The Midland Reporter-Telegram

NEWS IN BRIEF

Trial to begin

FORT WORTH, Texas (AP) - A young prosecutor goes be-fore a jury today to spell out the state's murder-for-money case against millionaire industrialist

The opening statement by chief prosecutor Jack Strickland, 36, was to be the prelude to testimony from perhaps a dozen or so state witnesses.

Copter crashes

ATHENS, Greece (AP) - A U.S. Marine Corps helicopter taking part in military exercises in northern Greece crashed early today, and its two crewmen were killed, U.S. officials

'Wrap up' due

AUSTIN, Texas (AP) - Federal prosecutors say they will recall Jimmy Chagra's sister to the witness stand this week as they wrap up their "Colombian Connection" dope smuggling case against the Las Vegas

Testimony in the federal court trial, which began Aug. 1, resumes today after a weekend in which Chagra planned to fly to Las Vegas to see his newborn son for the first time.

Tremor felt

By The Associated Press

A small, pre-dawn earthquake centered in Tennessee rattled windows, but apparently caused no damage in portions of three Southeastern states, the U.S. Geological Survey reported

The tremor registered 3.7 on the Richter scale and was felt widely in southeast Tennessee, southwest North Carolina and north Georgia, including Atlanta, the USGS said.

The survey's National Earthquake Information Service at Golden, Colo., said the quake was centered about 50 miles northeast of Chattanooga - in McMinn County.

Bell takes post

ATLANTA (AP) - Attorney General Griffin Bell, who leaves the Justice Department this week, will become an unpaid, part-time "troubleshooter" for President Carter, The Atlanta Constitution said in today's edi-

Bell, who made a pledge to the Senate Judiciary Committee during his confirmation hearing that he would not take part in the 1980 presidential campaign, is to rejoin the influential Atlanta law firm of King and Spalding where another Carter adviser, Charles Kirbo, is a partner.

Oil slick still 20 miles from shore

CORPUS CHRISTI, Texas (AP) -Northerly currents are carrying sheen from the world's largest oil spill along the South Texas coast, but scientists say the oil is 20 miles off land and following the contours of the shoreline - at least for now.

"It's still going northward, but it's not going in a straight line to the beach," said Roger Meacham of the Environmental Protection Agency. "It will take some change in the wind and surface conditions for that to change.

The National Weather Service forecast no change today or Tuesday in the seasonal weather driving the cur-

Although nearly \$1 million of U.S. money has been spent cleaning up Texas beaches stained by the oil from a runaway Mexican well in the Gulf of Mexico, the U.S. Justice Department does not intend to sue Mexico for damages, Attorney General nominee Benjamin Civiletti said Sunday.

The threat of legal reprisals against Mexico would be a "silly proposi-tion," Civiletti said at the annual convention of the American Bar Asso-

Civiletti said President Carter had not asked the Justice Department to enter discussions over the spill and added that he did not think his agency should become involved.

A Coast Guard task force was braced to clean the threatened beaches last week, but wind and ocean currents stalled the globs of oil. Some tar balls washed ashore, and specially equipped Coast Guard vacuums have been scooping them off the

U.S. Sen. John Tower, R-Texas, toured the coast Sunday in a Coast Guard helicopter. After finding the tourist-filled beaches virtually clear of goo, he quipped:

"The beaches are cleaner right now than they ever have been in Miami

Meanwhile, two sea birds that apparently dived into the slick while hunting fish became the spill's first known waterfowl casualties, officials said. The two blue-face boobies found over the weekend were killed by oil contamination, officials said.

Coast Guard pilots said sheen from the runaway Ixtoc I well blanketed much of the water offshore from Brownsville at the tip of Texas, 30 miles up Padre Island to Port Mansfield. That sheen was about 30 miles away from the beaches, Meacham

Ribbons of mousse - heavier concentrations of oil mixed with seawater - were spotted about 20 miles offshore at Brownsville. Some were 10 miles long and 90 yards wide, Meacham said

The well 500 miles south of here has been spewing 30,000 barrels of crude into the Gulf daily since it blew out June 3. Mexican officials said they have slowed the flow by stuffing lead and steel balls into the well, and said they might know this week if this will cut the flow enough to allow them to seal the wellhead.

As a precaution against the advancing sheen, the Coast Guard plans to install a 2,000-foot long boom and a skimmer at Port Aransas, north of

Collapse of dam kills about 1,000

1,000 persons were killed following the collapse of a dam in western India that unleashed a wall of water nearly 20 feet high on the town of Morvi and buried it in mud.

"I am deeply shocked at the enormous loss of precious lives and destruction of property caused by the sudden floods," Prime Minister Charan Singh said in a message to the chief minister of Gujarat state, Babubhai Patel.

Singh sent Agriculture Minister Brahm Perkash to Morvi to survey the flood damage.

Earlier a former mayor of the town said he feared the death toll would run as high as 5,000. That would have made it the world's worst dam disaster, more than double the previous record toll of 2,300 at Belluno, in northeast Italy, in 1962.

Troops were ordered to the town 300 miles northwest of Bombay to help dig out the bodies and care for the

NEW DELHI, India (AP) — All-highways and rail lines washed out by India Radio reported today that about the weeks of monsoon rains that weakened the dam.

Indian news agencies reported that the downpours swelled the Machu River until it flooded over the top of one dam and collapsed an earth dam below it. The dam break sent a flash flood down on Morvi, four miles downstream, late Saturday while most of the 60,000 people of the town

were asleep.

The flood destroyed the city's telephone exchange, and word of the tragedy did not get out until Sunday morning. The waters drained off quickly, and the first reporters to reach the city reported parts of it were blanketed by mud that reached the second floors of some buildings.

Keshubhai Patel, the agricultural minister of Gujarat state, said about 5,000 houses were destroyed of badly damaged.

Bodies were scattered along the streets and roadways. The body of one girl was impaled on a timber in survivors, but they were delayed by the wreckage of her home.

George Abell dies at 79; Rites scheduled Wednesday

George T. Abell, 79, pioneer Midland independent oil operator and founder of the Permian Basin Petroleum Museum, Library and Hall of Fame, died early today in a Midland hospital following a long illness.

Services will be at 10 a.m. Wednesday in the First Presbyterian Church with Dr. Ray Riddle officiating. Interment will follow in Resthaven Memorial Park directed by Newnie W. Ellis **Funeral Home**

Abell was born Aug. 8, 1900, at Wakeeney, Kan. He was graduated from Colorado A&M College in 1923 with degrees in civil and irrigation engineering and mechanical engi-

He came to Midland in 1927, and since that time, he had devoted much of his time, energy and personal resources to West Texas, particularly the Permian Basin.

Abell trained himself as a geologist and began his petroleum career as an independent oil operator in 1930. He became successful in this field and always felt obligated to return to the area part of what he had earned. This process had gone on so long and so quietly that much of it never will be

George T. Abell

By SUSAN TOTH

One bunch of Midlanders isn't that worried about dollar-a-gallon gaso-

Even at that price, they can fill their tanks and be ready to travel another 100 miles for less than 75

They are part of the growing number of Midlanders on mopeds.

The motor-assisted bicycles are appearing everywhere lately, with all manner of people on them, from businessmen with their ties flapping over their shoulders on downtown streets to matrons whizzing to the local shopping centers.

The warm weather, a sense of ad-

State corrections officers stand guard at a road-

block near a rural Gardiner, N.Y., house where

escaped inmate Richard Gantz, 28, Queens, was

beleived holding as many as six hostages. Hostages

were identified as four members of the Lester

venture and the ability to thumb one's nose at gas station attendants all contribute to sales of the small vehicles, Midland salesmen said.

'We've sold a herd of them lately," according to Greg Bonner of a local outlet. He noted the business he works for has sold 70 of them in the last

Everyone from school teachers and students to elderly and young couples couples have come in for the gasstingy little cycles, he said.

'We had one couple over 80 years old who bought them just for fun, I think," Bonner said. The cycles cost from less than \$400

to well over \$600, get 100 to 160 miles

to the gallon of gas depending on the

make, model and weight of the rider.

and don't travel more than 30 miles an hour. Motorcycle laws generally apply to

the vehicles. Riders must pass a written exam, but no driving test is needed before a new buyer legally can take his purchase on the road

Helmets are required only for riders under 18. License plates and inspection stick-

ers must be in evidence on the vehicles, according to a Department of Public Safety spokesman. The license plates, however, cost only \$5 a year, and the only items to inspect on the little buzzers are brakes, headlamps and reflectors.

The new interest in extremely economical transportation has brought mopeds from some of the major motorcycle manufacturers recently.

One model, a small motorcycle without the bicycle pedals, has sold so well, "We've been sold out of them the last six months," a spokesman for another Midland retail outlet said.

According to Jim Foster, owner of a third local moped sales shop, the manufacturer he represents has just produced a 1980 model that is selling well here.

The mopeds "will be a good item as long as the gas situation stays," Foster said. Most of his sales have been to adults

looking for basic running around material rather than teens, he said. The mopeds, he said, "are handy if

you use them. If you're going to use one to go to the grocery store or to

work so you don't have to break out the station wagon for a two mile trip, they're really worth it.

"If you really use it, it can save some money for you and some gas for the country. That's really what it's all about," Foster said.

One disadvantage of the new popularity is "a whole bunch of little moped companies popping up," he said. Buyers should take care to choose a dealer who will be around for parts and service if it is needed later, he warned.

"We make no money at all on mopeds right now," he noted. "The profit is not that much.

"It's kind of a new thing for us," Foster added. "We'll just have to wait and see how it turns out."

Philadelphia police faced with unprecedented lawsuit

PHILADELPHIA (AP) - The federal government charged the City of Philadelphia today with allowing its police to pursue policies of brutality and harassment that "result in widespread, arbitrary and unreasonable physical abuse which shocks the con-

The unprecedented lawsuit, the result of an investigation that began eight months ago, seeks an injunction against "such unconstitutional and other unlawful acts" and to cut off all federal funds for police services until the policies are changed.

The complaint filed in U.S. District Court charges Mayor Frank L. Rizzo and other city and police officials with violating provisions of the U.S. Constitution that protect the freedom of people to travel and transact business and that bar discrimination on the basis of race, color or national ori-

Assistant Attorney General Drew S. Days III called the lawsuit "unique" and said it "challenges the practices of the Philadelphia Police Depart-

ment in regards to systematic citizen abuse and brutality."
Days said that Philadelphia is the

first city to be faced with such a sweeping complaint. Similar investigations are now under way in Houston, Memphis, Tenn., and Mobile,

Rizzo, interviewed today outside his City Hall office, said Philadelphia is free from police brutality. "I've

never seen any," he said.
"Policemen overreact sometimes, yes. But so does a newspaper reporter

overreact. So does the president. So does the Justice Department," said Rizzo, a former police commissioner.

"I hope we're not going the way of Iran, that policemen, just because they wear a blue uniform, are summarily rounded up and executed."

Rizzo used to brag that Philadelphia police are tough on lawbreak-

When he visited Rome in 1977 shortly after the abduction of Chistian Democrat Party president Aldo Moro, he boasted that Italian kidnap-

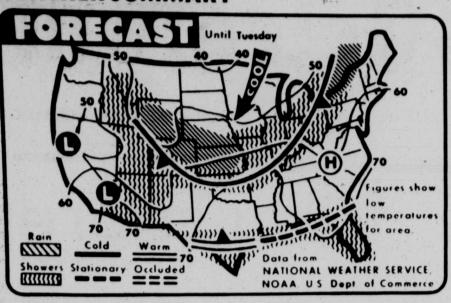

pers would "never get away with it in my city We'd grind 'em up, grind 'em

But over the years, dozens of civil suits have been filed in state and civil courts seeking millions of dollars from the city and policemen for false arrests, injuries and lost jobs.

Newsweek magazine reported Sunday that a suit - the first filed against an entire urban police department would charge "widespread and sys-

tematic police brutality.'

WEATHER SUMMARY

Widespread areas of rain and showers are expected until Tuesday morning from the eastern Rockies across the Plains and Midwest to western New England and from southern Texas to Florida. The northern Plains are expected to be cool, but most of the country is expected to have warm weather. (AP Laserphoto'

Extended forecasts

Wednesday through Friday

North Texas: Partly cloudy and mild. Scattered thun-derstorms. Wednesday and Thursday. High tempera-tures 85 to 95 and lows 65 to 75.

South Texas: Showers and a few thundershowers must partially ast portion Wednesday and over all of the area Thursday and Friday. No important temperature changes. Highest temperatures in the upper 80s and 90s. Lows mostly in the 70s.

Border states forecasts

Oklahoma: Fair and warmer today, partly cloudy with scattered showers and thunderstorms northwest tonight and statewide Tuesday. Cooler northwest Tuesday. Highs today 8% to 97. Lowos tonight 64 to 74. Highs Tuesday 80s northwest to 90s elsewhere.

New Mexico: Variable cloudiness with thundershowers likely today. Gusty winds and locally heavy downpours possible during storms. Thundershowers lingering through tonight mainly central and east Partly cloudy Tuesday with widely scattered thundershowers. Highs today 60s and 70s mountains, mostly 80s elsewhere. Lows tonight 40s and 50s mountains, 60s at most lower elevations. Highs Tuesday 70s mountains and 80s elsewhere.

Housing finance to be considered by Council

Creation of a non-profit corporation to manage a mortgage program for housing is scheduled to be considered by the Midland City Council when it meets at 1:30 p.m. Tuesday in City Hall Council Chambers.

The corporation, with a proposed name of Midland Housing Finance Corp., would manage funds for home loans to middle-income families. The money would come from sale of revenue bonds. Interest on home loans to the public would be about 81/4 to 81/2 percent.

Charter members would consist of three members of the City of Midland Housing Authority and two from the Midland Housing Association. The council could select up to nine charter members.

Decision to go before the council with the proposal for the organization was made at the Aug. 1 meeting of the City of Midland Housing Author-

Further additions at Midland Regional Airport will be reviewed.

review building plans by the Federal Aviation Administration for a flight service station facility.

The council also will consider construction of new hangars in the Aquila Inc. area and sale of a tract of land to Abbott Building Co.

Up for discussion is replatting four units of Industrial Park at Midland Regional Airport and realignment of streets and the Industrial Park boundary.

The Public Works Department is requesting establishment of "no parking" zones within the city limits and reestablishing school zones throughout the city limits.

The Yellow Checker Cab Co. is slated to ask for increased rates.

Public hearings on various planning and zoning items are scheduled through 3 p.m.

The council also is slated to consider a contract with a consulting firm for assistance to update the city's comprehensive plan.

Yates named chief meteorologist of National Weather Service office

James N. Yates of College Station has been named meteorologist-incharge of the National Weather Service office at Midland Regional Air-

He succeeds James Lunney, chief meteorologist, who has retired. Yates will begin his duties here in Septem-

Yates has 28 years of weather experience. He began his meteorological career in the U.S. Air Force and joined the weather service at Des Moines, Iowa, where he gain widely diversified experience, including weather-radar operations and fore-

casting. He holds the master's degree in meteorology from Drake University

at De Moines The Midland weather service office, in addition to providing area forecasts, has storm-warning responsibi-

lities for an 18-county area. The weather-search radar operates continuously in maintaining surveillance for storm development in a 250-mile radius of Midland Regional

Airport. The Midland office is one 70 weather stations in the Continental United States which twice daily releases instrument-carrying balloons to record pressure, temperature, humidity and wind direction and speed to heights of up to 100,000 feet.

PLO snubs overtures from Carter

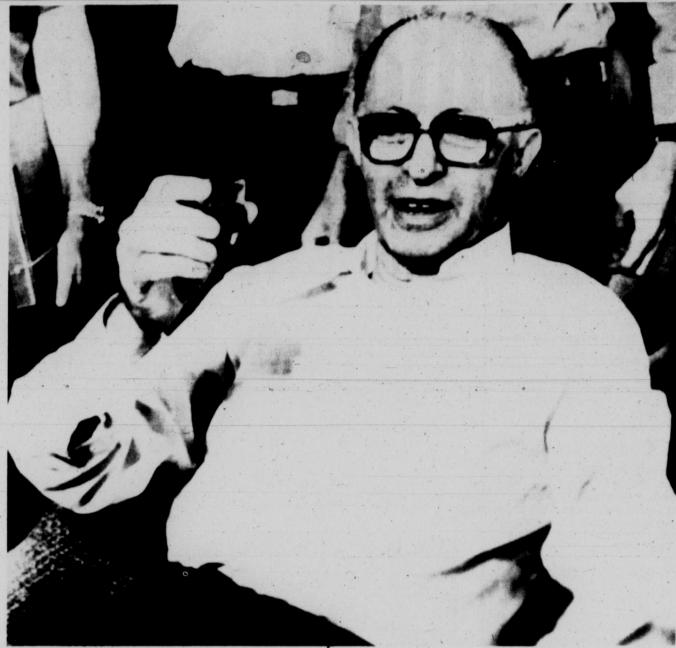

DAMASCUS, Syria (AP) — Yasser Arafat's Palestine Liberation Organization has rebuffed overtures from the Carter administration and again demanded recognition of the Palestinians' right to their own state, in effect killing chances for a change in U.S. policy feared by Israel.

At an often-heated weekend policy meeting, the 57-member Palestine Central Council decided that U.S. feelers toward the PLO were a ploy to divide moderates from radicals in the eight groups under the PLO umbrel-

The council, the PLO's political assembly, decided unanimously to reject any dialogue with the United States "as long as Washington refuses to recognize the PLO and the legitimate rights of our people" to an independent state, PLO spokesman Yasser Abd-Rabbo told reporters after the council meeting broke up Sunday morning.

"Most of the speakers last night were unanimous that what's being said about a dialogue between the United States and the PLO are only maneuvers aimed at clouding the Arab position and dividing the Arabs," he added.

He said the council also decided to reject any modification of U.N., Security Council Resolution 242 - as it already rejects Resolution 242 - that does not call specifically for establishment of an independent Palestinian state and does not recognize the PLO as the "sole and legitimate representative of the Palestinian peo-

ANDREWS - Services for Lizzie Galloway, 94, of Andrews were to be at 4 p.m. today in McCoy Funeral Home in Sweetwater. Burial was to be in Noland Cemetery near Swee-

Mrs. Galloway died Saturday in an Andrews hospital after a short ill-

She was born July 9, 1885, in Anderson County. She had lived in Andrews 12 years, moving there from Sweetwater. She was a member of the First Baptist Church of Andrews.

Survivors include a daughter, Erlene Payne of Andrews; a stepdaughter, Leta Mae Robinson of Whitman; a stepson, Walter Black of Houston; three sisters, Ethel Holt and Ida Belle Rotan, both of Noland, and Susie Barnett of Clovis, N.M.; two brothers, Wayne Howell of Sudan and Walter Howell of Amarillo; two grandchildren, four great-grandchildren and 10 stepgrandchildren.

Mrs. Roy Odom

BIG SPRING - Services for Mrs. Roy (Oneita) Odom, 78, of Big Spring were to be at 10 a.m. today in Nalley-Pickle Funeral Home Rosewood Chapel. Burial was to be in Trinity Memorial Park. Mrs. Odom died Friday at her resi-

dence after a lengthy illness.

She was born Feb. 7, 1901, in Richland Springs. She was married to Roy Odom June 1, 1930, in Regency. They moved to Big Spring in 1934 from Brownwood. She was a school teacher, retiring in 1968.

Mrs. Odom had taught at Bauer Elementary School. She was a member of the First Baptist Church 45 years where she also taught Sunday School in the beginners department for many years.

Survivors include her husband: three sons, James Roy Odom of Fort Worth, Harold Odom of Miami, Fla., and Paschal Odom of Big Spring; a sister, Valita Barry of Dallas, five grandchildren and a great-grandson.

Bea Williams

WAURIKA, Okla. - Services for Bea Williams, 69, sister of Evie Lee Pace of Midland, were held Saturday in the First Baptist Church here with the Rev. Carl Schooling, associate pastor, officiating.

Burial was in Waurika Cemetery directed by Worley and Sons Funeral

Mrs. Williams was born March 21, 1910, near Waurika and was married to Leon Williams in 1938 in Duncan, Okla. She was a Baptist.

Other survivors include her husband, two sons, a brother and four grandchildren.

George Abell

(Continued from Page 1A) every worthwhle endeavor launched

here in the last 35-plus years. Abell was a member of the Board of Education of the Midland Independent School District from 1946 to 1950, serving as chairman in 1949-50. The present Midland High School was built during his tenure on the board. He was awarded a life membership in

the Texas Congress, Parent-Teacher

Association, in 1949. He was chairman of the first capital funds campaign for Midland Memorial Hospital in 1945-46 and was a charter member of the hospital's board of trustees He served as president of the

board in 1951-52. He had devoted much time to the Boy Scouts of America and had served in various official capacities in

the Buffalo Trail Council. He was a leader in the capital fund campaign which raised funds to purchase the 6,000-acre Boy Scout Ranch in the Davis Mountains area. He held the Silver Beaver Award, the highest award of the Boy Scouts.

Abell long had been active in the Independent Petroleum Association of America, Texas Independent Producers and Royalty Owners Association, Mid-Continent Oil & Gas Association and the Permian Basin Petro-

leum Association. The Permian Basin Oil Show, Inc., in 1962, presented Abell its top award for service and contributions to the

petroleum industry. He was a charter member of the Permian Basin Petroleum Pioneers Association and had been a member of the Midland Downtown Rotary Club since 1937.

He and Mrs. Abell had been recognized by the Texas Historical Foundation for their interest in historical work statewide. They sponsored the first Texas State Historical Marker, which was erected at Camp Ford, near Tyler. They also had received an appreciation award for their interest in historical preservation from Gov. John Connally

The Midland Rotary Club had recognized Abell for contributions to the civic, cultural and educational betterment and growth of Midland.

Abell was a member of the Oil and Gas Unit of the National Defense Executive Research for the U.S. Department of Interior from 1962 to

The Aeroplane Museum at the Midland Regional Airport was built under Abell's direction and was presented to the citizens of Midland by Mr. and Mrs. Abell and the Abell-Hanger Foundation.

While a member of the board of directors of the Midland Chamber of Commerce a number of years ago, Abell, along with other community leaders, originated the idea for the Permian Basin Petroleum Museum, Library and Hall of Fame. He spent much time and effort in collecting antique oil field equipment on display there. Many of the oil paintings of historical events which hang in the museum were researched by Abell and commissioned by the Abell-Hanger Foundation.

He was inducted into the museum's Hall of Fame several years ago. Mr. and Mrs. Abell received the

West Texas Chamber of Commerce Cultural Achievement Award in 1973. In 1978, he received the Public Service Award given by the American Association of Petroleum Geologists.

He was a member of the First Presbyterian Church of Midland. Survivors include the widow; a so

Duane H. Abell, San Antonio; a siste Ester A. Denton of Midland, and tw brothers. Walter Abell of Midland ar Wallace Abell, Amarillo.

The family has asked that memo als be directed to the Permian Bas Petroleum Museum, First Presbyt rian Church, Midland Memorial Ho pital or Trinity Towers.

Slight chance for showers included in forecast

The weatherman was expecting some showers this afternoon, but otherwise Midlanders should see partly cloudy skies through Tuesday with a warm afternoon Tuesday.

According to the National Weather Service office at Midland Regional Airport, Midland had a 20 percent chance for thunderstorms this afternoon. However, rain was not mentioned in the forecast for tonight or Tuesday.

Low temperature tonight should be in the upper 60s and the high on Tuesday should climb to near 90.

Winds tonight should be light and

The high temperature on Sunday was 84 degrees, a comfortable read-ing compared to the record scorcher

of 107 degrees set in 1936. Low this morning was 69 degrees, which failed to match the 61-degree reading set in 1931.

Elsewhere, thunderstorms hit far southwest Texas about midnight and continued into the pre-dawn hours today. El Paso got .28 inch of rain from one of the storms.

Robbery reported at convenience store in Odessa

ODESSA - Two neatly dressed men robbed an Odessa convience store Sunday night.

The two men were in their late teens, witnesses told police. The pair entered the Colonial Food Store on Second Street and Crane Highway at 11:30 p.m., officers were told. One of the men had his hand in his

Shirley Sargent, right, with her mother, conservationist and an ecologist who dis- ley. Her contention is that the park belongs to Alice Sargent, says, "My idea of heaven is to agrees with a proposed plan to remove lodging the public — all of it. (Los Angeles Times camp out, pack in by mule and camp out. No and other tourist services from Yosemite Val- Photos by Mary Frampton) phone, no watch, no mirror." Ms. Sargent is a

Remarkable woman devotes life, affection to Yosemite National Park

By URSALA VILS The Los Angeles Times

YOSEMITE, Calif. - The view is classic: the granite magnificience of El Capitan to the north, dazzling Bridalveil Fall to the south, verdant Yosemite Valley below, the great peaks, still snow-capped, stretching north, south and east.

This is Yosemite National Park, 1,189 square miles of spectacular scenery that has captivated visitors since 42 white men became its first tourists in 1855.

It also is the major interest and chief passion of a remarkable woman, Shirley Sargent, publisher, author and historian, chronicler of Yosemite's past, lover of its present and a citizen concerned for its fu-

SHE FELL IN LOVE with Yosemite at age 9, in 1936, when her father - jobless because of the Depression - took his family there while he worked as an engineer during construction of the modern Big Oak Flat and Tioga roads.

That same year, a rare crippling disease, dystonia musculorum deformans, began to afflict her. It did not, however, prevent her from climbing 13.055-foot Mt. Dana - "part of my credentials at Yosemite.

By 14, she was confined to a wheelchair, "but I didn't pay any attention

Indeed, she propels herself easily and quickly around Yosemite, zipping backwards in her wheelchair. She drives her own car and lives alone even snowbound for months in winter - on a forested spur of land 12 miles west of Yosemite Valley.

She also goes camping in the park's remote areas, always with a compan-

"My idea of heaven," Shirley Sargent says, "is to camp out, pack in by mule and camp. No phone, no watch, no clock, no mirror. I even have taken my three-wheel bike to two High Sierra camps."

SHIRLEY SARGENT lives in a cabin set on a 21-acre parcel of wooded land overlooking the Merced River Canyon about 12 miles outside of Yosemite. She built the house in 1962 and lives there alone, except for a cat aptly named Purr.

A petite woman, she pedals about the place on a large three-wheeled bike rigged with a small electric motor to help on inclines.

In the summer, she sleeps outside on a second-story porch, and she works in a knotty pine-paneled office in her home. The room is ringed with shelves containing books and her collection of Yosemite memorabilia post cards, photos, stereopticon slides, brochures.

Paintings, photos and drawings of Yosemite hang throughout the house, along with family pictures.

She calls the place Flying Spur, after the jutting piece of land on which it is built. The publishing business she shares with author Hank Johnston is the Flying Spur Press, which produces books, a Yosemite calendar, a line of postcards reproducing early Yosemite scenes and a bright chartreuse bumper sticker proclaiming "Happiness Is Yose-

JOHNSTON LIVES directly across the canyon from Ms. Sargent, and they communicate by CB radio -"I'm Three-Wheeler and he's In-

Although both publish elsewhere as well as through Flying Spur Press, we formed the publishing company because we felt we ought to get a larger share of the profits.

"I have been writing seriously since I was 21," Ms. Sargent says. "I have done 21 books - a few I did only the foreword and the footnotes - and I

have free-lanced articles to maga-

Her "John Muir in Yosemite" has sold about 20,000 copies over the years. Johnston's "Short Line to Paradise" and Sargent's "Pioneers in Petticoats," both Flying Spur publications, are steady sellers, about 1,-000 copies each annually, she said.

Her books are everywhere in Yosemite's shops - "The Ahwahnee: Yosemite's Classic Hotel," "Yosemite and Its Innkeepers" and the newest, "Yosemite's Historic Wawona."

She has researched her historical projects at museums and libraries throughout the country, notably at California institutions ranging from the Huntington Library in San Marino to the Mariposa courthouse to the Bancroft Library at the Univesity of California, Berkeley.

MS. SARGENT ALSO is compiling and indexing an archive for the Yosemite Valley and Camp Curry Co., which has found an array of memorabilia among the company's property.

"I found some things in back of plywood and chicken wire, with a dead mouse and a live mouse," she said, "boxes of stuff - and nobody knew what they had.'

The "stuff" includes albums of Ansel Adams pictures taken when the famed photographer worked for the Curry Co., reels of films that apparently were shown for guests and brochures dating back to the 1920s.

Shirley Sargent is never far from history, least of all in her own home. She stood by a large stone fireplace around which the house was built.

The fireplace was all that was left of a house that burned in 1936," Ms. Sargent said. "It had been a big house built by Theodore S. Solomons, a charter member of the Sierra Club, a man who did much of the early mapping of the John Muir Trail (in Yosemite).

A conservationist and ecologist, Ms. Sargent nonetheless disagrees with a proposed plan to remove lodging and other tourist services from Yosemite Valley. Her contention is that the park belongs to the public all of it.

THE DAY IS SPARKLING and fresh as Shirley Sargent, visibly excited at the prospect, starts out to shows visitors her Yosemite. First destination is "my favorite place -Tuolumne Meadows

The trip, over the Big Oak Flat and Tioga roads her father helped build, winds through forested mountains and spring-green meadows, past icy lakes and cascades roaring with winter's melting snow.

On especially spectacular cascade. a fork of the Tuolumne River, spills down a mountainside, disappears under a bridge and emerges again to continue tumbling downward.

Ms. Sargent quotes John Muir, naturalist and pioneer ecologist who first came to Yosemite in 1869: "The snow is melting into music."

Past Siesta Lake ("There are prettier lakes coming"), she points out a spectacular vista, a chain of whitecapped mountains in the far distance: 'Those are the north passes of the

SHE ALSO INSTRUCTS visitors in Yosemite terminology.

"Sierra is plural, meaning a range of mountains, and to say Sierras is incorrect," she says. "And it's Bridalveil Fall because it is just one fall, but Yosemite Falls because there are more than one.

At 8,000 feet, near Lake Lukens, Ms. Sargent points out Mt. Hoffman, the geological center of Yosemite -That will give you some idea of just how large the park is."

She identifies a tumbling stream as the waters that become Yosemite Falls and points out one peak after another: Clouds Rest, Mt. Clark ("named for Galen Clark, one of my heroes, the first guardian of the park. I wrote a book about him once, too."), Mt. Starr King, and Mr. Conness.

ACROSS TENAYA CANYON, melta granite dome, and the blue water of Tenaya Lake glistens in the sunlight.

Along the way, Ms. Sargent points out the changing flora: Sugar pines with their ragged tops at lower elevations, lodgepole pines, firs and red firs at higher altitudes, scrubby junipers stunted by wind and weather higher on.

And birds: "That's not a blue jay, but a Steller jay, and there's a Clarks crow. And look - there's a seagull from Mono Lake."

She thrills to it all. "This is so neat," she murmurs. "God's coun-

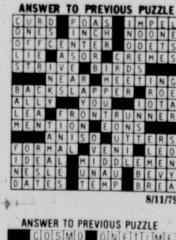

Around a bend and down a hill, Tuolumne Meadows spreads out, a snow-patched brown marsh that will become a green valley later in the

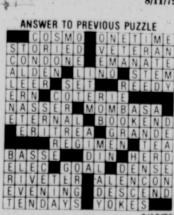

She sees the sights of her childhood: the spot, now part of a ranger camp, where she, her parents and younger sister lived two summers while her father helped engineer the Tioga road; the public campground where tents are being put up for summer visitors, a wooden-sided tent that is "a general store, a greasy spoon and a little post office all under one

SO SHIRLEY SARGENT shares her beloved Yosemite. She sits on the low edge of the classic viewpoint just beyond the Wawona tunnel, gazing at a panorama she never tires of, and advises a pair of travelers to look up to their right, where Silver Strand Fall snakes down a granite cliff.

Most people miss it," she says, "because they are looking out (at Bridalveil), not up.

She turns back to the view - El Capitan, Bridalveil, the valley floor. "You know," she says, "Ralph Waldo Emerson once said of Yosemite, 'It is the only place that comes up to the brag and exceeds it."

BUSINESS MIRROR Chrysler crisis could set pattern for future

AP Business Analyst

NEW YORK (AP) - To be or not to be, that is the question ... whether it's wiser economically to let a weakened corporation fail or instead support it with government subsidies or loan guarantees?

To let Chrysler Corp. fail, say its supporters, would mean a sea of troubles for all Americans. For the federal government to provide any extraordinary aid to Chrysler, say others, will mean the very-same.

Already a sea has engulfed Americans, a sea of questions that must be answered, because what happens to Chrysler could be the answer to what happens to similarly stricken companies in years to come. And that involves the political and economic systems under which we'll live.

Though no other giant companies are now believed to be in such dire straits, some of them conceivably could fall into difficulties similar to those that beset Chrysler.

Such companies are large, "mature," slow-growing; they often carry a baggage of executive bureaucracy, inefficient plants and debt. In some instances they are complacent; in others they are fighting frantically

and often futiley.

Where do YOU stand on the Chrysler crisis?

Chrysler Corp., the nation's 10th largest manufacturing corporation, one of the most important defense contractors, employer of more than 250,000 workers, has been hemorrhaging financially. It could die.

To avert this fate, the company has sought a \$1 billion advance against federal income taxes. The Carter, administration has indicated instead that it might guarantee up to \$750 million in private loans.

And so the questions: Isn't it the American way to permit corporations a profit as the reward for efficiency, and to allow them to die when their lack of competitiveness causes them to lose money? If the government saves Chrysler,

won't it be at odds with its own goals to reduce inflation by making industry more productive? Shouldn't Chrysler be permitted to die to make room for efficient competition?

If we do let Chrysler die, how do we

ease the financial burdens on families whose lives are disrupted? How do we prevent the demise of Chrsyler from ruining its thousands of suppliers?

Wouldn't the death of Chrysler make the nation's defense less secure? Isn't it a public necessity if not a financial success? Why then do we attempt to value a company by economic measurements only?

Still, why should all Americans support a corporation that, despite any public role it serves, dispenses most of its benefits to only a select number of communities, employers, shareholders, and suppliers?

Shouldn't they, and the financial institutions that lent them money (on the assumption they would make more money in doing so), assume the primary burdens? What does the public really owe to these people?

Can't government help by lessening the regulatory burden? Can't the banks renegotiate their positions? Can't the shareholders not only forgo dividends but permit more shares, preferred shares, to be sold?

Will management, white collar workers, union members offer to help? Will executives dispense with bonuses and stock options? Will unions agree to accept a lesser contract, to fight absenteeism?

And suppliers? Automakers are perceived as producers, but they are mighty consumers: of metals, plastics, glass, rubber, fabrics, of advertising space and time, of accounting skills. If Chrysler has a chance, shoulldn't these suppliers be willing to assume risk?

And, if only in self-interest, don't owners of Chrysler products have more of an obligation to the company than does the general public? And don't state and local governments whose taxes and jobs are involved?

Don't look for easy answers they're not to be found. The Chrysler decision involves the type of government and economy we'll live under. While the obligations might seem limited, the implications aren't.

But out of the probing and questioning, out of the considerations of pros and cons, will come at least one great benefit: In the future we'll have a better definition of the roles of government and business.

As matters stand, we really don't know the obligation of each to the

By ARNOLD ZEITLIN

WALPOLE, Mass. (AP) - A convict spokesman predicts more violence at Walpole state prison, Massachusetts' lone maximum security institution and the prison administration doesn't dispute the

"I'm always concerned there will be another incident," said Superintendent Fred Butterworth, who spent 11 hours last month as a inmate hos-

Inmate Peter Ladetto, who has spent 16 of his 46 years behind bars for killing a police officer, was led from his protective custody cell last week to speak to reporters being given a guided tour of the 23-year-old prison. It was the first chance since the July incident that rebel inmates had to talk to reporters.

"Ninety percent of the agreement has not been carried out," said Ladet-

to of the bargain ending the convicts" seige. "Harassment is getting out of hand. The visits are worse. 'The way the visits are now, it's gonna lead to violence. What, I cannot say. A guard could go over a tier on his head.'

Officials say the rebellion was apparently triggered when a woman was denied a visit on July 29 to see her

"The visit should never have been denied," said Butterworth." The whole business should not have hap-

Butterworth denied the agreement was not carried out. Robert Furtado, vice president of the guards' union, said he had seen no evidence backing the convicts' allegations of harassment or brutality. "I've been here seven years, and

I've seen not one incident of brutality," he said. "You're going to hear these allegations, no matter what goes on inside Wa'pole.

Dear Dr. Solomon: Because I seem to be feeling more and more "dragged out," and have been getting frequent stomach upsets, I decided to see a doctor. After giving me a complete workup, he concluded that I am suffering from cirrhosis of the liver. I can't imagine how the doctor arrived at that diagnosis, since my drinking is limited to New Year's Eve - and then only in moderation. How can you explain a diagnosis so far off the mark? Then he wanted to know if I ever had hepatitis. I'm a respectable - maybe even square - citizen and wonder why a doctor would mistake me for either an alcoholic or a junkie. I'm so upset over this that I'm feeling worse than ever and have even been unable to work lately. - Ms. J.E.

Dear Ms. E.: Unfortunately, your letter reflects some commonly held misconceptions. Cirrhosis of the liver - a term that refers to scarring of the liver - is not necessarily associated with excessive drinking. In fact, about half of all persons suffering from cirrhosis are not alcoholics, and the condition is sometimes found in newborn infants and school-age chil-

Cirrhosis often develops in patient's who have, or have had, hepatitis, another liver disease that has an undeserved stigma attached to it. This is probably because some drug addicts contract hepatitis by using contaminated needles

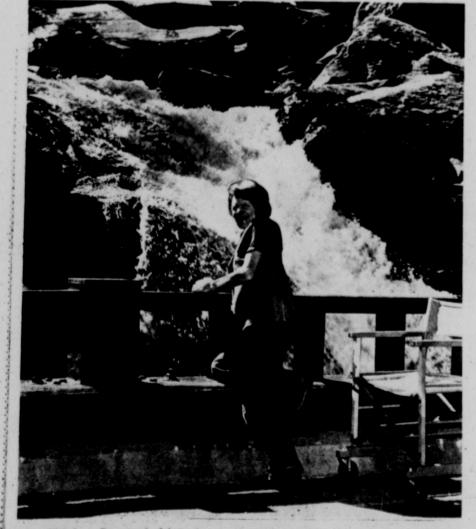

In hepatitis the liver often becomes tender and enlarged; symptoms generally include fever, nausea, vomiting and jaundice. The virus may be present in the bloodstream, intestines and saliva and thus can be transmitted by such everyday acts as kissing or sharing a cigarette or a bottle of soda. Dental work and ear-piercing can result in spread of this disease if instruments are not properly sterilized after having been used on an infected person. Hepatitis can also be spread by people who handle food and by sexual contact.

Returning to the diagnosis of cirrhosis - in your case (since you evidently have not had hepatitis), you may be suffering from primary biliary cirrhosis. This is a chronic liver disease of unknown origin and is not contagious. It is, however, extremely debilitating and undoubtedly accounts for the way you have been feeling of late.

There is enough suffering involved for patients experiencing either of these two diseases - hepatitis or cirrhosis of the liver - without the addition of unfounded myths which only serve to add embarrassment to the discomfort. I hope your liver problem improves and you feel bet-

Dear Dr. Solomon: Is a person really using calories all the time? What about during sleep? - Leona.

Dear Leona: There is always some energy being expended to keep our bodies functioning. The amount varies with body composition, body size and the age of the person. An adult uses a little less than half a calorie per pound of body weight during each hour of sleep.

Shirley Sargent, historian and author of books on Yosemite, pauses by a roaring cascade on the fork of Tuolumne River. She loves Yosemite's present and is concerned for its future.

their \$140 million industry.

Residents of the area have filed damage claims totaling \$436 million, but the French government, after spending \$100 million on cleanup operations, has paid only \$10 million in preliminary damages. Payment of the rest depends on the outcome of various lawsuits in the United States. million dollar lawsuit in New York in September 1978 against Amoco International Oil Co., a wholly owned subsidiary of Standard Oil Co. (Indiana) which handles Standard's petroleum activities outside North America.

The spill also killed an estimated 10,000 birds, but ornithologists say it is too early to determine if migration patterns have been permanently af-

To prevent other tankers from running aground, the French government pushed the shipping lanes out to 17 miles offshore. It also established a more flexible plan to combat maritime pollution, beefed up its shore patrols and radar surveillance of coastal shipping and added two 16,000-horsepower tugboats to its rescue force for ships in trouble

But the government initiatives have not washed away the skepticism of the sea-toughened Bretons, in whom chronic unemployment and chronic disregard by the government in Paris have produced chronic cynicism and a small but violent separatist move-

More winter gas expected

KANSAS CITY (AP) - Cities Service Gas Co. says new figures show it will have about 4.4 billion more cubic feet of natural gas available this winter than last for customers in Missouri, Kansas, Oklahoma, Texas and Ne-

The company said the new projection - lower than a previous estimate of 22 billion cubic feet - comes from recalculation of figures erroneously used in the old projection.

Although the increased supply is less than predicted, it still means gas supplies for the area will be the best in several years, the company said.

Harry Ford, a spokesman for Cities Service, said the error in the previous figure came when an engineer compared expected supplies for this win-

ter with last year's actual sales. However, he said, that doesn't take into account gas lost or used during transmission to fuel compressor stations along the pipeline.

The figures were reported in documents filed with the Federal Energy Regulatory Commission and have

been corrected, Ford said.

Culberson area gains three wildcats; strikes potential

Wildcat operations have been an-Pecos, Nolan and Tom Green counties, and a dual discovery has been completed in Tom Green County, and strike has potentialed in Runnels

CULBERSON TESTS ARCO Oil & Gas Co. spotted locations for a trio of 12,000-foot wildcats in Culberson County.

The No. 1-6 Monthomery-State is 1,980 feet from south and west lines of section 6, block 115, psl survey and 27 miles southwest of Orla.

The project is one mile north of

ENERGY OIL & GAS

ARCO No. 1-9 Montgomery-State, a 12,000-foot wildcat which is being drilled "tight." It is 6.5 miles west of the COV (Atoka) gas field.

ARCO No. 1-7 Montgomery-State is 1,980 feet from south and east lines of section 7, block 115, psl survey and 26 miles southwest of Orla.

The location is 3/4 mile west of No. 1-6 Montgomery-State.

ARCO will drill No. 1-8 Montgomery-State 28 miles southwest of Orla and 7/8 mile northwest of the No. 1-9 Montgomery-State. The drillsite is 1.-980 feet from south and east lines of section 8, block 115, psl survey.

HOWARD EXPLORER

Ike Lovelady, Inc., of Midland no. 1 Prothro has been spotted as an 8,000foot wildcat in Howard County, 16 miles northeast of Big Spring.

It is 2,173 feet from north and 467 feet from east lines of section 20, block 25, H&TC survey and 1/2 mile west of an 8,293-foot failure. It also is one and three-eighths miles northwest of the discovery well of the Stolham (Wolfcamp) field which produces at 6,646 feet.

Bruce A. Wilbanks of Midland No. 1 Abell is a re-entry wildcat in Pecos County, 11 miles southeast of Imperi-

The project originally was drilled by Kewanee Oil Co. as No. 1 Abell and abandoned at 4.915 feet in 1955. Wilbanks will cleanout to total

The location is 1,980 feet from northwest and 660 feet from southwest lines of section 31, block 2, H&TC survey and 3/4 mile west of gas production in the Catlynn (Yates) field.

Petroleum Technical Services Co. of Midland will drill No. 1 A. S. Frymire in an attempt to reopen Canyon oil production in the Trammell, West

multipay pool of Nolan County. Scheduled on a 5,500-foot contract, it is 1,188 feet from north and 330 feet from east lines of section 80, block 22, T&P survey.

Spill suit will not be filed

DALLAS (AP) - Although nearly \$1 million of U.S. money has been spent cleaning up Texas beaches stained by a Mexican oil spill, the U.S. Justice Department does not intend to sue Mexico for damages, Attorney General nominee Benjamin Civiletti

The threat of legal reprisals against Mexico over the world's biggest oil spill would be a "silly proposition," Civiletti said Sunday, at the annual convention of the American Bar Asso-

Civiletti said President Carter has not asked the Justice Department to enter discussions over the spill, and said he does not think the agency should become involved, either.

Currently the U.S. State Department is negotiating with the Mexican government concerning the spill, which originated from a blown-out well being drilled by the governmentowned oil monopoly in the Bay of Campeche.

Oil from the spill has been moving northward along the Texas coastline for the past week, but scattered tar balls along South Padre Island have been the major problem so far.

The U.S. Coast Guard has used vacuums to clean up the tar and has erected floating booms in the Gulf of Mexico to try to keep the oil away from the Texas mainland. Coast Guard officials last week said they had spent more than \$800,000 on the

Civiletti said the state department should continue its negotiations with Mexico concerning possible reimbursement to the Coast Guard. He said the U.S. must operate on the premise that Mexican officials are responsible individuals.

Gov. Bill Clements toured the beaches last week and said U.S. officials should disregard the suggestion of a suit against Mexico. He said reports of harm from the oil spill were exaggerated.

nounced in Culberson, Howard, of the pool's original Canyon disco-

TOM GREEN TRY

Honcho International Corp. of Houston no. 1 Moss-Powell has been spotted as a 7,000-foot Strawn wildcat in southwest Tom Green County, eight miles west of Christoval.

The location is 760 feet from south and 1,320 feet from west lines of section 21, block 20, H&TC survey. Ground elevation is 2,296 feet.

The location is 1/2 mile northeast of the Dove Creek, eat (Clear Fork) field and two and one-quarter miles east of the Dove Creek (Canyon oil and gas, Cisco oil and gas and San Angelo oil)

TOM GREEN STRIKE

William B. Wilson & Sons of Midland has completed its No. 1 Myrtle Mitchell as a Strawn reef gas discovery in Tom Green County, 2.5 miles northeast of Carlsbad.

The well completed from the Strawn reef for a calculated absolute open flow potential of 2,243,000 cubic feet of gas per day, with a gas-liquid ratio of 62,500-1. The gravity of the liquid is 63.4 degrees.

Completion was through perforations from 5,660 to 5,686 feet after a 1,500-gallon acid treatment.

The Strawn was topped at 5,628 feet on kelly bushing elevation of 2,203 A re-entry project, it originally was

drilled by Bridwell Oil Co. and Perkins-Prothro and completed in the Kennemer (Strawn oil) field.

Total depth is 6,115 feet and 5.5-inch casing is set at 6,080 feet. The plugged back depth is 6,080 feet. Location is 660 feet from north and

2,310 feet from west lines of secton 6,

block 16, H&TC survey. RUNNELS OPENER

James K. Anderson, Inc., of Dallas No. 1 Paul Michaelis has been completed as an Odomlime gas discovery in Runnels County, five miles southwest of Wingate.

It completed for a calculated absolute open flow potential of 4,800,000 cubic feet of gas per day, through perforations from 5,256 to 5,264 feet after a 500-gllon acid treatment.

The Odom lime was topped at 5,249 feet on ground elevation of 2,022 feet. Orher tops include the Goen lime, 4,818 feet; Gardner sand, 5,060 feet; Gray sand, 5,158 feet, and Caddo lime,

Total depth s 5,449 feet and 4.5-inch casing is set at 5,445 feet. The plugged

back depth is 5,419 feet. Wellsite is one and one-quarter miles southeast of the Fort Chadbourne multipay field.

UPTON RE-ENTRY

South Ranch Co., Inc., and A. G. Kaspar, both of Midland, announced plans to re-enter a former Devonian well in the Amacker-Tippett, South multipay pool of Upton County and attempt completion in the Bend oil

The re-entry, No. 1 Amacker, is 660 feet from north and 2,637 feet from east lines of section 99, T.C. jones survey and one location north of Bend oil production.

CROCKETT PROJECT

Anderson Petroleu, Inc., will drill No. 2-19 Hoover Estate as a one and one-eighth mile south outpost to the Ozona (Canyon gas) field of Crockett

The site is 28 miles southwest of Ozona and 501 feet from south and 541 feet fromwest lines of section 19, block MM, T&StL survey.

The contract depth is 7,500 feet, and the ground elevation is 2,341 feet.

Fuld Oil Corp. No. 1040 H.S.A has been staked as a 1/2-mile southeast stepout to one of the three wells in the Wagon Wheel (Pennsylvanian) field of Ward County, 3.5 miles southeast of Wickett.

It is 1,980 feet from north and 660 feet from west lines of section 79, block N, G&MMB&A survey. The contract depth is 9,900 feet.

Spot oil trader having great year in Rotterdam

By SUSANNE SCHAFER

ROTTERDAM, Netherlands (AP) - Telephones jangle. Workers rush in and out of the small wood-paneled office with little white slips of paper that represent thousands of tons of oil products in Rotterdam tanks and on Rhine river barges.

The desk of the oil trader is awash with red-print copies of telexed deals on gasoline, naphtha and fuel oil.

"You can't eat gold and paper money won't heat your home," says the trader. "Oil is the greatest product in the world. I'm in a competitive, speculative market - and let's be honest - I've made some money. But I know a lot of people who have gone under, too. I built this business myself and I knew times when you couldn't sell a drop of oil to survive. But now -

The spot oil trader and his market - the dealings in oil that are not tied down to long-term contracts, as almost 95 percent of the world's oil trade is - have come under scrutiny due to the explosion of oil prices in recent months

it's fun.

In Rotterdam, he works in offices tucked behind shopping centers or car dealerships in the honeycomb of streets that surround the huge docks. tanks and warehouses of the largest port in the world. BUT HIS "spot market" is invisi-

ble. He doesn't meet other traders to

make deals, but places calls and sends messages to other dealers, brokers, traders or oil firms around the world. Following the upheaval in Iran and the loss of its steady supply, every drop of oil came into competition. In the space of days, oil on the spot market jumped from \$20 a barrel to \$38, against the Organization of Petroleum Exporting Countries' sug-

producing nations demanded special premiums, and eventually OPEC raised its price ceiling to \$23.50. Common Market officials report that activity on the spot market has increased from 5 to 8 percent in the first six months of this year. Recently, however, prices dropped on the market, due to increased supplies,

gested price of \$14.55. Taking the spot

market prices as a cue, several oil-

market sources report. The volatile situation on the oil markets has prompted several Western nations — particularly France to call for measures to cool the market down, and participants at the Tokyo summit in June — the United States, Britain, France, West Germany, Canada and Japan — agreed to urge oil companies and oil exporting nations to moderate spot transactions, often made with buyers underpressure to meet short-term con-

Eager to show the smallness of the Rotterdam market in relation to the whole and the Netherlands' unwillingness to control a free market, Dutch Economics Minister Gijs van Aardenne called for a study of the Rotterdam market "because there is a great deal of ignorance" about its

WHEN THE TRADE in oil products began to flourish in the 1950s, shippers and coal dealers began to see an opening for dealing in heating oil on the Rhine as independent supplies and storage tanks began to proliferate in the Rotterdam area. As the trade grew and supplies and demands did not always meet, the spot market became a place for oil companies to

pick up, or get rid of oil, cheaply. "But now," the trader told a report-

er, "oil isn't cheap anymore" and business boomed for the small, clannish group of Rotterdam traders. many of whom have broken off from larger firms. Exxon, British Petroleum and Shell all have their subsidiaries who deal on the market, but not to the extent of the independents.

"They trade on their good names and they don't like publicity," said the trader who, as with others, would only talk about his business if his name was not used.

But said J Rishon di al for energy for the European Common Market, traders are loathe to discuss their dealings "because knowledge is power on that market, and anyone who knows something someone else doesn't know is able to make a lot of money As one trader who deals primarily

in gasoline said, he might buy his oil products before they have been loaded at a refinery in Italy and sell the shipment while it is on the water. Or, he said, he may bring it to Rotterdam, be forced to store it, and lose money because he cannot sell to his clients up the Rhine in West Germany "THE TIME ELEMENT is the im-

portant thing," said another trader. 'It takes five weeks to get a cargo between the Middle East and Europe and anything could happen in that time. You have to be very clever. The difference of \$20 in a ton of oil - a change that has happened in the space of days - when you're dealing with thousands of tons of oil, it can

break your neck. Spot dealers can buy anywhere from 1,000 to 100,000 tons of oil at a time, but since prices have skyrock eted from levels of \$125 a ton last fall to more than \$375 a ton in recent weeks, many of the smaller traders have been forced out of the market. There are about 7 barrels in a ton of

oil and generally a barrel is about 42 Transactions on the spot market may take place anywhere around the world and products can change hands more than a dozen times before they

reach the consumer. Contracts may be flexible and set prices according to quotations in Platt's Oilgram, a reporting service of McGraw-Hill, Inc., in New York that telexes prices to dealers, usually based on reports provided by the dealers themselves. But prices do not always reflect demand, and to increase the knowledge of the spot market, the Common Market has organized a study with the cooperation of 52

'We just need more information on how the market works," said a Dutch Economics Ministry spokesman on fuel, Jerome van Eyck. "When the French call for control of the 'Rotterdam' spot market, they never mention that spot traders work all over the world. If there is any attempt to control the spot market, a black market will form, or it will just move

somewhere else.' **BISHOP SAID** the Common Market study is an attempt to "show that the spot market is only one part of a huge system, and to put its prices into context, so that even if spot oil would go up to \$55 a barrel, people would see that those prices may not be relevant

for the rest of the system. "We can't strip the market bare," Bishop added. "There will always be some margin for very clever pleople to deal on. But we want people to understand that Rotterdam is a very small part of the European oil network - and we want OPEC to understand that as well.'

Vietnamese officials to allow refugees to leave legally

BANGKOK, Thailand (AP) - Vietnamese officials have told visiting U.S. congressmen they plan to let 10,000 refugees leave legally each month in hopes of stopping the dangerous mass exodus by

Rep. Lester Wolff, D-N.Y., who headed a 12-member delegation that arrived in B angkok Sunday, told Thai Prime Minister Kriangsak Chomanan the Vietnamese feel that unless about 10,000 people a month are allowed to leave in an organized exodus, it will be impossible to stem the flow of refugees. Hanoi reportedly said it did not have the resources to stop all those trying to flee by boat.

Members of another American congressional delegation that visited Hanoi last week said they were told the Vietnamese government has arrested about 4,000 persons caught trying to escape and has executed some of them.

Wolff, talking to reporters after his meeting with Kriangsak, said he felt the delegation's talks in Hanoi had broken "some significant new ground." He said they got a promise of full cooperation in gathering information about the 2,800 MIAs -Americans still listed as missing in action in the Vietnam War - in Vietnam and

He also said the Vietnamese made it clear that they planned to withdraw from Cambodia eventually but would remain there as long as it felt threa-

Mayor keeps his pledge: KKK marchers arrested

(AP) - Backed by riotequipped police and packing a pistol on his hip, Mayor Emory Folmar kept his pledge that Ku Klux Klansmen would not thread their white power march through his city without a parade permit.

Klansmen began the 50-mile march Thursday in Selma, walking the route of an historic civil rights protest with vows to go "armed to the hilt," and to destroy any challenging enemy.

But the end of the march, scheduled for the grounds of the Capitol, took place behind the barred windows of police vans on Sunday when nearly 200 Klansmen were arrested as they entered the city without the permit.

The white-robed, hooded marchers surrendered without resis-

Bill Wilkinson, the imperial wizard of the Invisible Empire, Knights of the Ku Klux Klan, and organizer of the march, was silenced as he and his followers were arrested by Police Chief enemy. Charles Swindall.

Speaking into a bullhorn, Swindall told the marchers: "You are violating the law by parading without a permit. You are now under arrest for that violation."

Wilkinson, of Denham Springs, La., then stepped forward to say, 'We are marching for civil rights." But Swindall interrupted him, saying he could not speak because he was under arrest.

taken away, they chanted, "The K-K-K is here to stay." Police booked 186 adults and 12 juveniles for the parade law violation and released the adults on \$500 bond each. The juveniles were detained until a hearing

Once freed, Wilkinson promised to try again. "We will march to the Capitol in Montgomery and hold our rally," he said. "It may be six

months."

It was an echo of his pledge of four days ago, when he and his band, jeered at by blacks, marched through Selma and across the Edmund Pettus Bridge, retracing the route taken in 1965 by the Rev. Martin Luther King Jr. and his followers to open Southern voting booths to blacks.

We are going through to the state capitol," Wilkinson said as the marchers set out, "to erase the shame of the 1965 march to the white race." Said his spokesman, Bill Riccio: "If the enemy confronts us, we

The march led by Martin Luther King Jr. in 1965 ended in violence, with the slaying of a civil rights worker, Viola Liuzzo of Detroit, on the lonely highway between Selma and Montgomery. Her death, by gunfire from a carload of Klansmen, stunned the coun-

The march led by Wilkinson on Sunday ended in peace, with Klansmen posting bond and returning to their campsite in a

As the marchers were field just outside Mont-

Awaiting some of the Klansmen there were wives, children, friends and a small, ragged Confederate flag flapping in the night wind.

Folmar dismissed the march as "a calculated effort to get publicity." If it was, said Wilkinson, 'the mayor helped us."

Meanwhile, in Barne-gat, N.J., 19 Klansmen and 300 spectators attended a rally Saturday that ended in four ar-

Two men were arrested on weapons charges, and two on disorderly persons charges after they threw a rock, police said
