Hurricane Frederic roars toward Gulf

MIAMI (AP) — Hurricane Frederic, described as "extremely dangerous," roared toward the Gulf Coast today with winds of 130 mph as residents of three states were beginning to evacuate.

Forecasters warned it could become the most vicious hurricane to hit the area since Camille caused widespread death and destruction a decade ago.

The National Guard was called out in the Florida Panhandle and schools were closed in three states. One man was killed and another was reported missing as 2,500 offshore oilfield workers were leaving rigs in the path of the storm.

At 8 a.m. EDT, Frederic, packing winds of 130 mph, was located about 180 miles south of Pensacola, Fla., and about 245 miles southeast of New Orleans, near latitude 27.6 north, longitude 87.3 west. The storm was moving northwest at 12 mph and was expected to remain on that course most of the day.

Hurricane warnings were posted from Panama City, Fla., to Grand Isle, La. Forecasters said the storm was "extremely dangerous."

The National Hurricane Center in Miami said Frederic was "one of the most intense hurricanes to threaten the central Gulf Coast during this century."

The storm, picking up strength, was approaching No. 4 on the National Hurricane Center's 1-5 rating scale. Camille, one of the two strongest U.S. storms this century, was a No. 5, a "catastrophic" hurricane. It took 256 lives.

In Mobile, Ala., Civil Defense Director Norman Davis said residents were ordered to evacuate coastal areas, house trailers and flood-prone areas along the rivers and roadways. Emergency shelters were set up at high schools.

Across Mobile Bay in Baldwin County, Ala., officials recommended the evacuation of the entire Fort Morgan peninsula.

Frederic was expected to kick up tides 5 to 15 feet above normal.

Residents in low-lying areas of Plaquemines Parish, La., were ordered to evacuate this morning. Those remaining on Grand Isle were packing up.

Florida Gov. Bob Graham called out the National Guard to assist in the evacuation and ordered schools closed in five western Panhandle counties.

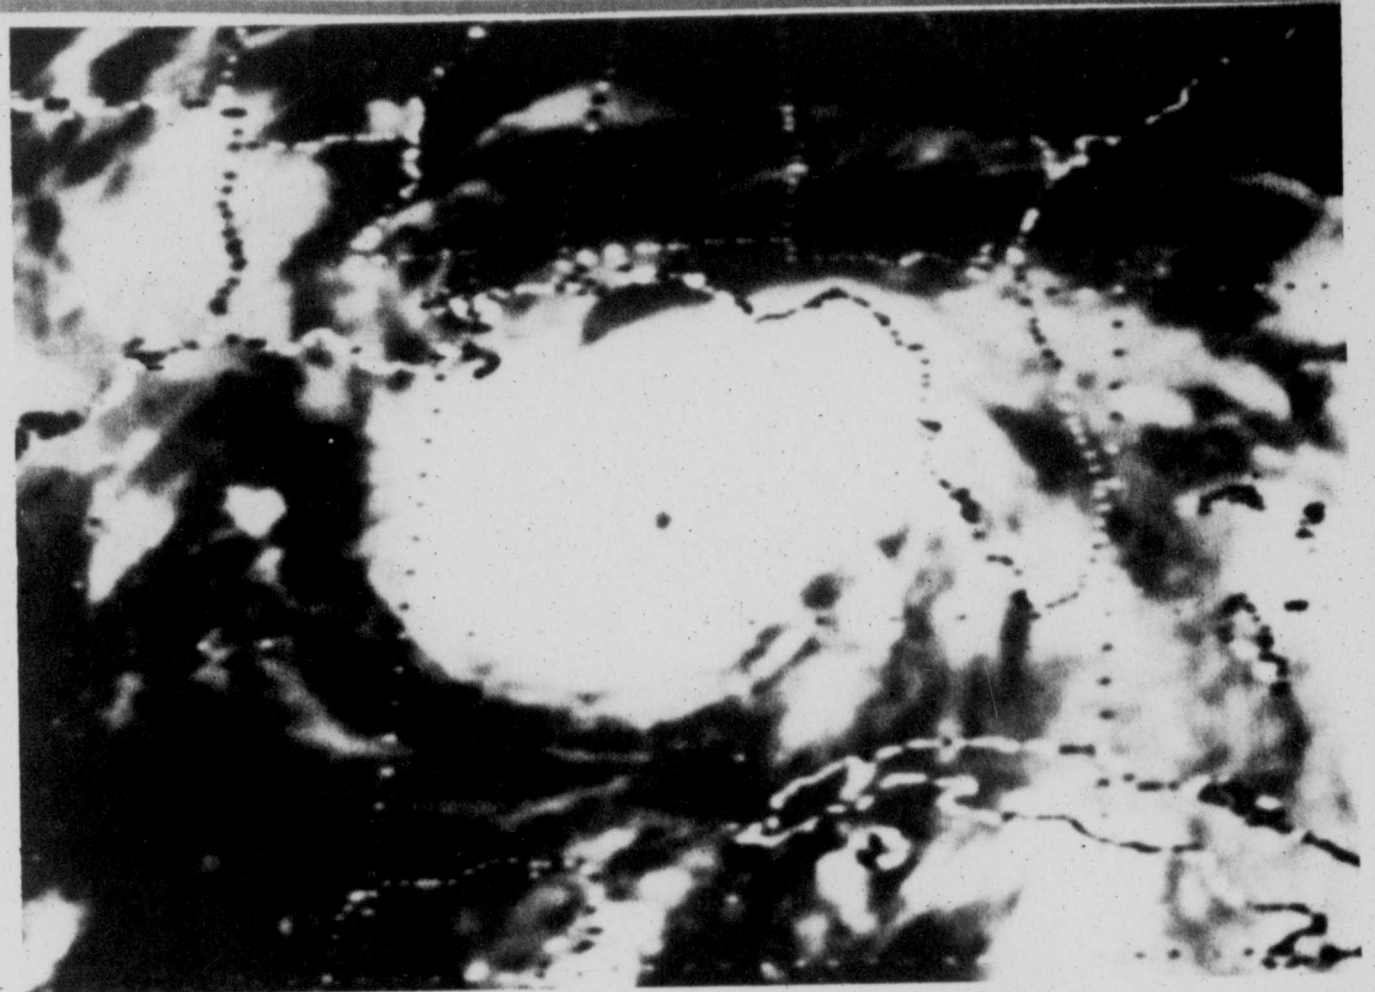

Residents of Pensacola moved their boats, taped their windows and crowded hardware stores to purchase hurricane supplies.

Red Cross disaster teams and mass care specialists from all over the southeast converged on the vulnerable Gulf Coast.

"We have a big truck load of disaster supplies on the way from Birmingham," said Terry Lockman, director of the Red Cross in Pensacola.

Sgt. Roy Wilson, a spokesman for the Escambia County sheriff's office in Pensacola, said persons who

Slain man drowned in own blood, pathologist says

By BILL MODISSETT
Staff Writer

Army Sgt. J.B. England drowned in his own blood July 18 after being shot about 10 miles east of Midland on Interstate 20, the pathologist who performed an autopsy on England testified Tuesday.

Midlander Raymond Wesley Mathis, 20, is on trial in 238th District Court on a charge of murder in connection with Sgt. England's death. Mathis has pleaded innocent to the charge.

Testimony resumed at 9 a.m. today. Witnesses were to include members of Mathis' family, who have been called by the state. The trial is expected to continue until late this week.

Dr. David W. Shneidman, a Midland pathologist, testified Tuesday afternoon that the autopsy performed on England revealed four bullet wounds, three in the face and one in the arm.

Blood from one of the wounds, Dr. Shneidman said, flowed into England's air passage. The human body does not repel blood as it does foreign substances, and the sergeant literally drowned in his own blood, according to Dr. Shneidman.

Under questioning by defense attorney Rusty Wall of Midland, the pathologist said he couldn't determine in what order the wounds occurred. He also testified only fragments of bullets were found in the sergeant's body.

Dr. Shneidman said he couldn't

determine from how far away the bullets were fired, but that he found no powder burns on England's body.

Earlier in the afternoon, testimony centered on the "chain of custody" of evidence entered into the trial Tuesday, including bullet fragments analyzed by the Department of Public Safety laboratory.

Sgt. Robert Defer of the Midland County Sheriff's Department said that he was present when the autopsy was performed on England. He said bullet fragments were retrieved from the back of the sergeant's neck and the chin area.

Much of the testimony Tuesday afternoon focused on the July 18 arrest of Mathis in Ward County.

Lt. John Kleinhans told the court that he and Sgt. Pat Fuller were

present July 18 when Mathis was arrested following a high speed chase on I-20.

The two deputies had gone to Monahans in search of a car fitting the description of one they passed on I-20, Kleinhans said. The car was traveling east and the two officers were driving west, he said.

After they turned around, Kleinhans said, they followed the vehicle, at times driving 110 mph as the pursued car's speed increased.

The officers radiod ahead and other law enforcement officers responded by setting up a roadblock with their vehicles on I-20, according to Kleinhans.

After Mathis was arrested, Klein-

hans said, the man was taken to Monahans, where he was informed of his rights by a Monahans peace officer.

The defense has contended throughout the trial that Mathis' arrest was improper. But deputies testified Tuesday that a warrant for the man's arrest was being prepared when he was arrested in Ward County.

Mathis was informed of his rights in Monahans after being arrested and in Midland after he was returned here, deputies testified.

Testimony earlier in the trial indicated an inventory of the car Mathis was driving — performed July 20 — revealed .22-caliber spent cartridges and .22-caliber .75 caliber and

.38-caliber live rounds. According to previous witnesses, England was shot about 4:30 a.m. July 18 about 10 miles east of Midland on I-20. He died shortly before 6 a.m. that same day at Midland Memorial Hospital.

An investigation of the shooting incident revealed glass fragments on the highway from the van's shattered windows and a piece of metal believed to be a slug fired from a weapon.

A second man who was arrested the same day as Mathis, Kelly Joe Chambliss, has yet to be tried.

Testimony in the Mathis trial began Monday. The case is being prosecuted by Assistant District Attorney Charles W. Seltzer.

Congress ready to give Carter what he wants on energy

WASHINGTON (AP) — A House committee is ready to approve legislation to speed development of high-priority energy projects, after concessions by President Carter that led to a prediction Congress will give him much of what he's seeking on energy.

The House Commerce Committee arranged to meet today for what aides said would be a final day of debate on a bill establishing an energy mobilization board.

The board would have strong powers to cut through red tape hindering completion of high-priority energy projects, including the authority to recommend waivers of federal, state or local laws.

While only the president would have the actual authority to waive a law — subject to a veto by either house of Congress — the provision has drawn strong objection from groups including environmentalists, governors and some liberal members of the committee.

At Hartford, Conn., today, the president announced an expanded program to provide \$2.4 billion a year in federal allowances to help the poor and other disadvantaged Americans cope with rising energy costs, starting with \$1.6 billion this winter. The average for individuals would be about \$100 a year, and double that for families.

Carter, meeting at the White House Tuesday with members of the Senate Energy Committee, said he wants the mobilization board's authority limited to assuring that decisions relating to construction are made promptly.

The president told the senators, as well as a group of governors in a second session, that he does not want the board to run roughshod over state laws or rights.

Carter's position conflicts with the word put out by Energy Department lobbyists who have been working hard to defeat amendments that would water down the waiver provision in the measure.

In his discussion with the senators, Carter also agreed to scale down significantly his \$88 billion plan for development of a synthetic fuels industry.

Sen. Henry Jackson, D-Wash., chairman of the Sen-

ate Energy Committee, declared after the meeting that Carter was "more cooperative than I have seen him in a long time."

As a result, Jackson said, "He's going to get the bulk of what he's asked for."

During his meeting with the governors, Carter assured them that his goal of stockpiling 240 million barrels of heating oil and diesel fuel before winter is ahead of schedule.

And in a later meeting with the executive committee of the National Governors' Association, Energy Secretary Charles W. Duncan promised to see that the heating oil gets delivered to those who need it.

Meanwhile, 15 senators expressed concern over recent increases in the cost of home heating oil in a letter asking Duncan to seek a price rollback and consider reimposing price controls if the increases are proven to be unjustified by the price of crude oil.

The cost of home heating oil has jumped from about 53 cents a gallon last December to about 80 cents now.

However, outgoing Deputy Energy Secretary John F. O'Leary told a reporter Tuesday that he doubts home heating oil prices will rise much more in the coming months.

The president originally had called for a synthetic fuels program capable of producing the equivalent of 2 million barrels of oil daily by 1985. But critics, including three private consulting firms hired by a Senate Budget subcommittee, have said the program is too ambitious.

Sens. J. Bennett Johnston, D-La., and Pete Domenici, R-N.M., said Carter indicated he would accept a slower and smaller synthetic fuels effort costing about \$20 billion in its first phase. It would produce about 500,000 barrels daily.

As Carter held his White House meetings, a House-Senate conference committee handed the president a victory in discussions over a compromise gasoline rationing bill.

School bond plan pared to just over \$10 million

By SUSAN TOTH
Staff Writer

They had to cut and scrape, but Midland school trustees Tuesday presented a preliminary bond plan that kept their promise of staying in the neighborhood of \$10 million.

About 30 persons attended the meeting.

The \$10.26 million proposal will get another reworking before the Oct. 23 bond election formally is called in a special meeting at 5 p.m. next Tuesday.

Half the bond money — with the issue to be presented to voters in a one-vote, all-or-nothing format — is earmarked for improvements at Midland High School, including building a new athletic facility and remodeling the old gym into a new learning resources center or library.

Expanding library facilities at the 50-year-old building is one of the major purposes of the MHS renovation, trustees said.

Of the \$5.3 million set aside for MHS, \$1 million will be used to purchase land adjacent to the campus for new athletic fields, the new athletic facility and parking lots.

Trustees removed a strip of houses on Tennessee Street from the area to be purchased, reducing the number of homes displaced in the area from 21 to 13.

The area they plan to purchase now includes lots between Illinois Avenue

and the alley behind Tennessee Avenue from the MHS campus to F Street.

The physical education facility will cost about \$2.2 million, with library-learning center getting a \$500,000 renovation.

Other major items included in the "draft" bond issue are:

—\$1.27 million for improvements at Lee High School, including \$500,000 for a vocational agriculture farm project area and \$313,000 for air conditioning and boiler replacements.

—\$431,000 for other vocational facilities, including a building trades facility to be shared by the two high schools and improvements at two junior high schools.

—\$797,400 for other capital improvements, including maintenance and upkeep projects at most of the schools in the district, the largest single expenditure being \$210,500 for re-roofing three elementary schools and Alamo Junior High School.

—\$2.1 million for a new elementary school in the growing northeast section of Midland and related costs.

Effect of passage of the bonds on the school tax rate — now at \$1.26 per \$100 valuation — was not known Tuesday, trustees said.

A rough estimate of a 10 percent increase was offered, but trustees stressed final figures would not be ready until next Tuesday's meeting. The district is in very good shape

financially, Trustee Joe Dominey noted, "and personally, I think the increase is going to be a nominal amount. With our growing tax base, the effect on homeowners will be almost negligible."

Trustees heard a variety of opinions on their bond package from the assembled citizens, many of whom own homes next to Midland High School.

Most prevalent opinion was "you're biting off too much."

But at least two members wanted something added to the package.

A member of the Lee Band Boosters, noting an expenditure for expanding the MHS band hall, put in a pitch for similar expansion of the Lee facility.

"We've got kids sitting elbow to elbow trying to blow their horns," she noted.

"This is the kind of thing we've been faced with all along," said Trustee Ed Runyan, one of a two-man committee that prepared the preliminary bond plans. "We've tried to keep this to a bare minimum."

Lee's head basketball coach Paul Stuckler made a plea for a new workout facility at that school to take some of the load off the gym so boys and girls teams could practice.

He presented plans for a \$300,000 fully equipped metal building he said would serve the needs of the school

(See BOND, Page 4A)

SEDCO gets interim protection

GALVESTON (AP) — An order signed by a federal judge gives SEDCO Inc. an interim guarantee against liability for the massive oil spill caused when an offshore drilling rig it leased to Mexico blew out June 3.

U.S. District Judge Robert O'Connor granted the interim guarantee Tuesday and set Oct. 23 as the deadline for the filing of all damage claims in federal court.

O'Connor's action came after attorneys for the Dallas-based company founded by Gov. Bill Clements, whose interest are being held in a blind trust, asked the judge to exonerate it of all liability or set its liability for damages caused by the oil well mishap in the Bay of Campeche to \$300,000.

The company's attorneys say that is the amount SEDCO would have earned in the lease to the Mexican drilling company.

No claims have been filed yet, but SEDCO attorney Eugene J. Silva said various parties have indicated intentions to do so and may ask O'Connor for a deadline postponement.

Clements, who is traveling in the Soviet Union, has said, "There is no foundation for any statement that SEDCO is responsible (for the blowout) or the equipment was defective."

Attorney General Mark White, who has advocated suing Mexico for damages

from the oil spill that has been called the worst in history, said the legal action raised serious questions in his mind.

"This is exactly the type of precipitous legal action which they and the governor have asked us not to engage in," White said from his office in Austin.

"Until now, we have accepted in good faith their statements regarding the sinking of their drilling equipment," he said, "but the filing of this suit raises strong suspicions that their prior acts were merely an attempt to destroy evidence."

White also accused the company of withholding facts concerning the role played by SEDCO employees when the oil well blew out.

"I was distressed to learn last Saturday that there were seven SEDCO employees on the platform with some degree of operational control," he said, "after they indicated to me that the rig was merely a 'bare-boat' charter."

"I think that SEDCO has been less than candid with the attorney general and with the people of Texas," he said.

The governor's son and president of SEDCO, Gil Clements, said his company was not responsible for the mishap.

Council to canvass results of election

Results of the Sept. 4 bond election will be canvassed when the Midland City Council meets at 1:30 p.m. Thursday in the City Hall Council Chambers.

Out of the nine proposals in the bond election, three passed — \$7.8 million in revenue bonds for expanding the sewer plant and water system and \$6 million in general obligation bonds for street improvements.

The council also will consider a letter agreement with the First Southwest Co. on water and sewer revenue refunding bonds.

Carrying through on the Aug. 14 decision to construct a new Federal Aviation Administration building, the council on Tuesday will consider purchase of \$500,000 in airport revenue bonds and an ordinance authorizing issuance of those bonds.

Assistant City Manager Fred Poe said the new building, including a parking area at Midland Regional Airport, will cost close to \$700,000. But revenue bonds left over when new hangars and facilities for Rich-Air Co. will complete the amount needed for the FAA building.

Rent paid by the FAA on the building will pay off the bonds, Poe said. A second reading on an ordinance approving increasing water, sewer and garbage rates by 10 percent is on the agenda.

The council also will consider a resolution appropriating about \$200,000 to purchase rights of way for Loop 250, or North Loop. The money will

come from the 1975 street improvement bond issue, Poe said. Part of it will be reimbursed by the state after the city can show proof the land was purchased and for how much.

A resolution to change the number and method for selecting directors of Midland County Appraisal District will be discussed by the council. Under new state law, all taxing bodies within a county can be combined into one office.

Green fees and rule changes at Hogan Park Golf Course will be discussed.

The council also should award a contract on constructing a fence around Hogan Park.

Midland Boxing Club, Inc., is requesting to lease a portion of the old Girl Scouts Building at Elkin Park.

The council is scheduled to consider authorizing Parkhill, Smith and Cooper, Inc. to update a study on runway 7-25 at Midland Air Park, prepare plans and specifications on it and advertise for bids. A grant agreement with General Aviation Taxiway for construction at Midland Regional Airport will be considered.

Parking along Neely Avenue in front of Lee High School will be reviewed by the public works department. Also under that division is the acceptance of three units of assessment paving.

Various public hearings on requests for zoning changes are scheduled with the first beginning at 1:35 p.m.

Midland LWV slates tour of vocational ed facilities

Midland League of Women Voters has slated tours of the vocational education facilities of Lee and Midland High Schools this week.

League members and all other interested persons are asked to meet at 9:15 a.m. Thursday in the lobby of Lee High School auditorium.

Following this tour, the group will assemble at 10:15 a.m. at the Midland High School auditorium lobby.

These tours are an introduction to the league's local program, which is a study of special services in the Midland Independent School District. Carolyn Wallace is chairman of that study.

Persons wanting to know more about the tours may telephone Charleen Rosebery, 685-0563, or Mickie

Waters, 683-9304.

A review of Thursday's tours will be given by Mrs. Rosebery, league president, when the league meets at 7:30 p.m. that day in the home of Ms. Waters, 3002-B N. Pecos St.

Also speaking will be Jim Leeper, president of the Midland chapter of the Texas State Teachers Association. Leeper will review the upcoming school bond election and education in general.

The league is planning a public forum for early October on the upcoming school bond election.

Continuing its study of education, the league will hear Dr. Ruby Morris, coordinator of special education for MISD, during its Sept. 27 meeting.

Driver denies blaming bus maker

COLORADO CITY, Texas (AP) — A school bus driver testified he received a settlement from the owners of a truck involved in a fatal collision with the bus, but he denied blaming his injuries partly on the manufacturer of the bus.

William Clarence Dixon Jr., driver of the oil field servicing truck for Cardinal Surveys Co. of Odessa at the time of the accident, is charged with three counts of involuntary manslaughter in connection with that crash last December that killed four and injured 20.

If convicted, Dixon faces 10 years imprisonment and a \$5,000 fine. Former McCaulley School Superintendent Edd Farmer, driver of the bus, said Tuesday he signed a settlement with Cardinal Survey Co. of Odessa, which owned the truck.

However, he hedged when asked about statements in the documents accompanying the settlement that alleged his injuries may have been blamed partly on the manufacturer of the bus.

"Did you make the statement (in the document) that the primary cause of your injuries was in the manufacturing of the bus?" asked defense attorney Malcolm Shulz.

"I did not make that statement," replied Farmer, who also said he could not remember how much money he received.

Shulz then asked Farmer to read a figure from the document that U.S. District Judge Weldon Kirk allowed into evidence over the fierce protests of prosecutors.

Farmer read "\$163,835."

Farmer testified that an attorney prepared the document and it was

explained to him "in general details."

The bus driver also said he remembered nothing of the accident or events just before or after it.

"I just don't remember," he said. "I just don't want to think about it." He said he did not remember how fast he was going or whether he saw a flashing yellow signal above the intersection of U.S. 180 and FM 611.

Farmer also said he didn't remember "for sure" how many days he was in the hospital after the crash.

A co-worker of Dixon's, who was following the truck driver when the crash occurred, was recalled to the stand.

William English earlier testified he and Dixon had discussed maintenance of the truck's brakes and throttle a week before the collision.

Later, he said the truck was in good mechanical condition on Dec. 8.

English said earlier he and Dixon each drank two beers before the collision.

He testified Dixon was traveling at about 55 mph as he approached the intersection. Then, "he suddenly hit his brakes and the truck jerked to the left-hand side of the road" to pass another vehicle that was stopping in the intersection. He said Dixon never stopped in the intersection.

Connie Tutt, who lives on land adjacent to the intersection, testified she was driving east on U.S. 180 when the accident occurred.

"He (Dixon) was going pretty fast and I thought to myself if he doesn't start slowing down he's not going to be able to stop at that intersection," Mrs. Tutt said.

She added, however, she is "very poor" at judging other vehicles' speed.

School may be caught in taxing 'power play'

By SUSAN TOTH Staff Writer

Midland school trustees may be caught in the middle of a "power play" by three other taxing districts in the county, but they're working on a solution.

Under a new law passed by the Texas Legislature last session, cities and school districts within a county must establish a joint tax appraisal district.

Since the Midland school district already uses the city's tax office, that's no real problem.

The appraisal district will be administered by a board with representatives from each of the taxing bodies, with the votes weighted on the basis of the amount of money each district raises.

Using that system, MISD, with the largest budget in the county, would control about four-fifths of the votes on the board.

The law also gives county governments the option of joining the appraisal district this year.

Midland County agreed to do that this week, but only if the voting procedures are changed to give each entity only one vote regardless of its budget.

That would reduce MISD's voting power from a four-fifths majority to a one-sixth minority.

The city of Midland and Greenwood school district have already agreed to the county's plan, trustees noted Tuesday, leaving MISD and its big budget out in the cold.

"If we're going to get the blame (for taking the largest tax bite)," Trustee Parker Humes protested, "I'd like to have some say."

"I think we should express our concern to the city and the county," Trustee Johnny Warren noted. "A power play of this nature is not going

to be in the best interest of the taxpayers in the long run."

But trustees were left facing a possibility of the three other taxing agencies lining up in favor of the one-district, one-vote rule, in which case MISD can't overrule them.

"Let's go on the 'reasonable man' theory," Trustee Ed Runyan put in, and explain the district's feelings to the others.

And if that doesn't work, Warren added in an aside, "tell the city we'll give them an extra vote" if they change their minds.

Hospital to hold teleconferences

Midland Memorial Hospital will present a series of 90-minute medical teleconferences beginning today, according to Ellen Kennedy, RN, hospital inservice director.

The weekly programs will be broadcast from 2 to 3:30 p.m. at MMH, 2200 W. Illinois Ave. The faculty of The University of Texas Health Service Center in San Antonio will present the programs via Teleconference Network of Texas.

This network is a two-way audio system with reception and transmission of the quality of radio.

Special equipment connecting the hospital to telephone lines in the medical network allows participants to ask questions and hear answers from others around the state, Mrs. Kennedy explained.

Focus of the programs will be on the special health considerations of persons over 55. Topics will cover a wide range of health problems.

There is no fee for the series, but interested persons are asked to register by calling Mrs. Kennedy at 682-7381 to assure space and brochure study materials are available.

Program dates and topics include Life Patterns for Good Health, today; Skin Diseases, Sept. 19; Back Trouble Including Spine Deterioration, Sept. 26; Sex and the Senior Citizen, Oct. 10; Depression, Oct. 17; Lung Disorders, Oct. 24; Prostate Problems, Oct. 31, and Hysterectomy, Dec. 5.

Other programs are to be announced.

Law school professor appointed to head panel on nuclear waste

AUSTIN — Professor Robert Hamilton of The University of Texas Law School has been named

GM strikers in Texas

ARLINGTON (AP) — About 4,700 workers at General Motors' assembly plant in Arlington and the parts depots in Dallas and Houston are among workers poised to strike at midnight Friday if a new contract is not negotiated, union officials said.

chairman of a three-member panel to conduct hearings on a proposal to store nuclear wastes in the salt beds of southeastern New Mexico.

The hearings will be on the draft environmental impact statement for the Waste Isolation Pilot Project, a proposal that would store militarily-produced nuclear wastes about one-half mile underground.

Hearings on the impact statement were held earlier this year in Albuquerque, N.M.

The appointment of

The hearings are scheduled for Odessa, Oct. 1; Hobbs, N.M., Oct. 2; and Sante Fe, N.M., Oct. 5.

Opponents to the project have scheduled a counter-demonstration Sept. 28-30 near Loving, N.M.

The proposed underground storage site is 12 miles southwest of Loving, N.M. The Pecos River flows near Loving and into Texas.

Won't enforce obscenity law

DALLAS (AP) — A federal judge has barred Dallas and Tarrant Counties from enforcing the state's new obscenity law until he can have a hearing later this week.

DEATHS

John W. Slaton

McCAMEY — Services for John Willington Slaton, 78, of McCamey were to be at 2:30 p.m. today in South Union Baptist Church here with burial in the Garden of Memories directed by Dennis-Gregg Funeral Home.

He died Sunday in a Rankin hospital after a lengthy illness.

Slaton was born Feb. 22, 1901, in Cleburne. He was married to Pinkie Modest in May 1956 in Rankin. He moved in 1949 to McCamey, where he was a chef in a local cafe. He was a deacon and member of the brotherhood of the South Union Baptist Church.

Survivors include his wife; two sisters, Sarha Claudia Watts of San Francisco, Calif., and Tillie Belle Brown of McCamey; two brothers, Brian Slaton of Big Lake and Paul Slaton of Killebrew; an aunt, Willie Thomas of Cleburne, eight nieces and four nephews.

Dr. E.L. Simmons

DURBAN, South Africa — Services for Dr. Eugene Lynn Simmons, 36, of Durban, South Africa, brother of Jan Black of Hobbs, N.M., will be Friday in Durban with burial in Durban following a long illness.

A native of Post, Simmons grew up in Dora, N.M., and was a graduate of Eastern New Mexico University. He received his master's and doctorate degrees from Texas Tech University in Lubbock.

He was married to Gyuene Turner Aug. 28, 1967, in Lubbock. He had taught chemistry at Queens University in Belfast, Ireland, Northwestern Oklahoma State University in Alva, Okla., and the University of Natal in Africa. He did research for the University of Houston.

Other survivors include his wife, a daughter, his mother and his father.

Steve Barrow

LAMESA — Services for Steve Barrow, 24, of San Angelo and formerly of Lamesa, will be at 10:30 a.m. Thursday in the First United Methodist Church here. Officiating will be the Rev. Newton Starnes, pastor of the First United Methodist Church of Tahoka, with the Rev. Victor Cooley, pastor, assisting.

Burial will be in Lamesa Memorial Park directed by Branon Funeral Home.

Barrow died Tuesday from injuries received in a motorcycle accident in San Angelo.

He was a native of Lamesa. He had attended public schools there and Schreiner Military Institute in Kerrville. Barrow was employed as a direction driller for Southeastern Drilling Co. He had lived four months in San Angelo, moving there from Lamesa. He was a Methodist.

Survivors include his parents, Mr. and Mrs. Carl Barrow of Lamesa; his grandparents, Myrtle Barrow of Cleburne and Mrs. and Mrs. L.E. Matthews of Lamesa, and a brother, Kenny Dale Barrow of Lubbock.

Melba Buckles

Mrs. Charles C. (Melba) Buckles, 44, 3205 Delano Ave., died Tuesday in

a Midland hospital after a lengthy illness.

Services will be at 10 a.m. Thursday in the Assembly in Christ Fellowship at 409 W. Pine St., with the Rev. Betty McNeerlin, minister, officiating. Burial will be at 2 p.m. Thursday in the McCamey Cemetery in McCamey directed by Newnie W. Ellis Funeral Home.

Mrs. Buckles was born June 19, 1935, in Bakersfield. She grew up in McCamey after moving there with her family at the age of 1. She moved to Jennings, La., in 1952, residing there until 1959, when she moved to Midland. She was a member of the Assembly of Christ Fellowship.

Survivors include her husband; three sons, Charles Terry Buckles, Michael Ray Buckles and Allen J. Buckles, all of Midland; two daughters, Debbie Anatta Cavin and Carmom Denise Buckles, both of Midland; her mother, Mrs. Jay Davis of Odessa; four sisters, Bette Luckey of Midland, Uldine Davis of Eastland, Nell McCamey of Enid, Okla., and Edna McAnally of Carlsbad, N.M., and a grandchild.

Cecil Bridges

STANTON — Cecil Bridges, 73, former mayor of Stanton and retired manager of the Texas Electric Service Co. office here, died Tuesday in a Big Spring hospital following a brief illness.

Services will be at 3 p.m. Thursday in the First United Methodist Church in Stanton with the Rev. Davis Edens, pastor, officiating.

Burial will be in Evergreen Cemetery, directed by Gilbreath Funeral Home.

Bridges was born Sept. 18, 1905, in Heidelberg, Miss., and had been a Stanton resident since 1941.

He was manager of the Texas Electric Service Co. office in Stanton from November 1942 until his retirement in September 1970. He was the first manager of TESCO's Stanton office.

Before moving to Stanton, Bridges was manager of the Crane TESCO office. He had worked 35 years for TESCO.

He was mayor of Stanton from 1974 to 1976. Prior to that, he was a city councilman.

Bridges was married June 1, 1946, to Elizabeth Sadler in Stanton.

He had served as president of the Stanton Lions Club, governor of District 2-A1 of Lions International, president of the Martin County Chamber of Commerce, director of the West Texas Chamber of Commerce, treasurer of the March of Dimes in Martin County, vice chairman of the American Cancer Society chapter in Martin County, vice chairman of the Chaparral District of Boy Scouts of America, director of the West Texas Boys Ranch, chairman of the board of the First United Methodist Church, a member of the Scottish Rite and master of the Stanton Masonic Lodge No. 951 where he was a 32nd degree Mason.

He was a member of TESCO's "Quarter Century Club."

Survivors include his wife; a son, Sadler Bridges of Bryan; a sister, Gertrude Smith; a brother, Curtis Bridges of Norfolk, Va., and two grandchildren.

Kissinger believes Cuban issue can be successfully resolved

WASHINGTON (AP) — Former Secretary of State Henry A. Kissinger said today he believes the Carter administration can be successful in its diplomatic effort to resolve the issue of Soviet troops in Cuba.

"I support the administration in demanding an end to the Soviet combat brigade in Cuba," Kissinger said on NBC's "Today" show. "I think the administration can be successful and I support the efforts of Secretary (of State Cyrus) Vance in that matter."

Senate consideration of the SALT II treaty is virtually at a standstill pending the outcome of ongoing administration talks with the Soviet Union on the situation.

Vance said Tuesday that his talks with Soviet Ambassador Anatoly Dobrynin on the troops issue were "not hopeless." He did not elaborate.

Vance discussed the issue with Dobrynin for the first time Monday. More talks were scheduled today.

The presence of between 2,000 and 3,000 combat troops was revealed last week by U.S. intelligence officials, who said the brigade had been there for some time.

"No policy-making official in the previous administration was ever told" about the presence of such a brigade, Kissinger said. "We never faced, as a policy issue, that question."

Kissinger noted that former President Richard M. Nixon, whose admin-

istration he served, was particularly sensitive to the ramifications of the Soviet presence in Cuba. He added he did not believe it was "helpful" to squabble about possible shortcomings of previous U.S. surveillance.

"My impression is that some of these elements have been there for some time," Kissinger said.

The apparent strengthening of the Soviet presence must be viewed in the context of Cuba's role on behalf of the Soviet Union around the world, Kissinger said, and the symbolic threat of that presence must be considered in addition to any actual threat.

Besides his meeting with Dobrynin, Vance also planned a closed-door meeting today with the Senate Foreign Relations Committee on the strategic arms limitation agreement.

In other SALT-related developments: —President Carter asked Congress Tuesday to approve an additional \$4.7 billion in defense spending for the fiscal year beginning Oct. 1.

The increase, which takes into account the effects of inflation since Carter submitted his original budget request last January, would put the Pentagon's spending ceiling at \$127.4 billion, a net increase of 3 percent over this year after deducting the effects of rising prices.

Several key senators, including Sen. Sam Nunn, D-Ga., have indicated they will support the SALT II pact

only if "real" defense spending is increased by 5 percent to 7 percent.

—Sen. Henry M. Jackson, D-Wash., told the Senate that in addition to as many as 3,000 combat troops and several Soviet MiG 23 fighters, the Soviet Union has provided Cuba with two attack submarines. Jackson contended one of them is also a mine layer capable of threatening oil tankers heading for U.S. ports.

A recently released censored version of a Defense Intelligence Agency report said Cuba is no longer getting

hand-me-down Soviet military equipment but is at or near the head of the list for sophisticated Russian armaments.

—Sen. Richard Stone, D-Fla., said the United States should negotiate the "non-use" by the Soviets of extensive new naval facilities at Cienfuegos on Cuba's southern coast some 250 miles south of Miami.

Carter was briefed Tuesday by national security adviser Zbigniew Brzezinski on Monday's two-hour Vance-Dobrynin meeting.

31 indicted on theft charges

AUSTIN, Texas (AP) — The Travis County grand jury has indicted 31 women on felony theft charges for alleged welfare cheating.

This is the first group of local cases to be prosecuted under a 1977 state law designed to cut down on welfare fraud.

The welfare fraud cases involve alleged thefts totaling \$8,439. Individual cases ranged from \$209 to \$370.

Seismologists record most powerful quake in 2 years

HONOLULU (AP)— U.S. seismologists reported the most powerful earthquake recorded in two years occurred today in the south Pacific off Papua New Guinea, but there were no immediate reports of casualties or damage on land.

The U.S. Geological Survey at Golden, Colo., said the quake at 2:30 p.m. New Guinea time, or 1:30 a.m. EDT, measured 8.0 on the Richter Scale. A spokesman said it was the most powerful quake recorded since another 8.0 tremor on Aug. 19, 1977, to the west of New Guinea killed more than 100 persons on the Indonesian island of Sumbawa.

The Pacific Tsunami Information Center in Honolulu registered the quake today at 7.8 on the Richter scale. A spokesman said although no tsunami, or tidal wave, was detected, there was a strong possibility that one did occur and various stations in the Pacific were alerted.

It was the second quake recorded in the South Pacific area in less than 24 hours. A "fairly strong" tremor shook parts of the southern Philippines Tuesday night, blacking out the Mindanao Island city of Cagayan de Oro and sending residents into the streets in panic. But no casualties or damage were reported.

PAGASA, the Philippine Atmospheric, Geophysical and Astronomical Services Administration, said the epicenter was in the Bohol Sea about 25 miles north of Cagayan de Oro. This was about 1,500 miles northwest of the quake today.

No Richter reading was available for the Philippine quake.

The Richter scale is a measure of ground motion as recorded on seismographs. Every increase of one number means a tenfold increase in magnitude.

A Richter reading of 7 is considered a "major" earthquake, capable of widespread heavy damage, and an 8 reading is considered a "great" quake, capable of tremendous damage.

The San Francisco earthquake of 1906, which occurred before the Richter scale was devised, has been estimated at 8.3 on the Richter scale.

Chosen two interim president of Angola, succeeding Neto

LISBON, Portugal (AP) — The two men Agostinho Neto picked to succeed him have become interim president of Angola and head of the only legal party, the Portuguese news agency ANOP reported, and the party chief flew to Moscow with a delegation to get their dead leader's body.

Neto, who was both president of the country and head of the Popular Movement for the Liberation of Angola, or MPLA, died of cancer of the pancreas Monday in Moscow, after a long illness. He was 56 and Tass, the Soviet news agency, said he also had chronic progressive hepatitis and cirrhosis of the liver.

ANOP said in accordance with Neto's wishes, the MPLA named Planning Minister Jose Eduard dos Santos president and Lucio Lara head of the party. Lara had been secretary of the party central committee.

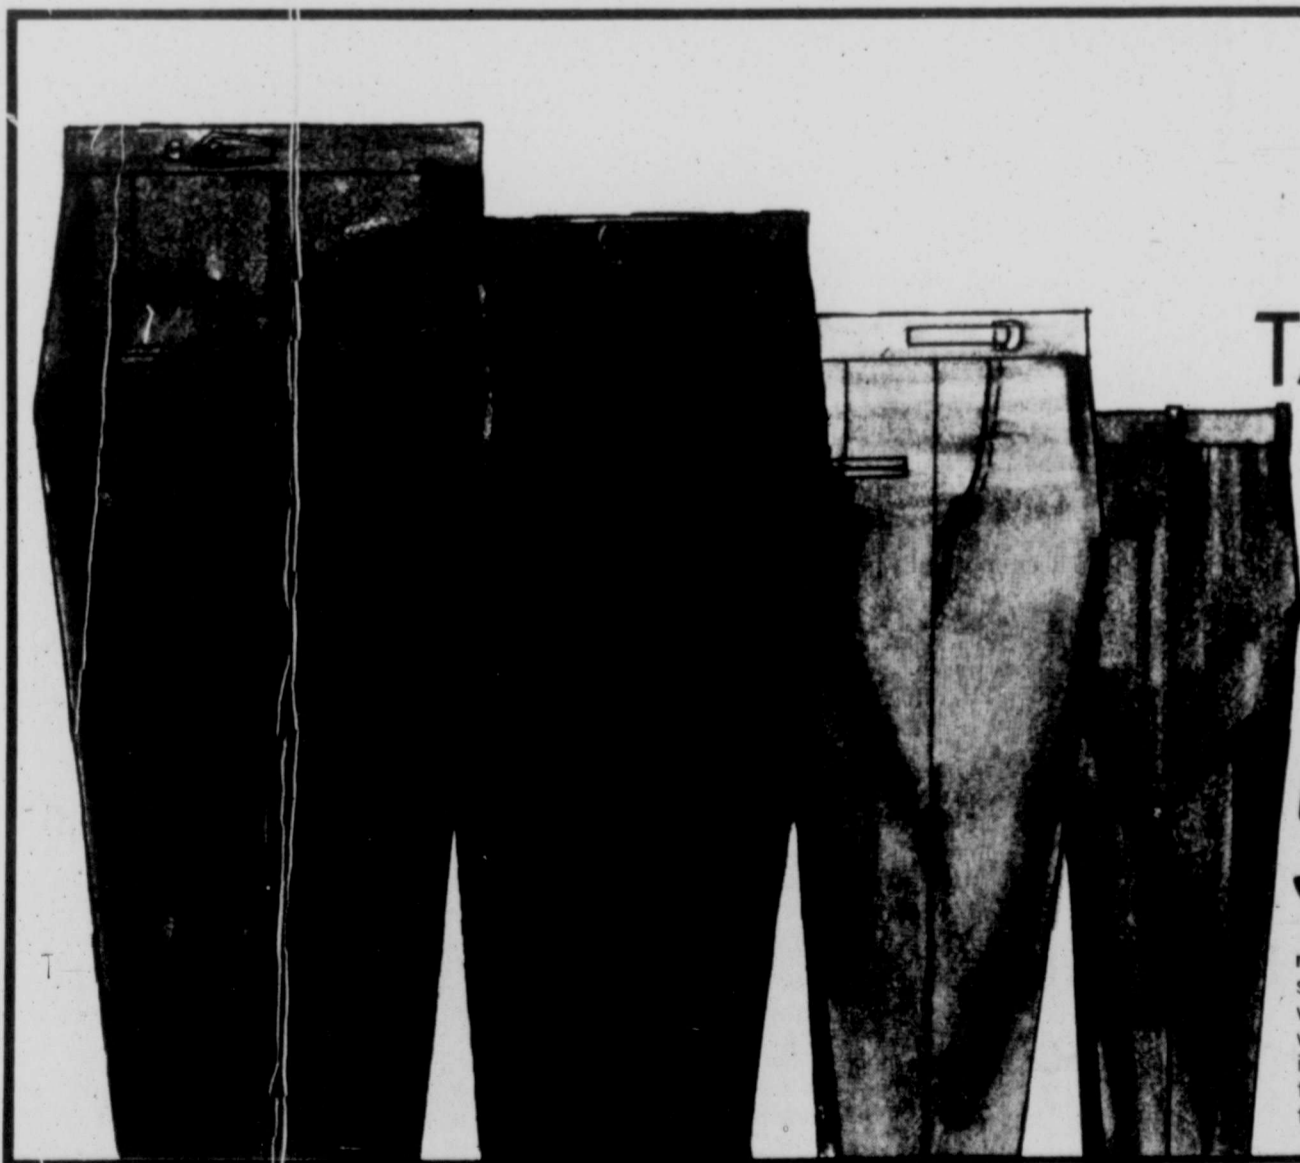

Lara headed a group of party officials that arrived in the Soviet capital Tuesday, Tass reported.

Although the United States refused to recognize Neto's government because of the continued presence in the country of the Cuban troops that helped it win a post-independence civil war, Secretary of State Cyrus Vance expressed "deep regret" at his death and praised "the contribution he has made to peace and stability."

Queried by reporters in Washington, Vance declined to say what effect Neto's death might have on U.S. efforts to get the Cubans out.

Portugal, the colonial power in Angola until 1975, declared three days of national mourning.

WEATHER SUMMARY

Hurricane Frederic is strengthening in the Gulf of Mexico and was expected to hit the central Gulf Coast this evening. Heavy rains are forecast today through Thursday for the Southeast, with a band of showers and rain expected from East Texas to the upper Great Lakes. Cool weather is predicted for the north-central Plains, but most of the country is expected to be warm. (AP Laserphoto Map)

Extended forecasts

Friday Through Sunday

West Texas: Mostly fair. Warmer Friday but cooler north on weekend. Lows 50s and 60s. Highs Friday and Saturday 80s north to 90s south. Highs Sunday near 80 north to mid 90s Big Bend.

North Texas: Partly cloudy and mild. A chance of thunderstorms east portion Friday. Highest temperatures in the mid to upper 80s. Lowest temperatures in the 60s.

South Texas: Showers and thunderstorms mainly along the coastal plains Friday. Generally fair nights to partly cloudy days and little change in temperatures. Lows will range in the low 60s, northwest Mid 60s interior to the low 70s along the coast. Highs near 90 mid sections except mid 90s southwest.

Texas area forecasts

West Texas: Widely scattered thunderstorms Panhandle late this afternoon and tonight, otherwise partly cloudy north, fair south through Thursday. Cooler mid sections Thursday. Highs 82 to 82 except upper 90s Big Bend lowlands. Lows 50 Panhandle and mountains to upper 60s Big Bend lowlands. Highs Thursday 79 Panhandle to 90 Big Bend lowlands.

North Texas: Partly cloudy and warm today. Highs 91 to 91 to 87 east. Partly cloudy tonight with a chance of thunderstorms northwest. Cooler extreme northwest. Cooler extreme northwest to 62 southeast. Partly cloudy and a little cooler Thursday. Slight chance of thunderstorms central and southeast. Highs 80s extreme northwest to 86 southeast.

South Texas: Partly cloudy north and east through Thursday with widely scattered showers and thunderstorms. Generally fair southwest. Cooler northeast today and all sections Thursday. Highs 70s north and mountains to low 90s southwest. Lows 40s north to low 60s southwest. 30s mountains. Highs Thursday 60s north to near 90 southwest.

Border states forecasts

Oklahoma: Fair to partly cloudy through Thursday. Widely scattered thunderstorms northwest this afternoon, over the state tonight and southeast Thursday. Cooler northwest this afternoon and remainder of state tonight. Highs 80s. Lows 32 to 62. Highs Thursday 72 to 82.

New Mexico: Partly cloudy north and east through Thursday with widely scattered showers and thunderstorms. Generally fair southwest. Cooler northeast today and all sections Thursday. Highs 70s north and mountains to low 90s southwest. Lows 40s north to low 60s southwest. 30s mountains. Highs Thursday 60s north to near 90 southwest.

Board upholds teacher's removal

By SUSAN TOTH Staff Writer

Midland school trustees listened to two hours and 20 minutes of testimony Tuesday in the case of a Midland High School teacher protesting his new duties, then voted to reaffirm the action taken after a 10-minute discussion centering on how well the school's review and evaluation system is working.

The teacher, Calvin Baker, a journalism teacher in the Midland schools for 17 years, said after the meeting he will pursue the matter to federal court.

Baker had asked the school board to overturn the decision of MHS Principal Jack Stone to remove him as journalism teacher and sponsor of the school newspaper, the Bulldog.

Baker contended he was placed on probation and assigned four sophomore English classes instead of his journalism duties this year because he refused to censor items in the Bulldog in compliance with the constitutional rights of the students to a free press.

Baker and his attorney Michael McLeish of Odessa, a volunteer attorney for the American Civil Liberties Union, cited court cases that have affirmed the rights of editorial freedom in student publications despite their dependence on schools for funds.

Midland High School officials said Baker was assigned to teach the sophomore English classes "in order to free him for the time necessary to improve his teaching skills during the 1979-1980 school year."

Three witnesses, called during the open hearing by school board attorney Charles Tye, testified they had visited Baker's classes and observed an apparent lack of planning, preparation and clear objectives.

Baker's attorney, however, questioned Stone closely about one section of a personnel review written after the classroom visits.

The Feb. 8 evaluation, signed by Stone, Assistant Principal Dr. Patricia Smith and MHS English department chairman Sarah Macina, noted in part that "students in your first period journalism class must be better supervised in their activities, and a firm position must be taken in giving direction to the publication of The Bulldog."

"The practices of obscene language and derogatory remarks concerning the administration, school spirit, athletic teams and individual students for the purpose of humor are entirely unacceptable to this administration, board of trustees and this community," the review said.

McLeish contended this was the real basis for Baker's removal, but trustees disagreed.

After hearing more than two hours of testimony and questioning, the school board unanimously reaffirmed the position taken by the principal.

In other action Tuesday night, trustees proclaimed Oct. 1-5 as Midland Public Schools Week, agreed to dedicate a 30-foot right of way for a street next to a proposed school site and heard a report on an internal audit of the student activity funds.

PUC won't dismiss rate hike case

AUSTIN, Texas (AP) — A Texas Public Utility Commission hearing examiner has turned down a motion to dismiss Southwestern Bell Telephone's \$145.2 million rate increase case.

Phil Ricketts acted late Tuesday on a motion by Ray Besing, attorney for Microwave Communications Inc., which competes with Bell for long distance business and uses Bell circuits to complete calls.

Besing said Bell had failed to prove its need for greater revenues and had based its case on "hearsay, conclusions and rank speculation" instead of solid evidence.

Of all the businesses in the nation, he said, the Bell system is "the most bullet-proof against risk."

Jon Dee Lawrence, attorney for Bell, accused Besing of "convoluted logic" and of making a "grandstand play."

"Because Mr. Besing doesn't like what we have placed in evidence, he objects to it," Lawrence said.

He said a traditional opponent of rate increases, the Texas Municipal League, as well as the PUC staff had recognized Bell's need for additional revenue, "based on standard rate-making principals."

The municipal league and the commission staff have recommended smaller increases than Bell requested.

In another development, PUC economic researcher Julie Parsons filed recommended increases in Bell's monthly charges for basic local telephone service. Bell wants raises of \$1.55 per month for households and \$4.65 for businesses.

Ms. Parsons proposed increases ranging from 80 cents to \$1.10 for residential telephones and \$2.40 to \$3.30 per month for business telephones.

The exact amount would depend on how big an increase the commission wants to order for "vertical services" such as PBX, Centrex and special equipment used by large businesses.

Inventories point toward recession

WASHINGTON (AP) — Economists are pointing to a hefty 1.9 percent build-up of inventories by American businesses in July as another indication of the nation's slide into a recession.

The figures released Tuesday underscore growing concern among economists that goods are building up too rapidly, creating conditions like those that characterized the 1974-75 recession.

Businesses had pledged to manage inventories more prudently this time around, but "despite all the caution, inventories will be a major part of the recession," said Otto Eckstein, head of Data Resources Inc., the Cambridge, Mass., economic forecaster.

"There's clearly excess inventory already at the wholesale and retail levels," Eckstein said. "The pipeline is full."

July's 1.9 percent increase compared with June's rise of 1.1 percent, the Commerce Department said. The \$7.8 billion rise to a seasonally adjusted \$413.8 billion created the largest monthly increase since September 1976 in terms of percentages, said department spokesman Adren Cooper.

"We certainly wouldn't like to see inventories continue to build up at this rate," said the department's chief economist, William Cox. "If the economic slowdown can be conducted with more or less steady sales, the inventories can be managed well."

But the future sales picture remains cloudy.

The backlog of inventories was most evident in the auto industry, where stocks rose 3.6 percent after jumping nearly 25 percent in June.

When inventories build up too fast and sales slide, orders are delayed or canceled. This leads to production cut-backs and eventually forces manufacturers to lay off workers.

The nation's unemployment rate jumped last month from 5.7 percent to 6 percent. Chrysler Corp. alone has laid off more than 30,000 blue-collar workers as it tries to deplete its huge inventories.

Inventories swelled 3.3 percent at the retail level, from \$106.4 billion to \$108.7 billion, and 2.2 percent at the wholesale stage from \$85.2 billion to \$88.04 billion.

Owner George Veloz wears a big sombrero at the formal opening of his Monterrey Cocina Mexicana restaurant Tuesday, while his wife, Gloria, watches in the background. Founded in 1953 by Veloz' parents, Manuel and Feiz Veloz, the

restaurant has been relocated to 1501 N. Big Spring St. from 523 E. Illinois Ave. Midland Chamber of Commerce, city and county officials attended the ribbon-cutting ceremony. (Staff Photo by Bruce Partain)

Frederic is 'one of most intense' to hit the Gulf Coast in a decade

(Continued from Page 1A)

refuse to evacuate when asked to do so will be asked to file out a form listing their name, age and next of kin.

"By law, we can't make people leave," Wilson said. "But that question about 'next of kin' will get the point across to some of them."

Schools were also closed in Harrison County, Miss. and Orleans and Jefferson parishes in Louisiana.

Grand Isle residents began packing up today as divers hunted for a man believed trapped when an oil rig flipped over in the Mississippi River Gulf Outlet as it was being towed away from the storm.

Another man died when he fell from a Trans World Drilling Co. rig tender under tow in heavy seas in the Gulf off the Louisiana Coast. He was pulled from the water, but could not be revived. His name was not released.

The missing man was among more than 2,500 offshore oil workers called back to land as Frederic strengthened Tuesday. Another 200 were to be brought in today, officials said.

Grand Isle Police Chief Ernest LaFont said the island community of 6,000 would be under official evacuation notice at 9 a.m. today.

U.S. forecasters also were tracking a second hurricane, "Gloria, 1,000 miles southwest of the Azores near 32.4 north latitude, 47.7 west longitude at 6 a.m. EDT Wednesday. Gloria, deemed no threat to North America,

was a minimal hurricane reborn from a tropical storm.

Shortly before midnight, Miles Lawrence of the hurricane center said a best guess showed Frederic would hit land at Mobile, Ala. But he said it was far too early to predict with any certainty.

"You realize that our 24-hour forecast error is about 100 miles," he added. "So we may be completely off on this. But that's our best guess right now."

He said the hurricane could reach the mainland as early as 8 p.m. today, but probably would be later.

Radio Havana reported that Frederic, then a tropical depression, left considerable flooding and wind damage and forced the evacuation of more than 57,800 persons as it passed over western Cuba last weekend.

As Frederic approached, 2,500 workers were pulled back from Gulf oil rigs off the Louisiana coast. Late Tuesday, winds up to 40 mph and higher-than-usual tides already were affecting southeastern Louisiana.

Evacuation plans were under way in the Gulfport and Biloxi areas on the Mississippi coast. "Our main concern is getting the remaining boats to seek safe harbor in the back bay area," said Harrison County Civil Defense Director Wade Guice.

Frederic was overshadowed last week as Hurricane David skirted Florida's east coast, causing an estimated \$95 million in damage in the state. David, a No. 2 hurricane then, had been a No. 4, or extreme hurricane, as it claimed 1,100 lives in the Caribbean.

Frederic resembles 1975 storm

By JOE MAGRUDER Associated Press Writer

The leading candidate for the sleeper of the 1979 Atlantic season, Hurricane Frederic, bears striking similarities to the last major hurricane to threaten the central Gulf Coast — Eloise in 1975.

Like Frederic, Eloise was born in the Atlantic and struck in September. Eloise also fell below hurricane status and stalled over Cuba before springing back to life with a vengeance as it entered the Gulf of Mexico.

And like Frederic, Eloise was a No. 3, or extensive, hurricane on the 1-5 scale of strength used by the National Hurricane Center in Miami.

In Eloise's case, that meant 130-mph winds when the storm came ashore before dawn on Sept. 23, 1975.

Eloise slammed into the Florida Panhandle between Fort Walton Beach and Panama City, spreading destruction in both cities and the 40 miles of coast between them.

In Fort Walton Beach, a city of about 20,000, mobile homes were uprooted, the roof of a shoe store was torn off and blown away and 30 rooms were demolished when part of the roof of an ocean-front motel sailed away.

What was left undamaged by flood waters from the hurricane's storm surge had to face three early-morning tornadoes spawned by the hurricane.

By 7 a.m., 90 percent of the city was without power. The scene was similar in Panama City, where a manufacturing plant caught fire.

Then-Gov. Reubin Askew ordered

National Guard troops into three Panhandle counties to prevent looting.

Three died in the storm. When the damage was surveyed, it put Eloise in fifth place for total damage among U.S. hurricanes this century with a total of \$550 million, according to a 1978 report by hurricane center.

Late Tuesday, Frederic was still strengthening and already was only slightly weaker than Eloise. Frederic's top winds were 120 mph.

In another key measurement of strength, central pressure, Frederic's 28.30 inches of mercury also were close to matching Eloise's 28.2 inches.

Those measurements put Frederic, and Eloise, far short of the other major hurricane fixed in the memories of Gulf Coast residents who were around to experience it: Camille.

Bond election of Oct. 23 'too much,' critics claim

(Continued from Page 1A)

since the expansion of girls' athletics had created a crunch on current facilities.

The concept of a non-air conditioned "work-out facility" caught the trustees' eye, and they agreed to look at the whole bond concept again with that possibility in mind for both Lee and MHS.

Trustees, faced with basically negative comments on the likelihood of the bond package's passage, noted that all of the items were needed.

The upkeep items in particular are needed now, because putting off

maintenance of the major items would be costlier in the long run, they claimed.

Plan O, a proposal to consolidate the city's two high schools which went down to a resounding defeat in an April referendum, also came up during the discussion.

"The community voted 5 to 1 they wanted to maintain two equal high schools," Warren noted. "Those of you who voted against consolidation have to be with us on this bond issue. Its (the issue's) intent is to provide a comparable facility for comparable programs."

Lufthansa jet hijacked; 121 passengers aboard

COLOGNE, West Germany (AP) — A Lufthansa jetliner with 121 passengers aboard was hijacked today on a flight from Frankfurt to Cologne, an airline spokesman said.

Airport sources said there were at least two hijackers aboard and that they demanded Chancellor Helmut Schmidt and the news media come to the airport so they could make a statement.

Chancery aide Hans-Juergen Wischniewski, who has handled previous hijackings, entered the airport control tower immediately after the demand was received.

The plane, a Boeing 727, left Frankfurt at 9:55 a.m. and landed 30

WASHINGTON TODAY

Kennedy, political pro, unfolds his campaign in showman's manner

By WALTER R. MEARS AP Special Correspondent
WASHINGTON (AP) — In politics as in show business, the real professional always leaves the audience wanting more. And Sen. Edward M. Kennedy is a political pro.

St. Paul takes on problem of uniting governmental units

By LEE MITGANG AP Urban Affairs Writer

Starting this month, St. Paul, Minn., will be drawing up plans for four city projects aimed at achieving energy and economic self-sufficiency. A lofty enough goal. But if St. Paul succeeds, it will be how the city did it — not what it did — that may well shape the way local governments across America work in the coming decade.

Brochure to offer tips on how to save energy

WASHINGTON (AP) — A variety of small, inexpensive conservation measures often can cut home energy bills a total of 25 percent, the Energy Department says. In a draft of a brochure expected to be distributed late this year to 4 million Americans, the department says its various tips "could save you 25 percent, between \$100 and \$250 a year, at current gas and electricity prices, on an investment of \$100 or less."

Field operations reported in Basin

Dyco Petroleum Corp. of Tulsa, Okla., spotted location for a 10,100-foot project one location east of the lone producer in the Hoblitzelle (lower Canyon) pool of Hockley County, eight miles east of Levelland.

The drillsite for No. 1 Frank Chapel, scheduled to test the lower Canyon, is 2,100 feet from north and 467 feet from west lines of section 5, block A, psl survey.

CHAVES TESTS
El Ran, Inc., of Lubbock No. 1 Carroll is a new 4,350-foot project in the Chaveroo (San Andres) pool of Chaves County, 17 miles north of Caprock.

IRION EXTENDER
Cities Service Co. of Midland re-completed the No. 1-A Tankersley to extend 6800 Canyon oil production 1 1/2-miles east and slightly north in the Christi (6800 Canyon) field of Irion County.

AMOCO PRODUCTION
Amoco Production Co. No. 1-Z Federal Communized has been spotted two miles northwest of Morrow gas production in the Logan Draw field of Eddy County, 19 miles west of Loc Hills.

EDDY PROJECTS
Mesa Petroleum Co. of Midland No. 1 Peterson-Federal Communized has been spotted two miles northwest of Morrow gas production in the Logan Draw field of Eddy County, 19 miles west of Loc Hills.

TOM GREEN EXTENDER
Champlin Petroleum Co. of Midland has extended Canyon D oil production 1 1/2 miles southwest in the Tom Green portion of the Dove Creek multipay field, with the completion of its No. 2 A.H. Duff Estate.

CHEVRON GETS READY FOR BLOW
NEW ORLEANS (AP) — Chevron USA Inc., which began closing two Gulf of Mexico oil drilling installations Tuesday, said other evacuations may be likely because of worsening Hurricane Frederic. AMOCO Production Corp. said it also was evacuating personnel.

STRIKES FINAL, PROJECTS STAKED
Gas discoveries have been reported in Crockett and Pecos counties, a field has been reopened in Pecos County and wildcat operations have been staked in Crockett and Stonewall counties.

INTERNATIONAL OIL & GAS CORP.
International Oil & Gas Corp. of Midland No. 1-1 Dudley was completed as a Devonian detrital gas discovery in Crockett County, 22 miles southwest of Ozona.

PECOS REOPENER
Mobil Oil Corp. No. 3 Irvy B. Weatherby was completed from the Wolfcamp to reopen the Roja Caballos (Wolfcamp) pool of Pecos County, 20 miles northwest of Fort Stockton.

PECOS REPLACEMENT
Holly Energy, Inc., of Dallas staked a replacement for its No. 1-13 University, a scheduled 6,500-foot wildcat in Pecos County, 7.5 miles southeast of Grivin.

PECOS DISCOVERY
Four C Oil & Gas Corp. of Dallas No. 1-A Abell, re-entered project in Pecos County, has been completed as an unidentified discovery.

STONEWALL WILDCAT
A 6,000-foot wildcat has been staked in Stonewall County by Jack C. Staley of Wichita Falls.

STONEWALL WILDCAT
A 6,000-foot wildcat has been staked in Stonewall County by Jack C. Staley of Wichita Falls.

a 3/4-inch choke and perforations from 6,624 to 6,730 feet.

A former Ellenburger opener in the Merton (Canyon and lower Clear Fork oil and Canyon gas) field, it completed on the pump for 11 barrels of 38.5-gravity oil and no water, through perforations from 6,493 to 6,532 feet.

SCHLEICHER OUTPOSTS
Cabana Oil Corp. of Abilene announced plans to drill two outposts to Canyon reef gas and Strawn oil production in the Jan-Jerry, Southeast field of Schleicher County.

Carter softens proposals

WASHINGTON (AP) — President Carter was reported today to have made concessions to get two of his energy proposals through the Senate, and one senator predicted swift passage.

Carter met at the White House with members of the Senate Energy and Natural Resources Committee. Afterward, its chairman, Sen. Henry M. Jackson, D-Wash., said "He's going to get the bulk of what he's asked for."

Sen. Peter Domenici, D-N.M., said Carter had softened somewhat his original proposals for an \$88 billion program to develop synthetic fuels and an Energy Mobilization Board to push energy projects through state and federal red tape.

Domenici said Carter indicated he is willing to accept a "phased approach" to reaching the full \$88 billion synthetic fuels program. He said Carter would settle for a first-phase program that would cost \$20 billion to \$30 billion.

Domenici said Carter does not intend for his proposed mobilization board to interfere with state water laws. "There is no such intention," he said.

Water is a major concern in the dry Western states, where most of the proposed water-consuming synthetic fuel plants would be situated.

Domenici said Carter would not insist on government ownership of some of the synthetic fuel plants.

Sen. Bennett Johnston, D-La., predicted Senate passage in a few weeks of the synthetic fuels and mobilization board legislation.

GULF SEKS AID FOR FIRM
AUSTIN, Texas (AP) — Gulf Oil Corp. has asked the Texas Railroad Commission to include Lo-Vaca Gathering Co. in Gulf's request for pass on increased natural gas costs to one of its customers, Odessa Natural Corp.

Gulf buys gas from Lo-Vaca and supplies a portion of the gas to Odessa Natural. Odessa in turn sells to Texas Electric Service Co., Dallas, and it has asked that TESCO be made a party to Gulf's appeal.

Gulf says refusal to let it pass on increased gas prices will cost the company \$75 million.

Hearing Examiner Jim Cloudt said he would probably rule later this week on the motions by Gulf and Odessa Natural.

A hearing on Gulf's appeal is set for Oct. 16.

A hearing on Gulf's appeal is set for Oct. 16.

Swearingin says election in way of energy program

By ROBERT H. REID
BUCHAREST, Romania (AP) — A leading U.S. oil executive charged today that Carter administration energy policy was in disarray because "we've got a bunch of amateurs running the government" whose only concern is the 1980 election.

John E. Swearingin, chief executive of Standard Oil of Indiana and board chairman of the American Petroleum Institute, told reporters Carter was attacking the oil industry to boost his re-election chances and that the strategy threatens future U.S. petroleum supplies.

"He's president of the United States, but I don't believe he's acknowledged as leader of the Democratic Party," Swearingin said. "I don't believe his energy bill is going to be enacted in the way he proposed it."

He said his first meeting with Carter's new energy secretary, Charles Duncan, had been "very friendly," but that it was unclear how much control he would have over U.S. energy policy.

"After all, he's not an oil man and he doesn't even know the jargon of the business," Swearingin said. "He's a good businessman but he has a lot of catching up to do."

Swearingin said he thought the world would have no shortage of oil and gas if political and economic considerations did not stand in the way of their development.

He also warned the unstable situation in the Middle East, particularly in Iran, threatened to interrupt the flow of oil again in coming years.

"To start with, I don't believe the revolution in Iran is over," he said. Swearingin said there were so many potential flashpoints in the Middle East that another oil cutoff was "almost a cinch."

He said the oil industry could keep Americans supplied with petroleum products for many years "but not at yesterday's prices."

Swearingin said the windfall profits tax proposed by Carter in the

energy package would deprive the industry of money it needed to finance new exploration and development of oil.

Swearingin, here for the 10th World Petroleum Congress, complained that so many different people and departments in Washington wield influence on energy policy that it was difficult to develop long-range plans.

Swearingin also accused Carter of ignoring the advice of the oil industry in preparing energy policy. "It's a one-way street," he said. "By that I

mean I can write letters and get no replies. And the president has not seen fit to call in people from the oil industry and seek their advice."

Swearingin said the windfall profits tax would "make it less attractive to search for oil in the United States than elsewhere" and would be "a big step in the wrong direction."

He said the tax was "a misnomer... It's not a tax on profits, it's an excise tax on crude oil," which American consumers would wind up paying at the gasoline pumps.

Swearingin said the windfall profits tax would "make it less attractive to search for oil in the United States than elsewhere" and would be "a big step in the wrong direction."

Hypnotists and journalism colleges: \$35 a thousand

NEW YORK (AP) — Hypnotists cost \$35 a thousand, the same as periodontists, pits and quarries, and journalism colleges. Ice and roller skating rinks are a bit more — \$40 per thousand.

Alvin B. Zeller will sell you all these things — or rather, he will sell you lists that contain names and addresses for individuals and companies in all these categories.

Zeller claims to have the best mailing lists around. His lists are used for a lot of things, chief among them direct mail advertising — otherwise known as "junk mail."

"We can do all sorts of things," Zeller says. "We can take urban residents and we can take farm residents. We've had calls for farmers by crop — only cotton farmers who have a thousand acres or more. We can be very pinpointed, very specific."

Indeed, Zeller's 1980-81 catalog offers more than 2,500 categories, ranging from 15 xylophone manufacturers for \$20 to 2 million office workers at \$50 per 1,000.

There's 35,000 million-

aires, at a price of \$75 per 1,000; 11,500 Jewish contributors, very large, \$50 per 1,000; and 5,650 jails, prisons and reformatories, \$25 per 1,000.

Zeller has been in the business for 29 years, and perhaps that's why his speech is littered with lists. For example, who buys Alvin B. Zeller lists?

"We sell largely to publishing companies, advertising agencies, manufacturers, fundraising organizations, ordinary individual firms that have a product to sell...or somebody who has a private word to say," he said.

And where do the lists come from? "We get them from a combination of telephone directories, we have a huge library of every trade directory, every professional directory, every roster, every membership list."

"There are medical associations that offer us lists of doctors, there are legal associations that offer us lists of lawyers, many lists of accountants and engineers and architects, day care cen-

ters and whatever," he said.

All of these facts are plugged into computers, to be compiled on demand. Zeller estimates his computers contain 100 million names.

"For instance, we have about 60 million names that are residential families. Now, we can break that down by income echelons. ...We say that carefully, because some people don't like to know that we know they're making 10-, 20- or 100-thousand dollars."

"Everybody is categorized by what they have done, by what they do, by what they buy, by where they go. We go from the small people to the large people," he said.

"We have calls from people who want Polish names in Nebraska, or Spanish names in New Mexico, or Jewish names in Miami. ...We have religious names and ethnic names, Jewish doctors and non-Jewish dentists."

There are expensive lists and cheaper lists. The most expensive are lists of investors, going

for \$100 or \$200 per 1,000. Zeller says he simply figures his cost and adds a markup, without considering the nature of the lists involved.

For example, dynamite and explosives manufacturers cost \$40 per 1,000, the same price as hospitals with more than 1,000 beds but \$15 more than mayors or

state legislators. The home addresses of corporate presidents go for \$50 per 1,000, double the cost of a list of wives of high-income executives.

The home addresses of corporate presidents go for \$50 per 1,000, double the cost of a list of wives of high-income executives.

The home addresses of corporate presidents go for \$50 per 1,000, double the cost of a list of wives of high-income executives.

The home addresses of corporate presidents go for \$50 per 1,000, double the cost of a list of wives of high-income executives.

The home addresses of corporate presidents go for \$50 per 1,000, double the cost of a list of wives of high-income executives.

Strauss wins renewed commitment from Begin

JERUSALEM (AP) — U.S. Mideast envoy Robert Strauss won renewed commitment from Prime Minister Menachem Begin "to do anything possible to bring about the fulfillment" of the Camp David peace accord and met with a moderate West Bank Arab leader.

Strauss holds talks with Israeli politicians today and returns to Washington Thursday. Begin, after his 90-minute session with Strauss Tuesday, said continued negotiations with Egypt and the United States are the only way to unravel the question of Palestinian autonomy called for in the peace agreement.

"There is now a clear determination by all those who take part in the negotiations that the Camp David agreements should be faithfully carried out," Begin told reporters after the meeting.

The prime minister appeared to refute Israeli press reports of a slowdown in negotiations on Palestinian autonomy on

the West Bank of the Jordan River and the Gaza strip. "We are determined to do anything possible to bring about the fulfillment of that agreement," he said.

Strauss later met at the U.S. Consulate with Mayor Elias Freij of the West Bank town of Bethlehem, who told an Israeli radio interviewer earlier in the day he believed a confederation with Jordan would be the most acceptable way for West Bank Arabs to attain political autonomy.

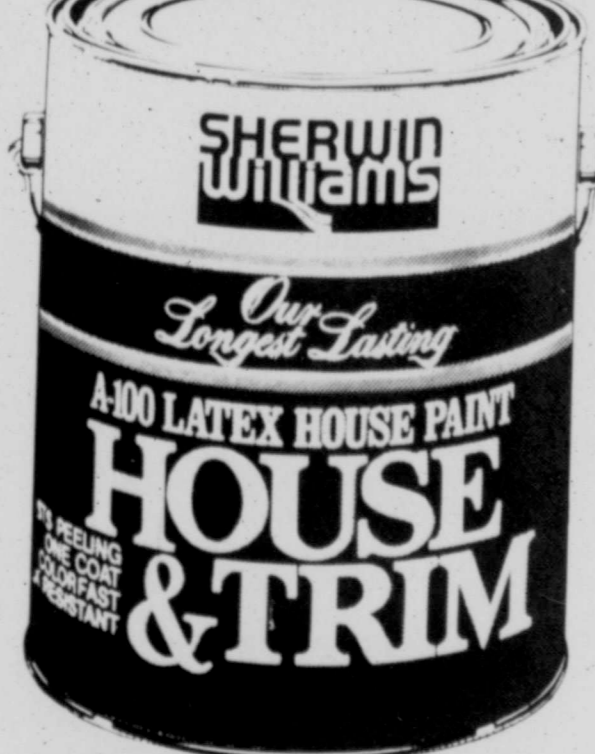

But Freij, in a telephone interview, said he had told Strauss he opposed U.S.-Egyptian-Israeli autonomy talks because they would

"achieve nothing" for Palestinians on the West Bank and Gaza Strip. He said Strauss had agreed with his opposition to Israeli settlement policy on the West Bank, and raids against Palestinian bases in southern Lebanon.

Strauss said his talk with Freij had touched on confederation, but refused to give details. He said in a press briefing that he and Begin discussed the autonomy negotiations, the conflict in Lebanon, and the Israeli-Egyptian summit meeting last week in Haifa.

Autonomy talks resume Sept. 25, in Alexandria, Egypt. Strauss said Israel has indicated it will make the talks its "primary concern" for the next three or four months.

Eric Dickerson, right, freshman sensation runningback for SMU, has been named The Associated Press' Southwest Conference Offensive Player of the Week. He watches practice with Mustang

Coach Ron Meyer, left. SMU took a 35-17 victory over the Rice Owls last Saturday before more than 62,000 fans in Texas Stadium in Irving. (AP Lapsperphoto).

Singletary gains honor on defense

DALLAS (AP) — On the Southwest Conference press tour, Baylor Coach Grant Teaff displayed three shatterproof helmets that had been broken by one player in fall drills—middle linebacker Mike Singletary.

Singletary didn't break any helmets Saturday but he put his helmet on Lamar University runners 21 times. Fourteen times he made the tackle unassisted.

The performance in Baylor's 20-7 victory over Lamar earned Singletary, a 6-foot-11, 224-pound junior The Associated Press Southwest Conference Defensive Player of the Week award.

"Mike has broken eight helmets in three years here at \$79 a helmet," said Teaff. "But I'll get a night job to keep him in helmets if I have to."

Singletary has been breaking helmets ever since he was in Houston Worthing High School.

"I think I broke five or six in high school," said Singletary. "Sooner or later they will find me a helmet that won't break. I know one thing, I'm getting tired of fitting them."

Singletary earned All-SWC honors last year for the Bears after solving a mystery of why he didn't have more endurance.

"I would run eight or nine players when I was a freshman and be totally exhausted," said Singletary. "I guess I would be just too hyper. Now, I know how to relax."

Singletary says he gets totally relaxed the night before a game.

"I put on soft music and meditate... sometimes I pray," said Singletary.

It's not uncommon for Singletary to be the last player to leave the dressing room after a game.

Penwell sets rocket drags

ODE SSA — Penwell Raceway's monthly races Saturday will have a little something for everyone, including the return of Hayden and Brad Proffitt's rocket dragster, the official world quarter-mile record holder.

In April at Penwell, Proffitt's Rocket clocked 327 mph in 4.81 seconds, which broke its own Texas land speed record. The dragster uses a 16,000 horsepower rocket engine and runs on \$300 worth of hydrogen peroxide per quarter-mile run.

There will also be a match race between Al Elerdam's "Emergency One" jet dragster from Tucson, Ariz., and Paul Savadin's Top Fuel dragster from San Antonio. The jet shoots 75-foot flames from the rear of its 10,000 horsepower aircraft engine while running 2.50 mph in 6.5 to 7 seconds.

Savadin's dragster runs 235 mph in same time, but is one of two cars in the nation to do "fire burnouts." Gasoline is poured under the rear tires and when the wheels spin, gas is thrown upward causing an instant explosion.

Rodger Gertsen of Odessa will also perform 1/4-mile wheelstands on his cycle at 80 mph.

This will also be the final points race of the season and will determine the 32 cars a end eight cycles to attend the \$46,000 E Bracket Finals in Dallas, Oct. 20. Odessa Buddy Bradshaw is tied with Ed Harris of Christoval with 19 points for the lead. In cycle points, Bobby Green of Abilene leads with 16 points. Midlander Mike Long is third with 12 points.

Gates open at 2:30 p.m. Saturday and the show begins at 7:30 p.m.

Freshman stars in SMU opener

DALLAS (AP) — It was the first fall scrimmage at Southern Methodist and curious letterman players showed up with all eyes on Eric Demetric Dickerson.

Dickerson's buildup rivaled any ever saddled on a mere schoolboy running back out of a Class 3A school.

Sure he rushed for 311 yards and scored four touchdowns last December in the 3A championship game against Wylie.

But just what he was going to do against the Eric Fergusons and Harvey Armstrongs of a vastly improved Mustang defensive unit?

Schoolboy All-America honors and a quarter might get you a soda pop in the player's lounge.

"I was ready to find out what Dickerson was made of," said Ferguson. "I thought he had probably been over publicized. Well, I was wrong. He showed right away what he could do. He wouldn't go down on the first hit, I'm glad he is on my side."

Dickerson took 129 steps with his size 11 shoes through the Rice Ows Saturday night in his collegiate debut and scored three touchdowns in SMU's 35-17 victory.

Tyson seeks new pact

ST. LOUIS (AP) — Mike Tyson, the St. Louis Cardinals' deposed regular second baseman, says he will play out his contract with the National League club this year in order to seek free agent status.

The 29-year-old Tyson, in his seventh season, was reactivated by the Cardinals Monday after spending five weeks on the disabled list with a knee injury. Earlier, however, he had played only sparingly because of the emergence of Ken Oberkfell at the position.

"I'm not going to be here next year," Tyson told the St. Louis Post-Dispatch preceding the opening of St. Louis' three-game series against the Pittsburgh Pirates in Pittsburgh.

More Soviet weapons said headed for Cuba

By FRED S. HOFFMAN
AP Military Writer

WASHINGTON (AP) — The Defense Intelligence Agency has predicted a "steady flow" of new Soviet weapons to Cuba, aimed at increasing the firepower and mobility of Fidel Castro's forces.

In a heavily censored version of a report to Congress, DIA experts said, "The weapons could be used equally well in any arena."

The Pentagon's intelligence agency estimated that Russia has given Cuba more than \$1.6 billion in free military aid since 1960.

"The state of readiness of the Cuban army continues to improve," the DIA said. "This is because of increased combat experience in Africa, intensified training at home and delivery of new weapons systems."

The report, given behind closed doors to a House subcommittee last April and released recently, said Russia may send Cuba bigger assault guns, mobile surface-to-surface missiles, interceptor versions of the advanced MIG-23 jet fighter, larger troop transport helicopters and additional ocean-going naval combat vessels.

The censored version of the report made only indirect references to Soviet military personnel in Cuba and said nothing about the Russian ground combat brigade there whose presence was recently confirmed by the Carter administration.

It said that Cuba's military, economic and political ties with the Soviet Union are "closer than ever" and that deliveries of Russian military equipment "greatly increased" in dollar value last year.

"Traditionally, Cuba has had to settle for older systems while other Moscow client states received more recent production," said DIA analyst Martin J. Scheina.

"Of late, however, in line with the professionalization of the military, Cuba has been taking delivery on systems comparable to those received by Moscow's other allied states."

In addition to Cuba's extensive involvement in Africa, DIA specialists reported "a noticeable increase in Cuban support of Latin American insurgents."

The report linked what it described as a "resurgence" of Cuban activity in Latin America particularly to the then-raging battle by Sandinista rebels to overthrow the Somoza regime in Nicaragua.

But it also spoke of close Cuban relations with Jamaican Prime Minister Michael Manley and of ties with Guyana.

Gary R. McClellan, a Latin American analyst for DIA, said there was evidence of Cuban "contacts in practically all of the (Caribbean) islands, either officially with the governments themselves or with the more leftist-leaning radical or Communist-oriented individuals, parties or movements."

In speaking of a Foxtrot-class diesel-powered submarine supplied by Russia earlier this year, Scheina said this sub "is an ideal vehicle for the clandestine movement of a small number of men and their equipment."

Other major new Soviet weapons listed as being supplied to Cuba include:

—New amphibious armored infantry fighting vehicles, armed with SAGGER anti-tank missiles and a 73-millimeter gun.

—Helicopter gunships that can provide close ground support for army troops.

—New Turya-class hydrofoil patrol boats that can be armed with four torpedo tubes and two guns each.

DR. NEIL SOLOMON

Supplements need physician's advice

Dear Dr. Solomon: I'll be a senior in high school next year and hope to do well enough on the football team to win a college athletic scholarship. Meanwhile, I've been running and lifting weights to get in condition. My question has to do with the use of vitamins and minerals. I've been buying them in the local drugstore and taking them according to the instructions on the package. My dad says they won't do me any good and could cause harm. How can they be harmful if anyone can walk in and buy them without a prescription? — Don.

Dear Don: It is also possible to buy cigarettes without a prescription, but I don't think you would say they are harmless. While vitamins and mineral dietary supplements are valuable for preventing and treating certain deficiencies, they should be taken only when a need for them has been established by a physician. Excessive doses can be harmful.

For example, doses of vitamin C in excess of 1,000 mg per day may cause kidney and bladder problems, and large doses of vitamin A can bring about acute toxicity—headache, dizziness, nausea and red and swollen skin. Similarly, some studies suggest that excessive doses of vitamin D may contribute to kidney stones and heart attacks, while too much calcium can cause kidney function to deteriorate.

The best way to insure adequate intake of essential minerals and vitamins is a well balanced, nutritionally

sound diet. If you want to know if you need them, check with your physician. He can tell you which, if any, you need.

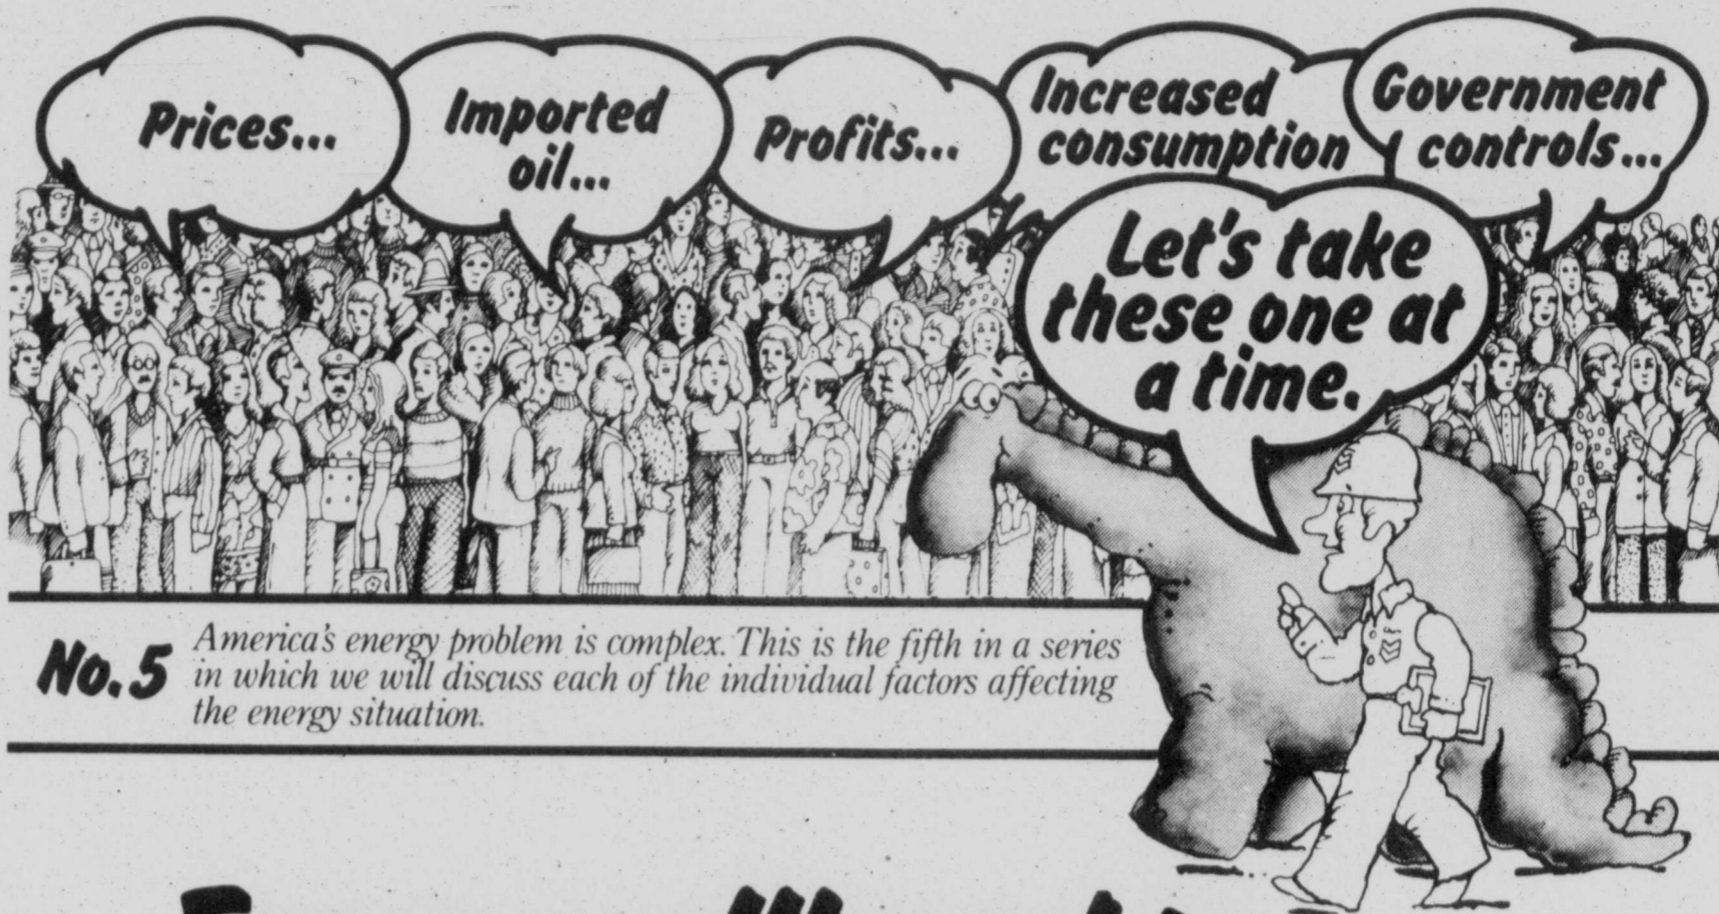

Dear Dr. Solomon: My husband has been placed on a low-cholesterol diet by his doctor. One of the directions is that he have only unsaturated fats. What is the difference between saturated and unsaturated fats, and can you give me examples of foods in each category? — Mrs. F.F.

Dear Mrs. F.: The terms "saturated," "monounsaturated" and "polyunsaturated" describe the degree to which fats are filled with hydrogen atoms. All fats have the same number of calories and contain a compound called glycerol; they are different in the degree of saturation of fatty acids, compounds which fats also contain.

Fats that are soft or liquid at room temperatures are rich in unsaturated fatty acids, either mono- or polyunsaturated or both. These include olive oil, which is largely monounsaturated, and corn, cottonseed, safflower and soybean oils, which are about half polyunsaturated.

Fats such as those contained in butter, cheese and meat, however, which are solid at room temperatures, contain mostly saturated fatty acids.

Through a process called hydrogenation, unsaturated liquid fats sometimes are made more saturated (and solid) by the addition of hydrogen. For a low-cholesterol diet, it is best to avoid these "hydrogenated" fats.

No. 5 America's energy problem is complex. This is the fifth in a series in which we will discuss each of the individual factors affecting the energy situation.

From wellhead to gas pump: No shortage of controls.

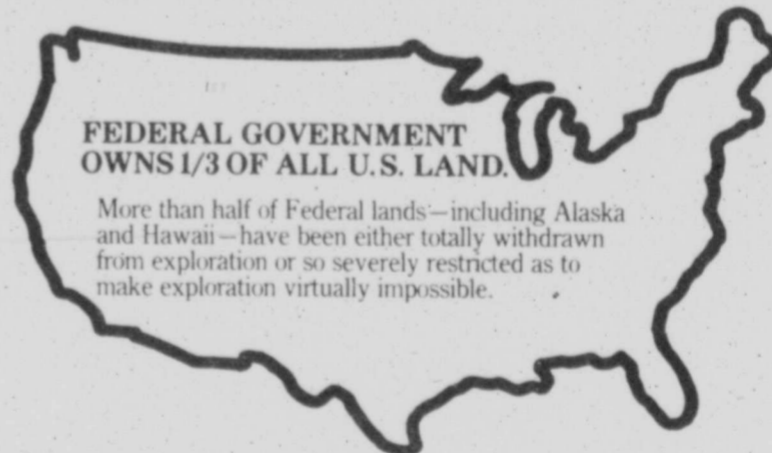

Some government controls are necessary; however, excessive controls in every phase of an oil company's activities limit efforts to develop more energy.

Controls on distribution.

Government product allocation programs are based on past consumption. Current increases or decreases in population in an area aren't adequately considered. Also, gasoline price controls actually encourage consumption.

Controls on exploration.

There are still billions of barrels of crude oil to be discovered in America. However, millions of acres have already been closed to exploration... and the U.S. Government is moving to withdraw even more land.

Controls on production.

Crude oil price controls have discouraged increased production from existing fields because costs cannot be recovered. "Phased price decontrol" will help but it's only a start.

Controls on refining.

Inflexible price controls and environmental regulations are discouraging the building or expansion of refineries simply because the enormous costs can't be recovered.

Fewer regulations—not more—are needed to help solve America's energy problem. Meanwhile, all of us must do an even better job of conserving energy.

Thank you for listening.

Chevron U.S.A. Inc.
