Vol. 50, No. 175, Daily 15¢, Sunday 35¢

It wasn't all work Wednesday on the first day of school in Midland. Happily, for this group of boys at Emerson Elementary School, recess offered a chance to catch up on summers' events and renew friendships. An estimated 13,981 students showed up for school in Midland Wednesday. That total represents a drop of 475 pupils from last year's first-day

Legislature could meet annually

Local solons say every-year session feasible

By LANA CUNNINGHAM Staff Writer

The Texas State Legislature easily could be revised into an annual session, rather the current bi-annual sessions, Midland's two legislators agreed Wednesday.

The two - State Rep. Tom Craddick and State Sen. Pete Snelson reviewed the 66th Legislature's accomplishments during a dinner meeting of the Midland League of Women Voters.

Texas' Constitution calls for a 140day session every other year, but Craddick said it is feasible for the State Legislature to meet every year. The off-year sessions would be just to

work out a new budget for the following fiscal year.

Snelson agreed, saying the legislators now are trying to second-guess the rate of inflation and how it will affect prices two years hence in setting up a budget that won't be reworked for another two years.

Craddick remarked the Legislature passed a \$22 billion budget which Gov. Bill Clements signed after vetoing some items.

The two solons reviewed bills concerning the prison and justice systems, welfare, schools, county powers

and tax reform. Although a juvenile probation bill was killed, prospects are good it will resurface in the next session, re-

Carter hears energy experts

ATLANTA (AP) - President Carter heard energy experts today explain

how the United States could save energy through new technologies.

In a packed seminar room at the Georgia Institute of Technology, the president interrupted presentations by panelists to ask questions before he was to address the meeting himself.

Carter arrived here at mid-morning from Washington for the White House-arranged energy symposium on new fuel technologies. From Atlanta, Carter was heading to Tampa, Fla., for a town meeting on

energy and a session with Democratic officials in a state that holds one of the nation's earliest presidential primaries, and whose Democratic Party will take a presidential straw vote Oct. 13.

The president scheduled a late evening return to Georgia for a four-day vacation in his hometown of Plains.

The energy seminar at the Georgia Institute of Technology was arranged by Carter's science adviser, Dr. Frank Press. A panel of 10 experts was expected to give presentations on new energy-producing techniques. Following the seminar, the president planned to meet with several mayors on urban crime, mass transit, the windfall profits tax and revenue

Atlanta Mayor Maynard Jackson, president of the National Conference of Democratic Mayors, had invited his colleagues to his city for the meeting and initiated the 35-minute conference with Carter.

"We will discuss a number of issues, but among them will be the issue of a rising crime rate in the nation," Jackson said, predicting it could have "a tremendously negative potential for the election next year."

Atlanta, particularly, has been plagued by an increawing crime rate. The city has reported more than 150 murders so far this year, more than the total for last year. About 60 Georgia state patrolman have been assigned to relieve local police of traffic duties so the police can concentrate

Former Midlander may be named to utility panel

AUSTIN (AP) - University of Texas finance lecturer Henry Moak Rollins apparently will be appointed to the Texas Public Utility Commission, the Austin American-Statesman said today.

Before becoming a lecturer at UT-Austin in 1973, Rollins was a products engineering specialist in the design of oil well drilling tools for Hughes Tool Co. and vice president for engineering and manufacturing of the Drilco Oil Tools Co., Midland.

The newspaper said that Gov. Bill Clements' office has let it be known to Sen. Lloyd Doggett, D-Austin, that the governor is considering Rollins for

"It was confirmed to us that he is who they are considering," said Nancy Williams, an aide in Dogget's office Wednesday.

Rollins was not available for com-

Clements' office said today there were no appointments ready to be announced but there might be some

Clements said earlier in the week he would fill the vacancy on the threemember utility commission before it starts hearings Sept. 4 on a South-western Bell Telephone rate increase request.

the second floor.

and definitely will try to institute it in Midland.

Opposition to the program came at a meeting last Friday between local financiers and members of the Midland Housing Finance Corp., a local non-profit organization set up to administer the mortgage program.

The loan program would involve the corporation selling about \$25 million in bonds in the name of the city of Midland. The money would be administered through lending institutions to applicants applying for a home loan.

Under the program, the underwriting firm said at that Friday meeting, the loans will carry about 8 percent interest - compared to 11 percent today - and will be available to low and middle income families who meet the criteria.

Marcum told chamber members that "local institutions are the ones who initiated the city (council) to get involved in the program. Through their urging, we got involved.

"The City Council feels strongly we have definite housing needs in Midland," Marcum continued. "To expand our industrial base, housing is needed. The council feels there is no money available for this type of hous-

ing.
"Unless this (loan program) is
done, we're going to be left out and we won't have housing for people coming into Midland," he added.

The councilman said the loan money would go for houses that cost about \$25,000 to \$60,000. Applicants who qualify can have a household income from \$33,000 down to as low as

After the meeting, Marcum said the city needs only one lending institution

By Franchelle Moore

mation.

Could you give me the address of the U.S. Immigration and Naturalization Service in Washington, D.C. - Becky

ANSWER: We understand why you turned to Answer Line for this infor-

It seemed plausible to contact the George Mahon Federal Building in Midland to have a U.S. agency member check a directory of governmental agencies and departments. Well, guess this was not the most logical supposition after all, because after involved discussions with three such departments, such a directory did not exist in Midland - maybe in offices in @

Next, came the idea of locating a Washington, D.C., telephone directory, because, surely the immigration service would be included. What next seemed logical? Checking with the telephone company for the directory. No, dead end, until a phone company representative remembered the Midland County Public Library has more directories available than the phone company.

Thanks to Mrs. C. B. Odom, reference librarian, we have the address

It is the U.S. Immigration and Naturalization Service, 4225 Eye St. NW, Washington, D.C. 20536. Mrs. Odom not only had the address, here is the phone number, 1 - 202 376-8353.

I would like to know why we can't get Channel 17 and 9. Seems that Stanton and Colorado City are getting the best stations.

I have been on cable since it came here and to think Stanton just 20 miles down the road gets the best stations. We have ABC, CBS and NBC. Don't

any of them stay on all night? I do not think this is fair.

I have been in cities where all three have all night shows. We pay good cable money and don't get anything worth looking at. If we could get Channel 8 instead of 13 that would be better than we have. - L.A.W.

P.O. Box 1650, Midland 79702

ANSWER: Possibly, since writing your letter to Answer Line, you noticed the front page article on Midland's cable business by Staff Writer David Campbell. The article was published August 19. Campbell's story mentioned that one of the misunderstandings in Mid-

gramming on all cable TV channels. Tom Mixon, owner of a Midland cable television service, said in the article, "Midland is allowed by the Federal Communications Commis-

land about cable television concerns limitations when it comes to pro-

sion to have one independent station (Channel 11) and one education station (Channel 13)." This ruling applies to major markets only. In explaining the absence of programming from Atlanta or Chicago,

Mixon went on to say that this falls in the major market category. Stanton can provide any amount of programming to its consumers, he said, because it does not come under the major market heading.

Mixon said they could sacrifice the Dallas-Fort Worth channel for the Atlanta channel, but do not because many of their customers are from the Dallas-Fort Worth area.

Seems that contracts with various microwave companies would not allow cable TV companies to drop a station and add another one. Here's a possible bright spot for you, though. Mixon predicted the FCC may change the current rule in January 1980 to allow certain major markets to have additional independent stations. He also said Midlanders will pay no additional amount for cable service should that occur.

North Texas: Mostly clear nights and partly cloudy days with a few thunderstorms southeastern half of north Texas Saturday and widely scattered east Monday. A little cooler Monday. Highest temperatures in the 90s except 88 to 93 Monday. Lowest temperatures 67 to

Midlander sentenced to 14, 10 years on charges of rape

By BILL MODISETT Staff Writer

A 17-year-old Midland man was assessed prison terms of 14 and 10 years Wednesday after he pleaded guilty to two separate charges of rape of a

Blaisdell Young, 422 E. Spruce Ave., pleaded guilty in Midland's 238th District Court and was handed the punishment by Judge Vann Culp. The terms are to run concurrently in the Texas Department of Correc-

The two cases spanned nearly a year in time and the first offense was committed when Young was a juve-

He was certified as an adult in that case, however, in order for him to be tried as an adult.

In that case, Young was accused of the Sept. 20, 1978, rape of an 8-yearold child in Midland. He was indicted on that charge by a Midland County

grand jury Nov. 1, 1978. Young resultantly was given a 10-

year sentence. Defense attorney Jimmie Oglesby represented Young in the 1978 trial.

In the second case, Young was charged in connection with the June 23, 1979, rape of a 10-year-old Midland

According to police accounts at the time of the offense, the girl said a man had entered her home through a bedroom window while she and her 8-year-old sister were there alone. She told police the man held a knife to her throat and forced her to submit to

She reportedly identified Young from a police photograph and he was arrested a short time after a warrant for his arrest was issued.

Young was indicted in connection with that case July 3 of this year. After pleading guilty to that charge, Young was assessed a 14-year prison

term by Judge Culp. Defense attorney Edward T. Garza represented Young in the second

Young originally had been charged with aggravated rape in both cases, but those charges later were reduced

to rape of a child. Both cases were prosecuted by Assistant District Attorney Charles W.

Big Spring council keeps tax rate

BIG SPRING — The Big Spring City Council Tuesday voted to keep its tax rate the same for the next fiscal year, but voted also to cut 31 positions in city government in order to stay within available operating monies during the next year.

Recommendations on personnel deletions were made by City Manager Don Davis. Despite the cuts, however, the city's projected cash balance in the general, water and sewer funds at the end of the next fiscal year will be less

The council set the tax rate during the next fiscal year at \$1.65 per \$100

Among programs which the council discussed salvaging were the Civil Defense program, the Heritage Museum and the City-Wide Summer Recreation program.

Hurricane David lashes Virgin Islands

SAN JUAN, Puerto Rico (AP) — Hurricane David regained its strength and lashed the Virgin Islands and the south coast of Puerto Rico with gale winds and torrential rains early today after battering three of the Windward Islands.

French authorities reported 12 persons injured on Guadeloupe and 15 on Martinique when the storm struck Wednesday, and said there was considerable damage on the two French Caribbean islands, including severe damage to the banana crop.

There were no immediate casualty reports from the third island, Dominica, but ham radio operators reported heavy property damage there as

Moving west-northwest at 15 mph, the center of one of the most powerful hurricanes to hit the Caribbean this century passed about 80 miles south of St. Croix, the southernmost of the U.S. Virgin Islands, at daybreak.

In its 6 a.m. EDT advisory, the U.S. National Weather Service pinpointed the center or eye of the hurricane at 16.4 degrees north latitude and 65.2 degrees west longitude, or about 150 miles southeast of San Juan. It had been located about 220 miles southeast of San Juan in the midnight

bulletin The Weather Service predicted it would be within 70 miles of Ponce, Puerto Rico's second-largest city, on the south-central coast, about noon and then would move on to Cabo Beata, the southernmost point of the Dominican Republic, by late afternoon. The storm is expected to stay on the same northwewterly track for the next 24-hours, the service said.

"When they pass the Dominican Republic, that's the point where they usually turn north toward Cuba or the United State," a member of the Weather Service staff said. "Some go straight west toward Mexico and some just die out, but this one doesn't look like it's going to die out.'

With maximum winds back to 150 mph, David roared into the Caribbean between the Windward Islands of Dominica and Martinique on Wednesday. Guadeloupe is north of Domini-

Regular communications channels were knocked out, but sketchy radio reports intercepted by ham radio operators said hundreds of houses were flattened on Martinique and Domini-

Louis Block, an amateur operator in Cleveland, said a ham operator transmitting from Roseau, the capital of Dominica, reported "houses all around him are flat - no phones, no electricity.'

The broadcast said 200 to 300 houses troyed, but no deaths or injuries had been reported yet, Block said.

Burglary reports keep police busy

Several burglaries in the Tall City were reported to police Wednesday,

according to police reports. The athletic office at the high school football stadium, 2001 Cuthbert Ave., was reported burglarized, police

A window was broken to gain entry to the office, police said. Six stop watches valued at \$150 and \$461 in cash was taken, according to re-

A 35mm camera valued at \$215 was reported taken Wednesday from a residence in the 3000 block of Douglas Street, police said. Means of entry to the residence had not been deter-

mined, officials said. Entry to a home in the 100 block of S. Dewberry Drive was gained through a rear window, police said.

That burglary, reported Wednesday, resulted in the loss of a gold ring, a gold cigarette lighter and a checkbook of an undetermined value, officials said.

2 men charged with possession

ODESSA - Two men were charged with possession of heroin Wednesday in Odessa Municipal Court following their arrest late Tuesday night by

Lupe Ortega, 30, of Odessa and Richard Wayne Mills, 31, of Trent were arrested about 11 p.m. Tuesday. They were stopped when their car was observed parked beneath an overpass at an Odessa intersection,

police said. Police said the pair was arrested after a small quantity of a substance believed to be heroin was found in their possession.

Judge Otis Moore set bonds of \$10,-000 each for Ortega and Mills.

Chamber hears of loan program

(Continued from Page 1A) to agree to administer the program,

and he feels that one will be found. The Midland Housing Finance Corp. has asked the local lending institutions for an answer Sept. 5 on participation in the program.

Marcum told the chamber that Don Hellinghausen and Arden Grover, both with the Midland Housing Association, have been appointed by the City Council as two additional charter members of the non-profit finance

federal prisoners are being retained in the City Jail. Because of that, the city must bring the jail up to federal standards.

Plans call for adding 21 new single cells with maximum security lock-up capabilities, according to Gideon, who added the current jail doesn't have single cells.

Kitchen facilities would be expanded to include freezers, a dishwasher, refrigerators and ice machine. The present room, Gideon said, is 8 by 8 feet and is not adequate for handling food preparation for 50 to 60 in-

A RECREATION AREA for in-

mates is being required for jails holding federal prisoners. Proposed is a half-court gymnasium where inmates could play basketball, handball, volleyball and other games. An outside recreation area would be used when weather permitted, according to Gi-

Included in the remodeling is a washroom facility for washing and drying inmate clothing and bedding. the police chief said. Especially needed for this area is a commercial washer and dryer, he added.

The city jail currently can hold up to 70 prisoners - 58 males, eight females and four juveniles.

Statistics cited by Gideon show the average daily jail population is 33 with 1,200 federal prisoners housed

More cloudy weather in store

More cloudy and warm weather is in store for the Permian Basin through Friday, the weatherman said

High Friday should be only in the low 90s, with tonight's low dipping near 70.

Southerly winds should be decreasing to 5-10 mph tonight.

Recorded high was 92 with the overnight low measured at 67 de-Neither mark came near the rec-

ords for the date. Record high for an

Aug. 29 is a searing 104 set in 1964 and the record low for today's date is 61 degrees set in 1971.

No rain was mentioned in the forecast, so the monthly total of 2.15 inches is likely to hold, leaving the annual accumulation of rainfall at a still-hefty 12.18 inches.

Most area towns were enjoying the same mild morning Midlanders had this morning, with Andrews and Stanton reporting a light haze early

Snelson, Craddick review 66th legislative session

(Continued from Page 1A)

return a certain amount of tax relief to the property owner.

A school finance bill in which some school districts received equalization relief hurt the Midland school district, both men said. But it will come up again for review in two years, they added

Snelson said he will be serving on an interim study committee looking at handicapped children from age 0 to 3 years. "They tell us this is the critical time to deal with the problem (handicaps), not after 3," he added.

Under the Sunset Bill, Craddick said the legislative committee looked at 26 agencies this year. Of that number, nine were eliminated, five were combined into others, 12 were changed and renewed, and one new agency was created. Initiative and referendum probably

will come up in a special session, which Gov. Clements says he will call early next year, according to Crad-"We tried about five times to pass initiative and referendum, and it

failed," the Republican said. "But the

governor says we WILL pass one."

Another item which Clements wants passed in a special session, said the men, is a wiretapping bill. Snelson contended wiretapping is needed for enforcement of drug When questioned about nursing

home practices and charges, both men said they had received complaints from area residents concerning this problem. Craddick outlined one case where a

woman, who is working to keep her paralyzed husband in a nursing home, will have to divorce her spouse in order to get state aid to pay for the The increasing number of prison

inmates in Texas doesn't have a simple answer as to alternatives or solutions, the Midlanders reported. "Some people think that we need more prisons," Craddick said. "But

I'm not excited about seeing a prison built in West Texas." He added programs for rehabilitating prisoners should be increased depending on how effective they are.

Snelson said by the time violators get to prison, the justice system has run out of alternatives on these peoeach year. This gives a total of 7,500 in the city jail, he added.

Gideon advised the city council there is a strong possibility \$150,000 in federal funds may be available to improve the jails.

"THERE IS A VERY good possibility we can get the funds since we hold federal prisoners," Gideon said. "We can apply for up to \$150,000 and agen-

cies such as ours have priority.' Breaking down the cost by categories, Gideon has estimated \$392,000 for jail remodeling, \$20,000 for the recreation area, \$123,000 for relocating the Police Academy and \$105,000 for remodeling the Municipal Court area with the remaining total going for a contingency fund.

Brown said the building had an addition built several years ago. With the proposed remodeling, "this expansion would last for many years, until we reached the point we need a Remodeling of the Public Safety

Building is Proposition No. 6 on the Friday: Expansion of City Hall.

Midlander gets 3-year sentence

A man who pleaded guilty in district court here Wednesday to a charge of forgery by passing has been assessed a three-year prison term. Robert Davis, about 35, of Oklaho-

ma pleaded guilty in Midland's 238th District Court and was assessed the prison term by Judge Vann Culp. The term is to run concurrently

with a parole revocation from Okla-Davis pleaded guilty to the May 24,

1979, passing of an illegal check in Midland. The case was prosecuted by Assistant District Attorney Richard Davis.

Witness testifies of fatal mishap in San Antonio trial of John Dorr

SAN ANTONIO - An ill-fated marijuana smuggling mission to Mexico resulted in the decapitation of a Mexican citizen hit by the wing of an airplane piloted by a Midland man, a government witness has testified in the federal marijuana trial of two West Texas men.

On trial in federal court are Pecos oil man-banker John R. Dorr and his associate, John Grant Passmore of Royalty. They are charged with of conspiring to import about 960 pounds of marijuana from Mexico into the United States.

Dorr, 40, an independent oil operator who maintained offices in Midland, was president of the Permian Basin Petroleum Association in 1974.

Gregory Mark Halteman, one of eight persons named in the alleged conspiracy, related details concerning the gory accident to a federal court jury

The 27-year-old Halteman said prosecutors allowed him to plead guilty to a misdemeanor marijuana possession charge in exchange for his testimony at the Dorr-Passmore trial.

The Mexican citizen was killed in April 1978 by plane flown by Terry Wayne Fagan, a young Midland pilot and a former Fort Worth policeman, Halteman said.

Fagan is the government's star witness in the conspiracy case.

Halteman said that when the airplane attempted to land on a little-used Mexican highway, the right wing crashed into a horse drawn cart on which the victim "I saw a Mexican national who had been decapi-

tated by the right wing of the plane," Halteman testified. "I was pretty much in shock at this point. Seeing a dead man on the road really upset Halteman said Passmore was present during the

loading of the marijuana, and Ernest Pemberton, another person charged in the alleged conspiracy, left on the plane with Fagan.

Fagan and Pemberton were arrested after Fagan's leased plane landed at the airport at Ros-

Dorr was charged with conspiracy in a sealed indictment in federal court in Midland last March,

'Good business' to support food stamps

AUSTIN, Texas (AP) - The federal director of the food stamp program traces its political problems to the "Me Generation" and right-wing critics who stir up welfare myths. Assistant Secretary of Agriculture Carol Foreman

told state and local food stamp administrators Wednesday it is "good business" to support the Ms. Foreman said for every billion dollars that

Congress cuts back the program American farmers would lose \$140 million. Texas gets \$410 million a year in food stamp

benefits, she told a Southwest regional conference, "and I don't think the food industry wants to lose any part" of that money. "The food stamp program frees up funds for

housing, clothing and all of the other needs that a family may have," Ms. Foreman said. She said, however, she spends much of her time

dispelling food stamp myths. "Right wing groups, especially, and some plain old conservative editorial pages continue to harp on the myth that the food stamp program is full of fraud and abuse and welfare queens in Cadillacs and other assorted bums," she said.

John R. Dorr

was arrested in Pecos and subsequently was released on a \$150,000.

The federal indictment alleged that Dorr and several others plotted in Februray 1978 to import marijuana in the States from Mazatlan, which in on the Western Pacific Coast of Mexico. But the plan when awry after the airplane got stuck in mud on a landing strip north of the Mexican coastal city.

The aircraft reported ws dismantled at the landing strip after efforts to get the plane out of the mud were unsuccessful.

The indictment also alleged that 966 pounds of marijuana were flown out of Mexico to Roswell, N.M., in April 1978, but that officials seized the haul.

Federal investigators said the marijuana would have been worth about \$100 a pound wholesale in

Later, in April, Dorr and an unindicted co-conspirator were arrested on state charges in New

U.S. Drug Enforcement Administration officers said the indictment was the result of a year-long investigation by the DEA office in Midland and by the Roswell, N.M., narcotics division of the New Mexico state police.

Indicted along with Dorr and Passmore were five men from California and Mexico and Kenneth Stuckwish of Alpine.

Scientists try to explain moon

Calif. (AP) — As Pioneer 11 raced to within 1.5 million miles of Saturn today, scientists were searching through fresh data for clues to explain the ringed planet's weird two-toned moon that seems unlike anything else in the solar system.

The unmanned ship, soaring through space at more than 21,000 mph, is to fly within 12,950 miles of Saturn on Saturday. Pioneer is mankind's first emissary to the is very bright.

MOUNTAIN VIEW, golden planet and its dazzling rings.

Scientists at mission control in the National Aeronautics and Space Administration's Ames Research Center here received measurements Wednesday of the moon Iapetus after Pioneer made its closest approach - at 644,180 miles — to the strange moon.

Iapetus, roughly 900 miles in diameter, is half, while the back half

The ninth of Saturn's 10 moons is about 2.2 mil lion miles from the planet and "is a particular puzzle," said Dale Cruikshank of the University of Hawaii. "It is apparently unique in the solar system."

"It's almost exactly half and half - a remarkable situation that no one understands very well," David Morrison, very dark on its leading another Hawaii scientist told a news conference Wednesday.

'There's no way to win'

Dr. John J. McKetta, noted professor at The University of Texas at Austin and a recognized authority on energy matters, explained to members of the Texas Daily Newspaper Association meeting at Houston recently, why the United States will not achieve energy self-sufficiency.

It isn't a very pleasant subject to contemplate, but Dr. McKetta tells it like it is.

He has spoken in Midland on numerous occasions and is well and favorably known throughout the Permian Basin Empire.

Speaking on the subject "Perspective on Energy," Dr. McKetta told the newspaper publishers, "There is no way to win the energy game! No way to have energy self-sufficiency or to decrease the high cost of imported energy during your lifetime. I predict that by 1985, even if the public forces government to remove all the senseless, inflexible regulations we now have, the United States is going to have horrible sacrifices energy-wise.

"But we have to try to force changes...We must pass sensible rules now."

He went on to explain that the energy story is a very complex one and cannot be told in its entirety in one talk or article. He did say, however, that it is well known that "we are in a terrible energy mess, but only a few people realize there is no solution during our lifetime. By this I mean that we will not have the luxurious use of energy during the next 35 to 40 years that we have today. Contrary to the accusations coming from Washington, there is no conspiracy unless there is a secret conspiracy between Congress and the Middle East. This country is in trouble. We are just not going to make it."

And if this doesn't bring citizens of this great land to full realization of the energy crisis, we don't know what will.

The speaker said most of the people who understand the energy problem are disappointed, confused and appalled with President Carter's so-called energy plan, and disappointed with the mysterious, seemingly anti-U.S. voting record of the U.S. Congress in energy policies. Present policies of energy pricing and over-regulation of industry will spell disaster for the U.S. in less than 10 years, he said.

"Many wishful thinkers," he

WASHINGTON - The only excite-

ments penetrating this summer's

swamp vapors here were all within the Democratic Administration and

its family; namely, the rise of Sen.

Edward Kennedy, Jimmy Carter's scrambling Cabinet shuffle and the

departure of the sainted Andy

NICK THIMMESCH

continued, "have been led to believe we will have energy sufficiency by 1985. I predict that at the current rate of energy demand graowth, the U.S. will have a severe recession brought about by the lack of domestic energy by 1985. In fact there will be an energy shortage in the U.S. by 1985 that will make your hair curl. Most of this is because of the shortsightedness and lethargy of our Congress in energy mat-

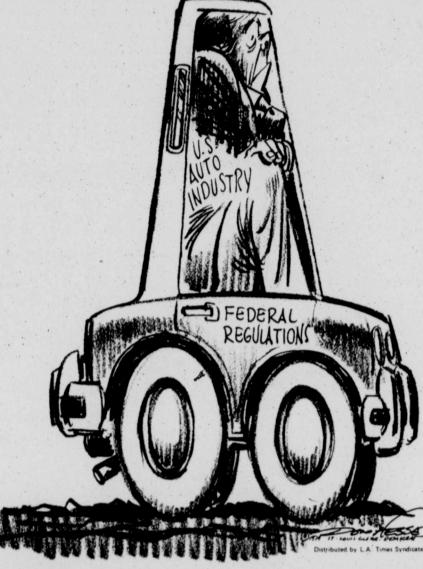

He said that sometimes it appears that this country's politicians and environmentalists are linked together in a plot to bring America to eventual disaster by making domestic energy expansion impossible. He is firm in his belief that the problems of higher taxes, price controls, threat of excess profit penalties, embargoes on leasing or operating in favorable coastal areas, and rigid, excessive environmental requirements serve only as roadblocks in efforts to explore for new reserves or to build new facilities.

He predicted also that the price of OPEC oil and oil products will reach \$25 a barrel by 1985.

"How in the world could the wealthiest and most powerful nation in the world get boxed into a corner like this?" he asked. "The reasons include the senseless, inflexible governmental regulations and the extreme demands of the environmentalists..."

Dr. McKetta says in his booklet, "Why the U.S. Will Not Achieve Energy Self-Sufficiency," that in order to meet the tremendous energy demands from a self-sufficient energy base by the year 2000 "we would have to do the following and much more:

"Find 10 more Prudhoe Bays or four more states of Texas and produce them to capacity; ban all new cars larger than 40 horsepower; force a 20 percent improvement in building heating systems; force a 15 percent improvement in energy efficiency by industry; force a 15 percent improvement in efficiency of converting electrical power; totally develop all offshore oil and gas reserves of both the east and west coasts; increase coal production by a factor of 3; convert all of California, Montana and Idaho to geothermal steam electric power; double the present rate of hydroelectric power generation; produce 2 million barrels per day of shale oil by the year 2000, and add one conventional atomic power plant every two weeks from now to the year

WASHINGTON MERRY-GO-ROUND

Bert Lance is confident of future

By JACK ANDERSON

WASHINGTON - There is a quiet despair inside the White House over the political backfires that are exploding in President Carter's face. Not the least cause for dismay is the approaching trial of Bert Lance on the eve of the president's re-election

The shrapnel from the trial could riddle Carter, who borrowed heavily from Lance's bank and then brought him to the White House to manage. the federal budget. Yet by outward appearances, both men are unperturbed by the turn of events.

The president seems to possess an inner mechanism that detachedly goes on clicking and calculating amid the turmoil around him. Anyone but Jimmy Carter, facing the odds against his re-election, might anticipate defeat, Lance told us. "But Jimmy Carter just will not be defeated." said his friend. "He is the most determined man I have ever met in my whole life.

The embattled Bert appears to be equally unbowed - even cordially - over his criminal indictment. We sought him out to solicit his comments, having written some of the stories that led to his indictment. He was unreachable when the stories went to press.

But our associate Clark Mollenhoff finally found Lance in his lair at Eagle's Nest, his country estate, in a wooded area not far from Calhoun, Ga. Lance filled his office chair, appearing even more massive than his actual dimensions. He is a handsome man, in a bull-necked, barrel-chested

way, with a bluff, breezy manner. Above all, he was affable. He had

lost none of the engaging, countrified cordiality that characterized his halcyon days in the White House. He told us he is proud of his past, confident of the future and secure in his family. By his lights, he will be acquitted of bank fraud charges; Jimmy Carter will rebound in the polls; and God is still in His heaven.

When Lance was questioned about specifics, he sometimes responded in a violated tone. He assailed the Justice Department's prize witness against him - a former friend and business associate named Billy Lee Campbell - who now claims he was the fall guy and took the rap to protect Lance. A share of the \$250,000 that Campbell embezzled, he now swears, wound up in Lance's pocket.

Lance replied that, on the contrary, he was the one who reported Campbell's embezzlement to the Justice Department in July 1975. Lance called Campbell a "malicious liar" and accused the prosecutors of holding back witnesses from the grand jury. These witnesses, Lance contended, could have testified that Campbell had told them Lance was not implicated in the embezzlement. But if big Bert is outraged over the

"unfair tactics" of the prosecutors, he doesn't blame his buddies Jimmy Carter and Griffin Bell who controlled the Justice Department. They could not interfere with the prosecutors, said Lance, because of "prejudicial news stories and columns." The national press made it too hot for them to do anything "except stay way out of it," he said.

Lance's defense strategy became clear from his remarks. He will seek to discredit the Justice Department's witnesses, concentrating on Camp-

bell. Lance would also like to move the trial from Atlanta to Rome, Ga., where he has a host of friends. Rome is also only 22 miles from his hometown where he is still the local hero.

Lance believes "the truth will prevail" among people who understand how his free-wheeling practices helped to industrialize his neck of

T. Bertram Lance, called Bert by just about everyone who has known him for more than 10 minutes, gazed out the window of his inner sanctum overlooking a small pond. It was a tranquil scene.

If somehow his senses should betray him, his fellow Georgians should fail him, and he should be convicted, he mused, he is quite "prepared to face whatever is ahead without any

LIBYAN LIST: Libyan strongman Muammar Quaddafi, who has supplied arms and sanctuary to terrorists from Belfast to Beirut, is quietly trying to buy American-made equipment that can be converted to military use. Quaddafi's shopping list includes Boeing 747 transport planes, executive jets, heavy trucks, flatbeds, ambulance helicopters, cropdusters and jeeps.

What does the desert dictator plan to do with the American equipment if he gets it? Intelligence sources told our associate Les Whitten that Quaddafi intends to use some of the goods as part of his own "foreign aid" program, shipping them to other African nations unfriendly to the United States.

Thus we would be helping indirectly to keep hostile regimes in power Some sources suspect we've already done just that. They believe - though Libya denies it - that the troops Quadaffi sent to Uganda in an unsuccessful eleventh-hour attempt to save Idi Amin's crumbling dictatorship were transported in planes originally provided by the United States.

Sen. Richard Stone, D-Fla., got wind of Quaddafi's proposed shopping spree and enlisted the aid of Sens. Jacob Javits, R-N.Y., and Abraham Ribicoff, D-Conn., chairman of the Government Affairs Committee.

The senators got the State Department to provide a detailed list of the goods Quadaffi wants to buy. At a backroom meeting a few weeks ago between key congressional staffers and officials of the State and Commerce Departments, it was decided that sale of militarily useful material to Libya would be drastically restricted. From now on, State won't grant licenses for sales to Libya without consulting the senators on an item-by-item basis.

BIBLE VERSE

"Therefore the Son of man is Lord also of the sabbath." - Mark 2:28.

ART BUCHWALD New 'ideas' to save nation from oil crisis reported

WASHINGTON - Every time you pick up the newspapers you read of some newfangled thing that is going to save us from the oil crisis. One day it's methane made from garbage, the next day it's hot springs underneath Montana — then it's ocean waves that can be tamed, and then there are, of course, energy-producing windmills. I can't keep up with all of it, but

Carbuncle can and does. A month ago he told me, "Did you hear they have a new synthetic fuel that can save a million barrels of oil a

"No," I said. "What is it."

"After-shave lotion. Some professor at MIT discovered that aftershave lotion contains alcohol. He devised a method of taking the perfume out of it through a cracking process, and what's left can be burned in a

"Great," I said. "When will they start making it?'

"Right now the price is too high. A pint of Faberge after-shave will cost you \$25, but if the OPEC countries keep raising their rates the price will soon be competitive.'

A few days later he came back. "Well, it's all over for the Arabs. A geologist in Colorado has just developed a method of squeezing oil out of asphalt roads. He was able to get one quart of crude out of a mile of asphalt. He figures with all the asphalt roads in America we should be self-sufficient by 1989, and we can tell Iran to

Art Buchwald

"I knew they'd come up with some-thing. Wait a minute! If they dig up all the asphalt roads in the United States there will be nothing for the cars to drive on.

"Exactly! That's where the big conservation savings will come. He's just applied for a grant from the Department of Energy. 'To continue his research?"

"No, for bail money. They arrested him for digging up a stretch of U.S.

I didn't hear from Carbuncle for a week. Then he called me excitedly on the phone. There is a man in New Jersey who

has perfected a system to make coal out of gold. One ton of gold will give you one ton of soft-burning coal.

'Great! How does it work?' "Once you get the gold you put it in a blast furnace of 1,500 degrees. This produces a gas, which you siphon off. The residue at the bottom of the furnace hardens and looks just like coal. You scrape it up and shape it in pellets. A ton of it can get you through the winter. The beauty is that coal made from gold doesn't pollute the

"It sounds like the answer," I said.

A few days later the phone rang again. Carbuncle said, "You been watching television?"

"There's a guy on the Today Show who runs his car on Tabasco sauce. He says he mixes three gallons of Tabasco with one gallon of no-lead, and a tank of fuel lasts him a month.

"Tabasco does have a kick to it," I admitted.

"You bet your sweet life it does. He told Tom Brokaw all the oil companies know about it, but won't use it because they're afraid it will cut into their profits.

Yesterday Carbuncle called again. The energy crisis is over. A 14-yearold Boy Scout in Pasadena rubbed two sticks together and managed to get a of Science duplicated the experiment and it works. This country has enough sticks to light every home in the United States for 2,000 years."

"Yeh, but what do you burn after the fire gets started? I asked.

Carbuncle replied, "Furniture. It's cheaper now than heating oil.'

THE BIBLE CAN YOU QUOTE IT?

By LAVINA ROSS FOWLER AND ELIZABETH ROSS WIERSEMA

1. One of the most fascinating characters of the O.T. was King David. It appeared that God favored him, even if he was guilty of some things, he readily confessed his wrong-doing. Complete quotations from David's 51st Psalm. "I acknowledge my transgressions: and ----. " 51:3

2. "Create in me a clean heart, O God: and renew ----. " 51:10 3. "Cast me not away from thy

presence: and take not thy ---Psalm 51:11 4. Peter, in giving an account of his

acceptance of Gentiles to his Jewish brethren, also told the difference between Jesus' and John's type of baptism. Quote. Acts 11:16 5. Who said, "Be not overcome of

evil, but overcome evil with good."? Romans 1:1, 12:21 Four correct...excellent. Three correct...good.

The Country Parson

by Brickman

These were all one-party matters. There was no good fight between Democrats and Republicans. Indeed

the major parties and issues seemed to be put out of mind. That's why it is refreshing to contemplate the 1979 Libertarian National Convention soon to be held in Los Angeles. Where both parties seem becalmed of ideas, the Libertarians send fresh gusts. This gang has not yet made enough impact to be placed in that

honorable Third Party tradition, but they're trying. Some of them are mad, to be sure, but with its 15,000 dues-paying members, the party is far more creative, diverse in approach, and intellectually stimulating than either the Democrats or Repub-The Libertarians firmly subscribe

to the doctrine that "that government is best which governs least." They favor abolition of all victimless crime laws, elimination of all government interference in the economy (and establishment of strictly free-trade), and a non-interventionist U.S. foreign policy. Simply put, Libertarians want the government to leave them and the rest of the citizenry alone. Now there is a wide yearning in the

republic for the government to get off our backs, so the Libertarians are

Nick Thimmesch

Watch out, Los Angeles, here come Libertarians en masse

bubbling with ideas. If your political thinking is conventional, or, worse, ideological, Libertarians are disturb-

At once, they are against the draft and bigger military budgets, and conversely, are against gun control laws. They want tax credits for sending their young to non-public schools, but they are instigators and frontline fighters in the tax revolt. They are for legalizing marijuana and letting anybody say or print about anything (except "fire" in a crowded theater), but lament the decline of standards in public education.

Their feminist spokesperson supports the Supreme Court on abortion, but one of their conservative guestspeakers, John Lofton, does not. And while they advocate certain children's rights, they oppose federal funding of abortion, and thus dismay liberals and conservatives alike.

Libertarians strictly oppose Sen. Edward Kennedy's national health plan - and all others - but they have small political sympathy for the run of conservative candidates, are disinterested in Reagan, and are particularly opposed to John Connally

Their headliners include Paul Gann, co-author of California's Proposition 13, the Cinderella effort that set off the tax revolt; Alan Baron, who was advisor to George McGovern and made his money working for the free-spending Democratic Party; Eugene McCarthy, who doesn't like the two-party monopoly, as he calls it; Dr. Walter Williams, a quite bright economist, who, as a black, feels that excessive government hurts black people more than it helps them, especially in employment. Nathaniel Branden, disciple of Ayn Rand's joythrough-strength philosophy; and Morton Halperin, a one-time Republican who became a crusader-hero against government wiretapping when Nixon and Kissinger did that to

As I mentioned, some of them are mad. The strict Libertarian (an anomaly?), even if he be Jewish, is so against foreign military and economic aid, that he would deny same to Israel along with every other nation. The Libertarians are torn apart over the Equal Rights Amendment (ERA), and while they favor "children's rights" it is usually for children of other parents, not theirs. They are usually dead-set against psychiatrists, and think they should be deported to Madagascar.

Libertarians also affect an anti-nuclear stance, believing it is too invested with Big Brother Government, but fail to see the same implications in the Department of Energy or in other energy forms for that matter, includ-

ing the sanctified, but ineffectual, solar.

While the Libertarians are ostensibly in Los Angeles to nominate their presidential candidate (they promise 'thousands' of screaming delegates and guests), most of the spent energy will have gone into arguing what is free and what's not.

Libertarians are good fun, and are mostly to be enjoyed, even admired for their prodigious idea-spinning. But they shouldn't be brushed aside in every instance. Ed Clark, their gubernatorial candidate in California last fall, got 377,980 votes - not bad. The party's annual budget is only \$180,000, but it expects to raise several million for the 1980 presidential

"Federal Election Commission money?" a Libertarian remarked. 'We would never take it."

GOLD FEVER

The deadly spell of gold fever involves Barnaby when his goddaughter becomes the prey of a fortune hunter who kills her gold prospector grandfather, then frames the girl's fiance for the crime on "Barnaby Jones," Thursday, Aug. 30, on CBS.

Buddy Ebsen stars as the keen-eyed private investigator whose easy manner belies his tough and thorough handling of a variety of difficult cases. Lee Meriwether stars as Barnaby's daughter-in-law and assistant, Betty Jones.

Baker, a Democrat, is prohibited by the state

Constitution from seeking a consecutive term as

The court action "will come about if the attorney general's office tells me I have grounds to stand on,"
Baker said. "I think I have grounds to stand on or I

Baker said the tax relief program "hasn't been

handled in a fiscally responsible way."

He said the rebates would cost state residents \$9 million in extra federal taxes, since the refunds

would be subject to federal income tax. He also said

Utah will lose millions of dollars in interest because

it will have to sell bonds to pay for a new office building and won't be able to invest its budget

Baker said the rebate program is tied to local property taxes and that the Utah Constitution prohib-

its the Legislature from imposing taxes for the

purpose of any local government.

He also said the rebates are unconstitutional be-

cause they attempt to bind future legislatures to

supply tax relief and because they could drive the state budget into a "substantial" deficit.

Obscenity charges dropped

MEMPHIS, Tenn. (AP) — At the request of prosecutors, a federal judge has dropped obscenity charges against 10 persons and five corporations involved in distributing the film "Devil in Miss Jones."

U.S. District Judge Robert McRae Jr. signed an order that was filed Tuesday.

In his dismissal motion last week, U.S.Attorney Mike Cody said a trial would take four to six weeks "and would involve numerous witnesses from various parts of the United States (coming to Memphis) to testify in behalf of the government."

According to court records, 13 persons and five corporations were named by a federal grand jury in the original indictment returned June 13, 1975. The defendants — including sex film star Harry Reems - were charged with conspiring to illegally transport the film from Fort Lauderdale, Fla., to Memphis for showing.

DEATHS Blake Baker Jr.

Services for Gregory Blake Baker Jr., infant son of Mr. and Mrs. Gre-gory B. Baker, 315 S. Bentwood Drive, are pending at Newnie W. Ellis Funeral Home.

The boy died Tuesday in a Midland hospital.

Survivors include his parents, a brother, Danny Baker of Midland; a ister, Melissa Baker of Midland, and is grandparents, Mr. and Mrs. Tom Ashley and Mr. and Mrs. Curtis Baker, both of Midland.

Jesse Jackson

SAN ANGELO - Jesse G. "Bud" Jackson, 62, stepfather of Gary Owens of Midland, died Tuesday in a Big Spring hospital. Services were to be at 2 p.m. today in Elliot-Hamil Funeral Home Chapel of Memories with the Rev. T.C. Melton, pastor of Elmcrest Baptist Church officiating. Burial was to be in Elmwood Memorial Park.

Born Jan 12, 1917, in Stamford, he grew up there and helped his father, the late James Edward Jackson, in a grocery business in Stamford.

Jackson owned and operated Jackson Grocery near Dyess AFB. He retired in 1973 due to ill health. He moved here from Stamford in 1950. He was married to Othene Husband

May 14, 1958 in Abilene. He was an Army vetern of World War II, serving overseas with the 36th Infantry Divison. He was a 32nd Degree Mason at Hamil Masonic Lodge and a member f the Suez Temple of the Shrine.

Other survivors include his wife, a stepson, a stepdaughter, a brother, two sisters, and several nieces and

Ira C. Raley

BIG SPRING - Ira C. Raley, 76, died Wednesday in a Big Spring hospi-

Services will be at 10 a.m. Friday in Nalley-Pickle Rosewood Chapel here with burial in Trinity Memorial

Raley was born Oct. 3, 1902, in Granger. He had lived in Big Spring since 1944, when he moved here from Granger. He was married to Mary Partlow Dec. 19, 1925.

Raley was a member of the College Baptist Church in Big Spring. He had worked as a janitor in the Big Spring public schools until his retirement in

Survivors include his wife; three daughters, Mrs. James (Carrie) Belew of Big Spring, Mrs. E.L. (Wanda) Collier of Coahoma and Mrs. Jo Meador of Austin; a son, James C. Raley of Leander; a brother, Adell Raley of Owensboro, Ky.; two sisters, Vertie Allen of Tyler and Lizzie Harrison of Temple, 11 grandchildren and 11 great-grandchildren.

Michele Edmiston

MORTON - Graveside services for Michele Dawn Edmiston, infant daughter of Mr. and Mrs. Michael Edmiston of Canyon and granddaughter of Mr. and Mrs. W.P. Edmiston of Midland, were Aug. 20 in Morton Memorial Park.

The infant died Aug. 18 in an Amarillo hospital.

Other survivors include her grandparents, Mr. and Mrs. W.K. Courtney

Lela Furr

LUBBOCK - Services for Mrs. Roy (Lela) Furr, 75, of Lubbock, wife of the late founder of Furr's Supermarkets, were at 4 p.m. Wednesday in the First United Methodist Church.

Burial was in Resthaven Memorial Park directed by Rix Funeral Home. Mrs. Furr died Tuesday in a Lubbock hospital.

She was a native of Santa Anna and grew up in Kirkland. She attended Clarendon Junior College and the University of Oklahoma. She was married to Roy Furr in Kirkland. They moved in 1929 to Lubbock. He was a school teacher who built a supermarket empire and then branched into cafeterias, food packaging opera-tions, oil and real estate. He died June 13, 1975.

Mrs. Furr was a member of the First United Methodist Church. She and her family donated \$75,000 for construction of the Furr Radiation Center at Methodist Hospital in memory of C.W. Furr.

Survivors include two sons, a daughter, a brother, a sister, 12 grandchildren and six great-grandchildren.

Willis P. Binyon

SAN ANGELO — Graveside services for Willis P. Binyon, 71, of San Angelo, brother of Lola Roueche of Hobbs, N.M., were to be at 3:30 p.m. today in Fairmount Cemetery here with the Rev. George Magnor, pastor of Lakeview Baptist Church, officiat-

Arrangements were handled by Johnson's Funeral Home. He died Wednesday in a San Angelo

nursing home. Binyon was born Oct. 15, 1907, in Sonora and had lived all his life in San

Other survivors include five sisters and several nieces and nephews.

James A. Tabb

ODESSA - Services for James A. Tabb, 59, were to be at 10 a.m. today in the Hubbard-Kelly Funeral Home chapel here. Burial was to be in Sunset Memorial Gardens. Tabb died Monday at his home.

He was born March 3, 1920, in Cason. He moved to Odessa in 1955 from Hobbs, N.M.

Tabb was a salesman for Hamil Machine Shop. He was a Baptist. He was a veteran of World War II.

Survivors include his wife, Dorothy; two daughters, Rhonda Mankin of Odessa and Kay Sturbibant of Isbelle, Okla.; a son, Stephen Tabb of Odessa; five brothers, Roy Tabb of Midland, Charles Henderson of Crane, James Henderson of Camden, Ark., and V.L. Henderson and Don Henderson, both of Odessa; three sisters, Ima Jean Rogers of Hobbs, and Hazle Fleeners of Oklahoma, three grandchildren and two step-

At the tea, Mrs. Jerry Roan, president, introduced her officers for the coming club year. They are Mrs. Allen Hitchcock, first vice president; Mrs. Guy Hall, second vice president; Mrs. David Kirk, recording secretary; Mrs. Larry Peel, corresponding secretary; Mrs. Roy Blair, treasurer;

Garments being recalled by manufacturers

WASHINGTON (AP) - About 50,-000 women's garments are being recalled because of a danger they will catch fire, a clothing manufacturer and the Consumer Product Safety

Conamission said Wednesday.
The Edgewood Chenille Co. of Tunnel. Hill, Ga., and the commission said the recall applies to thousands of garments sold nationally since 1975, including women's bathrobes, jackets, shorts and tube tops

"Since December 1978, three women have been burned when their bathrobes caught on fire. One of the women was seriously injured with second- and third-degree burns which covered 25 percent of her body," the joint announcement said.

The commission said seven of 10 garments failed to pass the federal flammability standard for adult apparel in laboratory tests.

All the recalled garments are made of 100 percent cotton chenille, which is described as "a soft, unribbed fabric with a high, fuzzy nap."

They have been sold under the "Ed-

gewood" and "Wrappers" labels in department stores and ladies' ap-

The bathrobes are floor length and long sleeved, and wrap in front. They have been sold at prices ranging from

The jackets are waist length and long sleeved. Some are fashioned as "fitted blazers" with notched collars and padded shoulders and others as pullovers with hoods and elastic waistbands. They have sold for about \$30 to \$35.

The boxer-style shorts also have elastic waistbands and have sold from \$12 to \$15. The tube tops are fully elasticized, strapless garments that have retailed from \$10 to \$12.

The commission and the company said women who own the garments should return them to their retailers for free replacements that comply with the flammability standard.

Consumers' questions can be addressed to Edgewood Chenille Co., P.O. Box 14, Tunnel Hill, Ga. 30755, telephone 404-935-3121 or to the commission's toll-free hotline. The hotline numbers are 800-638-8326 in most states, 800-492-8363 in Maryland and 800-638-8333 in Alaska, Hawaii, Puerto Rico and the Virgin Islands.

Falling ice cuts hole in home's ceiling, roof

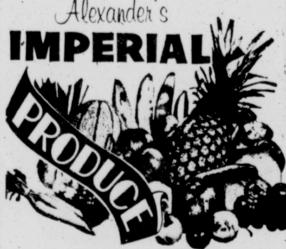

FREDERICKSBURG, Va. (AP) - After the ice had hit and splintered into tiny bits, David Brooks decided no one would believe him, so he collected a few pieces for evidence.

His next-door neighbors, though, had proof aplenty when they came home about four hours after a large chunk of ice had come careening out of the northern sky in Spotsylvania County Tuesday.

The neighbors, Mrs. and Mrs. Lewis Simms, found a gaping 21/2-foot hole in the ceiling and roof of their single-story home. Brooks said he was in his yard waxing his father's

car about 11 a.m. when "I heard something of speed like it had a whistle behind it." A small explosion-like sound followed, "and then I saw it hit the house and pieces of ice splintered all

over the place. That's why I picked these up. I thought no one would believe it," Brooks said. Alexander's

World equality for women possible only with sweeping changes

UNITED NATIONS (AP) - The United Nations surveyed the state of the world's women in 1979 and reported today that they can only be raised to equality with the male half of the population by "political, social and cultural change on a scale unprecedented in human history.'

Most of the more than 2 billion women "have never had the opportunity even to ask for an improvement in their situation," said the report issued today by the U.N. Center for Scoial Development and Humanitarian Affairs. "Such an improvement has to come through changes in the whole society."

Old-fashioned meat market a thing of the past

By MERLE ELLIS

When I first started working in a meat market a year or two into World War II, there was only one kind of meat market around. Some were larger than others and some employed more butchers than others, but they were all essentially the same. They were what has since become known as "conventional" markets.

In a supermarket, in a small grocery store (there were lots of those then) or in a store by itself stood a meat case from 10 to over 100 feet long behind which from one to a dozen or more butchers plied their trade. In those days, even in large supermar-ket chains, the head butcher (we called him, though not always to his face, "the meat head") ran the meat market.

He bought the meat from the local packer and was responsible for its quality. He supervised the training of apprentice butchers, did the hiring and firing and saw to it that things were done right, which is to say, his

He made sure that we made sure the customers got what they wanted. They were customers then, not "consumers," and they were always right. Being "meat head" in those days was akin to being master of your trade in the ancient guilds of England, an honorable and respected position.

Then, because of the war and the resulting lack of manpower, and because we all became much more concerned with saving time (of which there was little with everybody working) and less concerned with saving money (of which there was plenty with everybody working), self-service meat cases came into existence. In most self-service meat markets, there are no butchers; they are meat

While there is in most markets a market manager, he has little of the power and responsibility of the "meat heads" I worked for. Very probably, he does not buy the meat he sells. He may order what he needs from week to week from "the head office," but he has little to do with its quality. That is determined by company poli-

THURS.

He very likely does not age the beef he sells; that is a costly process and not in keeping with most supermarkets' "company policy." He and the meat cutters who work under him are not apt to be cooks or to know much about cooking. They do not have the opportunity even to talk about cooking with their customers as the butch-

ers in a conventional market did. As a result, they can't pass along to you today a great tip or recipe that they got from Mrs. Jones yesterday.

There are advantages to modern supermarkets, though. The greatest advantage is price. With the increases over the years in labor costs and transportation, meat would be priced considerably higher (even) than it is if it weren't for self-service markets. And they do save time. You don't have to take a number and wait to talk to the butcher.

kets around - rot many, but some. Meat will almost certainly cost you more there, but on occasion, it's

worth it. Jack Shelton, one of this country's most respected restaurant critics, offers this advice regarding dining out: "When you're eating out simply to avoid cooking at home, seek out some place cheap. Then with the

money you save, treat yourself on occasion to some place splendid. Don't waste your money continually on the many piaces mediocre. The same rule of thumb can be applied to buying meat. For the day-in-day-out, feed-the-family cooking that most of us do most of the time, seek out the market that is the least expensive. The quality of meat available in most supermarkets is very much the same and generally not the best, so don't go there for great meal makings. Stay away from the expensive steaks in most supermarkets. Go there instead for their stew, frying chickens, ground beef and pot roasts;

family meals.

With the money you save, you may, on occasion, be able to afford a really great steak or a well-aged Prime rib roast. For those, go to an old-fashioned conventional butcher, one who handles USDA Prime or heavy Choice beef and ages it to perfection one who will cut it to your specifications and may even be able to offer a

¿ teaspoon baking soda teaspoon salt 1 large egg 1-3rd cup sugar

cup sour cream

cup butter, melted 4 large freestone peaches (about 11/2 pounds)

Prepare Batter Topping and reserve. In a small bowl stir together flour, baking powder, soda and salt and reserve. In a small coming Soon!..... salt, and reserve. In a medium bowl beat together until blended egg, sugar, sour cream and butter, and reserve. Cover peaches with boiling water and let stand off heat until skins loosen - usually a few minutes; drain; slip off skins; cut each peach into eighths, discarding pits. Add reserved flour mixture to egg mixture and stir only until dry ingredients are moistened; if too stiff to spread, stir in a tablespoon or so of extra sour cream. With a small spatula, spread batter evenly over bottom of a buttered, 2-quart, oblong glass baking dish (11% by 71/2 by 13

inches). Sprinkle with Batter Topping; arrange peaches, cut side up, over it. Bake in a preheated oven, on rack below center, until bottom is a deep golden brown - 35 minutes. (Peaches will look slightly dry on top, but they will taste juicy.) Serve hot or warm. Makes 8 servings.

Batter Topping: Stir together 1-3rd cup granulated sugar, 1-3rd cup firmly packed light brown sugar, ¼ cup all-purpose flour, 1 teaspoon cinnamon and ¼ teaspoon cloves; work in 1/4 cup butter.

Oil carriers same environmentally, says department y continually diocre.

WASHINGTON (AP) - None of the four pipeline plans proposed for carrying Alaska oil to the energy-hungry Midwest offers significant advantages environmentally, the Interior Department says. Generally, the impacts of the proposed four systems would be similar," said an environmental impact

statement released Tuesday. It was impossible to compare how the four proposals would affect the environment because the statement did not consider the impact of pipeline segments that would run through Canada. Only one of the proposed systems — the Northern Tier plan would lie entirely in the United

A west-to-east pipeline, it is argued, is needed to move to the upper Middle West and East surplus crude that flows through the Alaska oil pipeline from the rich North Slope fields.

Firm to get refund help

TALLAHASSEE, Fla. (AP) - Two Texas oil companies and a man convicted as the mastermind of an oilprice "daisy chain" have agreed to join Florida Power Corp. in a \$5 million refund to the utility's customers who were allegedly overcharged,

The agreement was announced Tuesday by state Attorney General Jim Smith. It provides that Florida Power itself will pay only part of the settlement.

An earlier settlement rejected by U.S. District Judge George Carr had called for \$6 million in refunds by Florida Power.

Under the new agreement, the St. Petersburg-based utility's 600,000 customers could receive \$3 or \$4 refunds, Smith said.

He added the agreement is subject to approval by the state Public Service Commission, a federal judge and the Justice Department, which has a lawsuit pending against other defendants in the case.

Corporate defendants - Florida Power Corp., Aminoil and Charter Oil - agreed to refund \$4.5 million.

The rest would be paid by Raymond F. Granlund, who was sentenced Friday to three years in prison for his part on the scheme, Smith said. Smith said he was optimistic an-

other \$1 million can be recovered from other companies and individuals involved in the deal.

Granlund received \$1.9 million in oil-deal commissions through a socalled daisy chain of companieslthat sold fuel oil among themselves raising the price along the way before finally selling it to Florida Power Corp.

A total of five Texas oilmen have been found guilty in federal court in connection with the scheme, and a former Florida Power Corp. chairman has pleaded guilty.

production.

line carries nearly 1.3 million barrels of oil daily from the North Slope to the Valdez terminus, a distance of about 800 miles. At Valdez, the oil is loaded on tankers for shipment south, through the Panama Canal to refineries in the Midwest and East. West coast refineries do not have the capacity to handle the huge quantities of Prudhoe Bay oil. Many say the tanker transportation system is inadequate

and potentially hazardous. The four west-to-east pipeline proposals are under study by Interior Secretary Cecil Andrus, who must recommend one to President Carter by Oct. 15. Carter must forward his decision to Congress in December.

Here is a brief description of each of the four pipeline proposals. All are joint ventures by assorted corpora-

-Northern Tier. Oil would be shipped by tanker from Valdez to Port Angeles, Wash., and then via a 1,491-mile pipeline running along the northern border of the United States to Clearbrook, Minn. It would link with existing pipelines along its route and at its Minnesota terminus. The estimated cost is \$1.23 billion. The daily capacity would be 709,000 barrels. The Energy and Agriculture departments have endorsed it as the best of the four. It is the only one that lies wholly in the United States.

-Trans-Mountain. Endorsed by the Environmental Protection Agency as the best choice, this proposal calls for oil to be shipped by tanker to Low Point, Wash., and moved via a 823mile pipeline to Edmonton, Alberta, where it would connect with existing pipelines that could carry the crude to the Great Plains and Midwest. Estimated cost: \$525 million. Capacity: 500,000 barrels a day.

-Northwest Energy. Originally, this plan called for oil to be shipped by tanker to Skagway, Alaska, and then via a 710-mile pipeline to Keg River, Alberta, where it would link with existing pipelines to carry the crude to the United States. The Defense Department says this route provides the best security. But in early August, the proposal was changed. The new route would eliminate the water leg. The latest proposal calls for a 1,119mile land pipeline running from Big Delta, Alaska, to Keg River. Estimated cost: \$1.4 billion. Capacity: 500,000

-Kitimat. Oil would be moved by tanker to Kitimat, British Columbia, and then via a 761-mile pipeline to Edmonton, where it would connect with existing pipelines. This proposal has been rejected by the Canadian cabinet and has been declared environmentally unacceptable by the EPA. Estimated cost: \$850 million. Capacity: 500,000 barrels a day.

Earlier this summer, Standard Oil Co. (Ohio) withdrew its entry for a pipeline from Long Beach, Calif., to Midland, Texas, where it would hook up with existing pipelines. Sohio dropped the 1,026-mile proposal, citing a five-year battle with governmental regulations that resulted in the estimated cost of the project doubling over that period.

Gulf Oil stakes trio of projects

Gulf Oil Corp. has announced three projects in Ward County.

The operator's No. 1-XU State, a 13,300-foot opertion is to be drilled in the War-Wink, South (Wolfcamp) pool, 7.5 miles northwest of Pyote. It is 1/2 mile east of Wolfcamp production.

The project will investigate other zones in the area as a wildcat.

Locaton is 933 feet from south and 1,707 feet from east lines of section 13, block 18, University Lands survey.

Gulf No. 5-XV State will be drilled as a 5,700-foot project in an attemtp to extender the Block 17, Southeast (Delaware oil) pool one and one-quarter miles northeast.

It is 933 feet from south and 1,278 feet from west lines of section 13, block 18, University Lands survey and eight miles northwest of Pyote.

Gulf No. 5-WZ State, 4.5 miles northwest of Pyote, will be drilled as a project in the Caprito (Delaware middle oil) pool and Block 17, Southeast (Delaware oil) field.

It is 550 feet from north and 2,200 feet from west lines of section 38, block 17, University Lands survey.

The drillsite is 7/8 mile west of the Block 17, Southeast (Delaware oil) porduction and onequarter mile west of Caprito (Delaware middle oil) produc-

The Block 17, Southeast pool has 17 oil producers, and the Caprito (Delaware middle) pool has 19 producers.

Gasoline available

By THE ASSOCIATED PRESS

Gasoline prices this Labor Day weekend will be about 30 cents a gallon higher around the nation than they were a year ago, but motorists should be able to find fuel.

One possible problem area is northern California, where the state has gone to court to block a threatened shutdown by 1,200 members of the California Service Station Association to protest low profits.

San Francisco Superior Court Judge Ira Brown said Wednesday he would act today on Deputy Attorney General William Clark's motion for an injunction. The state says the protest would violate antitrust law and harm recreation-oriented businesses.

But attorney John Hawkins said the group's plan to hold a convention in Sacramento beginning Friday was an exercise of constitutional rights to free speech and petition of govern-

WINKLER RE-ENTRYA

Simpson Brothers Oil Co. of Odessa announced plans to re-enter a wildcat failure in Winkler County and attempt to complete it as the third well in the Paladin (Clear Fork) pool.

One mile west of Clear Fork production, it is 760 feet from north and east lines of section 32, block A. G&MMB&A survey. It originally was drilled and pluged by Hilliard Oil & Gas Co. as the No. 1-E Sealy-Smith in

December 1975. It will be tested above 6,000 feet.

crude has spilled from the Mexican well since it blew out June 3, spewing 1.25 million gallons of oil a day into the Bay of Campeche, 500 miles Engineers for PEMEX, the state-

run Mexican oil company, say they hope to cap the well by drilling two relief wells, which are scheduled for completion in mid-September and early October. Steel and lead balls are being pumped into the well and have helped cut the flow from the initial 30,000 barrels per day. Open water containment booms and skimmers are sweeping up some of the oil at the well head, and engineers have begun steps to lower a funnel onto the well to cut the flow and trap the oil.

The spill is more than 30 million gallons higher than the worst previous, that of the wreck of the supertanker Amoco Cadiz off the French coast in March 1978.

Stock market mixed

NEW YORK (AP) — The stock market continued in what one analyst called a 'tug of war' Wednesday, ending with prices little thanged for the second conecutive session.

The Dow Jones average of o industrial stocks finished with a slight .26 gain at 84.90. The index slipped .77 it the previous session.

Gainers and losers were about evenly matched with 71 issues advancing, 733 declaing and 414 unchanged on the New York Stock Exchinge.

he Dow Jones average slipped in the early going after the Department of Cormerce reported a .4 per-cen decline in July in the inde of leading economic indiators. It was the third declne in the past four mon's in the index designed to firecast economic

A deline in the index had been expected, analysts said, ht the report provided little trection to the mar-

The low industrial fell by as mud as 2 points at midday, bt drifted upward in late traing to post a slight gain at te 4 p.m. close of the NYSE.

Bankig and financial stocks ontinued mostly lower fo the second consecutive dayin the wake of rising interst rates and increasedmoney market costs. Oilstocks were generally lowr after gains earlier in the teek.

Penncori Financial rose % to 10½ fter gaining 1% Tuesday in he second con-secutive da of active trading. In respose to a query by the NYSEthe Californiabased compay said it knew of no non-publ information that should affet its stock.

American Cynamid said it knew of no reson for the activity in its seck and in response to a qustion, said there was no asis for rumors of a merer. Kaufman & Broad hatno com-

The NYSE colposite index of all listed mmon stock slipped .02 ti61.18. Standard & Poor's itex of 400 industrial stocks rie .06 to 121.05. S&P's 500 tock composite index wasunchanged at 109.02.

On the American Sck Exchange, the market vae index fell .86 to 215.59. le NASDAQ composite of ove the-counter trading rose ... to 150.04.

Livestock

AMARILLO, Texas (AP) — Trade fairly active in the Panhandle area Wednesday. Slaughter steers steady to 1.50 higher, heifers 50-75 higher. Feedlots reported very active interest early, only fair inquiry late in the day. Sales for the week total 23,500. Sales on 8500 slaughter steers and 4300 heifers. All live cattle prices based on net weights f.o.b. the feedlot after 4 percent shrink.

Slaughter steers: Good and mostly

shrink.
Slaughter steers: Good and mostly choice 2-3, 70-80 percent choice, 1023-1200 lb 65, 50-67.00, late mostly 66,00-67.00.

BUSINESS MIRROR Middleman may not be culprit, as public thinks

By CHET CURRIER **AP Business Writer**

NEW YORK (AP) - President Carter's recent criticism of the "middleman" in the food industry has revived an old and bitter debate.

Whenever food prices rise at a painful rate — which seems to be most of the time these days consumers naturally start asking who's responsi-

And when prices on the supermarket shelf keep rising while farm prices decline, as has happened in recent months, the search for a culprit is bound to turn to the processers, distributors and retailers of

This collective "middleman" has never been a very popular guy, in any business or profession. The term itself has a distinctly pejorative ring, like 'money changer" or "10 percenter."

"It is well known what a middleman is," the British statesman and author Benjamin Disraeli said in a speech delivered 134 years ago. "He is a man who bamboozles one party and plunders the

But at least one voice, that of the weekly Financial Digest published by New York's Manufacturers Hanover Trust, has been raised in defense of the

middleman in the current food-price situation. First of all, the bank says, "The response of retail prices to changes in farm prices is not immediate. In the past it has taken two to three months before farm price drops were reflected at the checkout counters. Consequently, expectations of lower food prices resulting from recent farm price declines have been somewhat premature.'

Secondly, the bank points out, the rise of retail food

prices has in fact slowed lately.

That argument is supported by the government's consumer price data for June and July, which showed rises of only 0.2 percent and 0.1 percent, while the index of all prices was jumping a full percentage point in each month.

In addition, the bank says, costs of processing, distributing and selling food account for more than half of its retail price, and in an inflationary environment they can easily offset small declines in

During the second quarter, it noted, food industry labor costs rose at a 7.4 percent annual rate, while packaging costs climbed 16 percent and energy costs were up by almost one-third.

There is even some evidence that the middlemen have absorbed some of those rising costs rather than passing them on, Manufacturers Hanover's economists maintain. The middleman's average share of the retail food dollar actually declined from 60.7 percent in the first half of 1978 to 59.5 percent in the first half of this year.

And the profits of food processors and retailers increased by a relatively modest 15 percent in the first half, while those of all industries posted a 29

percent rise. Thus, the bank contended, although the spread between farm and retail prices widened by 6.5 percent from early spring to mid-summer, the situation does not seem to have "unduly benefited" the

middleman. deliberate pricing actions by segments of the food industry to capture a larger share of the consumer food dollar, the widening of the farm-retail spread is indicative of the major economic problem of our

time - inflation." The debate over the middleman's role will continue, of course. Like inflation, it seems to be something that just won't go away.

Mailer novel relates story of killer Gilmore

By DAVID BRISCOE

SALT LAKE CITY (AP) - Executed killer Gary Umore is described as sometimes crude and violent d sometimes artistic and gentle in Norman Mailes upcoming book on Gilmore's 1977 Utah execu-

excerpt from the 1,100-page "true-life novel," wapublished this week in Playboy magazine, 2½ yea after a Utah firing squad granted Gilmore his wide publicized death wish.

A layboy spokesman said the three-part piece will the longest the magazine has ever published, reprenting about 15 percent of the book, "The Execumer's Song.'

The okesman, West Coast editor Larry Dietz, decline to say how much Mailer was paid for magazii rights. Promoter Lawrence Schiller, who conducte many of the interviews, said the families of Gilmo's two robbery-murder victims in Provo, Utah, wiget the largest percentage of the book's proceeds at to Mailer and himself. He would not say what he percentages are.

In the Pyboy installment, Mailer describes inti-mate and plicit details of Gilmore's relationship with his lor, Nicole Barrett, prior to the two murders for hich he was executed Jan. 17, 1977. Nicole haseen kept away from news reporters,

first by autholies and then by Schiller, who paid her to allow her li to be portrayed in a movie, which he said won't be med for three years. Gilmore washe first person to be executed in the

United States | more than a decade. The only execution sinceyas that of John Spenkelink, who died in the Flora electric chair earlier this year. Gilmore's stor earned headlines when he demanded the deathenalty, saying it was better than

a life in prison. The Mailer accout chronicles Gilmore's life in the Provo area after h release from 13 years in pris-

"Gary wasn't coing into an average community," Mailer writes.
