The charred, twisted remains of a four-vehicle accident Saturday night that left one man dead on Interstate 20 near FM 715 spew steam and smoke while Midland firefighters and Department of Public Safety personnel investigate the grisly

scene. The driver of the car on the left was killed in the accident, while two persons in the car on the right suffered only minor injuries. (Staff Photo by Mike Kardos)

# U.S. to ignore petition signed by hostages

WASHINGTON (AP) - A petition seeking release of the Shah of Iran. purportedly signed by American hostages in Tehran, has "absolutely no validity" and will be ignored, President Carter's chief spokesman said Saturday

"If such a document does exist and if it's authentic, it's understood that statements made under duress have absolutely no validity and their only im-pact is to reflect adversely upon the captors," White House press-secretary Jody Powell said.

The petition reportedly was signed by 33 of the 60 hostages. It asked that the shah, a cancer patient in New York City, be released. The Iranian students holding the hostages are seeking the extradition of the shah as a criminal

"Everyone ought to understand that such statements or petitions will have absolutely no bearing upon the actions of the United States," Powell said. "They simply do not exist."

Carter on Saturday ordered the Justice Department to deport any of the 50,-000 Iranians in this country on student visas if it is found they are violating the terms of their visas.

Powell said the president took the action in the hopes it would head off violent demonstrations involving Iranian students which could put the hostages in jeopardy.

But the press secretary denied a report that the United States was considering freezing the assets of Iran in this country. Though the stalemate continued, Powell said he was "certainly pleased" by

growing international support for release of the 60 hostages being held by ranian students at the U.S. Embassy in Tehran.

One dead in fiery mishap

According to eyewitness reports, the victim's car was in One man is dead after a fiery, four-vehicle accident on collision with a truck and one other automobile before the final collision, when the victim's car burst into flames.

U.S. Interstate 20 near FM 715 about 6:35 p.m. Saturday

Killed was Raul Reyes, 28, of 1006 S. Weatherford St., Midland, according to The Texs Department of Public Safety. The victim apparently was trapped within the burning automobile, and his body was burned beyond recognition in the accident, according to DPS reports.

No one else was seriously injured in the incident.

Florence King, 25, and Isaac Glapion, 42, both of Los Angeles, Calif., who were in the last car struck, were treated and released in the Midland Memorial Hospital emergency room.

No further information was available from the DPS late Saturday night.

# Plea bargaining common

# Necessary, but public doesn't like it

#### By BILL MODISETT **Staff Writer**

Willie B., a 32-year-old Midlander who's been in and out of scrapes with the police during the last three years, is charged with burglary and assault.

He broke into Freddie G.'s home and was in the illicit process of stealing Mr. G.'s television when the latter surprised him.

Willie knocked Mr. G. down, hit him a couple of times and then bolted from the house

Later, Willie was arrested and charged with burglary and assault. But Mr. G. was surprised and dismayed a couple of months later to learn that Willie had pleaded guilty to burglary and been given a three-year prison sentence.

"It isn't fair," an incensed Mr. G. screamed. "They're just turning the criminals loose to commit crimes again."

WHAT ACTUALLY HAPPENED, of course, is that a plea bargain arrangement was worked out between the district attorney's office and Willie's defense attorney.

The case cited is hypothetical. It didn't really occur, but it could have and probably has. Plea bargains are common in Midland County and the rest of the nation. Prosecuting attorneys and defense

attorneys agree that the public probably doesn't care much for plea bargains, but, they admit, plea bargains are in many cases the only solution for the American judicial system and, perhaps, a saving grace for American taxpavers.

A plea bargain is the system under which a defendant agrees to enter a plea of guilty or "no contest" to a charge against him in a criminal case.

In return, the defendant - and the state - avoids a trial and receives a verdict directly from the presiding judge, often the sentence recommended by the prosecuting attorney.

A plea arrangement could be compared to a negotiated settlement in a civil suit. In many cases, other charges against the defendant are dismissed as part of the bargain.

"The bottom line to plea bargaining is that it's a necessary thing whether or not people agree with it," said Midland County District Attorney Vern Martin, who admits that his office probably plea bargains 85 to 90 percent or more of the criminal cases it handles.

It isn't possible to take every defendant in a felony case to trial for a

variety of reasons, Martin concedes.

"THERE ARE A LOT of cases that are borderline prosecutable," Martin said. And extenuating circumstances can justify allowing some defendants to plead guilty to a less serious charge, he added.

"You're serving the community if you salvage someone's life who doesn't need to go to the penitentiary.'

But there is another factor money.

The district attorney has performed some calculations on the number of felony cases his office handles each year and the average length of a felony trial. Based on those figures, he says that if plea bargaining was abolished here and all cases were taken to trial before a jury it would necessitate at least 12 district courts.

"It couldn't be done with our present court staff," said Martin. "There's no way."

Jimmie Oglesby, a Midland attorney who sometimes represents defendants in criminal cases, agrees with Martin. Abolishing the plea bargain-

(See PLEA, Page 4A)

He also reported that "various discussions" were under way to help resolve the crisis. But he would not elaborate, saying, "I am in no position to get into any details at all about who, what, when and where.'

Powell said Carter met early Saturday with Secretary of State Cyrus Vance and national security adviser Zbigniew Brzezinski. The president postponed a trip to Canada this weekend to monitor the situation from the White House.

Carter also received a report from Brzezinski on a White House meeting Saturday of a special coordination committee, which includes security advisers from various government agencies, Powell said.

The president "continues not only to monitor the situation as closely as he can but to oversee and direct those efforts," Powell said.

Though the hostages remain the No. 1 priority at the White House, Powell said. "the business of the government has not come to a halt."

The press spokesman said the administration was pleased by the efforts of the U.N. Security Council, which asked that the hostages be freed, and by other expressions of "public and private support."

"We are also pleased at some increase in independent access to the hostages," he said, referring to a visit to the U.S. Embassy by several ambassadors.

Though the ambassadors were not able to speak to the captives, Powell said, "there were able to see them and to count them." He did not have a specific count, but the number of hostages is estimated at 60 to 65.

Powell said there were "no reports to us of any evidence of physical mistreatment or signs of physical mistreatment from the diplomatic representatives."

# Carter orders students deported

WASHINGTON (AP) - President ceedings" against those who have Carter, concerned that demonstrations in the United States could have an adverse effect on American hostages in Iran, ordered the Justice Department Saturday to deport Iranian students who are violating the

terms of their entry visas. White House press secretary Jody Powell said there is good reason to believe "many" of the 50,000 Iranians in the United States on student visas are violating immigration laws.

He said the Justice Department was ordered to "take the necessary steps to commence deportation proviolated immigration laws.

The order applies only to students, and presumably to persons here on student visas who are no longer attending classes.

Powell noted that simply participating in a legal demonstration would not be cause for deportation, since a person legally in this country is deemed to have the same constitutional rights as a U.S. citizen. However, a student visa does impose certain requirements the students must meet to remain in good standing.

# **Dealing with Iran**

#### By William Randolph Hearst Jr.

Editor-in-Chief The Hearst Newspapers

New York - As of this writing the situation in Iran is so fluid, so laden with diplomatic quicksands, that it is impossible to predict its outcome. This is a lot more serious than a takeover of an embassy by a bunch of terrorists. These terrorists have the back-HEARST ing of the government of the host country.

The biggest mistake we could make is to consider that we are dealing with a modern, western-oriented chief of state. The Ayatollah Khomeini is a

Muslim Persian, steeped in the ancient Shi'ite culture which decrees that the head of the church shall also be head of the state.

President Carter is in the most awkward position he has confronted in his three-year presidency as 65 Americans are held hostage, their own embassy taken over by student rioters encouraged by Khomeini's government, and up to 800 more U.S. citizens in Iran threatened with imprisonment.

There is much that Americans do not understand about the religion of Iran. It is not quite Islamic. Now

### **Editor's Report**

headed by the Ayatollah Khomeini, it is known as the Shi'ite Church. Its leaders are believed to be direct descendants of Ali, son-in-law of Mo-

Cambodia and Thailand may be halfway around the world from Midland, Texas.

But that's not too far to locate a missing daughter. At least that was the attitude taken by volunteers with the Midland Resettlement Program in trying to find some missing members of Cambodian families which arrived in the Tall City in August.

One of those missing relatives has been found. Ta Thoun and his family came to the United States

minus a daughter: 17-year-old La Tan. She had been left with a Thailand farmer for safekeeping. But he hadn't taken her to a refugee camp in Thailand by the time Ta Thoun and his family were ready to leave for the U.S.

The Midland Resettlement Program sent out queries about the girl through Church World Services, the group organizing the relocation of refugees in Ameri-

Ta Thoun also sent messages to relatives in Thailand. On Wednesday he received a letter saying La Tan is with an aunt - a sister of Ta Thoun's - in a town in northern Thailand near the Cambodian border.

How she got there isn't known, said Joanne Peterson. coordinator for the local resettlement program. "I'ne letter is written in Thai, and Ta Thoun can't speak English," she said.

Midland program helps find missing girl

The work for the local group isn't over. Now they will apply to Church World Services to bring La Tan to Midland to rejoin her family, Mrs. Peterson said.

The search for the son of a Cambodian woman living here with her two daughters has proven futile so far. But that woman's sister-in-law has been located in Houston and Tang Chung Eng is visiting that relative today, according to Mrs. Peterson.

"She knew her sister-in-law had come to the States, but she didn't know where she was," said the coordinator. They queried Church World Services and discovered the woman and her family in Houston under the sponsorship of a Cambodian family.

"That family had gotten out in 1975 and wanted to do something to help their countrymen," Mrs. Peterson explained.

Tang Chung Eng and her two daughters, Ear Kuy Huong and Ear Miav Huong, are being sponsored by St. Ann's Catholic Church. It so happened, Mrs. Peter-

682-5311 Line Answer P.O. Box 1650, Midland 79702 By Franchelle Moore

How do you get speed limits lowered in certain areas of city streets?

I am talking about the 45 mph speed limit on North Big Spring near Scharbauer Drive, where there is a lot of traffic going into and leaving the large supermarket at the intersection of Big Spring and Scharbauer Drive.

I know accidents will happen, but at 45 mph, the results could be much worse. - R.A.

ANSWER: Doug Vanover, traffic engineering co-ordinator for the city, says his department is checking other areas of the city at the present time, but will do complete research on the North Big Spring Street situation as soon as possible

He also says state law determines the speed limits, based on speed studies. The results are determined by a percentage taken of the number of drivers, say 15 percent, who speed, with 85 percent driving at reasonable speeds.

A few years ago I installed an artificial log set in my fireplace. To obtain a "glowing embers" effect, the manufacturer supplied a bag of asbestos that is spread on top of the sand (just under the grate and logs) and when the gas is burning the asbestos fibers glow as if they were real wood embers.

I remember reading an article advising that asbestos fumes have been found dangerous to inhale, and I cannot locate a safe substitute, although I understand one is available. I would appreciate any leads on locating a substitute. - Russell Sexton

ANSWER: We checked with a couple of Midland businesses selling fireplace accessories and were unable to discover a substitute you mentioned.

However, there is a business in a neighboring city which has what is referred to as lava rock, which can be placed beneath the artificial logs and give the effect you want. The "rocks" are on order. Contact Answer Line.

I want to dry flowers for an arrangement. Can you tell me how to preseve flowers with this method? - M.F.

ANSWER: We have read about three different methods for drying flowers

The air-drying method requires that the foliage be stripped from fresh cut flowers. Tie loosely in small bundles and hang upside down in a warm dark room a week or two. Then store in cardboard boxes until ready to

There is a glycerine method which says to smash the bottom two or three inches of the stems of broad-leafed evergreens, place the stems immediately in four to five inches of a solution of two parts hot water to one to two parts glycerine (or antifreeze). Add more of the solution as it is absorbed. Soak two or three weeks, or until leaves are supple and golden brown.

The third method is for pressed flowers for pictures or laminated lamp shades.

Press the flowers and foliage between sheets of porous paper, place a weight on top, and allow several weeks to dry. Or they can be pressed with a warm iron until all the moisture is gone.

The Consumer Information Center, Department 679G, Pueblo, Colo., 81009, has free copies of the booklet "Dried Flower Arrangements" by the U.S. Department of Agriculture.

# **BART** talks still deadlocked

#### **By PETE JACOBS**

OAKLAND, Calif. (AP) - Officials of the Bay Area Rapid Transit System say that while talks are "positive," they have not yet reached the breakthrough that would mean resumption of full train service for the San Francisco area's commuters.

Negotiators Friday recessed contract talks until this week. "We've been sensing we're close," said BART spokesman Mike Healy.

Healy said wages remained part of

ning some of the trains, serving about 40,000 trips daily, and plan to add more trains next week to serve most of the normal 165,000 daily trips.

The unions said they were locked out after large numbers of employees reported sick, while management contends the employees were on strike. The state ruled the union members were not eligible for unemployment benefits.

Union leaders had asked for a comtract increase based on the cost of who performs before live living, but management had refused audiences. Or Robert

to consider such an approach. In-

stead, BART's last public offer

amounted to an increase of 21 percent

BART's offer would have brought

wages for the 380 train operators to

\$24,090, an increase of about \$2,000

# nce upon a time' enjoying revival

By TIMOTHY HARPthey can ER "I'll tell a story when-

ever I'm asked, whether MADISON, Wis. (AP) I'm paid or not," says - Once upon a time, peo-Miller, who has raised on ple told each other a steady diet of Pecos stories Bill in his native Oklaho-Some of the stories ma and later on voodoo

taught lessons on how people should get along with each other, like **Bible stories before there** was a Bible. They helped explain things people did

not understand back then, like thunder and lightning. Or life and death.

All stories were entertaining, but some were especially fun. These were the stories about princess and princesses, witches, trolls, dragons, giants, flying carpets, evil spells and enchanted kingdoms.

FOR THESE, you see, were the days of the old magic. But over the years,

there came to be a new kind of magic. This was the magic of books and newspapers

and radio and television. People did not need the knee. old storytellers to come around telling the old

stories. Oh, some people still liked stories, especially children. But there were only a few storytellers left to tell them.

Then one day, actually only a few years ago; young mothers and fathers began telling stories to their little children. They told the asked whether she liked stories they had read or heard when they were

little. quickly. OF COURSE, the children liked the stories. And the parents found

that they liked them, too. that's all. Some of them found that they liked telling stories at night more than is a lot of satisfaction in

watching TV. Some parents liked telling stories so much that they began telling

them to each other. They began forming a little groups to tell and listen to stories.

In New York City nowadays, these young. storytellers are people like Laura Simms, a vivacious young woman

Rodriguez, who is blind,

poet Homer. He tells

stories over the radio,

as Homer probably

would if he were alive

There are also new sto-

today.

he explains. "Kids are unabashed. They are seeking information. Stories can show kids the way the world works, and our place in it."

After telling stories to children all day, what does a storyteller do for fun at night? Tell stories to adults, naturally.

For Miller and Wagler, that often means the Madison Storytellers Guild. This is one of a growing number of loose groups of young parents who gather regularly in each other's homes for an evening of wine and cheese and stories. One recent gathering was special because of the out-of-town visitors who not only told but

talked about the renewed popularity of "the oral tradition. "It's happening everywhere," says Lynn Berman, who helped found

the Storytelling Center of

year.

Oneonta, N.Y., last **A SPEECH** pathologist who uses storytelling in her work, Ms. Berman said the Oneonta center's half dozen storytellers put on 160 school and community storytelling programs in its first 18 months.

Another visitor, Prof. Spencer Shaw of the University of Washington in Seattle, has traveled all over the world telling stories and teaching storytelling to others. Shaw says th first duty of

a story, and its teller, is to entertain. "It's getting back to the simple, the beautiful type of entertainment that reigned supreme for so many centuries," he

says "It develops the art of mental listening. Each one can become, for a short time, the master of the environment created in the mind through the

First Lady Rosalynn Carter cuddles a Cambodian baby during her tour of a refugee camp in Thailand during which Mrs. Carter saw first-hand the condition of Southeast Asian homeless. "It's like nothing I've ever seen it's emotionally overwhelming," she said. (AP Laserphoto)

# Rosalynn returns home pledging U.S. assistance

BANGKOK, Thailand (AP) - Rosalynn Carter flew home Saturday strongly affected by what she saw during a two-day tour of Thai refugee camps and pledging that the United States would provide all it could to help feed and care for thousands of starving Cambodians inside Thailand.

Prime Minister Kriangsak Chomanan said he sent a letter with her for President Carter urging that the United States send more assistance and accept more Indochinese refugees from his country, which has given sanctuary to 200,000 Indochinese refugees as well as the Cambodians camped along the border.

Mrs. Carter, speaking to representatives of relief agen-cies trying to care for Cambodians here, said America would "work in any way possible ... to do what we can to help you and your efforts.

Mrs. Carter will report to the president on her visit, which took her to the Sa Kaew refugee camp where 31,000 Cambodians are struggling against starvation and disease.

At a refueling stop at Japan's Yokota Air Base, Mrs. Carter told reporters that what she had seen in her brief visit was "unbelievable.

The first lady met aid representatives Saturday morning, then toured a Bangkok center for Indochinese refugees awaiting flights to new homes abroad. Mrs. Carter told reporters at the center that the "dimensions of the (Indochinese refugee) problem are almost inconceivable.

Earlier, Mrs. Carter met with seven congresswomen here on a similar mission. The group plans to fly to Phnom Penh on Monday to try to persuade leaders of the

Vietnam-backed government to permit an increased flow of aid across the border.

Food and supplies from many countries are being flown into Phnom Penh and sent by sea to the port of Kompong Som. Cambodia recently opened up the Mekong River to barges carrying aid from non-communist nations.

But the Phnom Penh government rejects an Americansuggested truck route for supplies from Thailand, arguing some of the food would go to anti-government guerrillas loyal to ousted Cambodian Premier Pol Pot.

The French ship "Ile de Lumiere" left Thailand Saturday to sail up the Mekong with 600 tons of rice, 270 tons of milk powder, 100 tons of oil and 40 tons of sugar.

# Thai-Cambodian clash blamed on 'mistake'

BANGKOK, Thailand (AP) - The Thai government Saturday sent a senior military team to the Thai-Cambodian border to investigate a bloody clash between Thai soldiers and anti-communist Cambodian guerrillas.

Senior Western diplomatic sources said as many as 100 Cambodians may have been killed when Thai soldiers shelled their camp Thursday, apparently because of a local dispute.

The Thais and the guerrillas of the "Free Khmer" movement normally enjoy good relations.

"There has been a mistake at the border. We will investigate and solve this problem," the supreme command's chief of staff Gen. Saiyud Kerkhpol told The Associated Press.

# Airwest resumes business

SAN MATEO, Calif (AP) - Hughes Airwest, grounded for two months because of a strike by 2,200 employees; resumed service Saturday. offering passengers halffare coupons for future flights to regain lost business

Hughes, which serves cities in the western United States, Carrada and Mexico, had stopped flying on Sept. 10 when ground workers belonging to the Airline Employees Association walked out.

After lengthy negotiations, the sides reached angagreement on Oct. 29 giving workers a 33 percent pay raise over the life of the agreement

# NOVEMBER IS DINING ROOM MONTH at Knorr's

Save on our entire stock of dining room furniture...servers, china cabinets, tables, chairs and buffets. Every piece of dining room furniture is reduced through Nov. 30th. Come in today and save. All items subject to prior sale. No approvals or phone orders, please.

which expires July 31, 1981.

As it resumed service, Hughes offered half-fare coupons good for flights between Dec. 1 and Jan 31 of next year. In addition to allowing half-fare travel on all Hughes roundtrip flights, an attachment to the coupon allows passengers to move into "business coach'' class from "coach" on another flight between Dec. 1 and June 30, 1980.

2

"The response to the resumption and the coupon offer has been overwhelming,'' airline spokesman Larry Litchfield said. "We had ad vance bookings of about 8,000 for Saturday's flights, while we had anticipated bookings of about 5,400.

"Normally on Saturday we carry between 12,000-13,000 passengers.

# Southwest increases local flights

DALLAS — Southwest Airlines Wednesday increased service between Midland, Love Field and El Paso by one round trip flight each business day, according to airline of ficials.

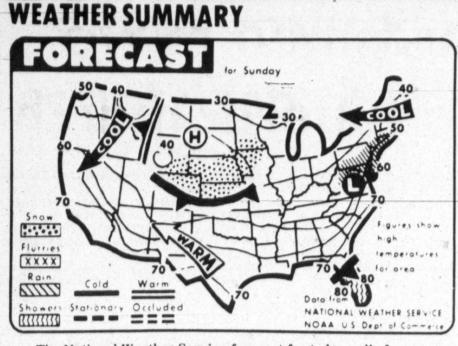

The Dallas Love Field to Midland flight departs at 6:40 a.m., while the flight to Dallas from El Paso departs at 7: 45 a.m. (MST).

The new Midland to El Paso flight departs the Permian Basin at 10:15 a.m. Service from El Paso to Midland departs at 10: 15 (MST) as well. Non-stop service was also added to the Dallas Love Field/Austin market with a new departure from Love at 8:50 a.m. and from the state capitol at 9:40 a.m.

# Midlanders help locate missing girl (Continued from Page 1A)

son said, that one of the nuns had to travel to Houston this weekend for a meeting. So.she loaded up Chung Eng and the two girls and took them to visit the sister-in-law.

"Chung Eng was so excited about going." Mrs. Peterson said with a laugh

The work for those participating in the resettlement program hasn't diminished any over the weeks since the Cambodians first began arriving in Midland in August.

A Laotian family with seven members landed in Midland on Thursday night, Mrs. Peterson said. This group - two of whom speak English - are being sponsored by St. Luke's United Methodist Church.

A second group - eight members of a Cambodian family - is to arrive today, she said. Sponsoring these people will be the First Christian Church.

The volunteers and sponsors are kept busy with the families, she remarked. On Halloween they took all the transplanted Asians roller skating - "It was a riot" - and then had a pot luck supper.

Last week the Cambodians were treated to a Thanksgiving supper with all the trimmings. "We explained to them how our forefathers had come to this country with very little and faced hardships," Mrs. Peterson said. "We were trying to draw parallels to the Cambodians and these early Americans.'

But the past is hard to forget for these Cambodians who watch the news on television and see film clips of their countrymen starving.

"They (Cambodians in Midland) are very grateful they're here," Mrs. Peterson said. "But they're very concerned about their country. Their own memories are very fresh in their minds and very painful. They still have relatives in Cambodia starving or in Thailand being shot at.'

The population in Cambodia at one time was seven million. Today, said Mrs. Peterson, that figure is down to 31/2 to 4 million.

"And they expect 2½ million of those people to die," she added. "There's not a family here that hasn't lost a family member to starvation.

Stipps have word daughter 'safe'

Midlanders get a close look at rocks, metals and even sand Saturday at the Gem and Mineral Show. The show, sponsored by the Midland Gem and Mineral Society, continues today from 10 a.m. to 6 p.m. at the Midland County Exhibit Building. (Staff Photo by Bruce Partain)

# Plea bargaining a necessary evil, but public often thinks it's not fair

#### (Continued from Page 1A)

ing system in favor of strictly jury trials is unrealistic, he said. THE COST OF SUCH a system would be prohibitive, said Oglesby, and "we'd probably have to go to professional jurors if we didn't have

plea bargaining." Midland County currently has three state district courts, but one is primarily a court of domestic relations,

handling divorces, adoptions and so forth. The other two hear felony criminal matters and civil cases. Martin estimated that taking all criminal cases to jury trials would

necessitate numerous additional courts, a larger courthouse, more clerical personnel, a larger district attorney's staff, more bailiffs, a larger police force and a larger sheriff's department. Officers would spend more time in court testifying in trials

Additionally, 300 to 400 jurors would have to be on hand all the time to serve on jury trials.

The cost to taxpayers, both men acknowledged, would be enormous. "The alternatives (to plea bargaining) are unacceptable in terms of cost," Oglesby commented.

**DOES PLEA BARGAINING serve** 

know more of the facts about a case than jurors are allowed to know in a trial. Prosecutors can weigh facts about the defendant's prior criminal record and other details, and render perhaps — a more fair recommendation on the punishment in a partic-

ular case. But that doesn't mean the presiding judge has to follow the prosecutor's recommendation

While a judge usually follows a prosecutor's recommendation in a guilty plea, if he feels the punishment is either too light or too severe, he can override the recommendation, Martin said, and impose another sentence.

OGLESBY AGREED, saying the court "acts as a moderating influence when the plea bargaining gets extreme.

Plea bargaining certainly isn't the perfect solution to the administration of justice, both men agreed. It is, at this time, the most acceptable alternative.

The function of plea bargaining is "to assist in the administration of the criminal justice system without burdening the taxpayers and individuals with prohibitive costs," Oglesby noted.

Those prohibitive costs can, in some

Defending one's self in court is an expensive proposition, he said, and can cost a defendant from \$2,000 to \$10,000, mainly in attorney's fees.

ON THE OTHER HAND, a guilty plea usually costs from \$500 to \$1,000 in straight costs to the defendant.

Mentally and emotionally, the trau-ma of defending one's self in court also is tremendous, Oglesby noted.

Plea bargaining undoubtedly doesn't represent pure justice, but Oglesby added this thought to the search for justice.

"Pure justice is something we aren't going to get until we die and go face Saint Peter," he said.

# **Editor's Report**

#### (Continued from Page 1A)

hammed and are known as Imans. Iranian Muslims recognize 12 Imans, 11 of whom died violently as martyrs. The 12th is the "missing" or hidden Iman who will one day reappear on earth to rule by divine right.

Devout Iranians believe that the missing youngest child, though born many years ago in the antiquity of pre-Christian days, is still alive. Some leaders of the Shi'ite Church believe that some day this 12th descendant of Mohammed's daughter, Fatina, will show up as the Ayatollah, the Iman, or descendant of God.

In Iran today, many citizens regard Khomeini as that direct descendant of Möhammed. Khomeini has neither confirmed nor denied this other than to avow that he embodies the spirit of God. There is the suspicion, however, that he even believes, himself, that he is Fatina's lost son - the Iman.

That is why, diplomatically, we are skating on thin ice.

We are confronted also with he bitter hatred of Khomeini and other leaders of the Shi'ite Church for the Pahlevi dynasty, founded by the shah's father, who started his career as a stable boy in military barracks. The father and son crushed the dominant influence the Shi'ite Church had exercised over Iranian life for centuries. The father once entered a Mosque with his boots on and beat up a religious leader who opposed him. The son ended the church's virtual control of education and took vast tracts of land away from the church

#### **Firefighters** abandon effort on burning tanker

GALVESTON, Texas (AP) - Firefighters gave up trying to extinguish a 10-day-old fire on a crippled tanker Saturday, saying they would let the blaze burn itself out while trying to keep it from spreading to other areas of the oil-laden ship anchored just offshore.

and gave them to the peasants. He exiled Khomeini in 1963 for instigating riots.

Those are the reasons why Khomeini is trying to blackmail the United States into sending the ailing shah back to certain death in Iran and we should be proud of President Carter for refusing to do so.

The shah was a staunch friend and strong ally who helped us at the time of the 1973 oil embargo, and who did virtually everything we asked him to do for 17 years. It would be unconsciounable now to take him out of the New York hospital in which he recently underwent a major operation for cancer.

So we are not dealing with a rational, even sane, individual in trying to persuade Khomeini to give up his medieval-minded attempt to bargain American lives for the life of the shah. As Secretary of State Cy Vance said this week, it is an "extremely difficult and delicate" situation which calls for-"quiet, careful and firm diplomacy.

It should be made clear, however, that if the American hostages are murdered, American retribution will be terrible

I don't mean that we should attempt to conquer Iran militarily, but we should warn Khomeini that if the American men and women captives are harmed, we will take military reprisals against Iranian targets, such as its oil ports. We should also warn him we will cut off all trade with Iran.

One of the things that can be done right away is to put a stop to lawbreaking anti-American demonstrations in this country by alien Iranian and othe foreign students.

President Carter's order banning the issuance of federal demonstration permits to Iranian protestors was a good move. Similar orders should be issued by the governor of every state.

Good news too is that Maryland's Republican Representative Bob Bauman and Texas Democrat John Hightower are co-sponsoring a resolution that would make it mandatory for

The parents of Susan Renee Stipp, the former Midlander caught in the current turmoil in Iran, received a telegram late Friday afternoon assuring them that their daughter is OK and not in any immediate danger, according to the woman's father, M.R. Stipp of Midland.

The telegram, he said; read: We're okay. Married. Not worry.' The former Miss Stipp was apparently married Nov. 1 to Fariborz Dadras, an Iranian she met while living in Iran.

'We presume they were married on schedule," her father said. The Stipp's daughter lives in Isfahan, about 200 to 300 miles south of

Through the plea bargaining system, the judicial system comes closer to achieving fair play in criminal cases, Oglesby said.

"A higher quality of justice results from plea bargaining than would from jury trials," Martin, the prosecutor, opined. He noted that prosecutors generally

More cold weather due

Don't count on turning down the electric blanket anytime soon.

Continued cloudy and cold is the word from the forecasters at the National weather service office at Midland Regional Airport.

Today's high should be in the low 60s, with the overnight low in the low 30s. Monday's high is expected to be in the mid-50s.

Southwest winds should be blowing at 10-15 mph today

Saturday's high was a chilly 46 with the overnight low recorded at 40 degrees

Neither mark approached the records for the date of 85 degrees set in 1964 or 16 degrees set in 1950.

No rain is in the forecast, so the monthly rainfall total should remain at a mere trace, with the annual accumulation standing at 13.25 inches.

Strong north winds brought cooler temperatures and a variety of weather to Texas-Saturday, including rain scattered throughout the state, choppy seas along the coast and snow in the Panhandle. The National Weather Service re-

ported light snow falling throughout the day from the Amarillo area southward past Lubbock, the result of a large high pressure system centered over northeastern Oklahoma. In the southern part of Texas,

where temperatures were slightly warmer, clouds and scattered rain spread across West and Southwest Texas into the coastal plain.

THE MIDLAND REPORTER-TELEGRAM, SUN., NOV. 11, 1979

# 1,000 police, Guardsmen move into town prior to funeral march

GREENSBORO, N.C. (AP) -Nearly 1,000 police and National Guardsmen moved into this normally placid city Saturday in advance of a funeral procession for five persons slain at an anti-Ku Klux Klan rally.

Communist demonstrators, planning to parade their dead comrades through the streets Sunday, said they would be armed despite police demands that they keep their guns at home.

"We will guarantee the security and armed defense of the march ... if we are attacked we will respond," said Nelson Johnson, a member of the Communist Workers Party, organizers of the procession and the earlier demonstration that turned violent. Col. Kenneth Newbold, commander

within days

of the 500 National Guardsmen, mostly from the furniture town of Hickory, said his troops would carry unloaded rifles but officers would distribute ammunition if he gave the order.

Police expect about 1,000 persons for the 2.5-mile march, which will start in downtown Greensboro at 1 p.m. A police spokesman said Saturday his department had received no reports of any planned attempts to disrupt the march.

Concerned about a possible confrontation, city officials on Saturday prohibited the sale, display and use of all guns. Police Chief William E. Swing said city officials had declared a "state of emergency," but he stressed that it concerned only firearms and did not include a curfew.

He told an afternoon news conference that any citizen found with a gun would be arrested.

Nearly 300 members of the National Association for the Advancement of Colored People are holding their state convention in Greensboro this weekend. Kelly M. Alexander, state president, said the group was not taking an active role in the protest but that some of its members may participate in the march

Posters distributed by march organizers urged sympathizers to "turn the country upside down to beat back the new wave of KKK, Nazi and FBI attacks."

Five members of the leftist group four white men and a black woman -died after gunmen opened fire on a crowd at a "Death to the Klan" rally Nov. 3.

PAGE 5A

Fourteen white men, many claiming to be Klansmen or Nazis, were arrested after the shooting and police said they were looking for at least one other suspect.

Elsewhere, 30 robed Klansmen marched for 45 minutes Saturday without incident in Kinsport, Tenn., and a peaceful anti-Klan rally was reported in Detroit.

Greensboro, a textile and tobacco city of 160,000 and the scene of the first lunch counter sit-ins in 1960, was calm following the shooting. City officials contend the violence stemmed from political disagreement between two political fringe elements who had little support in the community.

THE REAL PROPERTY AND A CONTRACT OF A CONTRA

New housing program winner for everyone

#### By LANA CUNNINGHAM **Staff Writer**

No one loses at this game: not the homebuyer, not the builder, not even the Realtor.

Midland and Odessa homebuilders are instituting a new program for this area which should benefit them - if they qualify - and the homebuyer. And it should keep Realtors out of the middle of disputes between the consumer and builder.

The Home Owners Warranty, known as HOW, is a concept in the housing industry which provides an insurance-backed warranty to purchasers of new homes.

, David Pine, a local builder who has been instrumental in getting the program to Midland, described HOW as an attempt by the National Home Builders Association to regulate itself and "to keep the government out of our business.

Basically, what the program does is provide the buyer with a written 10-year warranty backed by insurance. It also gives the builder the ability to provide 10 years of protection at a substantially low cost.

"This keeps fly-by-nighters out of it (HOW)," Pine said. "It's an attempt to identify builders who are of good reputation.

"And, because it's insurance, it doesn't relieve the builder of his responsibility.

The local program is being established as a sub-council to the panel in Lubbock, according to Pine. Previously, the national organization had refused to allow smaller cities - such as Midfand and Odessa - to have HOW councils and the program, he said.

But the head group changed its mind recently and the local council is ready to go, Pine said.

A homebuilder must fill out an application form and submit it to the council for approval. If he is allowed into the program, the home builder must register each house he builds with HOW.

"It costs \$30 to register the house and an additional \$2 per \$1,000 of the sales price with the \$30 deducted from that amount." For example, Pine said, cost of a \$100,000 home is \$200.

During the first year under the 10-year warranty, the builder warrants against defects caused by faulty workmanship or materials due to non-compliance with HOW's approved standards.

This warranty continues through the second year to protect against defects in wiring, piping and ductwork in the home's electrical, plumbing, heating and cooling systems and against major structural defects.

For the third through the tenth years the buyer is protected against major structural defects.

"For years builders supposedly had a one-year warranty on their homes," commented Don Harvey, a local Realtor, "but I've never seen that warranty. Under HOW, it spells out everything."

If a disagreement between the builder and consumer does arise, the council is there to try mediation before the situation reaches the courtroom, according to the local builder.

When a problem with the home's construction becomes apparent, the consumer often returns to the Realtor to complain. HOW's council keeps the Realtor out of the disagreement, Pine said.

One of the best points about the program is that during a disagreement the council will try to "get the people talking to each other again," Harvey said.

This often results in a settlement without one party taking the other to court. Pine added.

Irving Jarrett will be the local executive officer. Home builders should be able to enter the program soon, Pine noted.

Builders who can be contacted about further information on HOW are T.J. Melton III, Tim Taber, Chuck Wallace, Irving Jarrett or Pine,

685-3020 "This is the first positive step home builders are taking here," Pine stressed

"It's time for our profession to put something back into the communi-

# for JA company with most members

The Junior Achievement company with the most members winning a J.A. Whiz Award for October was Bell Craft, counseled by Southwestern Bell Telephone Co. Bell Craft was followed by Starco, counseled by Atlantic Richfield Co., and R Tops, counseled by the First National Bank

J.A. Whiz Awards are presented monthly to those achievers who have exemplary understanding of free enterprise, good sales and regular attendance. Selling was not a factor in the October contest because several companies were not yet selling their products by the end of October. Knowledge of free enterprize is measured by a quiz.

The award is a monthly version of annual awards for achievers which are presented at a banquet in April.

This is the second year for the J.A. Whiz contest, which was developed in Midland and is credited with contributing to last year's rise in annual

contest exam scores in all categories and a rise in retention of members of 9.2 percent.

### Free-for-all ends activists' meeting

PORT-AU-PRINCE, Haiti (AP) --A chair-swinging free-for-all that broke up a meeting of some 6,000 human rights activists left Haiti's capital city tense Saturday.

Ambassadors from the United States, France, Canada and West Germany met to discuss the situation. Personnel from the four embassies were reported among those beaten at the Friday night fracas.

Witnesses said the melee appeared to have been sparked by members of the government's secret police.

No one was reported critically injured, but newsman Georges Michel of Radio Metropole was hospitalized with head injures.

### for growth

ish plan.

At the end of the eighth week, the Junior Achievement company showing the most growth in the number of employees in attendance is Adisca, counseled by Adobe Oil & Gas. Next are Tigon, coun-

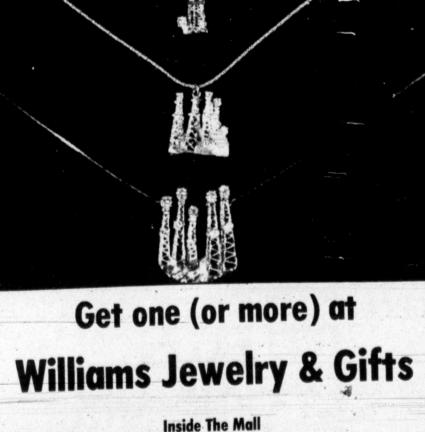

seled by Exxon Co. USA, and Plantec, counseled by Union Texas Petroleum.

The first-place company in growth at the end of the year will be treated to a meal and tennis at **Ranchland Hills Country** Club.

# Tellico's gates to close

# But marshals may have to evict some

legal wrangling over such diverse interests as the resist you're taken to jail." 3-inch snail darter and sacred Indian burial grounds, the Tennessee Valley Authority is finally ready to close the gates of the Tellico Dam.

But the federal agency still faces last-minute court challenges to the project and the possibility of having to use U.S. marshals to evict some landowners.

"My New Year's resolution will be not to talk about the Tellico Dam," TVA chairman S. David Freeman said Saturday. "The controversy is over, the full process of the law has been exhausted."

Following Friday's two legal rebuffs to dam opponents, Freeman appeared optimistic that the sevenstate agency would soon be able to close the gates of its 24th dam and flood 16,000 acres of rich farmland in the Little Tennessee River valley.

However, attorneys for two groups of Cherokee Indians and former landowners who have waged a 14-year fight against the \$130 million dam 25 miles southwest of Knoxville continued their fight.

The Indians' lawyers appealed to Supreme Court Justice William Brennan for an injuction on Saturday, but a court spokesman said Brennan would not rule on the plea until at least Monday.

On Friday, the 6th U.S. Circuit Court of Appeals and Supreme Court Justice Potter Stewart had rejected the Cherokees' appeal for an injunction to prevent TVA from closing the dam's gates.

And on another legal front, Boone Dougherty, a lawyer who used the snail darter to stop TVA's completion of the dam three years ago, met Saturday with former landowners who refused to leave their homes Friday as ordered by TVA. Dougherty said he might file some kind of a suit on their behalf this week

But all of the dam's opponents agreed their chances were bleak.

"It's like when a man waits to die," said Tom Moser, a postman and one of three holdouts who refused to leave their farms after the government condemned them. "You don't want to, and you don't know when, but you know it's coming.

Six miles down the road, Ben Ritchey and his wife, Jean, were harvesting soybeans Saturday on their 119-acre farm. They, like Moser and 75-year-old Nellie McCall, have refused to leave until federal fight on the dam's behalf. marshals evict them.

my Bible right there in a stack," Mrs. Ritchey said. "I'll get it when they take me where ever it is they

the land except for a World War II stint in the Navy. Cincinnati.

KNOXVILLE, Tenn. (AP) - After a decade of "I know there's nothing we can do," he said. "If you

Freeman said the fates of Moser, the Ritcheys and Mrs. McCall are in the hands of federal marshals, though TVA attorneys say they still have to get a formal court writ for the evictions. The agency said that no evictions would occur before Monday and that it would allow farmers to complete their current harvest.

"When and how they handle it is up to them," Freeman said. "I have more sympathy for the 300 people who have left the project than for the ones who are still there. They have thumbed their noses at the law. They are going to have to move. Congresshas spoken.

Such showdowns are not unique in TVA's 47-year history. Since the agency began its first dam in the early 1930s to bring electricity to the depressed rural South, there have been confrontations, sometimes violent, between displaced landowners and federal marshals.

Proposed in 1936, delayed in 1941 because of the war, the Tellico Dam was taken off the shelf in 1965. President Kennedy's war on poverty and TVA's mission to develop the region's economy had not reached the Little Tennessee River valley, where incomes were half the national average.

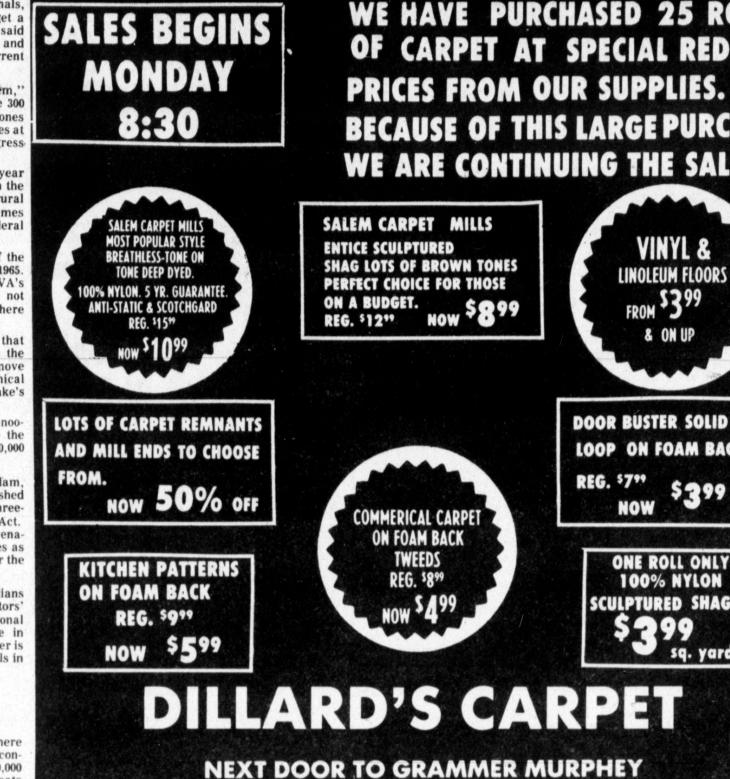

TVA sold the dam to Congress with a promise that it would open the area to barge traffic. With the ability to use the nation's inland waterway to move their raw materials and finished products, chemical companies and pulp mills would find the lake's shoreline attractive.

Tellico will provide flood protection for Chattanooga and other cities downstream and increase the hydroelectric output of a nearby dam by 200,000 kilowatts, enough to heat 20,000 homes.

The Supreme Court ruled in 1978 that the dam, though 90 percent completed, could not be finished because it would destroy the snail darter, a threeinch fish protected by the Endangered Species Act. TVA, under new management and no longer ena-

mored with the project, watched on the sidelines as Senate Minority Leader Howard Baker took over the

# U.S. fishermen arrested for poaching

NASSAU, Bahamas (AP) - Ten small boats were seized and 25 U.S. fishermen from the Miami area illegally in Bahamian waters.

Names of those arrested would not be released and fishing equipment. until they appeared before a magistrate Monday morning, authorities said.

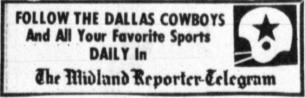

A spokesman for the Royal Bahamian Defense Force said the small fishing boats were seized Thursday and Friday in an area about 90 miles south of Miami. It was said to be the largest seizure to date the 140-man defense force in its crackdown on poaching in Bahamian waters, the spokesman dded. In June 1975, the Bahamas declared a limit ban ning all fishing within 200 miles of the island. In recent years, the Nassau government has stepped up enforcement

Those arrested offered no resistance and there were no reported injuries, authorities said. If conwere being held Saturday on charges of fishing victed, the U.S. fishermen face fines up to \$10,000 each, jail sentences and confiscation of their boats

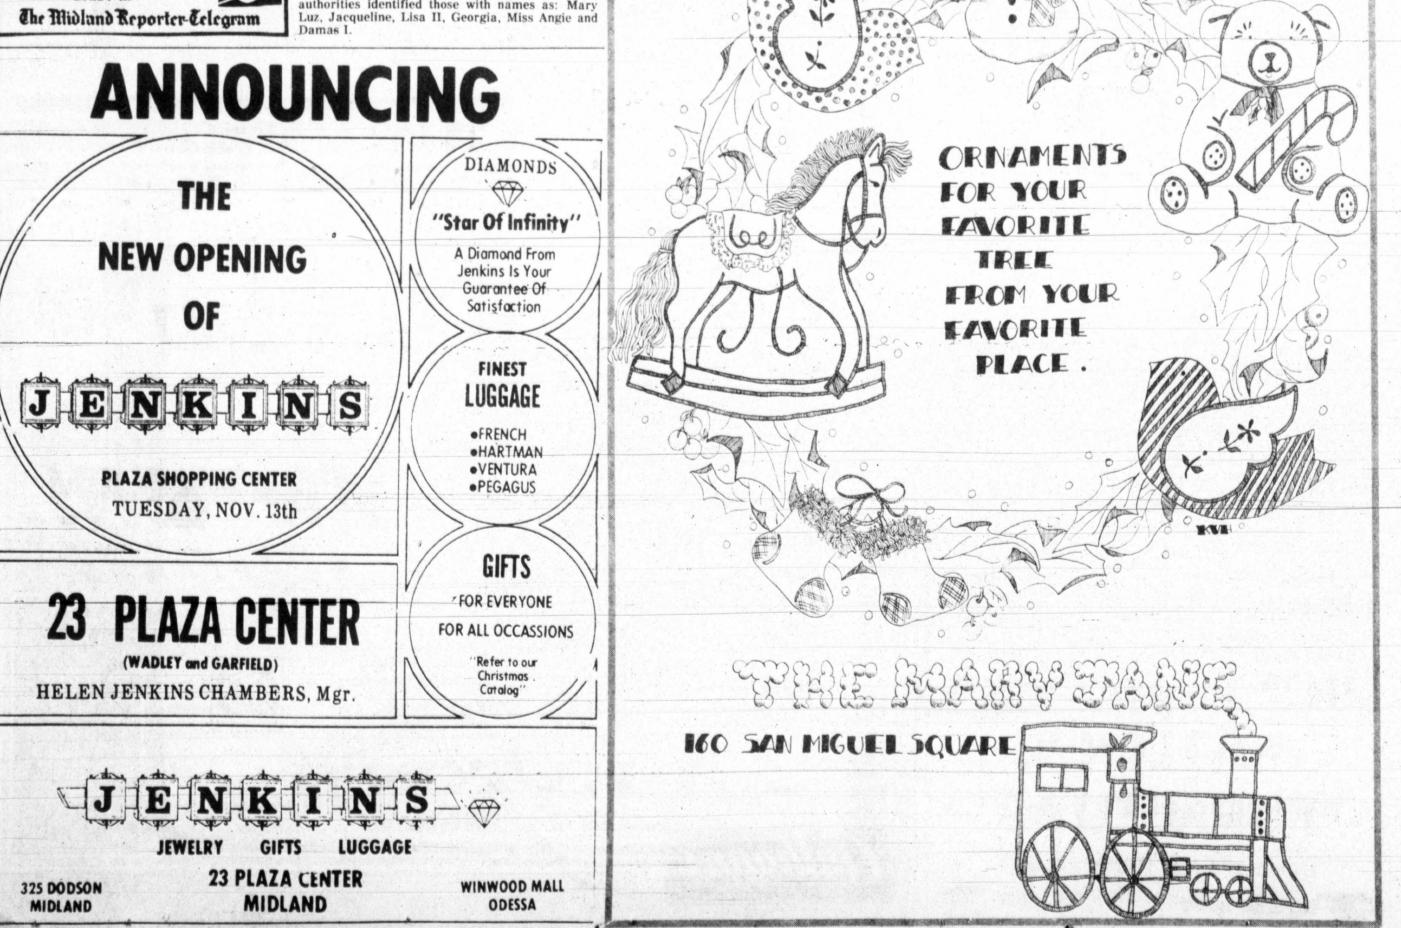

The U.S. fishing boats were escorted to two locations on New Providence Island - the defense force base at Coral Harbour and the Prince George Wharf in Nassau. However, authorities would not confirm whether all the seized boats had arrived in port by late Saturday afternoon.

The fishermen were taken to the Central Police Station, where they were held pending court appear ances Monday. U.S. officials on the island were not immediately available for comment. Five boats were seized Thursday near Dog Rock, authorities said. Between then and Friday, three more were taken into custody at Cay Sal bank and two others near the Great Bahamas bank

NOW!

Authorities displayed bags of fish and crayfish that they claimed had been taken from the U.S. boats. The seized boats were described as rusty and battered. Some reportedly had no names. However, authorities identified those with names as: Mary

# Food important in life of hotel

#### By ED TODD **Staff Writer**

James "Jim" Stahlbaum is a fellow - an epicure - who knows his "stuff" quite well and seasons it with modesty and straight talk. He's a gourmet who figures the chef's best, though richly delightful to

the taste, may be as suicidal as junk and fast foods. "I'm not a chef by any means," said Stahlbaum, who does occasional cuisine work when the cook is overrun in the kitchen. "I don't know my

sauces that well; I don't know my gravies that well." But Stahlbaum, who is general manager of the Sheraton Inn in Midland, is enough of a gourmet to know what is passable, what is just ordinary and what is par excellence.

He's Swiss schooled.

Midlander

in

Profile

"The true chef is a dietitian; he is a chemist in some respects. He is a wine connoisseur.... The true European chef is hard to come by.

Now Stahlbaun, who grew up in San Francisco and who was schooled in Switzerland in hotel management and cuisine, knows that good food and drink should delight and indulge the senses - especially the appetite.

'Your gourmet restaurants are sure suicidal," said Stahlbaum, who tends to be a moderate "health food nut" and who generally avoids the rich diet of a French epicure who lives for the sensuous taste of fine food.

"But they're delicious." That's the whole point - pleasures of the moment when the chef is

king. And Stahlbaum was reluctant to comment on whether Midland has any "cooks" worthy of the title chef. If there's one around, then that "topdrawer" chef probably is drawing \$35,000 to \$40,000 or more annually. That's what it would take to get a

chef, he said. Regardless of that, Stahlbaum does foresee a shift in food habits, and it's not toward gourmet quality.

"I see a trend from the gourmet dining room toward home-cooking," which is what his cooks specialize in. "We're not gourmet .... We try to give them a good solid cuisine" associated with West Texas.

He also sees a step-down from home-cooking.

The menus today are keyed to short(en) age, especially these fast-food places." In that respect, therein lies a kinship with the "suicidal" gourmet dining spots.

Stahlbaum grew up in San Francisco, where, despite his tendency to being overweight and his leaning toward "health food," he still misses the fine food fare afforded by the city of cuisine,

The mainstay of his work life has been in hotel management, and he gleaned finesse in management at the Ecole Hoteliere de Societe des Suisse Hoteliers (School of Hotels) in Lausanne, Switzerland, from 1948 to 1950. There, the accent was on hotel management, cuisine, service and accounts. "They grade you more on punctuality and patience - behavior and temperament -" than most anything.

There, and since, Stahlbaum learned of many things:

-"If you (as chef) wer' to work in a first-class hotel, you would have to speak four languages - Italian, German, French and English." And if you were Swiss, you would be speaking your native Romansh.

-In addition to being "hard to come by" and a dietitian, chemist and connoisseur, the true chef likely started his climb up via the kitchen sink. The aspiring chef begins his apprentice in cleaning up after the bona fide chef - washing pots and pans and the such. And then the neophyte spends a year's apprenticeship in each of soups, salads, sauces, roasting, carving.

-"A true European chef is worth his weight in gold these days.

-"Chefs are creative. They have to be imaginative. They have to be innovative.

Now, not all good chefs are French- or Swiss-schooled in cuisine

"Some of the greatest chefs I've ever worked for came out of the. railroad. You couldn't get a finer meal than off the railroad," which also brewed the best coffee. The railroad's "super chefs," as Stahlbaum calls them, were all blacks.

As a whole, the American food fare isn't gourmet by reputation or fact. But the United States has turned out distinctive dishes, such as chicken, and dumplings, which Stalhbaum contends only a black cook can prepare exquisitely.

In America, we do have chili, hush puppies, chicken-fried steak We've got Swiss steak, which certainly isn't served in Switzerland." Stahlbaum, who takes an interest in food because of his schooling, said said hotel work and show business have much in common. "I equate the hotel business with show business: You're either a success or you go down the tubes. It (hotel business) gets in your blood. "If you do get successful (as chef or manager), that's not the time to get complacent: If you do, that's the time somebody is going to shoot you down. As in most every other line of work, good help - from the chef on down - aren't nearly as easy to find as are eating places, particularly pseudo-gourmet restaurants, plain vanilla cafes, cafeterias and fast-food joints. "People eat out more than they ever did," Stahlbaum said. "It's tough to find quality help not only to prepare (food) but to serve it. "It's hard to find a real chef, (even a) pseudo chef." Stahlbaum eats out to satisfy his curiosity about gourmet eating (or the lack of it) in Midland-Odessa and to satiate the palate. And so far, he has found at least one restaurant in the Permian Basin which approaches gourmet status - The Upper Crust in Odessa. He perceives Midland as a "big little town" wherein its denizens are gourmet conscious. So, too, is Stahlbaum, though neither gourmet nor chicken-fried steak or chicken and dumplings are his steady diet. And neither is he what you would call a dyed-in-the-wool health food nut.

for the heart), fruits and vegetables, fish and fowl. He relishes a good steak, too.

"A health-food nut doesn't deviate." He does.

Stahlbaum, as an epicure, has definite opinions on what's good to the taste and what's good for you. The two aren't always twain. Says he:

- -"'I have yet to see a banquet menu that was healthy.
- -"Sugar is the worst thing for you.
- -"Bleached bread, next to sugar, is the worst thing for you.
- —"Wine settles your stomach."

And every gourmet, including Stahlbaum, needs that.

James "Jim" Stahlbaum doesn't profess to be a chef, but he does know about gourinet eating. He's a hotel manager, and the chef, pseudo chef or just plain cook can "make" a hotel's reputation. (Staff Photo by Brian Hendershot)

# Bridge Center to open today

Midland bridge players will get the opportunity today to see the Permian Basin Duplicate Bridge Club's new playing quarters, The Helon Y. Allison Bridge Center.

The bridge hall, located immediately west of the City of Midland Swim Team's Mabee Memorial Swim Center at Wadley Road and A Street, will be shown at 1:30 p.m.

Jack LaVigne, president of the duplicate club, said, "We are super proud of our new center and anxious to show it off to all Midland bridge players and to the many Midlanders whose contributions helped to make the center a reality."

All work at the center is not complete, mainly the parking lot, which is to be paved, and the entrance street off Wadley.

The grand opening of the bridge center will feature refreshments and, of course, a bridge game.

"There will be no entrance fee charged for today's play," LaVigne said. "We are inviting all of Midland's rubber bridge players as well as those who already participate in our weekly duplicate games."

The center is named for Mrs. James N. Allison, who was instrumental in starting duplicate bridge in Midland in the late 1950s. Mrs. Allison also was the first Midland bridge player to become an American Contract Bridge League Life Master.

She has served as president of the Permian Basin Duplicate Bridge Club and as president of the ACBL's Greater Permian Basin Unit 209, which has bridge clubs in 12 Permian Basin cities under its wing.

All players in the unit are invited to take part in today's grand opening game.

in today's grand opening game. Officers and directors of the Permian Basin Duplicate Club include LaVigne, president; Joe Salman, vice president; A.G. Buehler, secretary-treasurer; Mrs. J.T. Dickerson, Mrs. W.W. Roye, Mrs. Charles Dellenback, Mrs. D.E. Morris, Robert E. Myers and Joe Ranne, all directors.

Mrs. Allison is an honorary director of the club.

Today's game will be monitored by Mrs. V.V. McGrew and Mrs. R.L. Spencer, veteran Midland duplicate bridge directors.

LaVigne suggests that participants in today's game use the entrance on Dengar Street just south of the Mabee Memorial Swim Center.

TOLEDO, Ohio (AP) — The Christmas season isn't the only time to trim trees. Here the shingles and may eventually leak

By trimming tree limbs that overhang the roof year-round, a person may be able to save money by making the roof last longer, says. Owens-Corning Fiberglas Corp., a shingle manufacturer

ufacturer. Dead leaves, pine neeclogged, water backs up underpeath the shingles and may eventually leak into the home. By trimming trees and keeping gutters clear, a bomeowner can help avoid premature roof leakage.

### School trustees to hear a report on status of vocational programs

Midland school trustees will hear a report on the status of the district's vocational programs and consider revising graduation requirements for students enrolled in the coordinated vocational-academic education program at their regular meeting Tues-

The 1:30 p.m. meeting will be in the school district office, 702 N. N St.

The CVAE program is designed for those students identified as potential drop-outs. Because students have a

nior or senior years. Because of the extra CVAE courses, they have only one free elective the entire four years. with the rest of the schedule required

for graduation. Under the proposal to be recommended Tuesday, ninth grade CVAE students will be allowed to substitute CVAE for one year of the two-year science requirement.

freshman science class until the ju-

In other business, trustees are scheduled to consider implementing a computer-assisted instruction pro-

take up the issue of Agriculture-Estate zoning and the animal and fowl code when the panel meets at 1:30 p.m. Tuesday in City Hall Council Chambers.

The council suggested revising the zone and code before annexation of a section north of Midland could be considered. At the Oct. 23 meeting about 75 residents in the proposed area had packed into Council Chambers to oppose annexation.

Those residents stressed they could not retain their agriculture and farmtype property under current city zones and laws.

MidTran, a public transportation system scheduled to begin in early 1980, is asking the council to extend the contract with the city for 90 days. Seven small buses are expected to arrive soon to get the system going.

MidTran will be based upon subscription and demand-responsive. The first type is for workers who need regular transportation to and from work. The latter is for those people who need rides during the day on an occasional basis.

Two engineers will report on drainage in northwest Midland. That area is the fastest developing section of Midland and has encountered problems with flooding after a rain.

The council will consider authorizing a contract with Parkhill, Smith nd Cooper Inc. for improvements on the city's water supply and transmisand Cooper Inc. for improvements on the city's water supply and transmission system at the Paul Davis Well Field.

Expansion to that water system and a transmission line to McMillen Well Field were approved in a September bond issue.

Other items on the agenda include opening oil and gas bids for leasing minerals on city-owned property, approving a budget for operating Midland Center, discussing operation of Rape Crisis Center, reviewing the idea of increasing the warrant fee in connection with parking meter tickets, awarding a contract for labor on grading and leveling Kiwanis Park site, reviewing disposal of several small park sites and discussing the possibility of closing parts of K and Indiana streets next to the Museum of the Southwest.

### **County Commissioners to canvass** returns from amendment election

Midland County Commissioners will canvass returns from Tuesday's constitutional amendment election when they meet at 1:30 p.m. Mondav

Initial results from the election indicated that a majority of Midland County voters approved two of the proposed constitutional amendments and rejected the other.

The first proposed amendment, to change the authority of approving notaries public from the county clerks' offices to the secretary of state's office and providing for fouryear terms, passed locally 839 votes to

A second amendment, which would have given the State Legislature power to review the rulemaking policies of agencies under the executive branch, was defeated locally by a vote of 556 to 824. The third proposed amendment

won approval by a vote of 712 to 671. It would allow the State of Texas to sell general obligation bonds to guarantee loans to qualified borrowers wanting to purchase farm and ranch real esfate.

Commissioners also are expected to consider a contract for examination of the county's financial statement for the year ending Dec. 31, 1979.

In other action they will hold a public hearing on a proposed speed reduction for three county roads and meet with Sheriff Dallas Smith to discuss county jail compliance items.

# Gideon 'grows' with Midland Police Department

From patrolman to police chief, he's seen many changes

#### By MIKE SLATON **Staff Writer**

The oil patch has played its part in the lives of many Midlanders. Midland Chief of Police Wayne Gideon, a former oil field roughneck, is no exception to that pattern.

The drilling industry brought me to Midland," the chief recalled. Born and raised in Winters, the oil

patch lured Gideon west to Midland soon after high school. "I worked for a drilling company as a roughneck for a while," said Gideon. Shortly thereafter, a high school

be as good as a big man, the big man doesn't have to prove it as often." Size is not as important today, he said:

THERE WAS LITTLE or no training offered the rookie police officer in those days, Gideon recalled. "They were just sworn in and put on the streets.

In 1956, when Gideon started as a patrolman - shortly after the present Midland Public Safety Building on Texas Street was completed - there were four weeks of basic recruit school.

"We were fortunate," said Gideon.

"I don't know what it was that attracted me," Gideon said. "I suppose it was the opportunity for steady employment along with a flexiblity that allowed me to pursue an education."

"It's a gratifying job in many respects...," Gideon said of police work, "...but frustrating as well. It's gratifying to be able to be of service, to respond rapidly to people when they're in need — many times be able to save their lives."

buddy, an officer with the Midland Police Department, introduced Gi-deon to law enforcement.

"I DON'T KNOW what it was that attracted me," Gideon said. "I suppose it was the opportunity for steady employment along with a flexiblity that allowed me to pursue an educa-

Gideon took a job as a patrolman July 20, 1956. He also took advantage of the educational opportunities.

In 1971, after 15 years of piecing together credit hours and supporting a family, he graduated from Sul Ross State University in Alpine with a bachelor's degree in police administration.

His spare time was spent working his way through the various stations and jobs of police work: patrolman, dispatcher, desk sergeant, detec-

"THE FIRST BIG MOVE was from patrolman and part-time dispatcher to full-time dispatcher - which paid about \$10 more.

Five years after graduation, on

"Many other cities had no basic training at all."

Today, recruits are required to complete 320 hours of basic, fundamental training. The hours must be completed within six months of initial employment:

A few of the basic course subjects taught then are taught today.

Training in statutory laws, city ordinances, criminal procedure, defensive tactics and firearms still make up a good portion of the training curriculum, Gideon said.

ADDED OVER THE years have been such courses as police ethics, professonalism and liablity, history and philosophy of law enforcement, corrections and juvenile law.

The training is now uniform throughout the state of Texas thanks to the establishment of a set curriculum by the Texas Commission on Law Enforcement Officer Standards and Education, Gideon said. The police department today offers

financial aid to officers pursuing an education - help that did not exist when Gideon first joined the department.

department now furnishes revolvers and the ammunition as well.

THREE WINTER UNIFORMS, three summer uniforms and a jacket are provided by the department. Even flashlights, complete with batteries, are part of the package. 'Nearly everything is furnished except a pair of brown boots.'

Of the many changes that have taken place in the police department "communication has to rank at the very top," said the police chief.

The department's teletype connec-

state.

the communications system was more cumbersome and time consum-

all over the state by radio," he said.

message to Abilene PD, the message would first be sent to Midland PD, which would relay the message to Big Spring PD, which would pass it on to Sweetwater, which would finally relay the message to Abilene PD.

There was a statewide police frequency in those days, Gideon noted. Today, the Midland Police Department operates on four frequencies.

The common frequency not only aided the message relays. It allowed short-handed police departments to "cover" each other.

THE POLICE DISPATCHER in Big Spring could assist a patrolman in Midland if the Midland dispatcher was busy with another situation.

"Of course, a breakdown in any one place and the whole thing went down," Gideon said. "Today, for the most part, radio is used for communication between the base (police department) and units."

The police department has grown in size to cover an expanding Midland. "The entire department (in the late 1950s) consisted of, I believe, around 40 officers, seven cars and four or five motorcycles," he noted.

The motorcycles, used primarily for traffic work and such jobs as funeral escorts, were disposed of in the early 1960s because of the death of one policeman and

Partain)

THE OFFICERS STAY with the police department) desperately needs department longer than they did in more room.'

#### THE DEPARTMENT ALSO needs

more jail space, Gideon said. Federal regulations require expansion of the jail and, although state regulations that would require change have not been imposed yet on municipal jails, "they probably will in the future," he noted

Some improvements will be made. when Midland's Central Fire Department moves (scheduled for the first part of 1980) from the west end of the Public Safety Building to its new location on Wall Street.

The fire department kitchen facilities (on the second floor of the building along with the jail) are better than those in for the city jail in "both size and quality," said Gideon. Those facilities can be substituted for the over-

people, said Gideon. A residential washer and dryer now handle the wash load.

**CRIME TODAY HAS** also changed since the late 1950s.

PAGE 11A

"The criminal today has become more sophisticated," Gideon said: Police today must cope with a world of rapid transportation which allows stolen goods to be disposed of more quickly

Rapid transportation also means a criminal could commit a crime in New York in the morning and be in Los Angeles tonight.

Theft by computer is also a growing problem. Although the situation is not as bad in Midland as it is nationally, the problem still exists, according to Gideon. "I hate to mention some of the things (types of theft by computer) - I don't want to give anyone

Midland Chief of Police Wayne Gideon shares a common point with many Midlanders: oil. Gideon worked as a roughneck on a drilling rig before law

tions with state law enforcement computers in Austin and nationally with FBI computers in Washington D.C. today allow almost instant communications compared with the old days. Teletypes are also used for base-tobase communications between neighboring towns and cities across the

Feb. 1, 1976, he was appointed chie the Midland Police Department.

"It's a gratifying job in many respects...," Gideon said of police work, but frustrating as well. It's grati-

fying to be able to be of service, to respond rapidly to people when they're in need — many times be able to save their lives.

But it also is frustrating to "aggressively pursue a suspect and know in your own heart the person is probably guilty but have perhaps one element remain that prevents you from having a case," Gideon said.

IT IS ALSO FRUSTRATING to have a split-second decision, as policemen are sometimes called on to make, subjected to months of scrutiny by judges, lawyers and investigators, he said.

Even with those (frustrations) it (U.S. law enforcement) is the best system ever devised," the chief claims.

As might be expected, things have changed since those days when Gideon walked a beat in downtown Midland.

"It may sound bad but, in the past, police departments relied greatly on physical size and brawn" in looking or officers, Gideon said.

Thinking was along the line that even though "a small man might

Salary for officers now starts at \$998 per month, said Gideon. The pay is increased by \$120 per month if they have a full degree and by \$75 per month if they have an associate de-

The department also pays an officer \$1 per semester hour for college law enforcement courses passed with a C or above average.

AS INCENTIVE toward pursuing a well-rounded education, the department will pay an officer \$1 per semester hour for courses not in the law enforcement area but taken in conjunction with a law enforcement course.

The reason, said Gideon, is the feeling that "a better trained, better educated policeman is an asset. There is definitely a better educated policeman on the streets today."

There have been many other changes in the police department over the years. When Gideon started working for

the police department, pay was \$305 per month.

"Officers were furnished with two uniforms, a 'Sam Brown' gunbelt and a badge. You had to supply your own gun, ammunition, flashlight, batteries and whistle."

Policemen today get a little more help with their equipment. The police urday

he said any ideas,'

Crime and law enforcement will always be changing. "The types of schemes are ever-changing in a quest to be dishonest," he said.

... and we have only to look at the past to know how true this is. For example. ...ten years ago the citizens of Midland set some priorities that they felt would help Midland become a better place in which to live and work. . .

### LOOK WHAT'S HAPPENED

The new Midland Center at the corner of Main and Wall Streets will soon open. This long awaited facility will provide 22,818 sq. ft. on the first floor and 13,244 sq. ft. on the lower level to hold conventions and meetings of all types.

It will provide for a capacity of 1,200 persons for a seated banquet or 1,500 persons for a theatre style meeting.

# **Brown Berets interrupt** police symposium speech

FORT WORTH, Texas (AP) - Nine militant of deadly force" by police officers. Mexican-Americans interrupted a symposium for police and Hispanic leaders Saturday night, walking out on the keynote speaker and staging a demonstration outside.

They said they were protesting the federal government's failure to prosecute police officers in two cases involving deaths of Mexican-Americans

The protesters, members of the Dallas chapter of the Brown Berets, interrupted a speech by Assistant U.S. Attorney General Drew Days. Group leader Juan Perez said Days was responsible for "dropping cases very important to us, therefore we are not going to listen to this man.

Outside the meeting room, Perez said his group "could not, in good conscience, sit down and listen to a.man who has created problems in our community. He cut down two of the most important cases in Chicano history.

Those cases involved 12-year-old Santos Rodriguez of Dallas shot to death as he sat handcuffed in a police patrol car five years ago, and Larry Lozano, who died in January 1978 while in an Odessa jail.

The protesters claimed Dallas policeman Darrell Cain was given too light a sentence in the Rodriguez case, and said Lozano did not die of self-inflicted wounds as law enforcement agents claimed.

Days continued his speech after the protesters left, saying the Justice Department has established a "high-level task force to review the use

"This administration," he said, "is very serious about prosecuting officers who fail to uphold civil rights statutes.

After the speech, Days said he could not criticize the protesters.

"If I were outside the government, I might have acted in a similar way. It is important for these groups to keep the pressure on the government.

However, he refused to comment on his handling of the two cases that sparked the protest, saying, "Any misstatement or overstatement I might make could create problems.

The two-day symposium was designed to let Mexican-American and police leaders' discuss the use of deadly force by officers and to help police relations between Hispanics and police.

There was disagreement among other Mexican-American leaders at the meeting over the walkout.

Ruben Bonilla, president of the League of United Latin-American Citizen, said he understood

'It is part of the anger and frustration we share in our dismay at the lack of prosecution of these cases," he said. But Carlos Leal, with the American G.I. Forum, said the Brown Berets used poor tac-

### New spill evaluated

ANCHORAGE, Alaska (AP) - Aided by a break in the weather, Coast Guard specialists began on Saturday to assess damage from an oil spill in the Pribilof Islands, a rich fur seal and bird habitat in the Bering Sea.

Receding winds and tides allowed oil spill experts and accident investigators to board the Japanese factory-fishing ship Ryuyo Maru No. 2, which ran aground in the Pribilofs about 300 miles west of the Alaska coast early Friday. The vessel's fuel tanks ruptured, dumping thousands of gallons of diesel fuel into St. Paul Island's English Bay.

**Hokkaido** Fisheries Ltd., which owns the vessel, had another ship on its way to pick up the 81 crew members, rescued by the Coast Guard.

Angelo says Reagan will

announce soon

**Midland Mayor Ernest** Angelo Jr., state chairman for Texas Reagan for President campaign, this week announced former Gov. Ronald Reagan will announce his candidacy for president in a televised speech at 9:55 p.m. Tuesday.

A 30-minute speech will precede the announcement given by Gov. Reagan to emphasize his positions on the issues facing our nation today," Angelo said. "The five-minute announcement will be rebroadcast at 1:25 p.m. Wednesday. Reagan's speech will

be aired locally on KMOM, channel 9, at 6: 30 p.m. Wednesday.

**DNC** ends

"We want leadership that inspires the people,

Democratic challengers

have launched their campaigns, and on at

least one issue they sound very much alike. "Presidential leadership often seems more

the exception than the rule," said California Gov. Edmund G. Brown

Jr. on Thursday when he announced his candidacy

for the 1980 Democratic presidential nomination.

not leadership that abdicates its responsibility, is a persistent theme of the campaign of Sen. Edward M. Kennedy, who entered the race on

Vednesday. The Brown and Kennedy campaigns have another similarity - a sense that the candidates are probing, looking for the right issue, the right rhythm, to give their challenges momentum. They both emphasize

the nation's economic problems, the energy crunch and health care. But the solutions both offer at this early stage of their presidential quests are vague.

The clearest contrast on an issue probably is on nuclear power, with Brown strongly opposed and advocating phasing out existing plants, and Kennedy calling for a moratorium on licensing while safety questions are resolved. Kennedy opposes shutting down operating plants.

Brown's rhetoric has an abstract quality while Kennedy addresses issues in more tradition al political terms.

Brown defines the principles of his campaign as "protect the earth, serve the people and explore the universe." His other consistent theme, voiced in every speech, is "we must shift from a principle of quantity to a principle of quality.'

Kennedy's speeches hit hard at the leadership issue. He never fails to refer to President Carter's speech in July

# two-day meeting

SAN ANTONIO, Texas (AP) — Amid some political sparring, the Democratic National Committee ended its two-day meeting after pledging support for SALT II and the Equal Rights Amendment and adopting officers for its national convention next August.

"This was the first full fledged political event since the announcements," Democratic National Chairman John White said.

"We started the 1980 campaign today (Friday). The DNC is taking an interest in politics and that's what it is all about," he said.

About 200 of the Committee's 363 members met Thursday and Friday. Party affairs took a back seat to presidential politics most of the time.

Big photographs of President Carter and Vice President Walter Mondale hung at the front of the meeting hall.

Inside, a number of delegates wore Kennedy buttons. Several Carter delegates sported big red buttons that read: "Don't rock the boat. Kennedy in '84.'

On Friday representatives of Carter, Massachusetts Sen. Edward M. Kennedy and California Gov. Edmund G. Brown Jr. spoke.

Chicago Mayor Jane Byrne, who supports Kennedy, joked, "It's nice to be here on this impartial podium, with Jimmy and Walter peeking over my shoulder."

Criticizing Carter's record as president, she said, "Instead of cool confidence, leadership and assurances, which the American people desperately need and want, we are presented with the spectacle of a man groping, haltingly, for solutions.

"Jimmy Carter can't win in 1980.... The public is ready to reach out again to a Kennedy."

# Money woes force 'Frogie 1' to abandon airport crusade

BURLINGAME, Calif. (AP) - For awhile Mitch Egan, alias "Frogie 1," was king of the lily pad. But now his campaign to rid the nation's airports of religious panhandlers appears to be sunk

PAGE 14A

Egan gained attention earlier this year by stationing himself in various airports dressed in a frog suit and handing out free tin clickers shaped like frogs. Wherever the web-footed Egan and his clickers appeared, the panhandlers fled, sometimes for

weeks, even months

"They haven't been back to San Francisco airport since we started in July. We blew them right out of their socks," said Egan.

But now Egan has packed away his shaggy green frog suit. He says he is \$8,000 in debt and has no job. Egan got fed up with people asking travelers for contributions when one

group approached his mother. He formed the "Fellowship to Resist Organized Groups Involved in Exploita-

tion (Frogie)." It was an instant hit. Within weeks, Egan, 36, quit his job as a restaurant consultant, handed out thousands of toy clickers purchased with his own money and hit the airport circuit.

"Los Angeles was calling, San Diego, Seattle, Denver, Chicago, Dallas and San Francisco," said Egan.

He was clapped on the back by airport officials, applauded by harassed airline and airport crews, courted by television hosts and accorded the status of "Frogie 1." Sports star O.J. Simpson took a clicker from him and so did actor Karl Malden.

He asked for nothing. How could he? He was the man who said he warded off beggars.

But all the while, spending his own money, selling his cherished van and sometimes eating meals with friends, Egan kept up his airport campaign. 'The clickers were 7 cents when I

started buying them in July," said

Egan. "I gave away 125,000. They were up to 12 cents in August." He figures he received about \$1,500 in unsolicited donations, but wound up spending it all on stamps and envelopes to answer his fan mail.

'When a 64-year-old man writes and says he has never donated anything before but says he thinks your're just great and here's \$3, what can you do?" Egan said. "If people take the time to write to you, you should write back.

So last week, dejected and nearly broke, Egan made his last campaign with a trip to Cleveland, a visit that set him back about \$900. Now his mother calls from New York.

What does she say? "What do all mothers say? She says, 'Mitch, you should start eating right. And you should get more sleep. I guess mothers always think we're 5 years old."

chicken's necks, Goodpaster said Other cadets forced their male platoon leader to strip, tying his hands and feet together, rubbing black camouflage coloring on his legs and

on his genitals. The mock-Klan episode involved white cadets and was witnessed by a black cadet, who laughed, Goodpaster said. The superintendent said he did not believe the incident had "racial overtones."

"The cadets indicated they wore sheets because it was humorous and was most available," he said.

The cadet who resigned was harassed by fellow-cadets after he reported to academy officials that another male cadet had remarked that he would not follow a woman into battle but would "shoot her in the back first," officials said

About 20 cadets were involved in the hazing and will be disciplined with demerits or demotion, Goodpaster said.

Cadets interviewed at the academy Friday said learning to kill chickens was taught as a survival technique.

"It's not hazing, and they asked for volunteers. Nobody is forced to do it," said one cadet, who asked that his name not be used.

"It's true that when they asked for volunteers, most everybody calls out a girl's name, another cadet added.

Several of the cadets interviewed said the bedsheet incident was not intended to represent the Ku Klux Klan, but they likened it to a "toga party" or other pranks.

Goodpaster had instituted a series of reforms in 1976 following a cheating scandal that forced the resignation of 152 cadets

Of 4,200 cadets at West Point, 326 are women and 62 women were scheduled to become the academy's first female graduates next year.

ODESSA -- "Safety Expo '79," a safety seminar on accident prevention in industry, schools, municipalities and in agri-business, will be held Tuesday in the Holiday Inn's Holidome off Texas Highway 80 East here.

The seminar; jointly sponsored by the Texas Safety Association of Austin and the Permian Basin chapter of the American Society of Safety Engineers, begins at 7:30 a.m. and runs through 4:15 p.m.

Topics and speakers will include "The Confined Space Standard," representative of the U.S. Occupational Safety and Health Review Commission, Dallas; "Hygiene Made Easy," Richard DeLuca, industrial hygienist, Shell Oil Co., San Romon, Calif.; 'The How Tos of Respiratory Protection," Dick Flynn, manager of Respiratory Protection Division, American Optical Co., Southbridge, Mass.; "A Loss Control Program As Seen By An Oil Well Service Company," Roland W. Guy, safety manager, Halliburton, Duncan, Okla.; "The APIs Recom-mended Practices for Safety for Oil and Gas Well Drilling and Service Operations," William Snead, safety representative, Pool Co., Willington, N.D.; "The Oil Patch Security Problem," Al Mitchell, security manager, Tom Brown Drilling Co., Midland.

Fee for the seminar is \$25 per participant.

#### Theft case to grand jury

STANTON - The Martin County Grand Jury, meeting Nov. 21, is to weigh evidence submitted by the Sheriff Dan Saunders in the two-month investigation of theft of more than \$1,000 in cash and checks from the Martin County Tax Assessor-Collector's office

"The investigation into the theft...has been conducted in a thorough and professional manner with the full cooperation of the personnel in the tax office," Saunders said in a prepared statement.

Saunders said the case has been turned over to District Attorney Rick Hamby of the 118th State District Court. Donnie Kennedy, county tax assessor-collector, said \$1,029.83 in cash and checks were taken from the office in August and September. Both Sheriff Saunders and Texas Ranger Charlie Hodges of Midland investigated the case.

#### Brown to be Crane speaker

CRANE - Reagan V. Brown, commissioner of the Texas Department of Agriculture, will be featured speaker at the annual Crane County Chamber of Commerce banquet at 7:30 p.m. Monday in the public school cafeteria.

Fred Wilkinson, Crane County agriculural extension agent, will be master of ceremonies at the fete in which E.L. Tipton will be installed as president. Others to be installed are chamber board members Nancy Crider, Johnny Ainsworth, Buren Hale, Monty Trimble and Jack Waggoner.

Brown, known as "Mr. Community Improvement," spent his boyhood days on the farm in East Texas, worked his way through Texas A&M University, and began his tenure with the Texas Agricultural Extension Service in 1948. Brown, who is hailed as writer, poet and county agent, has been commissioner of agriculture since the mid-1970s, when he was appointed by then-Gov. Dolph Briscoe.

# Text's passage on homosexuality ordered deleted

AUSTIN, Texas (AP) — The State Board of Education told a textbook publisher Saturday to delete a health book passage that says homosexuality is not a mental disorder.

The board told McGraw-Hill Publishers that its "Health. and Safety for You" textbook will be adopted for use in Texas schools only if the sentence is removed. The action came as the board approved books for use in

six courses of study. Board member Mary Ann Leveridge of East Bernard

said the passage suggested for removal said: "Some now believe that homosexuality is not a mental disorder but is another, less common kind of sexuality.'

After the meeting, Mrs. Leveridge said the board did not disagree with the statement in the book, but "We didn't feel like we had sufficient evidence to say one way or another (about homosexuality).

The board also asked for revisions in several civil government books. Most of the changes involved adding specific references to Texas government. Prentice-Hall was asked to put a photograph of the Texas House of Representatives in place of a photo of the Virginia House

Approved was a typewriting text that one critic did not like because it contained the exercise sentence "Human life and turnips remain cheap and plentiful."

of Delegates. The board also asked for a list of Texas state agencies instead of New Jersey state agencies in one of the textbooks.

Mrs. Leveridge said Texas is the "largest adopter" of textbooks in the nation and is entitled to specific references to the state in books.

The board asked Scholastic Magazines, Inc., to use the

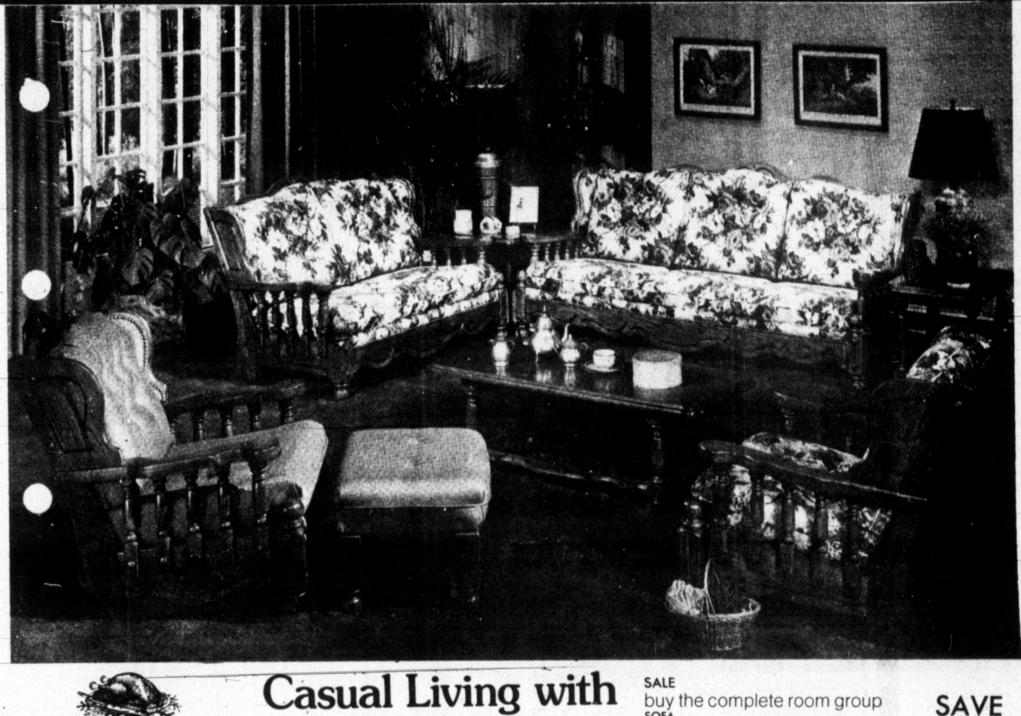

term "members of congress" instead of "congresspersons.

Five books were selected in each course of study. Local districts will select which volume to use. Mrs. Leveridge said the books include a wide range of reading levels.

One book not chosen was Magruder's American Government. The book was a standard for government courses in Texas since the 1920s and was used in many districts. Mrs. Leveridge said the committee felt the book is a "collegelevel text.'

The books will cost the state \$6.8 million. In addition to the government and health education books the board approved texts for computer mathematics, automotive trades, and two typewriting courses.

The approved list included a typewriting text for junior high school students that one critic did not like because it contained the exercise sentence "Human life and turnips remain cheap and plentiful." The board approved it without comment.

#### Whalen Lake reopened

ANDREWS - The controversial Whalen Lake, which is virtually dry after having been shut down by the Texas Railroad Commission (RRC) a year ago, has been reopened by the RRC following a lake clean-up.

The playa lake was closed to the dumping of oil-field brine due to charges by a U.S. Department of the Interior agent and conservationists that oil and sludge being dumped with the brine in the lake were killing migratory water fowl.

The Oct. 23, 1978, shutdown led to an estimated production loss of 200,000 barrels of oil per month.

At the time of its closure, Whalen was considered a natural refuge for waterfowl, and the charges of the death of birds caused the RRC to order the lake closed and cleaned up. Last March, the U.S. Environmental Protection Agency declared Whalen was a navigable stream under law and thus used its jurisdiction to question the purity of brine dumped into the lake.

With the renewed dumping of brine into the lake comes more efficient means of separating oil and other waste from the brine before the salt water is dumped in the lake.

#### **TESCO** exec Lamesa speaker

LAMESA – W.G. "Bill" Marquardt of Fort Worth, president of Texas Electric Service Co., will be featured speaker at the annual Dawson County Chamber of Commerce banquet at 7:30 p.m. Tuesday in the Lamesa High School Cafeteria. Dewayne Lee will be installed as chamber presi-

DEATHS

Dr. Homer B. Johnson

Homer Johnson

Dr. Homer B. Johnson, a practicing physician in Midland for 40 years, died early Saturday in a Lubbock hospital after an illness of three weeks. He resided at 401 W. Broadway St.

Services will be at 2 p.m. Monday in the Episcopal Church of the Holy Trinity with Rector Sam Hulsey officiating. Burial will follow in Fairview Cemetery, under direction of Newnie W. Ellis Funeral Home.

Dr. Johnson would have been 73 years of age today, having been born Nov. 11, 1906, at Loraine, where he was reared and graduated from high school.

He was a 1928 graduate of McMurry College in Abilene and then attended **Baylor University Medical School at** Dallas, graduating in 1932. He served his internship at Hermann Hospital at Houston. Following his internship, he began his practice of medicine at Roscoe. He later moved to Crane, practicing there until he moved to Midland in 1939 to launch his practice here. He was a co-founder and owner of the former Western Clinic Hospital. which was operated here until 1952. Western Hospital was for a time the only hospital in operation here.

Dr. Johnson was married to Madge McCauley of Abilene in 1934. She died here in 1976.

Dr. Johnson was the first Midland doctor to enter the Army Air Corps in World War II.

He was a member of the Episcopal Church of the Holy Trinity, Texas Medical Association, American Acad-

Dr. Johnson was a member of the staff at Midland Memorial Hospital and at one time served as its chief of staff. He was lifetime member of the Texas Lions League for Crippled Children and was a member of the Century Club of the West Texas Rehabilitation Center in Abilene.

Survivors include a son, Jerry Ray Johnson of Donna; two daughters, Mrs. Peggy David of Abilene and Mrs. Cynthia Williams of Ft. Riley, Kan.; two brothers; Dr. Bruce Johnson of Loraine and Dr. Dale Johnson of Abilene; and five grandchildren.

The family requests that memorials be directed to the Midland Diagnostic Cancer Clinic or the Allison **Cancer Treatment Center at Midland** Memorial Hospital.

### Avis R. Smith

ABILENE - Services for Avis R. Smith, 66, sister of Bobby Gann of Midland, will be at 10 a.m. Monday in Cedar Hill Cemetery directed by Elliot-Hamil Funeral Home.

Bill Lutrell of Hillcrest Church of Christ will officiate. Mrs. Smith died Friday afternoon

in a local nursing home.

She was born Dec. 6, 1912, in Paint Rock. She moved to Abilene from Kermit in 1959. She was a retired waitress. She was a member of the Church of Christ.

Other survivors include a son, four brothers, two sisters, two grandchildren and three great-grandchildren.

### Jurden C. Smith

HAMLIN - Services for Jurden Clyde Smith, 59, of Sweetwater, brother of David Leon Smith of Big Spring, were held Saturday in Foster Funeral Home chapel here with the Rev. Daniel Oden, pastor of Assembly of Light House Church in Sweetwater, officiating.

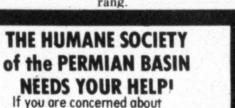

Burial was in Hamlin Memorial Cemetery directed by Foster Funeral Home

Smith was born June 8, 1920, in Royston. He was a farmer and a veteran of World War II.

Other survivors include a daughter, three brothers, 13 nephews and 10 nieces.

Mrs. de Gaulle

LONDON (AP)

toward a massive food shortage that will increase America's role as the world's breadbasket but possibly result in 'economic disaster'' within the next 20 years, a United Nations report says.

Some 400 million people suffer from serious malnutrition, and "even if we make the most enormous efforts to increase food and agricultural production," some 250 million still will be starving by the year 2000, Edouard Saouma, director-general of the U.N. Food and Agriculture Organization, says in a report prepared for the FAO conference that begins here Monday.

The FAO defines malnutrition as failure to receive adequate calories to "carry out normal functions in daily lives. The report predicts poor countries will become increasingly dependent on rich ones particularly the United States. American farmers already provide 57 percent of world grain exports, it notes.

Developing countries are finding it harder to pay for food because they must spend more for oil, the report adds.

"Even with three times today's level of food aid, the cost of such imports would portend economic disaster" by the end of the century, it savs.

Grain imports by developing countries have risen sharply in the past four years, it says. They could reach 80 million tons this year, compared to 51 million tons in 1975

The FAO says poor countries must start to cultivate 500 million acres of land currently under-used or not farmed at all, and increase yields with more irrigation and fertilizers. This will be very expensive, it says, and rich countries should more than double their annual aid from the less than \$5 billion now to \$13 billion by the end of the 1980's

# Cotton picking time evokes sense of plenty

ROBINSONVILLE, Miss. (AP) - Hallelujah, brother. It is cotton picking time in Dixie. In the Deep South

and it is nowhere deeper than the Mississippi Delta - where abundance has been denied to so many for so long, there is nothing like the cotton harvest to evoke at least a sense of plen-

The fields of the Delta, flat as water, are covered with froth all the way to the horizon, all the way to the levee.

Cotton everywhere. Wagons heaped with cotton queue up at the gin like strings of giant pearls. Trucks on the highway groan under bales piled high. Tufts of blown cotton decorate the roadside and the naked branches of trees. Cotton to spare.

"You are standing on the Bowdre Farm of P.N. Owen," said Dick Taylor, a stoutish man, a blond. In his youth, in the Southern manner regarding blonds, his uncles likely called him cotton top.

"All the land you can see in every direction belongs to P.N. Owen. I manage this farm for him. It is 2,400 acres and I expect to have it picked in 24 days.

In the field before him, six mechanical pickers

### Farmer gets convicted

PRESTON, Minn. (AP) - A Preston farmer awaits sentencing after being convicted of holding a man in chains and forcing him to work on his farm.

A Fillmore County District Court jury on Friday found Richard Meeks, 43, guilty on two charges of kidnapping.

He was accused of forcing Donald Schott,

havested here this year. Farmers are averaging a bale to the acre,

though some irrigated land is producing up to two bales to the acre.

cotton patches this season, according to Big Spring banker James Lee,

MEMPHIS, Tenn. - Cotton producers Wilbert Braden of Midkiff and Lloyd Cline and Jerry Harris, both of Lamesa, are among the 42 Texans named as delegates to the National Cotton Council for 1980, according to Reed Lang, a Rio Hondo farmer who is NCC president.

The council, formed in 1939, is made up of 288 delegates who represent various segments of the cotton industry in the 14 major cotton-producing states. Council programs focus on legislative and regulatory matters affecting the industry. The council's overseas arm, the Cotton Council International, works to develop foreign markets for U.S. cotton.

### Hoelscher in farm seminar

COLLEGE STATION -- Clifford Hoelscher, executive director of the St. Lawrence Cotton Growers Association, was among the key agricultural leaders who participated in a recent seminar on characteristics of U.S. farms. The seminar was held at Texas A&M University.

### Farm-City Week Nov. 16-22

COLLEGE STATION - Farm-City Week Nov. 16-22 is dedicated to bringing about a better understanding between rural and urban residents, says an economist with the Texas Agricultural Extension Services.

Agriculture is "big business" in Texas, and farmers and ranchers pay almost \$9 billion annual in production expenses to earn a net income of slightly more than \$1 billion, which averages out to approximately \$5,500 per family. The total agri-business sector will add more than \$32 billion to the state's economy.

### Foreign landowners must report

Foreign owners of more than 5 percent interest in U.S. agricultural land are required to report their holdings to the U.S. Department of Agriculture within 90 days of the acquisition date, according to Minter McReynolds, the Midland County executive director for the U.S. Agricultural Stabilization and Conservation Service office.

Alien owners filing late will be required to explain in a letter why their report was not timely filed.

Those needing to file may contact the ASCS office, Room 121, George Mahon Federal Building, Midland, telephone 684-6781.

two rows. Go through the whole field, pick half the tires have already none.

### U.S. expects large cotton crop

WASHINGTON, D.C. - Cotton production was estimated at 14.5 million bales, up 34 percent from the 1978 harvest of less than 10.9 million bales, according to the U.S. Department of Agriculture.

The forecast in September was 14.4 million bales.

and Sunday)

Looking at crop production as a whole, the USDA put its "all-crop" index at a record 43 percent higher than the 1967 benchmark of 100, 12 points above last year. The larger cotton and oilseed crops, along with the increases for feed and food grains are responsible, the board said. A year ago this month, USDA forecast the 1978 corn harvest at 6.89 billion bushels. The final production was 7.08 billion bushels.

The USDA said world grain production now is seen at slightly more. than 1.5 billion metric tons, a drop of 4.2 percent from last year's record but up by 5.2 million from prospects a month ago. Even so, global output in 1979-80 is expected to be the second largest ever.

21, into his car Aug. 9 and holding him at the Meeks farm for three days and two nights.

Schott and other witnesses testified that he was forced to shovel manure and do other chores while in chains. He said he spent two nights chained to a post in a grain bin.

His sons, Donald, 19. and Darrell, 20, pleaded guilty last month to falsely imprisoning Schott and also await sentencing. Kidnapping charges against the brothers were dropped.

## Despite relatives' plea for restraint

As fearful relatives of American hostages in Iran echoed President Carter's plea for restraint Saturday, scores of frustrated Americans marched and chanted in more protests on the seventh day militant Iranians occupied the U.S. Embassy in Tehran.

In the face of continuing protests around the nation, President Carter ordered the Justice Department Saturday to deport Iranian students not in compliance with their entry visas in an apparent attempt to deter further violence.

Tehran), but we do support extradition of the shah. He should be brought to trial."

After clashes between Americans and Iranians from opulent Beverly Hills to the nation's capital, relatives of some of the American hostages in Tehran issued pleas for restraint on Saturday

"We are urging Americans not to demonstrate, to realize that their protests are endangering the life of our father and the other hostages," said Allyssa and Katie Keough, daughters of educator William F. Keough Jr.,

In Pueblo, Colo., Theresa Gallegos, the mother of one hostage, said she feared the U.S. backlash could endanger her son's life and said of the protesters: "Why don't they ask us? He's our son." Billy Gallegos, 22, was among the Marine guards assigned to

Friday that "The President expects every American to refrain from any action that might increase the danger to the American hostages in Tehran.

Saturday with empty holds at Port Newark, N.J., as longshoremen continued to protest by refusing to work on the ship until the U.S. hostages were released.

the Cat's Meow escort service said Saturday they would refuse dates with Iranian customers. "We may lose money on the deal, but we feel this country has been kicked around long enough," said their boss, Mort Karman

During marches Friday in Houston, Los Angeles, Cape Cod, Mass., Seattle and Philadelphia, protesters carried signs with messages such as "Punch Persian Punks," "Death to Khomeini," "Deport Iranian Students" and "Nuke Iran."

Texas Gov. Bill Clements urged Iranians to stay "out of sight and out of mind," until the hostages were freed. Four Iranian students were arrested Friday - along with a Sudanese student who was released Saturday — on charges of attempting to kidnap Minnesota Gov. Al Quie.

In Los Angeles, 130 Iranians and 15 Americans were arrested Friday when a march turned into a melee between the two groups. A rowdy throng of University of Colorado students hung an effigy of Iranian leader Ayatollah Khomeini and burned an Iranian flag. Thousands of Washington, D.C., residents taunted and lobbed eggs at about 900 Iranian marchers Friday.

# Weather slightly dims

Police reported small groups of Iranian students jostled briefly with

## Newspaper says Sadat invited shah of Iran to come to Egypt

CAIRO, Egypt (AP) - A Cairo newspaper said Saturday the ousted shah of Iran has received an invitation from President Anwar Sadat to come to Egypt, but a spokeswoman for the shah in New York said there are no plans for such a trip.

Shah Mohammad Reza Pahlavi is being treated for cancer in a New York City hospital and President Carter has refused Iran's demands that he be extradited to stand trial for his life.

Chris Godek, a spokeswoman for the exiled monarch, said reports of the shah going to Egypt were "false. There's no basis for that information. There are no plans at this point. The shah is concerned with getting back to health, and that's all."

The Cairo newspaper Al Ahram said Egypt's ambassador to the United States, Ashraf Ghorbal, visited the former monarch for half an hour Saturday to convey Sadat's message.

# **DR. NEIL SOLOMON** Diet can overcome benign breast woes

Dear Dr. Solomon: While doing a self-examination some months ago, I found a lump in one of my breasts; fortunately, it turned out to be benign. However, it is very tender. I certainly want to avoid surgery, but I was wondering whether anything could be done to relieve the pain. - Mrs. D.F.

Dear Mrs. F.: Benign breast disease accompanied by pain and tenderness is not uncommon in women, particularly those of pre-menopause age. The treatment of choice for the condition used to be subcutaneous mastectomy. This means that all the breast tissue, except for the skin and nipple, was removed, and the breast rebuilt with a silicone implant. However, the result of the surgery was not always cosmetically satisfactory, and in many cases the pain and tenderness continued to persist.

Today, a much simpler solution to the problem appears to have been found, one that is without the risk that always accompanies surgery. That solution is complete abstinence from coffee, tea, cola and chocolate.

This new approach was recommended by Dr. John Peter Minton, an Ohio cancer surgeon and professor of surgery at the Ohio State University College of Medicine. He suggested that xanthines, chemicals found in these beverages and in chocolate, were responsible for the lumps and the resulting discomfort. And many women who have followed his advice and eliminated these items from their diets attest to the validity of Dr. Minton's approach.

The abstinence from coffee, tea, cola and chocolate must be complete and forever, Dr. Minton says. He explains that the bodies of eome women simply cannot cope with xanthines. Their reaction to the chemicals constitutes a simple biological problem which, fortunately, is reversible. In these women the xanthines accelerate cell proliferation. eventually resulting in breast disease with the accompanying symptoms.

During a three-year period, Dr. Monton studied 47 women, with an average age of 35, who had breast nodules that were shown by mammography to be benign. The women were accustomed to ingesting a daily average of 190 milligrams of xanthines, the equivalent of about four cups of coffee

Twenty of those patients completely stopped using coffee, tea, cola and chocolate. Of these, 13 (65 percent) showed a complete disappearance of all breast nodules and the painful symptoms within two to six months. This was confirmed by physical examination, mammography and echogram

Of the 27 who did not eliminate the xanthine-containing items from their diets, only one (4 percent) showed nodule regression. A more recent study of 200 women with benign breast disease showed similar results. In general, women over 45 years of age did not begin to show improvement as rapidly as younger patients.

In addition to eliminating the painful symptoms, there are other good reasons for seeking resolution of fibrocyatic disease. It appears that women with benign breast disease have a greatly increased risk of cancer. And unlike surgery or drug therapy, the elimination of xanthines from

# Mistake found in San Francisco's Chinese ballots

SAN FRANCISCO (AP) - Contempt of court charges will be filed against the registrar of voters because of a mistake on the Chinese version of the city ballot in last Tuesday's election, a U.S. attorney says. The explanation of Proposition Q,

which would have abolished the vice squad, was dropped from the Chinese language ballot and the description of Proposition R, the rent control initiative, was printed twice, U.S. Attorney William Hunter said Friday.

Ask about

Hunter said his office might consider dropping the charges against Registrar Thomas Kearney if a solution could be found before the Dec. -11 runoff election between Mayor Dianne Feinstein and Supervisor Quentin Kopp.

"It pretty much depends on their tone and attitude," said Hunter, who said he expected to meet with city officials later.

Last year, Hunter won a court injunction barring the city from violating the voting rights of non-English speaking citizens after receiving complaints that they did not get the assistance at the polls required by federal law.

Hunter said accounts of the ballot mistake convinced him that the city violated that injunction again Tuesday.

Thomas Kearney, who has dismissed the multi-language explanations of ballot measures as makework for his office, said Friday, "There's nothing I can do about it, the election is over.

Kearney said the description of Proposition Q "got lost" and the printer, who didn't read Chinese, put in the same explanation for the two measures.

"A lot of people were in on this but the blame rests with me," he said. Proposition Q lost by 40,000 votes and Proposition R, by 35,000.

'This was the first full fledged political political event since the announcements," Democratic National Chairman John White said Friday. "We started the 1980 campaign today. The DNC is taking an interest in politics and that's what it is all about.

of party business.

WHITE, an avowed supporter of President Jimmy Carter, was the object of some discord from backers of Sen. Edward Kennedy because of his impartiality, particularly from Chicago Mayor Jane Byrne.

"Actually, I thought it went very smoothly,' White said with a grin. "It was the most harmonious meeting since I have been chairman."

Party affairs took a back seat to presidential politics most of the twoday session, particularly Friday when the three representatives of Carter, Kennedy and California Gov. Edmund G. Brown Jr. spoke.

Big photographs of Carter and Vice President Walter Mondale hung at the front of the meeting hall, but a number of the delegates wore Kennedy buttons. Several Carter delegates had big red buttons that read: "Don't rock the boat. Kennedy in '84."

"IT'S NICE to be here on this impartial podium," Mayor Byrne said caustically, "with Jimmy and Walter peeking over my shoulder.' She spoke mostly of Carter's record as presi-

## Students enjoy rats

TAMARAC, Fla. (AP) - Fluffy and Champ get a complete school lunch every day - things like string beans, hot dogs and fruit. But they just nibble at the food. The beady-eyed rats

have been the center of attention at Tamarac **Elementary School since** their arrival four weeks ago as assistants in a fifth-grade nutrition project. The two are fed the regular school menu, but Fluffy gets milk while Champ laps up soft drinks.

After four weeks of the unbalanced diet, Champ weighs less than Fluffy and has dim eyes and blotchy fur. Fluffy, meanwhile, is robust and shiny looking.

Science teacher Pete Davis says the students are enthusiastic about handling, feeding, cleaning and measuring the live animals.

"I like class now," 10year-old Vaughn Hernandez says. "Last week I was the rat specialist.

- Deformed son results in lawsuit

ORLANDO, Fla. (AP) - Two Melbourne, Fla., chiropractors are being sued for damages on charges that X-rays taken of a pregnant woman's back caused her child to be born without eyes and nasal passages.

A suit filed in U.S. District Court by Conrad M. and Gwendolyn C. Romeril of Indianapolis, Ind., claims the chiropractors, Cullen Winter Bradley and Lyle R. Fleming, knew that Mrs. Romeril was in the first trimester of pregnancy when she was X-rayed twice for back pains. The couple wants a six-member jury to order the doctors to pay their son's medical expenses and compensate him for physical and emotional pain and the inability to work in the future. The Romerils, who had

moved to Melbourne in late 1976, said Mrs. Romeril, 39, went to Fleming's office for treatment of a back pain which had spread down her right leg and caused her knee to buckle. She said in court papers she told Fleming she was pregnant. Court records say about 15 doctors specializing in birth defects and the effects of radiation on fetuses are expected to testify.

The child, Billy Gene. 2, will "be more an exhibit than a witness," said the Romerils' attorney, Edward B. Greene of Miami

He said the boy is. slightly retarded, does not walk or talk, cannot feed himself properly and requires special therapy for his blindness.

He has undergone surgery to create nasal passages, but may have to undergo further operations, Greene said.

# **Brown favors prevention** as medical program

BOSTON (AP) - The federal government should give tax credits to people who don't abuse their bodies rather than pour billions of dollars into a costly "medical arms race," California Gov. Edmund Brown Jr. said Saturday.

The 41-year-old Democratic presidential candidate outlined his national health care platform at the American Holistic Medical Association Conference at Harvard University here.

Brown sharply criticized current health care programs, but his alternatives were general in nature and he did not say how much the federal government should invest in this area.

"The health care budget has to focus a much greater percentage on education and prevention," Brown said.

'We have been almost wholly occupied with how to fund the existing medical perspective. Instead, wellness incentives have to be developed. Some insurance companies give discounts for non-smokers. Perhaps we should give tax credits for people who don't smoke, who don't abuse their bodies." he said.

Brown said big government squanders billions of dollars on medicine. and needlessly restricts alternative health care programs:

"The way we deal with a problem in government is to throw money at it. We offer a quantitative solution ... to try to solve a qualitative problem. It won't work, the basic assumptions are flawed," he said.

"I would like to shift more of this spending from primary care (the treatment of the ill) to preventive care. The money has to follow a new direction. A few hundred million in health education is worth billions in health care," he said.

# Kennedys visit college campuses

HARTFORD, Conn. (AP) - Sen. Edward M. Kennedy played father to his two college-age children Saturday, visiting their schools for a chat with college officials and a brief look at dormitory life.

Accompanied by his wife, Joan, herself a student, Kennedy visited Wesleyan University in nearby Middletown, Conn., where 18-year-old Edward Jr. enrolled as a freshman this fall.

The Kennedys met privately with college President Colin Campbell and some of Teddy Jr.'s college professors.

Then they took a brief walking tour of the campus, listening while their son pointed out the landmarks and chatted-about the afternoon football game:

Like many middle-aged fathers, Kennedy put on his reading glasses when his son showed him one of his college textbooks.

Unlike other fathers, Kennedy was greeted on his trip by well-wishers

and trailed by the usual contingent of aides, Secret Service agents and reporters that a presidential campaign attracts.

The second college campus stop was at Trinity in Hartford, where 20-year-old Kara Ann is a sophomore.

It was Mrs. Kennedy's first public appearance with her husband since he announced his presidential candidacy on Wednesday in Boston. Mrs. Kennedy, who lives apart from her husband, did not respond when reporters asked her whether she would accompany her husband on a campaign trip planned this week for lowa.

Kennedy spokesman Tom Southwick said neither Edwards Jr. nor Kara had immediate plans to leave school to campaign for their father. The third Kennedy child, Patrick, was with the family on the trip to Connecticut.

Kennedy was mixing politics with family business in his brief one-day

trip to Connecticut. His schedule included a lunch with state political figures.

Also in attendance was Massachusetts Lt. Gov. Thomas P. O'Neill, who is the son of the speaker of the U.S. House. The younger O'Neill endorsed Kennedy's presidential bid earlier tages at the U.S. Embassy in Iran.

SECTION C

Benny Goodman, famed clarinetist, right, receives a special double album set from Bob Wilber, clarinetist-saxophonist, who led the Phontastic All-Stars in a recorded tribute to Goodman on the occasion of his recent 70th birthday. Wilber is appearing today in final performances of the Midland Jazz Classic at the Midland Hilton

# Wilber, voted 'Most Acclaimed Musician,' to play Carnegie Hall

Bob Wilber, a participant in the Midland Jazz Classic which culminates today at the Midland Hilton, will appear in concert at Carnegie Recital Hall, New York City, at 8 p.m. Nov. 29.

The Midland Reporter-Telegram

SUNDAY, NOVEMBER 11, 1979

Wilber was recently voted the "Most Acclaimed Musician of the Year" in the International Jazz Journal Readers Poll of 1979.

The Nov. 29 program', entitled "Bob Wilber — A Man and His Music" will consist of the Beethoven and Brahams Trios for piano, cello and clarinet, featuring Russian cellist Leo Winland, pianist Doris Konig and Wilber on clarinet.

The second half of the evening's program will feature, among others, bassist Milt Hinton, who is also appearing with approximately 20 other jazz artists at the Midland Jazz Clas-

Also on the program of original Wilber compositions are Hank Jones, piano; Connie Kay, drums; Cannen Mastren, guitar-banjo; Britt Woodman, trombone; Jimmie Maxwell, trumpet; and Wilber on the alto saxophone, soprano sax and clarinet. Pug Horton will provide the vocals.

All in all, it has been a good year for Wilber who, in addition to being named the Most Acclaimed Musician, was also voted first in soprano saxophone and clarinet, and third in com-

posing and alto saxophone in the Jazz Journal poll. He won in a field that, included such greats as Count Basie, Scott Hamilton, Dizzy Gillespie, Buddy Rich, Joe Venuti, Oscar Peterson, Lionel Hampton, Kenny Wheeler and others.

Wilber has made appearances at all three of Midland's Jazz Classics, and agrees that it is a unique event.

He likes to encourage the cohesiveness between symphony music and jazz music and wants to see fans of both music styles unite.

"A melody is a beautiful melody, whether Mozart or Burt Bacharach wrote it," he said during a break of the Jazz Classic activities here.

Right now, he is finalizing plans for the concert and is this week completing composition for some of the music he will perform at Carnegie.

In addition to preparing for the concert, Wilber is currently working on a project for the Smithsonian Institute in Washington. He is working with Gunther Schuller in transcribing all the records in the History of Jazz's Collection

This year, he was also invited to become director of the newly-formed Smithsonian Repertory Orchestra which will record and perform concerts under the auspices of the Smithsonian Institution

The idea behind this new ensemble is to play the works of the major jazz figures\_such as Jelly Roll Morton, Duke Ellington and Benny Goodman

Speaking of Goodman, Wilber recently recorded an album, "Swingin' For the King," a tribute to Goodman on his 70th birthday.

PAGE 1C

Wilber is accompanied on the tworecord album by the Phontastic Swing Band featuring Arne Domnerus, Lars Estrand, Pug Horton and others

LOS ANGELES (AP) -- "Star Trek ... The Movie" 1977 starring John Travolta and Lily Tomlin," said tors could reduce ticket prices, figuring that bombs advance.

He said that next Jan. 14, he will begin a 10-percent ticket price reduction on non-blind-bid films playing at his 47 theaters.

A rebellion against blind-bidding was the primary subject of a recent three-day meeting of the 8,000member National Association of Theater Owners.

Jane Fonda, Jill Clayburgh, Jack Lemmon, Orson Welles, Sean Connery and Francis Coppola - all of whom sided with the theater owners -- were among the stars brought out for the gathering by the major Hollywood studios. But the mood of friendship normally prevalent at these get-togethers was miss-

Lynch and his wife; on a tour of the United States.

# More than 30 artists show sculptures at MC

More than 100 sculptures by more than 30 artists are on display in the McCormick Gallery in the Midland College Allison Fine Arts Building.

The sculptures, from the Shidoni Gallery of Tesuque, N.M., will remain on display through Nov. 28. Hours at McCormick Gallery for this show are 8

a.m. to 10 p.m. Monday through Thursday, 8 a.m. to 5 p.m. Friday and 1 to 5 p.m. Sunday. Most of the pieces are different from those brought

to MC last year by the gallery. That exhibit drew the largest crowds ever to see an exhibit at MC.

Shidoni Gallery is a division of Shidoni Foundry. Inc., which is widely known for its lost-wax casting methods, but the gallery itself represents numerous artists who work in other mediums.

RCA BLACK AND WHITE RCA SERVICERLA XLIOO

NEW ORLEANS (AP) - A Dixieland jazz band, will be greeted by Mayor Ernest Morial when they Mardi Gras doubloons and 15 barrels of green beer arrive from Boston. Lynch is to leave Monday for Houston.

> plan to make a brief appearance at the San Francisco-New Orleans professional football game at the Louisiana Superdome, attend a reception at the Cabildo museum and dine privately at a French Quarter restaurant.

Local dignitaries with names like Burke, Gallagher, O'Keefe and Eagan, were pulling out all stops for the block party in a heavily Irish neighborhood just a stone's throw from the Mississippi River.

Ronald G. Burke, organizer of the 21/2-hour party, said the Lynchs would be welcomed to the neighborhood by the Dixieland Saints jazz band playing When Irish Eyes Are Smiling.

He said the official party then will walk a block to a reviewing stand where Mrs. Lynch will be given flowers and she and her husband each will be given souvenir Mardi Gras doubloons.

A dance also is planned for the expected crowd of 1,000 to 1,500 people, and Burke said there would be 15 barrels of green-tinted Dixie Beer.

'blockbuster'' releases the studios have lined up sight unseen - for the next two years, but on the status of anti-blind-bidding legislation.

Sixteen states already have banned blind-bidding, and a number of legislatures soon will consider doing the same, said Friedberg, the current NATO president

Observers estimate that as much as 30 percent of the total movie box office take comes from those 16 In addition to the block party, Lynch and his wife states. Two more states, Pennsylvania and New Jersey, representing another 7 to 8 percent, have anti-blind-bidding bills pending.

Not to be outdone, the film studios' trade group, the Motion Picture Association of America, has filed suit against Ohio challenging the constitutionality of its blind-bidding statute.

Member companies of the MPAA, led by association head Jack Valenti, reportedly have said they will withhold film production work from states with anti-blind-bidding laws.

Valenti contended that "advance" bidding, as he refers to it, is in no way harmful to the industry.

## California Boys' Choir to appear in Big Spring

BIG SPRING - The California Boys' Choir, founded and directed by Douglas Neslund, will appear in the Big Spring Municipal Auditorium Tuesday at 8:15 p.m. sponsored by the Big Spring Community Concert Association.

The Big Spring and Midland Community Concert Associations cooperate by allowing members to attend concerts sponsored by either organization.

The choir is composed of 26 members ranging from 10 to 15 years old. They are selected from dozens of young Californians in the choir's training program. The choir performs regularly with the Los Angeles Philharmonic Orchestra, the Los Angeles Master Chorale, Glendale Symphony and Pasadena Symphony

They have performed with such varied personalities as Alice Cooper, Bruce Johnston and the rock group Angel, as well as singing on the 1977 album of Christmas music by the Salvation Army.

The choir is celebrating its 10th anniversary. Choir headquarters are in the California State Museum of Science and Industry in Los Angeles, Calif.

#### MCT tryouts to be held today

Tryouts for the Midland Community Theatre production of the musical Mame will be held at 5 p.m. today on stage in Theatre One.

Participants should enter the stage door on the north side of the building near the stairwell.

No roles will be cast until the final tryouts are finished, and many men are needed in excellent, non-singing roles, tryout organizers said. Participants need not be members of MCT.

Today's audition was scheduled because of the unusually large turnout for the previous sessions.

SPECIAL FOR NOVEMBER

SIRLOIN STEAK FOR TWO

\$7.50 per person

trimmings or piping hot corn on the cob, served with

The 26-member California Boy's Choir, directed by Douglas Neslund, will appear in concert Tuesday at 8:15 p.m. in the Big Spring Municipal Auditorium. The concert is sponsored by the Big Spring Community Concert Association.

# What killed Edith Bunker?

**By CAROL OLTEN Copley News Service** 

HOLLYWOOD - Edith lived for nine years and then Edith died. What killed Edith? She was the all-time comic cliche of motherhood and family on the cathode ray 'tube. Was it women's liberation?

It wasn't nasty network television because, even after nine years, those folks and the ratings still loved Edith. You know, dumb, old, babbling Edith who always seemed to run around the house in those mom's pie aprons screeching, "Aaaarrrrchee!" The fact of the matter is: Edith killed Edith, although brief resurrections of a sort will take place through Thanksgiving when Edith gathers the

family together for a last, poignant dinner. "All in the Family" was fun and games while it lasted, but after nine years the real Jean-Stapleton who was the real Edith Bunker -- i.e., Mrs. Archie Bunker -- wanted out. She went off to be-

come Eleanor Roosevelt for a bit in a film. Then, she became this other person; Mary Dobkin of Baltimore, Md. -- a nice lady who coaches a baseball team of neighborhood toughs -- for a television movie, "Aunt Mary.

But people still bump into Stapleton, who is tall, stately and intelligent, and expect to see Edith, who is shorter, unstately and dumb. And, said. Stapleton, the actress, continues to work hard at image shift. The new alter persona is Daisy

**Daisy Mayme?** 

# Miami Beach. back," she said.

Operation **Prime Time** started it

**By PETER J. BOYER** 

"An independent woman and a free spirit who lives in the 1930s when free spiriting was more difficult," Stapleton was emphasizing the other day in an interview.

'Daisy's a very, very happy person and she brings a lot of cheer to Harrisburg, Pa."

This Daisy of cheer is, basically, the one that Pulitzer Prize-winning playwright George Kelly

# **ENTERTAINMENT**

introduced in a comedy of years past entitled "Daisy Mayme." Stapleton will star in a stage revival of the piece and a road show tour.

Directed by Stapleton's husband, William Putch; the production was first staged in the summer of 1978 at the Totem Pole Playhouse in Fayetteville, Pa., which Stapleton and Putch regularly occupy several months a year in summer stock. The show is set to go to San Diego, Calif., Seattle, Denver, Boston, Washington, Orlando, Fort Lauderdale and

Will it sometime arrive in New York?

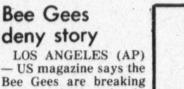

Stapleton shook her head. "Daisy Mayme" is not necessarily New York- or Broadway-bound, she

The costs for New York openings are so great, I think this kind of road show tour has had to come

In "Daisy Mayme," Stapleton moves from her Edith persona by portraying a slightly past middleage operator of a confectionary in Harrisburg who goes to Atlantic City for a short vacation and meets a family of dowdy types, also from Harrisburg and in mourning for a deceased member.

Daisy gets herself invited to their home for a visit and begins to upset the decidedly gray pace of the household by flinging open windows and insisting the dusty piano be opened and regularly played -- loudly. Is Daisy funny?

"I hope so," said Stapleton. "But I would sink right LOS ANGELES (AP) now if I thought about what I have ahead of - Yet another competime because the play is full of serious conflicts, too.

US magazine says the Bee Gees are breaking up - but the three brothers Gibb say they will be together forever, despite plans for individual projects.

"It's nothing more than headlines to sell magazines," said Barry Gibb of an article in the Nov. 27 issue of US Magazine. "It's sensationalized journalism at its best. The story is not true.

gual capabilities, multiplex also brings music in stereo - a feature expected to appeal to hi-fi buffs since it gives more realism to concerts and

"It could revolutionize television around the world," said Kazuo Gomi, a senior executive of Nippon Television.

"At the moment, sponsors are not willing to pay for the additional merits of multiplex,' scrambling for slots."

PAGE 3C

# Moore could be most envied man in U.S.

NEW YORK (AP) - Dudley Moore, a 5-foot, 2-inch British comic, could become the most envied man in America. In the movie "10," Moore makes his debut as a romantic lead opposite two of the world's beautiful women, Julie Andrews and Bo Derek.

'Actually, I've always wanted to play my mother," said Moore of his film career. "There must be an Anthony Perkins strain in me somewhere," he added, referring to Perkins' role in the Hitchcock thriller, "Psycho.

In "10," Moore plays a music composer in his early 40's who's afraid of getting old. He's at that time in his life where he has to make sure he's always enjoying himself. This puts him in the mood for falling desparately in love with a romantic illusion, 'on a scale of 1 to 40, an 11." He abandons Miss Andrews for what he thinks is the perfect woman, played by Bo Derek.

"If you're stricken by physical beauty, it's difficult to be objective about it," Moore said. "But you secretly know you're going to have to make some sort of ghastly adjustment at some point.

"I think most of us who have a conventional neurotic background probably go through it." he added. "It's always disappointing. But, you learn to be more realistic. You begin to treat these women as human beings from the start rather than making them unavailable princesses. It's unfair to saddle a

Members of the Concerteens, young people who will be greeting concert guests at the doors of Midland Community Concert Association functions, include, standing from left, Shawn Freeman, Gil Ward,

person with all that expectation

Although he identifies with the character in the film, Moore said he never rates people in a 1-to-10like fashion. "It's too much like buying meat ... 20 percent less fat," he said.

Moore was not director Blake Edwards' first choice for the role. He got the part when George Segal abandoned the project. "Apparently Segal was too tall." Moore said, laughing. '10" is Moore's second American film in two

years. He had a small part in the comedy "Foul Play," with Chevy Chase and Goldie Hawn. Moore played a chubby swinger with a closet full of rubber dolls and unusual gadgets. He lost about 20 pounds for his role in "10.

Before pursuing a movie career, Moore became known in this country in 1962 when he and three other British comics took their revue "Beyond the Fringe" to Broadway. He returned 10 years later with Peter Cook in "Good Evening."

"It would be nice to do a stage show again," Moore said, "but I don't want to do that for a while. It's not that I've had if with the stage, but I spent 10 years on it. I love it, but now I'm fascinated by films.

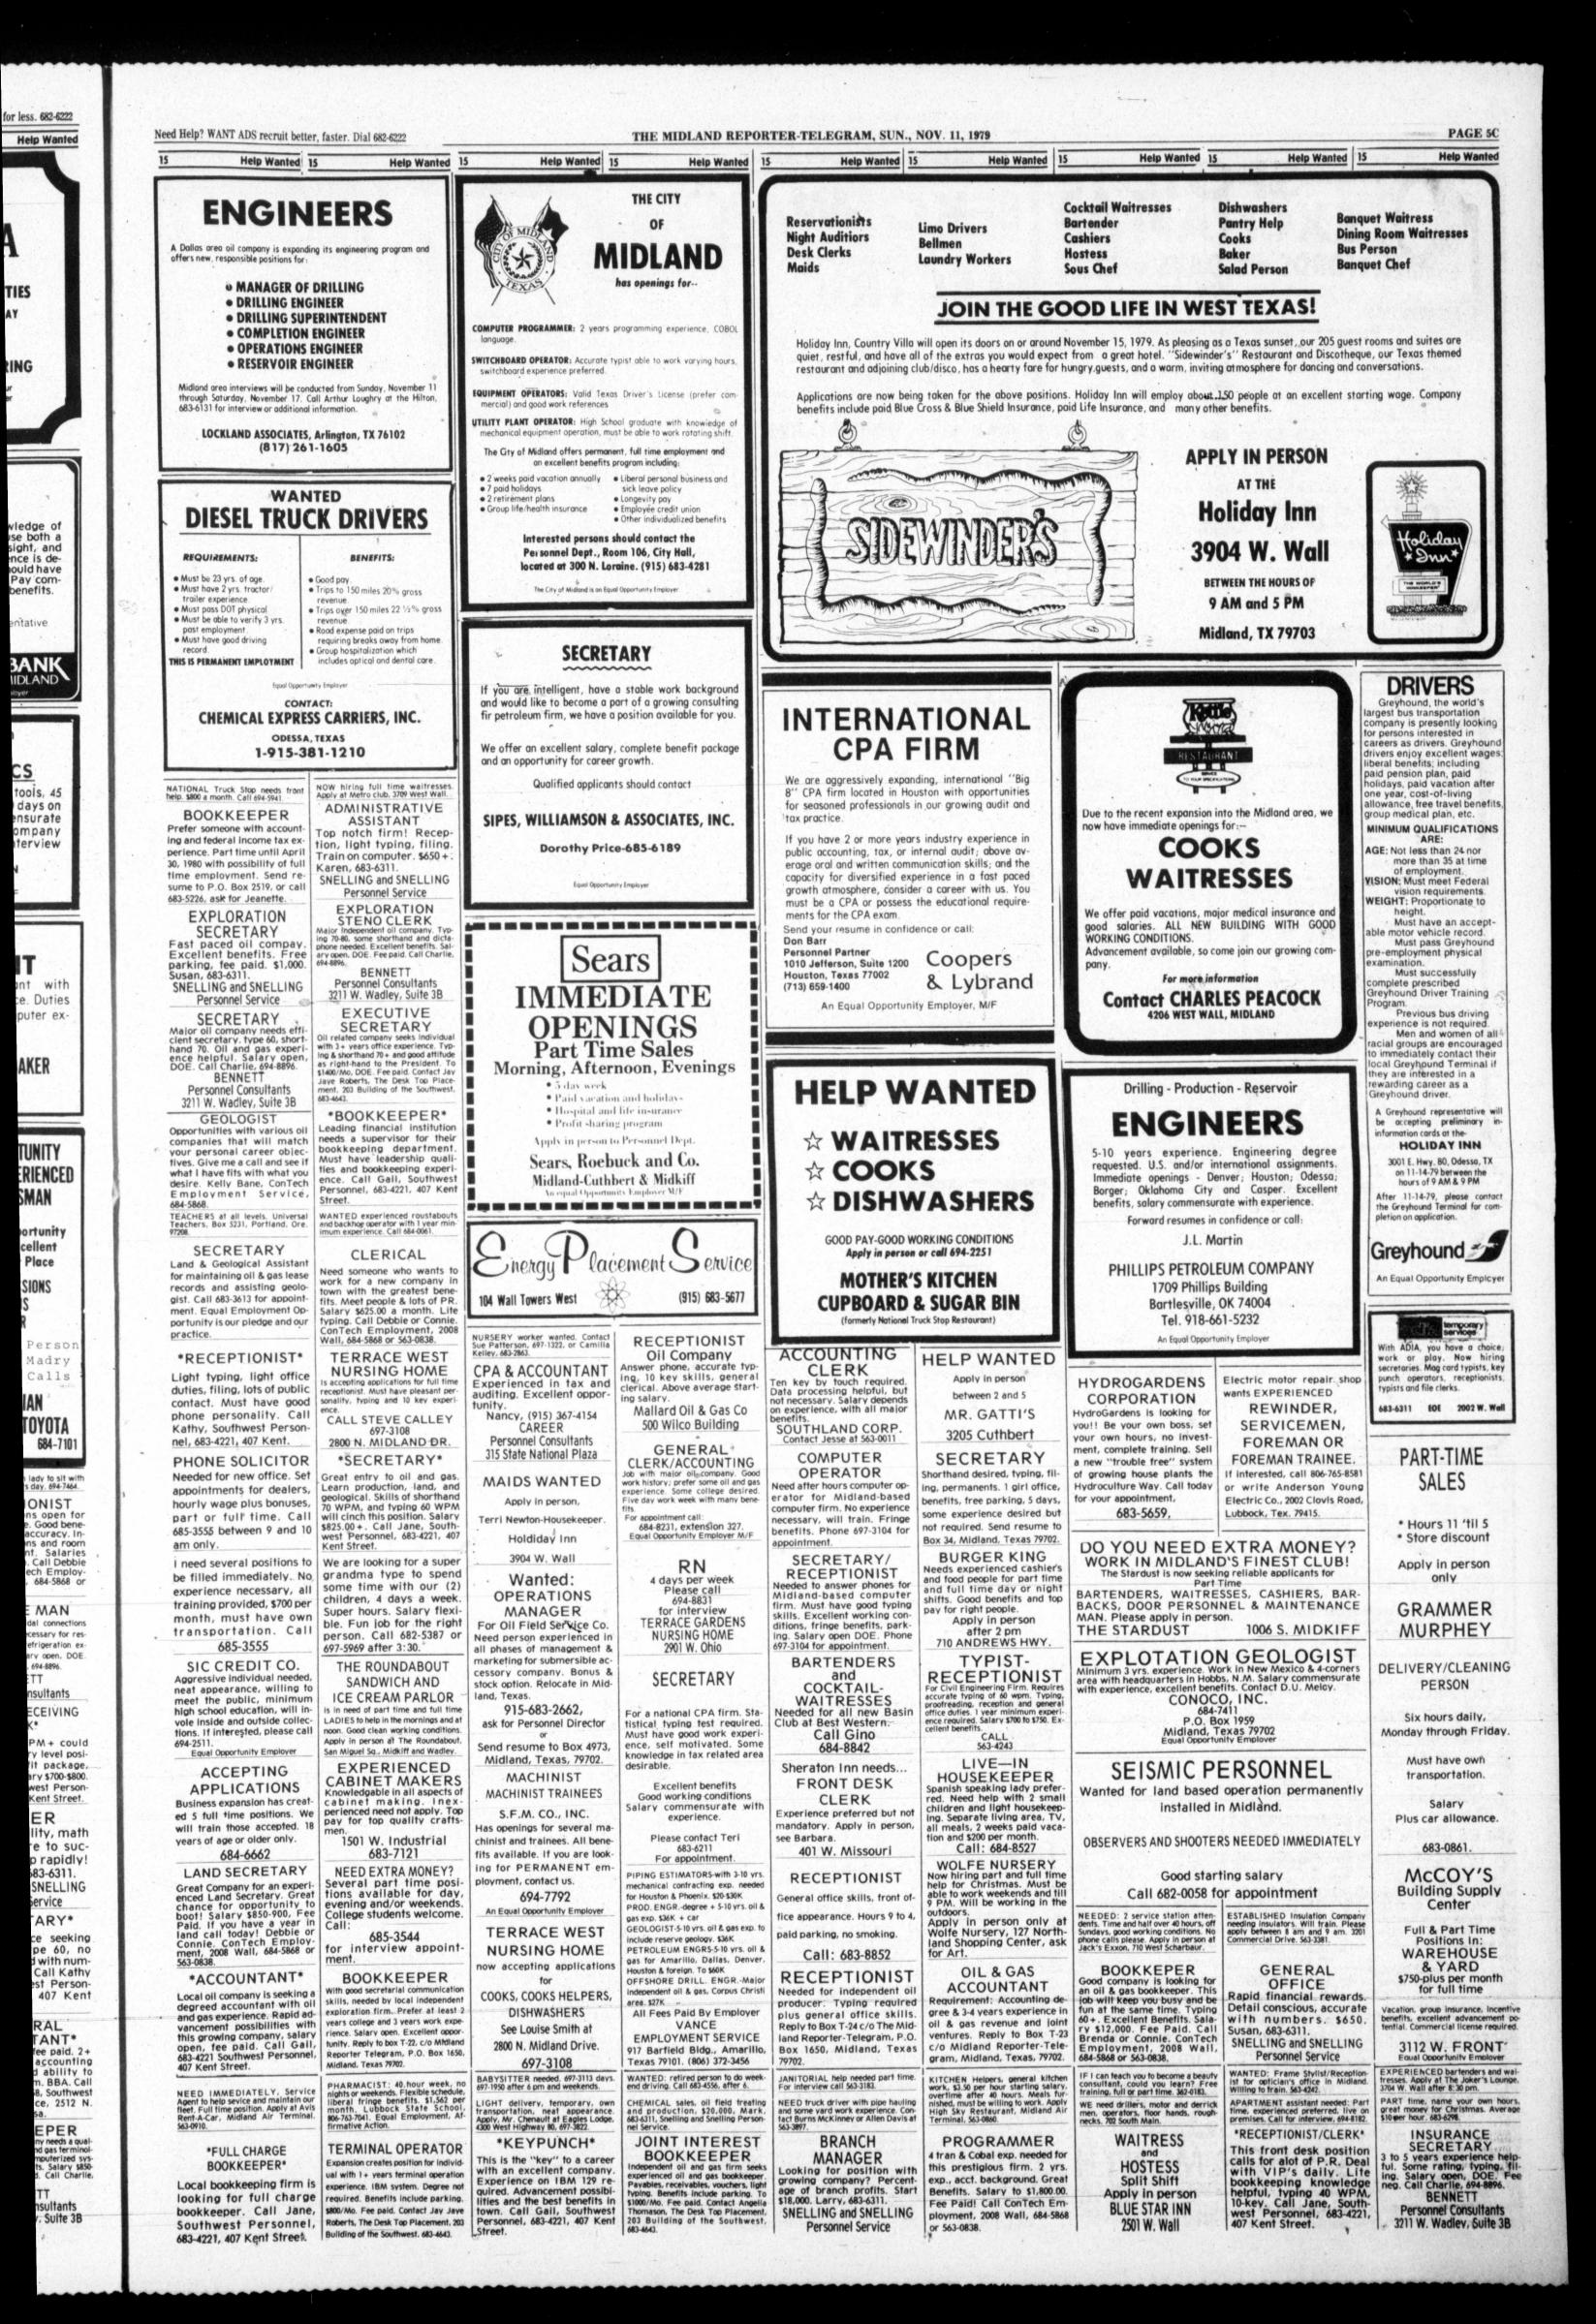

Moore's first love was and is music. He has a bachelor's degree in music from Oxford. "Now that '10' has been released, I'd like to bring the music out, do some concerts," he said. "I wanted to establish myself as an actor first. To me, music is a very personal thing. I feel exposed and therefore like the security of other sort of work like acting to back me.'

## The Midland Reporter-Telegram

SPORTS

SUNDAY, NOVEMBER 11, 1979

**Texas tops Houston** 

#### **By TED BATTLES Sports Editor**

HOUSTON - Texas' opportunistic Longhorns used turnovers to control the game and mounted two long scoring drives to knock the University of Houston from the ranks of the nation's undefeated, 21-13, and throw the Southwest Conference race into a three-way tie before 53,650 manical fans at the Astrodome Saturday night.

**AS COACHES Fred Akers of** Texas and Bill Yeoman of UH promised, they would hold nothing back offensively, but despite extravagant predictions of a wild scoring orgy, Texas' winning margin was rather modest. But that will happen when people like defensive backs Derrick Hatchett, Ricky Churchman, linebacker Conny Hatch and tackle Kenneth Sims take charge of a game.

They effectively muffled Houston's high scoring offense with two blocked punts and three interceptions, and while only one of the turnovers led directly to points, they enabled the Longhorns to control the tempo of the game.

**TEXAS' DEFENSE** so domin-

was in the ated this one that it bag even before quarterback Donnie Little kept off left tackle for a touchdown on a fourth and four at the Houston 15 with 1:31 left in the game. John Goodson, who missed a first period field goal attempt of 52 yards and earlier in the fourth period blew a 25-yard gimme shot, convert-

twice and Hatchett once. Texas and Arkansas moved into a three-way tie with the Cougars at the top of the SWC standings and at the same time jeopardzied the Cougars' hopes of going back to the Cotton Bowl for the third time in four years.

> COACH YEOMAN said, "I hope we have enough class to get out from under this defeat. It's a long way from over. If I'm not mistaken we're still tied for first."

Then he added, "It was the first time our specialty teams have broken down this season...our defense was put in a hard bind by the turnovers. But it's still hard to beat anyone with that many mistakes.

Yeoman praised Texas quarterback Little, who rushed for 38 yards and completed seven of 12 (Continued on Page 2D)

but is stopped by Texas . (AP Laserphoto). John Newhouse of the University of Houston dives over his left tackle looking for the goal line,

## MC women golfers go to Temple

Final Fall action for the Midland College women's golf team is slated for Monday and Tuesday at the Temple Junior College Invitational. The 36-hole event will be played at the Killeen Country Club.

"I've been pleased with the play of our team," noted coach Susan Holland. "They have progressed quickly against some very good competition, mostly four-year schools. We haven't won any events, but have finished ahead of several universities and have been ahead of Temple Junior

College every time both teams have

## Red Raiders have to settle for 3-3 deadlock with Frogs

LUBBOCK, Texas (AP) - Greg Porter's 28-yard field goal with 21 seconds to play gave Texas Christian a 3-3 tie with Texas Tech Saturday in a Southwest Conference game.

> Sophomore quarterback Steve Stamp, who rode the bench the first three quarters, came in to direct the Horned Frogs on an 81-yard drive for the tying point.

THE OUTCOME left TCU at 3-6-1

board late in the second quarter on Bill Adam's 29-yard field goal. Texas Tech had two shots at the

TCU goal from the 1, with 10:45 left in the game, but the Frogs stopped Hadnot for no gain and freshman quarterback Jim Hart missed tailback Mark Olbert on a pitch the next play for a #15-yard loss.

Tech safety Pate Randle intercepted TCU quarterback Kevin Haney at midfield two plays later and safety Ted Watts picked off a fumble in the air at the Frog 33 later in th

Turnovers hurt both teams. TCU lost three fumbles and was intercepted twice, and Tech lost two fumbles and one interception on Hart's desparation pass to the end zone on the final play of the game.

into the fourth quarter. Then, Robert Bledsoe kicked a 35-yard field goal with 4:46 left in the game to tie it 20-20 ARKANSAS TOOK the ensuing

kickoff and started from its own 25. Darryl Bowles made a measured third down at the Arkansas 36. On second down, Scanlon faked inside, rolled to his right outside the Baylor containment and threw deep for Farrell down the right sideline.

Farrell was behind Kirk Collins and

caught the ball in full stride about the Razorback 20.

MOMENTS LATER Jeff Goff tripped Baylor punter Ron Stowe in the Baylor end zone for a safety after. Stowe mishandled a bad snap.

It was Scanlon who ignited Arkansas midway through the third quarter when he stepped inside a Baylor defender and hit Bobby Duckworth for a 32-yard touchdown pass with Arkansas facing fourth-and-five. That made it 17-6.

## Field goal saves Crimson Tide

BATON ROUGE, La. (AP) -Alan McElroy, who missed two field goal attempts in the first half, kicked a 27-yarder in the third period Saturday night to give No. 1-ranked Alabama a rain-soaked 3-0 victory over Louisiana State and make Bear Bryant the first college football coach in modern times to win 100 games in a decade.

A combination of a steady rain, 55-degree temperatures, a brisk wind, a slippery grass field and a couple of turnovers hampered Alabama's highpowered Wishbone offense. But the Crimson Tide's defense, ranked third nationally, only permitted LSU out of its own territory twice - the Tigers' deepest penetration was to the Alabama 42 - and intercepted two passes in the final seven minutes to preserve its fourth shutout of the season.

Alabama, 9-0 for the season, boosted its winning streak to 18 games, longest in the nation, and remained tied with Georgia for the Southeastern Conference lead. However, Georgia will represent the conference in the Sugar Bowl if it defeats Auburn next Saturday regardless of what Alabama does in its final

two contests Louisiana State is 5-4 overali and lost to Alabama for the ninth year in a row. The setback spoiled Charlie McClendon's

200th game as LSU's head coach. McClendon, who played under Bryant at Kentucky, is in his 18th and final season. Bryant has now defeated his former players and assistant coaches 25 consecutive times and 35 of 40

overaH. Alabama scored the game's only points on its first possession of the second half after LSU's Robbie Mahfouz managed only a 22-yard punt to the Crimson Tide 44 into a 10 mph wind.

while Tech fell to 4-4-2 and 3-3-1.

vards.

The Horned Frogs turned back three Texas Tech scoring threats in the fourth quarter and held James Hadnot, the conference's leading rusher to 92 yards in 22 carries. The Red Raiders got on the score-

Rockets down

Detroit

HOUSTON (AP) - Moses Malone and rookie Major Jones led a determined fourth-quarter rally that pulled the Houston Rockets from a ninepoint deficit to a 112-104 win over the Detroit Pistons in National Basketball Association action Saturday.

Malone hit 10 points and grabbed 10 rebounds during the comeback, and Jones scored six points and captured five rebounds, all on the offensive boards.

The Pistons finished the first half ahead by one point, 56-55, and took off in the third quarter behind the shooting of Bob McAdoo, who won gamescoring honors with 30 points.

Houston, trailing by nine at the start of the final period, charged back and tied the game at 92-92 with 8:10 left to play. The Rockets took the lead for good

at 98-96 on Alan Leavell's driving layup with 5:53 to go.

#### Texas college scores

Here are the scores of Saturday afternoon Texas college football games:

How top 20 teams fared
By The Associated Press
Here's how the Top Twenty teams in The Associated Press college football poll fared this weekend:
1.Alabama (9-0-0) beat Louisiana State 3-0
2.Nebraska (9-0-0) beat Kansas State 21-12
3.Ohio State (10-0-0) beat Iowa 34-7
4.Southern California (9-0-1) beat Washington 24-17
5. Houston (8-1-0) lost to Texas 21-13
6.Oklahoma (8-1-0) beat Kansas 38-0
7. Florida State (9-0-0) beat South Carolina 27-7
8. Texas (7-1-0) beat Houston 21-13
9. Arkansas (8-1-0) beat Baylor 29-20 10. Michigan (8-2-0) lost to Purdue 24-21
11.Brigham Young (9-0-0) beat Long Beach State 31-17
12. Pittsburgh (8-1-0) beat West Virginia 24-17
13.Notre Dame (6-3-0) lost to Terinessee 40-18
14.Purdue (8-2-0) beat Michigan 24-21
15. Washington (7-3-0) lost to Southern California 24-17
16, Auburn (7-2-0) beat Mississipi State 14-3
-17.Baylor (6-3-0) lost to Arkansas 29-20
18.Clemson (7-2-0) beat North Carolina 19-10

19.South Carolina (6-3-0) lost to Florida State 27-7

#### 20.Wake Forest (8-2-0) beat Duke 17-14

## Trojan defense turns Huskies away, 24-17

SEATTLE (AP) - Southern California is one of the most talented college teams in the country but it took persistence to carry the fourthranked Trojans to a 24-17 Pacific-10 Conference victory over 15th-ranked Washington Saturday.

The Trojans' determined detense came up with two brilliant stands late in the game to thwart Washington and give USC the inside track to the Rose Bowl.

"The thing that won it for us was we played hard the whole game," said USC Coach John Robinson. "Our defense couldn't stop their passing game but when it counted, our defense had them back on the six-yard line.

After the Trojans took a 24-17 lead 3: 10 into the final period, Washington drove down to the 10-yard line and went backwards. Later, Washington had a first and goal from the Trojan 2 and couldn't push it across.

We just came out one-on-one and beat our guys off the line," said USC defensive back Ronnie Lott. "I had a little doubt we were going to win. But like the coach said, 'keep playing and playing and playing.

'We just guessed wrong on some goal line defenses," said Washington Coach Don James. "There was never a thought of going for a field goal because they are so tough defensively, you never know if you'll get another chance." Washington quarterback Tom Flick

rallied the Huskies from a 17-3 early third-quarter deficit with some pinpoint passing.

"I knew it would go down to the final seconds," said USC wide receiver Kevin Williams, who caught a 19yard touchdown pass from Paul McDonald to give the Trojans their 10-point lead. "Washington is the type of team that can come back."

Charles White was another reason the Huskies won't go to the Rose Bowl. He rushed for 243 yards, including 163 in the second half.

## **Dickerson** guides SMU to victory over Shockers

WICHITA, Kan. (AP) — Eric Dick-erson ran for two touchdowns and Jim Bob Taylor passed for another to lead Southern Methodist to a 34-0 win over hapless Wichita State in a non-conference football game Saturday afternoon

Dickerson, a freshman tailback who had been injured much of the season, scored on 1 and 23-yard runs and narrowly missed a third touchdown when he fumbled diving over the goal line from the 1.

Eleven of 14 pass completions for 180 yards in the first half led the Mustangs to two second period touchdowns while the SMU defense held Wichita to only 65 yards offense in the opening half.

The Mustangs, 4-5, first scored early in the second period, driving 65 yards in six plays after returning a Wichita State punt to the SMU 35. **Taylor hit wingback Emanuel Tolbert** 

#### **Florida State** still unbeaten

TALLAHASSEE, Fla. (AP) -Dave Cappelen booted four field goals, including a 50-yarder, and fullback Mark Lyles rushed for 135 yards Saturday night to lead seventh-ranked Florida State to a 27-7 victory over South Carolina.

Lyles plunged one yard for a touchdown early in the first quarter to give the 9-0 Seminoles a quick lead they never lost. Cappelen hit field goals 20, 29 and 50 yards in the first half, and added a 29-yarder in the fourth quarter.

The Seminoles opened a 24-7 lead in the fourth quarter, when quarterback Jimmy Jordan hit Sam Childers with a 7-yard touchdown pass and followed with a two-point conversion pass to Childers with 9:55 left in the game

Cappelen's last field goal came with 7:01 remaining.

The Gamecocks' only score came on an 80-yard burst by tailback George Rogers in the second quarter. Rogers rushed for 187 yards in the game. South with a 26-yard scoring pass. Eddie Garcia, who kicked 37- and 40-yard field goals in the second half, missed the extra point.

SMU missed another score minutes later when Dickerson fumbled on the dive play from the 1. Wichita's Jeff. Townsend caught the famble in the air 5 yards deep in the end zone and returned it 105 yards for a touchdown, but the tally was nullified by a clipping penalty.

Wichita, now 1-9, was unable to move the ball and punted to the SMU 43, from where the Mustangs drove for their second touchdown. Dickerson plunged in from the 1, and Taylor ran around right end for the 10 pointconversion in a 14-0 halftime lead.

SMU put the game out of reach in the third period on Garcia's 37-yard field goal following a Wichita State fumble at the Shocker 30, and Dickerson's second touchdown run to cap a 47-vard drive.

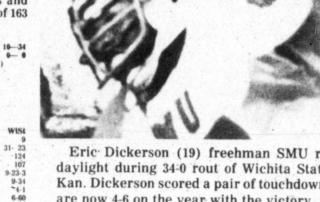

Tolbert, a senior, tied one Southwest Conference record with 22 career touchdowns pass receptions and established a conference record of 163 career receptions.

### Oilers, Raiders battle in Astrodome today (Continued from Page 1D)

#### HOUSTON (AP) - The Houston Oilers, with a scoring attack led by a portly 5-foot-8, 196-pound Austrianand Earl Campbell, and the Oakland Raiders, trying to overcome the horrors of playing on the road, meet in a National Football League game in the Astrodome today.

The Oilers, 7-3, remain a strong contender for a playoff berth despite a sputtering offense that has had to rely on the rushing of Campbell and the kicking of Toni Fritsch.

Fritsch, the No. 3 scorer in the American Football Conference, has been responsible for three Oiler victories this season, including Monday's 9-6 victory over Miami when he kicked field goals of 46, 48 and 31 yards. Fritsch also kicked the Oilers to a pair of overtime victories over Cincinnati and the New York Jets. Campbell retained the AFC rushing and scoring lead despite a pulled leg muscle that

caused him to miss one game. Houston Coach Bum Phillips continued to defend beleaguered quarterback Dan Pastorini, booed long and often in the Astrodome this season for his slow start.

The Oilers relied almost exclusively on Campbell and the ground game against Miami. Campbell rushed for 120 of Houston's 179 yards and carried on 32 of the Oilers' running plays

"We need to throw better and catch better, but I thought we displayed good judgement against Miami," Phillips said. "We seem to play better against a class football team. I don't, know why, I just hope I can keep getting them to do it.' Oiler tight end Mike Barber suffered a knee injury against the Dolphins and was a questionable participant in Sunday's game but the Oilers will get little sympathy from the Raiders, who had 13 starters sidelined at one time early this season.

"When I was ahead, I some of the best shots

## Texas defense too tough

We will be back." Despite the seeming cinch touchdown on the pass, the Cougars had to settle for the field goal four downs later.

The Longhorns retaliated by driving 77 yards in 13 plays with the ensuing kickoff. Little running it in from the five with 1:45 left in the first period.

A Donny Love interception of a Little pass set up Terald Clark's 46-yard touchdwon run on a 24-Trap, the longest run of the season against the Steers, to make it 10-7 with less than four minutes into the second period

However, the counter punching Steers were to reclaim the lead for good before intermis-

left in the half.

#### FORD DESCRIBING the

blocked punt said, "I can't really say what happened. I took too much time on the first kick that was blocked and I kept my head down on the second kick and couldn't really see what happened.

Hatfield's 34-yard field goal with 13:24 left in the game came after a 49-yard drive and cut the Texas lead to 14-13, but it was the only offensive muscle the Cougars showed in the second half.

And ironically for those who thought the game would be a field goal kicking duel between Hatfield and Goodson it was in a way. Hatfield kicked both of his attempts and

Midland High's cross country team finished third in the District 5-4A cross country meet Saturday in San Angelo at the Santa Fe Golf

Course. Team members are, from left, Ed- shead, Bill Hopper, Kevin Yates and Gregory ward Sotelo, Willie Ross, William Holling- Sotelo. (Staff Photo by Brian Hendershot)

### Odessa schools dominate

Odessa schools dominated ninth grade play while eight grade teams fared better in this week's junior high school football action.

Powerful Nimitz dumped Lee Maroon 19-6, Bowie trimmed Lee White 14-6, Crockett shaded Midland Gold 8-6 and Ector nipped Midland Purple 13-12, earning Odessa a sweep of frosh contests. In a battle of two Odessa units, Hood bested Bonham 20-14.

squad belted Bowie 42-8 while San Jacinto A blasted Blackshear 49-0 and Goddard crushed Nimitz 38-6. Also, Bonham defeated Hood 38-14. A pair of eighth grade Midland City

Conference clashes were on the docket as Trinity handled Midland Christian 31-12 and Alamo blanked San Jacinto B 13-0.

IRVING, Texas (AP) - Texas Stadium is a haunted house for the Philadelphia Eagles.

Cowboys battle Eagles Monday

They've never won a game from the Dallas Cowboys in the stadium which replaced the Cotton Bowl nine years ago as the home of the National Conference Eastern Division powerhouse.

In fact, Dallas hasn't lost at home to Philadelphia since 1965, a span of 13 consecutive games. Dallas has won nine straight games from the Eagles.

Such is the scenario for Monday night's meeting between the two teams. It's a must-win game for the Eagles to kéep Dallas from making the NFC East a November runaway. Dallas has a two-game bulge over

Philadelphia and Washington in the SBOA to hold

## clinic Monday

The Midland Chapter of the South west Basketball Officials Association will hold a clinic at 8 p.m. Monday in the Midland High School gym. All coaches from junior high to college, and those interested, are invited.

Dee Carter said it will give coaches an opportunity to ask about the rules and mechanical processes employed during the course of game. "We are trying to make the mechanics used by officials in the Midland SBOA uniform, so coaches won't be confused by different mechanics for similar calls. during the season."

Carter added anyone interested in officiating is welcome to attend. "We had several people sign up at our

division. The Cowboys are 10-point favorites to make it a three-game lead over the Eagles. The Redskins play St. Louis in Washington on Sun-

Dallas quarterback Roger Staubach has a 13-2 career record against the Eagles. But the Eagles have one thing working for them: Dallas is usually horrific on Monday nights.

Cleveland strapped Dallas 27-7 in October on a Monday night to drop Dallas' record to 7-7 on such nationally televised outings.

The last time the Eagles beat Dallas was on a Monday night in 1974.

"We've got to play to the maximum of our ability or we won't win," says Eagle Coach Dick Vermeil.

The Eagles have lost three straight games but Vermeil said his team at least played "Eagle" football in last Sunday's 24-19 loss to Cleveland.

"It's a hell of a disappointment to play with the intensity we had and still lose," said Vermeil. "I feel like we are back on the track. We are still one game ahead of where we were last year. But let's not kid ourselves. Dallas is still the class of the division.

Dallas Coach Tom Landry said "The Eagles have sort of been down in a valley which happens to you over a 16-game schedule. They are out of it now. We are going to catch 'em at the top of their game. If we're not at the top of our game we're not going to win.

Midland's Repman nabs district cross-country

SAN ANGELO -- Midland High senior Donna Repman was the only individual from the Tall City to earn a regional berth after Saturday's District 5-4A Cross Country Meet here at the Santa Fe golf course. Miss Repman ran away with the girls division while posting a time of

12 minutes and five seconds, not her best. However, Helen Barton, MHS girls cross country coach, stated, "I've never seen a cross country meet won by that much before. Donna really

**REPMAN WILL** now travel to Lubbock Saturday for the regional run at Mae Simmons Park. If she finishes in the top five there, she will be on her way to the state meet. Abilene Cooper and San Angelo placed first and second in the girls competition to earn the district's team regional berths

Other Tall City girls finished well down in the pack.

ran well.

In the boys division, the two Tall City teams came up empty as far as regional berths are concerned. San Angelo won the title with 31 points and Odessa High was second with 40 points to earn regional team berths. Midland High was third with 72 points and was followed by Odessa Permian, 89, and Midland Lee, 109.

Midland Lee's Robert Schooler, who was given a good shot at earning an individual berth to the regionals, came up with a seventh place finish with a time of 10:24. He had to place in the top five to earn the berth.

Midland High ace Kevin Yates finished eighth with a 10:27 while Greg Sotelo, 10: 35; finished 10th and Edward Sotelo, 10: 47, finished 16th. All three Bulldogs posted their best times, but it wasn't enough.

OTHER BULLDOGS were William Hopper, 22nd; Willie Ross, 23rd; and Rex Allen, 39th. Other Lee runners were David Harwell, 24th; Joey Odom, 25th; Robert Samuels, 30th; John Hill, 36th; James Fitting, 38th; and Tim.Moore, 39th.

In the junior varsity division, Midland High's Jamie Paredes had the best finish with an eighth place 11:35. Other Bulldogs were Jerry Navarette, 11:45: Roy Dennis, 12:05: Frank Ochoa, 12:09: Henry Kruse kopf. 12:48; and David Weyman, 13:30. Lee entries were Mike Setzler and and Danny Sanchez, but their times were unavailable.

Mark Olberding added

### Erving's 37 points paces 76ers to 95-94 victory

PHILADELPHIA (AP) - Forward Cowens each had 14 for Boston. Julius Erving hit 37 points to boost the Philadelphia 76ers to a 95-94 National Basketball Association win over the Boston Celtics Saturday night.

The loss shattered a six-game Boston winning streak as Philadelphia overtook the Celtics for first place with a 12-3 record. The Celtics dropped to 10-3.

With 58 seconds left, Erving hit a field goal from the right corner to put the Sixers ahead 95-92.

Boston rookie forward Larry Bird. who had 22 points on the night, hit a one-hand layup with 41 seconds left. But 26 seconds later Bird missed a jump shot and Celtics' center David Cowens also hit the rim on a jumper with 2 seconds left.

Philadelphia, which had a 23-21 first period lead, led 58-51 after two and 76-65 after the third period.

Guard Doug Collins had 18 points for Philadelphia. Cedric Maxwell and

The win was the fourth in five games for Philadelphia.

Texas A&I rips Jackets

KINGSVILLE, Texas (AP) -Quarterback Randy Cretors accounted for 235 yards on offense, 188 rushing and 117 passing, as Texas A&I obliterated Howard Payne 56-10 Saturday night in Lone Star Conference play

Eight different players scored for the Javelinas, raising the teeam's record to 5-1 in LSC action, 8-1 for the season. A&I remains tied with East Texas State for the conference lead. HPU fell to 1-5, 2-7 overall.

Cretors and tailback Marcus Bonner both cracked the 100-yard rushing mark, as Bonner toted the ball-six times for 110 yards.

#### **Blazers** win CHICAGO (AP) -

Tom Owens scored a season high of 32 points, Ron Brewer added 22, and the pair combined for 12 points in the final five minutes Saturday RCA land Trail Blazers to a 94-90 National Basketball Association victory over the Chicago Bulls.

two-game road loasing streak, dealt the Bulls their eighth loss in their last nine contests and their 12th of the season. Portland is 12-4 for the year.

Portland had opened up a 60-48 bulge early in the third quarter but lost its touch as Coach Jack Ramsay sent his second team onto the floor.

The Bulls, led by 11 points from Scott May and six from Sam Smith, closed the gap to 74-69 after three quarters.

With Reggie Theus, who had 23 points, and Coby Dietrick, who added 19, leading a fourth-quarter surge, the Bulls went ahead 79-78 before Ramsay sent back his first team.

## Perkins hoping for comeback

By BRUCE LOWITT **AP Sports Writer** 

'Now we'll find out what we're made of," Coach Ray Perkins was saying as his New York Giants prepared for today's National Football

they've played in nearly half a decade, the Giants stymied Dallas for more than 55 minutes, leading the

Perkins, who had insisted on treating it as just another game, acknowledged afterward that the loss was harder to take than most. And he pointed out that the team's character would be defined not by the outcome of the Cowboys' game but by the way the Giants played against the Fal-

ference West lead?

#### champion, and we went down there and we lost a hell of a good game. It had a positive effect on us, even though we lost. Just as long as we remembered to take them one at a

time afterward." But at least one of the Giants would like nothing better than to get right

McMurry as the Chaps continued working the ball on offense and playing that sticky defense, sometimes switching to an equally tough zone.

Tate's short jumper at 12:20 of the first ignited the Chaps on a 12-point binge. Smooth guard Shelby then added a hoop before McGill meshed a pair of 15-foot jumpers and the hosts were flying.

Young's impressive dunk shot, followed by a 15-foot jumper by burly freshman Kevin Willingham, extended MC's advantage to 36-18 with nine minutes remaining in the first half.

BUT DOWN the stretch, Bradford began really battling inside and contributed 11 points to the Indian effort as the visitors closed the halftime score to 50-37.

It was all MC in the second session, as Chap coach Jerry Stone shuffled players in and out of the game.

Tony Colunga's bucket as the second half began, moved the Indians to within 50-39, but Johnson, the splinter-thin 6-foot-5 post, sparked the Chaps.

HE HIT a 12-foot jumper and then put the flame to a 10-point MC burst with a remarkable tip-in of a missed shot and a layup.

The 10-point unanswered salvo put the contest out of reach as Midland built their bulge to 66-47 with 13:27 in the game.

Two power hoops by Willingham, one of them a dunk, and then a pair of soft jumpers by Tate, left McMurry in a daze.

Although the final few minutes weren't real pretty - mostly substitutes were on the floor - the Chaps did manage to crack the century mark in their season lidlifter.

Young's downtown jumper from the left corner at 1:05 of the game made the count 101-73. The rest is history.

iced the victory for Auburn, 7-2.

### Auburn defense too tough for Mississippi State

touchdown to be the clincher.

In the last several minutes of the came, with the score 7-3, Mississippi State quarterback Dwayne Brown directed a long drive that made it to the Auburn 19 and threatened to put the Bulldogs on top. But he was sacked for a 13-yard loss and the ball went over to Auburn when cornerback Daryl Wilks batted a fourth down pass away from State's Mardye McDole.

Earlier in the game Wilks knocked another pass out of McDole's hands in the end zone.

State, using its wishbone attack to churn out long and time consuming drives, had to settle for a 35-yard field goal by Jerry Rye in the third quarter for its only score.

Spartans took a 31-17 victory over the Gophers. (AP Laserphoto).

## Pitt wins, 24-17

MORGANTOWN, W.Va. (AP) - Defensive back Jo Jo Heath returned an intercepted pass 46 yards to set up Freddy Jacobs' four-yard touchdown run midway through the fourth quarter Saturday and 12th-ranked Pitt held on to defeat rival West

Playing before the largest crowd in West Virginia history, the Panthers twice built big leads only to see the underdog Mountaineers, 5-5, battle back. The game, the final one at West Virginia's 55-year-old Mountaineer Field, drew a crowd of 38,681. The largest prewhich has a listed capacity of 34,000, was 38,500 for the 1971 Pitt game.

Jacobs' touchdown run with 9: 12 left in the game came just a minute after West Virginia had cut Pitt's lead to 17-10 on a 19yard touchdown pass play from Oliver Luck to Cedric Thomas. West Virginia began the drive on its own 20.

Pitt, 8-1, playing before scouts from four bowl games, had built a 17-3 lead early in the fourth quarter behind the passing of freshamn quarterback Dan Marion.

Starting for just the second time in his college career,

Syracuse sinks Navy

ANNAPOLIS (AP) - Syracuse quarterback Bill Hurley, ran for one touchdown, passed for another and guided the Orangemen to a 30-14 victory over Navy Saturday.

hopes.

ATLANTA (AP) - Georgia Tech's in just four plays for the first score freshman running back Ronny Cone rushed for 156 yards and a touchdown and quarterback Mike Kelley threw for another score Saturday, powering the Yellow Jackets to a 21-0 college football victory over the Air Force Academy.

> Cone capped a 70-yard drive with a 20-yard TD scamper on Tech's first possession. The freshman had 51 yards in four carries during the eightplay drive.

Tech, 3-5-1, made it 14-0 late in the

## Rutgers blanks Cadets, 20-0

EAST RUTHERFORD, N.J. (AP) - David Dorn and Albert Ray each ran for one touchdown and Kennan Startzell booted two field goals Saturday in leading Rutgers to its first college football victory over Army in 88 years, a 20-0 decision at Giants Stadium before a crowd of 28,163.

The Scarlet Knights had dropped 11 straight games to the Cadets since taking the initial meeting 27-6 in 1891. The victory, following last week's upset over highly regarded Tennessee, keeps the 7-2 Scrlet Knights' bowl hopes alive.

Dorn's 14-yard touchdown scamper was the only scoring in the first quarter, and sent the Cadets on the way to

AUTO CENTER OPEN 7:30 AM 'TIL 9:00 PM

opportunity in the opening half. It failed when Jim Sturch missed a 24yard field goal attempt eight seconds before intermission.

their seventh straight winless start. Army has lost six and tied one after opening the season with victories over Connecticut and Stanford.

The speedy Dorn caught the Army defense off guard, moving from his flanker position to take a handoff from quarterback Ed McMichael and rambled untouched into the end zone

Startzell booted field goals of 35 vards in the second quarter and 32 yards in the fourth quarter, sandwiched around Ray's 21-yard touchdown run in the third quarter.

Ray put the game out of reach with his touchdown sprint at 12:59 of the quarter, capping a four-play, 48-yard drive

THE MIDLAND REPORTER-TELEGRAM, SUN., NOV. 11, 1979

## Ohio State romps past Hawkeyes in Big 10 tilt

COLUMBUS, Ohio (AP) - Ohio State's leagueleading defense, sparked by freshman Marcus Marek, forced Iowa into 10 turnovers Saturday in a 34-7 college football rout that gave the third-ranked Buckeyes at least a Big Ten Conference co-championship

The undefeated Buckeyes ran their overall record to 10-0 and can clinch a Rose Bowl berth next week by winning at Michigan, which suffered its first league loss at Purdue as the Boilermakers scored a 24-21 victory

Ohio State now is 7-0 in the Big Ten while Michigan and Purdue are tied for second with 6-1 conference only 3-0 after the first marks with one week remaining.

Marek, a linebacker, intercepted two passes and ' recovered one fumble as Ohio State had the issue settled by halftime as the Buckeyes built as 27-0 lead.

Ohio State forced Iowa quarterback Phil Suess into two lost fumbles and three interceptions, which led to the Hawkeyes' worst defeat of the season and dropped Iowa to records of 4-6 overall and 3-4 in the Big Ten.

Sophomore quarterback Art Schlichter became Ohio State's all-time passing leader when he connected on an 8-yard toss to Ty Hicks in the opening moments of the game. Schlichter now has 2,573 yards in the air. Don Unverferth set the previous record of 2,518 yards from 1963-65.

Schlichter ran 1 yard for a touchdown and passed championship. 34 yards to Doug Donley for another score. Donley's catch was his ninth career scoring reception and tied garoos to 7-1 in TIAA a school mark established by Bruce Jankowski from play and 9-1 on the year. 1968-70

Iowa's only touchdown came with less than five 4-6. minutes remaining. Third-string quarterback Pete Wilson Renfroe kicked Gales passed 40 yards to Keith Chappelle for a off Kangaroo scoring 40-yard scoring play that foiled the Buckeyes' bid for with a 36-yard field goal their third shutout in four games. in the second period.

#### Angelo State edges Sam Houston State

HUNTSVILLE, Texas (AP) - Kelvin Ratliff knifed through the secondary for 216 yards and two touchdowns to lift Angelo State to a 17-16 Lone Star

Neb KSI

Conference victory over Sam Houston Ratliff tied the game in the fourth quarter when he rammed in from the Reporter Te

The victory gave Purdue a secondplace tie with Michigan, one game behind Big Ten Conference leader Ohio State going into next week's season windup.

McCall, a junior reserve pressed into action by injuries to the Purdue regulars, scored the first touchdown in the opening period and added another score on a 9-yard run early in the fourth quarter.

Purdue also scored on a 1-yard sneak by quarterback Mark Herrmann and a 29-yard field goal by John Seibel.

The powerful Wolverines, who had averaged more than 275 rushing yards per game, were held to a minus-7 yards on the ground in the first quarter by the swarming Purdue defense

Michigan's first drive, aided by a Purdue penalty for roughing punter Bryan Virgil, went to the Boilermaker 41 before Kay made his first interception off quarterback John Wangler.

Purdue then launched its first scoring drive from its own 35. Herrmann completed a pair of short passes, then hit Wally Jones on a 25-yarder that

Michigan, which managed just four first downs and 21 rushing yards the entire first half, never made it past midfield the rest of the second quarter.

The Wolverines finally scored in the third quarter on a 6-yard pass from Langler to Doug Marsh and in the fourth quarter on a 1-yard run by Roosevelt Smith and a 2-yard plunge by Butch Woolfolk.

Michigan pulled within three points with a minute to go when Herrmann was tackled in the end zone for a safety, and the Wolverines never made it past midfield on the following kickoff.

## SCHOOLBOY FOOTBALL Plano gains state playoffs again

By The Associated Press

Kelly Boyd rushed for two touchdowns as Plano - the losers in last year's Class AAAA state final --clinched another try at the coveted schoolboy championship with a 21-0 shutout Friday night over Richardson Berkner.

The win gave the Wildcats the top berth in the tough District 13-4A and assured Plano - picked by many observers to finish completely out of the 1979 playoff picture - a bi-district matchup later this month.

Plano, ranked sixth among AAAA teams in The Associated Press schoolboy footballpoll, was not the only Dallas-area team to nail down a district title Friday night.

USING AN outstanding defensive performance, No. 8 Dallas White clinched District 11-4A with a 28-0 whitewashing of arch-rival Dallas Hillcrest.

The Longhorn defense forced six turnovers and limited the Panthers to minus 20 yards rushing on 30 attempts. Hillcrest did not make its initial first down until midway through the third period.

"Our defense was just great," White Coach Harold Hill said. "They've been improving every week, trying to get better and better with experience."

Bubba Hill ran up 246 yards on the ground and scored two touchdowns as

second-ranked La Porte blitzed Clear Creek, 47-0.

Running back Mike Klein scored from a yard out with 28 seconds left as Spring Klein, ranked seventh, tied No. 3 Conroe, 14-14. Klein advanced by virtue of its 14-12 lead in first downs after both squads finished even in penetrations.

In other contests involving topranked 4A teams, No. 1 Abilene Cooper stomped Midland, 35-0; fourthranked Temple ambushed Copperas Cove, 65-0; Converse Judson, ranked fifth, edged surprising Houston Strake Jesuit, 15-14; and No. 9 San Antonio Churchill outlasted Seguin, 9-0.

Tenth-rated Lubbock Monterey did not play.

Kerrville Tivy - ranked first in Class AAA - completed a perfect 20-0 season byedging Fredricksburg, 19-13.

**RUNNING BACK** Louis Landry scored three touchdowns and Kevin Evans added two more as No. 2 Beaumont Hebert rolled to a 35-14 win over Little Cypress-Mauriceville and a zone championship.

Hebert - the winner of 10 straight regular-season contests - now faces Crosby next weekend for a berth in a bi-district playoff game.

In other AAA tilts, third-ranked Huntsville blasted Tomball, 41-0; No. 4 Paris beat Atlanta, 35-18; fifth-rated

**Tennessee blisters Irish** 

Gregory-Portland steamrolled Rockport-Fulton, 52-0; and Lubbock Estacado, No. 6, downed Levelland, 34-6. Seventh-ranked Bay City won over Sweeny, 34-6; San Angelo Lake View,

No. 8, outclassed Sweetwater, 34-6; ninth-rated Brownwood blanked Stephenville, 38-0; and No. 10 San Antonio Madison embarrassed San Antonio Southside, 67-0.

Childress - the cream of the crop in Class AA - beat Electra, 33-3, while No. 2 Pittsburg edged Hughes Spring, 13-6.

Fourth-ranked Wylie outlasted previously unbeaten Allen, 17-9; No. 5 Hallettsville blanked eighth-rated Kenedy, 21-0, for a playoff spot; and Hays Consolidated, No. 6, fell to unranked Boerne, 24-14.

No. 7 Medina Valley downed Crystal City, 33-6; ninth-ranked Hondo whitewashed Devine, 35-0; and Barbers Hill, rated 10th, clipped Tarkington. 40-6.

THIRD-RANKED Breckenridge had the weekend off.

China Spring - ranked first in Class A - demolished outclassed Lorena, 96-0, for its ninth straight win of the season.

No. 2 Haskell tied unranked Quanah, 21-21; third-ranked Troup destroyed Overton, 68-0; fifth-rated Seagraves beat Stanton, 35-19; and Flatonia, No. 6, blanked Lexington, 24-0. Seventh-ranked Dilley creamed Sa-

## Soaring mortgage rates might hit 20 percent, **Clements tells newsmen**

#### By KEN HERMAN

AUSTIN, Texas (AP) - Gov. Bill Clements says he sees no reason for a special legislative session to look into increasing mortgage interest rates in the state.

Clements said Friday the mortgage crunch is a nationwide problem that cannot be solved in Austin. The governor told his weekly news conference that "experts" have told him mortgage rates nationally could hit 20 percent by the end of the year.

"It's a situation I don't think anyone has an answer for. Everyone is amazed and surprised and disappointed that interest rates have climbed to where they are today," he said.

Texas legislators recently removed the 10 percent interest limit in the state. Under new legislation a floating interest "cap" could go as high as 12 percent. Clements indicated 20 per-

cent interest rates would dry up mortgage money in the state.

"I don't know of anything we in Texas can do to alleviate this situation," Clements said, adding the spiraling interest rates are a "direct product of fiscal policies of the present administration.

Clements also told reporters the situation in Iran has reached crisis level and can only be solved by coolheaded negotiations.

"This is not a time to be beating our breast. We must leave this in the hands of the man we elected president," Clements said.

The governor was asked if his friend H. Ross Perot had any plans to enter the hostage situation. Perot, a Dallas electronics magnate, commissionend a commando raid to Iran earlier this year to rescue some of his employees there.

Clements said such a raid is not needed now

"This is not a time for heroics, believe me," Clements said.

The governor suggested that Iranians in Texas would be "best-served by being out of sight and out of mind.

He also said anti-Iranian demonstrations do not help the tense situation

"One provokes the other," Clements said.

In Dallas, Perot told reporters, "I am not making a statement as long as they're holding hostages in Iran."

On other matters discussed at the news conference, Clements:

-Announced the formation of "Texas 2,000." The committee will produce a long-range study of future needs in the state. It will be prepared by state officials, members of the academic community and private citizens.

-Said he was "gratified" by the results of last Tuesday's constitution-

#### Extra cash! Sell it in WANT ADS. Dial 682-6222

al amendment election. He said his opposition to a proposed amendment that would grant the legislature veto power over agency rules "made the difference between it carrying or not." The governor also announced he has asked all state agencies to conduct a review of their rules with an eye toward eliminating unecessary regulations.

SEC

-Refused to talk with Billie Fay Walker, a Houston woman who wants Clements to look into a state prison death. Clements told the woman she was not a member of the press corps and could not ask questions at the news conference. Mrs. Walker said Gus Feist of Beaumont was beaten to death on Oct. 23 by a prison official at a Brazoria County state prison. Mrs. Walker sat in the governor's office every day since Wednesday. David Dean, Clements' general counsel, said Brazoria County prosecutors are already investigating the death.

# ----A-little holiday magic

#### By WANDA MOUTON Lifestyle Editor

Capture a little of that holiday magic by wearing something special to the holiday parties that are beginning to appear on Midland's horizon.

The words for party-goers are soft, lean and sophisticated—especially in the shapely silhouettes.

It's difficult to choose in the wide range of clothing. There are dressy things to take one elegantly from luncheon dates through cockfail parties and more formal evening affairs.

Fashions are real standouts in shimmery, polished colors. The fabrics carry most of the mood in chiffons, silks, taffetas, satin knits, woven satins, and matte crepes.

Rich velvets are everywhere and capture the most elegant look for the holidays. The black dress has been redefined for dinner and dancing, and is the color most often stated.

Gold makes a big impact, whether as a total ensemble or in accessories.

All the fashions sparkle and shine, even pants in soft, easy shapes that pair well with heels.

Details for the winter include shoulder interest, achieved through draping, seaming or padding; and waist emphasis with belting. And don't forget the furs, in more fun types this season then ever. For unlimited glamour, anytime, anywhere, wear one over a party dress or evening pants. There's lots of new ideas in furs with a whole pack of old furs back new. Guests at the special showing of items from the Sakowitz 1979 Christmas catalog will have a chance to view the newest in holiday fashions, plus much more in displays of furs, fine jewelry, and clothing for men, women and children.

The event, "A Bit of Holiday Magic," is scheduled for Thursday from 7 p.m. to 10 p.m. in the Chapparal Center.

The affair is being held as a benefit for the City of Midland Swim Team and is being sponsored by the COM-MOMS, the team's Mother's Auxiliary.

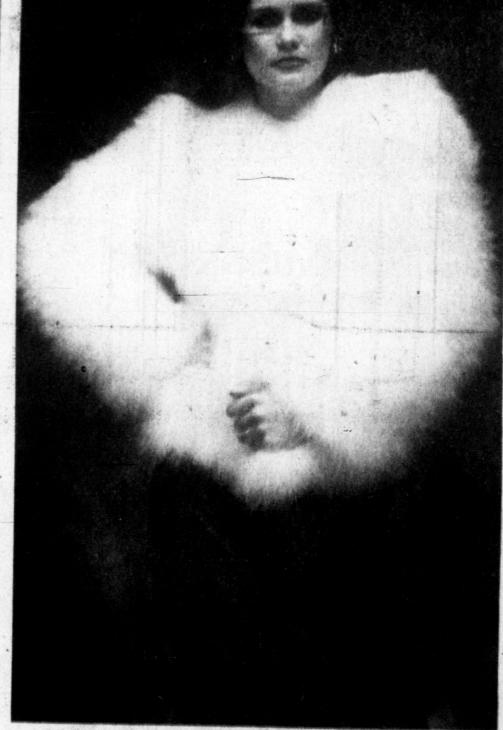

Attendance is by invitation only, but persons interested in attending should call Sue Reid at 684-7924 or Eleanor Morse at 683-2286 for reservations or information.

Events will include a fashion show and a cocktail buffet.

An entourage of 50 including a fur specialist, alterations specialist and jeweler from the Sakowitz store will be on hand for the event.

The catalog items range from a lush Russian sable fur coat at \$60,0000 to white cotton handkerchiefs for \$12.50. Designer fashions, precious jewelry, quality gift items and personalized articles fill the pages of the now-famous Sakowitz Christmas catalog.

General chairman of "Magic" is Eleanor Morse. Invitations chairman is Sue Reid. Food chairmen are Judy Dunbar and Hilda Freeman.

Holiday party dressing is fun with fashions from Sakowitz. Upper left: Provide dazzle in this black dress shot with metallic glitter. The body revealing style features a spaghetti strapped plunge neckline, a string belted elastic waist and side slit skirt. Upper right: One of the newest looks out after dark this season is the evening jumpsuit. Tie it on for holiday parties and other fun spots. Lower left: Victor Costa revitalizes Qiana nylon knit for cocktails, dinner, dancing. It starts with eye-catching eucalyptus sheen and goes on to caped sleeves, angled neckline and diagonal hip interest that provides plenty of movement. Lower right: Marabou is absolutely divine and provides a fantasy of feathers to float over anything evening, especially this long, lustrous red velvet. PAGE 2E

## Kids eat too much of the wrong things

NEW YORK (AP) - Many American children are malnourished not because they don't eat enough, but because they eat too many sugary, salty or fatty foods, nutrition experts say

A panel of nutritionists told the American Public Health Association recently that "overconsumption malnutrition" is a growing health problem as children substitute snack and processed foods for traditional food staples.

"Many of the causes of malnutrition we worried about a decade ago are no longer as serious as they used to be," said Johanna T. Dwyer, director of the Francis Stern Nutrition Clinic in Boston.

What we have now is a class of problems which we have never focused on because we haven't thought of them as nutrition problems," she said. Among these, she said, were obesity, high blood pressure and hardening of the arteries. Ms. Dwyer said surveys show that from 13 percent to 20 percent of American children aged six to 11 are overweight and from 6 percent to 24 percent have high blood cholesterol levels, with blacks having even higher levels than whites. A high cholesterol level is often an early warning sign of hardening of the arteries. The salt content of foods is thought to help cause high blood pressure, she noted, and many processed foods are high in salt.

The panelists said snacks, soft drinks and sweets account for most overconsumption malnutrition, but that staples like red meat and whole milk are coming under scrutiny for

their high fat contents. One reason children eat so poorly is the heavy influence of television advertising, said Dr. Luise Light, assistant to the administrator of the U.S. Agriculture Department's Human Nutrition Center.

The average child watches 25,000 commercials a year, she said, more than half of them for food products. One-tenth of the \$5 billion spent annually on food advertising is aimed directly at kids.

think?

"Children are particularly susceptible because they lack the maturity to consider commercials rationally. Have you ever met a child who didn't trust Ronald MacDonald or Tony the

experiment in producing TV commercials that will teach kids nutrition, Ms. Light said. But she said parents should start by controlling what kids eat at home.

#### Physical fitness being pushed as good business practice An increasing number of employers SYRACUSE, N.Y. (AP) - Business encourage fitness by creating in-

and industry, increasingly aware of the dollars and cents value of physical fitness, purchase more athletic equip-ment each year than all the high schools and colleges in the nation, says a Syracuse University fitness researcher.

Gary Shine, assistant professor of health, recreation and physical education, says research has proven that physically fit employees generally have better attitudes toward their, jobs, are more productive and have lower absentee rates.

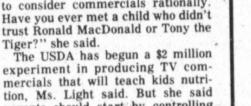

"Employees are most productive between the ages of 35 and 55 and an employee's death during that time span is extremely costly to industry,' Shine says. "Not only must a business rehire someone, but it must retrain and deal with the loss of contacts and experience. It's more sensible and productive for industry to get people involved in a fitness program to keep them healthy - and alive - during their prime working years."

house gymnasiums, sponsoring exercise and running programs and em-phasizing the benefits of physical fitness for their employees. In some cases employees are encouraged to use exercise facilities during the working day. In others, special before- and after-work hours give personnel a chance to exercise.

Some of the newly developed equipment undergoes testing at Syracuse University's Institute for Fitness Research, which designs programs for business and industry, screens youngsters for hypertension and studies the psychology and motivation affecting exercise.

The fitness institute makes use of specialists in physical education, nutrition, medicine, psychology, special education and engineering. In the human-performance laboratory, treadmills, stationary jogging apparatus, electrocardiograph machines, and other metabolic read-out devices.

other regions were awarded the cruise as winners in the "Excellence in Management Contest." The directors were recognized for their excellence in the areas of gross revenues, percentage payroll to earned income, percentage food cost to earned income, net earnings and merchandise sales...

### Personologist to address Newcomers

B.L. (Bruce) Vaughan of Carrollton, a personologist or "face reader", will present the program when the Midland Newcomers Club meets Thursday in the Fine Arts Building auditorium at Midland College.

Personology is a practice that claims facial features are the key to understanding an individual's personality - a practice that could be a businessman's dream come true.

Vaughan gives seminars and lectures on "Non-Verbal Communications," which combines the usage of four sciences: the study of physical body types; the study of gestures and body language and movements; the study of why we choose our clothes by color and style, and face language with all four dealing with their direct relationship to specific personality traits.

As a salesman for more than 20 years and an avowed people watcher, Vaughan became fascinated with the book "Face Language" written by Robert Whiteside of Burlingame, Calif.

A California attorney Edward Jones was one of the first to spawn modern-day personology in 1943. The reason? He was searching for a better way to select a predictable jury.

Vaughan completed a correspondence course at Whiteside's Interstate College of Personology in Burlingame and shucked his own Dallas business as a stereo manufacturer's representative.

He entered a new life in 1977 by traveling about the country seeking businessmen and others interested in learning personology.

Fort Worth police detectives vouched for him when he correctly nailed down several personality traits and occupation leads on the first Poly rapist.

Vaughan also has been linked to hypnosis and belief in reincarnation. Vaughan said how people wear their clothing also provides valuable clues to personality. "Men with their suit coats buttoned shows signs, of lacking confidence and they are trying to protect themselves.'

Registration for the meeting, open to the public, is 9:15 a.m. Thursday. For reservations, call 694-7428. The Open Mon.-Fri. 9 am-9 pm charge is \$1 perperson.

## Women, you just can't beat them

#### **By SANDI BREEDEN Lifestyle Writer**

PAGE 6E

Someone you know is an abused woman.

She will never tell you, however, because she is ashamed of it and because she feels she is the only abused woman in Midland.

In Texas, one out of every 41 women is abused.

During the month of October, the Midland Police Department answered 556 telephone disturbance calls, which includes domestic disturbance calls.

IN THE UNITED STATES during the first six months of 1979, 11 officers were killed responding to disturbance calls.

Some sort of crime is committed in this country every three seconds. According to the Federal Bureau of Investigation's 1979 statistics, a murder is committed ever 27 minutes. A forcible rape occurs every eight minutes and a robbery is committed every 76 seconds

An aggravated assault, which includes domestic disturbances, occurs ever 57 seconds.

Many of the offenders committing crimes are now in jail, prison or on probation. Not so with a person abusing his-her spouse, an overwhelming number who are men abusing their wives or girlfriends.

At least 483,000 women age 18 and

doors in March and, through organizational and private donations, has kept its doors open for these women who previously had nowhere else to

**ACCORDING TO SUE STEPHENS,** president of the Board of Directors of the center, this center is the only one of its kind between El Paso and Abilene and has had 130 women and children check in and out of the center in the last eight months.

Alhtough a man has yet to request shelter at the center, it is available to men also

With three bedrooms, living room, kitchen, dining room and one bathroom, the center is not roomy like a hotel, yet it serves its purpose

"The minute my foot hit the door, I felt free," said a battered wife who stayed at the center for two weeks. "I knew my husband couldn't come here and start in on me...I was free from his hitting on me," she said.

This woman has three children, who stayed with her at the center. She had no job or transportation. She also had no money.

Is this the typical woman who goes to this center?

"THERE IS NO TYPICAL abused wife," said Stephens. "Every one of them is different," she said.

This particular woman was staunch in her belief that she was through with being beaten when she first entered

"The minute my foot hit the door, I felt free," said one battered wife who stayed at the center for two weeks. "I knew my husband couldn't come here and start in on me...I was free from his hitting on me," she said.

over have been abused at some time by a spouse in Texas. Over 208,000 women have experienced abuse within the past 18 months, and 97,500 of these have experienced serious physical abuse within the past 18 months.

COMPARATIVELY, AT LEAST 88,-000 men in Texas age 18 and over have been abused by a spouse. No less than 37,000 have experienced abuse within the past 18 months, and 17,000 of these have experienced serious physical More adults than there are people in Midland - 87,000 - are subject to spouse abuse on at least a weekly

the center and said she would not allow it to happen again. She had been abused during nine years of her 10-year marriage "No one has the right to hit me for

any reason," she said. Shortly after going to the center,

however, her husband got in touch with her and asked to see the kids. divorce. While the kids were playing, he promised to guit hitting her and said that ter on a local television show, and he would go to a marriage counselor with her if she and the kids would back home "I guess I really love him," she said. "I'm going to give it one more try. But if he hits me just once more, I'll leave him for good. The only thing he'll see is my behind going out the door. And I told him this," she stated. According to Stephens, the majority of the women who go to this center return to their husbands, though this may not occur in every center throughout the United States.

the wives who are abused were ANOTHER BATTERED WIFE stayed at the center for a week. She, abused daughters. "The only thing the abused womanhowever, had transportation and, after coming to the center unemployed and homeless, left with a good

The Permian Basin Center for Battered Women and Children

has been open since March and has had 130 women and children

use its services. Sue Stephens, president of the board of directors

of the center, is shown counseling with a battered woman, one of

87,000 women abused weekly in Texas. Anyone needing the center

or wanting to donate clothing, food, money or paper items to the

center should call the hotline, 683-1300. (Staff Photo)

has going for her is the law," said Stephens. "But," she added, "she has to file for a divorce or file charges against the man she has lived with, loves and with whom she has usually had children.

"You can beat your neighbor and get more help legally," she said. According to Midland County Sherff Dallas Smith, law enforcement officers cannot get involved with a domestic disturbance unless the wife files charges. Otherwise, the domestic disturbance is under civil law. He said that law enforcement officers' hands are pretty well tied when it

to call for counseling and legal services

There are no professional counselors at the center, which is staffed only with volunteers who do not attempt to counsel their clients. They simply act as listeners, give information on services available and answer the hotline.

The center receives about 150 calls a month from battered women. All calls are carefully screened for husbands calling, husbands' friends or girlfriends calling and just generallyfor making sure the call is legitimate.

According to Stephens, it is not difficult to determine if the call is legitimate, "but sometimes human error does occur," she said.

THE CENTER ALSO HAS an answering service when volunteers are not available to answer the phone, and Stephens added that the answering service always knows how to get hold of her or another volunteer.

Should a husband discover where the center is and appear on the scene, the police are called, said Stephens. "This is one thing his wife has no control over," she said. "We must protect our other clients."

There are 25 volunteers working for the center now and, according to Stephens, more are always needed.

There are also eight members of the board of directors, including Stephens, Louise Cooper, Susan Farris, Ruby Freeman, Maxine Hannifin Karen Kalisek, Jo Love and Sherri Wright

Stephens said the reason the center is financed entirely through club and private donations is because "we would have had to hire another person to go through all the forms and red tape you must deal with when getting a state or federal grant."

THERE IS \$4,000 in the center's budget now, thanks to a grant from the First United Methodist Church's Global Missions. It takes \$10,000 for the center to operate for a year, said Stephens.

The center is always needing money donations, food, clothing and paper items. Anyone wishing to help may call the hotline number, 683 1300

Buying an eight bedroom house with four apartments in back and a huge backyard is the organization's main goal right now, besides providing services for the wifes and children currently at the center. The entire package would cost \$150,000 and two major companies in Midland have "almost" assured the center they will match monies received for the house, dollar to dollar, according to Ste-

phens. Any organization needing a speaker should also call the hotline. Any of the volunteers are willing to discuss the center and, in general, battered women.

## Why abused women keep quiet

Why is spouse abuse one of the most unreported crimes today?

Many times, the one being abused is afraid if they called the police, reporting the abuse would only cause more violence by upsetting the spouse, according to the survey research program done by the Criminal Justice Center at Sam Houston State University at Huntsville.

In talking with battered women, they feel as though no one else is an abused spouse. The abused woman has no respect for herself, her husband has usually convinced her she "deserves" to be beaten — she has provoked him to abuse her; she has no money nor a job; the children need a father; she and the children have no where to live; just about any excuse will, to the abused woman, justify her staying with a man who promised to love, honor and cherish her.

That one out of every 41 women is an abused woman in Texas is an astounding number. Only one third of those women are abused as the result of alcohol or drug abuse, according to By ABI VAN BU

basis statewide. Yet over 80 percent of spouse abuse cases in Texas go unreported, primarily due to fear of reprisal.

Approximately the same proportion of whites, blacks and Mexican-Americans have reported spouse abuse, and cases of spouse abuse are distributed across all income levels.

These figures were discovered during a survey research program conducted by the Criminal Justice Center at Sam Houston State University in Huntsville.

AND MIDLAND IS NOT separated from the state in the case of spouse abuse.

Spouse abuse centers are springing up over Texas and the rest of the United States to help these abused spouses.

In 1977, there were 20 spouse abuse centers in the United States. There are that many in Texas today

and one of them is located here. The Permian Basin Center for Bat-

tered Women and Children opened its

THERE IS NO TRANSPORTA-TION at the center and it is also often crowded, according to Stephens.

During September, there were 25 women and children staying at the center, which is actually a small home, at one time.

Many of the women do not work, but the center does help them find jobs.

Many of the women go back to their husbands because they do not want to admit they made a mistake when they got married, according to Stephens. They also may go back because he is the father of the children, because they hope against hope he will change and because they don't know what else to do, she said.

DEAR YOUNG: If you honestly feel that age doesn't entitle one to any special consideration (and a modicum of respect), you still have much to learn.

How Does One Clean A Chimney?

#### VERYCAREFULLY

Why does one clean a chimney? There are a number f reasons but mainly they get dirty. When chimneys tre dirty, the fire doesn't burn well. Dirty chimneys metimes emit offensive odors. When dirty the damper cannot close properly, which causes a loss of reat in the winter and air conditioning in the summer. And last but not least, when chimneys are dirty they sometimes catch on fire (which immediately causes an emergency and a disaster).

When should a chimney be cleaned? When it is not in use of course-you can't clean one with a fire in it. If you wish to be completely safe, have your chimney leaned after 3 to 31/2 cords of wood is burned in it.

#### THE BUTCHER

#### **By MERLE ELLIS**

This time of year, when the air is crisp and indications are everywhere that winter is just around the corner, people begin thinking about stocking up. Not all of us have to worry about getting snowed in for the winter, but there is something about the autumn air that makes many of us feel the need to prepare for hard days ahead - just in case. In the meat business, this is the season that sides of beef sell the

best. I have never been much of a proponent of buying carcass beef. There are a great many pitfalls for the average consumer in doing so. Not only must you be ever on the alert for the "bait and switch" bunco "boxed beef." artists who plague the business - particularly at this time of year - but you need to be aware of freezer buys in boxed yield grades and quality beef for some time now

and it has changed my grades and cutting losses and "hanging weight." attitude regarding buying beef for the freezer. You also have to like If there is the possibility all kinds of beef. How that you may be snowed many of you who bought in for part of the winter a side six months ago have spent the last two and want to fill your months shuffling soup bones and boiling beef from one corner of the freezer to another, hop-

There is a better way to buy a side of beef if buying beef in bulk makes you feel more comfortable with winter setting in. Buy a side of boxed beef. There is, it seems, a new trend

The Season Is Open

freezer, a side of boxed beef is worth checking The variety of cuts ing against hope that soavailable from any market that has a boxed beef mewhere there is a steak program in operation is almost endless. You don't have to buy soup bones and boiling beef if those cuts would end up

cluttering up your freezer. You can pick and choose, mix and match, and come up with a freezer full of meat that across the country in buying beef for home includes only those cuts that your family enjoys. freezers. "Swing" (carcass) beef is being re-The initial price per pound of a side of boxed placed by vacuum beef will be more than a packed subprimal portions shipped in a box

side of carcass — or "swinging beef," — but and called simply the cost of the meat that you end up putting on I have been collecting advertisements for your table is very apt to be considerably less. The major meat yield-

ing parts of a side of erage family freezer pounds. This is just the swinging beef are the round, loin rib and chuck. All the rest - the flank, plate, brisket and shanks - usually end up ground up into some rather expensive hamburger or cut up into those "what-will-I-do-

with-it" cuts that clutter your freezer when everything else has been eaten. With boxed beef it is possible to buy only those high yield cuts. They are even available with or without bones. The choice is up to you. Unless you have a large freezer, your best bet for a side of boxed

beef is probably a totally boneless side. There is little value in taking up freezer space with bones. You can usually find soup bones for a lot less whenever you need

them

might consist of: 1. A "3-piece boneless chuck" weighing approx- can be used for steaks or imately 75 pounds. From that could be cut chuck steaks, pot roasts, oven roasts from the shoulder clod, stew meat and/or ground chuck. 2. A "3-piece boneless

round," weighing about 55 pounds, consisting of a top round, bottom round and knuckle (sirloin tip) and providing more Swiss steaks and pot roasts from the bottom and steaks for the barbecue from the sir-tip and top round.

3. A "3-piece boneless loin" weighing about 35 pounds and all steaks; strip steaks, top sirloin steaks and tenderloin steaks or any combination of steaks and roasts. A "2-inch lip-on rib

A good mix for the av- eye" weighing about 12

What you will not have much of, and many heart of the beef rib and, want more of, is ground like the cuts of the loin, roasts. With that kind of a mix of boneless boxed beef, you end up with approximately 177 pounds of the best of a side of beef rather than a 325 plant. If you need extra pound side of swinging beef, 30 percent plus of which is bone and fat and ground a second time much of the rest you and packaged to meet your needs. wouldn't want anyway.

## Consider securing your home today

#### By PATSY GORDON Lifestyle Writer

Is securing your home something you should be seriously concerned about?

If you consider the facts and the newspaper headlines, you'll probably agree the answer is a definite "yes."

According to latest FBI statistics, 2 million burglaries are committed in residences annually, with an estimated loss of \$1 billion.

In Midland, up to September of this year, 313 residences have been burglarized, 659 thefts committed and 13 women raped.

Moreover, residential burglaries are on the rise. The incidence of burglaries in homes has risen 19 percent nationwide in the past five years.

And, according to a recent national survey of crime in major cities, a homeowner's chance of being burglarized is 1 in 11.

Prevention of these crimes takes the cooperation of both the police and the citizens of Midland.

Officer Tommy Wilkins of the Midland Police Department recently said, "The police are only as good as the citizens let us be. When we beg

"Since the Crime Prevention Unit of the Midland Police Department went into effect, only three homes that have been surveyed by the unit for maximum security have been burglarized. Two of these did not follow the suggestions made in the home survey."

#### Officer Tommy Wilkins

them to cooperate by reporting crimes and there is no response, this makes a police officer cynical."

People may think they are cautious, said Wilkins, but with the world as it is today, can citizens be sure?

Wilkins recently conducted a workshop on home security during Crime

Prevention Week here.

There are simple, inexpensive steps that can be taken to avoid becoming one of the above statistics. Crime experts say that if protective measures can delay a burglar for just four minutes, the intruder will give up and try another home.

The best measure, since all homes are different, is to contact the Crime-Prevention Unit of the Midland Police Department and request an officer to come to a dwelling, either home or apartment, for a home survey that will offer maximum security against an intruder.

Sgt. Lalo Camarillo and Officer Steve Otto will make this home survey and will answer any questions the homeowner or apartment dweller may have.

Another measure is the Neighborhood Watch program. This is a self-help program of total citizen participation and involvement in a battle against burglaries. Its primary purpose is protection of proper-

"It's also a good time for neighbors to become acquainted for the first " time or all-over again," said Wilkins.

Neighbors involved watch each other's homes and if they see an obvious invitation to a burglar, they correct it; such as an open garage door and an accumulation of newspapers, at the front door or on the lawn.

Participants in the program also are suspicious of persons never seen before. The unauthorized candy seller or the teenager selling newspaper and magazine subscriptions may use an unanswered doorbell as the opportunity to enter an unsecured home.

Or the person "taking a shortcut" through your backyard may have just broken into the neighbor's home.

Or that moving van may have not been ordered by your neighbor. Most residential burglaries, said Wilkins, "occur during the day."

"Citizens are fearful for their safety and don't establish friendships anymore," said Wilkins. "We don't have people calling in about neighbors homes being robbed."

Wouldn't it be much easier to stop crime in the Tall City with measures that wouldn't take too much time and effort than to let our city reach such a tragic situation?

Please call 683-4281, extension 338, the Crime Prevention Unit, and find out what you can do to help. It could be your property you save.

## Independent living sought for disabled

HARTFORD, Conn. (AP) — Louise Lundblad, backed by optimism and "sheer luck," has found her way out of the "Catch-22" situation that imprisons many handicapped people. Now she is trying to help others make the break.

For more than a year now, Ms. Lundblad, 30, who has been bound to a wheelchair since a swimming accident left her paralyzed 15 years ago, has been living on her own. She maintains her own apartment and gets herself to and from work.

"The one thing that I've learned about independent living is that it's really great," she said in a recent telephone interview. "It makes you feel very good about yourself."

Ms. Lundblad, who earned her bachelor's degree from Sacred Heart University where she majored in English, moved to Farmington in the summer of 1978 on a leave from Xerox Corp. in Stamford. She worked as production editor for the company's division on learning systems and lived with her parents in nearby Ridgefield.

For nearly a year she lobbied the

people living in a nursing home and who weren't working.

That meant that a disabled person who managed to get past the initial obstacles — finding a job, an accessible apartment and transportation spent nearly all earnings paying for non-medical personal care and assistance for things like dressing, bathing and house cleaning.

"It's expensive but not as expensive as keeping someone in an institution," she said, adding it allows the handicapped an alternative to nursing homes and other facilities.

Ms. Lundblad said she had run into problems, although not unexpectedly, trying to set up an adequate living situation but finally "landed with my feet on the ground."

She found an accessible apartment and a University of Hartford student who provides her with attendant care in exchange for room and board. Several years earlier Ms. Lundblad, who has no use of her legs and limited use of her- arms, had bought a van equipped with a hydraulic lift and hand controls.

Since passage of the bill, she has turned her attention to a project she

handicapped themselves and the seventh for attendant care. That would a allow the handicapped residents to pool their personal-care costs.

One of the main stumbling blocks so far has been finding a cluster of apartments that are accessible to the handicapped, a problem not just in Hartford.

"Most people feel the handicapped should have the same rights, but when it means putting the money

## Sapotes grow with orange trees

## Their Sunday feast consists of fried ants and grasshoppers

PARKERSBURG, W.Va. (AP) -Anyone who gets the heebie-jeebies over things like fried ants and chocolate-covered grasshoppers probably wouldn't want to know what Edelene-Wood and her friends cook up for their gourmet spreads.

A newcomer to one of their Sunday afternoon feasts could unwittingly end up with a mound of rattlesnake salad on his plate.

What may appear to be an ordinary hamburger patty could be fried possom sausage

And get your bearings: For dessert, you could wind up swallowing a slice fearthworm cake. It could be bathed in carmel or chocolate icing.

'We don't encourage the amateur who has never tried anything like this to eat any of these far-out things," says Miss Wood, who gives her age as "past 50." But for a growing number of West Virginians and others across the country, wild food dishes are a connoisseur's delight.

"It definitely is a growing thing," Miss Wood, a clerk for Monongahela Power Co., says. "Back in the '60s,

someone told me it was like the hulahoop and our interest would fade in a year.'

Such has not been the case. Just the other day, the Parkersburg woman traveled to Roanoke Island, off Cape Hatteras, N.C., where she organized a "Wild Foods Weekend" for 75.

The gathering spent the day ferreting out roots, plants, game and seafood.

At dinner, they sat down to eat 14 wild ducks, a wild goose, yellow tuna salad, steamed oysters, wild grape chiffon pie, sauteed eel, yucca flowerblossom salad and batter-fried squid. And that hardly put a dent in the menu

Nature abounds with such fare, Miss Wood says. And depending on the season, and where you are, you can have an almost endless variety if you're not squeamish about the bounty of the wilds and know what you're eating.

'Most of the people who eat wild food don't do it because they think it is cleaner or better for you," she says. "They do it because they are intrigued with the idea of using the fruits of things that normally go to waste and doing something with them."

down to North Bend State Park for his first Nature Wonder Weekend, he called West Virginia "the garden spot of the nation for wild-food gathering," Miss Wood recalls.

In a brochure she compiled several years ago for the state Department of Natural Resources, she lists more than 50 of the best-known wild foods in West Virginia. But there are hundreds more to be gleaned from the wilds.

During time away from her job at the power company, Miss Wood teaches adult education classes in Parkersburg on wild foods. She also travels about the country lecturing on the subject or acting as a "wild food consultant" for groups organizing pilgrimages into the wilds.

She says she never thought it would turn into anything like it has.

It all began in 1967 when she began teaching classes for adults on plant identification. When she began bringing her classes home to demonstrate the culinary uses of the plants, she says that's when her students really became interested.

It's been 12 years since she began. And to this day, she says she still packs them in for her one-of-a-kind feasts

### Rare medal might

#### prove important

BALTIMORE (AP) — If speculation surrounding a rare Spanish medal becomes, fact, Jamestown, Va., might lose some of its status and the Pilgrims could prove to be latecomers.

Don Stewart, director of the Five Fathom Lightship Museum in Ocean City, Md., found a commemorative papal medal buried in sand on Maryland's Assateague Island. Stewart said the medal was minted in 1572 in Spain to honor Pope Gregory XIII.

He said the discovery could have a "significant impact" on history because it could confirm that Spaniards visited the Maryland-Virginia coast years before the English established Jamestown in 1607.

## The word is moderation in your food and drink

By TOM HOGE AP Wine and Food Writer Good health has become the slogan in America, where millions of men and women get up

at the crack of dawn to start the day off jog-This salute to fitness has also made Americans conscious of their

waistlines, and a call has gone out for moderation in eating and drinking. Restaurant owners tell me the three-martini lunch is becoming obsolete as sales of expensive, imported mineral waters soar. Alcohol is still consumed, of course, but on a much smaller scale.

This trend toward moderation has received support from an unlikely but knowledgeable source. Gerard Sturm, globe-trotting representative of France's cognac industry, brought up the subject on a recent visit to New York when he learned that 80,-000 runners had applied for a place in Manhattan's 26-mile marathon classic.

Jogging, Sturm commented, has pointed up the distinction between taste and thirst, and given new status to the world's oldest beverage, water.

Sturm agreed that heavy drinking has no place in today's highspeed, precision-minded world, whether in the factory or on the high-

way. He hastened to add, however, that he was advocating moderation, not total abstention. In fact,

he said, medical re-4 egg yolks 6 ounces heavy cream search shows that as a Lay shrimps on board rule moderate drinkers and split down back live longer than teetotalwithout cutting through.

Asked what he meant Melt butter in skillet, add shrimp and saute over by moderation, Sturm said about two drinks a medium heat about 5 miday - which equals nutes till they are pink. about three ounces of Season with salt, pepper distilled spirits or five and nutmeg. ## **Central Y offers** physical fitness

Up Highway Loop 568...down Big Spring Street and across rural roads...on stadium tracks and at YMCAs, Midlanders are running - or if not running, they are walking, jogging and playing.

Yet, despite this explosion of interest in physical pursuits, many Americans - possibly a majority of Americans - are not physically fit, according to Pat Owens, physical director at Central YMCA.

"Unfortunately, this lack of fitness can contribute to more serious health problems," Owens said. "That's why the Midland YMCA is putting a major emphasis on physical fitness programs in an all out effort to get more Americans in shape and help them stay that way.'

Citing the sedentary lifestyle of many Americans, Owens indicated that many people just don't get as much exercise as they need for good health.

"Even those who do exercise sometimes go about it the wrong way," he said. "People hear that running, jogging or some other form of exercise is good for you, so they just start doing it. Actually, a visit to the doctor should be the first step. Then they should learn the right way to run, jog or shapeup for their favorite game.

In order to introduce new people to fitness, Owens will conduct a beginning exercise class for adult men and women beginning Monday. The class will meet each Monday, Wednesday and Friday evening from 5:15 to 5:45 through Dec. 7 at the Central Y.

This special four-week course will include infor-mation on proper workout clothing, how to exercise, different types of exercise, nutrition, cardiac risk factors and components of physical fitness. The workouts will start at a low-level and gradually increase in intensity.

The class is offered to Central Y members for no charge and will be available to others for \$12. Participants may enroll for one of the intermediate level classes after finishing this introductory course.

To register or for more information on how you can shape up, contact the Central Y office at 682-2551.

NEWCOMER'S CCR By MARILYN NER DYER

The kids in our neighborhood are neat. They say "Hello" and are polite and I find that to be refreshing (and a credit to their parents.)

We have lived in some metropolitan suburbs where they either look at you as if you're a "looney" when you say "hello," or they practically run off in terror, remembering they are not to talk to strangers.

Here, I even had a teenage boy say "hello" while walking down the side-walk between two cute gals, and that was totally unexpected!

One little boy out catching locusts under the tree in his front yard offered to share his handful of the critters with me. When I graciously declined, he asked me if I was "chicken", and I assured him I was. A little girl walking down the alley with a shoebox full of treasures was amazed that I knew her name. It was printed on the box in two-inch letters. She was very loquacious and I received a lengthy dissertation on all the happenings at their house that week. Another little boy with wet hair and a sunburned nose was amazed that I knew he had just come from swimming.

One afternoon a group of kids were playing a front lawn version of softball, and I heard one boy say to another, "Quit acting like an Aggie." I've sure never heard that in any other state!

While reading on the patio one morning, I heard hushed voices at the gate, and saw three little heads poking around the corner, whispering to one another. After several tries, they finally got the courage to ask if they could retrieve their cat from our shrubbery. They extricated a long haired, white cat and then went back for the dead sparrow which belonged to the cat. They apologized for bother-ing me and quietly left.

On a Saturday morning, my husband was having his coffee and paper on the patio, and two boys came into the back yard, apologizing that their Frisbee had landed on our turf. Herb told them to wait a second and he'd get it down for them, so he took the ladder from the garage, lifted it onto his shoulder to go through the gate. and one leg of it went through the dow. The boys hadn't garage win

## to give program on holiday foods

The Midland Country Club Ladies Association will present Mary Faulk Koock in a program on "Holiday Foods" Friday.

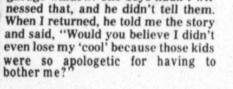

Mrs. Koock, with her husband Chester, founded the well-known restaurant, "Green Pastures," in her family's historic home in Austin. Mrs. Koock is vice president in charge of public relations for the Bank of Austin and heads the newly-organized de-partment of Social Service for Women.

Before joining the bank, she was food editor for a Sunday magazine and is the author of three best-selling cookbooks. She was recently featured in "Texas Woman" magazine as one of the three most successful women in Texas who has created and developed a business from her own ingenuity.

Social hour is at 11:30 a.m., with lunch scheduled for noon. The program will follow lunch. Members should call the club at 682-4378 for reservations.

Every once in awhile you get a warm feeling that there may be hope for the human race after all.

ENERGY OIL & GAS

PAGE 1G

## **Dresser** acquires **Cardinal Chemical**

Cardinal Chemical, Inc., has been acquired by Dresser Industries of Dallas, according to an announcement by Dresser chairman and President John V. James.

Cardinal Chemical serves the Permian Basin, Texas Panhandle, Southeastern New Mexico and North Central Oklahoma with oil well fracturing and acidizing services. Also acquired was an affiliated company, Cardinal Products, Inc., which markets production and other oilfield chemicals. Cardinal employs 245 people.

Terms of the acquisition were not announced.

· Cardinal Chemical has facilities in Odessa, Midland, Sonora, Snyder, Levelland and Perryton, and in Enid and Oklahoma City, Okla. All will remain operational.

Cardinal Products operates in Odessa, Borger, Kilgore, Pampa, Snyder and Victoria; in Hobbs, N.M.; Kingfisher, Okla. and in Great Bend and Plainville, Kan.

Cardinal Chemical and Cardinal Products will operate as Dresser subsidiaries and as part of Dresser Oilfield Products Group headquartered in Houston. Cardinal Chemical will operate as part of the Titan Division,

Gas men to hear Smith

The Natural Gas Men of the Permian Basin will meet Tuesday in the Midland Country Club. The meeting will get under way at

12 noon. The speaker will be D. Lamar Smith of Houston, executive vice president of Gas Supply, Operations and Engineering of United Gas Pipe Line Co. and senior vice president of United Energy Resources.

Smith His subject will be "Producer-Purchaser Relations Under the NGPA.

Before joining United Gas, Smith was wityh Tennessee GAs Pipe Line as planning associate, and prior to that he was with Mobil Oil Corp. as with Cardinal Products functioning as part of the Di-Chem operations of Dresser's Magcabar Division.

James D. McLaughlin of Midland president of Cardinal Chemical, will become a consultant to W.B. Corser, president of Dresser Ti'an. Earl Davis, Cardinal Chemical vice-president is appointed area manager, Cardinal Chemical - West Texas, and reports to Corser. All other Cardinal management personnel who formerly reported to McLaughlin now report to Davis and continue in their current responsibilities. Bill Haggermeier is currently the general manager of Cardinal Products.

James said, "This acquisition will enable Dresser Titan to provide well stimulation services in West Texas and Southeastern New Mexico, important areas not previously served by Titan, while Cardinal Products will strengthen the Di-Chem operations of the Magcobar Division.

Other Dresser Oilfield Products Divisions serving the petroleum industry are Security, Ideco, Guiberson, Swaco and Dresser Atlas.

Dresser Industries is a diversified, multinational corporation, employing over 55,000 worldwide.

### Workshop scheduled

DALLAS - The Southwestern Legal Foundation will hold its first workshop on oil and gas conservation practice Nov. 29-30 at the Fairmont, Hotel in Dallas.

Sessions will be from 9 a.m. to 12 noon and from 1:30 to 4:30 p.m. each day.

Sponsored by the International-Oil and Gas Educational Center of the foundation, this workshop's aim is to acquaint lawyers and nonlawyers with general principles of administrative law as those principles apply to the main types of oil and gas conservation problems in Texas, Louisiana and Oklahoma.

Chairman of the workshop is Frank Douglass, a partner in the Austin firm of Scott, Douglass & Keeton.

#### Discovery

H. W. Shaw

### Dorchester names Shaw

H. W. Shaw has been named vice president - Production for Dorches-

ter Exploration, Inc., in Midland. He replaces Dale O. Chase who was transferred to New Orleans, La., where he will open a new office for the company.

Shaw is the administrator of all Dorchester drilling and production operations.

He joined Dorchester after working 29 years with Jake L. Hamon. Since 1959, he has been Hamon's drilling and production superintendent for Texas, Oklahoma, New Mexico and the Rocky Mountains. Shaw is a graduate of The Universi-

ty of Texas wity a B.S. degree in Petroleum Engineering.

## Uncertainty of foreign oil creates U.S. guessing game

#### By MAX B. SKELTON **AP Oil Writer**

HOUSTON (AP) - W.F. Martin says uncertainty over supplies of foreign crude oil is creating guessing games. Martin, chairman of Phillips Petro-

leum Co., says conservation is the answer to such uncertainty for the immediate future "Gasoline shortages are now be-

coming an everyday prediction," Martin said "In early October it was predicted

long lines would be reappearing by the end of the month. A few days later. there were reports a gasoline shortage was possible next spring. And just a few weeks ago the Department of Energy and the Central Intelligence Agency agreed that gasoline lines would reappear in the early 1980s." Martin said the predictions were being made despite inventories being

higher than a year ago. "Behind the predictions is a con-

cern about the supply of crude oil," he said. "The United States now depends on foreign countries for roughly half of its oil. Several countries are now changing their oil exporting policies, or at least talking about changing

them. As a result, he said, there is growing uncertainty about how much oil will be available in the United States in coming months.

"Mexico, a country the United States was looking to as a potential large supplier of crude oil, recently agreed to sell a substantial quantity of its oil earmarked for export to

France," Martin said. The likely result of this arrangement, he added, is less crude oil available for export to the United States.

"Nigeria, which supplies Phillips with around 16 percent of the crude oil needed for its U.S. refineries, has announced the amount of oil it will export to a particular country depends on how much foreign aid and technical assistance it receives from that country," Martin said. "Libya, the world's eighth largest

producer of crude oil, has notified its oil company customers that some of its oil previously scheduled to be sold under contracts will instead be used for making government-to-govern-

down and higher prices have reduced our oil requirements by 5 percent below a year ago.'

Martin said the question is, "Can we keep our oil consumption in balance with available crude supplies?" "To a large extent, it depends on

how willingly we conserve our avail-able energy," he said.,

"As we learned in the past, many small measures, when combined, can bring about large energy savings.'

As examples, Martin said wider use of car pooling by itself could reduce imported oil requirements as much as 3 percent a year, and, similarly, lowering home thermostats by three degrees in the winter could bring

## Production

### under way

HOUSTON - Houston Oil & Minerals Corp. announced that production from its Cavallo field commenced on October 12.

The field is located in 70 feet of water 10 miles offshore in Texas state waters (Matagorda Island Area Block 526-L, Southwest 1/4).

The 1,290 acre block was acquired by the company in the state lease sale held Oct: 5, 1976. Houston Oil & Minerals Corp. owns a 100 percent intrest in the lease.

A six-pile production platform and two adjacent four-pile platforms are installed. Production facilities currently will accommodate 100 million cubic feet of gas per day; however, platform space is available to increase the daily capacity to 200 million cubic feet of gas per day, as needed.

Four wells are currently producing gas and condensate from Miocene sands ranging from 7,000 to 9,200 feet true vertical depth. The combined daily flow rate is currently 57 million cubic feet of gas and 400 barrels of condensate from the four wells, at approximate flowing tubing pressure of 2,800 psi.

Production is transported by Seagull Pipeline Corp., a wholly-owned subsidiary of Houston Oil & Minerals through its newly-constructed 16mile, 16-inch gas and 6-inch conden-

about a 2 percent reduction in energy use. And, he said, reducing highway driving speeds to 50 miles an hour would mean a 1 percent reduction.

balance a berer and a construction

Martin said there undoubtedly will be more predictions of gasoline shortages and as long as the nation is so dependent on others for so much of its energy there will always be uncertainty about fuel supplies.

"For the immediate future, we need to balance our needs with available-crude supplies through conservation," he said.

"For the long term, we need to reduce our dependence on others by developing the various energy resources we have available right here in our own country."

#### **Ronald A. Butterworth Butterworth** in new post

Pennzoil Co. announces the promotion of Ronald A. Butterworth to exploration manager of the Midland District, Western Division.

His previous position was Marine Division geophysicist with the company in Houston. He now is responsible for exploration activities in the Midland District. The district covers north Arkansas, Oklahoma, West Texas and south New Mexico.

attorney and gas contract negotiator He also was with Texas Crude Co. as general counsel.

He received his B.S. degree from Texas A&M Univiersity, and his LL.B. degree from Southern Methodist University.

### Application approved

AUSTIN - The Railroad Commission has approved an application of a Crockett County operator to sell natural gas produced on state-owned lands for ultimate out-of-state consumption. Texas statute requires such authorization.

The application of another Crockett County producer to sell gas interstate was denied during this week's conference on Oil and Gas Division matters.

J.M. Huber Corp. of Houston won authorization to sell gas from a onewell lease in Section 12, Block B-39 (Ellenburger) Field to El Paso Natural Gas Co. The well has reserves estimated at two billion cubic feet of gas daily deliverability of 1.5 million cubic feet, according to the Huber application.

The application of International Oil & Gas Corp. to sell gas from Sections 2 and 3, Block 33, University Lands survey in the Perner Ranch (Devonian and Waddell), and Wildcat (Lower Wolfcamp) fields to Delhi Gas Pipeline Corp. was denied. The operator proposed to sell gas from two wells with total calculated absolute open flow of 5.2 million cubic feet of gas per day and estimted reserves of 2.68 billion cubic feet of gas.

El Paso Natural Gas offered the maximum legal price of \$2.10 per million Btu under the new gas provision of the federal Natural Gas Policy Act.

## Seismic crews show increase

TULSA, Okla. - The number of seismic land crews and marine vessels searching for oil and gas in the United States and U.S. waters continued to increase during October.

The the month's total, 436, represents a net increase of four land crews over the previous month.

According to the Society of Exploration Geophysicists, the October total is an increase of 103 crews and vessels in the past two years.

The October count represents an increase of 1 percent over September, a 17 percent increase of October 1978, a 32 percent increase over October 1977, a 63 percent increase over October 1976, a 62 percent hike over October 1975 and a gain of 36 percent over October 1974.

### announced

DENVER, Colo. - Forest Oil Corp., as operator, reported a gas discovery in Webb County, Texas. Its No. 1 Vaquillas Ranch has been completed as a gas well in the Lobo sand sequence.

The well was driled to 10,728 feet. The pay zone was perforated at intervals between 9,777 and 9,804 feet. During the production test, the well flowed at a rate of 2.7 million cubic feet of gas and seven barrels of condensate per day through a 9/64-inch opening.

Forest owns 1,933 net leasehold acres in a total land position of 5,799 acres within the prospect area. The well is expected to commence production during December.

Forest Oil owns a 66.7 percent working interest before payout and a 331/3 percent working interest after payout in this discovery well. Strata Energy Inc. owns the remaining working interest before payout and after payout will own a 16.67 percent working interest, and Conoco Inc. will own a 50 percent working interest.

### **DOE** awards two contracts

BARTLESVILLE, Okla. - The Department of Energy has announced the awarding of two contracts involving oil industry activities.

Geochem Research, Inc., of Houston was awarded a \$217,000 contract by DOE's Energy Technology Center in Bartlesville to improve residual oil saturation determination methods. Residual oil saturation is a term

which describes the amount of oil remaining in producing formations arter primary and secondary recovery techniques - natural pressure, pumping, waterfloodin - have recovered as much oil as practical.

In typical formations, primary and secondary recovery remove only about one-third of the oil that originally was in place.

R. J. Heemstra, Bartlesville Energy Technogy Center research chemist and DOE's technical manager for the contract, says Geochem Research will work to develop a rapid and accuate method for determining partition coefficients of chemical tracers used in the single-well tracer method.

DOE awared a \$49,871 contract to M. D. Wood, Inc., of Palo Alto, Calif., to analyze the subsurface flow characteristics in an enhanced oil recovery pilot project near Nowata, Okla.

The miceller flooding project was designed and is being evaluated by engineers and scientists at the Bartlesville Energy Technology Center.

M.D. Wood, Inc., is investigating specific problems which may limit the project's success, according to Rex D. Thomas, BETC petroleum engineer and technical manager for the contract.

**Jim Goudie** 

### **PBGS** slates Goudie talk

Jim Goudie of Midland will present a talk and slide program Tuesday at the monthly meeting of the Permian Basin Geophysical Society in the Midland Hilton.

The program will begin at 6 p.m. with a social hour, followed by dinner and the talk at 7 p.m.

Members are invited to bring their spouses.

Goudie's topic will be "Trip Down the Colorado River Rapids - Geology and Scenery.

The speaker is employed by HNG Oil Co., with responsibility for exploration activities in Oklahoma, the Pandle and North Texas. He is a graduate of the University of Missouri with a B.A. degree in English. He earned a B.S. degree in Geology at the University of Kansas.

Goudie worked for Sun Oil Co. from 1951 to 1973, with assignments in Midland, Gainesville, Dallas, Amarillo and Tyler. He was with Oil Development Co. in Amarillo in 1973-75, and from June 1975 to June 1976 he was with Mellon Creek Exploration in Midland. He has been with HNG since that time.

Reservations should be made by noon Monday by contacting 683-2281.

## Engineers slate meeting

ODESSA - Ted M. Geffen, research consultant, Amoco Production Co., will address the Permian Basin Section of the So-

ciety of Petroleum **Engineers of AIME** at 6:30 p.m. Tuesday at the Odessa Country Club. Giffet's topic will be "Moscow, Western Siberia Oil

Fields." His talk deals with his experiences during a visit to the USSR to Geffen attend a technical symposium in Tyumen, Western Si-

beria. Geffen, a native of Alberta, Canada, received a B.S. degree in Petroleum Engineering at the University of Oklahoma. He joined Amoco in 1946

and was named research consultant in 1976. He has been listed in American Men of Science, Engineers of Distinction, and Who's Who in Science & Indus-

try.

ment oil deals.

Like Mexico and Nigeria, Martin said, Libya will likely use its oil to enhance its bargaining power with other countries.

In his "As I See It" report to Phillips employees and retirees, Martin said it perhaps is even more important that Saudi Arabia has threatened to reduce the amount of oil it produces by 1 million barrels a day.

"Such a move could greatly affect the United States, since we rely on Saudi Arabia for 1.1 million barrels a day, or roughly 7 percent of our total needs," he said.

On top of this, Martin added, Algeria has let it be known it will cut the amount of crude it exports because it plans to refine the oil in its new refinery.

"Any one of these actions, or a combination of them, could adversely affect the United States," he said. "Right now our crude oil demand

and supply are delicately balanced. because the current economic slow-

The Piper Tomahawk symbolizes the exhilaration experienced by flying a light aircraft. The all-metal, bubble-canopied, twoplace, two-door Tomahawk is available through Hank's Flite Center, phone 563-1192.

## Fancies of flight made reality by Hank's Flite

When it comes to flying, Hank's Flite Center, Inc., just about covers it. At Hank's you can: learn to fly, up-grade your current rating, go to ground school, take Private and Commercial flight tests, buy new or used airplanes, rent aircraft. Now, as well, all written examinations are given at Hank's

The FAA has designated Hank as a Written Test Examiner, as well as an FAA Flight Test Examiner.

There is a fee for the testing service. The advantage to the public in the area is the ability to take the test evenings and weekends, and a reduction in travel for persons living outside the Lubbock vicinity. To make an appointment for the written test, just call Hank's Flite Center at 563-1192.

January 12 and 13, 19 and 20 will cover the new Private Pilot Ground School...only two week-ends! This is the best, most comprehensive course to prepare you for the written test. Plan ahead! Call for early enrollment, 563-1191. A tentative date for the Instrument Ground School will be January 26 and 27, February 2 and 3....also only two weekends.

Pepe Ruiz presides over the bar at Monterrey Cocina Mexicana, 1501 N. Big Spring St. In the foreground are glasses prepared for Margaritas, specialty of the house, but Pepe invites you, case. to order any cocktail, and chances are he can reach back into his experience and mix it for you. Behind Pepe is his assistant, Andres Ramirez.

## Relax — enjoy Monterrey dining

Since Monterrey Cocina Mexicana was established here by Manuel and Feliz Veloz in 1953, it has grown steadily as an institution enjoyed by Midlanders old and new.

George Veloz, son of the originators, and his wife Gloria are the present owners of the Cocina. The restaurant has moved from the old location on Illinois Street to a new place at 1501 N. Big Spring

Many of the restaurant's clientele regretted the loss of the old, small location which was so familiar and cozy. But, the new one on Big Spring is fast becoming familiar and provides comfort and a spacious attractiveness of its own, and the same lovely, warm, Latin hospitality is offered there, too. It is fast becoming a cherished tradition in its own right

The menu has been changed slightly, with some additions having been made. There are several steaks available now. There are some children's plates for those under eleven.

The Cocina is open now seven days a week. Plan now for a pleasant meal for the whole family at the Monterrey Cocina Mexicana. The Veloz' and their people will give you a nice welcome.

## **CARDINAL CHEMICAL IS MAKING A NEW NAME FOR ITSELF** AND IS NOW OPERATING AS A PART OF DRESSER TITAN.

Cardinal Chemical has built up quite a name during the past thirty years. We've become one of the leading well-treating companies in the Permian Basin, the Texas Panhandle and Oklahoma. How could we possibly improve?

By joining Dresser Industries, Inc., where we now operate as Dresser Titan.

What will this acquisition mean to customers of Cardinal Chemical?

It'll mean you'll still be dealing with the same Cardinal people, offering the same services, products and equipment.

The main difference is you'll enjoy the additional resources of Dresser Titan, with well-treating services available throughout Texas, the mid-continent and Canada.

Operating as a part of Dresser Titan, we're still answering to customers who always expect the best from Cardinal.

Dresser Titan Division, Dresser Industries, Inc., P.O. Box 6504, Houston, Texas 77005, Phone: 713/972-6011

#### By LINDA GRANT The Los Angeles Times

Vast underground seas of crude oil have long bestowed leverage on the countries that possess them. As the postwar industrial world's dependence on oil pushed demand sky high, producing nations began to exact not only soaring prices but other favors as well.

planes, tanks and guns in pursuit of a dream of Middle East supremacy. Today the Suadi Arabians are bartering for legitimization of the Palestine Liberation Organization.

Mexico - the newest member of the Oil Riches Club — is setting a different style, however. Since its security is not threatened from without, it has no need to wheel and deal on the international political scene or to Rather, Mexico's sta bility is dependent on defusing some of its potentially explosive economic and social problems. To that end, President Jose Lopez Portillo says he will "sow the petroleum." Lopez Portillo intends to accomplish this goal not only by investing oil income to strengthen the Mexican economy, but also by getting international assistance in attacking some of his country's most crushing problems: poverty, unemployment, shortage of capital. To achieve this goal, Mexico is diversifying foreign trade away from its traditionally heavy dependence on the United States. A parade of international heads of state to Mexico City has made it obvious to Mexico that it can wield petroleum power to bargain for the best technology, the cheapest capital, and the most favorble trade terms anywhere in the world. Seminar scheduled in Odessa

**ODESSA** — The Permian Basin Chapter of the American Society of Safety Engineers will sponsor a seminar — "Safety Expo '79" — Tuesday in the Holiday Inn Holidome.

The seminar also is being sponsored by the Texas Safety Association.

The seminar is designed for persons interested in accident prevention in industy, school systems, municipalities, agribusiness and other areas.

Fee for the seminar is \$25 which includes the noon luncheon. The seminar will include displays of safety

equipment. All persons interested in accident prevention are invited to attend the seminar.

The seminar schedule is as follows:

Registration and exhibits visits, 7:30 a.m. to 8:15 a.m.

Welcome and opening remarks, 9:15 to 8:30 a.m.

"The Confined Space Standard," with the speaker from the Occupational Safety & Health office in Dallas, 8:30 to 9:20 a.m.

"Hygiene Made Easy," Richard DeLuca, Industrial Hygiene, Shell Oil Co., San Romon, Calif., 9:30 to 10:15 a.m. Break and exhibit visit, 10: 15 to 10: 45 a.m. "The How To's of Respiratory Protection Selection," Dick Flynn, manager of the Respiratory Protection Division, American Optical Co., Southbridge, Mass., 10:45 to 11:30 a.m. Lunch, 11:45 a.m. to

12:30 p.m. "A Loss Control Program as Seen by an Oil Well Service Company,' Roland W. Gay, manager of Safety, Halliburton, Duncan, Okla., 12:45 to

1:30 p.m. 'The API's Recommended Practices for Safety for Oil and Gas Well Drilling and Service Operations," William Snead, safety representative, Pool Company Willingston, N.D., 1:40 to 2:30 p.m. Break and exhibit visit, 2:30 to 2:45 p.m. "The Oil Patch Security Problem," Al Mit-

WANT ADS reduce selling costs, boost selling power. 682-6222

#### ON-LINE SERVICES OFFERED BY COMPUTER SYSTEMS COMPANY

On-line computer services for independent oil operators, accounting firms, and health care facilities are provided by Techtronic Data System (TDS).

'Our on-line services are unique'', says President R. D. Parris. "We can place a low cost video terminal and printer in a client's office and give them immediate access to comprehensive specialized business application programs and virtually unlimited computing power. This gives the client the ability to try out data processing services in his operation without first committing to a large capital expenditure. The same programs offered on our on-line service can be run on smaller in-house systems that we can install in the client's office.'

TDS has an extensive library of programs for the independent oil producer that handles all areas of joint operations, general accounting, land records, and lease history. The TDS systems provide the ability to stay on top of the blizzard of paperwork and reporting requirements imposed on the independent producer.

In the medical area, TDS has twelve years experience. The smaller medical practices send their work to TDS. TDS processess the work, mails statements, and sends management reports back to the doctor. For the larger practices and clinics, TDS installs on-line terminals or complete in-house systems. The TDS medical systems improve collections, make the office operate more efficiently, and make the doctor more profit.

TDS also provides services and systems to accounting firms. "We have the programs that provide the accountant the flexibility he needs," states Sales Manager Ed Barnes. "With our services, the CPA can handle his small write-up clients and can also handle complete accounts receivable, payroll and payables services for a very large client, all on the same system."

TDS facilities are located at 3610 West Wall Street, in the Miller Oil Building. TDS currently has thirteen employees consisting of sales, marketing support, data entry prsonnel.TDS has installed a Digital Equipment Corporation computing system capable of servicing fifty remote terminals for time-sharing clients. TDS also has a sales office in

opening its high-priority development projects to bidding by oil-thirsty foreign governments, Mexico obviously figures to win the best deals.

All this sets the stage for an abrupt departure from Mexico's historic dependence on the U.S. market. For decades, the United States has been Mexico's overwhelmingly dominant trade partner, taking roughly 70 percent of all Mexican exports and providing about 55 percent of the nation's total imports last year. Last year U.S.

companies purchased more than 85 percent of the crude Mexico had available for export.

Now, however, Mexico has a new strategy. A few weeks ago the nation's Energy Commission announced that it intends to cut back the percentage of oil exported to the United States from 85 percent to about 60 percent in the future. not mean That do

construction of a new station in Eunice, with work to be completed in December The new facility will be

on Highway 176, two blocks wet of the Eunice Hospital. The 3,000square-foot building will house operations offices, crew room, dispatcher, supply room and a shop for company auto and truck repair.

The new station will replace leased facilities and accommodate the 10 double-derrick rigs and the 45 Eunice employees of DA&S.

For a quick response to your flying needs CALL 915 683-5051 States will receive fewer barrels, because total Mexican crude exports are growing. Mexico is currently projecting that exports will grow from 780,000 barrels a day in 1979 to 1.3 million barrels a day in 1980. If it meets that ambitious target, total U.S. imports of Mexican crude should

grow from today's 660,000 barrels a day to about 780,000 barrels a day next year. To dispose of the remaining 40 per-

cent, Mexico has concluded a series of intriguing government-to-government deals. Over the summer it

agreed to supply 160,000 barrels a day tö Spain next year, 100,000 barrels a day to Canada, France, and Japan, 45,000 to Israel, and 20,000 to Brazil. After a strenuous summer of bargaining, Japan emerged with an agreement to buy 100,000 barrels of oil a day for 10 years beginning in 1980

E. D. Bolinger

### Inn names Bolinger

Innkeeping Management and Consultants, Inc., of Fort Worth, announces the appointment of E.D. "Gino" Bolinger as general manager of the Best Western Hall of Fame in Midland

Bolinger moved to Midland after extensive experience in the hotel, food and beverage industry with Ramada Inns and Holiday Inns in the southern California area, and more recently with The Inn Best Western in Farmington, N.M.

Bolinger received his formal education at Indiana University and the University of California at Los Angeles.

In addition to serving as general manger of rhe Hall of Fame, Bolinger will be active in preparations for the grand opening of the Basin Club Lounge the last week of this month.

## Lines appeal is rejected

DENVER (AP) - An appeal aimed at preserving three major train passenger lines has been rejected by a federal appeals court which upheld the right of Congress to reorganize the nation's Amtrak passenger service

The effort by Kansas and Minnesota and the city of Nashville, Tenn., to keep three Amtrak passenger trains running was turned down Friday by the 10th U.S. Circuit Court of Appeals.

The decision scuttled efforts to retain passenger service on the Lone Star between Chicago and Houston, the Floridian between Chicago and

## Buyers increase their debt burden by record amount

#### By KRISTIN GOFF **AP Business Writer**

NEW YORK (AP) - Some economists see the latest figures on consumer debt as a classic example of the buy-in-advance psychology which has developed as inflation became more permanently fixed in the U.S. economy.

Even though recession forecasts were widely publicized, the public increased its debt burden by a record amount in September, according to a government report released this past week

Consumer installment debt -- for such things as auto and personal loans, and credit card purchases -

BUSINESS

jumped a record \$4.45 billion during the month. At the end of the month, the total due amounted to \$303.90 billion, or 15 percent more than a year earlier

The September debt total represented both a 3.8 percent increase from the previous month in new credit taken out and the same percentage decrease from August in the rate of repayments and other liquidations of already existing loans.

For the entire third quarter, which ended in September, consumer credit grew at an annual rate of 13 percent, the Federal Reserve reported.

Not very many years ago, the response of consumers to an oncoming recession was to reduce their debt, increase their savings and build up a "nest egg" for the expected hard times ahead.

But the persistence of high inflation has apparently convinced many conborrowing, in order to avoid higher prices later.

Although the latest consumer credit figures were more than a month old when they were reported this past week, they represented something of a surprising trend to economists who had been predicting a slowdown in buying.

"Sometime earlier this year we believed consumers had pretty much reached a peak - that they couldn't handle any significant amount of fur-ther debt," said Allan McKinnon, senior vice president of Merrill Lynch Economics Inc.

But the lure of bargains - particu- New York's largest, 25.79 million the week larly auto rebates - and some catch- chose not to do so was before. up buying from earlier shopping de-

economists partly because shifts in population and the work force make historical comparisons difficult.

taken on too much debt is debated by

McKinnon, doesn't foresee any significant" problems developing in the near future. He notes, for instance, that shifts in population have gradually resulted in a larger proportion of people in their 30s, an age group which traditionally borrows more heavily than other age groups.

Total consumer debt as a percentage of personal income is now running around 15 percent, up from about 11 percent in the mid-1960s and around 13 percent through the 1973-75 recess-

At Data Resources, Davies suggests that in light of its prediction of a recession next year, there may be reason for creditors to be wary for signs of growing delinquencies.

There has already been some indication of concern, according to the American Collectors Association, a group which represents collection agencies. Trends in the first half of the year indicate that retailers, doctors and others are sending in overdue bills to collection agencies more quickly than they did in the past, although there has not been a dramat--

ic increase in dollar amounts out for collection, after adjustment for inflation

In other business developments this past week

-Retail sales fell 1.7 percent in October, the largest monthly decline since March 1975. The Commerce Department reported that sales last month totaled \$75.45 billion. Slowing sales of automobiles was listed as a major factor in the drop from September's sales of \$76.75 billion. In March, 1975 sales fell 1.9 percent.

-The nation's major banks raised their prime lending rates 1/4 point to a record 151/2 percent despite criticism by Rep. Henry Reuss, D-Wis., chairman of the House Banking Committee. He said the increase did not show the restraint banks could use to reduce the chance of a serious recession. The prime rate is the rate charged by banks to their most credit-worthy corporate borrowers, and is not directly related to consumer and mortage loan rates.

-The Home Savings and Loan of Los Angeles, the nation's largest savings and loan association, cut its prime mortgage rate from 13 percent to 12% percent to "let people know we have money to lend.

ment has okayed it," she said, "or we wouldn't have

### Former slave center tourist attraction

GOREE, Senegal (AP) - Plastic bottles, dirf-twood and assorted trash clutter the tiny rocky beach from which thousands of Africans began the harrowing journey into slavery in the Western Hemi-

The beach, only a few feet wide at high tide, is reached through a small door in the foot-thick walls of the House of Slaves, the warehouse-like building where captives from throughout West Africa were assembled for shipment between 1536 and 1848.

Today the house is a tourist attraction, and urchins jostle each other to guide visitors through the 8-by 8-foot sand-floored cells where their ancestors were once jammed while waiting for the westward-bound slave ships.

Located about three miles off the West African coast, just off Dakar, the capital of Senegal, Goree was settled by the Portuguese, the Dutch and the French in rapid succession during the 16th century, and became a slave trading center in 1536 when slavers realized the island's escape-proof charac-

There are no exact figures on how many African men, women and children passed through the Slave House and similar buildings before abolition of the trade in 1848, and before the last shipment of "African immigrant workers" in 1862.

Jo Indiaye, a veteran of World War II combat in Asia who serves as curator for the House of Slaves, claims that 20 million passed through the island, and that more than 100,000 were sent across the ocean in 1845-1846. However, these figures do not stand up to scrutiny when compared with the list of slave-ship sailings displayed in the building.

The list shows an average of two ships per month in the 19th century, carrying between 300 and 400 slaves apiece.

Whatever the exact number, the House of Slaves and its surrounding buildings are being maintained as symbols of the cancer of slavery, and are obligatory stops for dignitaries visiting Senegal.

Former Secretary of State Henry Kissinger called it a "moving and sad experience," according to a sign over the building's main gate.

The seaward door of the Slave House bears another sign, in French: "Through this door they went, on a voyage without return, their eyes fixed on the infinity of suffering."

Elsewhere on Goree, which is reached by a 20-mi-nute launch trip from Dakar, tourists climb over the ruins of Mame Coumba Castle, perched on a rocky hillside commanding a breathtaking view of Dakar as well as the main shipping route along the coast of West Africa. During World War II the island's massive coastal

guns - two of which still rust in the blazing sun helped keep the sea lanes open to Allied shipping. Later the fort was used to film "The Guns of Navarrone," and the rusting remnants of some of the film's incredibly small props still dot the hillside. Near the jetty where the tourist launch docks, the

20th century collides with the carefully preserved historic setting, as hawkers pour deep-fried pastries and other goodies into paper cones made out of computer printouts.

## Veterans Day '79

Now that Veterans Day has returned to its traditional November 11 observance date, all Americans today can join in a ationwide salute to all veterans of the United States of America.

Hopefully, Old Glory will be flying from the housetops of many, many homes in the Tall City both today and Monday.

The observance, of course, stems from Armistice Day, which commemorated the signing of the armistice ending World War I on Nov. 11, 1918. It officially received its name in 1926 and became a national holiday by act of Congress in 1938.

President Eisenhower, in 1954, signed into law a bill which renamed Nov. 11 as Veterans Day, an occasion to honor the veterans of all wars in which the United States has been involved.

There was a time, a few years back, when Veterans Day somehow got tangled up in the "long holiday weekend" legislation, which changed the date to the fourth Monday in October. The change was not at all popular and the situation was remedied by Congress, effective last year. The Texas Legislature was out in front of the Congress, having changed the date back to Nov. 11 in 1975. But regardless of all this, Veterans Day remains one of the nation's most significant, most patriotic and most meaningful na-

tional holidays. It most certainly is fitting that Americans should pause on this annual occasion to honor all the

men and women who have served in the uniform of the United States of America.

The Texas (American) Legion News puts it this way: "The day not only honors the war dead, but also reminds us of the horrors of war." Hopefully there will be no World War III.

On this Veterans Day morning, the Legion News article continues, "some people may pause between 11:00 and 11:02 to pay respects to the men and women who paid the supreme sacrifice to keep America free. Others may just forget."

There is something about Veterans Day which brings out the spirit of patriotism among most citizens of this great and free land. And there is nothing wrong with a proud display of patriotism today and every day.

Let us also on this day pay tribute not only to the veterans of all past wars but also to those persons serving in today's armed forces at home and abroad.

Servicemen's organizations here and across the land are joining with others in sponsoring and staging appropriate events commemorating the occasion.

Let's make this a particularly memorable occasion by flying our flags and by taking time out for serious reflection on the true meaning of the observance as we salute our veterans for the tremendous contributions they have made through the years in gaining and preserving the freedom of this great nation

WASHINGTON MERRY-GO-ROUND

## **ART BUCHWALD** Chomp, chomp, chomp as pseudomonas dine on oil

WASHINGTON - The Supreme Court agreed last week to decide whether you can patent a new life form created by man in a laboratory. It goes under the name of genetic engineering. One of the cases has to do with a scientist at General Electric who made a bacterium in the lab and called it Pseudomonas. The bacterium is capable of eating oil spills by breaking down the molecular structure of petroleum as it floats on the ocean

I am not concerned whether you can patent Pseudomonas or not. What worries me is that the bacterium exists at all.

As with so many things scientists come up with, it sounds great in a test tube. Everyone hates oil spills, and if you can have hungry organisms feasting on the stuff it solves that problem

But what happens after the bacteri-um eats up all the oil that is spilled? In a few days the Pseudomonas will start getting hungry again and going after oil that is being drilled up from the ocean floor. It will start chomping away at any fuel it can get its teeth in, and it's not inconceivable that as billions of them work their way through an oil field there will be

nothing left to pump up but salt water.

Chomp, chomp, chomp - and there go all the reserves in the North Sea. Chomp, chomp, chomp - and it's goodby to the oil in the Gulf of Mexico. Chomp, chomp, chomp - and you can kiss the petroleum off the coast of California goodby.

The Pseudomonas can't tell the difference between oil spilled from a tanker and oil on the ocean floor. All it knows is that if it wants to survive, it has to eat. And one lousy tanker spill will not feed a family of bacteria very

If this isn't enough to make you nervous, what happens when the bacteria start clinging to the shoes of someone working on an oil rig? There is a big turnover in men who work on oceangoing rigs. After a while they long to drill on land. Suppose the rigger moves to Texas and wears the same shoes in the Panhandle. The bacteria will immediately start going down the well and chomp, chomp, chomp - it's arrivederci to Texas oil.

I know that someone will argue that the Pseudomonas won't eat oil unless it's mixed with salt water. But bacteria are very adaptable organisms, and if they can't swill their petroleum with salt water they'll take it straight.

Once the Pseudomonas gets into our domestic oil it's a short step for it to the refinery and then into your home heating tank. Chomp, chomp, chomp - and half the oil that cost you 90 cents a gallon will be digested by bacteria before its gets to your furnace.

I may be unfair to the Pseudomonas, or the man who created it. For all I know the bacterium may get its fill of oil spills and then die. But genetic engineering is a dangerous game, and when you start creating bacteria in a test tube you have no idea what they're going to feast on.

Today it may just chomp on tar balls off Cape Cod, but tomorrow it might decide that sweet oil tasted better. When it does it's shalom to Saudi Arabia.

#### **By JACK ANDERSON**

WASHINGTON - Jimmy Carter has received the first year's report card on his wage-and-price guidelines; he got an "A" for effort but flunked the course.

We've had access to the report card which was presented to Carter in the form of a confidential memo, dated Oct. 23, from his wage-and-price chief Alfred Kahn. The affable Kahn is quick with a quip, but he's telling fewer jokes and laughing less these days.

In the memo, Kahn reports on the 12-month operation of the voluntary guidelines. He tries delicately not to award Carter a dunce cap, but there's no disguising the low grades. The economy is faltering; inflation is

Kahn's controls, as compared with only 200,000 who benefited more than the government advocated. One administration source told our associate Tony Capaccio that "labor took it in

'A' for effort; course flunked

the neck last year.' This slight success, Kahn has said, is "nothing to write home about." Administration sources and other economists have told us that if labor pushes for higher wages next year to make up the lost ground caused by gasoline, heating oil and food increases, this could cause double-digit inflation to last well into the 1980s.

The average factory worker and his wife trying to make ends meet saw their energy costs shoot up 48 percent, and they're blaming the gouge as much, if not more, on U.S. refineries as on the Arab oil potentates

inflation may be reduced to futile quacking.

Meanwhile, for the average American consumer, the prospect is almost equally bleak. The year 1980 is shaping up as a time for joblessness, belt-tightening and economic distress

The predicted Carter recession has yet to hit home with full impact and administration sources have confided that they are surprised at just how strong the economy has been.

Economists say that in recent months the buying public has been overspending on many goods for fear that inflation will continue to soar. The average shopper has developed a panicky buy-it-now-before-the-pricesgo-up psychology.

## **Robert L. Pendleton**

Midland and West Texas lost another top banker and civic leader in the death early last week of Robert L. "Bob" Pendleton, president of Commercial Bank & Trust Co. since 1959.

He had served the Tall City and the region so well and in so many ways, and so willingly, during his Midland residence that he will be sorely missed by many individuals and groups in all walks of life.

A friend who had worked closely with Bob Pendleton on numerous community projects said of him, "When you called on Bob to do something, and he accepted the assignment, you could count on it being done promptly and satisfactorily." He was that sort of a

person, dependable all the way. He did so many things and was active in so many organizations working for the betterment of the community, it is impossible to list them all. His work with and for the Midland Chamber of Commerce, West Texas Chamber of Commerce, Midland Memorial Hospital, Midland Industrial Foundation, Red Cross, Junior Achievement, Rotary Club, First Baptist Church, Petroluem Club, City of Midland, and on and on particularly are significant. He had been named "Boss of the Year" by both the Jaycees and the Midland Chapter of the National Secretaries Association. Bob Pendleton was a top Mid-

lander.

#### rocketing; a recession almost surely lies ahead

The administration set guidelines that were intended to keep wages and prices from rising above 7 percent. Instead, inflation is soaring at an annual rate of 13 percent - exactly double the ceiling that Carter tried in vain to nail down.

The Kahn report blames the high costs of energy, food and homes for catapulting the inflation rate over the moon. Without these increases, the report suggests, prices would merely have gone up 7.5 percent, an undramatic one percentage point above the previous year.

But if Carter has failed to hold down prices, he has been more successful at restraining wages. This has caught America's working families in a costof-living squeeze. And every dollar they lose in purchasing power could be a vote he'll lose in the 1980 primaries.

In 1978, hourly wages plus fringe benefits increased about 8.3 percent. During the 12 months of the Carter guidelines, they averaged only 7.9 percent. Contracts covering 1.5 million workers were in compliance with guideline ceilings in the first year of

Here's how Big Oil marked up its refinery margins in this country: 10 percent higher between January and March; 15 percent between March and June; 37 percent in the three months ending in September. That amounts to a 100 percent margin mark-up in the first nine months of 1979.

According to internal White House estimates, only 35 percent of the cost of gasoline and other petroleum products can be attributed to OPEC price hikes. Kahn told Congress that "so far as we can tell at this time, we cannot reconcile the assertion by the major oil refiners that they are complying with our voluntary price standards. Kahn and Carter will try to persuade workers in the oil, chemical and atomic industries to keep faith with guidelines early in 1980. Later in the year will come major contract negotiations with communication, construction and aluminum industries.

Carter advisers are cautious about his chances of keeping the lid on wage settlements. A few early defeats at the hands of Sen. Ted Kennedy, D-Mass., may render him a White House lame duck. So by next April or May, Carter's rhetorical war of words on

that if the wage guidelines are ignored next year, businesses will jack up prices to keep up with the wage increases. This could replace excessive consumer spending, as the main inflation area bugaboo.

Then Carter's next report card will be even worse.

## Mark Russell says

I kept switching back and forth between the CBS interview, "Teddy,' and the NBC movie, "MacArthur." Just as MacArthur was wading ashore in the Philippines, I turned the dial and there was Teddy doing the same thing.

The oil companies say they put their profits right back into the ground - perhaps in a vault in Switzerland.

It's just not your day when you succeed in getting rid of a \$2 bill, only to receive a Susan B. Anthony dollar in change.

Even though Mayor Jane Byrne has switched to Kennedy, President Carter will continue to spend federal money in Chicago - for a test site for the MX missile.

### NICK THIMMESCH Body politic has become overheated; U.S. looks foolish

WASHINGTON - The fuss over the so-called defection of Dick Clark from the ranks of Carterdom to the Kennedy Restoration only illustrates how overheated the body politic has become, and how foolish we look in carrying out the real business of government.

As the world's leading power - it says here - the United States is looked to for leadership in performing various tasks, one being the important work of assisting the growing legions of desperate refugees. Accordingly, we had in our employ at \$57,500 per year, Dick Clark, the former U.S. senator from Iowa, as Special Ambassador for Refugee Affairs.

There is no such ambassador now. even in the middle of the Cambodian refugee crisis, because of presidential politics. Thus the government is poorly served and so are the refugees.

Clark, who resigned last week to become Kennedy's National Campaign Director for Political Organization, claims he would still be in the refugee post if only Vice President Walter Mondale had not asked him to play a political role for Carter at the Iowa Democrats' Jefferson-Jackson Day Dinner Nov. 3.

When Mondale asked this favor of Clark on Oct. 4, Clark told him that his loyalty to Kennedy precluded such involvement for Carter. Mondale then said it would be difficult for the President to understand his response and might expect him to resign. But Mondale added that he would talk to Carter about it.

After an overseas trip, Clark saw Mondale Oct. 15 and was told the President didn't like his neutrality but would accept it. Clark said he would stay but reserved the right to change his mind.

That he did after Kennedy offered him his present job several days later. Clark talked to his wife and friends about the offer and accepted at Kennedy's house Oct. 28.

Clark quotes Press Secretary Jody Powell as saying Carter looked at his desk on the morning of Oct. 30 and saw, side by side, news pictures of dying children in Cambodia and Clark's letter of resignation. Consequently, Carter's handwritten note to Clark, which followed, reflected resentment.

"I regret the way the White House reacted," Clark says now. "I resent this being called a defection." Clark is right on the latter. If his political heart belonged to Kennedy all along. he wasn't defecting.

Now Mondale, given the Carter vs. Kennedy battle, seems destined to become one of history's greatest political compromisers. He is an old personal and political friend of Clark and

of many other Democratic liberals. He feels for them,, but he insists there is no ideological or policy issue strong enough to justify the Kennedy candidacy, one he thinks will sorely wound his party.

The thickening political vapors here cloud the facts that it was wrong, for the country's sake, for Carter to have Mondale approach Clark about the Iowa dinner; wrong for Kennedy to solicit Clark, knowing he was in the important refugee job, and wrong for Clark to accept once he had Mondale's assurance Carter would tolerate neutralism. But politics can override reason.

It is unlikely that Clark's presence at that Iowa Democratic dinner would have increased the straw vote (which Carter won) because Carter fans had bought most of the tickets. It was vain of the Cartermen to think Clark could ever be won over from Kennedy anyway. And the political pluses and minuses for Carter and Kennedy in this affair probably cancel each other out.

The loser, it seems to me, is the U.S. government in its role of assisting refugees. Clark now explains that it was Secretary of State Cyrus Vance who came to him last December and asked him to take the refugee post, though Clark told him he had no expertise with refugees. Clark said he told Vance that once he had accomplished the goals of a refugee program, he wanted a better and more suitable job, and that Vance assured him he would get one.

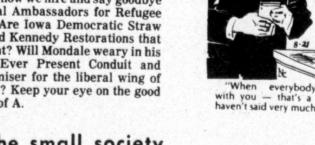

Clark maintains that by establish-

ing a new Office of Refugee Programs and consolidating efforts scattered through the government, and by other good works, he has accomplished the goals he and Vance discussed last January.

"I don't say for a moment that there isn't a big job to be done yet on refugees," Clark says. "But I am confident that I am not the only person in America to do it.

I wonder what the rest of the world thinks of how we hire and say goodbye to Special Ambassadors for Refugee Affairs. Are Iowa Democratic Straw Votes and Kennedy Restorations that important? Will Mondale weary in his task of Ever Present Conduit and Compromiser for the liberal wing of his party? Keep your eye on the good

Democratic Executive Committee are reportedly incensed over scheduling of SDEC meetings to coincide with

AUSTIN - For Texas Democrats, visits of the first family to Texas. party unity is a goal pursued like the That happened Oct. 29, when Rosa-Holy Grail was sought by medieval lynn Carter was in Houston for a knights - with much earnest discusfundraiser - and it apparently will sion, good intentions and great hope, happen again Dec. 8, when the presibut with only brief, fleeting glimpses dent is expected to be in Austin for a fundraiser (in conjunction with his And like the medieval questors, planned four-day nationwide an-Texas Democrats frequently turn nouncement tour). aside for interludes of smiting fellow

That latter meeting choice is particularly upsetting to the Kennedyites, since there is a possibility the senator will be in San Antonio that day, at a celebration (Our Lady of Guadalupe) featuring Archbishop Patrick Flores. Kennedy supporters reportedly asked State Party Chairman Billy

ing one another hip-and-thigh. Kennedy supporters on the State Goldberg to invite Kennedy to speak

Political in-fighting: It's the name of the game for Texas Democrats to the SDEC at the Dec. 8 meeting with Goldberg vetoing the request. At the present, Carter appears to retain the support of a majority of the SDEC, with former party head Calvin Guest saying 34 of the 64 members are 'solidly" for Carter, with 12 for Ken-

nedy and the other 18 neutral. Other assessments put the number for Kennedy - at least at some future date - higher, and Carter's support lower.

Some more indications on that may come this spring, when the SDEC is expected to vote on putting a nonbinding presidential preference primary on the ballot — a plan which was rejected earlier on the premise it would be better to wait and see if there would be a contest for the presidential nomination

Kennedy and Carter supporters alike will be keeping tabs on the SDEC and its committees, especially as the time nears for selection of delegates to the national convention. While that anticipated "straw vote" won't have any legal affect on selection of delegates, it's conceded by party officials that a strong showing by any presidential candidate would be hard to ignore in the choosing of delegates — and supporters of those candidates won't be hesitant to use. the results of that vote to their advantage

THE MIDLAND REPORTER-TELEGRAM, SUN., NOV. 11, 1979

Both Kennedy and Carter supporters are putting considerable efort already into local organization; Kennedy backers rallied in Austin over the weekend to set up communications and to coordinate efforts

among the various "draft Kennedy" committees throughout Texas. So far, there's been little showing of organized support (or much support organized or unorganized) for California Gov. Jerry Brown.

Brown has made several stops in Texas recently, attempting to overcome the general perception of him as an offbeat, hippy-ish liberal.

Some Texas liberals had been eyeing Brown - despite his talk about really being a conservative - but Kennedy's entry into the race appears to have relegated him to an also-ran spot, even before he has a chance to run.

Meanwhile, Carter supporters announced a "steering committee" composed of a wide spectrum of Texas Democrats, including various about party unity.

oilmen, legislators, local officials, bankers and minority group members.

PAGE 11G

Kennedy supporters anticipate gathering the majority of the minorities, with some Carter backers conceding that's likely to be the case.

Others, however, argue Carter can point to the selection of a number of minority group members for various posts - so that Kennedy isn't automatically assured of the black and Mexican-American vote in Texas.

In any event, skirmishing is well under way, and quite a few blows will be exchanged before 1980 is over.

And then, whoever the winner of the Democratic nomination turns out to be, Texas Democrats (or at least most of them) will start talking again

**Austin Bureau** 

It appears that great tradition of

practical political in-fighting will be

continuing in 1980, with supporters of

President Jimmy Carter and chal-

lenger Sen. Edward Kennedy smash-

There is a political force in this country that you hear very little about. They don't do a lot of public stunts, and create a lot of noise and publicity, but when election time comes, and they go to the polls and cast their ballots in accordance with the dictates of their conscience.

They are not swayed by all the promises and excuses that are broadcast over the nation

This silent majority demonstrated their power in the recent school bond election, and I predict the power will be demonstrated again in choosing the Democratic candidate for president. It is difficult to persuade the voting public to forget all the unfavorable and tragic publicity in one's life, plus the attitude that (I guess I would accept the nomination if you voters insist).

I further predict that some day the silent majority will demand and get some action on the Midland College buildings that no one seems to have the power to control what they are used for. Thanks to the county commissioners, they can say NO.

C.W. Mason 1203 College St.

#### 'Fishy' pricing

To The Editor:

A modest comment on the intelligence of those who manage a certain chain of supermarkets, or on that of those who patronize those stores: Aggressively promoted prices in Midland for deli fried fish are \$2.39 for 8 pieces and \$4.39 for 12 pieces. (sub-

tract 20 cents per order in San Angelo, as the chain assumes all Midlanders are at least 20 cents more affluent than San Angeloans.) I have no doubt there are those who would blindly

do doubt the management which would repeatedly run this obviously mis-priced "special." I don't think they rate our IQ very highly, but then their claim that 8 pieces "feeds 2 or 3 persons" but 12 feeds "a family of 5" doesn't speak very highly of their brainpower, either. Perhaps the owners have employed a Carpenter who can feed "2 or 3" more persons on

> Joe Hathaway Midland

The government's attempt to impose a "windfall profits" tax is deeply disturbing to us. The proposed meatax in the classic sense. Fundamentally, the proposal is for an excise tax on crude oil to skim revenues into the

The proposal would tax away 60 cents of each dollar resulting from 'decontrol." The remaining 40 cents would be subject to the normal corporate, personal, severance and other taxes. The ultimate result would be that the federal government would collect, roughly 80 percent of the revenue resulting from "decontrol." while industry received 100 percent of the blame for higher prices and inadequate additions to reserves.

In truth, the tax is aimed at penalizing the industry that has provided this country with the cheapest energy of any country in the world. A contindependent upon the ability of this industry to meet the rapidly increasing cost of high-risk ventures. The proposed tax will only limit the funds

available to meet this challenge. The amount of drilling is directly related to a company's income. Increased revenues will result in more drilling, more oil, more natural gas, and less dependence on foreign governments with the ultimate result being a more stable future for all Americans.

The oil industry has been shackled by government for too long. The proposed "windfall profits" tax will simply further restrict the oil companies from doing what they do best - finding oil. The oil industry is a vital part of our nation's economy, and we need people who are willing to accept a strong and vocal role in "setting the record straight" and defeating the 'windfall profits'' tax proposal.

### Sponge it up

Instead of wasting your time attending rallies in support of excessive profits, why don't you Midlanders use your expertise to develop a sponge capable of soaking up oil slicks as effectively as oil companies asborb

federal handouts?

Mr. and Mrs. Daniel D. Tompkins 3704 29th St. Lubbock, Texas 79410

#### A zone of life

#### To The Editor:

I am appalled at the driving situation of the people here in Midland, especially in SCHOOL ZONES. Please, please obey these zones and slow down. My children and yours will some day appreciate this life-saving duty. I know also that some of these zones are not clearly marked. Let's get this tended to, Midland. And now, DRIVERS, when are we going to obey the other traffic rules and signs and slow down? My goodness please have patience. Maybe we should all read and study our driving manuals once a week and practice our "FRIENDLY" driving. I know you folks can read. I have one question, "Where is everyone going in such a big hurry, in Midland??"

Don Moore Midland No minor problem

To The Editor:

The column by Charley Reese, which appeared in your paper on November 5, has prompted me to reply to his statement "Discrimination based on sex is a minor problem distorted to major proportions with slights imagined where none exist and statistics juggled to satisfy prejuexistence. But we find this education of sympathy is not only ignored in schools but is severely repressed.

From our very childhood habits are formed and knowledge is imparted in such a manner that our life is weaned away from nature and our mind and the world are set in opposition from the beginning of our days. Thus, the greatest of educations for which we came prepared is neglected and we are made to lose our world to find a bagful of information instead. We rob the child of his earth to teach him geography, of language to teach him grammer. His hunger is for Epic, but he is supplied with chronicles of facts and dates. He is born into the human world, but is banished into a world of living gramophones, to explate for the original sin of being born in ignorance. Child nature protests against such calamity with all of its power of suffering, subdued at last into silence by punishment.

> **Doris Fly** Midland

#### A stolen bike To The Editor:

During the week of October 22nd, my son was ill with pneumonia. He was in bed for several days when we noticed that someone had come onto our patio and stole my son's bicycle. It was a terrible thing to have to tell my son while he was lying in bed sick. A witness told us that it was a couple of boys walking home after school (junior high size) that took the bicycle.

My son worked every day after school at his father's shop to pay for that bike. He is nine years old. Wouldn't a parent know if their kid or kids brought home a strange bike? We are in hopes that some parent will finally notice their kid has a 22-inch, 5-speed blue and chrome Schwinn bicycle that looks well taken care of, that does not belong to their child. If so my son is desperately wanting it back. There was also an orange fastback bike that was taken, my son kept it for his friends to ride who did not have a bike. Now my son has no bicycle at all. Mrs. H.T. Beason 4500 W. Cuthbert St.

### Pen pals wanted

To The Editor:

I am a teacher of high school in Seoul, Korea. My pupils are very eager to find pen friends in your country. I am writing this in the hope that you can help them get in touch with young people in your country. They would like to exchange information about student life and various kinds of topics in everyday life and to discuss current international problems.

I think this kind of direct communication between friends of about the same age will help both to learn about each other's country. It will also help my students to brush up their English. I also think they might have fun in swapping items in their hobby collections.

I hope you can perhaps publish my name and address in your esteemed paper. Then we will axiously await letters from your country. Thank you very much for your time and kind consideration.

> Mr. Yoonsuk Suh C.P.O. Box 3834 Seoul, Korea

#### An education...

To The Editor: Any comment I may have wanted to make just seemed to fade away after reading the following article taken from "A Tagore Reader," edited by Amiya Chakravarty, Beacon Press (c) McMillian Co. 1961. Perhaps when we have this kind of education we will care more for each other and better understand the real needs of our children.

We have come to this world to accept it not merely to know it. We may become powerful by knowledge, but we attain fullness by sympathy. The highest education is that which does not merely give us information but makes our life in harmony with all

Note of thanks To The Editor:

Recently our home burned to the ground, leaving us with only the clothes on our backs. Being at the retirement age and facing a "starting over" position was quite a weight on our minds. Then, due to the help from the news media, miracles began to happen.

Along came the people of Midland; from friends, fellow workers and total strangers came money, clothing, household goods, etc. Because of this, many items we thought would have to be replaced are no longer needed.

But above the material things, the lift to our spirits helped us get through the initial shock.

How do you thank people who have helped you start over from scratch? It seems that a mere thank you is not enough. And yet we are limited to simply saying, "Thank you."

We will never forget your thoughtfulness

Felix and Lula Mae Evans Midland

#### Of good morals

To The Editor:

The Lee Key Club should be commended for their efforts to help the Multiple Sclerosis Society in their recent fund raising project.

In rebuttal to the letter from Frand Vest (published last week), persons who volunteer their time and services are generally of good morals and character. I believe that it is needless to worry that because a person deliv-9 ers an unopened bottle of wine, they are tempted to become an alcoholic. The wine was delivered to adults, not the youth of Midland.

Personally, I am very proud of the the Lee Key Club members. If enough adults had volunteered their time and a services, there would not have been? an issue.

## How are tax dollars spent at S.D. reservations?

PIERRE, S.D. (AP) — Millions of taxpayers' dollars are unaccounted for on South Dakota's Indian reservations, and no one knows exactly how much money has been misspent or wasted.

The federal government pours \$2.5 billion or so a year into the nation's Indian reservations — roughly \$185 million of that into South Dakota's seven reservations - in grants from 40 or 50 different agencies.

Two of the major federal aid programs, Labor Department job training assistance and the Bureau of Indian Affairs were examined by re-

porters from The Associated Press and the Aberdeen American News, the Mitchell Daily Republic, the Brookings Daily Register, the Rapid City Journal, and the Sioux Falls Argus-Leader

The task force found cost and accounting problems in three irrigation projects which cost a total of \$4.9 million and was administered by the BIA since 1977.

The money was to be used only to improve existing irrigation systems. But no one checked first to see if the tribes had such systems so they could become eligible for the funds, says Arnold Baron, assistant inspector general for the U.S. Interior Department in Washington, D.C.

As a result, the Crow Creek Sioux Tribe received \$1.7 million although Field Solicitor Wallace Dunker called the project "legally insufficient" because the tribe had no existing irrigation system.

The Oglala Sioux were given \$1 million to repair a ditch irrigation system, but changed their minds and built a new sprinkler system.

And the Rosebud Sioux put in 30 new center-pivot sprinklers with its \$2.2 million.

"We used that to put in a system instead of improving the old existing system as we were supposed to do,' says outgoing tribal Chairman Ed Driving Hawk, now president of the National Congress of American Indians. "We had no existing system."

The FBI has launched a fraud investigation at Rosebud, where the sprinklers cost more two years ago than today's list prices.

The contractor who got the job paid a \$174,000 commission to a consulting firm headed by the tribal attorney who negotiated the contract. Both the attorney and the company refuse to

say what the money was for.

The only project to be audited was Crow Creek, and then only because the tribe requested the audit.

Auditors questioned \$400,000 of the \$1.7 million project. The audit and supporting documents show the tribe inflated the cost of the project by 10 percent and used the extra money to buy farm equipment, although their contract with the federal government prohibited that.

The investigation also found that about 200 youngsters at Rosebud were paid \$2.65 an hour to play softball,

basketball, and football under the Labor Department's Comprehensive Employment and Training Administration (CETA).

Two rodeo instructors were paid \$4,500 for three week's work and the man who set up the program was paid \$500 a week as a coach.

"Those salaries look too high, but I was too busy to read that line," says the federal official who approved the program, Alexander McNabb, head of the Labor Department's Division of Indian and Native Americans Program in Washington, D.C.

#### **Pilot recalls** 45 years in the air

STRATFORD, Conn. (AP) - Of the many thousand passengers Albert Burnham carried during his 45-year flying career, the most memorable was a "hardware salesman" with a fondness for banks.

The man called himself Edwin Mason, but Burnham later learned from a news photo of a fugitive's bullet-riddled body that he was the notorious gangster, Al Brady.

Burnham was a flying instructor at Bridgeport Airport in the 1930s when 'Mason' approached him.

"He turned up at the airport one day and said he wanted to fly around," the retired pilot recalled. "He said he was a hardware salesman. I guess the hardware was machine guns."

Still oblivious to Brady's actual identity, Burnham took the murderer-robber on several flights over Bridgeport during the following six weeks. His passenger made special note of the banks and their proximity to roads leading out of the city, he said.

"I guess he was casing the place for a holdup. He and his friends were hiding out in Bridgeport.

Throughout the six weeks, Brady gave no hint of his ruthless reputation or his criminal plan. "He was perfectly

normal. I went bowling with him and his girlfriend," Burnham said.

Before long, news came that the FBI had tracked Brady to Ban-gor, Maine. They cornered him in a store as he tried to buy a machine gun, and killed him when he tried to flee into the street, the pilot said.

Burnham's love affair with aviation began when he was 14 years old. Shortly after his family moved from Maine to Hartford in 1924, he was drawn to the Connecticut capital's Brainard Airport by "the fascination of airplanes."

For 10 frustrating months he did odd jobs without getting a chance even to ride in a plane. But soon he was earning \$10 per week, enough to buy a 20-minute flight lesson.

It took two years, but he finally became New England's youngest licensed pilot at age 17.

After more flying time, he was the youngest commercially licensed pilot in the state at 18, he said.

In 1938, Burnham bought the sister ship of "The Spirit of St. Louis," which had carried Charles Lindbergh on his monumental solo flight across the Atlantic 11 years before. Burnham cherished his Ryan monoplane, which was numbered 5211, the commercial version of Lindy's 211.

"It was the biggest plane at the airport, 200horsepower, and it traveled 100 miles per hour." he said. "I flew it for 700 hours and taxied people cross-country."

Burnham and his wife, Hazel, who met him when she went to Bridgeport Airport for flying lessons, have lived in many parts of the country in the ensuing years. He has flown a sampling of most types of military airplanes. From the biplane that he took barnstorming to Eastern Airlines' 727s and 707s.

An Eastern pilot for 23 years, he was required to retire at age 60 in 1969. Looking back over his long experience as a pilot, he said, "Every flight's a thrill.

Next Saturday .... and EVERY Saturday morning.
