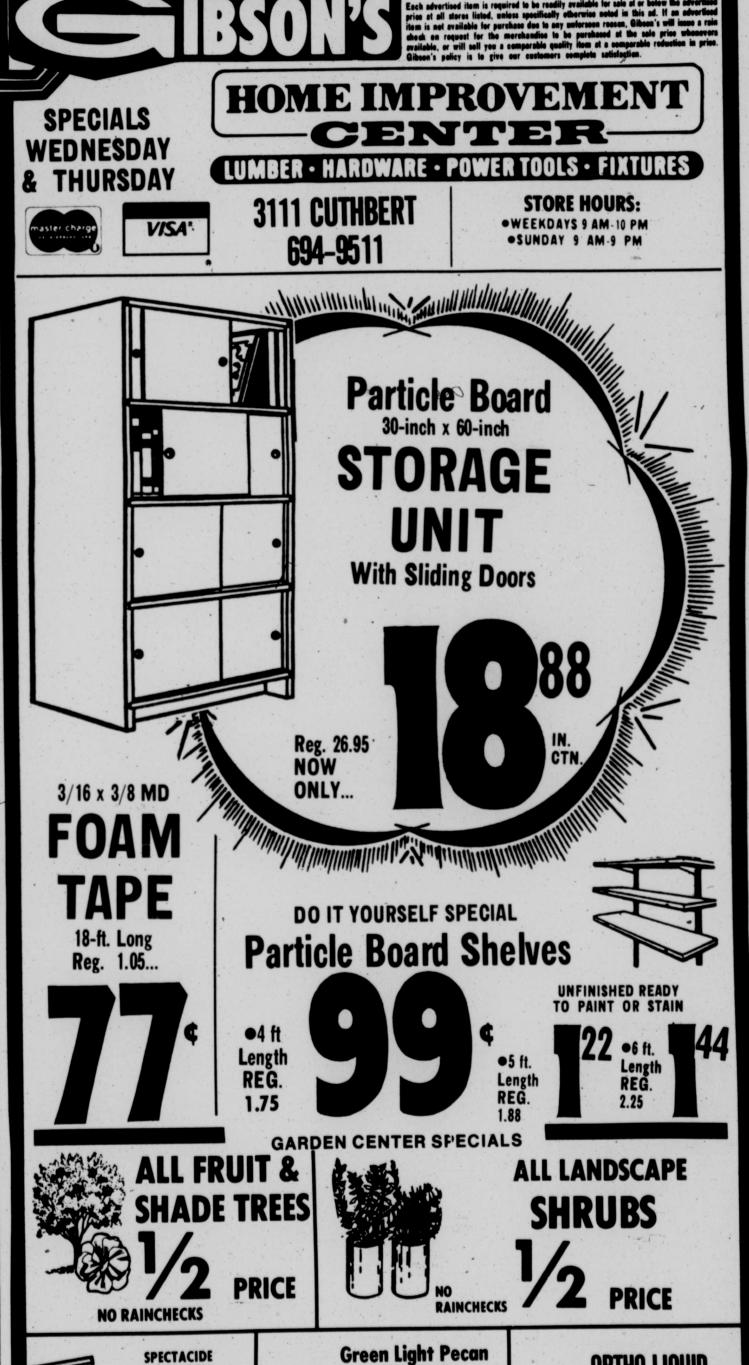

We also offer permanent waves, coloring, frosting and conditioning. But we really shine with precision. And so will you.

Eregra Command Performance

# More than 300 guerrillas stage sitdown under guard

- More than 300 guerril-las of the leftist Mojahedeen began a sitdown under armed protection in front of their headquarters today to prevent attacks by groups of Moslem zealots march-

Other groups of Moslem extremists armed with knives and clubs were reported circulating through the city ha-rassing pedestrians. One man said he saw a group attack a bearded young man carrying books who they said "looked like a communist."

The split in the Iranian revolutionary forces between leftist opponents of Ayatollah Ruhollah Khomeini's conservative sectarianism and militant supporters of the Shiite Moslem patriarch

# Rate hike approved by RRC

Austin Bureau

AUSTIN-The Texas Railroad Commission Monday approved slight rate increases for gas consmers in the unincorporated areas around the West Texas towns of Marfa, Alpine and Bal-

Gas Utility Division Hearings Examiner Meridith Kawaguchi reported approximately 561 residential and commercial customers of Southwest Texas Municipal Gas Corp. will be affected by the new rates in Brewster, Jeff Davis, Presidio and Reeves counties.

The new rates are not considered "major" increases and total \$7,612 in additional revenues for the company. In each case, examiners testified that the nearest incorporated cities had approved identical rates inside the city limits as those proposed for the

Under the new rates, Kawaguchi said, a consumer's average six thousand cubic feet monthly bill will increase from \$20.29 to \$21.30 in Brewster, Jeff Davis and Presidio counties; and increase from \$17.38 to \$18.72 in Reeves

County The new rates approved for Southern Union will affect 76 residential and commercial customers in the environs around Dell City, effective Aug. 20.

appeared to be widening. Club-wielding extremists on Monday ransacked the headquarters of the People's Fedayeen, another leftist guerrilla group, and beat up four of its members during a day of factional fighting in which offices of several other leftist groups

were attacked. The nine-story Mojahedeen headquarters in central Tehran was heavily guarded by armed men behind sandbags on the roof and at the entrance. Two truckloads of armed revolutionary guardsmen were stationed nearby as a precaution.

The religious extremists, in several groups of about 50 each, made repeated marches past the building shouting "Communism is destroyed! Islam is victorious!"

The Mojahedeens said they would continue their sitdown until the government could guarantee their headquarters would not be attacked.

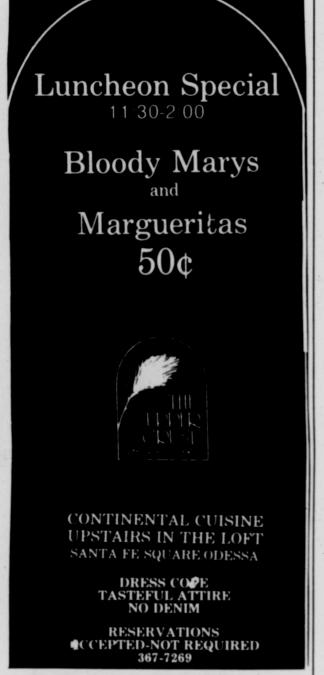

we save this building,"

said one young man. "If they want to kill us, let

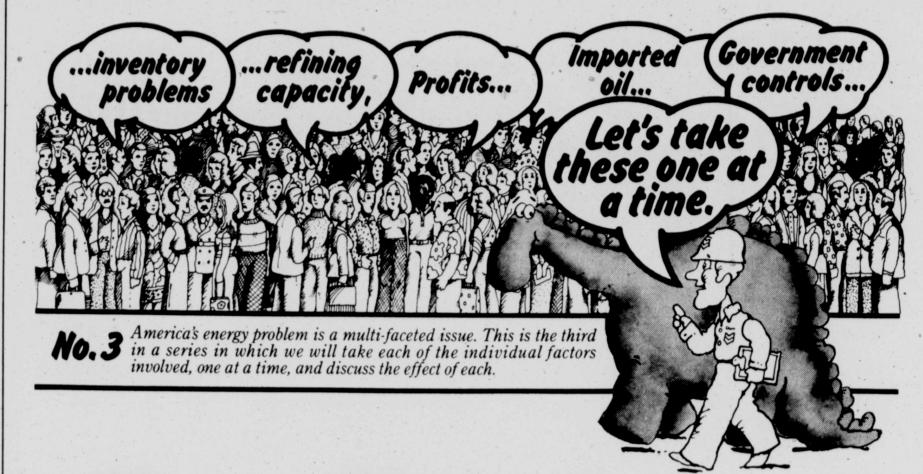

Although the Mojahedeen is a Moslem group, it is Marxist-oriented and seeks to establish a workers' state and a classless society in Iran. Its goals are anathema to Khomeini and the conservative clerics who have dominated the Iranian revolution so far.

Monday's attacks by zealots were in retaliation for a weekend march by an estimated 100,000 leftists to protest Khomeini's crackdown on the press. Late Monday, an estimated 100,000 supporters of the ayatollah massed at Tehran University to demon-strated solidarity with his policies.

The leftists are angry about the closing of the Tehran newspaper Ayandegan last week and about the new press code barring criticism of Khomeini and his associates. The government also published a tough We will sit here until new code for foreign journalists on Monday.

# The refinery's challenge: make more from less.

Chevron's refineries operate 24 hours a day, all year round, except for periodic maintenance and repair of individual units. So, what do refineries have to do with the oil shortage?

The problem starts with crude oil. There must be enough available for a refinery to operate continuously at capacity. Unfortunately, the Iranian revolution created a shortage of crude.

Secondly, crude oil comes in a variety of types, some of which are better than others for producing gasoline and other light fuels. For example, heavy Alaskan crude contains on the average, one-third less gasoline than the lighter Middle Eastern crudes. And while most Chevron refineries are able to get more out of these heavier crudes than many other refineries, the reduced availability of light crude is still a problem.

# **Excessive regulations** make matters worse.

Excessive governmental regulations also reduce the amount of light fuel we can get out of a barrel of crude oil. For instance, Federal regulations have severely limited the use of lead, an additive which can be used to raise the octane of gasoline to needed levels...this means less refined product from the same amount of crude.

# Making a commitment to meet the challenge.

Over the next five years, Chevron will be spending more than \$1 billion at our refineries for facilities to get more out of heavier crudes and achieve even greater energy savings and pollution control capabilities. This will help meet increased demands for gasoline, diesel, jet and heating fuels.

Even with all-out refinery efforts to make more fuel, everything must be done to develop Thank you for listening. domestic energy sources. At the same time, all of us must do an even better job of conserving energy.

Chevron U.S.A. Inc.
