off" at best.

by a meager harvest.

We are not doomsdayist, but realistically, we are concerned." said Ralph Rayburn, executive director of the Texas Shrimp Association. "The shrimp industry has never been exposed to this type of threat."

Julius Collins, president of the association, said that shrimp harvests this year are running at about half the pace of last year's catch. He blamed a combination of environmental factors, including a cold winter and heavy spring and summer rains.
A Coast Guard reconnaissa

flight detected "a tongue of sheen" 15 miles offshore and stretching 40 miles along Padre Island from Brownsville to 20 miles north of the Port Mansfield cut, Posey said.

He said the tongue ranged in width

huge inlet between the Padre Island and the Texas mainland serving as a breeding ground for oysters, blue crabs and other shellfish and as a food

source for dozens of marine species. Posey said diversalso would be sent into Laguna Madre near Brownsville to make sure no submerged oil had

The Mexican well blew out June 3 in the Bay of Campeche off the Yucatan Peninsula, and began spewing 33,000 barrels of oil a day into the Gulf. Since then, the daily flow has diminished to 20,000 barrels.

PEMEX, Mexico's nationally owned oil company, has offered n explanation pinpointing the cause of the blowout.

The well is in 170 feet of water, and divers face several dangers, includ-ing poisonous gas produced by the

Oil Slick Soup new specialty

at South Padre Island eatery SOUTH PADRE ISLAND (AP) -

National news events frequently prompt menu ideas for the owner of the Dockside Deli.

Bonnie Walker's latest creation is Oil Slick Soup.

"It's sort of a joke," she said, though acknowledging that the new special might not be so funny if the Mexican oil spill now affecting South Padre beaches gets worse.

Oil Slick Soup has a chicken base with broccoli providing a seaweed effect and a dash of soy sauce, added at serving time, floating on top, to

simulate oil. Earlier creations keyed to news events have included Skylab Soup,

with large chunks of squash and broccoli stalks, and Eclipse Soup, a dark brown meatball item.

"You have to do something to add some interest," Mrs. Walker said.

He develops cheap thrills for amusement park use

tried to get a light or some type of traffic control at that corner for a couple of years, but no one seems to care about the problem?—Mr. F.C. ANSWER: Doug Vanover, traffic engineering co-ordinator for the City of Midland, says that state and feder-

What does it take to get a street light at the intersection

of Golf Course Road and Lamesa Road? We have

not met in the last study of the situation made in Vanover says regulations specify that in order for a light to be installed, there should be 600 vehicles an hour on the major street and 150 vehicles an hour on the minor

al guidelines for installing a light at this intersection were

street, occurring during eight separate hourly checks. The study a year ago revealed that this situation only happened during three-hour periods, instead of eight. Vanover also said another study will be made in the next month or so. If regulation requirements are met, a recommendation for installing a light will be made to the

There are two small children living next door who ring my doorbell and then run off. This happens at least twice every day. I have spoken to the children's parents—but they evidently have had no luck stopping them. Is there anything I can do?—Mr. G.N.

ANSWER: Yes, Mr. G.N., contact the Midland Police Department, 683-4281, and tell your problem to the dispatcher. The department will send an officer to your over the problem with the children's parents. Your name will not be mentioned if you request it. If this fails to remedy the problem, a sergeant with the

juvenile division will speak to the parents. I would like to know if there is a federal insurance

company which has hospitalization.-P.C. of Rankin ANSWER: Joyce Tays, supervisory resident representative in Midland for the Social Security Administration Office, says there are no federally-managed insurance

companies providing hospitalization The Federal Government administers the Medicare program through the Social Security Administration for persons 65 years of age and older and for persons who

have received disability benefits two years or more. Ms. Tays says her office strongly suggests that persons wanting supplemental policies which will "take up" where Medicare "leaves off" investigate such policies with utmost care. She says there are some national health insurance companies which do provide acceptable poli-

Along this line, a Midland insurance agent advises that persons seeking additional coverage check to be certain the agent selling the policy is licensed by the State of Texas. Agents not licensed in Texas are not responsible for paying claims in the state. She also says be sure and understand the benefits.

Additional information can be obtained from Ms. Tays, who says to telephone her at 683-3396.

BINGHAMTON, N.Y. (AP) — There's a roller coaster in the basement at Doron Precision Systems here. And a submarine; an aircraft carrier and a cropdusting plane, too. They are different versions of the Doron "adventure capsule" - an

682-5311

that lets "riders" soar through space or plumb the depths without ever Doron, the leading manufacturer of

electronic sight-and-sound chamber

driver training simulators, is pioneering development of the thrill simulators for use in amusement parks. The 12-seat device uses widescreen movies, sound effects and sophisticated electronics to play games with

"All we're doing is fooling with the inner ear," said Richard Ward, vice president for operations of the compa-

Inside the darkened capsule known as SR-2, "riders" have no sense of horizon. So as the SR-2 begins to pitch from side to side or back to front, the mind takes off.

The first of the \$85,000 devices has been installed on the Queen Mary, docked at Long Beach harbor in California. There, beginning in September, tourists will take simulated submarine rides.

Riders, Doron officials say, will get to go places and do things never before possible in amusement parks. Plans call for trips in cropdusters, aircraft carrier landings, hangliding and, perhaps, a tour through outer space.

The chief advantage for operators, Doron says, is that the SR-2 is a safe, cheap thrill. A new roller coaster can cost \$1 million or more; another major expense for the parks is liability insurance for the occasional death or injury on a ride - an unlikely event in the simulated world of the SR-2.

The ability to switch from a roller coaster one week to a submarine ride the next is one of the device's big selling points. "Amusement parks figure that if they're going to bring back 50 percent of their audience each year, they're going to have to have a new extravaganza each year," Ward

North Texas: Clear to partly cloudy and conti

'Roots,' 'Centennial' favored in Emmy award nominations

LOS ANGELES (AP) - The miniseries "Roots: The Next Generations" and "Centennial" were the favorites today as nominations for the 31st Emmy awards were being announced.

The two television miniseries were eligible to receive nominations in a wide range of categories, such as best series, acting, directing and writing, as well as in the craft areas.

"Roots II" is a continuation of the story of author Alex Haley's family from Africa to slavery to modern times. The original "Roots" broke all television viewing records and dominated the Emmy awards two years

ago.
"Centennial," adapted from the book by James A. Michener, ran for

Two die, eight injured in rooming house fire

CHELSEA, Mass. (AP) - Two persons died and at least eight others required hospital treatment when a five-alarm fire broke out in a rooming house in this suburb north of Boston.

"I saw at least one person jump and several people hanging from windows," state police trooper James Battkock said at the scene of the smoky blaze in the four-story Broad-

The injured were taken to the Chelsea Health Center, part of Massachu-setts General Hospital.

An unexpected light rain shower ate Wednesday afternoon brought a trace of moisture to Midland and the weatherman said the same thing could happen again tonight.

Wednesday's rainfall was light, said the National Weather Service office at Midland Regional Airport, and couldn't even be measured. It was being listed as a trace.

But a slight chance for more of the wet stuff - in the form of showers and thunderstorms — exists for tonight and Friday. The probability of rain is It followed the development of a fic-tional Colorado town from the time of the first trappers to the present. The Emmys, awarded by the Acad-

26 hours on NBC last fall and winter.

emy of Television Arts and Sciences for prime-time programs aired between July 1, 1978, and June 30, 1979, will be presented in a telecast on ABC on Sunday, Sept. 9. Other dramatic shows expected to

receive nominations in program and individual categories are ABC's "Friendly Fire"; CBS' "Blind Ambition," "Strangers: The Story of a Mother and Daughter," "Les Miserables" and "The Incredible Journey of Dr. Meg Laurel," and NBC's "Backstairs at the White House," "From Here to Eternity," "A Woman Called Moses" and "Summer of My German Soldier."

Newcomer Robin Williams of ABC's "Mork and Mindy," who became the biggest new star of the year, is certain to be nominated in the comedy categories. Other new comedies expected to be nominated are ABC's "Taxi" and CBS' "WKRP in

Dramatic series that should receive nominations are "Lou Grant," "White Shadow" and the canceled "Paper Chase," all on CBS.

The academy also was expected to announce at a news conference a new awards structure to trim the number of categories by about 28 percent from previous years.

Slight chance for more rain tonight

being listed as 20 percent. It should be partly cloudy through Friday, with tonight's low dropping into the upper 60s and Friday's high reaching the middle 90s Winds tonight should blow out of the

south at five to 10 mph.

Wednesday's high temperature was 94 degrees, 10 degrees below the record 104-degree reading for an Aug. 8 set in 1952.

This morning's low reading of 67 degrees was cool, but failed to match the record low 62-degree reading set

LOS ANGELES (AP) - In the wealthy cocoon of Benedict Canyon, where celebrities seek safety in shake-roof castles, the date of Aug. 9 still sends chills through the neighborhood.

By LINDA DEUTSCH

Close the windows. Lock the gates. Sharon Tate died 10 years ago this day. The memory of mass murder is as close as the hilly curve marked Cielo Drive where black-clad killers once prowled.

"Many people I know in Los Angeles believe that the '60s ended abruptly on Aug. 9, 1969, ended at the exact moment when word of the murders on Cielo Drive traveled like brushfire through the community,' Joan Didion writes in her new memoir

of the era, "The White Album."
Those who remember are haunted by that hot summer morning when the city froze in fear of a nameless

evil loose in the hills. Months later, the world would know the name - Manson.

They found the five bodies at sunrise, scattered like rag dolls around

the hilltop estate. There was beautiful actress Sharon Tate, 26, wife of director Roman Po-

LA haunted by Manson murders

lanski, eight months pregnant, dead with their unborn baby. There were her three glamorous friends - coffee heiress Abigail Folger, Polish film director Voityck

Frykowski and playboy Jay Sebring
— and young caretaker Steven Parent. They were stabbed and shot, found in bloody pools on the lush lawn, cut down by killers who left hideous emblems - hoods and ropes and scrawlings in blood.

Then, one night later across town, there was more horror — two more bizarre murders. Leno and Rosemary LaBianca, a wealthy couple, lay but-chered in their modest home for no apparent reason.

In that summer of senseless killings, fear swept the city. There were heavy sales of burglar alarms, bolt locks and guard dogs.

In winter, the case broke. Charles Manson, a strange, long-haired exconvict was arrested in the desert near here with a drug-crazed tribe of young followers who called him Christ and God and the devil.

The bizarre saga of the roving Manson "family" unraveled at a dramatic murder trial. The youthful murderers

- three of them women - killed with no apparent motive other than mindless devotion to a demoniac cult lead-

Even now, the Manson murders form a puzzle with missing pieces.

"I don't think there has been a real effort to learn and understand the real mechanism of the control Manson had over these people," says Paul Fitzgerald, defense attorney for Patricia Krenwinkel in the Manson trial. "There are still so many unexplained

If there is an answer, he says, it may be locked in the prisons where Manson and four of his followers serve life sentences for murder. Here is what is known about them today:

Charles Manson, now 44, is described as "strange" by his prison counselor at the California Medical Facility at Vacaville.

"His conversations are very dis-jointed," says David Caprio. "I've never had a conversation with Manson that didn't turn into gobbledey-gook. He's a strange individual in that regard.'

Manson lives in a cell in a high-security area, a moody, withdrawn loner who sometimes preaches to others the jumbled philosophy with which he led his ragged clan. He still claims he is innocent

"He's the same old Manson. Nothing has changed," says Caprio. "His ego is strong. He will not give in to anyone. Do it Charlie's way or not at

He strums his new guitar — he broke two other guitars and a TV set in fits of rage — and is very interested in current events. "He's right on top of Jimmy Carter's energy programs," says Caprio.

The three women who killed for Manson — Susan Atkins, 31, Patricia Krenwinkel, 33, and Leslie Van Houten, 29 - once isolated from other inmates at the California Institution for Women at Frontera, are now in the general prison population.

"You might say they are model inmates," says assistant superinten-dent Lee Cribb. "They are very de-pendable and they" e good influences on other inmates.'

Miss Atkins, a "born-again Christian," works as a clerk typist in the prison's psychiatric unit. Miss Krenwinkel is a prison janitor and takes college courses.

U.S. will give Egypt defense aid

WASHINGTON (AP) - The United States has agreed to provide Egypt with engineering and technical aid to get Egypt's defense industry back into production of basic weapons, administration sources say.

The sources, asking to remain anomymous, described the plan as a "modest program which will not involve much in the way of American

personnel or money.' Basically, the sources said, the Egyptians have a "respectable defense industry that is capable of manufacturing routine weapons" such as

field artillery, tanks and trucks.
"They need production and engineering support which we are skilled

in," one source said. Administration officials stressed that there is no intention to build up an Egyptian arms industry which would enhance any military threat to Israel, but one that "would make the Egyptians able to stand up to Libya."

Egypt's armed forces had been largely equipped over more than 20 years by the Russians, so their home defense industry played a relatively small part in building Egyptian arms

Since Moscow and Cairo split politically over the issue of how to pursue a Mideast peace, the Russians have cut off all new equipment and even spare parts to maintain the thousands of tanks, guns, personnel carriers and weapons and equipment they had provided to the Egyptians.

Administration officials said that as

differences developed between Cairo and other Arab countries over Egypt's diplomatic dealings with Israel, the wealthier Arab oil producing countries pulled their financing from Egypt's defense industry and, as one U.S. official put it, "left the Egyptians high and dry" with their plants unable to function.

The decision to help Egypt get its arms industry moving again is part of the American aid package promised President Anwar Sadat, along with aid pledges to Israel, at the time the United States was nudging the two countries toward the pece treaty they finally signed.

This element has been largely overlooked, although mentioned at the time, because most attention was focused on the U.S. promise of \$4.8 billion in military and economic aid to the two countries.

Under that arrangement, Egypt will buy about \$1.5 billion in U.S. arms on easy credit terms. Recently, the Pentagon notified Congress it plans to sell Egypt 35 F-4 Phantom jet fighter planes and some 800 armored person-

Dr. William Perry, the Pentagon's research chief, visited Egypt in June and officials said many of the details of the plan to restore Egypt's arms industry were made public at that time in Cairo, and that there was no adverse reaction from the Israelis.

Perry is known to have come away from Egypt impressed with the quality of Egyptian specialists and he was said to feel it would not take anything like a massive U.S effort to get the Egyptian factories turning out arms

Police searching for 17-year-old in kidnapping

ODESSA, Texas (AP) — An Odessa man who eluded his abuductor at a roadside park is back at home, but West Texas authorities were still looking Wednesday night for a 17-year-old man that has been charged with the kidnapping.

Michael Todd Franks, 21, said a

gunman forced him from his mobile home Tuesday night and ordered him to drive east on Interstate 20. He told police he escaped at about 6:30 Wednesday morning when his abductor fell asleep in a roadside park near the Eastland-Palo Pinto County

Ector County Justice of the Peace Jimmy Harris said Jim Bailey Jr. of Odessa has been charged with aggravated kidnapping in connection with

Weather provides first break for weary forest firefighters

BOISE, Idaho (AP) - Battle-weary firefighters in six Western states have gotten their first break from searing weather that has turned forests into giant stands of kindling, but a new fire in Idaho has burned two homes and forced 50 families to flee.

Temperatures dropped and humidity rose Wednesday, allowing 6,000 firefighters — half of the nation's federal firefighting force - to gain some ground on more than a dozen fires raging out of control in the

'We had a real good day today," John Gumert, information officer at the Boise Interagency Fire Center, said Wednesday. "We didn't lose any ground on any major fire."

The National Weather Service, however, is predicting more fair skies over the fire areas today. And Bob

Tidal wave hits Indonesian coast

JAKARTA, Indonesia (AP) - For the second time in three weeks a tidal wave has hit the southern coast of Indonesia's Lomblen Island, police said today.

There were no immediate reports of casualties from the latest tidal wave, which police said was caused by a

Bjornsen, Forest Service director for the fire center, said the outlook "is very grim" for the next 10 days.

A new fire that broke out just after noon Wednesday in northern Idaho burned at least two homes near Bonners Ferry, a town of 1,900, and forced the evacuation of 50 families. By nightfall, flames were within 2

miles of city limits, but a state official said the fire wasn't expected to reach the city because the heavy timber doesn't stretch that far.

There were no immediate reports of injury from the fire, which was estimated to cover 600 acres. Fire bosses at the federal command

and supply center here reported 13 major blazes covering about 136,000 acres in Idaho, Montana, California, Wyoming, Oregon and Nevada. Hardest hit is Idaho, where nine

fires covered more than 125,000 acres in what Gov. John Evans called "probably the worst fire conditions in (the state's) history." Evans, who flew over the fires Wednesday, said so much smoke fills mountain areas it is hard to spot new blazes.

The fire center said four fires, covering 3,340 acres, were controlled Wednesday and six others, covering 6,000 acres, were contained, meaning that although the fires continue to burn, they are ringed by fire lines.

With temperatures in the low 80s,

and 40 to 45 percent humidity, about

CARLSBAD, N.M. - Interpretive activities and special guided nature walks at the Rattlesnake Springs area of Carlsbad Caverns National Park are planned for August and September, according to Park Superintendent Don Dayton.

Planned activities at the Guadalupe Mountains National Park include scheduling additional guided hikes to the park's Bowl area. The number of evening campground talks at Pine Springs will be changed after Au-

people are limited to the Bowl hikes. Evening campground talks at Pine Springs are planned each night through Saturday. Starting Sunday, the talks will be scheduled on weekends only. Evening programs start at

An hour long guided nature walk starting at the Rattlesnake Springs picnic area is planned for 5 p.m. Saturday. There is no charge for the

Bat flight breakfast set at Caverns

CARLSBAD, N.M. - The annual bat flight breakfast is scheduled for Aug. 16 in Carlsbad Caverns National Park, according to Park Superintendent Don Dayton

If the weather is good, the breakfast will be held on the terrace just west of the Cavern entrance between the hours of 5 and 7 a.m.

In case of rain, it will be held in the park's maintainance building compound just north of the Cavern en-

Cost per person is \$2.50. The menu includes scrambled eggs, ham, hash brown potatoes, rolls and jelly, coffee, milk and orange juice.

Each evening the bat colony's exit flights are viewed by hundreds of vistors during the summer. But very few attend the return flights because of the early hour.

Return flights differ from the exits in that the bats dive into the Cavern from great heights with their wings folded, creating an unusual sound, according to Dayton.

3,000 firefighters working in Idaho concentrated on "hot spots" and the flanks of the major blazes.

In Wyoming, firefighters controlled two fires Wednesday night and hoped to stifle a third today. Bureau of Land Management

spokesman Joe Montgomery said the 6,910-acre Laramie Range fire "stabilized" Wednesday and was con-tained. "The fire line held in places we were worried about," he said. predicting that control could come by late today

Meanwhile, mop-up operations were underway in Yellowstone National Park and on the Wind River Indian Reservation, where forest fires were controlled Wednesday night. At their peak, the fires scorched nearly 20,000 acres of Wyoming timber and kept about 1,200 firefighters busy. Fire crews also were getting an

upper hand early today over two forest fires in Montana that together have blackened more than 3,000 acres of timber. The Barker Canyon fire west of Anaconda was contained late

Wednesday after easterly winds blew it back to the firelines and away from the city of Anaconda. The fire had burned 2,900 acres, officials said. In the Lincoln-Scapegoat Wilderness near Ovando, meanwhile, fire crews hacked a fireline through the thick northwest Montana timber and,

by Wednesday night, needed only 2 more miles to surround the Cabin Creek fire. It was estimated to have consumed 1,300 acres. But fire officials reported fires still burning southwest of Pyramid Lake in western Nevada, on the north-facing slopes of the San Bernardino Mountains in California, and in Oregon's Umatilla National Forest,

where erratic winds and swarms of

stinging bees hampered firefighters.

Nevada to buy gas for tourists

CARSON CITY, Nev. (AP) - Nevada, armed with a \$10 million blank check, has launched a nationwide search for help in buying gasoline on the world market if it's needed to

keep tourists driving to casinos here. Gov. Bob List said Wednesday that he wants an expert in petroleum purchases to draft a "master plan" to be used by the state if it becomes necessary to make such purchases.

In its search for a consultant, the state has placed advertisements in Nevada newspapers and national trade journals. List made his announcement after

new figures were released showing casino revenues in April, May and June of \$505.2 million, up 10.5 percent over the same period last year.

The fuel-buying plan was approved by the Legislature at the urging of Sen. Paul Laxalt, R-Nev., who suggested it as an option to insure the stability of the Nevada economy, which is dependent on tourism.

Under the terms of the plan, thought to be the first of its sort in the nation, Nevada could use its credit to buy up to \$10 million worth of fuel or oil products anywhere in the world for resale to wholesalers or distributors within the state.

The state Energy Department has checked with federal officials, and so far "has found no legal barrier to the purchasing plan," List said. But he added that the consultant will have to do more research in light of President Carter's plan to hold down petroleum

We believe it is imperative that a

that supplies drop to critically low levels and our economy is seriously

threatened," said List.
Such a plan, List said, would include an overview of national and international petroleum markets and how they relate to Nevada, along with an analysis of federal rules on imports and allocations

The plan would also include potential sources of petroleum products and a recommendation on the merits of buying from one source or the other, the governor said.

697-4571 No. 11 Imperial Shopping Center Midkiff at Wadley Clements vetoed project by mistake

AUSTIN (AP) — Gov. Bill Clements vetoed \$300,000 for a South Texas children's heart program — reportedly after he had promised to let it through - and a staffer says it was just a mistake.

Sen. Carlos Truan, D-Corpus Christi, told the Austin American-Statesman Clements endorsed the program in April and specifically promised not

to veto the legislative appropriation.

Clements, however, included the item among several hundred million dollars' worth of vetoes. He said it had not been requested by the state health department and added, "it is unclear how this project would relate to the existing programs of the agency."

Jim Kaster of the governor's staff was asked if the governor's office had blundered, and he replied, "Yep."

"I think there were so many vetoes that the governor didn't catch one, to be honest," Kaster told the American-Statesman. "They had reams of that stuff, and I just think he missed it."

Welcome, Governor!

Gov. William P. "Bill" Clements Jr., who today is a special guest in the Tall City, has no hesitancy whatsoever in telling it like it is, with substantiating facts and figures, whether speaking in Austin, Washington, Midland or anywhere else.

His testimony on the SALT II treaty before the Senate Armed Services Committee in Washington recently certainly was no exception. He told the panel that he considers the issue of Senate ratification of the treaty to be the single most important matter to come before the Senate, and in turn before the American public, in many years.

After assuring the committee members that he was not appearing before them in a partisan role, the Texas governor said, "I speak to you as an interested American who feels deeply that. this SALT treaty is not in the best interests of our nation." And he went on to explain why. The committee would do well to give serious consideration to his testi-

Gov. Clements, incidentally, is in Midland to dedicate an antique drilling rig at the Permian Basin Petroleum Museum late this afternoon and to address the Midland Desk and Derrick Club's annual Industry Appreciation Banquet tonight. Midlanders always are delighted and honored to have Gov. and Mrs. Clements as guests.

Back to the governor's Washington testimony, he said he considers the issue of Senate ratification of the treaty to be so important because "We are talking about the future of our country. You are voting on the very framework of our national security. We may well be deciding when and how the next world crisis will occur. We may well be setting the stage for an atomic confrontation between the United States and Russia. In my judgment, all of the necessary ingredients are present today to create such a situation in the early 1980s. We in the United States are in greater danger today than we were in December 1941 - after Pearl Harbor."

Gov. Clements knows whereof he speaks, having served as deputy secretary of Defense for four years (1973-77), during which time he was a member of the National Security Council and a member of all six subcommittees of the council. He participated in all SALT discussions during that period.

The governor explained that "I

am strongly in favor of arms limitation treaties...I was a strong advocate of the Vladivostok Accord...I strongly advocated 'equal aggregates with freedom to mix,' which I think must be the underlying principle of any treaty."

He detailed his assessment of the proposed treaty in the context of the world geo-political situation as he sees it today, and the relationship of that geo-political environment to the nation's foreign policy, and in turn how the national security is affected. Geo-politically, he added, the U.S. today finds itself with enormous responsibilities to the Free World but without the means of meeting those responsibilities.

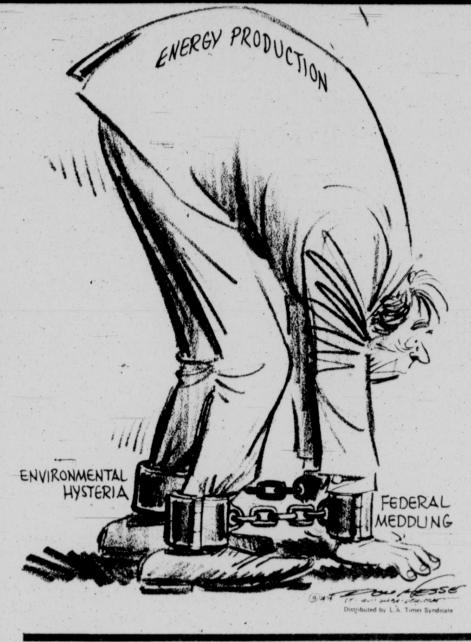

He said that in the geo-political world, "the treaty will further destablize the relationship with our allies. We will lose credibility...our allies will question our strengths, determination and military capability. In questioning, they express their lack of confidence in us."

He said it is the nation's military capability that is falling behind, and that "is what is fundamentally wrong with this SALT treaty. We are making an accommodation to the Russians in this treaty...The failure to ratify this treaty as submitted will really not change the substance of the military relationship between Russia and the U.S. to any significant degree...To the contrary, ratification of SALT II will have a dramatic 'pacifier effect' on both the American people and our allies, as did SALT I."

In order to make the treaty acceptable for ratification, the governor suggested six alterations in the wording: (1) Allow either party to have 308 "heavy" ICBMs or 308 mobile ICBMs of design choice; (2) insist that the USSR "Backfire" bomber must be counted as a strategic nuclear delivery vehicle; (3) replace the treaty "protocol" with a letter stating that the U.S.A. will deploy GLOM and SLOM systems with ranges in excess of 600 km in 1982, but not before 1982; (4) allow either side 308 multiple aim point ICBMs; (5) amend Article IV, 2nd Common Understanding and change to prohibit encryption of telemetry, and (6) include "on site inspection for both parties."

Above all, he concluded, "let's give a clear signal to all the nations of the world, our allies and foes alike, that we will never accept a position of weakness."

And on this challenging note, WELCOME to Midland, Gov. Bill Clements! You are among

WASHINGTON MERRY-GO-ROUND

'Nod' to Peking shocked Taiwan

By JACK ANDERSON

WASHINGTON - Nationalist China's leaders were so determined to suppress pro-Peking sentiment in this country that they seriously considered mailing letter bombs to prominent Americans who spoke favorably about the Red Chinese regime, a secret Senate report reveals.

This criminally insane idea reflected the consternation in Taiwan that followed the Nixon-Kissinger overtures to Peking in 1971 — an initiative that caught the Nationalists completely by surprise. After years of favored treatment, the government on Taiwan evidently felt betrayed.

"At that point, they changed from good guys to bad guys" in the perception of U.S. intelligence agencies, a CIA source told our associate Dale Van Atta. Sensing their new, unfavorable status, the Nationalists' intelligence leaders embarked on a reckless campaign aimed at "actively countering the rise of pro-PRC (People's Republic of China) groups and sentiment in the United States," the Senate report states. Letter bombs were given "active consideration."

In September of 1974 a top-level meeting of Nationalist China's spy agency, the National Security Bureau, was convened in Taipei to "discuss the possible use of such bombs against the newly-established PRC Liaison Office in Washington and also against individuals in the United States who had shown a strong leaning toward the PRC, particularly those who had previously been pro-

Taiwan," the report discloses. Among the targets discussed at the meeting, the FBI reported later, were several "prominent professors who had recently made trips to the PRC followed by speeches and statements in favor of the PRC Government,"

the report says.

The letter-bomb suggestion was eventually scotched by Nationalist Premier Chiang Ching-kuo, but not because of squeamishness. Chiang "reportedly refused to authorize such measures because he foresaw that the political backlash against (Nationalist China) would be too great," the Senate report explains.

Although the professors and the Red Chinese mission were spared, Chiang's army of intelligence agents was unleashed for less drastic measures in the United States In January 1974, Taipei had as-

signed Mei K'o-wang, former head of the Taiwan Central Police College, to direct the Nationalists' U.S. intelligence activities. He worked out of the embassy in Washington.

But in the spring of 1975, anticipating the eventual break in diplomatic relations that finally occurred last year, the government on Taiwan ordered Mei and his intelligence agents to adopt "covers" as private businessmen. Mei's front was a New York-based firm called the China Development Corp., with offices at 1825 Connecticut Ave. in Washington, just around the corner from the Red Chinese mission.

But Mei couldn't cut the mustard, in Chiang's judgment. The premier "expressed serious dissatisfaction" with the intelligence operation in this country, and replaced Mei with Wang Hsi-

Wang's No. 1 assignment was to infiltrate pro-Peking groups in the United States, planting Nationalist agents as moles to burrow their way up in the organizations

A stream of Nationalist intelligence officers arrived in the United States starting in 1975-76; they enrolled as graduate students in various universities. The professional agents, who get about \$1,100 a month, are supple-

mented by student volunteers and Chinese-American faculty members. Nationalist agents are believed to have instigated attacks on pro-Peking demonstrators and other acts of violence.

The secret report, prepared by the Senate Foreign Relations Committee's counsel, Michael Glennon, at the insistence of Sen. George McGovern, D-S.D., notes this ominous warning from FBI sources: "Parliamentary activities, sabotage and espionage' directed at the Red Chinese could easily be turned against U.S. citi-

INCREDULOUS KHRUSHCHEV: Nikita Khrushchev, the late Communist Party boss of the Soviet Union, was an early believer in a "conspiracy theory" concerning President John F. Kennedy's assassination. In 1964, when the late Drew Pearson had a conversation with Khrushchev, the Soviet leader asked him, "What really happened?" Pearson told him, in effect, that it was just the way it had been reported by the newspapers and presumably by the Soviet ambassador. Khrushchev was "utterly incredulous," according to a confidential CIA memo.

"When Pearson said it was understandable that foreigners had difficulty comprehending this fantastic episode, but in fact (Lee Harvey) Oswald was mad and had acted on his own, Chairman Khrushchev said flatly he did not believe this," the CIA memo stated. "He said he did not believe that the American security services were this inept." Commented Pearson: "I couldn't make a nickel with Khrushchev on this one.

Khrushchev, of course, professed to believe the assassination was a plot by American right-wingers.

Mark Russell says

Since people resent personal questions, next year the Census Bureau will sneak them in with the bland ones name, age, and have you ever lusted after (a) Howard Baker or (b) pineapples.

What is your weight? Height? Astrological sign? Wetness of back? What's your favorite movie? Daytime TV show?

What is your favorite color? Hobbies? Do you wear artificial chest hair? If you are over 40, is Halloween your favorite holiday?

The reason this information will be so important in 1980 is so Uncle Sam will have the tools he needs to keep our commitment to the privacy invasion sweepstakes of 1984.

the world, or how political life changes so fast these days, especially when it comes to who is bankrolling it. Which giant - Labor or Corporations - raises the most money for candidates? Neither. It is that collection of associations — doctors, lawyers, po-

lice chiefs, realtors, undertakers and

other bourgeois entrepreneurs -

which kicks in the most. So, it must be Republican and-or conservatives who benefit the most rom such political action committees (PACs). No, Democrats got nearly two-thirds of the booty from PACs of associations, unions and corporations in the 1977-78 period. The Democrats got this large share because they dominate the U.S. Congress.

Federal Election Commission figures show that associations contributed \$11.5 million in this period, 44 percent of the money going to Demo-cratic candidates for the House of Representatives or the U.S. Senate. Labor gave \$10.3 million, 95 percent of It to Democrats. And \$9.8 million came from corporate PACs, Republicans getting 61 percent of it.

Besides getting the lion's share of PAC money, Democrats got an unreported bonanza of \$11 million — the mount Michael Malbin of the Amerian Enterprise Institute estimates that labor unions provide in "educational" activities.

Now a "political action committee" heoretically is an entity to which cople make voluntary contributions, which are then dispensed to candi-lates the committee decides work est for the special interest in question. The American Medical Association is such a group, and it raised more money than any other PAC in this period - \$1.6 million, mostly for Republicans. The biggest labor PACs are the United Auto Workers (\$964,-465) and AFL-CIO's COPE (\$928,841). The biggest corporate PAC in the republic: International Paper Co., \$173,000.

Egads, where is the corporate political power of those giants in Fortune magazine's "500"? The PAC of the nation's fourth largest corporation -Mobil - came up with a measly \$2,000. Giant Texaco's PAC raised \$50,000. No. 1 General Motors, a farflung empire, only \$99,000. Exxon, IBM, Gulf, ITT and Du Pont don't even have PACs, so their figures are goose eggs.

So when that noisy tiny minority, the New Left, and even responsible Democrats cry out about the political power of corporations, they certainly can't be referring to the only legal way corporate employees can donate - through PACs. The PACs' power really is through associations and unions. Corporations are politically feckless these days.

This is why a strident, militant voice like the New Right Report gets exercised over the small involvement of American corporate life and politics. In its current issue, the New Right selected the 112 largest corporate PACs (there are 607 all told), and listed the 20 "most liberal" and 20 'most conservative.'

By New Right reckoning, a Georgia insurance company, American Family Corp., is the champion in giving to

od, with a record of giving 83 percent to Democrats and 17 percent to Republicans in House and Senate races. But this firm's PAC only gave \$113,-650, hardly enough to pay for one candidate's TV schedule Other lopsided donors to Democrats

liberal candidates in the 1977-78 peri-

were Sugar Corp. of U.S. (76 percent); Freeport Minerals (71 per-Winn-Dixie Stores (68 percent); Coca-Cola (66 percent); St. Joe Minerals (65 percent), and Hughes Aircraft, Burlington Northern Inc. and LTV-Vought Corp., all 64 per-

By New Right standards, the corporate PAC heroes — because they gave overwhelmingly to Republicans were Getty Oil Co. (96 percent); Honeywell Inc. (95 percent); Belden Corp. and Pillsbury (94 percent); Fluor Corp. and U.S. Steel's Railroad group (93 percent), and D. Dart Industries (92 percent).

The New Right naturally wants every corporate PAC to display a 100 percent record of giving to conservatives. It laments the fear of companies to even organize PACs. That fear grows out of the Watergate experience, and avoidance of controversy in an era where activists can nail a company to a wall and an aversion to filling out endless forms required by the Federal Elections Commission and-or getting into legal trouble as a

Now just because 39 percent of the corporate PACs give their money to Democrats doesn't mean that they necessarily agree with Democratic Party policy. No, it's more a matter

The Davids beat the Goliaths in political fund raising of feeding the alligators to avoid being eaten by them, a means of mitigating the sting a congressman or senator might apply to a given class

> Corporate PACs, like those of unions and associations, lean heavily on their Washington lobbyists for advice as to how to distribute the contributions. Lobbyists often recommend incumbents who will win and will hold power. That's why even liberal Democrats like Frank Church can get money from unlikely sources.

or corporation.

The powerful interests in Washington today, in terms of bankrolling candidates and influencing legislation, are associations, labor unions and corporations — in that order. Today's democracy is conditioned a great deal by money, and look who's giving the money.

Tickets are \$2 and can be purchased from any choir member or at the Car Wash.

All PACK BACKERS (old and new!). You MUST attend this impor-

U.S. Navy to stress sea rights

WASHINGTON (AP)

— The Joint Chiefs of Staff have ordered U.S. naval commanders to underscore U.S. rights to sail freely in international waters beyond three miles from any nation's shores.

Administration sources who declined to be identified said Wednesday the orders followed a recent White House decision that "we should assert our rights both diplomatically and in fact" to prevent any nation from assuming that the United States accepts claims to waters beyond three miles.

Some nations claim territorial rights up to 12 miles from shore, others as much as 200 miles seaward. A State Department official stressed that "we recognize three miles."

As administration sources explain the situation, the United States has been exerting "a de-gree of restraint" for a long time while more than 100 nations have been haggling in Law of the Sea negotiations. These negotiations began five years ago.

The Joint Chiefs' orders became known after the Norfolk, Va., Ledger Star published what Defense Department officials said was a follow-up message sent by Adm. Harry Train to his commanders. Train commands the Atlantic

In his message, Train said that "in certain instances, we must consider going out of our way to contest a claim."

Houston bus drivers vote to walk out

HOUSTON (AP)— Union bus driv-ers voted Wednesday to strike unless the Houston Metropolitian Transit Authority acted immediately on a list of grievances.

David Carrington, president of the Transport Workers Union Local, said the the strike vote was "overwhelmingly" and the walkout set for noon Thursday.

But Barry Goodman, MTA executive director, said he doubted if the

drivers would strike because Carrington "does not truly represent the vast majority of Metro employees."

Goodman said the MTA is ready to meet with union representatives, but also is keeping open the options of legal action and the firing of the

"We're getting tired and irritated by threats through the news media," Goodman said. " Mr. Carrington has repeatedly attempted to utilize the threat of a work stoppage against the MTA and the citizens of this community. Mr. Carrington's behavior has been consistently erractic and, in some cases, irresponsible."

Carrington said the grievances include sick leave, unsafe conditions in maintenance shops, and drivers being forced to drive buses with windows removed because of air conditioning

"The working conditions have not improved," he said. "The employees have been laboring under horrendous conditions for years."

One of the major issues involves a new sick leave policy that requires a doctor's notification for each day

Goodman said this was necessary because the Houston transit authority has one of the highest percentages of any major transit system in the na-

in New Mexico and moved to Big Spring in 1951. He lived in Morton and then returned to Big Spring. He was a cleaner and presser at Gregg Street Cleaners. He was a member of Phillips Memorial Baptist Church, Mullin Lodge No. 372-IOOF and was a World War II veteran.

He was married to Gladys Bryant Nov. 3, 1973.

Survivors include a son, Mike Roquemore of Austin; two daughters, including Susan Smith of Woodard, Okla.; two stepdaughters, Joan Davis and Glenda Perry, both of Big Spring; a stepson, Roger Beard of Big Spring; a sister, Mrs. Sid Williams of Morton; five grandchildren and seven stepgrandchildren.

Barry Finley

ASPERMONT — Barry "Sonny" Finley, 57, of Abilene and formerly of Aspermont, died Tuesday in an Abi-

lene hospital after a two-week ill-

Services were to be at 10:30 a.m. today in the First Baptist Church here with the Rev. Bill Stockton, pastor, officiating. Burial was to be in Asper-

mont Cemetery.

Born July 14, 1922, in Aspermont, he was the son of the late Mr. and Mrs. George P. Finley. He was a service station operator in Abilene having moved there from Aspermont 44 years ago. He was a member of First United Methodist Church.

Survivors include two brothers, George Finley of Kermit and Dr. Ross Finley of Irving, and a sister, Frances Roberts of Sherman.

Florine Rayos

Services for Florine D. Rayos, 59, 1307 S. Marshall St., were to be at 3 p.m. today in Our Lady of Guadalupe Church with the Rev. Charles Hassenauer, pastor, officiating. Burial was to be in Fairview Cemetery.

Rosary was said at 8 p.m. Wednesday in Thomas Funeral Home.

She died Monday in a Midland hospital after an illness.

Pallbearers for the service were to be Matias Perez, David Garcia, Melquiodes Almazon, Edmundo Valdez, Rico Rodriquez and Inez Alvarado.

Mattie E. Scott

ODESSA — Services for Mattie Equilla Scott, 86, were to be at 10 a.m. today in Davis-Morris Funerl Home chapel in Brownwood with burial in Pleasant Valley Cemetery in Brown-

She died Tuesday in a local nursing

Mrs. Scott was born July 13, 1893, in Brown County. She was married to the late Clarence M. Scott on June 30, 1913, in Brownwood.

Mrs. Scott moved to Odessa from Brownwood in 1976. She was a Baptist.

Survivors include two sons, O.V. Scott of Odessa and Hollis J. Scott of Houston; two daughters, Mrs. C.R. Coker of Midland and Oleta Scott of Big Spring; a brother, Robert Mills of Goldthwaite; 11 grandchildren, 23 great-grandchildren and a great-great-grandchild.

Vatican officials are not amused this time

CASTEL GANDOLFO, Italy (AP)
— Pope John Paul II may or may not
have made his first dive into the papal
swimming pool, but his vacation has
already caused a splash.

already caused a splash.

Vatican officials used to be relieved when his predecessors went into two months of "summer retreat" at the sprawling estate here in the Alban Hills a half-hour drive from Rome. Now they must contend with photographers in low-flying helicopters looking for shots of the 59-year-old pope trekking through the woods in tennis sneakers, picnicking with friends or doing the backstroke.

The weekly newspaper Domenica del Corriere, in what it billed as a "world exclusive," published photographs of the glass and concrete covered pool deep in the gardens behind the papal palace. According to the magazine, the complex includes not only an Olympic-sized pool but a gym, solarium and sauna.

solarium and sauna.

Officially, the Vatican refrains from comment about the private life of the pope, who was a skier, rower and mountain climber in his native Poland and while cardinal of Krakow was photographed in shorts at a pic-

nic with young people.

The Rev. Florangelo Puzzi, parish priest here, expressed surprise at all the fuss being made about a vacationing pope. "I think that since there is this swimming pool no doubt the pope does go and swim in it," he said.

Tourists stream into Castel Gandolfo each day during the summer months, although the pope's only scheduled public appearance is on Sundays. They snap up picture postcards, ashtrays, medals and framed portraits of the pontiff and line up for snapshots with the Swiss Guards at the entrance to the papal palace.

"We've seen more Polish pilgrims this year than ever before, as would be expected, but also many tourists from non-Catholic countries such as Finland and Norway," said a vendor in a souvenir shop in the shadow of the

17th century papal palace.

John Paul, who has described his stay here as "working while resting and resting while working," is clearly taking advantange of the sunny days and cool evenings at the estates overlooking Lake Albano. He looks tanned, fit and has put back the few pounds he lost during his trip to Poland in June.

land in June.

And away from the formality of the Vatican, he has lunched with the families of Vatican workers, spent two hours with Italian teen-agers who succeeded in kicking the drug habit and linked arms with young southern Italians and joined them in a folk

He has also become a "helicopter pope," flying in by chopper each Wednesday for his general audience or other church business.

"There is no routine with this pope," said Father Puzzi. "He goes wherever he likes, he takes his walks without dreaming of telling anyone in advance his itinerary, he just opens the door and out he goes."

Delegation of congressmen to meet Vietnamese leaders

HANOI, Vietnam (AP) — A U.S. congressional delegation hopes to meet with acting Foreign Minister Nguyen Co Thach and other senior Vietnamese officials today to discuss the refugee problem, U.S.-Vietnamese ties, the conflict in Cambodia and other issues.

"We hope our visit will give the Vietnamese a reflection of the various attitudes of the American people," delegation leader Benjamin S. Rosenthal, D-N.Y., said Wednesday shortly before his group arrived in Hanoi from Malaysia.

He said the refugee problem in Vietnam and Cambodia could be solved only through "a political solution," and that normalization of relations between the United States and Vietnam was "inevitable and a good thing for the long term."

thing for the long term."

The congressmen arrived to a low-key welcome after Vietnam lifted a ban on their trip, imposed because one of the lawmakers, Rep. Robert Drinan, D-Mass., accused Hanoi of massive human rights violations in connection with the expulsion of tens of thousands of Vietnamese, most of

them ethnic Chinese.

Vietnam reinstated the invitation Tuesday, one day after it was dropped, following a message from Secretary of State Cyrus R. Vance. Details were not disclosed, but Rosenthal said, "It would have been lousy if we couldn't have come" and that the Vietnamese "reversed them-

selves rather gracefully."

The legislators' main concern is

whether Vietnam will keep its pledge to stem the exodus of refugees or reopen the flood gates which have already sent tens of thousands of exiles pouring into the South China Sea in leaky boats in search of asy-

lum.

Tens of thousands of other refugees are reported starving in Cambodia, which Vietnam invaded eight months ago to oust the pro-Chinese government and install one favorable to Hanoi, and the lawmakers hope to find out whether anything can be done to ease the plight of these people as

well.
The congressmen plan to fly to Hong Kong later today en route to the United States, where they will submit a report on Indochinese refugees to the House of Representatives and possibly to President Carter. They have already visited refugee centers in Hong Kong, Thailand, Indonesia and Malaysia.

In addition to Rosenthal and Drinan, the group includes Thomas J. Downey, D-N.Y.; George Miller, D-Calif.; Daniel Akaka, D-Hawaii; Richard Nolan, D-Minn.; John Paul Hammerschmidt, R-Ark.; Lyle Williams, R-Ohio; and Antonio Borja Won Pat, D-Guam.

Another congressional group, headed by Rep. Lester L. Wolff, D-N.Y., is due to arrive in Hanoi Friday from Thailand. Wolff, chairman of the House Subcommittee on Asian and Pacific Affairs, said his delegation also hopes to discuss the possibility of normalizing relations with the Viet-

American divers die following desperate fight to save them

LERWICK, Shetland Islands (AP)

— A desperate fight to save the lives of two American divers failed when both men died in a decompression chamber after being hauled up in a diving bell that was stranded 500 feet below the North Sea.

The men were identified by a British National Oil Corporation spokesman as Richard Walker, 32, of Santa Barbara, Calif., and Victor S. Guiel, 29, of Springfield, Mass.

Infabco Diving Services of Aberdeen, Scotland, which employed the divers who were working under contract to BNOC, said Guiel had been with them for a year, and Walker since last April.

The mooring cable attaching the bell to the support ship, the Wilddrake, snapped early Wednesday, leaving the pair marooned a few feet from the seabed. Only the "umbilical cord" — the support cable carrying air to the bell — was left intact.

A massive rescue operation, involving a flotilla of support ships plus a team of divers, was mounted and after two attempts another hoisting cable was hitched to the tiny bellonly large enough to take two menand the bell was slowly winched to the

surface.

BNOC at first said there were signs of life aboard, but just before midnight Wednesday issued the terse announcement:

"BNOC regrets to announce they have been advised the two divers

have been confirmed as dead."

Walker and Guiel had been working near a production platform in the Thistle oilfield 130 miles northeast of the Shetland isles, the cluster of is-

lands off the northernmost tip of Scot-

land.

Because the support line carrying air to the bell had not snapped, there were hopes the men would be rescued and support divers worked frantically to attach a fresh winching cable from the Wilddrake to the bell. After one abortive attempt they succeeded and the bell was slowly hoisted up as BNOC reported movement had been comprised.

seen inside.

The bell was hauled aboard the Wilddrake and locked onto the decompression chamber — the chamber where all deep sea divers have to spend some time while their systems recover. Two doctors hastily flown out from Aberdeen entered the chamber but shortly afterwards it was

announced the men had died.

Their deaths brought to 30 the num-

ber of divers killed in the North sea oilfields since operations began eight years ago.

Meanwhile, BNOC investigators rushed from headquarters in Aberdeen to Lerwick to mount a microscopic examination of the bell and the connections.

The investigators will be closely examining the vital umbilical cord carrying life support systems to the bell to see if it was damaged, although it was still connected when the bell was on the seabed.

was on the seabed.

The cord supplies hot water for warmth, a helium-oxygen mix and communication cable. The divers were thought to have had adequate air supplies, but it was feared that without the other systems they could have either frozen to death or died from inhaling carbon dioxide.

Accepting a check Wednesday from the Midland Downtown Lions Club is Lions Texas Queen Sarah Fullinwider of Midland.

THE MIDLAND REPORTER-TELEGRAM, THUR., AUGUST 9, 1979

Bus industry says Carter's on the wrong track

have made Amtrak happy by taking the train to Baltimore and declaring it the best way to travel. But he didn't make a lot of friends in the bus

After thinking it over for a day, the American Bus Association decided Wednesday to set him straight.

'That Amtrak Metroliner that you rode, besides being a fuel guzzler, also cost in government subsidy an amount equal to about half of the fare you paid," ABA president Arthur D. Lewis told Carter in a

"Not just your fare," he added, "but also the fares of everyone riding with you."

Carter and his party, which included a pool of reporters and cameramen who paid their own fare, occupied the last car of one of the regular Metroliners that ply the New York-Washington corridor.

WASHINGTON (AP) - President Carter may Every passenger was charged the regular \$17.50 round-trip fare.

In Baltimore, the president declared he was taking

the train "not only because it is the best way to come from Washington to Baltimore, but also because I wanted to show my support for a strong mass transportation system."

A White House spokesman says Carter "obviously meant to include bus travel." But that word hadn't gotten to Lewis.

"If the bus industry last year had carried all of Amtrak's pasengers on its regular operations, it would have used only 36 million gallons of fuel as contrasted to the 101 million gallons that Amtrak used," he wrote. "Further, the bus industry would have carried them at no cost to the federal trea-

The letter did not mention that taxpayers pay for the highways on which buses travel.

TWC won't move road hearing

AUSTIN, Texas (AP) — The Texas Water Commission has refused to move to Woodville a hearing on possible contamination of East Texas roads by one of the nation's largest handlers of hazardous materials.

Lawyer Bob Wortham of Beaumont pleaded for the transfer Wednesday, telling the commission, "If landowners are denied the right to appear before you, there will be a great deal of bitterness."

'It would only be right," he said, "if the people had an opportunity to come before you to tell you how they've been affected and the damages they've

Wortham represented himself and 800 other landowners in Barlow Lake Estates in Jasper and Tyler

He said he had a 1-month-old child who "I'm very leery of taking to Barlow. I fear more for the child than I do for myself or my wife. "Most of the people are just good, old working folks or poor people" who cannot afford to come to

Austin for a hearing, said Wortham. "I could muster only 10 or 12 at the most to come to Aus-Woodville is in Tyler County, 14 miles from Bar-

The subdivision was named in a May 9 commission order instructing Browning-Ferris Industries Chemical Services, Inc., to remove all hazardous materials — including nitrobenzene — from five subdivi-

sions in Tyler and Polk counties.

At the request of Wortham, the commission agreed to postpone until Sept. 13 a hearing on a motion by Browning-Ferris to remove Barlow from the May 9 order. Browning-Ferris contends analyses of samples obtained from the subdivision have failed to reveal the presence of any hazardous materials.

Wortham said road contamination "is a very emotional issue," and Barlow residents want to have the roads retested. "I want to be present, and my clients want to be present" to point out spots for

Wortham was advised the commission staff already had taken 16 samples.

He replied that there are 14 miles of roads in the Barlow subdivision, and added, "I don't think one (extra) sample a mile is unreasonable.

"I'm not going to do it," said Commissioner Joe "What?" asked Commissioner Dorsey Harde-

"Go down there and dig holes." replied Carroll. The hearing is important, Wortham said, "because if you (the commission) find we have no problems,

we're dealing on deaf ears."

"What's wrong with the district court down there?" asked Hardeman. "That's where we may have to go," replied Worth-

The White House had no official response, saying the letter had not been received. Lewis also sent copies to five members of Congress, four members of the White House staff and news organizations.

When he spoke to the Sons of Italy convention in Baltimore, Carter mentioned he'd come by train and said "I recommend this kind of trip to every American regardless of national background. Trains have always been a truly American way to travel." If so, Lewis was positively un-American about

trains.
"The train is not an efficient, modern system; it is haviling passengers," he an obsolete system for hauling passengers," he wrote. "The intercity bus industry should be recognized as part of the solution — not treated in a manner that it becomes part of the problem."

It wasn't so long ago - soon after Carter's Moral Equivalent of War speech about energy conservation that many intercity buses proudly displayed a poster on their backside declaring "Thanks for saving energy and taking the bus." It was signed 'Jimmy Carter."

The White House is not claiming Carter's trip was fuel efficient. Two Marine helicopters circled overhead while the train made the 37-mile trip. A pilot train went ahead to check the tracks.

And, Lewis might be pleased to know, the bulk of the White House press corps rode on three chartered

Teachers won't

need TB tests

AUSTIN, Texas (AP) - Texas teachers will no longer need annual tuberculosis examinations, the state health department said Wednesday.

The 1979 Legislature passed a law requiring tuberculosis tests only for new employees and volunteers expecting to work 90 hours or more during the school year.

Severe Storms Center losing 'Mr. Tornado'

KANSAS CITY, Mo. (AP) — "Mr. Tornado" is shedding his title and still hasn't seen one.

For 14 years, Allen Pearson, has been predicting tornadoes here as director of the nation's Severe Storms Forecast Center. More than 11,000 twisters have been sighted during

In 1965, when he was asked to become the nation's chief tornado fore-caster, "it took all of 30 seconds to say 'yes' and then ask, 'What the heck is a tornado?" he said in a recent interview. And the man dubbed "Mr. Tornado" never tires of saying, "I've never even seen a tornado.

Beginning Monday, the 54-year-old Pearson will keep watch over the

National Weather Service's largest region and its second largest office, in Kansas City.

Pearson's forte is translating complex weather data into lively language. He explains the relationship between thunderstorms and tornadoes this way: "A severe thunder-storm is like a striptease ... it sug-gests there might be something later."

When he first came to the severe storms center, "we had many fine meteorologists who were introverted almost to the point it was painful," he said. "There's no point in making better forecasts if they are not translated into language the person paying

the bill can understand."

In his new job, Pearson will supervise 80 weather offices in 14 states, from Colorado to Indiana and north to the Canadian border. He said he's looking forward to getting away from the day-to-day routine of forecasting.

"Now, when the lady comes up to me at a party and asks why we screwed up on that forecast, I'll let her see the new man," he said.

Pearson studied meteorology in college and was a forecaster for the Navy in the Pacific. The weather service hired him in 1951 and he worked in Honolulu and Washington,

D.C., before coming to Kansas City.

After a 1965 rash of tornadoes in Indiana claimed 270 lives, Pearson joined a team of meteorologists interviewing witnesses.

He says he "came away with the powerful impression that while the forecasts were good, the overall warning system was pretty bad."

He set out to improve the warning system as head of the Severe Storms Forecast Center. Three years later, the Commerce Department awarded him a medal for developing improved techniques of severe storm predicting and for helping develop strong local tornado warning networks.

For \$2 million, U.S. moviemaker allowed to blow up countryside

LANKOVICE, Czechoslovakia (AP) — For something less than \$2 million, you can blow up a church in

Norman Rosemont did, and for the same price he got to burn up a field of trees, blast holes in a pasture and turn rats loose in the countryside.

"The Czech cooperation has been tremendous;" said Rosemont, walking in his devastated territory in North Bohemia near East Germany.

Rosemont, an American, is producing a remake of the movie version of Erich Maria Remarque's World War I novel "All Quiet on the Western Front" and getting unexpected help from the Czechoslovak strip mine in-

"I wanted to shoot it in England, but we could not get the military cooperation we wanted," said Rosemont, bouncing out to his private battlefield in a four-wheel drive

"So I took it to Germany, but they said they didn't have anything of the period left, that it had all been destroyed in World War II," he said of his search for a period setting. 'They said when they want some-

thing like that they shoot it in Czecho-Rosemont wound up in what once

was the Sudetenland, the ethnic German territory annexed by Adolf

claimed it and evicted most of the remaining Germans. Some of the Czechoslovaks who replaced the Germans are themselves being evicted from some of the area's turn-of-thecentury towns and villages - they stand in they way of one of Europe's most awesome strip-mining opera-

The government has found that before the coalminers come, it can make money by renting out the abandoned towns and fields to movie-

Rosemont's deal included rights to blow up a countryside church, convert nearby fields into a body-littered

vak soldiers dressed as French and German troops in his very own rented

"We didn't have to do a thing to it," he said, looking down an overgrown and littered street lined with the gut-ted, battered houses of Lankovice.

The village was vacated two years ago, locals say; its residents packed off to new quarters and given 200,000 crowns (about \$20,000) to compensate for loss of their old ones.

"Lots of them wanted to build weekend cottages," said an elderly woman extra standing in front of a house which appeared to have been ripped apart. "So they came back for bricks

"Some of it we dug, some of it we blew up," he says of his scourged countryside, once part of the fields of Lankovice

"All the trees were blown and burned by us," he adds. "We have a flame thrower. Lots of people don't know they had flame throwers back then, but they did.

"We burn tires constantly to give it that black smoke," he says. "Most of the barbed wire is real, but we also have some plastic wire for throwing people through.'

One scene called for rats to run over bodies in the trenches. Rosemont pro"The most unpleasant thing, not the most difficult but the most unpleas-ant, was the rats," said Karel Vitek, normally an engineer and judo instructor.

"They were laboratory rats and no one was bitten, but it wasn't nice." Rosemont says his company brought its own guns, uniforms and 70 tons of explosives. Czechoslovakia's Barrandov Studios provided artists, supporting actors, extras, antique but functioning troop trucks and an elderly steam locomotive, complete with

The results are to appear on American television in November and Rosemont hopes to sell it in other countries

Stock market gains

NEW YORK (AP) - The stock market posted its third straight gain today despite some afternoon selling. Trading was

The market rallied sharply Tuesday in buying attributed to widespread expectations of a downturn in interest rates. Analysts noted an upsurge in activity among investing institu-tions, which have accumulated large reserves of money in short term interest-bearing investments.

Block trading activity, one measure of institutional activity, accelerated in Tuesday's session, and was brisk again today. At mid-afternoon the ad-

vance faltered, but prices held on the plus side through the close. The Dow Jones average of 30 industrials finished with a 3.33 gain at 863.14,

bringing its advance since the start of the week to 16.98 points. Advances outnumbered declines by a 9-5 margin on the New York Stock Ex-

Big Board volume came to 44.97 million shares against 45.41 million in the previous session.

The NYSE's composite common-stock index rose 18 to 60.36.

At the American Stock Exchange, the market value index was up .77 at

BUSINESS MIRROR

Spend, spend now America's style of living

By JOHN CUNNIFF **AP Business Analyst**

NEW YORK (AP) — Their moods and actions may puzzle the leadership, but there really is no mystery about why Americans do and don't - why they spend or save, believe or disbelieve, have or haven't got

At least in matters financial, people think and act in accordance with what they perceive to be their own best interest. What they think or do might not be wise, but it certainly is perceived to be so.

And so they spend instead of saving, they avoid the

stock market, they buy houses and gold and diamonds, they sell U.S. Savings Bonds, they shun the big cars and wait to buy little ones, they buy term

Nothing mysterious about it. Humans in the mar-ketplace have acted in fairly predictable ways since long before Adam Smith or Sigmund Freud. The real mystery is how on earth leaders fail to discern

Americans today save relatively little of what they earn because to save is to lose. They earn 5.5 percent interest on passbooks while inflation takes double

that. And then they pay taxes on the "gain."

They avoid stocks because stocks haven't kept pace with inflation. And because investors are taxed twice: at the corporate level on their company's profits, and then on the dividends their investments

They've been selling U.S. Savings Bonds all year long because they feel the 6.5 percent return is not "fair," as a Treasury official said recently, especially when other government securities offer

They buy little cars for the obvious reasons of gasoline conservation and lower overall operating costs, a pattern of behavior that Detroit resisted for while losing 20 percent of the market to imports.

They buy houses because mortgage interest is tax-deductible, because savings left in paper money lose value, and because they pay off their loans in cheaper dollars so long as inflation persists.

They buy gold, diamonds and collectibles because, experience teaches them, the leaders of the nation serve up rhetoric about the need to combat inflation and then spend up an inflationary storm. They lose confidence in the future, or so the

consumer and political polls suggest, when they see leaders complain about consumer habits and then fail to make a change of habits worthwhile. Two examples are suggestive of many more:

-The country, say those who claim to know, faces a severe shortgage of capital with which to modernize its plant and equipment. But every cent of interest earned on savings — and more — is taxed. -Savings Bonds are an essential financing tool of the federal government. But the interest the government pays on Savings Bonds is one-half of one percent below the level authorized by Congress.

Sometimes, the ordinary American feels, the country is at war with itself instead of, as is often expressed by government officials, at war with poverty, with inflation, with the energy problem.

The view is frequently shared by corporations, which are given their assignments by federal offi-

cials and then shackled by regulations from fulfilling them.

There really isn't much mystery about Americans act as they do, even when those actions appear to be at odds with official goals. The mystery is why it seems not to be understood.

Klan camp teaches racism to children

BIRMINGHAM, Ala. (AP) - In most ways, it looked like any other summer camp - kids munching hot dogs and playing volleyball. But the guard at the gate was dressed in white robes and packed a pistol, and the kids took time from their games for rifle practice.

A counselor at the camp told the youngsters they were being taught how to fire a rifle because, "Some day you'll be Klansmen in robes and you'll be fighting beside us."

The camp, somewhere north of Birmingham, is run by the Invisible Empire of the Ku Klux Klan. The 47-acre site is owned by Roger Handley, Alabama grand dragon of this particular Klan faction. Reporters who visited the camp Sunday, at the

Klan's invitation, were taken to it convoy-style, over a roundabout route of country roads that made its exact location hard to pinpoint. Reporter Bob Bray of the Birmingham News was

among those who visited the camp. His story appeared in Monday's editions. Bill Wilkinson of Denham Springs, La., imperial wizard of the faction, said in addition to usual

summer-camp activities, target practice and karate lessons, campers attend weekly classes on "what it means to be white. We want to make what the liberal media would call racists out of them. Tony Anderson, state director for the Klan's Youth

Corps program, said after Life magazine printed several pictures of camp activities in its August issue, it was decided that the camp should be opened to other media. So on Sunday, NBC News showed up. So did a crew

from CBS' "60 Minutes," the American correspondent for the Danish national television network and a reporter from a New York newspaper. They waited for hours under a blistering sun to see

youngsters heft a rifle and take two shots apiece at paper plates lined up in a ravine. "There are people, particularly communists, who would stoop to anything, even attacking kids," Wil-

kinson said. Some of the youngsters told reporters that they

joined the corps because of harrassment and physical attacks from blacks in schools. "Let's face it," Anderson told the group. "You're Youth Corps. You stand together and you fight

Wilkinson said members of the youth group, which

is open to 12-to 18-year-olds, are not Klan members. He added that he expected most would join the Klan when they are grown. Wilkinson said his Klan group, one of several in the nation, operates 12 such camps in six states. Also, he

said, plans are under way to construct a family recreation club for Klan members, with a lake and artificial beach, roller rink, game room and bowling "We want to interest the big cities in the Klan and we feel this will draw people who want segregated

recreation facilities," Wilkinson said. "We make no bones about it. We're not an equal opportunity employer."

Workmen aboard the ship L.B. Meaders use special equipment to force steel and lead balls in a gelatin-like mixture down the runaway IXTOC I oil well in the Bay of

Campeche to try to stem the flow of oil so that the well can be capped. (AP Laserpho-

Drifting oil patch isn't biggest worry for Texas shrimpers

BROWNSVILLE, Texas (AP) — As a threatening patch of Mexican oil floats dangerously near the coast, some South Texas shrimpers say the drifting crude is not their biggest worry.

"Me personally, I'm more worried about them," Joe Gayman said as he gazed toward federal inspec-

"I would like to know what rules we are playing," commercial fisherman Pat Pace asked the by," commercial federal officials.

About 150 shrimpers gathered in a hotel meeting room here Wednesday night to talk about the spill that threatens their industry. Ralph Rayburn, executive director of the Texas Shrimp Association, said the state's shrimpers last year brought in \$140 million worth of catch. The Brownsville fleet brought in about \$36 million.

But now the shrimpers and fishermen are concerned that overzealous federal inspectors may unnecessarily keep parts of the catch from the

Victor Casper of the U.S. Food and Drug Administration insisted that the inspectors will play fair. Casper said the inspectons will be intensified as the oil drifts near the shore.

But there will be no action taken until a significant and very detectable odor and flavor to the shrimp is noticed," Casper said.

Hector Herrera of the Texas Health Department also said inspection efforts will be increased. Herrera said his agency will try to work with the shrimpers to make sure the only good quality shrimp

Julius Collins, president of the association, said the shrimpers can prevent problems with the inspec-

Rayburn said the spill could put a crushing end to what already has been a slow year in the Gulf.

never been exposed to this type of threat."

Rayburn echoed federal officials' concern about

inland waters. He said oil in the bays could have a 10-year effect on the shrimping industry if the spawning areas are damaged.

Steve Omberg of the National Weather Service suggested that the boats seek out cleaner waters. He said, "There's an awful lot of clean water in between." The National Oceanic and Atmospheric Administration is now carrying oil location reports on its marine forecasts.

The shrimpers also heard from their local congressman. U.S. Rep. Kika de la Garza said he is impressed with the federal effort against the run-

Everything that can be done is being done. Everything that could be done was done. But there

just isn't that much expertise," he said. The congressman was asked why U.S. officials

site as soon at as the well blew out in June. "That's not our business," he replied. One unsatisfied fisherman replied, "But pollution

equipped boats.
PEMEX sub-coordina-MEN, Mexico (AP) -Oil workers are cramtor Ignacio Armendariz ming steel and lead balls Molina said if the well into the tubing of the flow can be slowed enough by the balls for runaway IXTOC 1 oil well in the Bay of Camthe well to be capped, the peche north of here, trywell can be permanently plugged with mud and ing to slow the flow of oil enough so that the well cement and work on the can be plugged.
The balls, about the relief wells can stop.

The balls are being

size of a tennis ball, are being forced into the four-inch-wide pipe at the rate of about eight a

Engineer J. Jesus Gaytan Rangel, who is overseeing the operation for PEMEX, the Mexican state-controlled oil monopoly, said at least 50,000 of the balls will have to be forced down the well before the flow can be sufficiently reduced, if it can be done that way at all.

Engineers said they should know in eight to ten days whether the effort will work.

Work continues on two angular relief wells being drilled into the runaway well to seal it off. All the while, crude oil continues to flow into the sea at the rate of about 20,000 barrels a day.

PEMEX says about half of the oil is being burned by the fire that leaps out of the ocean over the ruptured well. About 2,000 barrels more, they say, is being scooped up by specially

and one half miles wide at its widest.

north. So far the currents have carried the oil away from this city and have spared most of the rich shrimp fishing grounds.

gelatin mixture under high pressure. The first relief well is scheduled to toward the town Dozens of shrimp boats

went about their business a few miles offshore Wednesday. A few miles farther out, other boats cut wakes as they plowed through the reddish brown oil, moving equip-ment and workers between ships, drilling platforms and barges.

After that, he said, it disintegrates into fingers that follow the coastline of the Gulf of Mexico

But Armendariz Molina said the stiff north winds that usually start in the area in October, could blow the oil back

Everyone has a remedy

SOUTH PADRE IS-LAND, Texas (AP) — While scientists are using the latest equipment to battle a massive oil spill, some resource-ful Americans are tinkering with home remedies for the world's biggest spill.

And the well-meaning

citizens are not shy about offering their services sometimes for free and sometimes for hire.

"A lot of people think you can burn the oil. But a lot of that oil is mostly water by now. The volatiles have evaporated," said coast guardsman Richard Griggs. Another caller recom-

mended a simplified clean-up process.

"Take a big piece of plastic, stretch it under the tar balls that sink and pick them up," Griggs recalled one caller saying. Then there's the

woman who saw nothing

wrong with mounting huge fans on a barge in the gulf — and blowing the oil back towards the blown-out Mexican well its spewing from. Some callers opt for more natural defenses.

There was a recommendation to use oil-eating bugs to lap up the runaway crude.

Griggs, who insists that suggestions "we think can be applied" are passed on to higher-ups, said, "There are orga-nisms that feed on the carbon in oil."

Some of the callers claim to be inventors who can solve the problem in a few days. Others are housewifes who have had more practical experience.

An Atlanta housewife - fresh from a succesful kitchen test - sugested a system that somehow involved massive doses of flour poured into the

KING PROSPECTOR

A flowing oil discovery has been completed in Pecos County, a gas discovery has been finaled in Reeves County, another gas strike potentialed in Eddy County, N.M., a 22,250-foot rank wildcat was staked in Loving County, and other wildcat operations have been reported.

PECOS OPENER

American Petrofina and Claud Hamill reported potential test on the Pecos discovery — No. 1 H. K. Hinde It finaled for a daily flowing potential of 148 barrels of 26.5-gravity oil, through a 24/64-inch choke and perforations opposite an unreported zone from 6,702 to 6,710 feet.

The gas-oil ratio is 993-1, and the pay section was acidized with 1,000

The hole is bottomed at 9,838 feet in the Ellenburger where it failed to find production. Plugged back depth is 6,819 feet and 4.5-inch casing is cemented at 6,856 feet.

The discovery is 845 feet from south and 740 feet from east lines of section 28, block 178, TCRR survey and 15 miles northwest of Sheffield. It is one mile southwest of the shallow Yates field and 2.5 miles north of the Sheffield multipay field which produces gas from the Strawn at 6,761 feet, gas from the McKee at 8,340 feet and oil from the Ellenburger at 9,200 feet.

The No.2 Hinde topped the anhy-drite at 690 feet, the Yates at 1,255 feet, the Queen at 1,710 feet, the Grayburg at 1,885 feet and the Canyon at 6,891 feet on kelly bushing elevation of 2,601 feet.

REEVES OPENER

Gulf Oil Corp. No. 6 S.E. Ligon-State has been completed as an uni-dentified gas strike in Reeves County, 17 miles southeast of Pecos.

The operator reported a calculated absolute open flow potential of 13,000,-000 cubic feet o gas per day, through perforations from 6,1253 to 6,497 feet. The pay was acidized with 400 gallons and fractured with 42,000 gal-

Total depth is 6,700 feet and 5.5-inch pipe is set at 6,699 feet. The plugged back depth is 6,545 feet.

The well is one location south of Gulf No. 4 Ligon which recently was completed as a Cherry Canyon gas discovery through perforations from 6,160 to 6,178 feet.

The No. 6 S. E. Ligon-State is 2,500 feet from south and 4,290 feet from west lines of section 16, block 7, H&GN survey

It topped the Lamar at 4,993 feet, the Bell Canyon at 5,022 feet and the CherryCnyon at 5,846 feet on ground elevation of 2,594 feet.

EDDY STRIKE

Florida Gas Exploration Co., operating from Midland, announced completion of a Wolfcamp gas discovery in Eddy County, 40 miles southeast of Carlsbad.

No. 7 Ross Draw Unit, it finaled for a calculated absolute open flow potential of 12,473,000 cubic feet of gas per day, through perforations from 12,318 to 12,354 feet.

The discovery flowed condensate at the rate of 218 barrels per day, through a 12/64-inch choke, based on a one-hour flow.

The total depth is 14,441 feet, and the plugged back depth is 13,500 feet. Operator set 4.5-inch liner at 12,739

Florida Gas, the oprator, owns 33.3 percent working interest in the well and in a surrounding 2,859-acre tract. Identical working interests are owned by subsidiaries of ACF Industries, Inc., and Chessie System, Inc.

The location is 1,980 feet from south and east lines of section 26-26s-30e.

DEEP LOVING TEST Getty Oil Co. announced location

for the 22,250-foot Loving County wildcat.

It is No. 1 Malcolm R. Madera and others, 695 feet from north and 2,352 feet from west lines of section 5, block

Upton sites announced

A 2,300-foot wildcat replacement has been spotted seven miles southeast of McCamey in Upton County.

It is C. Louis Renaud of Midland No. 2 Pennzoil-Mayhew, 2,000 feet from north and 467 feet from west lines of section 8, GC&SF survey.

The project is a replacement for the same operator's No. 1 Pennzoil-Mayhew and one location southwest of that project. The new location is 3/8 mile west of the depleted San Andres discovery well of the Webb-Ray field and 3,600 feet northwst of the two-well Sugarloaf (Grayburg) pool.

Renaud drilled No. 1 Pennzoil-Mayhew to 2,286 feet, set pipe and perforated from 2,248 to 2,250 feet and from 2.251 to 2.259 feet.

Swab tests recovered a trace of oil

UPTON STEPOUT

Wayman W. Buchanan of Midland staked his No. 3 Cowden and others as a 1/2-mile west stepout to production in the Spraberry Trend Area pool of

Upton County. The project, 19 miles north of Rankin, is 1,320 feet from north and east lines of section 45, block 39, T-5-S, T&P

Contract depth is 2,000 feet.

White joins coal suit

AUSIN, Texas (AP) — Texas consumers should not have to pay increased costs of hauling coal from Wyoming, Attorney General Mark White said Wednesday in joining a lawsuit against three railroads.

White intervened in a suit filed in Marshall-federal court by Southwestern Electric Power Co. (SWEPCO) of Shreveport, La. The utility, which serves customers in East Texas, sued Burlington Northern Railway, Kansas City Southern Railway and the Louisiana and Arkansas

SWEPCO claimed the railroads agreed to ship coal from Wyoming to Texas at \$12.12 per ton, but then tried to raise the price to \$15.86 per ton effective July 31.

"We will fight such actions by the railroads who have monopoly power over coal transportation rates to prevent such unjust and inequitable treatment of Texas consumers," White said.

The attorney general said the utility would be forced to pass on the added coal hauling charge to customers.

Chairman George Cowden of the Texas Public Utility Commission said SWEPCO's customers in Texas would pay up to \$2.8 million more annually for electricity if the railroads' price hike goes unchallenged.

SWEPCO is asking for a preliminary injunction against the railroad to keep prices at \$12.12 per ton. U.S. District Judge R.M. Parker previously granted a temporary restraining order against any price increase 10

Winter heating oil looms as next energy headache

By LEE GOULD

WASHINGTON (AP) - The nation may be sweltering in August's heat and humidity, but authorities are looking ahead with new concern about how people will stay warm this win-

One pessimistic report was issued Wednesday by House investigators. Another equally dim report by private surveyors was being released

The issue is home heating oil - its price and availability. Wednesday's House report concerned itself with availability. Previous reports on pricing have suggested the cost could jump at least 15 cents a gallon, approaching \$1 a gallon in some areas.

The staff report of the House Small Business subcommittee on antitrust and restraint of trade said many heating oil distributors are behind schedule in filling customers' tanks. The National Oil Jobbers Council

has surveyed 6,500 independent oil dealers and was to release its report

The House report noted that staff members surveyed heating oil jobbers in Iowa and that "76 percent ... report their summer fill of home heating oil tanks is running behindlwhere they normally would be at this time of the year.

"Most reported that they were sub-stantially behind schedule, and few foresaw any prospect of catching up before the fall," said the report to Rep. Berkley Bedell, D-Iowa.

The Carter administration has pledged that the country will have 240 million barrels of heating oil in storage by Oct. 1. Administration officials have told congressional committees

be asked to curtail gasoline production in the fall if necessary to meet the heating oil goal.

The House report said there were indications recent increases in distillate fuel, such as heating oil, in oil company storage tanks may be the result of reduced or postponed shipments of heating oil - not because of

any increase in the overall supply. 'The statistics for the amount of distillate fuel in inventory are mis-leading," the report said. "While it may appear that the national stockpile of distillates now is growing rapidly, this may be offset by a growing shortage of fuel at the local level."

To meet the administration's stockpile goal, the nation's refineries would have to increase supplies by an average of nearly 8.5 million barrels per week. But the American Petroleum Institute says supplies of distillate fuel oil increased about 7.9 million barrels in the week ending July 27 more than a half-million barrels short

Speaking of Carter's heating oil stockpile goal, Alan Darrow of the National Oil Jobbers Council commented: "Even if the goal of 240 million barrels is reached, there may still be trouble. The problem ... is it doesn't do any good to have the oil in the refineries if it doesn't reach the homeowner." He explained that the move from refinery to home can take

There were these other developments Wednesday: -William J. Watt, chairman of the

Midwestern Regional Advisory Board to the Energy Department, said fed-

eral officials may be lulling Americans into abandoning energy conservation. Watt said the projection of sufficient heating oil supplies is "a phony statistic."

Former Energy Secretary James Schlesinger's "forecasts of adequate heating oil stockpiles at the refinery level have amounted to an announcement that the fuel pinch has ended," Watt said. "The facts do not bear that out." He added that "spot surveys in several states ... indicate that jobbers and distributors have below-normal inventories."

—In dealing with a more immediate problem, the National Governors' Association asked President Carter to rescind or suspend new rules that give them the power to increase service station profit margins.

New paving method found

WASHINGTON (AP) - The era of asphalt paving may come to an early end thanks to development of a new sulfur-based substitute the Federal Highway Administration says is as good or better.

The federal agency called development of Sulphlex "timely" because asphalt, a petroleum-based product, is expected to be in increasingly short supply. The new material, developed by Southwest Research Institute in San Antonio, Texas, should be cheaper and more plentiful.

Houston firm schedules

Independent Exploration of Houston announced location for a pair of wildcats in Scurry County, six miles south of Snyder.

Each will be drilled to 8,000 feet. The No. 1-A J. W. Byrd is 467 feet from north and 1,441 feet from west lines of section 131, block 3, H&GN survey. It is 5/8 mile southwest of the same operator's No. 1 Byrd which is bottomed at 7.800 feet waiting on completion unit. That project will attempt to complete from a zone at approximately 6,700 feet.

Independent Exploration Co. No. 1-B J. W. Byrd will be drilled 5/8 mile southwst of No. 1-A Byrd. The drillsite is 1,889 feet from north and 783 feet from east lines of section 146, block 3, H&GN survey.

The projects are 3/4 mile northwest of shallow production in the Sharon Ridge, Northeast field.

LUBBOCK TESTER Banam Corp. of Midland No. 1

Alexander is a new 11,000-foot wildcat in Lubbock County, five miles west of Woodrow. It is one location east of a 5,520-foot dry hole, and there is no nearby production.

Location is 462 feet from south and 11,796 feet from west lines of section 128, F. T. Brooks survey.

CROCKETT ACTIVITY

Operators have reported seven new wells and three new field area projects in Crockett County. Blue Ridge Oil & Gas Exploration,

Inc., of Detroit, Mich., completed five extension wells in the Adams-Baggett Ranch (Canyon sand) gas field, approximately 26 miles south of Ozona. The operator finaled No. 2 Arthur Phillips 3/4 mile northeast of other Canyon gas production for a calculated absolute open flow potential of 5.000,000 cubic feet of gas per day... Completion was through perfora-

tions from 4,916 to 5,144 feet after 500 gallons of acid and 65,260 gallons of fracture solution. The well is 1,320 feet from south and

east lines of section 3, block O, J. Hardin survey. Blue Ridge No. 3 Arthur Phillips,

3/4 mile northwest of other production, completed for a calculated absolute open flow potential of 3,250,000 cubic feet of gas per day, through perforations from 4,997 to 5,193 feet after 500 gallons of acid and 5,260 gallons of fracture solution.

Location is 1,320 feet from south and 3,960 feet from west lines of secton 3, block O, J. Hardin survey.

The same operator's No. 4 Arthur Location is 933 feet from north and Phillips, 3/4 mile northwest exteneast lines of section 18, University sion, potentialed for a calculated absolute open flow of 2,510,000 cubic feet of gas per day, through perforations from 4,942 to 5,084 feet. Empire Drilling Co. of Dallas will
